## Contents

Bridge List Items and Keys to Coded Information.....	ii
County Table.....	v
Alphabetic City Code Table.....	vi
District Log.....	1
Index of Bridge Numbers.....	11

Prepared by  
California Department of Transportation  
Structure Maintenance & Investigations

The information in this publication is available on the World Wide Web at:  
<http://www.dot.ca.gov/hq/structur/strmaint/brlog2.htm>

## BRIDGE LIST ITEMS AND KEYS TO CODED INFORMATION

### Postmile

Entries in **BOLD** type show DISTRICT-COUNTY-ROUTE. Other entries show postmile prefix followed by postmile to the nearest hundredth of a mile. Prefixes of R, M, and N refer to re-aligned routes. Prefix L refers to a section or route paralleling another route. When the route is on the deck of the bridge, the postmile is recorded at the beginning of the structure (i.e. the lowest postmile on the bridge). When the route goes under the structure, the postmile is recorded on the underpassing route where the structure is first encountered. All other measurements in this publication are given in meters.

### Bridge Number

The official structure number assigned by CalTrans. The Bridge Number Suffix carries information about the function of the structure.

Blank	Structure carrying two-way traffic
C	Center structure
E	Connector structure
F	Connector structure
G	Connector structure
H	Connector structure
J	Outer outer left
K	Left outer highway structure
L	Left structure of left inner structure
M	Buried Hazard or miscellaneous structure
R	Right structure or right inner structure
S	Right outer highway structure
T	Outer outer right
W	Drainage pumping plant
Y	Structure on State-owned and maintained connections no on main highway (may be closed)
Z	Access to private property or closed with no access

### OU

"O" Indicates that the route is carried on the deck of the structure

"U" Indicates a route crossing under the structure.

### O - Structure Name U - Roadway Under or Route Information

When route traffic is on (O) the structure, the structure name is shown. When route traffic is under (U) the structure, the roadway name is shown, otherwise, miscellaneous route information is shown.

## Structure Types

Code for main span type followed by approach span type (if different).

### First character (Material):

1 = Concrete  
 2 = Concrete continuous  
 3 = Steel  
 4 = Steel continuous  
 5 = Prestressed concrete  
 6 = Prestressed concrete continuous  
 7 = Wood or timber  
 8 = Masonry  
 9 = Aluminum, wrought iron, or cast iron  
 0 = Other

### Second & Third characters (Design):

01 = Slab  
 02 = Stringer/Multi-beam or Girder  
 03 = Girder and Floorbeam System  
 04 = Tee Beam  
 05 = Box Beam or Girders - Multiple  
 06 = Box Beam or Girders - Single or Spread  
 07 = Frame (except frame culverts)  
 08 = Orthotropic  
 09 = Truss - Deck  
 10 = Truss - Thru  
 11 = Arch - Deck  
 12 = Arch - Thru  
 13 = Suspension  
 14 = Stayed Girder  
 15 = Movable - Lift  
 16 = Movable - Bascule  
 17 = Movable - Swing  
 18 = Tunnel  
 19 = Culvert  
 21 = Segmental Box Girder  
 22 = Channel Beam  
 00 = Other

## City

CalTrans alphabetic code for the city or government land within whose limits the bridge exists. The Alphabetic City Codes Table shows the full city names corresponding to these codes. Where a name is preceded by an asterisk, it indicates a bridge on government lands not within any city limits.

## Bridge Length

The length of the structure from paving notch to paving notch in meters.

## Width

The out-to-out width of the structure to the nearest tenth of a meter. For through structures, the lateral clearance between superstructure members. For flared structures, the minimum deck width. No width is shown for non-grade-top culverts or structures not carrying vehicular traffic, such as underpasses or pedestrian overcrossings.

## Number of Spans

The number of span in the structure. Upper-level spans of double deck structures are not included in this count.

## Min VC Over Roadway

The minimum vertical clearance over the traveled way portion of the ROUTE in meters. In the case of arches, tunnels, through trusses, etc, where the minimum clearance does not give a true picture, an asterisk ("\*\*") is shown after the clearance. In such cases, an accurate depiction of the available vertical clearance may be obtained from the structure clearance diagram which resides within the office of Structure Maintenance and Investigations.

## Sidewalk Widths

The minimum width of left and right sidewalks or curbs, to the nearest tenth of a meter. Where this value is 1 meter or greater, the structure is considered to carry pedestrian traffic.

**Year Built (Original Construction) and Year Widened or Extended**

The year of original construction. For some older bridges, this may be an estimate.

**Permit Rating**

Permit ratings are shown for information only. They should not be used for permit issuance. .

The permit rating is usually a string of five characters showing permit capacity for 5,7,9,11, and 13 axle vehicles. Where a single character is shown, it represents an "administrative" rating.

- P Purple permit capacity
- G Green permit capacity
- O Orange permit capacity
- X No permit capacity

Permit rating are for information only. They are not to be used for permit issuance.

**P (Posting)**

Posting -

- B Open - posting recommended
- D Open under temporary conditions
- E Open - temporary structure
- G New structure - not yet open
- K Closed to all traffic
- M Closed or partially closed pending repairs
- J Posted for load
