Part A5: Project Schedule

NOTES: 1) Per CTC Guidelines, all project applications must be submitted with the expectation of receiving federal funding and therefore the schedule below must account for the extra time needed for federal project delivery requirements and approvals, including a NEPA environmental clearance and for each CTC allocation there must also be a Notice to Proceed with Federally Reimbursable work.

- 2) Prior to estimating the durations of the project delivery tasks (below), applicants are highly encouraged to review the appropriate chapters of the Local Assistance Procedures Manual and work closely with District Local Assistance Staff.
- 3) The proposed CTC Allocation dates must be between July 1, 2021 and June 30, 2024 to be consistent with the available ATP funds for Cycle 5.

ATP FUNDING TYPE REQUESTED:

Per the CTC Guidelines, all ATP projects must be eligible to receive federal funding. Most ATP projects will receive federal funding; however, it is the intent of the Commission to consolidate the allocation of federal funds to as few projects as practicable. Therefore, the smallest projects may be granted State Funding from the State Highway Account (SHA) for all or part of the project. Agencies with projects under \$1M, especially ones being implemented by agencies who are not familiar with the federal funding process, are encouraged to request State funding.

especially offes being implemented by agencies who are not familial with the federal funding process, are encouraged to request state familing.										
Do you believe your project warrants receiving state-only funding?	☐ Yes ☐ No									
If "Yes", provide a brief explanation. (Max of 50 Words)		Words Remaining:								
If "Yes", applicants requesting SHA must also attach an "Exhibit 22-F"										

ATP PROJECT PROGRAMMING REQUEST (PPR):

Using the Project Schedule, Project Funding, and General Project information provided, this electronic form has automatically prepared the following PPR pages. Applicants must review the information in the PPR to confirm it matches their expectations.

^{**} Applicants must ensure that the "Total Non-ATP Funding" values show in this table match the overall Non-ATP Funding values they enter into Page 2 of the PPR (later in this form)

- Destinations and key connectivity the project will achieve
- · How the project will increase walking and/or biking
- The lack of mobility if applicable Does the population have limited access to cars? bikes? and transit?
 - o Does the project have an unserved or underserved demand?
- The local health concern responses should focus on:
 - Specific local public health concerns, health disparity, and/or conditions in the built and social environment that affect the
 project community and can be addressed through the proposed project. Please provide detailed and locally relevant answers
 instead of general descriptions on the health benefits of walking and biking (i.e. "walking and biking increase physical activity").
 - Local public health data demonstrating the above public health concern or health disparity. Data should be at the smallest geography available (state or national data is not sufficient). One potential source is the Healthy Places Index (HPI) (https://healthyplacesindex.org)
- For combined I/NI projects: Discuss need for an encouragement, education, and/or enforcement program.

POTENTIAL FOR REDUCING THE NUMBER AND/OR RATE OF PEDESTRIAN AND BICYCLIST FATALITIES AND INJURIES, INCLUDING THE IDENTIFICATION OF SAFETY HAZARDS FOR PEDESTRIANS AND BICYCLISTS. (0-25 POINTS)

A. Describe project location's history of pedestrian and bicycle collisions resulting in fatalities and injuries to non-motorized users, which this project will mitigate. (12 points max)

Applicants are encouraged to use the new UC Berkeley SafeTREC TIMS tool which was specifically designed for the ATP to produce these documents in an efficient manner. Applicants with access to alternative collision data tools and training can utilize their choice of methods/tools. Applicants must respond to question 1 or 2, and have the option to respond to both.

- 1. For applications using the TIMS ATP tool, attach the following:
 - a. Collision Heat-map of the area surrounding the project limits demonstrating the relative collision history of the project limits in relation to the overall jurisdiction/community's collision history
 - b. Project Area Collision Map identifying the past crash locations within the project limits

Referencing the project-area collision summaries/data provided in questions 1 and/or 2, discuss the extent to which the proposed project limits represents one of the agency's top priorities for addressing ongoing safety and discuss how the proposed safety improvements correspond to the types and locations of the past collisions. (e.g. sidewalks, bike lanes, lighting, bulb-outs, signals/ barriers, etc.)

For Projects with Non-Infrastructure elements (Combined I/NI projects):

As appropriate, describe how the NI program elements:

- · educates bicyclists, pedestrians, and/or drivers about safety hazards for pedestrians and bicyclists; and
- encourages safe behavior, including through enforcement.

B. Safety Countermeasures (13 points max)

Describe how the project improvements will remedy (one or more) potential safety hazards that contribute to pedestrian and/or bicyclist injuries or fatalities. Referencing the information you provided in Part A, demonstrate how the proposed countermeasures directly address the underlying factors that are contributing to the occurrence of pedestrian and/or bicyclist collisions.

- a. Reduces speed or volume of motor vehicles in the proximity of non-motorized users? Discuss current speed and volume and anticipated speed and volume.
- b. Improves sight distance and visibility between motorized and non-motorized users? Discuss current sight distance and/or visibility issue(s) and anticipated issue resolution.
- c. Eliminates potential conflict points between motorized and non-motorized users, including creating physical separation between motorized and non-motorized users?

Discuss current conflict point description and anticipated issue resolution.

- d. Improves compliance with local traffic laws for both motorized and non-motorized users? Discuss which law(s) and how the project will improve compliance.
- e. Addresses inadequate vehicular traffic control devices?

Discuss which devices are inadequate, how they are inadequate and how the project will address the issues.

- f. Inadequate or unsafe bicycle facilities, trails, crosswalks and/or sidewalks? Identify which facilities are inadequate, how they are inadequate and how the project will address the issues.
