## **Exhibit 14-A Local Agency Submittal Requirements** for Federal Participation in Utility Relocations

## LOCAL AGENCY SUBMITTAL REQUIREMENTS FOR FEDERAL PARTICIPATION IN UTILITY RELOCATIONS

			participation for a specific utility relocation, a request for "Specific Authorization" must be trans. The request must contain the following:
1.	] A	color	coded plan prepared on highway layout sheets, clearly, and accurately showing the following:
		Exis	sting and proposed right of way lines
		Exis	sting and proposed access control lines (if applicable)
		Exis	sting and proposed highway centerline
		For	the existing and for the proposed utility facility, show their:
			Location
			Type
			Size
			Length
			Clearly plot and label the type of property rights the owner is claiming as a prior right (if applicable)
			Clearly plot and label the type of proposed property rights to be supplied by the state (if applicable)
			Show geometric features if the relocation is related to them
			Provide a color coded legend and title block on the plan
2.	] One	e copy	y of a detailed itemized estimate of cost showing, as a minimum the following:
		Esti	mated cost of labor
		Esti	mated cost of materials (list the major items of materials)
		Esti	mated cost of transportation and equipment
		Esti	mated cost of overhead (include a list of major components)
		Esti	mated cost of any new right of way required

Estimated credit for salvage and depreciation
Estimated credit for betterment
The estimate submitted with the request for Specific Authorization must contain an entry for each of the items listed above. If a particular item is not applicable, a zero amount shall be shown.
Unit costs such as broad gauge units of property may be used for estimate purposes where the utility owner uses such units in its own operation. These costs normally include overhead, labor, transportation, equipment, and materials. Right of way costs and estimated credits must be given separately. If this type of estimate is used, it must be identified as a "broad gauge" estimate.
If it is not possible to obtain an adequate estimate from the owner, the local agency may prepare an estimate based on the owner's plan using current cost data from similar utility relocation work. Justification for use of an estimate prepared by the local agency must be submitted with the request.
If the estimate is to be used for a lump sum Utility Agreement, federal regulations require that it must be accurate, comprehensive, verifiable, and in sufficient detail to give a clear picture of the work involved and the cost of the individual items. The estimate should be broken down by:
☐ Direct labor by class, rate, and time
Labor surcharges
Overhead and indirect construction charges
Materials and supplies, by item, quantity, and price
Handling charges
Transportation
Equipment by size, type, rate, and time
Preliminary engineering
Construction engineering
Salvage and depreciation credits
Betterment credit
Other items as required by 23 CFR 645
Utility owners should be advised that lump sum agreements cannot be entered into on federal-aid projects, unless the owners are prepared to supply the required detailed itemized estimate in the planning stage. Please contact the Caltrans District Utility Coordinator (via the District Local Assistance Engineer [DLAE]) for information on additional requirements and/or restrictions.
3. Copies of the proposed Utility Agreement and Notice to Owner

4.	Doc	umentation supporting owner's claim of prior rights
5.	A le	tter of transmittal in triplicate requesting Specific Authorization containing:
	proj the also	e file data including county, route, notice number, Utility Agreement number (if different), federal ject number, and name of the utility owner. If both right of way and construction funds are involved, right of way and construction federal project numbers must be shown (the Utility Agreement must o contain both numbers). If all of the work is to be performed by the highway contractor, only the struction federal project number need be shown.
	Loc	eation of the work by geographical limits.
	Ger	neral description of what is to be done including a list of the major facilities involved.
		describing who will perform the work. In order to comply with federal requirements, the transmittal one or more of the following statements as applicable:
THE	WORI	K WILL BE PERFORMED BY:
•		<b>tility owner's forces:</b> The local agency has determined this is cost-effective and has verified the is qualified to perform the work in a satisfactory manner with its own personnel and equipment.
•	verifie	<b>tility owner's continuing contractor:</b> The local agency has determined this is cost-effective and d the contract between the owner and the contractor is in writing and that similar work is regularly med for the owner under the contract at reasonable costs.
•	own fo	etitive bid contract: The owner is not adequately staffed or equipped to perform the work with its orces. The local agency will verify that the utility owner will award the contract for the work to the , qualified, responsible bidder based on an appropriate solicitation.
•		<b>ocal Agency's highway contractor</b> : The utility work is to be included in the local agency's highway action contract. The local agency has determined this is the most cost-effective method.
	The lo	ocal agency is responsible for making the determination and documenting within a statement, the ing:
		The dates between which it is anticipated the work will be performed.
		A determination as to whether the local agency's payment standards or 23 CFR 645 payment standards are more restrictive and the reasons supporting said determination.
		An explanation of any significant difference between the existing facility and the proposed rearrangement as shown on the plans and the itemized estimate of cost. For example, if an increase in size or capacity is shown on the plans and betterment credits are not reflected in the itemized estimate, an explanation and justification must be included.
		If prior rights of the owner are involved and a Joint Use Agreement or Consent to Common Use Agreement is required, include the following statement: "Joint Use Agreement(s) or Consent to Common Use Agreement(s) will be executed by both parties, and an original copy will be retained by the local agency."

If the utility will occupy any portion of the new highway right of way and does not have prior
rights in the old location, include a statement that the relocation plan does not contain
encroachments contrary to the policy of the authority having jurisdiction over the right of way and
that the appropriate standard encroachment permit will be issued.

For local agency use, please refer to the Caltrans-approved "Report of Investigation," Form RW 13-3 in the Caltrans *ROW Manual*.

**Distribution: 1)** Local agency submits to DLAE
