CODE OF ETHICS for EMPLOYEES
in
RIGHT OF WAY AND LAND SURVEYS
DEPARTMENT OF TRANSPORTATION
STATE OF CALIFORNIA

Recognizing our responsibility to our Department and to the people of the State of California and feeling that we should encourage and foster high ethical standards in our organization, we do hereby subscribe to the following Code of Ethics for our constant guidance and inspiration, predicated upon the basic principles of trust, justice, and fair play.

- *To show faith in the worthiness of our profession by industry, honesty, and courtesy in order to merit a reputation for high quality of service and fair dealing.*

- *To add to the knowledge of our profession by constant study and to share the lessons of our experience with our fellow employees.*

- *To build an ever-increasing confidence and goodwill with the public and our employees by poise, self-restraint, and constructive cooperation.*

- *To ascertain and weigh all the facts relative to real properties in making an appraisal thereof using the best and most approved methods of determining just compensation.*

- *To conduct ourselves in the most ethical and competent manner in our negotiations with affected property owners, thus meriting confidence in our knowledge and integrity.*

- *To accept our full share of responsibility in constructive public service to the community, state, and nation.*

- *To strive to attain and to express a sincerity of character that shall enrich our human contacts ever aiming toward that ideal -- the practice of the "golden rule."*

1.01.00.00 – RIGHT OF WAY MANUAL OVERVIEW

1.01.01.00 Purpose

The Right of Way Manual is prepared by the Division of Right of Way and Land Surveys (RWLS) to provide uniform procedures and guidance for Right of Way (RW) functions for the California Department of Transportation (Department). This manual is neither intended as, nor does it establish, a legal standard for these functions. Policies and practices established herein are for the information and guidance of the officers and employees of the Department and those under its oversight. It implements 23 Code of Federal Regulations (CFR) 710.201(c) which in part mandates each state department "***which receives funding from the highway trust fund shall maintain a manual describing its right-of-way organization, policies, and procedures.***" The CFR further obligates other public land acquisition organizations (Local Public Agencies) or private consultants under the Department's oversight on Federal-aid projects to comply with State and Federal laws, regulations, and the Department's policies and practices. Local Public Agencies are to use this manual as their guidance tool for delivering their RW program(s) in a manner that is in compliance with the Uniform Act and Code of Federal Regulations. While this manual outlines some aspect of Land Surveys' role in project delivery, more detailed guidance for the Land Surveys function is found in the Land Surveys Manual.

1.01.02.00 Authorities

- Code of Federal Regulations (CFRs):
  - Title 23 – Highways
  - Title 36 – Parks, Forests, and Public Property
  - Title 43 – Public Lands: Interior
  - Title 49 – Transportation
  - Title 50 – Wildlife and Fisheries

- California Codes:
  - Business and Professions Code (BPC)
  - Civil Code (CIV)
  - Code of Civil Procedure (CCP)
  - Education Code (EDC)
  - Evidence Code (EVID)
  - Financial Code (FIN)
  - Fish and Game Code (FGC)

© 1994-2025 California Department of Transportation. All rights reserved.

    - Government Code (GOV)
    - Health and Safety Code (HSC)
    - Insurance Code (INS)
    - Labor Code (LAB)
    - Probate Code (PROB)
    - Public Contract Code (PCC)
    - Public Resources Code (PRC)
    - Public Utilities Code (PUC)
    - Revenue and Taxation Code (RTC)
    - Streets and Highways Code (SHC)
    - Vehicle Code (VEH)
    - Water Code (WAT)
    - Welfare and Institutions Code (WIC)

- Stewardship and Oversight Agreement (Federal Highway Administration/Caltrans)

1.01.03.00 Scope

The manual includes RW policies, instructions, and standard practices, as well as forms and exhibits intended to aid field and office operations. This manual is not a textbook or a substitute for law, statute, regulation, knowledge, experience, or judgment.

Administrative regulations, statutory references, and citations from U.S. Code (USC) and the CFR are referenced but not quoted in their entirety, except where noted. Citations are contained in the exhibits or in other books and pamphlets that are available to the region/district. Flowcharts have been developed for those chapters where applicable and helpful to the reader.

1.01.04.00 Manual Organization

Chapters, sections and subsections are identified by a decimal numbering system to facilitate referencing chapter and section headings in bold print. Quoted text of any referenced law, statute, or regulation is shown in bold italicized print. Abbreviations and acronyms are used wherever possible. A list of all current forms and exhibits immediately follow the chapter sections to which they relate.

© 1994-2025 California Department of Transportation. All rights reserved.

This manual is organized along RW's normal project delivery workflow as much as possible. The first chapters deal with planning, financing, and federalization of RW activities. The manual then proceeds through the project development process, from initial estimates to final project closeout. Some activities are accomplished after construction of a project, for example, Airspace leasing and disposal of Excess Land. RW activities not directly related to the Department's project delivery are covered in the last chapters.

1.01.05.00 Forms and Exhibits

Use of a given Form or Exhibit is mandatory for its stated purpose (unless stated as optional).

- Forms are available online:
  - External Forms page
  - Internal Forms page (internal Caltrans link)

- Exhibits are available online:
  - External Exhibits page
  - Internal Exhibits page (internal Caltrans link)

As Forms and Exhibits are not located within the RW Manual, please visit the webpages above to ensure you are using the most current version of a Form/Exhibit.

1.01.06.00 Revisions

Revision suggestions can be made via the RW Manual Revision Request form.

The RW Manual is currently updated twice a year: once in January and again in July.

In order to accommodate statewide review and allow for comment incorporation and publishing time, deadlines for new content in the next publication of the RW Manual are on the following schedule:

© 1994-2025 California Department of Transportation. All rights reserved.

Publication Deadlines for Next RW Manual (January 2026)

- 09-19-2025 – last date to submit RW Manual Revision Requests
- 10-17-2025 – last date Authors can submit approved drafts for statewide review
- 10-22-2025 – 11-26-2025 – last available statewide review period
- 12-05-2025 – 01-09-2026 – incorporation of review comments, final edit/review period
- 01-09-2026 – final approved edits due to Publications Manager
- 01-12-2026 – 01-22-2026 – incorporation of all final edits
- 01-23-2026 – publication date

When immediate revisions are required, Right of Way Manual Directives (RWMDs) are published. These interim policy memos are posted online at the RW Manual Revisions page. RWMDs will serve as the official policy for that revised item until incorporation into the next manual publication.

Other comments and suggestions for improvements to the RW Manual may be submitted to RWManual@dot.ca.gov.

1.01.07.00 Exceptions

Exceptions to a policy or procedure outlined in the RW Manual will be considered on a case-by-case basis, depending on the nature of the request and its potential impacts. Exception requests are typically made by the District/Region RW Manager to the corresponding Headquarters (HQ) Office Chief. The HQ Office Chief is responsible for review and approval; depending on type of request, the HQ Division Chief may need to ultimately approve.

2.01.00.00 – ORGANIZATION'S PURPOSE AND OVERVIEW

2.01.01.00 Right of Way's Purpose

Right of Way (R/W) serves the statewide real estate needs of Caltrans by providing property rights and real property management services for the planning, development, and construction of transportation projects on time, within budget, and in support of Caltrans' purpose, mission, vision, and goals. Caltrans' current mission, vision, goals, and values may be referenced at the "About Caltrans" page.

2.01.02.00 Right of Way and Land Surveys Organization

Right of Way and Land Surveys (R/W & LS) maintains its headquarters (HQ) in Sacramento and a Division in each of the Department's twelve district offices. R/W regionalized three of the district offices for the purpose of workload leveling and the facilitation of project delivery: Districts 1, 2, and 3 comprise the Northern Region. A District Director controls operations within each of the twelve district offices. However, the Chief, Division of Right of Way and Land Surveys (Division Chief) in HQ administers the statewide R/W & LS program and directs statewide R/W policies and administration through Region/District Right of Way Managers and HQ's R/W & LS Office Chiefs.

The organizational structure for the Land Surveys function within R/W & LS can be found in Chapter 1 of the Surveys Manual and Chapter 6 of this Manual (R/W Engineering).

R/W & LS consists of a highly skilled professional staff of R/W Agents, Land Surveyors, administrators, and others who play a vital role in contributing to the Caltrans mission by delivering right of way products for transportation projects and managing other real estate assets related to those projects. R/W Agents and Land Surveyors are the public face of Caltrans, since they are among the first Caltrans representatives to meet members of the public affected by transportation projects. As a result, R/W & LS staff and must abide by a stringent Code of Ethics (found at the beginning of this Manual).

© 1994-2025 California Department of Transportation. All rights reserved.

2.01.03.00 Functions

R/W administers the statewide program with primary responsibilities within office functions to:

- Appraise and purchase property rights required for transportation purposes; effect the orderly relocation of displaced people, personalty, businesses, and utility facilities; and clear properties prior to construction as part of project delivery.

- Comprehensively manage the Department's real property and dispose of property no longer needed for transportation operational purposes.

- Monitor R/W activities on federally assisted local facilities.

- Maintain a stewardship role in the expenditure of federal funds.

- Ensure local agency compliance with state and federal requirements when local funds are used for projects on the State Highway System.

More information on major R/W functions is provided in the following pages.

© 1994-2025 California Department of Transportation. All rights reserved.

MAJOR R/W FUNCTIONAL AREAS

Function	Synopsis
Planning and Management	Develop, manage, and report on R/W's state, federal, and local capital resources for projects on the State Highway System.
Project Coordination	Oversee R/W data systems, coordinate and monitor project schedules, provide workplan support and delivery, along with related administrative activities.
Estimating	Prepare, update, and review R/W estimates to forecast and facilitate programming of funds for capital outlay and support.
R/W Engineering	Prepare all maps, documents, and legal descriptions needed to acquire right of way and dispose of excess land. Prepare and update record maps of Caltrans-owned property.
Appraisals	Prepare documentation required to establish the basis for just compensation to acquire right of way, lease airspace rights, and dispose of excess land.
Acquisitions	Conduct all activities necessary to acquire property rights to construct and maintain the transportation system. Initiate and follow the condemnation process if and when negotiations have reached an impasse.
Certification	Coordinate Right of Way Certification prior to construction.
Relocation Assistance	Provide full implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act in the relocation, advisory assistance, and reimbursement of displaced persons and businesses.

© 1994-2025 California Department of Transportation. All rights reserved.

MAJOR R/W FUNCTIONAL AREAS (Continued)

Function	Synopsis
Property Management	Manage all Caltrans-owned properties held for future transportation projects, employee housing, and excess land sales. Responsible for demolition and clearance of right of way for construction, and locating and leasing space for construction Resident Engineer offices, as needed. Responsible for Storm Water program.
Utility Relocations	Conduct all activities necessary to oversee regulatory compliance, early identification, avoidance, accommodation, or relocation of utility facilities that would be in conflict with planned construction or subsequent operation of the transportation facility.
Airspace	Lease and manage various types of Caltrans-owned and operated right of way and/or facilities that are used to support the transportation system, but that safely accommodate a secondary use.
Excess Land	Dispose of all properties declared as excess to Caltrans' transportation projects or operational needs. This can include fee owned land, easements, materials sources, disposal sites, maintenance station properties, or any other property owned by Caltrans. Oversee and support the Real Property Retention Review process.
Asset Management	Oversee project development of operational facility projects. Promote and pursue opportunities to optimize use of Caltrans' real property assets. Administer Caltrans' Lands and Buildings database, the Asset Management Inventory (AMI).

© 1994-2025 California Department of Transportation. All rights reserved.

MAJOR R/W FUNCTIONAL AREAS (Continued)

Function	Synopsis
Local Programs	Provide oversight and guidance for all R/W activities, including utility relocation, to local public agency partners for local agency projects of all funding types on the State Highway System, as well as for State and/or Federal funded local agency projects off the State Highway System.
Strategic Innovation	Develop and deliver training, work to enhance professional development, update and create all R/W publications, manage and develop information systems, coordinate examination planning and recruitment efforts, oversee Title VI activities.
Railroad Coordination	Perform early coordination and all railroad activities necessary leading to clearance of railroad involvements for transportation project delivery.

© 1994-2025 California Department of Transportation. All rights reserved.

2.02.00.00 – PROJECT DEVELOPMENT

2.02.01.00 Transportation Project Development Process

R/W participates throughout the transportation project development process as a member of the project development team. The transportation project development process starts with initiation of feasibility studies in accordance with the Project Development Procedures Manual (PDPM). The process covers project report studies, community interaction, environmental studies, clearance documents, alternatives, and public hearings–all leading to completion of the plans, specifications, and estimates (PS&E phase of a project). Current Department policy requires that project reports be prepared on all transportation development and improvement projects.

As early as the feasibility study Project Initiation Document (PID) stage, and as changes occur during the project development process, R/W produces a R/W Conceptual Cost Estimate or Data Sheet that contain R/W's estimated capital outlay, support workplan, and schedule requirements for the project. Upon obtaining the Project Approval and Environmental Document (PA&ED), R/W performs regular R/W activities to acquire and clear right of way required for the project. R/W's major deliverable is the R/W Certification, a statement of the level of readiness for construction required as part of the PS&E package. Upon completion of the PS&E, the project is Ready to List (RTL) the contract for project construction for advertisement, award, and completion of construction. The process ends with Construction Contract Acceptance (CCA) and project closeout of contractual and financial obligations.

2.02.02.00 Caltrans Project Management

The Division of Project Management oversees Caltrans project delivery activities. Project Management emphasizes planning, monitoring, and managing project delivery activities and resources through task management to deliver the right project, at the right time, within budget, and with the quality promised. Project Management emphasizes communication in a team-based environment. The project manager, functional managers, project management support personnel, and region/district managers work together with any local partners to deliver the project. As part of this effort, Caltrans has developed a Project Management Manual (internal Caltrans link) that sets forth the policies, goals, organizational structure, and roles and responsibilities of the project management organization. R/W participates as

© 1994-2025 California Department of Transportation. All rights reserved.

an active member of the project development team, generally as a functional team member and now in the evolving task manager role.

To support the Department's Project Management program, Region/District Divisions of R/W have created R/W Project Coordinator positions. R/W Project Coordinators act as points of contact to coordinate the exchange of information, respond to customer needs and enhance communication among divisions and offices in the Department, thereby aiding in project delivery on time and within the estimated cost.

2.02.03.00 Hazardous Materials

Caltrans' policy in the development of transportation projects is to fully consider all aspects of potential hazardous materials sites. Contaminated property is acquired only after adequate prior investigation and proper contractual and valuation safeguards are incorporated into the property acquisition process. The property owner shall complete remediation of contamination, if possible, prior to the Department's acquisition of the property. Where cleanup by the owner prior to acquisition is not possible, Project Delivery Directive PD-02 "Contaminated Property Acquisition" outlines exception procedures.

See Manual Section 7.04.12 for R/W's role in this phase of project development and valuation considerations relating to contaminated properties. In addition, procedures specific to each R/W functional unit are found in the hazardous materials sections in most chapters of the R/W Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

2.03.00.00 – TRAINING AND DEVELOPMENT

2.03.01.00 Philosophy

R/W & LS is committed to developing and maintaining a highly qualified and motivated workforce that is representative of California's diverse population. Inherent in this commitment is the belief that a well-trained and motivated workforce will improve efficiency, reduce costs, and offer an increased level of service to our customers.

2.03.02.00 General

Employees in R/W possess distinct and specialized skills. Additionally, all employees are expected to have basic computer literacy, good communication and interpersonal skills, as well as familiarity with the range of functions within R/W.

Both formal and informal training is required for all employees. Formal training is offered in accordance with Caltrans' policies and falls into the following categories: mandated, job-required, job-related, personal development, upward mobility, and career-related. The formal training outlined in this section does not include mandated State and Caltrans training courses required of all employees. Informal training refers to on-the-job training and is an essential element in our philosophy of developing well-trained employees.

2.03.03.00 Responsibility

All R/W employees share responsibility for developing and maintaining a well-trained workforce. (See below.)

- **HQ Project Delivery Professional Development Managers** are responsible for coordinating, scheduling, funding, and monitoring statewide training courses, as well as developing new courses and training instructors.

- **HQ Managers** are responsible for planning training needs for HQ employees, identifying and prioritizing functional training needs statewide, identifying and providing personnel to be trained and used as instructors, and serving as subject matter experts to develop new courses.

© 1994-2025 California Department of Transportation. All rights reserved.

- **Region/District Managers** are responsible for planning the training needs of region/district employees; maintaining training records; tracking, requesting and optimizing local funding for training; and identifying and providing personnel to be trained and used as instructors.

- **First-Line Supervisors** are the primary managers and providers of training in their role as mentors. They also are responsible for annual staff evaluations, reviewing and updating the employee's training history, assessing the employee's training needs, and completing probationary reports for new and promoted employees.

- **Employees** are ultimately responsible for their own personal and professional development. This includes assuming personal and fiscal responsibilities for developing skills and abilities. They are responsible for identifying training needs to be included in their IDPs; for fully participating in assigned training; for seeking training opportunities to improve job performance and self-development (including performing on task forces, seeking developmental assignments outside of the Division, serving on exam panels, serving as instructors, taking short-term assignments in other regions/districts); for developing mentor and lead person skills to assist in training others; and for maintaining a current, personal training history.

Attainment of professional designations from associations such as the International Right of Way Association (IRWA), Appraisal Institute (AI), or any internally sponsored professional certification can be beneficial to all R/W staff. The Division also has a Right of Way Agent Certificate program (internal Caltrans link) which is available to all R/W Agents. While it is the employee's prerogative to attain such designations, R/W will support this endeavor to the degree that it benefits Caltrans.

© 1994-2025 California Department of Transportation. All rights reserved.

2.03.04.00 Training Standards

Training standards are structured to give all employees basic knowledge of R/W operations and to provide the skills necessary for optimum job performance. Each region/district must ultimately assess its own needs, its available resources, and the personnel involved when determining employees' training.

A general orientation process is an important step in training employees new to R/W. "The Supervisor's New Employee Orientation Checklist" (PM-0943) (internal Caltrans link) and the "Orientation to Right of Way & Land Surveys Checklist" (02-EX-01) are guides for the first-line supervisor to follow to ensure that all employees become familiar with Caltrans in general and R/W in particular. New employees should also review the Right of Way Agent Field Safety Guide at the RW Publications page (internal Caltrans link).

2.03.05.00 Employee Retention

R/W & LS is committed to strategic planning for effective recruitment to fill vacancies as well as long-term retention of experienced employees. Staff turnover adversely impacts production while a position is vacant and also during the natural transition from a new, untrained employee to being experienced with the necessary knowledge and skills for optimal productivity.

In an effort to determine causes of turnover and develop strategies to improve employee recruitment and retention in R/W, supervisors are responsible for providing the employees with the "Confidential RW Exit Interview Questionnaire" (RW 02-03) (internal Caltrans link) for completion, along with an envelope addressed to HQ R/W when given notice of an employee's intention to leave R/W. The employee also may provide a copy of the completed form to their supervisor or other local R/W management for information.

© 1994-2025 California Department of Transportation. All rights reserved.

2.04.00.00 – RIGHT OF WAY ADMINISTRATION

2.04.01.00 Title VI of the Civil Rights Act of 1964 and Related Statutes

Caltrans Director's Policy 28 "Title VI of the Civil Rights Act of 1964 and Related Statutes" (internal Caltrans link) states that Caltrans shall provide equal opportunity and full access to its programs, services, and information to all persons without regard to race, color, national origin, sex, disability, age, or income status. RWLS assures that all services and benefits to be derived from any right of way activity will be administered in accordance with this policy, and as required in Title VI and related statutes, including but not limited to the following:

Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d, provides that:

> "*No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.*" (PROHIBITS DISCRIMINATION IN IMPACTS, SERVICES, AND BENEFITS OF, ACCESS TO, PARTICIPATION IN, AND TREATMENT UNDER A FEDERAL-AID RECIPIENT'S PROGRAMS OR ACTIVITIES.)

The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601-4655, provides:

> "*…a uniform policy for the fair and equitable treatment of persons displaced as a direct result of programs or projects undertaken by a Federal agency or with Federal financial assistance.*" (PROVIDES FOR FAIR TREATMENT OF PERSONS DISPLACED BY FEDERAL AND FEDERAL-AID PROGRAMS AND PROJECTS.)

The Uniform Relocation Act Amendments of 1987, Public Law 100-17, provides:

> "*…for fair, uniform, and equitable treatment of all affected persons; …(and) minimizing the adverse impact of displacement… (to maintain) … the economic and social well-being of communities; …by establishing a lead agency and allowing for State certification and implementation.*" (UPDATED THE 1970 ACT AND CLARIFIED THE INTENT OF CONGRESS IN PROGRAMS AND PROJECTS WHICH CAUSE DISPLACEMENT.)

© 1994-2025 California Department of Transportation. All rights reserved.

Title VIII of the 1968 Civil Rights Act, 42 U.S.C. 3601-3619, provides that:

> *"It shall be unlawful…to refuse to sell or rent after the making of a bona fide offer, or to refuse to negotiate for the sale or rental of, or otherwise make unavailable or deny, a dwelling to any person because of race, color, religion, sex, familial status, or national origin."* (PROHIBITS DISCRIMINATION IN THE SALE OR RENTAL OF HOUSING – U.S. Department of Housing and Urban Development [HUD] is the primary interest agency, but FHWA and States under Title VI are responsible for preventing discrimination in the function of Right of Way.)

Presidential Executive Order 12898 addresses Environmental Justice regarding minority and low-income populations.

Presidential Executive Order 13166 improves access to services for persons with limited English proficiency (LEP).

For more information on Title VI of the Civil Rights Act of 1964 and related statutes, refer to RW 02-EX-03 or the Caltrans Title VI Program.

2.04.01.01 HQ Responsibilities

The Division will designate a Title VI Program Area Advisor (PAA) whose primary responsibilities are to:

- Refer all Title VI discrimination complaints to Caltrans Office of Civil Rights (OCR) Title VI Program Branch. The Division will follow the Title VI Program.
- Ensure Title VI requirements are included in policy directives, contracts, and program manuals, and that the procedures used have built-in safeguards to prevent discrimination.
- Advise Caltrans' Title VI Coordinator in HQ OCR.
- Serve as liaison between the RW Title VI Liaisons in the Regions/Districts and the Caltrans Title VI Coordinator in HQ OCR.
- Ensure the collection and analysis of the "Right of Way Title VI Survey" (RW 02-01) is done by the Region/District RW Title VI Liaisons.

© 1994-2025 California Department of Transportation. All rights reserved.

- Ensure evaluation of Region/District RW performance for compliance with Title VI laws and regulations, delivery of the Title VI survey, and maintenance of Title VI records.

- Assist the Caltrans Title VI Coordinator in HQ OCR in coordinating and conducting compliance reviews of HQ RWLS.

- Review and recommend needed changes in policy.

- Provide the Caltrans Title VI Coordinator in HQ OCR with an annual report of the HQ RWLS' Title VI-related accomplishments and goals for inclusion in the Title VI Annual Report to FHWA.

- Provide information related to right of way activities in languages other than English.

2.04.01.02 Region/District Responsibilities

Each Region/District Chief for RW shall appoint a Region/District RW Title VI Liaison, who will collect and provide accurate information in a timely manner upon request.

During the first contact, each Region/District /W Agent providing services to the public must deliver to property owners, tenants, and displacees the following Title VI information:

- Title VI brochure – available in multiple languages.

- "Title VI of the Civil Rights Act of 1964 and Related Statutes" (02-EX-03)

- The U.S. Department of Commerce of the Census, Language Identification Flashcard, Exhibit 02-EX-04, when the RW Agent needs to identify a language while conducting right of way related activities.

- "Right of Way Title VI Survey" (RW 02-01)

- OCR's "Title VI and Other Discrimination Complaint Form" (OCR-0002)

Additionally, Agents shall document delivery of the Title VI information and the use of the Language Identification Flashcard with an appropriate diary entry.

© 1994-2025 California Department of Transportation. All rights reserved.

The Region/District RW Title VI Liaison shall provide to the local District Title VI Liaison an annual report of the RW Region's/District's-related accomplishments and goals upon request. The information will be compiled and conveyed by the District's Title VI Liaison to the Caltrans Title VI Coordinator in HQ OCR for analysis and inclusion in the Title VI Annual Report to FHWA.

2.04.01.03 Right of Way Quality Management

The Division incorporates quality management principles throughout its staff development, guidance, and operations, to deliver quality products and services. This Right of Way Manual covers the processes and deliverables by functional specialty, the structured review processes for deliverables and services, and the appropriate staff delegations necessary to maintain quality.

In contrast, this section is concerned with the Division's statewide program review structure: the procedures through which the program and its products and services undergo periodic reviews, function by function, functional review reporting, and management reporting for monitoring and process improvement.

Division quality management principles are explained in Exhibit 02-EX-05, RW Quality Management Policy.

Detailed program review procedures are provided in 02-EX-06, RW Quality Management Handbook.

Quality Management Reviews are reported using 02-EX-07, RW Quality Enhancement Joint Review (QEJR).

Quality Management results are summarized yearly using 02-EX-08, RW Quality Management Annual Report.

2.04.02.00 RWLS Roster

The RWLS Roster Coordinator initiates, assembles, and distributes the RWLS Roster, which serves as a resource for information on personnel in RW classifications statewide. The RWLS Roster is typically published several times throughout the year and is available on the Division's homepage (internal Caltrans link). The Roster includes information regarding classifications, hire dates, etc.

© 1994-2025 California Department of Transportation. All rights reserved.

Each Region/District Division Chief for RW shall appoint a Region/District Roster Coordinator, who will provide accurate information in a timely manner upon request.

2.04.03.00 Statistical Reports

2.04.03.01 RWLS Division Annual Report

HQ RWLS prepares an Annual Report which compiles production statistics and provides an overview of RWLS activities during the preceding fiscal year. The report incorporates a Business Plan for coming years. The report is an internal document intended primarily for RWLS' use. HQ RW LS has overall responsibility for initiating, assembling, and finalizing the report. The various branches within HQ RWLS and Region/District RW are required to supply certain data upon request. Information should be provided as quickly and accurately as possible following receipt of the request.

HQ RW must maintain a well-documented file while the report is being prepared and ensure the information is available for current and future review.

2.04.03.02 Uniform Act Annual Statistical Report

FHWA collects RW acquisition and relocation assistance statistics from Caltrans to compile the Uniform Act Annual Statistical Report required by 49 CFR 24.9(c) and described in Appendix A, Section 24.9(c). The CFR requires the report be prepared on the basis of the Federal Fiscal Year, therefore, District/Region report data should be prepared on that basis and submitted to HQ Planning and Management (P&M) on or before November 1 each year.

The purpose of this report is to help FHWA gauge the effectiveness of the Uniform Act. Within Caltrans HQ and the Districts, P&M is the lead in compiling the report. For further guidance, refer to "Federal Statistical Report Form" (RW 02-04) (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

2.04.04.00 Forms, Records, and File Administration

HQ RWLS Office Chiefs and Region/District Division Chiefs for RW are responsible for maintaining RWLS record systems and for assuring adherence to policies and procedures set forth in the Department's Records Management and Forms Management Programs for their respective offices in coordination with their assigned Records Officers and the Forms Officers for RWLS.

2.04.04.01 Records and File Administration

The Records Officers for HQ and Region/District offices manage the records program to include the following responsibilities:

- Control access to public records.
- Assure confidentiality of personal information.
- Assure application of appropriate technology to all records and file management-related activities.
- Approve requests for filing and storage equipment.
- Collect and prepare input for Annual Records Inventory, upon request.
- Consult with and advise managers in all matters pertaining to records and file management.

HQ Records Officer's additional statewide responsibilities include:

- Maintain and revise the statewide RWLS Records Retention Schedule (internal Caltrans link).
- Act as liaison between HQ and Region/District RW for matters pertaining to RW records.

2.04.04.02 Records Retention Schedule

Caltrans policy states that a Records Retention Schedule Approval Request, STD. 72, shall be established for all record series under each Program's functional control and shall include records held in HQ, Region/District offices, and storage. A complete revision is required every five years, but should be updated as retention requirements change. The Records Retention Schedule is available at the Records Retention Schedule webpage (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

The HQ Records Officer shall maintain and distribute the schedule to Region/District Records Officers as changes are made.

2.04.04.03 Forms Management

The Forms Officers for RWLS keep the Division in compliance with applicable laws and regulations of Caltrans' Forms Management Program to include the following responsibilities:

- Review forms for compliance with the Information Practices Act.
- Enforce provisions of the Information Practices Act to assure confidentiality of all personal information gathered.
- Prepare statewide input for the annual Information Practices Act report.
- Approve all requests to design and revise forms.
- Take advantage of opportunities for use of new technologies.

Region/District Forms Officers shall submit any issues on functionality or use of individual forms to the HQ Office Chief responsible for the related function.

The Forms Officer for HQ RWLS shall act as liaison between HQ RWLS Office Chiefs and HQ Forms Management on issues pertaining to forms management.

2.04.05.01 Right of Way Information Management System

The Right of Way Management Information System (currently ROWMIS II) is the Department's sole internal standard repository and information-sharing tool for Right of Way information. As the current database of record, the use of ROWMIS II is required for statewide reporting purposes (see the ROWMIS II Implementation Memo [internal Caltrans link]). For additional information, including new account creation and training materials, visit the ROWMIS II web page (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

2.05.00.00 – DELEGATION MATRICES

2.05.01.00 Delegations

Pursuant to Director's Policy #16 (internal Caltrans link) dated December 1, 1994, the HQ R/W & LS Division Chief issues, updates, and disseminates delegations directly to the Regions/Districts. Delegations transfer to Region/District Directors, and by separate sub-delegation order from Region/District Directors to Region/District Division Chiefs (or R/W Manager), and thereafter to the designated position.

Delegations responsibly transfer decision-making authority from Caltrans HQ Division of R/W & LS to individual Districts. These delegations are in place to ensure consistency and are based on good decisions; substantiated in quality documents and risk assessments; and developed, reviewed, and approved by appropriate technical and management authorities with appropriate justification and defendable rationale for District accountability.

These delegations provide the Regions/Districts a broad level of authority and can potentially impact both internal and external stakeholders. Delegations are provided in support of the Regions/Districts in an effort to be more efficient, transparent, and empowered at the Region/District level. At the lowest internal level, R/W staff have an expectation of good guidance and direction from management. At the higher level, Region/District Directors must have confidence that the delegated authority is wisely implemented and applied with appropriate documentation.

Delegation matrices for each function are at the end of the corresponding manual chapter. While many items are delegated at the Region/District level, several complex delegations are retained at HQ to provide statewide consistency. The delegation matrices identify specific delegations to Regions/Districts, and identify the Region/District sub-delegation level of approval required for actions within each R/W function. Each Region/District Division Chief will determine whether to delegate down to the lowest level. The Region/District R/W Division Chief must report any amendment to the level of approval authority to the appropriate HQ Office Chief.

Both the Regions/Districts and HQ will monitor quality and process requirements and ensure that the delegation responsibilities are consistently and uniformly implemented to all applicable parcels and projects. As part of the delegation transfer, HQ shall conduct periodic reviews to measure compliance with existing delegations. Action plans and objectives for measuring and monitoring the outcomes and results of the delegation

© 1994-2025 California Department of Transportation. All rights reserved.

process and authorities will be included in functional Quality Enhancement Joint Reviews (QEJRs), Functional Councils and R/W Management Board (RWMB) meetings. At a minimum, performance measure results will be reported periodically via functional QEJRs and RWMB meetings.

Delegations are subject to changes in experience, staffing, etc. Both the Regions/Districts and HQ will have the opportunity to periodically review and propose amendments to the various levels of delegated authority as needed. The allowance for additional/increased approval authorities to individual Regions/Districts when warranted and mutually agreed upon can be specific to an individual parcel or an entire project.

It is the joint responsibility of the Regions/Districts and HQ to determine any necessary further definition of delegated authorities not covered in the delegation matrices contained in this Manual.

3.01.00.00 – DATABASES AND DATA MANAGEMENT SYSTEMS

3.01.01.00 General

The Department uses numerous databases and data management systems. Those used most frequently by R/W personnel are discussed in the following sections.

3.01.02.00 R/W Databases and Data Management Systems

The R/W data entered into various data management systems is used to produce statewide reports required by Caltrans management and external agencies. It is critical that R/W personnel accurately input R/W information into all systems in a timely manner.

The data management systems that require updates from R/W include, but are not limited to, Project Resource and Schedule Management (PRSM), R/W Management Information System (ROWMIS), AMS Advantage (Advantage), Federal Aid Data System (FADS), R/W Property Management System (RWPM), R/W Excess Lands Management System (ELMS), and the R/W Utility Management System (RUMS). Ultimately, the Division plans to roll RWPM, ELMS, and RUMS into an updated ROWMIS system.

DATABASES AND DATA MANAGEMENT SYSTEMS

- Right of Way Management Information System (ROWMIS)

  ROWMIS houses data for several functions in R/W, including R/W Engineering, Estimating, Appraisals, Acquisitions/Condemnation, RAP, and Demolition. ROWMIS contains data on both a project and parcel level. It offers sections to add comments and project-related documents to the server. There is also a built-in tracking report called the Status of Project Report. All R/W functions are responsible for maintaining their own sections of ROWMIS.

© 1994-2025 California Department of Transportation. All rights reserved.

- Right of Way Supplement System (ROWSUP)

  ROWSUP is a supplemental system that Districts can use to manage their R/W capital annual allocation. ROWSUP can also act as a District ledger and track project-level R/W capital commitments.

- Right of Way Property Management System (RWPM)

  RWPM is one of the mainframe databases currently used to maintain Property Management information. It contains information of parcels acquired for project delivery, which can be rented until needed for the project or becomes excess land inventory to be sold.

- Right of Way Excess Lands Management System (ELMS)

  ELMS is also a mainframe database being used to track all excess parcels that are no longer needed for project delivery.

- Right of Way Utility Management System (RUMS)

  RUMS is also a mainframe database being used to track utility relocation activities for project delivery.

- SCOPE (SCOPE)

  SCOPE is the mainframe system that houses ELMS, RUMS, and RWPM data systems. A SCOPE account is needed to access RWPM, ELMS, and RUMS.

- Project Resource and Schedule Management (PRSM)

  PRSM is the Department's project management tool to assist in project resource and schedule development, project management, and tracking the status of projects. PRSM is the system of record for the R/W Capital Plan. R/W capital costs are maintained on the R/W Capital Financial Plan (RCFP) screen.

- AMS Advantage (Advantage)

  Advantage is the Department's accounting, procurement, and budget database, which houses data for all financial transactions (accounts receivable and payable), support and capital expenditures, procurement transactions, and budgets. The Division of Accounting is responsible for maintenance and support of this statewide system.

© 1994-2025 California Department of Transportation. All rights reserved.

Advantage is accessible to all staff for view only, or for data input by appropriate approved staff, through CT Pass.

- Federal Aid Data System (FADS)

  FADS was created to replace manual processing of Federal Aid Funding Requests, formerly known as FNM-76 or E-76 (Request for Approval to Proceed) with an electronic transfer data system. This system allows the Department to enter project information directly and to transmit the data electronically to FHWA's Fiscal Management Unit in Sacramento. FHWA can review and approve project data expeditiously and to process the data into FHWA's Federal Management Information System (FMIS) in Washington, D.C.

- California Transportation Improvement Program System (CTIPS)

  CTIPS is an Oracle database used internally and externally to manage the programming and allocation of funds for State Transportation Improvement Program (STIP), Traffic Congestion Relief Program (TCRP), Bonds, State Highway Operation and Protection Program (SHOPP), and local projects.

3.01.03.00 Accessing Data Systems

To access the data systems, users must have appropriate user rights. Agents have full access to specific databases depending on the functional unit they are assigned to and read-only access to other databases.

Agents can request access to accounts through their immediate supervisor as follows:

1. ROWMIS Account – Each district has a designated ROWMIS Administrator who can assign a user account, or a request can be sent to the ROWMIS Administrator (internal Caltrans link).

2. SCOPE Account – R/W Agents who work in RW Property Management, RW Excess Lands, or RW Utilities functional units would require a SCOPE account to access RWPM, ELMS, or RUMS. Each district has a designated RACF Coordinator (internal Caltrans link) who can assign a SCOPE account. Additional software installation may be required.

© 1994-2025 California Department of Transportation. All rights reserved.

3. PRSM Account – New users must complete an online training course through the Project Delivery eLearning Center (PDec) before requesting an account. Contact the appropriate District Security Gatekeeper (internal Caltrans link) for more information. P&M staff need "Div Co-ord RW Group" security rights to update the RCFP screen.

4. Advantage Account – Employees need CT Pass to access Advantage. Default access roles are automatically assigned when an Advantage account is created. This grants read-only access to all screens in the system. Additional rights must be requested by a supervisor using the Security and Workflow Form (internal Caltrans link).

5. CTIPS Account – The CTIPS database is managed and updated by the Division of Financial Programming. Read-only rights can be requested by emailing CTIPS Support.

6. FADS Account – The Division of Budgets, Office of Federal Resources, manages the FADS database. New accounts can be requested using the FADS User ID Request Form (internal Caltrans link).

3.01.04.00 Reporting Tools

Reporting tools provide access to datasets in R/W databases as well as other Department databases. Statewide R/W users have access to the Discoverer, ROWSUP, Quality Management Reporting System (QMRS), and Enterprise Datalink (Datalink) reporting tools. Districts may have other reporting tools, not mentioned here, serving their own needs.

1. Discoverer – This is an Oracle tool allowing an agent to download data from a variety of R/W databases for analysis and reporting purposes. Discoverer can be accessed by all staff from the Discoverer log-in page (internal Caltrans link). The Discoverer User Guide (internal Caltrans link) includes instructions for logging into the system and creating reports. A Discoverer account is required. User can request an account under the same process as requesting ROWMIS account.

2. ROWSUP – ROWSUP is a reporting tool created and maintained by North Region R/W. It provides many useful datasets and queries from both R/W and Department databases. User accounts may be requested by R/W staff via email request to the ROWSUP Administrator link shown on the ROWSUP page (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

3. QMRS – QMRS is a database reporting system for Project Delivery. It is used to aggregate and display data captured in the Project Delivery Workload Development Migration warehouse. Data is refreshed daily. QMRS reports can be accessed at the Project Delivery Reports page (internal Caltrans link). No user account is needed.

4. Enterprise Datalink (Datalink) – Datalink contains information from Advantage and was developed as a method to obtain data in a timely manner for inquiry and reporting purposes. Information is updated nightly and contains historical financial data from the former financial system called TRAMS. Datalink is accessible to all staff through CT Pass (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

3.02.00.00 – EXPENDITURE AUTHORIZATION (EA) /PROJECT IDENTIFIER (PROJECT ID)

3.02.01.00 General

An Expenditure Authorization (EA) is a six-digit numeric code assigned to a project, or to non-project activities such as overhead costs. EAs were recorded in the previous financial system, TRAMS. However, with the implementation of AMS Advantage (Advantage), EAs were replaced with a 10-digit code called a Project Identifier (Project ID). The EA numbering system is still in use since some of the Department's legacy systems depend on it.

EAs/Project IDs are used to track costs. They allow for proper management of project-related expenses and help with budgeting of future resources based on historical data. EAs and the associated Project ID are assigned in the districts by District Project Control. When a Project ID is being created in Advantage, the EA is also entered for reference. Once tabled in Advantage, the Project ID and EA are populated into the Project ID Crosswalk.

3.02.02.00 Multiphase Project IDs

Multiphase EAs (0X01XX to 4X99X9) are for projects with more than one phase (category) of work that requires separate accounting for each phase. A multi-phase EA is structured as follows:

XXXX Four Characters	**X** Fifth	**X** Sixth
Basic Serial Number (First character is in range 0-4)	Segment Code	Phase Code (Phases specific to R/W activities are 2 and 9)

The first four digits of the EA comprise the Basic Serial Number of a project. The district assigns this number before work is started on the Project Study Report, and the number is retained for the entire life of the project, including all phases of work.

The fifth digit of the multiphase EA identifies the project segment, if the project is segmented.

© 1994-2025 California Department of Transportation. All rights reserved.

The last or sixth digit represents the phase of the project. The functional phase codes are as follows:

Phase	Description
K	Project Study Report
0	Project Report/ Project Approval & Environmental Document (PA&ED)
1	Plans, Specification, and Estimate/Design
2	R/W Operations (Support)
3	Construction Engineering (Support)
4	Construction (Major, Minor A, Maintenance Contracts)
9	R/W Capital

3.02.02.01 Phase 2 – Support

A multiphase project EA ending with 2 accounts for R/W support expenditures. The Phase 2 EA covers labor charges and all operating and equipment expenses chargeable to a project.

3.02.02.02 Phase 9 – Capital

A multiphase project EA ending with 9 accounts for R/W capital outlay expenditures. The Phase 9 EA usually covers costs of:

- R/W acquisition
- Excess land purchases
- Inverse condemnation expert witnesses, legal expenses, and settlements
- Title and escrow fees
- Condemnation deposits, expert witnesses, legal expenses, and settlements
- Project development permit fees
- Relocation Assistance Program
- Demolition and clearance
- Railroad Coordination service contracts
- Utility positive location and relocation
- Offsite mitigation activities and mitigation credit purchases

© 1994-2025 California Department of Transportation. All rights reserved.

3.02.03.00 Single Phase EA

The types of single phase EAs (9XXXXX) are:

- **Overhead** – to record costs incurred by each function/organization in managing, supervising, and supporting the work and personnel of their areas of responsibility.

- **Owner-Operator** – to record costs considered necessary to ensure the integrity of the Highway System, but which do not directly relate to delivery of a project. (Effective July 1, 1999, it is no longer a valid EA category.)

- **Programmatic** – to record costs associated with achieving the goals of the Department's noncapital outlay programs (e.g., Airspace, Outdoor Advertising).

- **Single Task** – for projects with only one phase (function of work).

- **Service Center** – to record time spent by Caltrans employees for technical services for the department's functional units (e.g., Information Services, Equipment, and Legal).

- **Reimbursed Work for Others** – to record costs of performing work requested by and for the benefit of an entity external to Caltrans.

3.02.04.00 Establishing EAs/Project IDs

The District Project Control Officer assigns an EA sequentially and establishes its Project ID in Advantage with the EA referenced in the project setup. District P&M Project Control is responsible for creating and opening R/W phases for established Project IDs in Advantage. Normally, R/W phases are created by a Cost Accounting Modification (CAM) document in Advantage. This enables the Department to maintain standard identification of projects for proper tracking and management of project costs.

District P&M must ensure that Project IDs for federal-aid projects are tabled in Advantage before commencing R/W work. Also, if Project IDs were previously established as State-only funded, and federal participation is now secured on the project, then District P&M must adjust the Project ID funding source effective with the approval of the E-76.

© 1994-2025 California Department of Transportation. All rights reserved.

Accounting occasionally establishes non-project related EAs for special purposes; for example, EA 0R0005 for recording work activities related to excess lands inventory, or 0R006 for recording work activities related to property management of state-owned parcels.

Headquarters Project Control Branch approves all Project IDs and phases entered into Advantage for consistency with legal, financial, and administrative authorities or policies on work and maintains the integrity of the overall system and process.

R/W must conform to the standard identification system to avoid discrepancies between identification of the same project in Advantage and PRSM. (See Project Management Directive Number PMD 002 [internal Caltrans link] on Project Identification.)

The table below entitled "EA/Project ID Process" provides an overview of the process for establishing or supplementing R/W Project IDs.

3.02.05.00 Project ID Adjustments for Combined and Split Projects

Upon notification from Project Development to combine or split projects, R/W must adjust Project IDs according to instructions in Exhibit 03-EX-01.

To determine the correct use of the EA/Project ID under specific conditions, Agents should reference Chapter 5 of the latest Project Changes Handbook (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

EA/PROJECT ID PROCESS

Step	Responsible Party	Action
1	District P&M	Accesses Advantage using the CAM document to create R/W phase(s) for a Project ID.
2	District P&M	Approves authorized amounts for R/W phase(s).
3	District P&M	Sends CAM to HQ Project Control via electronic processing and submission in Advantage.
4	HQ Capital Outlay Support Unit	Creates BGE94 in Advantage for the R/W 2 phase for STIP, SHOPP and Reimbursed funded projects and R/W phase 9 for individually allocated projects.
5	District P&M	Creates BGE94 in Advantage for R/W phase 9 for STIP and SHOPP funded projects not individually allocated.
6	HQ Project Control	Reviews CAM and supporting documentation for proper coding.
7	HQ Project Control	Approves CAM in Advantage to table the R/W phase with the Project ID and sends confirmation to District R/W Project Control.

3.02.06.00 Closing R/W Phase 2/9

The R/W phases of an EA/Project ID are closed when District R/W determines that all R/W work is completed, and expenditures are fully recorded. District P&M initiates this action by deactivating the R/W phases in Advantage via the CAM process. The capital outlay close-out policy is documented in Project Delivery Directive PDD-015R1.

Occasionally, Headquarters Federal Program Accounting requests a change in the activity status for R/W phases (from inactive to active) related to a federal-aid project after the federal-aid project is in the final vouchering stage.

3.03.00.00 – RESOURCE MANAGEMENT – SUPPORT

3.03.01.00 General

Capital Outlay funds construction contracts, right of way (R/W) capital and utility relocations for State Highway improvements. Capital Outlay Support is work required to produce Capital Outlay. R/W support personnel provide staff assistance for support matters concerning Project and Resource Management System (PRSM) and Capital Outlay Support budgets. This includes performance of studies and recommendations for improvement of right of way capital outlay support in PRSM, Work Estimating Norms and Work Breakdown Structure (WBS), as well as related workload statusing. Also included is identifying, monitoring, and evaluating workload for R/W minor program projects, projects under construction, Hardship and Protection projects, R/W clean-up projects (commonly referred to as 0R0 projects) and preparing budget calculations used to determine capital resource needs (Person Years or PYs) for current and future years.

3.03.01.01 Person Years (PYs) – Capital Outlay Support

At Caltrans, a PY is equal to 1758 hours of productive time and is the equivalent of one permanent fulltime position. To determine support hours and PYs needed to complete the R/W work on projects, functional managers analyze project details as they relate to the work efforts required of the function. Functional managers work with R/W Project Coordination staff to develop workplans based on work norms and the project details. They must identify the hours needed to complete the work efforts for each applicable Work Breakdown Structure (WBS) task, which is then calculated into PYs needed. Completed workplans, usually as an attachment to the R/W Data Sheet, are submitted to the Project Manager for concurrence and scheduling in PRSM.

3.03.01.02 PRSM Workplan Calculations

Since 2016, support resource needs have been scheduled and tracked through PRSM. Open Workbench, which is part of the PRSM database, is used for the development of the project workplans. In PRSM, PYs for R/W activities are calculated based on direct R/W workload hours, converted to PYs; R/W capital dollars do not affect the PY calculations. The following project details

© 1994-2025 California Department of Transportation. All rights reserved.

should be considered as they can impact R/W workload:

- Number and type of parcels to be acquired
- Relocation Assistance Program involvement
- Number and type of improvement clearances
- Anticipated property management activities
- Number of anticipated condemnations
- Number and type of railroad and utility coordination
- Right of Way Engineering involvement
- Anticipated excess land sales

Right of Way is involved at various stages of the project delivery process, from the initial identification of a project need to closeout. (See Phase II Right of Way Involvement in Project Delivery, Exhibit 03-EX-03.)

3.03.01.03 Projects Involving Work by Others

Projects that involve work completed by local agencies are referred to as oversight projects. To receive PY resources to perform oversight, the district must properly flag these projects and work with the Division of Local Assistance to obtain sufficient resources. Project workplans must be input into PRSM by Project Management staff so the Department can accurately identify the resources needed.

3.03.01.04 PYs on Hardship and Protection Parcels

District P&M/Project Coordination should follow the procedures below to establish hardship and protection workload.

- Before Program Management's January 9th resource pull, identify projects where there is a high likelihood of encountering hardship and protection acquisitions. Estimate the number of parcels that may be involved on each project and the number of hours needed to complete the acquisitions.

- Submit to Project Management a project workplan for the hardship or protection work efforts only – separate from the regular right of way efforts. After the project workplan is agreed to by both R/W and Project Management, ensure the Project Manager enters the workplan in PRSM. Workplans must be input into PRSM so resource hours and PYs

© 1994-2025 California Department of Transportation. All rights reserved.

will be generated. In AMS Advantage, District R/W staff will create an earmarked 2 phase for the hardship and protection activities only.

- Project Management may determine a separate child EA/Project ID should be established for the hardship or protection acquisition, which will also require a project workplan. In this case, a Project Change Request must be processed to split the hardship and protection activities from the parent EA. Districts must ensure resources needs for the hardship and protection acquisition are not accounted for in both the parent and child project.

Districts must update data in these projects as information changes to ensure they are current.

3.03.01.05 Reimbursable Work

District R/W may perform work on projects funded by local fund sources and be reimbursed pursuant to a cooperative agreement. The district must carefully differentiate between projects where Caltrans resources will be used and projects where costs will be reimbursed for work done by Caltrans R/W Agents. Project workplans are required in PRSM so resources can be requested. Refer to Chapter 17, Local Programs.

3.03.01.06 Duties of the R/W Project Coordinator

The R/W Project Coordinator is the liaison between Project Management and the functional units that perform R/W work on projects. He/she attends Project Development Team (PDT) meetings to discuss the various components of the project being developed and communicates project related information as it relates to R/W work efforts. The R/W Project Coordinator works with functional managers to develop and submit workplans for the 2 Phase support activities broken down by WBS, and coordinates concurrence of the workplans with the Project Manager. The workplans are loaded in PRSM by Project Management staff, and the R/W Project Coordinator verifies in PRSM that the workplans were loaded as requested. The R/W Project Coordinator also monitors support hours being expended throughout the project delivery process and works with functional managers to ensure sufficient resources are available or added as required.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.00.00 – RESOURCE MANAGEMENT – R/W CAPITAL OUTLAY

3.04.01.00 General

R/W Planning & Management (P&M) units are responsible for creating, maintaining, managing, and reporting on the R/W Capital Plan and R/W Capital Annual Allocation. The California Transportation Commission (CTC) is responsible for allocating legislatively approved capital outlay appropriations to projects in the Department's programming documents. Section 3.00 of the Budget Act states capital outlay appropriations may include expenditures for the acquisition of land or other real property to be owned by the state and all necessary expenses in connection with the acquisition of property.

Estimates for R/W capital outlay costs are managed through the Right of Way Capital Financial Plan (RCFP) screen within the Project Resource and Schedule Management (PRSM) system. Actual commitments are accounted for in AMS Advantage (Advantage). Prior to the implementation of the RCFP, R/W's Capital Plan was administered through the Department's Project Management Control System (PMCS). Development of the RCFP allows R/W to maintain credible R/W capital estimates and promotes transparent and accountable management of R/W capital budgets.

3.04.02.00 R/W Capital Plan

The R/W Capital Plan is a schedule of projected annual commitments for projects statewide. It is supported by a list of projects with the R/W capital need broken down over multiple fiscal years (FY). The R/W Capital Plan is used to request budget authority from the Division of Budget and CTC approval of the R/W capital annual allocation.

The system of record for the R/W Capital Plan is Project Resource and Schedule Management (PRSM). In PRSM, there is a Right of Way Capital Financial Plan screen (RCFP) for every project. RCFP uses standardized accounting codes from Advantage such as Task Code, PEC/PECT Codes, Appropriation Unit, Fund, Sub Fund, and Object Codes to record estimates for various types of R/W capital functions. These functions include acquisition, relocation assistance, title and escrow, demolition and clearance, utility agreements, project development fees, various project permits fees, etc., associated with each project.

© 1994-2025 California Department of Transportation. All rights reserved.

The Districts use a R/W Conceptual Cost Estimate, R/W Data Sheet, or Final Cost Estimate to establish a spending plan for programmed R/W capital funds for each FY that costs are projected to be incurred. This spending plan is a living document. District P&M agents are responsible for ensuring the information entered in the RCFP screen is current and accurate. Projects with complex funding (i.e. multiple fund types) must have an individual spending plan to document the various fund types and how the funds will be spent.

3.04.03.00 R/W Estimate

Chapter 4, Estimating, sets forth in detail the Department's policies regarding R/W project estimates. The estimate, usually documented on a R/W Conceptual Cost Estimate or R/W Data Sheet, is the first step in building a credible budget and programming R/W funds. The initial R/W estimate must be as accurate as possible so informed decisions can be made as the project progresses through the project development process.

The R/W Conceptual Cost Estimate or R/W Data Sheet is the base from which escalated R/W dollars are entered into the PRSM RCFP screen. Only the most current estimate is entered into PRSM. It should be based on the preferred alternative or on the alternative used for the construction cost estimate. If the alternative for the construction cost estimate has not been selected, the highest estimated alternative, shall be used.

R/W estimates are reviewed annually, or whenever project scope, schedule, or cost changes occur. The Deputy District Director-R/W (DDD-R/W) or District Division Chief-R/W (DDC-R/W) determines if the change is significant and warrants revising the R/W estimate. If the estimate requires a revision, a copy shall be forwarded to District P&M to update the PRSM RCFP screen, and to the Project Manager. Programming changes may be required as a result of estimate increases or decreases in accordance with the Project Change Request (PCR) policy. (See Section 3.04.16.00.)

Changing the R/W estimate should not be confused with moving the estimated dollars between FYs. The District can and should move R/W dollars to reflect its most current R/W Capital Plan and should inform the HQ R/W Capital Funds Coordinator of changes as they occur.

3.04.04.00 Transportation Programming

The Government Code provides for establishing various project candidate lists that are used to plan and prioritize the State's Transportation Program. The CTC is responsible for programming and allocating funds for the construction of highways, passenger rail, transit, and active transportation improvements throughout California. Approved projects are segregated into separate programming documents. A full list of programs and corresponding guidelines can be found on the CTC website.

3.04.04.01 Project Programming

The adopted programming documents are statements of the CTC's intent to allocate funds during the span of years for each plan. To be considered for programming, a project must have an approved Project Initiation Document (PID). Projects requiring a PID must be identified in a Regional Transportation Planning Agency or Caltrans plan, such as a Regional Transportation Plan or 10-Year SHOPP Plan. Each PID will contain an escalated estimate for R/W capital.

The adopted programming documents assist in planning and implementing transportation improvements and ensure available resources are utilized in a cost-effective manner. The programming documents include:

- Project location and description
- Escalated capital outlay support costs
- Escalated construction capital outlay costs
- Escalated R/W capital outlay costs

The programmed dollars represent the total estimated cost, which should include actual commitments plus the amount needed to complete the component. The programming document should indicate if the programmed project is underfunded. For some programs, the total estimated cost for R/W capital is individually allocated by the CTC. However, a majority of State Transportation Improvement Program (STIP) and State Highway Operation and Protection Program (SHOPP) projects use an annual allocation for R/W capital costs. See Sections 3.04.06.02 and 3.04.06.03 for details.

© 1994-2025 California Department of Transportation. All rights reserved.

PROGRAM DOCUMENTS

- State Transportation Improvement Program (STIP)
  A five-year capital improvement program of transportation projects funded with revenues from the State Highway Account and other sources on and off the State Highway System.
    - Listed projects are found in the Regional Transportation Improvement Program (RTIP) and the Interregional Transportation Improvement Program (ITIP). The CTC adopts the STIP prior to the beginning of each even-numbered year.

- State Highway Operation and Protection Program (SHOPP)
  A list of projects programmed over a four-year period that are required for rehabilitation, traffic safety, seismic safety, and traffic operational improvements on the State Highway System.
    - The Department adopts the SHOPP every even-numbered year. SHOPP projects are developed jointly from candidate lists submitted by staff in HQ, Districts, and Regional Transportation Commissions.

3.04.04.02 R/W Capital Programming Status

Candidate Projects – Candidate projects are projects in the project initiation phase that have not secured programming yet. Department policy requires candidate projects have an approved PID to be considered for programming. District P&M must work closely with District Program/Project Management (PPM) to ensure all PIDs have a valid R/W estimate to effectively compete for funding. Each District should enter the R/W estimates for candidate projects into the PRSM RCFP screen. R/W estimates for candidate projects are included in the R/W Capital Plan for future budget authority estimates purposes. Candidate projects should be coded with task code 1500 in the PRSM RCFP screen.

SHOPP Programming – The R/W capital component of SHOPP projects should be programmed in the year of delivery (construction allocation vote). R/W can request allocation in advance of the year of programming. Any SHOPP project with R/W capital programming outside of the current SHOPP cycle, referred to as long lead projects, can only commit R/W capital funds for CTC-approved pre-PA&ED expenses.

STIP Programming – STIP Guidelines require the R/W capital component of STIP projects to be programmed in the year of first acquisition or utility relocation expenditure. Allocation can be requested prior to the year of programming

© 1994-2025 California Department of Transportation. All rights reserved.

for CTC-approved pre-PA&ED expenses. If a STIP project is only programmed through the Environmental phase, any pre-PA&ED R/W capital commitments should be coded as an unprogrammed cost.

3.04.05.00 PRSM RCFP Screen

The RCFP screen provides capital outlay data about the most current District approved* R/W estimate for specific projects. The RCFP screen documents the R/W Capital Plan as defined in Section 3.04.02.00.

The PRSM RCFP screen provides information to support R/W's budget authority request as well as the R/W Capital Annual Allocation request. It also contains data regarding contributor dollars and local and federal participation.

The DDD-R/W/DDC-R/W is responsible for ensuring the screen is initiated and maintained whenever there is an anticipated need for R/W capital. In many Districts, this responsibility is delegated down to the District P&M unit. At a minimum, the RCFP screens should be updated when: a) a R/W Conceptual Cost Estimate, R/W Data Sheet or Final Cost Estimate is completed; b) sub-allocation is moved between FYs; and c) the close-out report is distributed at the end of the FY (referred to as "roll-up").

***NOTE:** "Approved" means the R/W estimate is the same as contained in the R/W Data Sheet or, if different, the Project Manager is aware of the change and will take appropriate action to amend the R/W programming through PCR procedures.

3.04.05.01 Keeping PRSM RCFP Screens Current

R/W capital estimates on the RCFP screen must be kept current since they are used by HQ P&M in reporting the R/W Capital Plan to the CTC. Districts are responsible for ensuring the RCFP screens are current. The decision to revise R/W project cost information on the RCFP screen is a District responsibility and should be done with careful analysis.

Once the initial estimate is developed and entered on the RCFP screen, the R/W project cost estimate must be changed when there an annual R/W Data Sheet update, a Final Cost Estimate is completed, or a substantial change in project scope, schedule, or cost occurs. For purposes of this chapter, a substantial change is one brought about by a material change to the project (e.g., expressway to full freeway, additional lanes or interchanges with resultant R/W needs, substantially advanced schedule, significant change to

© 1994-2025 California Department of Transportation. All rights reserved.

land use at time of acquisition not foreseen in the estimate, or acquisition costs trending more than 20-30% above estimate).

As a best business practice, the RCFP screens should also be updated when sub-allocation is moved between FYs and the close-out report is distributed at the end of the FY (also known as roll-up).

Periodic estimate revisions that reflect only changes to normal inflationary factors should be analyzed, noted, and reviewed with later project estimate revisions and at project milestone dates.

3.04.06.00 Budget Development Process

The Department's proposed budget is submitted to the California State Transportation Agency and the Department of Finance in October. In support of developing the Department's proposed budget, HQ R/W provides a R/W capital budget authority estimate to HQ Budgets every September. This estimate provides a breakdown of the state and federal dollars.

At the same time, HQ R/W provides a R/W capital plan for reimbursed budget authority to HQ Budgets. Reimbursed budget authority covers dollars contributed by local agencies or others that are paid through the Department's accounting system but are not included in the annual budget. Reimbursed projects are identified by the PEC/PECT codes included on the RCFP screens.

Contributor dollars that are paid directly by the locals or others without passing through the Department's accounting system are not included in this process, nor are they included in the annual budget. Generally, contributor dollars are identified in a Cooperative Agreement or other form of agreement between the State and local agencies or others.

Ordinarily, the R/W amounts contained in the latest approved programming documents are used as the basis for budgeting R/W capital dollars.

The R/W capital budget authority estimate for the current FY can be updated concurrent with submittal of the budget authority estimate for the next FY. Current FY budget authority is generally consistent with the R/W Capital Annual Allocation approved by the CTC the previous June plus any known significant changes. The current FY plan for reimbursed dollars is also updated and generally reflects the July 1 allocation plus any significant changes.

© 1994-2025 California Department of Transportation. All rights reserved.

The Department of Finance forwards copies of the proposed Department budget to the Legislative Analyst's Office to aid in review of the Governor's Budget. On January 10 of each year, the Governor submits to the Legislature a budget containing itemized statements of recommended sources and use of resources for all departments and activities in the State. This is the printed budget and is referred to as the Governor's Budget.

The Governor signs the Budget Bill after it is passed by both Houses, which then becomes the Budget Act. The Budget Act is a one-year document beginning July 1 and ending the following June 30. This period is referred to as the State FY or Budget Fiscal Year (BFY).

CTC and Department policy for R/W capital outlay is to allow one year to encumber and a total of five years to liquidate.

3.04.06.01 Fund Reservation

Through the STIP Fund Estimate process, HQ P&M establishes a R/W capital fund reservation. The fund reservation covers costs that cannot be planned for or estimated in time to secure programming for the related project. Examples of such costs are:

- Contingent liabilities, such as unidentified right of way, utility overruns, expert witnesses, excess condemnation awards, goodwill payments, interest costs, title company services, rights of entry, and RAP payments
- Pre-environmental clearance (pre-PA&ED) project development capital costs on projects with only the Environmental phase programmed
- Inverse condemnation
- Hardship and protection (H&P) acquisitions

HQ P&M develops the fund reservation based on anticipated costs derived from the RCFP screens. The fund reservation does not provide budget authority over and above the annual allocation. The budget authority is assigned to specific projects during the allocation request submitted to the CTC.

Before using the fund reservation for a project, a Documentation PCR must be approved. The RCFP approval process for Documentation PCRs is detailed in the RW Capital Financial Plan (RCFP) with PRSM – Student Manual (internal Caltrans link). The approval process ensures R/W manages project cost overruns within the limit of the R/W capital fund reservation approved by the CTC in the STIP Fund Estimate.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.06.02 Distribution of Allocation and Sub-Allocation

Each July, HQ Budgets issues the R/W Capital Annual Allocation for State and Federal dollars, as approved by the CTC. The annual allocation is available for expenditures and encumbering only after the Governor signs the budget. Once the budget is signed, District P&M can establish the R/W EAs/Project IDs in Advantage. EAs are initially established by District Project Control with the K, 0 or 1 phase, and the R/W phases (2 and/or 9) are established by District R/W Project Control. The process of establishing (opening) R/W phases allows R/W to start expending its allocation.

The annual allocation is sub-allocated to the Districts on a lump-sum basis according to the District's R/W Capital Plan for major projects, programmed H&P acquisitions, inverse condemnation, and fund reservation R/W costs. R/W's annual allocation shall not be used to fund projects that do not meet the requirements of the R/W Capital Spending Guidelines (internal Caltrans link).

At mid-year and prior to FY end, HQ P&M conducts a statewide review of the R/W capital needs by District. The total R/W Capital Annual Allocation must be managed within the R/W budget authority estimate previously submitted to the CTC. If, after all the District reviews are complete, the annual statewide allocation is deficient or has excess, HQ P&M submits a request to the CTC to right-size the R/W allocation dollars. This ensures there is sufficient allocation for R/W's annual expenditures or allows HQ Budgets to release funds to other programs.

3.04.06.03 Individually Allocated Projects

In June 2019, the CTC adopted CTC Resolution G-19-01. Until this Resolution, all R/W capital spending on STIP and SHOPP projects were included as part of the R/W Capital Annual Allocation. Effective July 1, 2019, projects with R/W capital STIP and/or SHOPP programming of $10 million or more in FY19/20 or after must be allocated individually by the CTC.

Projects must achieve PA&ED before requesting an individual R/W capital allocation. CTC-approved pre-PA&ED expenses will continue to be paid from the R/W Capital Annual Allocation even if a project qualifies for individual allocation. After the project is allocated by the CTC, the project budget will be loaded into Advantage by HQ Budgets. Individually allocated projects use Task Code 1540, Sub Task 0000.

© 1994-2025 California Department of Transportation. All rights reserved.

To request R/W capital allocation, the District Project Manager must complete a Funds Request Form (PRG-004 or PRG-005) and process it through the normal channels as shown in the project allocation process flow chart (internal Caltrans link). District P&M staff shall coordinate with HQ P&M to prepare a Book Item for the next available CTC meeting. HQ P&M will present the Book Item to CTC staff for review. District staff should be prepared to answer detailed questions about the project.

3.04.06.04 Budgetary Controls

R/W capital allocation policies and guidelines are issued at the beginning of each FY, outlining allowances and restrictions related to R/W capital spending.

Even though the District sub-allocation is in a lump sum, the basis for the allocation is the project-level detail. The CTC reviews and approves the R/W Capital Annual Allocation. Since the CTC requires the Department to report quarterly on actual R/W total commitments compared to the approved R/W Capital Annual Allocation, each District must be prepared to provide a detailed explanation of significant differences.

As a matter of policy, phase 9 should not be opened until programming for the R/W capital component is sufficient to cover the latest R/W capital estimate. If a programming change is needed, a PCR should be processed at the next available PCR Committee meeting. If an exception is needed, District P&M staff must ensure a corrective action plan is in place. The corrective action plan should be communicated with HQ P&M.

At this time, phase 9 project budgets are only required to be loaded in Advantage for Cooperative Agreement projects, projects with individual R/W capital allocation, and any other project where R/W capital funds are voted separately by the CTC.

3.04.06.05 Allocation Limitations

District R/W capital commitments shall not exceed the total District R/W sub-allocation, except with prior approval of the HQ P&M Capital Funds Coordinator. In addition, the following criteria must be met prior to committing R/W capital allocation on a project:

- Project must be programmed in a STIP or SHOPP document
- Allocation requested must not exceed the R/W capital programmed amount without following the policies set forth in the PCR Handbook (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

- All components of the project must be fully funded. Exceptions can be made for advance mitigation, long lead, and contingency projects.
- An E-76 has been approved if the project qualifies for Federal funds
- Freeway agreements have been executed, if applicable
- Project has been environmentally cleared, and an E-Resolution number has been obtained by the CTC, when necessary.
- Project Report or equivalent has been approved
    - Pre-PA&ED commitments made in support of environmental clearance and/or project approval can be paid through the annual allocation; refer to the R/W Capital Spending Guidelines (internal Caltrans link) for further details.

3.04.06.06 Movement of Capital Outlay Dollars

Programmed dollars for projects may be adjusted in accordance with the internal PCR Handbook (internal Caltrans link) for STIP and SHOPP projects.

3.04.06.07 Allocation Augmentation and Supplements

Each District has some discretion to move R/W capital outlay dollars subject to the guidelines set forth above. Movement of capital dollars between years or between projects does not change the District's total annual sub-allocation. If allocation is needed for a project not included in the initial Annual Allocation project list and redistributing the District's sub-allocation does not meet the District's needs, the District may request additional funds from HQ P&M.

HQ P&M will look for additional funds available from other Districts. If funds are not available, HQ P&M may ask the CTC to supplement the R/W allocation.

Any request for additional R/W capital funds shall:

- Explain the need for the funds and why that particular alternative is necessary
- Show the effect on project scheduling
- Demonstrate that redistribution of existing dollars cannot meet the need
- Demonstrate that at least 90% of the initial sub-allocation will be encumbered by the end of the FY

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.07.00 Hardship and Protection

Chapter 5, Early and Advance Acquisition; Corridor Preservation; Hardship and Protection; Donations and Dedications, contains detailed information on review and approval of hardship and protection (H&P) acquisitions. This section provides guidance and sets limitations for funding of H&P acquisitions. Other limiting conditions may be set forth in the R/W Capital Spending Guidelines issued annually with the Annual Allocation.

There are two types of H&P:

- Those which occur in advance of the regular R/W acquisition process
- Those which occur when the requirements for commencement of the regular R/W acquisition process have been met, but funding and activity on the project have been deferred

Authority to approve both types has been delegated to the DDD-R/W or DDC-R/W.

H&P acquisitions should be considered during the estimating process so funding can be included in the Annual Allocation to the Districts. After allocation, the District should consider priorities for spending its allocated dollars and, if necessary, seek additional funding from HQ P&M. Districts must notify HQ P&M of H&P acquisitions by March of the FY prior to the acquisition. If a H&P acquisition is needed in the current FY, notify your HQ P&M Liaison as soon as possible to determine if there is adequate budget authority for the acquisition. Identify H&P estimates and commitments in a separate line item on the RCFP page and include a note in the Comments column.

H&P acquisitions are charged as follows:

- **Acquisitions Resulting from Deferred Projects** – charged to the appropriate "9" phase EA and included in an approved E-76 if federally participating.
- **Acquisitions Prior to Environmental Clearance** – charged to the appropriate Earmark 2 and 9 Phase EA/Project ID. Must have a Stage 1 authorization from FHWA if federally participating. Upon receipt of environmental clearance, the Stage 1 authorization must be converted to a regular federally funded project.
- **Protection Acquisitions** – charged to the appropriate Earmark 2 and 9 Phase EA/Project ID. Must have an approved E-76 if federally participating.

© 1994-2025 California Department of Transportation. All rights reserved.

For additional information, see Section 3.05.05.03, Stage 1 Authorization - Hardship and Protection Acquisitions.

3.04.08.00 Inverse Condemnations – Damages to Property

Inverse condemnation is the legal term used to describe a legal action brought against a government agency by a property owner, claiming private property has been taken or damaged, temporarily or permanently, without payment of just compensation. Per Deputy Directive 59 (internal Caltrans link), R/W capital can be used for claims related to the Capital Outlay Program. Maintenance funds should be used when a claim relates to the Maintenance program.

For claims relating to a reimbursed project with no STIP/SHOPP funds, Districts should work with Project Management to determine if the Cooperative Agreement has language permitting reimbursement of inverse condemnation costs. If R/W capital funds are used for a claim related to an active STIP/SHOPP project, the inverse costs should be charged to the project and its original program code. For active STIP projects, it is imperative that project stakeholders are informed of the inverse case and the potential liability prior to committing funds.

Inverse condemnation settlements and the associated costs (expert witness fees, legal services costs, court costs, attorney fees, etc.) are funded from the District R/W capital allocation. If R/W capital funds are used for a claim not tied to an active STIP/SHOPP project, Districts should set up an earmarked phase under their pseudo-EA 9RWIC, using PEC/PECT 20.20.800.420 and Task Code 1530. Districts must also maintain an RCFP screen for pseudo-EA 9RWIC.

For more information, refer to the Inverse Condemnation Manual on the R/W P&M page (internal Caltrans link).

3.04.09.00 Hazardous Waste/Materials Funding

The source of funds for identification of hazardous waste and hazardous materials and its subsequent abatement may vary each FY. District R/W should contact the District R/W Resource Manager for the current funding source and consult with HQ P&M to ensure consistent application of funding policies.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.10.00 Title and Escrow Fees

Title and escrow fees are part of the R/W estimate. They are reported on the R/W Data Sheet and entered in the Title column on the RCFP screens.

Title and escrow services are contracted out to title companies through a competitive bid process by the Division of Procurement and Contracts (DPAC) (internal Caltrans link). Service contracts will be issued for five-year periods. New orders for title services can only be placed against a Title and Escrow service contract during the first three years of the contract term. The last two years are available to close escrows and request policy of title insurance for parcels which have already had preliminary title work ordered during the first three years of the contract term. Since the Department's policy is to bring encumbrances in line with expenditures, the dollar amount of each contract must be split-funded in the accounting lines of the contract document (CT) in Advantage over the life of the contract.

Contracts for title and escrow services were previously considered ineligible for federal participation and reimbursement and were required to be funded by State or local funds; however, the internal Federal Aid Project Funding Guidelines (internal Caltrans link) implemented on January 28, 2019 were changed to allow federal participation for title and escrow costs that are paid after environmental clearance. To establish eligibility for these costs on projects, title and escrow estimates must be included in the federal funds authorization request (E-76) and approved by FHWA, provided the project meets the threshold requirements to seek federal authorization.

For additional information regarding federal eligibility, see Section 3.05.03.00 – Federal Participation in R/W Projects.

3.04.11.00 Federal Participation in Right of Way

District R/W should follow the policy and guidelines in Section 3.05.00.00 – Federal-Aid Project Funding, and the internal Federal Aid Project Funding Guidelines (internal Caltrans link), in determining federal participation for R/W components and deciding when to complete and submit an E-76 Request for Approval/To Proceed in the Federal Aid Data System (FADS).

Projects previously approved for federal-aid under former policies continue as federal projects, and supplemental E-76s should be submitted, if necessary.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.12.00 Advance Mitigation Projects

Advance mitigation refers to performing compensatory mitigation in anticipation of and prior to incurring the environmental effects of an action. Specific to the Department, this means addressing potential environmental impacts before transportation projects are programmed for delivery.

Advance mitigation projects programmed prior to the passage of Senate Bill 1 (SB1) in FY17-18 are funded through the SHOPP 240 program. Adequate SHOPP programming is required and capital commitments are funded through R/W's Annual Allocation. These projects are set up like regular SHOPP projects in Advantage and can qualify for federal funds.

The Advance Mitigation Program established by SB1 provides a new funding source (Fund 2504). To use these funds, projects must be approved through the Division of Environmental Analysis' Advance Mitigation Office. Capital commitments will be coded with phase 9, but the funds do not flow through R/W's Annual Allocation.

For more information on Advance Mitigation, visit the Division of Environmental Analysis' intranet page (internal Caltrans link) or contact the HQ R/W Advance Mitigation Liaison.

3.04.13.00 Accountability of Donated Lands

When land is donated to the Department for right of way purposes, the land's fair market value, based on an approved appraisal at the time of the donation (see Acquisition chapter), can be used in certain circumstances in lieu of state matching fund requirements.

- District R/W Acquisitions must identify donated parcels in ROWMIS as a "donation."
- If federal-aid is requested for the project's R/W phases, the appraised value of the donation parcel can be applied toward the State's matching funds and should be clearly identified in the federal funds request (E-76) in FADS.

HQ P&M provides a report to Accounting of donated right of way acquired each FY.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.14.00 CTC Reporting Requirements

Prior to the beginning of each FY and after consulting with HQ Budgets, HQ P&M presents the proposed R/W Capital Annual Allocation to the CTC for review and acceptance.

The R/W Capital Annual Allocation presented to the CTC shall:

- Show proposed commitments by Program, District, and project
- Show each project's programmed amount
- For each project, show the total commitments to date for the life of the project

Each year during the months of March and April, HQ P&M pulls reports from the RCFP screens to develop the annual allocation. Districts may be requested to provide the following information:

- Amount of planned but unspent encumbrances to be carried-over from the current year to the next FY.
- Reason for requesting allocation on projects with PA&ED planned in or after the 2nd half of the next FY.
- Corrective action plan for allocation requests in excess of the R/W capital programmed amount.
- Justification for requesting allocation on projects without construction funding in place.
- Supporting documentation for allocation requests in excess of District's spending trends.

The District should be prepared to provide an explanation for the items listed in the report.

3.04.14.01 Quarterly CTC Reporting Requirements

During the FY, HQ P&M prepares a quarterly report for the CTC. This report compares the original annual allocation project list against year-to-date commitments. The CTC is looking to ensure Caltrans' spending is in line with what was projected through the Fund Estimate and initial annual allocation. The Districts should be prepared to provide an explanation, when requested, for specific items listed in the report.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.14.02 Year-End CTC Reporting Requirements

CTC Resolution G19-01 requires that after the end of the FY, the Department report the following based on the Department's official book closing statement:

- Actual R/W capital commitments (which includes expenditures and encumbrances) to projects listed in the R/W Capital Annual Allocation.
- Any program level encumbrances against the R/W Capital Annual Allocation.

To meet this requirement, HQ P&M must provide a project-level detail report showing actual R/W expenditures and encumbrances from Advantage compared to the projects that were listed in the initial R/W Annual Allocation. Each District must be prepared to provide a detailed explanation for projects where the commitments substantially deviated from the allocation requested.

Program encumbrance balances at the end of the FY should be just enough to cover prior year invoices in transit. Each District must also prepare a detailed explanation for excessive program encumbrance balances.

Year-end detailed project reports are presented to the CTC at their October meeting.

3.04.15.00 R/W Capital Reports

R/W P&M has various reports that are generated and distributed statewide to assist with the effective and efficient management of the R/W Capital Plan. It is imperative to have adequate reporting for accountability and transparency to ensure that R/W maintains its fiduciary responsibility to the highest standards.

The R/W Capital Monitoring Report, more commonly referred to as the Weekly Monitoring Report, provides data extracted from Advantage for R/W capital transactions that are processed against the R/W Capital Annual Allocation, from July 1st to the following June 30th.

© 1994-2025 California Department of Transportation. All rights reserved.

The following filtering criteria are used for data extraction:

- Task Code and Sub-Task Code:
  - Programmed Costs- 1510/0000
  - Minor Projects- 1520/000
  - Unprogrammed Costs- 1530/0000
  - Individually Allocated Projects- 1540/000
- Fund Code:
  - State- 0042
  - Federal- 0890
  - Reimbursed- 0042R
  - R/W Capital Annual Allocation does not have Budget Authority for SB1 fund 3290.
- Budget Fiscal Year (BFY) + Appropriation + Fund + PEC + PECT:
  - Current 2-digit FY code (Example: BFY 2019-2020 = 20)
  - STIP-RIP (State) = *FY*301-0042/20.20.075
  - STIP-IIP (State) = *FY*301-0042/20.20.025
  - STIP-RIP (Federal) = *FY*301F-0890/20.20.075
  - STIP-IIP (Federal) = *FY*301F-0890/20.20.025
  - SHOPP (State) = *FY*302-0042/20.20.201
  - SHOPP (Federal) = *FY*302F-0890/20.20.201
  - Reimbursement = *FY*302R-0042/20.20.400
  - Other State Funds = *FY*302-0042/20.20.800
- Object Code:
  - Must be one of the R/W Capital designated codes as shown in Exhibit 03-EX-08.
- District Code:
  - Must be 01 through 12 or 81 for Advantage expenditure/encumbrance adjustments.

The bi-weekly Combined Life of the Project Report provides data extracted from both Advantage and the previous financial reporting system FIDO, which pulls from the Department's former financial data management system TRAMS. This report includes all R/W capital transactions recorded throughout the life of the project, for all fund types.

The monthly Statewide R/W Capital Encumbrance Report provides data extracted from Advantage, showing projects that have funds encumbered against a specific project for various R/W transactions, such as Utility Agreements, demolition and clearance contracts, expert witness contracts, and other types of R/W capital transactions that allow for encumbrance of funds.

© 1994-2025 California Department of Transportation. All rights reserved.

The monthly R/W Capital Program Encumbrance Report provides data extracted from Advantage, showing documents that have R/W capital funds encumbered at a *program* level, which reserves funds in the 20.20 program for future use on capital projects. Program encumbrances are typically for title and escrow contracts, non-project specific demolition and clearance contracts, legal services contracts specifically used for R/W projects, environmental services, and other types of R/W capital activities which are a part of project delivery.

When financial transactions are processed against an encumbering document, whether encumbered at the program or project level, the encumbrance is liquidated in the amount of the transaction, and then charged against a specific project(s). When liquidating prior year encumbrances, the BFY + Appropriation + Fund + PEC of the payment must match the BFY + Appropriation + Fund + PEC of the encumbrance. For example, if a Utility Agreement is funded with STIP-RIP State in BFY 19 (19301-0042-20.20.075), it must be liquidated the same way.

For additional information on encumbrances, refer to the internal Accounting Manual, Chapter 11 (internal Caltrans link).

3.04.16.00 Project Change Request Process

On September 1, 2016, the Division of Project Management issued internal Project Management Directive PMD 022R1 (internal Caltrans link) titled "Change Management." This directive identifies when corporate management must proceed with processing an amendment to make a programming change. All programmed projects (STIP, SHOPP, TCRP) and Special Program projects (Toll, Seismic, Retrofit Soundwall, etc.) are required to follow the process outlined in the Department's internal Project Changes Handbook (internal Caltrans link).

3.04.16.01 R/W Project Cost Changes

Scope and schedule changes may have dramatic effects on R/W costs, and District R/W must coordinate closely with District Project Management to determine those effects.

For R/W capital on SHOPP projects, there are many scenarios that lead to cost changes; a PCR should be processed to un-program, delete, and increase or decrease project costs. Refer to guidance for cost changes in the internal Project Changes Handbook (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

For STIP projects, a PCR for R/W is required if the sum of the right of way support and capital costs varies from the programmed amount by twenty percent or more. All cost increases must include a plan outlining how required funds will be obtained. Trade-offs can only be used between projects listed in the same programming document, and in some cases the projects must be in the same county.

3.04.16.02 Reporting R/W Project Cost Changes

District P&M shall report cost increases to District Project Management as soon as possible after it determines a reportable cost change is required.

District Project Management submits a PCR to HQ Project Management for the next available PCR Committee meeting. If the District is not able to submit at PCR for the next meeting, District P&M must ensure a corrective action plan is in place and document the plan for HQ P&M.

3.04.16.03 R/W Capital Cost Control

The CTC has expressed continuing interest in R/W activities related to accomplishing the capital outlay program on time and within budget. As a result, the Department has increased its efforts to improve effectiveness in managing its R/W program. Proper management of R/W capital costs includes the ability to know at any given time the relationship between the R/W Capital Plan, programming, and total commitments to date against the allocation.

3.04.16.04 R/W Capital Cost Control Plan

Each District is responsible for developing and maintaining (staffing) a cost control methodology that allows the District to respond on short notice to requests for R/W cost information. The cost control system must be active and current and must contain information consistent with other statewide sources the Department uses. Data in the system is the basis for information used in the RCFP screens and by Project Management.

At a minimum, the system must contain information that makes and displays a comparison of the status of R/W as estimated (remaining), programmed (remaining), allocated, expended, and approved (if different from programmed). The District must be able to explain any differences between the amounts and indicate when and to whom cost changes were reported. The plan shall also provide for R/W follow-up on reported cost increases.

© 1994-2025 California Department of Transportation. All rights reserved.

Day-to-day management of capital outlay resources, including monitoring and reporting R/W cost changes, rests with each District. HQ P&M reviews each District's cost control methodology/plan for conformance with minimum requirements set forth above and for compliance with Department policies and procedures. Once project information is gathered, it must be constantly monitored. When the District reviews its projects and determines that estimated remaining R/W costs are significantly greater than programmed R/W costs, it must report the increase using PCR procedures.

R/W must take an active role in project cost management. It is not sufficient to merely report cost changes to Project Managers. R/W must follow up on what course of action the Project Manager takes and must record this information for future reference. If District R/W does not get a response from Project Management, it should advise HQ P&M of the cost change. The date the report was made to Program Management and the response should be recorded.

3.04.17.00 R/W Ledger

Years ago, R/W developed a system for tracking transaction codes and dollars to correct problems FHWA found in the Department's record-keeping for R/W expenses. The R/W Ledger, which is essentially a R/W capital "checkbook," is part of that system.

The format of the R/W ledger should parallel the various monitoring reports, particularly the Weekly Monitoring Report and Encumbrance reports.
The ledger should list projects included on the original sub-allocation list and track any additions or deletions. All EAs/Project IDs with anticipated expenditures/encumbrances are listed in numeric order.

For each transaction on an EA/Project ID, Districts should, at a minimum, record the following:

- Document number
- Date transaction documents forwarded to Accounting
- Amount of transaction
- State portion
- Federal portion*
- Local portion

*Federal participation percentages can be verified on the E-76 or the Internal Buyer Line in the Funding Profile setup.

© 1994-2025 California Department of Transportation. All rights reserved.

RECONCILIATION PROCESS

R/W Accounting	Processes R/W capital transactions on a daily basis, including posting payments and making expenditure adjustments.
District P&M	Compares the R/W ledger or processed transaction documents against the Weekly Monitoring Report. It is recommended that the reconciliation process be conducted on a weekly basis to reduce the time necessary to complete the FY closeout. Errors in the weekly reports are reviewed and approved by the P&M Senior. The transactions requiring correction are forwarded to R/W Accounting for correction.
R/W Accounting	Determines type of errors and distributes them to appropriate Accounting Liaison for correction. Verifies that error adjustments do not affect other entries for the EA/parcel. Coordinates with District R/W for R/W adjustments.
District P&M	Verifies adjustments have been made in Advantage via the Weekly Monitoring Report.

3.04.17.01 Reconciliation with Advantage

The CTC requires the Department to report on total commitments compared to the approved annual allocation. R/W must manage its annual allocation to ensure R/W does not exceed the allocated state, federal, or reimbursed budget authority amounts.

Districts are delegated responsibility to manage their sub-allocations. Managing the allocation includes ensuring expenditures are within the available balances of the state, federal, and reimbursed budget authority. In addition, R/W expenditures should be properly recorded in Advantage. If R/W ledger balances do not agree with Advantage balances, the discrepancy must be resolved. It is District R/W's responsibility to inform R/W Accounting of any discrepancy. R/W Accounting has primary responsibility to isolate the transaction(s) causing the discrepancy and adjust Advantage accordingly.

© 1994-2025 California Department of Transportation. All rights reserved.

It is recommended that District P&M reconcile expenditure transactions on a weekly basis between the Weekly Monitoring Report and the R/W ledger to reduce the time necessary to conduct the reconciliation process at fiscal year-end. R/W ledger information and transaction documents should be compared against the Weekly Monitoring Report to ensure each transaction (EA/Project ID, Phase, Object Code, Reporting Code, and amount) are properly recorded.

Available balances are what remains from the District sub-allocation after recording expenditures and encumbrances.

3.04.18.00 Coding

The coding used to establish EAs/Project IDs and Phases in Advantage is determined by the type(s) of funds programmed on a project, as well as whether federal funds have been obligated under a federal project agreement (E-76). FHWA requests that all transaction documents contain a box in which the Federal Project Number can be clearly displayed. The number is used to confirm federal participation eligibility during examination or audit of parcel files and helps P&M and R/W Accounting determine if the proper coding has been entered on transaction documents and ultimately in Advantage.

Each transaction document should note the Funding Profile associated with the Project ID and FY in Advantage. The Funding Profile indicates what Fund was debited/credited. Fund Code 0890 confirms federal funds were used on the transaction.

Coding elements and abbreviations used most often by R/W are shown on the following page.

© 1994-2025 California Department of Transportation. All rights reserved.

R/W CODING ELEMENTS

Element	Explanation
District (Dist)	The Department is broken down by 12 Districts.
Unit	The functional unit within a District/Division.
Fiscal Year (FY)	Fiscal year in which a transaction is processed.
Budget Fiscal Year (BFY)	Fiscal year in which funds are appropriated by the Governor.
Appropriation (APPR)	Authorization from a specific fund to incur obligations for a specific purpose and period of time, most commonly done in the Budget Act, signed by the Governor each year.
Fund	Source or account covering the expense, for example: 0042 = State Highway Account 0890 = Federal Trust Fund 0042 with 'R' designation on the Appropriation = Reimbursement from Local Agencies, Toll Bridge funds or Subvention funds
Program Code (PEC/PECT)	Program, Element, Component, and Task of the fund source. For example: 20.20.400.100 indicates 20 = Program (Capital program), 20 = Element (Capital element), 400 = Component (State Highway projects funded from other sources), 100 = Task (Locally generated funds)
Expenditure Authorization (EA)	Former legacy system 5-digit project identification number assigned to a new project at time of project initiation.
Project Identifier or Project ID (Proj ID)	Advantage 10-digit project identification number which is cross-referenced with the EA.
Phase	The project development phase of a project.
Document Identification Number (Doc ID)	Number assigned to a transaction document, such as a contract number or utility agreement number.
Reporting Code (RPT)	A unique code established in Advantage to identify specific expenses, such as parcel numbers or environmental permit type.
Object Code (OBJ)	Designates the type of expense, such as acquisition or RAP. An Object Code followed by "N" is <u>not</u> federally eligible.

© 1994-2025 California Department of Transportation. All rights reserved.

3.04.18.01 Coding Verification

Verification of coding occurs during examination and completion of R/W Accounting payment request forms, as follows:

- Fund Certification – District P&M verifies sufficient programming, allocation, and budget authority are available and codes various transaction documents for Fund Certification prior to processing payment. Only approved R/W staff can certify phase 9 funds.
- Reconciliation – District P&M and R/W Accounting verify coding elements and the EA/Project ID status (opened, closed, suspended) during this process.
- Monitoring Process – District P&M verifies coding for expenditures when reviewing the Weekly Monitoring Report. (See Section 3.06.09.00.)
- Audits – Coding is reviewed during project audits or Quality Enhancement/Joint Review (QEJR).

The Weekly Monitoring Report and Combined Life of the Project Report are the recommended resources for determining if proper coding has been entered into Advantage.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.00.00 – FEDERAL-AID PROJECT FUNDING

3.05.01.00 General

To obtain federal financing of projects, the Department must comply with laws, regulations, requirements, and procedures established by Congress and the Federal Highway Administration (FHWA). The decision to apply for federal participation on a project or phase of a project is made during the programming phase and is guided by the Department's federal-aid policy.

The following are laws and regulations that govern FHWA Program financing:

- Title 23 United States Code (USC)
- Title 23 Code of Federal Regulations (CFR)
- Infrastructure Investment and Jobs Act (Bipartisan Infrastructure Law)
- Clean Air Act
- National Environmental Protection Act (NEPA)
- Title 49 United States Code (USC)
- Uniform Relocation Act
- Annual Appropriation Act
- Special Congressional Action

The Department utilizes FHWA's publication entitled "A Guide to Federal-Aid Programs and Projects" in the administration of the Federal-aid highway program. The guide provides basic information about the Federal-aid programs, projects, and other program characteristics. The publication is being updated to include information from the latest multiyear Federal-aid authorizing legislative act, Infrastructure Investment and Jobs Act (IIJA) (Public Law 117-58, also known as the "Bipartisan Infrastructure Law"[BIL]).

Federal-aid to California encompasses federal funding to Local Agencies, and Caltrans' STIP and SHOPP projects and other transportation agencies. Under SB 45, the STIP provides 75% of new STIP funds for the Regional Transportation Improvement Program (RIP) and 25% for the Interregional Transportation Improvement Program (IIP).

FHWA provides a portion of the total cost of each project in which it participates; the state or local agency must provide matching funds. The Infrastructure Investment and Jobs Act sets the federal participating ratio (percentage) for each program.

© 1994-2025 California Department of Transportation. All rights reserved.

Title 23, Section 115, of the USC, as amended by the Federal Highway Act of 1987, allows states to federally authorize projects, initially financed with their own funds, and later claim reimbursement when federal funds are obligated on the project – also known as Advance Construction funding.

Under the conditions in 23 CFR 1.36, FHWA may withhold payment where the state fails to comply with federal laws or regulations, or may withhold approval of further State projects, and take other actions deemed appropriate until compliance or remedial action has been accomplished by the State.

FHWA amended the right of way regulations for federally assisted transportation programs administered under Title 23, USC. The FHWA clarified and reduced federal regulatory requirements and placed primary responsibility for a number of approval actions at the state level.

Changes in 23 CFR, as a result of TEA-21, MAP-21, and FAST Act that affect Right of Way (R/W) activities are detailed in the functional sections of the R/W Manual. Significant changes to the federal regulations affecting right of way include, but are not limited to the following:

1. Expanding federal funds to participate in all costs required by state law.
2. Allowing states to receive credits or reimbursement for early acquisition when the acquired property is incorporated into a federally eligible transportation project, or use the normal federal-aid project agreement and reimbursement process to fund an early acquisition.
3. Allowing states to advance preliminary acquisition activities under preliminary engineering for requesting federal participation in funding and reimbursement of incidental or support costs.
4. Allowing states to retain the proceeds for the lease or sale of real estate purchased with federal funds, as long as the proceeds are used for Title 23 USC type projects.
5. Eliminating the federal right-of-way revolving fund for acquiring right-of-way in advance of available state funding.
6. Requiring states to submit an up-to-date R/W Manual (to document methods and practices to assure compliance with state and federal laws and regulations) to FHWA for approval no later than August 23, 2018.
7. Requiring State Transportation Departments to certify to FHWA every five years after August 23, 2018 that the current R/W operations manual conforms to existing practices and contains necessary procedures to

© 1994-2025 California Department of Transportation. All rights reserved.

ensure compliance with federal and state real estate law and regulation.

8. Requiring State Transportation Departments to periodically update its R/W Manual to reflect changes in operations and submit the updated materials for approval by FHWA.

3.05.02.00 Departmental Policies and Guidelines

The Department has established policies and guidelines for developing budget and programming documents (STIP and SHOPP) and for administering and programming federal-aid projects. The Department maximizes use of federal resources by capturing all federal aid available and applying it to construction, right of way acquisition, and preliminary engineering.

Current policy directs that all projects requesting federal aid must be listed in the current federally approved State Transportation Improvement Program (FSTIP). Departmental directive requires federal aid for both capital and support be requested for all eligible R/W projects. (See Section 3.04.11.00, Federal Participation in Right of Way.)

Refer to the internal Federal Aid Project Funding Guidelines (internal Caltrans link) for further directions.

It takes several years to expend funds for R/W project costs. To avoid obligating excess federal funds unnecessarily, the Department, therefore, typically does not request the total estimated at one time. The Headquarters Budgets Office of Federal Resources (OFR) will determine the amount of funds to obligate and the amount to authorize as Advance Construction (AC). AC authorizations allow the department to proceed with work efforts while reimbursement of expenses will not occur until AC funds are converted to obligated federal funds.

OFR is responsible for developing and submitting the R/W projects' AC conversions or partial obligations to FHWA. OFR will consider the R/W project's federal program funds involved and the relationship of total funds expected to be available during the Federal Fiscal Year.

District R/W submits requests for federal funding through a State/Federal Project Agreement, an electronic request in the Federal Aid Data System (FADS) commonly referred to as an E-76. Districts may submit multiple E-76 modifications to cover incremental portions of R/W work over the duration of the R/W phase of a project, actions typically supported by an updated R/W Data Sheet.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.02.01 Federal-Aid on State and Local R/W Projects

The Department secures federal funding on State and Local projects that qualify for federal-aid. To request federal-aid, a project must be listed in the FSTIP or FTIP and have an approved environmental document, known as the National Environmental Policy Act (NEPA) document, dated within 3 years of the submittal of the E-76, and supported by an Environmental Certification within 1 year of the submittal of the E-76.

With the enactment of SB 45, programmed projects on the State Highway System may have a mix of both state and local funds. State funds are STIP funds, which include the RIP and the IIP. Local Agency Funds include tax measure, property tax, developer fees, and Local Assistance federal subventions.

OFR and Office of Local Programs (OLP) are both responsible for authorizing and obligating federal funds on R/W projects. Headquarters OFR is responsible for State (Capital) projects while Local Programs is responsible for Local Agency projects.

- State Projects are those projects on the State Highway System.
- Local Projects are those projects on Local Streets and Roads.

In administering state and locally funded R/W projects, there must be separate accountability of State and Local federal funds. The Department must establish separate Earmark Phases and Funding Profiles in Advantage to account for separate funding and expenditures on each (State or Local) federal-aid project.

For locally funded (including subvention funds) projects, the Department must enter into a cooperative agreement or master agreement with a local agency or regional planning organization prior to performing any right of way activities.

3.05.02.02 Early Acquisition Under 23 CFR Section 710.501

Effective January 20, 2000, 23 CFR amended R/W regulations for federally assisted transportation programs to allow the state, under certain circumstances, to initiate early acquisition for corridor preservation, access management, or other purposes and use eligible acquisition costs toward the state's share of the project into which the right of way is incorporated. It

© 1994-2025 California Department of Transportation. All rights reserved.

specifically provides for early acquisition in advance of final environmental and project approval.

In discussing "early acquisition" and acquisition costs as credit or soft match of federal funds, early acquisition refers to the acquisition of real property by state or local governments in advance of federal authorization or agreement. Early acquisition referenced in this section is not the same as advance acquisition under hardship or protection purchase criteria. See Chapter 5, Early and Advance Acquisition; Corridor Preservation; Hardship and Protection; Donations and Dedications.

Amendments to 23 CFR allow flexibility in considering early acquisition under certain situations. However, state and local governments must conform to statutory requirements in early acquisition approaches and follow federal guidelines that include careful observance to the environmental process before obtaining credit. Before initiating early acquisition, proper legal authority must be obtained and careful consideration given to program and project needs.

On December 09, 2002, the HQ Chief Engineer issued a memorandum that revises and clarifies approval criteria for beginning R/W acquisition on STIP projects prior to approval of environmental clearance. The guidelines are a departmental process only and are not applicable to local agencies. See Exhibit 03-EX-06.

3.05.02.03 Credit (Soft Match) Toward State's Share of Project Cost

23 CFR 710.501 allows early acquisition project costs (capital costs only) incurred by a state agency to become eligible for use as a credit towards the state's share of a federal-aid project, provided the project receives surface transportation program funds and other conditions are met as indicated in 23 CFR 710.501 (c). Credits can be applied to projects where the initial project agreement with FHWA was executed after June 9, 1998.

Essentially, this provides that the value of property acquired by state or local governments and incorporated into the project could be credited to the **non-federal share** of the right of way costs of a federal project. However, it is only **land** and **building** costs (state only funded) that are deemed to be qualifying and are permitted as a contribution toward the non-federal share. (All other costs, such as support, appraisal, related acquisition costs, damages, and RAP are not counted as soft match or credits.) **Credits are not**

© 1994-2025 California Department of Transportation. All rights reserved.

available for lands acquired with any form of federal financial assistance, or already incorporated and used for transportation purposes.

Prior to TEA-21, publicly-owned property could not be used as credit toward the non-federal share of the cost of a project. However, with the amended 23 CFR 710.507, state and local contributions of properties (incorporated within a federally funded project) can be used as a credit toward the matching share of the total project cost.

23 CFR 710.501(c), Early Acquisition, provides conditions that must be met if eligible acquisition costs are used as credit (soft match) on a federal-aid project. Those conditions are, in part, as follows:

1. The property was lawfully obtained.
2. The property is not Park Land (23 U.S.C. 138).
3. The property was acquired in accordance with 49 CFR, Part 24.
4. The state complied with Title VI (42 U.S.C. 2000d – 2000d-4).
5. The FHWA concurs that the action taken did not influence the environmental assessment, or
    i. The decision to construct the project;
    ii. The consideration of alternatives; and
    iii. The selection of the design or location; and
6. The property must be incorporated into a federal-aid project.
7. The original project agreement covering the project was executed on or after June 9, 1998.

Provisions of 23 CFR, Section 710.505–Real Property Donations and 710.507–State and Local Contributions, provide opportunities to the State Transportation Department to utilize the value of real properties as credit towards the state share of a project.

Under Section 710.505 (b), donations of real property from a non-governmental owner may be credited to the state's matching share of the project. The credit is to be based on fair market value established on either the date on which the donation becomes effective, or the date on which equitable title to the property vests in the State. The total credit cannot exceed the State's pro-rata share under the project agreement to which it is applied.

Under Section 710.507 (a), contributions of real property owned by State and local governments that is incorporated within a project receiving financial assistance from the Highway Trust Fund can be used as a credit toward the

© 1994-2025 California Department of Transportation. All rights reserved.

non-federal matching share of project costs provided documentation supporting all credits includes the following:

1. Certification that the acquisition satisfied the conditions in 23 CFR 710.501(c)(1) through (6); and
2. Justification of the value of credit applied. Acquisitions costs incurred by the State to acquire title can be used as justification for the value of the real property.

Sufficient documentation of the financial data to support the soft match or credit must be included in the project file for the final voucher. Expenditure reports from Advantage will suffice as financial support to document the State's matching share of the project.

OFR and the Division of Accounting should also be consulted for further guidance on the application of soft match or credit toward a federal-aid project.

3.05.03.00 Federal Participation in R/W Projects

OFR establishes the Federal Aid Project Funding Guidelines (internal Caltrans link), including thresholds based on federal funds management, for federal-aid funding for R/W projects. Although federally approved R/W projects are generally 100% participating, only those parcels within the R/W lines and eligible excess land are eligible for federal participation.

The current established thresholds for requesting federal aid funding on R/W projects are as follows:

- State Highway Operation & Protection Program (SHOPP) projects that are identified for Road Maintenance & Rehabilitation Account (RMRA) funding with programmed R/W capital of $10,000,000 or more are qualified for Federal-aid funding.
- SHOPP projects (including HSIP) that are NOT identified for RMRA funding with programmed R/W capital of $2,000,000 or more are qualified for Federal-aid funding.
- State Transportation Improvement Program (STIP) projects with programmed R/W capital of $10,000,000 or more are qualified for Federal-aid funding.
- Active Transportation Projects (ATP) projects awarded as part of the statewide competition with programmed R/W capital of $1,000,000 or more in ATP funding are qualified for Federal-aid funding.

© 1994-2025 California Department of Transportation. All rights reserved.

- Some federal programs, including Demonstration project programs, are federalized regardless of the R/W capital estimate amount.

Exceptions:

- All ER projects greater than $5,000 in total are to be qualified for Federal-aid ER funding and must be developed in accordance with federal requirements. This threshold applies to both construction capital and R/W capital. The final eligibility determination for Federal-aid ER funding is determined by the FHWA on a Damage Assessment Form (DAF). District R/W staff should work directly with their OFR Area Engineer to determine eligibility of their project prior to reaching out to property owners or otherwise expending against R/W phases.
- Capital Outlay projects programmed in the Railroad Grade Separation Program (20.30.010.400) and the Safety Railroad Grade Crossing Protection Program (20.30.010.500) with estimated construction capital of $100,000 or more are to be qualified for Federal-aid funding.
- Projects under Section 146.5 of the Streets and Highways Code, Parking Facilities, estimated to cost $30,000 or more in total are qualified for Federal-aid funding.
- Projects under Section 148 of the Streets and Highways Code, Transit Related Highway Facilities, estimated to cost $30,000 or more in total are qualified for Federal-aid funding.
- Mitigation bank credit purchases will not be federalized unless the following conditions are met:
    a. The FHWA-1273 form is confirmed to be included in the DPAC contract agreement to purchase credits.
    b. Confirmation is obtained that the mitigation bank involved in the credit purchase was not developed using federal funding.
- Until further notice, 201.999 ZEV projects will not be federalized.
- It is expected that the programmed amount for most R/W child projects will fall under the federal-aid threshold, and those projects will move forward as state-only funding. If there is a possibility a R/W child project could exceed the federal-aid threshold, District R/W staff should reach out to their OFR Area Engineer to confirm eligibility. It is crucial that the parent and child projects are not linked to the same Federal project, as each Federal project should be associated with a single State Project ID/EA to prevent accounting issues during the closeout process.

© 1994-2025 California Department of Transportation. All rights reserved.

- All federally funded R/W projects, including mitigation projects, must comply with Davis-Bacon Act prevailing wage requirements. Due to prevailing wage issues with the California Conservation Corps, and many Regional Conservation Districts, OFR will not be federalizing projects contracted out to these entities at this time.

Other Federal Program Projects

Projects funded from federal earmark programs such as High Priority Projects, Projects of National and Regional Significance, and National Corridor Infrastructure Improvement Program shall be qualified for Federal-aid funding regardless of the project's capital cost estimate.

All projects funded from Federal Discretionary Programs shall be qualified for Federal-aid funding. Federal Discretionary Programs include but are not limited to:

- Fostering Advancements in Shipping and Transportation for Long-term Achievement of National Efficiencies (FASTLANE) Grants
- Infrastructure for Rebuilding America (INFRA) Grants
- Coordinated Borders and Infrastructure program (CBI)
- Federal Lands Access Program
- Federal Lands Transportation Program
- Ferry Boat Program
- Intelligent Transportation System Program
- Surface Transportation System Funding Alternative Program
- Technology and Innovation Deployment Program

There could be federal authorization and participation on a R/W project, but not on specific parcels because acquisitions may have occurred prior to initial federal authorization, or not approved through a subsequent authorization on the R/W project. (Those non-participating acquisition costs should be coded in Advantage as ineligible.) Also, where the Department did not apply for and receive FHWA authorization and specific federal approval for utility relocations, the utility relocation costs may not be charged to the project with federal participation and must be state-only funded.

© 1994-2025 California Department of Transportation. All rights reserved.

There may be federal aid for preliminary engineering and construction engineering on a highway project, but not for R/W. The nature and complexity of R/W projects, compared to construction or preliminary engineering projects, require that extreme care be exercised in identifying federal eligibility and participation. To accommodate the multifunctional R/W costs and credits, various federal participation forms are used to identify federal participating costs and to segregate eligible and ineligible R/W costs for federal reimbursement. Each R/W functional area has included special instructions for properly coding functional costs in its procedures. (See functional sections of the R/W Manual for detailed instructions.)

3.05.04.00 Federal Funding Overview

Whenever federal funds provide a portion of a project's funding, in any phase or project covered under the primary NEPA document, the Department must qualify the project for federal participation by meeting applicable requirements of federal laws, and implementing regulations and directives.

The following is a summary of activities necessary for obtaining federal authorization, funding, and reimbursement for a federal-aid project:

- Verify project is included in programming documents (e.g., STIP, SHOPP, FTIP, FSTIP).
- Request work/project authorization and execution of project agreement by submitting an electronic E-76 in FADS to the OFR for processing to FHWA, including a current R/W Data Sheet.
- Receive FHWA's approval through electronic signature document in FADS for the work/project, prior to beginning R/W work.
- Bill FHWA for progress payments through Advantage.
- Initiate and submit, when necessary, an electronic modification of project agreement in FADS to adjust federal funding, supported by an updated R/W Data Sheet, and/or the Project End Date (PED) under agreement with FHWA.
- Prepare a final voucher for the project after all work is completed and close out project with FHWA.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.05.00 Federal Authorization/Approval

FHWA has delegated to the Department much of the authority for determining FHWA Involvement and Oversight on projects. OFR and OLP have overall responsibility for the management of federal funds on State and Local projects.

The Department obtains separate authorizations/agreements on capital outlay projects for Preliminary Engineering, R/W, and Construction through the electronic combined authorization/agreement E-76 process in FADS. The FHWA authorization to proceed with work, and obligation of federal-aid funds (for an exception, see Section 3.05.05.01 on advanced construction projects) occurs with the execution of the project agreement. FHWA's approval to proceed with work establishes the date after which expenditures are eligible for reimbursement.

Federal funds may not be used for costs incurred prior to the date of authorization to proceed. Since Advantage precludes costs prior to authorization from billing FHWA, special coding is not needed for segregating costs in the billing.

R/W projects are sometimes authorized and funded for an amount less than the total estimated cost (usually the amount that can be expended on a timely basis, generally one year), or funds are authorized as advance construction (AC) (see Section 3.05.05.01). Since R/W project limits frequently differ from construction project limits, these projects are authorized separately with FHWA and are assigned different federal-aid project numbers compared to the PE and Cons federal-aid project numbers. FADS has the capability to identify related projects to create a relationship between the different phases.

OFR and OLP coordinate authorization of all federal funds with FHWA and submit necessary back-up documentation for the projects.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.05.01 Federal Authorization for Advance Construction (AC) Projects

OFR will use its discretion in authorizing and processing federal-aid projects. When a R/W project is designated as an advance construction (AC) project, it is processed in the same manner as a regular federal-aid project and a project agreement is executed. The only exception is that the FHWA authorization does not constitute a commitment of federal funds on the AC project. OFR at some future date will convert, or obligate, the AC project and request federal funds be obligated through an electronic modification of the project agreement so that project expenditures can then be billed to FHWA for reimbursement.

3.05.05.02 Federal Participation in Preliminary Acquisition Activities

23 CFR 710.203 (a)(3) allows preliminary acquisition activities to be advanced under preliminary engineering prior to National Environment Policy Act (NEPA) clearance (42 USC 4321 et seq.). Appraisal completion may also be authorized as preliminary right-of-way activity prior to completion of the environmental document. Thus, costs of preliminary R/W activities incurred in conformance with state and federal law requirements may qualify for federal participation.

Districts may prepare and submit an electronic E-76, Project Authorization/Agreement to seek Federal participation in preliminary R/W activities following:

1. June 9, 1994 guidelines that define preliminary right of way (see Exhibit 03-EX-05 and Section 3.08.01.00).
2. Departmental internal guidelines for federal aid project funding for Right of Way Projects (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.05.03 Stage 1 Authorization – Hardship and Protection (H&P) Acquisitions

Federal aid for H&P acquisition is requested only when total R/W capital costs, including H&P acquisition meet the thresholds referenced in Section 3.05.03.00. The Department's practice is to budget expenditures H&P acquisitions showing federal participation.

The provisions of 23 CFR 710.503 (b)(c) allow authorizations for protective buying and hardship acquisitions. FHWA may authorize federal participation in acquisition of a particular parcel or a limited number of parcels within the limits of a proposed highway corridor prior to completion of the Environmental Impact Study and selection of the route. Known as Stage 1 Authorization, this is simply a federal authorization to proceed without the obligation of federal funds.

Stage 1 Authorization for H&P parcels requires submittal of a complete justification package, along with the preparation and submittal of an E-76 to FHWA. When submitting the E-76 for a Hardship or protection acquisition, the FADS COMMENT screen must clearly indicate that the request for a Stage 1 Authorization is pursuant to 23 CFR Section 710.503, and authorization to proceed under 23 CFR 630.106 (c) (3).

Pursuant to 23 CFR Section 630.106(d), the following statement must be included in the E-76 request for Stage 1 Authorization in the FADS COMMENT screen:

> "Authorization to proceed is not a commitment or obligation to provide Federal funds for that portion of the undertaking not fully funded herein."

The Stage 1 Authorization allows eligible incurred costs to be reimbursed after the appropriate requirements are fulfilled, provided a revised E-76 (converting the authorization from Stage 1 to 2 – Regular Right of Way) is transmitted to and approved by FHWA.

Since all eligible Stage 1 costs, including appraisal, acquisition, and rental activities, potentially qualify for federal participation, they must be captured by a multiphase (project) EA and not by a single-phase EA. See Section 3.04.04.01 for charging information on H&P acquisitions.

On Stage 1 Authorization, R/W Project Control sets up the project in Advantage with an Earmark 2 and 9 Phase with an ineligible, state-only funding profile. Upon conversion to a Stage 2 Authorization, a new funding

© 1994-2025 California Department of Transportation. All rights reserved.

profile is established for the Earmark phases for federal participation and must reflect federal-aid eligibility, and other appropriate federal-aid information.

3.05.05.04 Stage 2 Authorization – Conversion to Regular Federal-Aid Project

When an H&P project progresses to the environmental clearance stage, the Stage 1 authorized project must be converted to a Stage 2 regularly funded federal-aid R/W project. As soon as project criteria are met, district P&M must submit a revised E-76 using FADS to receive federal funding obligations.

The following information must be included in the COMMENT Screen on the revised E-76 for a Stage 2 Authorization:

- Stage 2 Authorization (Conversion from Stage 1 Authorization)
- Environmental Clearance Document Date
- Route Adoption Date
- Public Hearing Date

Upon approval of the Stage 2 Authorization, R/W Project Control establishes a federally eligible 2 or 9 Phase in Advantage, to reflect federal-aid eligibility, and other appropriate federal-aid information.

Once a project has progressed to Stage 2, R/W support and capital outlay expenditures are charged to the federally eligible 2 and 9 Phase, and the Earmark Phases for the Hardship or protection acquisition charges become federally eligible.

3.05.05.05 20-Year Rule

As a part of federal funds management, it is important to monitor the progress of projects that are federally authorized. A project must continue to move forward within the specified timeframe, or risk losing or refunding federal funds:

20-YEAR RULE – Once the R/W phase is authorized, Construction must proceed within 20 years, or risk losing or refunding R/W federal funds.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.06.00 Project Identification

A project seeking federal aid will be assigned a seven digit Federal-Aid Project Number (FPN) by OFR at the start of the E-76 process. For State purposes, the Advantage Project ID is the ten digit project identifier, and the EA is the Alternate State project identifier. (See Section 3.02.00.00 for additional information on EAs.) Although it is not recommended, more than one project EA may be assigned to a federal project. And depending on funding circumstances, more than one federal project may be assigned to an EA.

The FPN, Project ID, and EA are referenced on various documents, including the E-76, and are contained in ROWMIS, PRSM, and Advantage/Datalink.

The relationship between FPNs and Project IDs/EAs is important, especially with regard to federal authorization and reimbursement. Proper federal-aid information must be established in Advantage on the Funding Profile of the Project ID to link an FPN to one or more Project IDs/EAs, or vice versa, for the department to record project expenditures and to bill and collect federal reimbursement.

3.05.06.01 Federal-Aid Project Number

OFR assigns an FPN to identify an authorized highway project or federally approved research study. The FPN is used to monitor project activities and funding and must be on the E-76, and any other support documents for the project.

An example of an FPN is:

- 1053 (311)
- P041 (041)

The FPN must be shown on R/W plans, contracts, deeds, appraisals, options, vouchers, utility agreements, correspondence, and other documents and papers.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.06.02 EA Adjustments for Combined and Split Projects

When combining or splitting project EAs, district R/W must exercise caution to maintain the federal-aid information related to authorized federal-aid R/W projects.

- **One Federal-Aid R/W Project Involved** – newly created EAs/Project IDs must reflect the original federal-aid project number if they are within the project termini authorized by the E-76 and maintain the approved scope of work.
- **Two Federal-Aid R/W Projects Involved** – newly created EAs must have separate Earmark Phases and funding profiles established to correspond respectively with each federal-aid project. (Post mile, or kilometer post, identification will be key to relating to appropriate federal aid R/W project.)

Consult with Headquarters P&M if the combined or split projects result in discrepancies with the federal project limits. OFR should also be consulted on these projects for a determination on whether or not the project is federally qualified.

3.05.07.00 Request for Federal-Aid Funding Approval/To Proceed (E-76)

As a condition for receiving federal-aid, the Department must obtain FHWA authorization of work and execute a project agreement.

The Department and FHWA use the FADS Electronic Signature System to electronically transmit information required to authorize the project, execute the project agreement, and obligate funds for the federal-aid project. (See Section 3.01.02.00 for additional information on FADS.)

Prior to the passage of TEA-21, there was a two-step process for committing federal funds and entering into a formal agreement with FHWA. Previous FHWA regulations (23 CFR 630.303[c]) combined these steps into a single action and the Department and FHWA Division office, in accordance with 23 CFR 630.106(2), now handle all project authorizations/agreements as a single action through execution of the project agreement in the FADS System. After reviewing E-76 data, FHWA Division transmits the FADS data to the Fiscal Management Information System (FMIS) in Washington, D.C. for electronic signature to finalize the agreement. The process on the E-76

© 1994-2025 California Department of Transportation. All rights reserved.

authorization/agreement is complete when the data is transmitted back to FADS from FMIS with signature names and dates for each project. The electronic processing of the Authorization to Proceed (E-76), Project Agreement, and Modifications of Project Agreements replaces the hard copies of these referenced documents.

Since costs are not eligible for federal participation if incurred prior to the authorization to proceed date, timeliness of E-76 submittal and authorization is critical. The district must submit an E-76 to OFR as soon as possible after environmental approval. Authorization to proceed with preliminary engineering and acquisition of rights of way on H&P projects is obtained in the same manner as regularly financed federal-aid projects.

The E-76 must be prepared for each highway project eligible for federal-aid funding. The purpose of the E-76 is to:

- Cover the various types of projects and kinds of work to be undertaken.
- Indicate the effective date governing FHWA authorization for federal share of eligible costs.
- Show the total amount of project cost requested and federal funds obligated.
- Set forth any special provisions or limits relating to the project.

The E-76 must be submitted at the following milestones for R/W projects:

- Prior to Project Approval & Environmental Document (PA & ED): Preliminary work – before beginning any effort, such as appraisal maps. This work effort can be included on the Preliminary Engineering (PE) authorization if preliminary R/W work needs to be started prior to PA & ED being achieved. R/W hardship or protection authorizations are executed prior to PA & ED as a Stage 1 authorization, and then upon achieving PA & ED, are converted to a Stage 2-Regular R/W authorization.
- At or soon after PA & ED: Appraisal, acquisition, relocation assistance (RAP), demolition/clearance, and utility relocation – before beginning effort.

Capital outlay costs are eligible for participation upon E-76 approval prior to commencement of the activity proposed for participation. For example, acquisition activities commence with the "First Written Offer." Submittal of the "First Written Offer" before the E-76 is approved makes all acquisition costs non-participative. The same restrictions apply to other capital outlay activities, e.g., utility relocation and RAP.

© 1994-2025 California Department of Transportation. All rights reserved.

Federal aid must also be requested for R/W support when federal aid is requested for capital outlay costs. Initially an E-76 may be submitted to cover preliminary R/W work and capital outlay costs, such as R/W engineering activities and title reports, with subsequent E-76 modifications being submitted for the remainder of capital outlay and support costs, or a full request for all regular R/W support and capital may be requested upon achieving PA & ED.

The E-76 contains basic data about the project and the phase for which participation is being requested. The district drafts the request and OFR finalizes it. The E-76 should include:

- Total estimated support costs and functions involved in the support costs (e.g., acquisition, utilities, and RAP).
- Total estimated capital outlay broken down by costs of acquisition (right of way, excess land, and demolition and clearance), RAP, Last Resort Housing, and utilities.
- Total number of acquisition parcels.
- Total number of RAP families and business relocations.
- Total number of Last Resort Housing units or Hardship parcels.

Supporting documentation for initial requests must be submitted to OFR with the E-76 request as follows:

- Current R/W Data Sheet (estimate) with attached parcel estimate list or spreadsheet, showing parcel number, grantor, and acquisition and relocation cost estimates; and attached utility relocation list showing utility owner name, type of utility, and cost estimate
- CTIPS printout showing the support estimate or California Transportation Commission (CTC) vote.
- Federal Transportation Improvement Program (FTIP) printout that lists the R/W phase(s)
- Signed NEPA (environmental) document

Districts must ensure that parcel acquisition estimates are entered in the parcel screen in the Right of Way Management Information System (ROWMIS). Districts are no longer required to enter individual parcels or utilities in FADS, and the tabs where this data was previously entered have been removed.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.08.00 R/W Project Estimate

The Department must provide total R/W costs for an entire project when submitting an E-76 for FHWA's approval to proceed. The total R/W costs must include separate estimates for:

- Acquisition (R/W, excess, and demolition/clearance)
- RAP Families and Businesses
- Last Resort Housing/Hardship Acquisition
- Utilities
- Support

The total R/W costs displayed on the E-76 must reflect R/W (capital outlay) cost estimates that are on the R/W Data Sheet and PRSM Right of Way Capital Estimate screen, as well as support cost. The major capital items on the R/W Data Sheet should each have their own Funding Line on the Fund Detail tab of the E-76. For R/W capital costs, Utilities uses Improvement Type Code 43, while all remaining R/W capital costs use Improvement Type 16.

The R/W support cost estimate must also be itemized separately on its own Funding Line on the E-76, and uses Improvement Type 16 as well; therefore, it is imperative that each type of R/W be listed on individual lines. Since support estimates currently are calculated manually and no standard procedures are applied, many projects are under-obligated and underfunded in federal funds. Support costs must be current and realistic, and based on anticipated workload. If workload changes, support costs must be revised and should be reflected in an updated R/W Data Sheet support calculation estimate.

The R/W cost estimate provided on the E-76 should be kept current and updated whenever it is determined the estimate is no longer valid. See Chapter 4, Estimating.

3.05.09.00 Amendment/Modification of Federal-Aid Project Agreement

When it is necessary to adjust federal funding on a project, Districts will prepare and transmit an electronic E-76 Amendment/Modification to OFR, who will review and submit to FHWA for review and approval. The modification of project agreements should continue to be processed in accordance with the requirements in 23 CFR 630.110.

© 1994-2025 California Department of Transportation. All rights reserved.

The modifications to the project agreement are based on funding adjustments on an "as needed basis" to cover additional eligible project costs with increased programmed funding, and adjustments requested by R/W and/or Accounting.

Eligible project costs incurred beyond the funding limits of the federal project agreement become known as an accrual or excess of agreement and cannot be billed to FHWA for reimbursement until additional federal funding is obligated for the project agreement. Therefore, it is advisable that the electronic E-76 Amendments/Modifications be submitted to FHWA in a timely manner.

Federal project agreements that are in accrual status will require a modification to the federal project agreement, and the request for additional funding must be supported by an updated R/W capital cost estimate (R/W Data Sheet) and having sufficient budget capacity in the appropriate R/W Phase to accommodate the increase in funding. If enough funds are not programmed to cover the increased cost, a PCR is required to increase the project budget.

OFR provides a monthly federal accrual report (internal Caltrans link) identifying projects that require a request for additional funding.

Supporting documentation must be submitted to OFR with the Amendment/Modification E-76 request as follows:

- Updated R/W Data Sheet (estimate) which reflects capital costs already expended and remaining estimated costs
- Utility relocation list that shows utility owner name, type of utility, and estimated cost
- Approved G-12, California Transportation Commission (CTC) Supplemental vote, or Documentation Project Change Request (PCR) to support an increase in federal authorization (budget capacity)

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.10.00 Multiple Federal Funding Sources

R/W projects may have multiple federal funding sources. Two examples of dual or multiple funding sources are:

- A project with STIP and SHOPP funds.
- A project with Surface Transportation Block Grant Program (STBGP) and Highway Safety Improvement Program (HSIP) funds.

OFR can obligate different classes of federal funds for a specific project depending on the need and availability of funds. It is not unusual for a R/W project that spans a number of years to be financed with different types of federal funds, identified as different federal program codes (known as federal appropriations in AMS).

A R/W project that is multi-funded (dual, triple, or quadruple funded) must have correct federal-aid information on the project setup in Advantage for each federal fund source related to the project. Specifically, the project must reflect the correct participating ratio for each federal-aid fund type, or federal program code. This is to ensure that project expenditures will be accurately charged to the appropriate federal program code and maintain proportional liability as determined by programmed amounts or an executed cooperative agreement. Each federal program code carries a separate class of program fund reflecting its reimbursement rate.

District R/W sets up the initial federal-aid information on the Funding Profile of a 2/9 Phase R/W Project ID using information from the approved E-76 — essentially the initial federal funding program code and the federal project number(s) (e.g., P052(061)). HQ Budgets Capital Outlay Support Unit (COSU) will establish and modify the 2 Phase project budget in Advantage for federal project authorizations approved by FHWA, and District R/W Project Control establishes and modifies the 2 and 9 Phase Funding Profiles in Advantage.

Infrequently, a R/W project has dual funding that requires separate accountability of federal funds. For example:

- A project involves **two** different routes - one is an Interstate route, the other is a State route (e.g., I-880 and SR 237).
- A R/W project is approved with both STIP and SHOPP funds.
- A project has state-administered federal funds, such as Traffic Congestion Relief Program (TCRP) and local federal subvention funds, such as Regional Surface Transportation Program (RSTP).

© 1994-2025 California Department of Transportation. All rights reserved.

P&M must receive sufficient project information related to conditional funding requirements and limitations when a project is approved by FHWA and R/W work is identified for federal funding. This is to ensure that R/W Project ID Funding Profiles are correctly established in Advantage to maintain separate accountability for costs to be charged to each federal fund type. District R/W must be aware of the funding restrictions inherent in the different federal fund types to prevent mischarging project costs to FHWA. In addition to the above, under SB 45 programmed projects may also have multiple federal funding sources that require separate accountability. Therefore, it is important to exercise care to segregate the different federal fund types and properly account to each fund type and individual federal-aid project.

R/W should consult with OFR when clarification is needed on separate accountability of federal funds and other federal-aid funding issues.

3.05.11.00 Federal Emergency Relief (ER) Funded Projects

In situations where there are declared disasters (storms, earthquakes, fires, etc.) eligible for Federal Emergency Relief (ER) funds, the Department must follow Federal Emergency Relief Recovery Procedures to assure maximum federal reimbursement. Where the damage is significant, Caltrans will prepare a Letter of Intent, and subsequent ER Application letter, for submittal to the Federal Highway Administration (FHWA) to apply for ER funds. FHWA allocates ER funds either administratively or when a Presidential Declaration of Disaster is declared and ER funding allocations are approved.

Under the Emergency Relief Program, Emergency Opening (EO) and Permanent Restoration (PR) work are eligible for ER funds. Consult the HA-23 Statewide Program Advisor or Federal Resources Area Engineer (internal Caltrans link) for the difference between Emergency Opening and Permanent Restoration.

Emergency Opening projects approved for ER funding must be authorized for Construction (and therefore R/W) within 2 federal fiscal years after the end of the federal fiscal year in which the disaster occurs. Therefore, it is imperative that the District R/W team prioritize delivery of the R/W Certification required for the authorization of the emergency opening E-76.

© 1994-2025 California Department of Transportation. All rights reserved.

All ER projects greater than $5,000 in total are to be qualified for Federal-aid ER funding and must be developed in accordance with federal requirements. This threshold applies to both construction capital and R/W capital. The final eligibility determination for Federal-aid ER funding is determined by the FHWA on a Damage Assessment Form (DAF). Note that OFR is currently utilizing a qualifying threshold of $50,000 for R/W Capital due to the lower actual expenses on lower cost projects, where limited work is expected and typical work is limited to permits and easements.

FHWA will reimburse the Department with ER funds at a rate of 100 percent for eligible emergency opening expenditures incurred during the first 270 days of a federally declared disaster. The IIJA revised the 180 day emergency opening period to 270 days, which starts on the initial day of the disaster. Emergency opening work continuing beyond the 270-day period will be reimbursed using the normal system rates for the project.

Permanent repairs or restoration must have prior FHWA program approval and authorization through an E-76, unless done as part of the emergency repairs completed during the first 270 days of the federally declared disaster. Projects for permanent restoration work will follow the normal federal-aid process. Permanent Restoration work is reimbursed by FHWA at the normal system rate, currently 91.57 percent on Interstate routes and 88.53 percent on all other Federal Aid Highways, except Safety projects which are reimbursed at a higher 90% rate.

While OFR and Headquarters Maintenance are responsible for processing the ER projects for approval and funding with FHWA, it is still the District's responsibility to initiate the authorization request (E-76) and assure all requirements are met before beginning work. If work is begun prior to approval of the E-76, Federal ER funds will be lost. (Consult with OFR for guidelines and procedures for handling ER funded projects.)

For ER funded projects, only Emergency Opening work, or Permanent Repairs under Emergency Opening procedures, such as temporary operations, emergency repairs (including permanent repairs under emergency opening procedures, and preliminary engineering may proceed without prior Federal authorization. <u>All other work including right of way appraisals and permanent restoration must have a FMIS approved E-76 prior to proceeding.</u>

EO projects must have photographs and other documentation of the initial damaged site to substantiate emergency opening costs. Also, a Damage Assessment Form (DAF) must be prepared for each site located on Federal-aid highways. The DAFs for State highway projects must include cost estimates for all phases of work, including R/W.

© 1994-2025 California Department of Transportation. All rights reserved.

When major damage and disasters occur, Right of Way must actively participate in the Emergency Relief process to ensure that R/W work is considered and included in the DAF. The following are necessary:

Emergency Opening (EO) Projects

- Participating as part of the disaster team to perform field reviews of damage sites.
- Providing R/W cost estimates to the District Major Damage Coordinator in the District Maintenance Office for the Damage Assessment Form (DAF).
- Providing R/W cost estimates to the District Major Damage Coordinator for the E-76 (**HQ Office of Federal Resources is responsible for preparing the E-76 for EO projects, including attachment of the R/W estimates.**).
- Ensuring R/W staff charges to the proper EA/Project ID established for the EO projects.
- Delivering R/W work in a timely manner for Emergency Opening Phase.
- Upon receipt of Final Voucher Request form, confirming completion of R/W work on ER projects through a completed and approved R/W Final Voucher Questionnaire being returned to the Project Manager/ER Program Manager, who will then submit a complete Final Voucher package to Final Voucher Accounting for final vouchering of ER projects.

Permanent Restoration (PR) Projects

- Coordinating with Project Development on the PR projects
- Developing R/W estimates as in regular typical projects
- Requesting federal participation by submitting an E-76 in a timely manner (**R/W prepares and submits E-76 for all PR projects.**)

NOTE: Permanent restoration projects are not required to be listed in a Federally approved Transportation Improvement Plan unless they involve substantial functional, locational or capacity changes (23 CFR 450.326[e] [5]).

© 1994-2025 California Department of Transportation. All rights reserved.

All R/W work for permanent restoration projects must have an electronically signed E-76 prior to proceeding.

- Ensuring R/W staff charge to the proper EAs established for the PR projects
- Delivering R/W work in a timely manner for Permanent Restoration Phase
- Monitoring PR projects funded by ER funds and confirming completion of R/W work on PR projects through a completed and approved R/W Final Voucher Questionnaire being returned to the Project Manager/ER Program Manager, who will then submit a complete Final Voucher package to Final Voucher Accounting for final vouchering of PR projects

General questions regarding the ER Program, the HA-23 program, Deputy Directive DD-26 (internal Caltrans link), the Major Damage Restoration Handbook, and the Director's Order and Resolution G-11 Processes should be directed to the Headquarters Maintenance HA-23 Statewide Program Advisor. A list of approved Director's Order projects can be located on the Major Damage website (internal Caltrans link).

3.05.12.00 Federal Reimbursement

The Federal-Aid Highway Program is a reimbursement program. The Department provides the initial cash to get a project underway, then receives federal funds on a reimbursement basis for the federal share of the project cost incurred and work completed. This means Caltrans must first execute a project agreement, obligate federal funding, incur costs, and bill FHWA for reimbursement. Then it can receive payment. FHWA will pay only those expenses eligible for reimbursement, limited to the amounts shown on the executed Project Agreement, or latest modification of the Project Agreement.

In order for Accounting to bill FHWA, a project must have funding profiles that match the federal program codes in FADS. If there is a misalignment in the funding profiles with federal program code used at obligation, then funding profiles must be adjusted, and expenditures moved by submitting an expenditure adjustment request (EAR) to Accounting.

Once the project is authorized and the Federal-Aid Agreement is executed, expenditures are accumulated in Advantage and reimbursement procedures are initiated. Project expenditures are matched with the appropriate federal funds reimbursement criteria, and FHWA pays the State a pro rata share of

© 1994-2025 California Department of Transportation. All rights reserved.

eligible participating costs. See Section 3.05.12.07 for information about the Department's system for billing FHWA.

3.05.12.01 Importance of Federal Reimbursements

Over 50 percent of the Department's annual resources come from federal reimbursements. Although the amount apportioned to California from the current Federal Highway Act is part of the annual Caltrans budget for a given fiscal year, the actual amount reimbursed depends on the amount claimed in compliance with established approval and reimbursement procedures.

3.05.12.02 Maximizing Federal Reimbursement

Timeliness of accounting entries and proper coding of transactions are essential for maximizing federal reimbursement. Each employee who codes a time sheet, car tag, or any other accounting document is performing an accounting function and has a responsibility for coding those costs properly.

A key element is correct project setup in Advantage, as well as correct use of object codes. See Section 3.05.12.05 for detailed information.

3.05.12.03 Federal Project Setup in Advantage

There are two types of projects in Caltrans' financial system (Advantage) involved in the federal reimbursement process:

1. Advantage federal project identification (ID) or FF number
2. Physical project ID

When a federally participating project is authorized via E-76, the approved project's information is interfaced from FMIS to Advantage. This process creates an Advantage federal project ID which is a 10-character code with a prefix "FF," this FF number changes based on the Federal Program Code used at obligation. The authorized amount (obligation) and other information are passed into Advantage to complete the federal project ID record. The federal project ID sets the parameters for billing FHWA.

The physical project ID is a 10-character code used to program, budget and record expenditures for a Caltrans capital project. It identifies the funding source, i.e., fund, appropriation, and program code, of labor and/or operating costs charged to a project. Physical project IDs are created in various areas within Caltrans. For example, District Project Control creates the physical project ID for most multiphase projects and HQ Office of Engineer creates the state administered Phase 4 construction projects. If a project's

© 1994-2025 California Department of Transportation. All rights reserved.

funding profile includes federal funds, the relevant Advantage federal project ID is connected to the physical project ID's federal funding line. Once connected, the Advantage federal project ID will be listed on the internal buyer line section of the funding profile.

The physical project ID cannot be setup with a federal funding line without a valid federal project, or FF number, to reference. Therefore, the federal project needs to be established first in Advantage (interface from FMIS) before it can be associated with the physical project. This prevents expenditures from posting to a federal funding line prior to the federal project authorization date.

3.05.12.04 Reimbursable R/W Costs

FHWA approves and limits the project expenditures it reimburses to those costs the Department has actually incurred (i.e., cash disbursed, not dollars encumbered).

Federal funds may participate in R/W costs recorded in Advantage in two categories:

- **Capital Outlay** – costs necessary to acquire and clear rights of way for project construction. All capital outlay costs must be charged to a specific project. To meet FHWA requirements, capital costs must be recorded in sufficient detail to determine eligibility. To achieve this, the department uses Object Codes and Reporting codes to identify the specific financial transaction and federal-aid eligibility. This includes transactions for land, improvements, damages, utility relocation, demolition, clearance, relocation assistance, condemnation deposits, and income relating to sale of improvements and excess lands.

- **Incidental (Support)** – personnel and operating expenses supporting R/W functions that produce the capital outlay payments. FHWA uses the term "incidental cost;" the Department uses "support cost."

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.12.05 Definitions

Direct eligible costs are those expenditures incurred after federal authorization on a project is obtained. Generally, eligible acquisition and related costs are based on a parcel-by-parcel authorization by FHWA. Federal participation in real property costs is limited to the costs of property incorporated into the final project and the associated direct costs of acquisition, unless provided otherwise.

23 CFR 710.203 (b)(1) expands federal reimbursement for right-of-way acquisition costs beyond the current limits of "generally compensable" costs. Federal aid eligibility now extends to items usually covered by state law and items formerly determined not to be compensable under earlier CFR guidelines. See above-referenced section of 23 CFR for details on federal participation in direct costs.

District R/W is responsible for determining federal eligibility of R/W costs.

Ineligible costs are those expenditures that are not eligible for reimbursement (e.g., costs that would normally be eligible, but are incurred prior to FHWA's approval of the E-76). FHWA does not participate in any costs (except early acquisition soft match) that are incurred prior to the authorization of a project.

As a result of TEA-21 and the newly adopted Federal regulations, FHWA no longer limits federal reimbursements on formerly excluded costs, such as goodwill and defendant's costs in connection with condemnation action.

The Department may also decide not to obtain federal reimbursements on certain eligible project costs. For example, since 1991 R/W had provided state funds to cover the costs of title reports and escrow fees and had charged these as ineligible project costs. However, in January 2019, the Federal Aid Funding Guidelines were revised and now allow federal participation for title report and escrow fee costs. Additionally, in 2000, Caltrans made a policy decision not to seek federal reimbursement for property management costs (see Section 11.01.09.00).

See Section 8.50.04.00, Segregation of Acquisition Costs for Federal Reimbursement, and Section 8.50.04.01, Federal Reimbursement Provisions.

© 1994-2025 California Department of Transportation. All rights reserved.

Participation Ratio (Percentage) refers to that portion of the project costs authorized for federal reimbursement compared to the total cost of the entire project. Projects can include work outside the limits of the Federal Aid Highway System (not participated in by FHWA) or elements of a project's costs that are non-participating, thereby creating a non-participating portion. Furthermore, if a project or phase of work qualifies for federal funding but is not included in the federal project agreement, the costs will not be participating or reimbursable.

Reimbursement Percentage is the portion of the participating eligible costs that will be reimbursed. Each federal program has a reimbursement percentage that is established by federal regulations. The reimbursement percentage designates what the state's matching share will be for project costs.

In summary, eligible costs multiplied by the participating ratio of the specific project and multiplied by the reimbursement percentage for the federal program pertaining to the project equals the amount of expenditures that will be federally reimbursed. Note the reimbursement rate percentage on a physical project's regular federal funding line in Advantage is actually the funding split percentage assigned to the federal funding source based on the funding plan of a specific project. It does not always represent the percentage of the federal share authorized by FHWA. The approved reimbursement percentage is recorded on the sub account field in the Advantage federal project ID, for informational purposes only.

The following is an example of Advantage calculations of federal reimbursement:

Eligible Cost		Participation Ratio		Reimbursed Rate		Reimbursed Federal Funds
$150	X	100%	X	91.57	=	$137.36
Matching State Funds						$12.64
Total Eligible						$150.00

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.12.06 Federal-Aid Eligibility Coding

The coding of expenditures on accounting system entry documents indicates whether or not costs are treated as eligible expenditures. The Project/Phase setup in Advantage requires a Funding Profile that establishes federal-aid eligibility, and charges will post against the appropriate Funding Profile, depending on eligibility of the expense. The Coding Manual, Section 5, Object Codes, and Section 6, Activity Codes, lists the allowable codes for labor and other expenditures.

Generally, the eligibility of R/W costs for federal participation relates directly to whether or not specific parcels have FHWA approval on the federal project agreement. Utility relocation costs, however, are only eligible for federal participation if FHWA approves and if federal rules and regulations that dictate federal-aid eligibility on R/W project costs are met.

District P&M should be consulted when it is necessary to determine whether or not certain R/W costs are approved for federal participation.

See Exhibit 03-EX-08 for object codes commonly used by R/W.

3.05.12.07 Supporting Claims for Reimbursement

Any claims made with FHWA for reimbursement shall be supported by various types of documentation on file, including a R/W map or plan showing the rights of way authorized and being acquired, including parcel identification numbers, area to acquire, property lines of acquired area, and any other pertinent data affecting the cost of right of way (e.g., structures, improvements, and fences). Right of Way Contracts for acquired property rights shall support acquisition costs claimed for reimbursement, and include parcel number, cost of parcel, and cost of excess land, if any, acquired from the same ownership. For Utility relocations, utility agreements must be on file. Incidental, (or support) costs and all other R/W costs, including credits and cost of construction performed to mitigate damages on a parcel basis (if claimed as a R/W item) shall be supported by project expenditure reports that are coded to reflect federal eligibility.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.12.08 Current Bill

As a project incurs costs, federally eligible expenditures post to the physical project ID's federal funding line. During the Advantage reimbursement billing cycle (twice a week), federal project expenditures are identified and "internally bill" the Advantage federal project ID associated with the federal funding line. If the federal project has sufficient obligation balance, the expenditures are considered billable. Otherwise, if the expenditures exceed the federal project's obligation balance, the expenditures are considered unbillable and will remain as such until the condition is resolved (e.g.: additional obligation authority is approved for the project). Billable expenditures are summarized, and a federal bill is generated.

The final step in the Advantage reimbursement processes generates a billing file transmitted electronically to FHWA's FMIS. Next day payment for an approved bill is usually made to the State. For next day payment to occur, Accounting's Federal Reimbursement Section (FRS) reviews and approves the bill in FMIS by 8:00 am. An email is sent to FHWA that a bill file is awaiting their review and approval. FHWA needs to approve the bill file by 8:30 am to receive next day pay. If FHWA approval is not completed by 8:30 am, the payment will be sent the following day (excluding holidays and weekends). Also, when the bill file is created, the Receivable and Cash Receipt documents are generated in Advantage. Office of Financial Accounting and Analysis utilize these documents to clear FHWA's electronic fund transfer to the State Treasury and to process a plan of financial adjustment with the State Controller's Office (SCO).

3.05.12.09 Accruals – Unbilled Federal Share

Federal-aid accruals are the reimbursable expenditures incurred by the Department that FHWA has not reimbursed. These unbilled federal expenditures are for advance construction projects, in excess of project agreement amounts, and for ER projects that do not have DAFs or federal projects identified. Accounting's Quarterly Federal Accruals Report (internal Caltrans link) is produced and provided to OFR and Division of Local Assistance.

FRS provides OFR and R/W with quarterly reports on all federal-aid projects with accruals. Accounting, Budgets, and R/W use the reports to monitor unbilled federal funds and to clear accruals to the extent of available appropriated federal funds.

© 1994-2025 California Department of Transportation. All rights reserved.

As part of the process to clear accruals, OFR provides monthly Unbilled reports and requests R/W to provide justifications and project cost information necessary for preparing and submitting a E-76 Modification to FHWA for additional federal funds. HQ R/W assists in resolving accrual issues and is the liaison with OFR and District R/W.

3.05.12.10 Unbilled Expenditures – Cost Overruns

After a federal aid project has been authorized and expenditures accumulate, OFR will do AC conversions to partially obligate federal funds so expenditures can be billed to FHWA. However, after all AC funds have been converted to obligated Federal funds and R/W project costs exceed the federal funds in the Federal Project agreement, those costs go into Unbillable status and additional federal funds must be requested in order to bill FHWA for those costs. If there is enough budget capacity (programming) remaining in the project to cover the cost overruns, an E-76 modification must be submitted to increase the federal funds. If there is insufficient budget capacity remaining, an approved Documentation PCR will be required as supporting documentation in the E-76 modification request. An updated R/W Data Sheet, Parcel by Parcel Estimate and Utility Estimate will also be required as supporting documentation in the request.

3.05.12.11 Inactive Projects

A federal project that has not had any expenditures charged against federal funds in 12 or more months is considered "Inactive" and requires action. Possible actions to take are:

- Process an expenditure to support or capital to generate a billing to FHWA
- Decrease obligation (de-obligation) if no further expenditures are pending
- Provide justification to OFR when inactivity is beyond Caltrans' control, such as:
    - Litigation delays
    - Unforeseen Utility relocations
    - Catastrophic events that delay project
    - Unforeseen Environmental concerns
    - Delays by other external agencies (utility companies)

OFR is responsible for creating a quarterly Inactive report (internal Caltrans link) tracking all inactive projects that require an action to keep the inactive rate below 2%.

© 1994-2025 California Department of Transportation. All rights reserved.

FHWA has the authority to unilaterally de-obligate remaining federal funds for inactive projects.

3.05.13.00 FHWA Citations – Federal Ineligibility Notice

3.05.13.01 General

Authorized by 23 and 31 CFR, FHWA has implemented the Financial Management Program for effective management of federal-aid funds and control of ineligible costs for federal participation.

23 CFR contains criteria relating to the eligibility of costs for reimbursement of Federal-Aid Highway funds. Pursuant to it, FHWA reviews and audits costs charged to federally reimbursable projects for eligibility. When certain costs are determined to be ineligible for reimbursement, FHWA issues a citation to the Department in the form of a Federal Ineligibility Notice (FIN) that identifies those costs.

3.05.13.02 Purpose of FIN

FIN Form PR-1367 is used to cite final or progress voucher claims for federal reimbursement or to require additional supporting information for such claims. FHWA prepares and submits a PR-1367 to the Department when deficiencies are disclosed that require a deduction from federal-aid participating costs or place such costs in an unbillable status.

3.05.13.03 FHWA Issuance of FIN

FHWA may issue FINs during three major activities:

- **Operational Audit** – FHWA may discover improper charges on the sample projects under audit.
- **FHWA Functional or Technical Review** – the reviewer may find items that have been improperly billed.
- **Voucher Fiscal Analysis** – FHWA may question certain cost items. The issues raised must be resolved before a revised final voucher can be processed and the project closed.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.13.04 Required Adjustments to Current Bill

When a FIN is issued, FHWA requires the Department to make an adjustment in the next billing cycle to move the questioned cost from "Eligible" to "Citation Suspense" category. This is done in accordance with FHWA Order H 2500.1A that all costs documented on a FIN shall be credited at the EA level from the next state current billing, but no later than 30 days from date of the FIN.

FRS does all initial crediting for federal reimbursement when the FIN is received. Credit must be given whether or not Caltrans concurs with the citation. Any differences of opinion on a citation may be negotiated, but should be resolved within nine months.

3.05.13.05 Process for Resolving FIN

The overall process for resolving FINs is shown on the following page.

3.05.13.06 Final Adjustments to Projects

FRS makes the final federal fund adjustments to projects once the FIN is resolved. R/W Accounting coordinates this effort with R/W to ensure the correction is timely and the appropriate amounts are adjusted.

3.05.14.00 Federal Funds Management

3.05.14.01 General

Federal funds management involves managing federal-aid projects from authorization to reimbursement and is the key to achieving better control over the use of federal funds among all federal formula programs. Project funds management assures the reprogramming of federal funds through the timely release of excess unexpended funds.

The Department has implemented continuous project funds management in response to audit findings by FHWA and the Office of Inspector General. The Department must manage its federal-aid funds with emphasis on the following:

- Continuously monitoring project expenditures against obligational authority.
- Applying accelerated procedures for closing completed projects.

© 1994-2025 California Department of Transportation. All rights reserved.

- Promptly withdrawing federal-aid projects that will not be completed.
- Releasing funds that exceed project needs in a timely manner.

PROCESS FOR RESOLVING FIN

Step	Responsible Party	Action
1	Federal Reimbursement Section	Receives all FINs issued.
2	Federal Reimbursement Section	Distributes copy of FIN to HQ R/W Federal Aid Liaison for the R/W federal-aid project at issue.
3	HQ R/W Federal Aid Liaison	Forwards FIN to the appropriate District P&M Chief for review and action.
4	District R/W P&M Chief	Investigates the allegation, prepares a draft response to FHWA, and recommends final resolution of FIN; forwards draft response and recommendations to HQ R/W Federal Aid Liaison.
5	HQ R/W Federal Aid Liaison	Prepares final response to FHWA and submits to Federal Reimbursement Section and R/W Accounting to ensure that the FIN is resolved and cleared from FHWA's and Accounting's tracking systems.

District R/W, HQ R/W, OFR, OLP, Federal Reimbursements Accounting, R/W Accounting, and Local Program Accounting all share in managing federal funds for federal-aid R/W projects.

HQ R/W has oversight responsibilities for project funds management and is the liaison with District R/W, OFR, and R/W Accounting.

District R/W administers federal-aid projects and manages federal funds. This primarily involves, but is not limited to:

- Obtaining FHWA authorization promptly.
- Monitoring project expenditures against federal obligations.
- Taking timely actions to release unexpended funds or cancel federal obligations.

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.14.02 Monitoring Federal Aid Project Expenditures

At a minimum the district takes the following actions to monitor all activities and project costs:

- Compares approved amounts with actual expenditures incurred.
- Monitors cost overruns to request increased funds.
- Monitors underruns to release or deobligate excess unexpended funds.
- Makes revised project cost estimates as required.

For additional information on project cost overruns, see Sections 3.05.12.09 and 3.05.12.10.

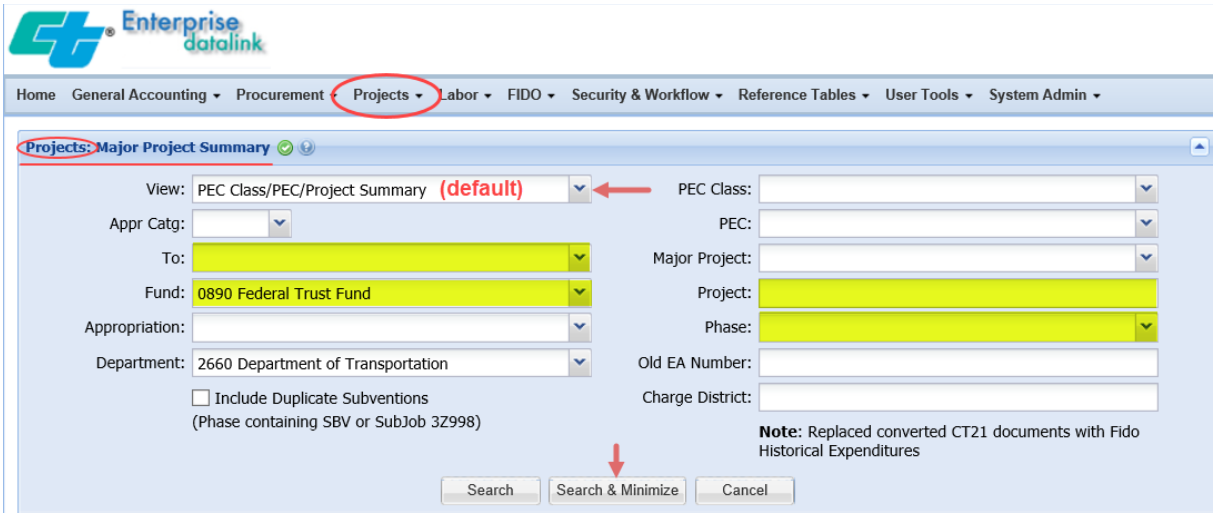
For additional information on excess federal funds, see Sections 3.05.14.07 and 3.05.14.08.

3.05.14.03 Project Expenditure Report, Federal Aid Report

In managing federal-aid projects, the Department must properly track project costs by EAs. The Datalink Federal Aid Report is a standardized accounting report that provides the most current information available in Advantage related to federal projects. It is important to note that the Datalink Federal Aid report only records transactions posted since the implementation of Advantage in July 2010; for expenditures prior to Advantage, use the Datalink Major Project Summary Report, which includes converted expenditures that had been posted in the prior financial system, TRAMS.

The report can be obtained by accessing **CT Pass**, clicking on **Enterprise Datalink**, then click the drop-down menu for **Projects**, then select **Major Project Summary**. The report has different views that can be selected by clicking the drop-down menu for View; the default view is PEC Class/PEC/Project Summary. The "To" field indicates the point up to which you want to extract data for the project; Datalink automatically defaults to the most current fiscal period at time of extraction or gives you the option to go back as far as July 1, 1998.

© 1994-2025 California Department of Transportation. All rights reserved.



3.05.14.04 Estimating Remaining Project Costs

Prior to completion of a project, the district may need to provide OFR with a reasonable estimate of remaining costs. This may occur when project expenditures exceed the current agreement amount, when the Project End Date (PED) is nearing, or when there are anticipated excess unexpended funds to deobligate.

In developing remaining cost estimates, the district needs to:

- Review outstanding encumbrances for all R/W EAs related to the federal project. (refer to the monthly Statewide R/W Capital Encumbrance Report from HQ R/W)
- Estimate project support costs for R/W activities left to be performed (e.g., acquisition, RAP, utilities, R/W Engineering).
- Estimate outstanding capital outlay costs for each type of expenditure (e.g., title and escrow, acquisition, utility relocation, demolition and clearance, and RAP).

© 1994-2025 California Department of Transportation. All rights reserved.

3.05.14.05 Accelerated Closing Procedures

R/W monitors federal-aid projects for timely progression through the final voucher stage to prevent unnecessary delays in closing out projects. To advance projects for final vouchering, district R/W should periodically review R/W projects for completion of the related construction projects. Using PRSM to identify projects where construction is completed, district R/W confirms completion of R/W work and verifies that all R/W costs have been paid and no R/W transactions remain outstanding. If a project is completed, R/W notifies the project manager and requests a Final Voucher Request form be submitted to R/W; R/W will then complete the R/W Final Voucher Questionnaire form and return it to the project manager, who will then submit the Final Voucher request package to the Final Voucher section in Accounting to begin the final voucher process with FHWA.

It is important to identify if the R/W project has a federal project number that should also be final vouchered on the Final Voucher Request form. It is possible to project control to Final Voucher and close the state project portion and leave the federal project active in FADS.

See Form FA-2658 (internal Caltrans link) for the Final Voucher Request Form and Exhibit 03-EX-09 (internal Caltrans link) for the R/W Final Voucher Questionnaire.

3.05.14.06 Cancellation of Obligational Authority

When a project has been deleted through the appropriate Departmental process, district R/W prepares a modification to the E-76 federal project agreement requesting cancellation of federal obligations and deobligation of federal funds, if funds are under agreement. OFR reviews and approves the request and forwards to FHWA.

3.05.14.07 Release (Deobligation) of Excess Funds

Unused federal funds must be released (deobligated) promptly and made available for reprogramming on other highway projects or for other FHWA programs.

The FRS periodically provides district R/W with a Project Status Report of inactive projects with significant fund balances to reassess funding needs. District R/W reviews projects to determine whether they will become active or need to be canceled and the funds deobligated. The district advises HQ R/W on project status. If appropriate, the district prepares and submits an E-76

© 1994-2025 California Department of Transportation. All rights reserved.

modification to OFR to request the release of excess unexpended funds. OFR reviews and approves the request and forwards to FHWA to reduce federal funding on a project.

District R/W should take the initiative at any time prior to completion of a project to release unexpended obligations and identify excess federal funds. (It is not necessary to wait to review the Project Status Report before taking actions to release federal funds.)

3.05.15.00 Close R/W Phases

As soon as P&M determines that all R/W costs on a project are recorded in Advantage, it must close all R/W phases for the project. This prevents inappropriate charges from being recorded against the project and allows Accounting's Final Voucher section to begin final vouchering activities.

See Section 3.02.06.00, Closing R/W Phase 2/9.

3.05.16.00 Final Vouchering – Project Close Out

The last phase of a federal-aid project is final vouchering and closing of the project.

District P&M should periodically review the RCFP screen to identify potentially completed R/W federal-aid projects (based on milestone M600-Construction Contract Acceptance) and verify with all functional units that all R/W work is complete, and all costs are recorded in Advantage. Upon verification of completion of all support activities and capital costs, District P&M completes a final reconciliation of the federal project (State projects only, not Local) and submits a final E-76 modification to modify the federal project agreement to reconcile with the final project costs. District P&M then notifies the project manager that the R/W project is ready for final voucher. The project manager should then submit a Final Voucher Request form to District P&M or to the designated District R/W Project Closeout Coordinator. The R/W Final Voucher Questionnaire form is then completed and returned to the Project Manager, who will then forward the Final Voucher Request package to the Final Voucher section in Accounting with a copy to HQ R/W.

The Final Voucher section audits project charges to ensure FHWA is billed for all eligible expenses. They then prepare a final voucher representing the final claim for a single, completed, and FHWA-accepted project and submit it to FHWA.

© 1994-2025 California Department of Transportation. All rights reserved.

The final claim for the federal share of project costs is made on form FHWA-1447. The final voucher is a segregated summary of the project's total costs and a determination of the final federal share. Accounting uses expenditures in Advantage as the basis for the final voucher. (A summary of project costs, classified by work type and other supporting documents, shall accompany the final voucher as a means of verifying costs.)

3.05.16.01 Final R/W Maps and Parcel List

Prior to 1994, R/W Engineering prepared a final R/W map that delineated the "as-built lines" and a Parcel List, FA 1567, to support the final vouchering of a completed federal-aid project. Under streamlined procedures approved by FHWA, R/W no longer prepares and forwards the final R/W maps to FHWA. All information required for completed federal-aid projects is recorded on R/W record maps and other maps. R/W Engineering must maintain these maps and make them available for FHWA's review upon request.

© 1994-2025 California Department of Transportation. All rights reserved.

3.06.00.00 – MONITORING PROCESS

3.06.01.00 General

R/W Planning & Management (P&M) is responsible for monitoring R/W's capital budget and ensuring approved capital plans are correctly implemented. It is especially important to verify that transactions on projects with multiple funding sources, such as federal, state and/or local funds, are accurately recorded. Prior to 1997, the Department used the "Closing the Loop" process to check payment coding and funding splits. In 1997, Accounting began providing weekly and monthly expenditure reports to R/W P&M staff to ensure all R/W transactions were accurately recorded.

With the implementation of AMS Advantage in 2010, R/W Accounting discontinued providing monitoring reports as report data is now available to all Department staff through InfoAdvantage and Datalink, the Department's reporting systems for all financial transactions in Advantage. As a result, HQ P&M established a revised monitoring process and created the Weekly Monitoring Report. This report identifies all financial transactions for R/W capital processed during the fiscal year, which includes cost breakdowns by fund type.

3.06.02.00 Objective

The Monitoring Process was implemented to streamline the "Closing the Loop" process while continuing to assure that R/W transaction coding and funding splits on federal projects are recorded accurately and accounted timely. This allows the Department to receive federal reimbursements based on current bills generated by Advantage.

The Monitoring Process facilitates identification of federal participation at the project and the parcel levels; assists in segregating R/W costs in eligible and ineligible categories; and identifies the type of costs involved. The process uses standard procedures that establish control for appropriate and proper accounting of revenues and expenditures on federally aided projects. It requires that adequate documentation be available for review by federal and state auditors.

© 1994-2025 California Department of Transportation. All rights reserved.

3.06.03.00 Roles and Responsibilities

A successful monitoring process requires a close working relationship among the various R/W functional units, P&M and R/W Accounting. R/W has primary responsibility, authority, and accountability for parcel level detail, by establishing individual Reporting codes in Advantage that relate to each individual parcel on a capital project. P&M is responsible for ensuring that R/W capital transactions clearly identify the parcel in the financial coding on the payment or encumbrance transaction document. R/W Accounting has primary responsibility for ensuring that R/W follows statues and policies related to payments, and that R/W's parcel detail coding and funding splits are entered accurately in Advantage.

MONITORING PROCESS RESPONSIBILITIES

District R/W Agent	The R/W Agent must initiate transactions accurately and timely. The Agent obtains the proper financial coding and fund certification from P&M to record the expenditures accurately on the appropriate Accounting documents.
P&M	P&M has primary responsibility for reviewing all Phase 9 transactions and Weekly Monitoring Reports. Additionally, P&M has responsibility for ensuring the documents are coded properly with correct funding splits.
R/W Accounting	R/W Accounting performs all accounting activities (including providing independent analysis of financial transactions) in accordance with prescribed accounting and fiscal procedures. R/W Accounting also provides accounting and coding instructions and procedures to assist P&M in monitoring transactions; ensures appropriate internal checks and balances are applied to fiscal data; and maintains the integrity of the accounting system.

3.06.04.00 Scope

The Department is accountable for all expenditure billings and credits applied to projects. This encompasses capital outlay and support expenditures; incomes from rental properties and sales of excess lands, improvements, and equipment; and adjustments resulting from FHWA citations.

© 1994-2025 California Department of Transportation. All rights reserved.

3.06.05.00 Federal Eligibility

R/W is responsible for determining federal eligibility of transactions and relaying this information to R/W Accounting on the appropriate accounting documents.

For additional information, refer to:

- Section 3.05.12.05, Definitions.
- Section 3.05.12.06, Federal-Aid Eligibility Code.

3.06.06.00 Procedures

The procedures on the following pages establish a formalized tracking process to assure timely and uniform follow-up of R/W expenditure transactions and compliance with federal requirements. Where appropriate, e-signatures can be used, and routing documents electronically is acceptable.

MONITORING PROCEDURES

R/W Agent	The R/W Agent initiates functional transactions in a timely manner and identifies federal participation at the project and parcel levels with P&M's assistance. The Agent must segregate R/W costs into eligible and ineligible categories and classify expenditures to code them properly for Advantage. The Agent must accurately prepare and sign the Federal Participation Memorandum or a similar form to reflect the appropriate R/W transactions.
Functional Supervisor	The functional supervisor reviews the payment document and all necessary support documentation to verify appropriateness and accuracy of the Agent's work. The supervisor approves and signs the RW Accounting forms and returns the transaction package to the Agent (or forwards to P&M, varies by District).
R/W Agent	The R/W Agent or his/her functional supervisor forwards the transaction package (including support data) to P&M for encumbrances or payments.

© 1994-2025 California Department of Transportation. All rights reserved.

MONITORING PROCEDURES (Continued)

P&M	The P&M reviewer should request the complete file with all supporting material required to verify the functional transactions R/W Accounting will process. The reviewer provides all financial coding to the project and parcel level, and federal-aid related data, including the proposed segregation of charges, to ensure an appropriate distribution between eligible and ineligible categories. The P&M reviewer completes the Fund Certification and signs the R/W Accounting form(s), places a copy of the transaction request form in the pending file, and forwards the transactions package to R/W Accounting.
R/W Accounting	R/W Accounting reviews and verifies coding accuracy on all documents and ensures that each transaction package is complete. Accounting then enters the data into Advantage.
HQ P&M	HQ P&M forwards the Weekly Monitoring Report to Districts each Tuesday for district staff to monitor R/W capital financial transactions.
P&M	Upon receipt of the Weekly Monitoring Report from HQ P&M, the P&M reviewer confirms coding and funding splits on all capital outlay payment/encumbrance transactions. If there are no variances, P&M notates the Claim Schedule number on the pending payment document (i.e. Federal Participation Memo), files a copy in the P&M project file and forwards a copy to the appropriate function, which reviews coding and funding splits one last time (safety net) and files it in the parcel folder. If there is a variance, P&M advises R/W Accounting either by phone or email and submits an Expenditure Adjustment Request (EAR) form to R/W Accounting to clear the variance.

© 1994-2025 California Department of Transportation. All rights reserved.

R/W Accounting	R/W Accounting makes adjustments in Advantage within 10 working days. The adjustments are reflected on the Weekly Monitoring Report.
P&M	P&M reviews the Weekly Monitoring Report for the next period to confirm that adjustments were made.

3.06.07.00 Document Log

The Monitoring Process requires a document log to monitor documents as they progress between R/W and R/W Accounting. This log may be in the form of a spreadsheet, R/W Ledger or database that tracks all financial activity on projects. Since the majority of documents flow from the R/W function through P&M, P&M should maintain the document log. Other functions, such as Excess Land, may also maintain its own document tracking log for their function's documents. The document log includes the following information:

- Parcel Number
- Expenditure Authorization/Project ID
- Reporting Code
- Date document received from functional unit (if appropriate)
- Date document forwarded to R/W Accounting
- Date document returned from R/W Accounting
- Date document returned to functional unit (if appropriate)

It is recommended that the document log be set up by type of R/W transaction, such as:

- Acquisition
- Condemnation Deposit
- RAP
- Utility Relocation
- Demolition and Clearance
- Property Management
- Sales of Improvement/Equipment
- Excess Land Acquisition
- Sales of Excess Land

© 1994-2025 California Department of Transportation. All rights reserved.

3.06.07.01 Expenditure Document Retention File

All capital outlay transactions for phase 9 are processed through P&M. P&M maintains a copy of the transaction document in a pending file. When HQ P&M electronically transmits the Weekly Monitoring Report, District P&M compares the two documents for accuracy and completeness.

- **No Variances** – note the Claim Schedule number on the payment document and R/W Ledger, and file in the P&M project file.
- **Variances** – follow procedures in Section 3.06.08.01.

3.06.07.02 R/W Forms

Before R/W Accounting can process functional transaction requests, R/W must submit appropriate functional documents. A complete listing of the required documents for each functional transaction can be obtained from the internal District Guidelines for Complete Payment Packages (internal Caltrans link).

3.06.08.00 Weekly Monitoring Report

The Weekly Monitoring Report is electronically forwarded to each District P&M Office every Tuesday. If the report contains a variance, it is reported to the district RW Accounting liaison. An adjustment is made within 10 working days. The adjustment appears on the reports issued during the next two weekly cycles. The first line entry records the reversal of the variance and should be shown as a credit. The second line entry is the adjustment.

The Claim Schedule number is noted on the pending file document and is placed in the parcel file.

FHWA has approved replacing the Closing the Loop and prior weekly transaction report with the current electronically transmitted Weekly Monitoring Report.

3.06.08.01 Variance Resolution

The need to resolve variances arises in both R/W Accounting and R/W.

When R/W Accounting reviews R/W transaction documents, questions may ensue about federal participation and eligibility or proper coding. R/W Accounting shall contact the appropriate R/W function to clarify and resolve

© 1994-2025 California Department of Transportation. All rights reserved.

any item in question. Accepted policy is that R/W Accounting will not make any coding changes to R/W transactions without R/W's approval.

If R/W Accounting is not certain about whom to call, their contact is P&M. P&M will direct them to the correct unit/person and will follow up to ensure the issue is resolved.

If District P&M discovers a variance upon review of the Weekly Monitoring Report issued by HQ P&M, P&M investigates to determine if an accounting adjustment is needed, and then contacts the appropriate RW Accounting liaison regarding the variance to be adjusted.

Variances on the Weekly Monitoring Reports are to be reported immediately to the District's R/W Accounting liaison with the Expenditure Adjustment Request form to indicate the incorrect coding posted and the correct coding to make the accounting adjustment. District P&M should notify HQ P&M of the corrective action and make notes in the document log or Ledger.

If adjustments are not made in a reasonable time or the R/W Accounting liaison is not responsive, R/W can contact the R/W Accounting Office Chief.

3.06.09.00 Follow-Up Action

Inherent in maintenance of document logs and ledger files is the requirement to follow up with Accounting.

Accounting has committed to the following:

R/W Accounting: Processes all types of payments and Expenditure Adjustment Requests (EAR) for Phase 9.

Most payments are paid through the direct payment process in accordance with the Prompt Payment Act. However, RAP, Permit Fee, and Special Requests (e.g. condemnation judgment and/or other urgent time-sensitive payments) are paid through an expedite process as follows:

- RAP payments are processed within three working days through the State Controller's Office (SCO) using an Expedite "Next Day Release" ($50 fee). Expedite fees are charged against Accounting's overhead account.
- Permit Fee payments are processed within three working days through the SCO using an Expedite "Second Day Release" ($25 fee). Expedite fees are charged against Accounting's overhead account.

© 1994-2025 California Department of Transportation. All rights reserved.

- Special Request payments are prioritized as deemed appropriate by R/W Accounting and processed through the SCO using an Expedite Format per the instructions on the condemnation/acquisition invoice. Expedite fees are charged against the District's overhead account.

Expenditure Adjustment Requests are processed within 10 working days when the project and phase are set-up properly.

Cashiering Unit: Processes the R/W condemnation deposits.

Cashiering prepares a cover memo (FA 1621) and forwards, along with the RW 09-19 request (internal Caltrans link), to the SCO. The SCO then prepares the Notice of Transfer of Funds (CA13), certifying that the transfer has been made as requested, and forwards it to the State Treasurer. This process takes several working days and cannot be expedited. The State Treasurer's Office (STO) forwards the documentation to Caltrans Cashiering for the department's records.

If the time frames listed above are exceeded without explanation, district P&M initiates follow-up action to request payments be made, or transactions be posted or adjusted.

© 1994-2025 California Department of Transportation. All rights reserved.

3.07.00.00 – COOPERATIVE AGREEMENTS WITH R/W INVOLVEMENT

In delivering projects on the State Highway System, the Department may be requested to perform R/W work financed with Local Agency Funds (e.g., Tax Measure, Property Tax, Developer Fees, Local Assistance federal subvention). To the extent that Departmental policy and budget authority allows, the State and Local Agencies may enter into cooperative agreements (co-op) for the R/W to be performed by State personnel.

The following procedures should be followed to ensure that cooperative agreements for reimbursed R/W work are properly developed and managed. Depending upon R/W's organizational structure in the region or district, these steps may be performed by various R/W functions including Planning & Management (P&M), Local Programs, the R/W Project Coordinator, or a combination of the three.

- Upon conception of a cooperative agreement, the R/W Project Coordinator works with the Project Manager to identify the type of R/W work to be covered by the agreement. The Project Manager should ensure that reimbursable work to be done is consistent with departmental policy.
- At the earliest stage of the project, the R/W Project Coordinator verifies with P&M that the District has sufficient reimbursement budget authority for the proposed reimbursed R/W work.
- Before negotiating an agreement with the other party or parties, the Project Manager and R/W Project Coordinator must verify that conceptual approval exists for doing the work cooperatively and that adequate funding is available.
- R/W develops resource information (R/W capital and support estimates) needed for the agreement. Also, R/W ensures adequate budget estimates are computed for R/W Support Costs that include both **direct** (the loaded rate for labor costs) and **indirect** costs.

NOTE: The indirect is also known as **Indirect Cost Rate Proposal (ICRP)** rate for reimbursed work. It is a combined rate consisting of Functional and Administrative rates for each of the various programs in the Department. (The ICRP for Right of Way historically has been quite significant, that is, as high as 87 percent.)

© 1994-2025 California Department of Transportation. All rights reserved.

The ICRP rate in effect at the time the expense was incurred is applied to the direct costs and is billed out to the Local Agency for the reimbursed work. The Accounting Division calculates and revises the ICRP rate for departmental programs annually.

- The R/W Project Coordinator forwards sufficient R/W information to the Project Manager for the writing of the project cooperative agreement.
- The R/W Project Coordinator and other appropriate functions review the draft cooperative agreement for all aspects of the R/W involvement and recommend approval to the R/W Manager or designee.
- The R/W Project Coordinator ensures that R/W activities do not begin prior to having a formal executed agreement.
- Upon execution of the cooperative agreement, R/W P&M establishes the R/W Phase(s) in Advantage, establishing the funding structure and budget for the reimbursed Project ID with all pertinent data (e.g., contributor number, dollar estimates for funding fiscal year), for recording and controlling reimbursed expenditures.
- R/W P&M provides charging instructions to staff for reimbursed work to be performed under the agreement.
- R/W P&M tracks and monitors expenditures by fund source. Also, R/W P&M and/or Accounting provide information to the R/W Project Coordinator on reimbursed expenditures.
- The R/W Project Coordinator monitors and manages the co-op to ensure that work is performed and reimbursed costs are within the limits of the agreement.
- The R/W Project Coordinator makes request to the Project Manager for an amendment to the cooperative agreement prior to exceeding funding limits.

See Caltrans Cooperative Agreement Handbook (internal Caltrans link) for detailed information on cooperative projects and reimbursed work. Please also refer to Right of Way Manual Chapter 17, Local Programs.

3.08.00.00 – PREREQUISITES FOR RIGHT OF WAY ACTIVITIES

3.08.01.00 Preliminary Right of Way (R/W) Activities – Support

Preliminary R/W activities are defined as those R/W activities that occur after the project is programmed, but prior to environmental clearance. Staff time for these activities are typically charged as R/W support to phase 2. These activities include:

1. Ordering Title Reports.
2. Preparing Base Maps.
3. Preparing Appraisal Maps.
4. Conducting project-wide comparable sales searches once a preferred alternative is internally selected.
5. Assigning appraisers to specific parcels, contacting the property owners to commence appraisal activity, and completing the appraisal.

Unless the prerequisites outlined below are met, these activities shall be avoided in all cases unless prior Headquarters R/W approval has been secured in writing in accordance with the instructions found below.

3.08.01.01 Preliminary Right of Way (R/W) Activities – Capital

Under CTC Resolution G-19-01, the following R/W capital commitments can be made prior to environmental clearance:

1. Permits to Enter
2. Environmental permit fees
3. Positive location of utilities
4. Agreements for railroad coordination
5. Preliminary title fees

Requests to use phase 9 for commitments not listed above must be discussed with HQ P&M. Phase 9 commitments made prior to environmental clearance require sufficient R/W capital programming unless the project is on the approved long-lead list or funds have only been secured through project approval. If a project does not qualify under one of those exception, District

© 1994-2025 California Department of Transportation. All rights reserved.

Project Management staff must process a PCR prior to R/W capital funds being committed.

CTC Resolution G-19-01 limits the amount of R/W capital commitments that can be made prior to environmental clearance to 5% of the total R/W annual allocation requested for the year. HQ P&M monitors these commitments and reports to the CTC quarterly.

3.08.02.00 Prerequisites for Commencement of Preliminary Right of Way Activities

The prerequisites for initiating preliminary R/W activities are outlined as follows:

(These requirements do not apply to hardship and protection parcels or parcels subject to Acquisition Reference File 99-1 Regular R/W Activities prior to Environmental Clearance (non-STIP), or Acquisition Reference File 02-1 R/W Acquisition Prior to Environmental (STIP).

1. The project development component (Environmental and Permits, phase 0) must be programmed, the amount requested must be managed within the annual allocation, and phase 9 must be approved.
2. If Federal funds are to participate in preliminary R/W costs, environmental clearance (PA&ED milestone) must be achieved, and R/W activities must have been authorized by FHWA through the E-76 process; however, if project schedules require that these activities be started prior to achieving PA&ED, the department may request authorization for preliminary R/W activities in the Preliminary Engineering (PE) federal authorization request (E-76) so that these costs may be federally reimbursed.
3. When a STIP/SHOPP project is 100% federally funded, a non-STIP/non-SHOPP fund (PECT 20.20.800.200, Fund 0042) can be used to record costs related to such preliminary R/W activities. HQ P&M must be notified prior to using the fund reservation.
4. If a project is locally funded and STIP or SHOPP funds have not been identified for the project, it is the responsibility of the District to secure funds through a Cooperative Agreement prior to initiating the applicable activities.

© 1994-2025 California Department of Transportation. All rights reserved.

3.08.03.00 Regular Right of Way Activities – Defined

The following is a nonexclusive list of activities, which shall not commence prior to satisfying the above prerequisites.

1. Acquiring right of way parcels
2. Relocating Displaced Persons or Businesses
3. Performing Utility Relocation activities from the request for Relocation Plans forward

Unless the prerequisites are met, these activities shall be avoided in all cases unless prior Headquarters R/W approval has been secured in writing in accordance with the instructions found in Section 3.08.04.00 or as defined in Acquisition Reference File 00-1 R/W Acquisition Prior to Environmental Approval.

3.08.04.00 Prerequisites for Commencement of Regular Right of Way Activities

The prerequisites for initiating regular R/W activities are outlined as follows:

(These requirements do not apply to hardship and protection parcels or parcels subject to Acquisition Reference File 99-1 Regular R/W Activities prior to Environmental Clearance (non-STIP), or Acquisition Reference File 02-1 R/W Acquisition Prior to Environmental (STIP).

1. The project report must have been approved.
2. The project must have current final environmental clearance.

NOTE: As an alternative to having final environmental clearance, this requirement may be satisfied if the following three events have occurred:

   a) The draft environmental document has been circulated.
   b) The public hearing process is complete.
      and
   c) A preferred alternative has been approved.

3. Freeway agreement(s), including required amendments, must have been executed if required for the project.

© 1994-2025 California Department of Transportation. All rights reserved.

NOTE: By statute (Streets and Highways Code Section 100.21), "(a) Whenever a street or highway closing agreement is required by Section 100.2, the department shall not acquire, except by gift, and except in hardship or protective cases as determined by the department or the commission, any real property for a freeway through a city until an agreement is first executed with the city council, or for a freeway through unincorporated territory in a county until an agreement is first executed with the board of supervisors. The department shall give notice to the city council or the board of supervisors, as the case may be, of any acquisition of real property prior to the execution of an agreement.

(b) Notwithstanding subdivision (a), a city council, or a county board of supervisors may, by resolution, authorize the purchase of rights-of-way prior to approval of an agreement if the purchase is limited to the mainline corridor of the proposed freeway and the alignment of the freeway is not at issue." (Direct quote from the Statute)

Current final environmental clearance means:

a. An approved determination that the project is categorically exempt under CEQA, and if there is Federal participation in any part of the project, FHWA concurrence in a determination that the project is a categorical exclusion under NEPA.

   or

b. Final environmental documents (Environmental Impact Report [EIR], Environmental Impact Statement [EIS], Negative Declaration [ND], Environmental Assessment [EA]) have been prepared and approved, and, under NEPA, a Finding of No Significant Impact (FONS1) or a Record of Decision (ROD) has been completed and signed, and, under CEQA, a Notice of Determination (NOD) has been filed with the Office of Planning and Research.

   and

c. When required pursuant to the Environmental Handbook, an Environmental Reevaluation has been prepared and approved.

© 1994-2025 California Department of Transportation. All rights reserved.

3.09.00.00 – DELEGATIONS

3.09.01.00 Delegations of Authority

As referenced in Section 2.05.01.00, the delegation matrix for Planning and Management is noted below. The delegation matrix reflects the associated policy and RW Manual reference for each delegated item. The matrix also distinguishes whether an item is delegated to the District or Headquarters (HQ) level, along with the lowest level of sub-delegation authorized.

Reference (Statutory, WBS, Director's Policy, Deputy Directive, etc.)	**RW Manual Section**	**Responsibility**	**Delegation**	**Lowest Level of Sub-Delegation**
	3.02.04.00	Establishing Right of Way EA	District	Associated Governmental Program Analyst (AGPA)

4.01.00.00 – GENERAL

4.01.01.00 Introduction

The R/W estimate is the first step in building a credible budget. Estimates are prepared for all transportation projects regardless of whether capital expenditures for right of way on the transportation project exist. The elements of an estimate allow R/W Planning and Management to forecast capital outlay support personnel requirements, capital outlay expenditures, and future programming needs. Estimate data is entered into PMCS on the EVNT RW and COST RW1-6 Screens, in addition to the Estimating section of ROWMIS.

Since various levels of Caltrans' management, the CTC, the Legislature, and local agencies use R/W estimates, it is extremely important that R/W estimates be realistic and reliable. Overestimating may result in a project being deferred or eliminated. Underestimating understates the Department's financial obligations and may adversely affect supplemental funding or staffing needs.

4.01.02.00 Project Development, Programming, and Budgeting

Direct communication between R/W and Project Development staff is essential during all phases of the project development process. This process starts with the Project Initiation phase (PID) and carries through to completion of Plans, Specifications, and Estimates (PS&E). When it is determined that an estimate is needed, the program manager or project engineer submits a request to R/W. This is the beginning of a series of requests and estimates corresponding to changes that occur as the project develops.

As part of the estimating process, R/W will review right of way requirements submitted in the estimate request. R/W must notify the requesting unit (program manager or project engineer) if its review identifies design deficiencies. Deficiencies may include lack of replacement access, insufficient right of way width, any damage to a remainder parcel that has not been addressed, or any other unresolved issues. R/W will identify those proposed design features that could have a dramatic effect on value.

© 1994-2025 California Department of Transportation. All rights reserved.

4.01.03.00 Contingency Costs

Contingency costs are applied to acquisition and utility relocation costs for all estimates. Contingencies for relocation assistance, clearance/demolition, and title and escrow costs may be applied when considered appropriate. Contingency costs provide for possibilities such as administrative settlements, condemnation awards, utility overruns, interest payments, and unanticipated goodwill payments.

When preparing an estimate for a Project Study Report (PSR) or equivalent, R/W should apply a contingency rate of at least 25% unless district experience dictates otherwise. When preparing an estimate for a Project Report (PR), R/W should always base contingency costs on district experiences.

4.01.04.00 R/W Data Sheet Approval

The Senior Agent responsible for Estimating shall review and recommend approval of all R/W Data Sheets prepared by staff. The Region/District R/W Manager or designee shall approve all R/W Data Sheets. The following statement will be included directly above the approver's signature block in all R/W Data Sheets:

> *I have personally reviewed this Right of Way Data Sheet and all supporting information. I certify that the probable highest and best use, estimated values, escalation rates, and assumptions are reasonable and proper, subject to the assumptions and limiting conditions set forth; and I find this Data Sheet complete and current.*

4.01.05.00 Log of Estimates

A log of all requests for original and revised estimates shall be maintained by the Region/District Estimating unit.

4.01.06.00 Estimate File

The Senior Agent responsible for Estimating must ensure that a file is maintained for each project for which a R/W estimate is prepared. The file will remain active until the right of way portion of the project is completed, at which time it will become part of the project file.

© 1994-2025 California Department of Transportation. All rights reserved.

4.01.06.01 Filing System

For efficient retrieval of previous estimates or other information, the following procedure shall be implemented:

- Establish a file when the initial request for an estimate is received.
- Identify the file by county-route-post mile, expenditure authorization/project ID number, project limits, and requesting unit.
- Maintain the file in chronological sequence.

4.01.06.02 File Contents

The individual estimate file shall contain:

- The map(s) used in preparing the estimate, with date of original map(s) and dates of subsequent revisions. If, due to size or number, the maps cannot be maintained in the file, a reference should be placed in the file indicating where the maps are filed. Regardless of whether the maps are maintained in the file or in another location, they are part of the file and are to be retained in accordance with file retention requirements.

- Copies of all memoranda of requests and responses.

- Copies of all R/W Data Sheets (including attachments), Preliminary Estimates, Conceptual Cost Estimates, and Estimate Worksheets prepared for the project, along with accompanying R/W Data Sheet Transmittal Memoranda.

- Comparable sales and all other data used to prepare the estimate.

- A diary annotating by date and person making the entry each action taken regarding estimates on the project. The diary shall contain all actions the estimator takes throughout the life of the project.

© 1994-2025 California Department of Transportation. All rights reserved.

4.01.07.00 Preliminary Estimates

R/W is often asked to provide a rough estimate without sufficient lead time or adequate mapping. These estimates are prepared using, at a minimum, the first page of the Data Sheet and the Transmittal Memorandum. The face of the R/W Data Sheet for this type of estimate is marked in bold caps:

"NOT VALID FOR BUDGETING OR PROGRAMMING PURPOSES"

The reasons for this notation are indicated in the Transmittal Memorandum.

4.01.07.01 Conceptual Cost Estimates

A Conceptual Cost Estimate (CCE) is a specific type of preliminary estimate that may be requested from R/W during PID phase. The current Conceptual Cost Estimate was developed in response to the *Memorandum: Interim SHOPP Project Initiation Report Project Initiation Document* outlining the multi-divisional development of the revised interim SHOPP PIR guidance and template, led by the Division of Transportation Planning (DOTP). Additional information can be found at the Project Initiation Documents page. This Interim SHOPP PIR guidance identifies minimum PID requirements to be captured in estimates. The CCE should include:

- An estimate of "accurate and reliable" support costs for PA&ED
- An estimate of a reliable range for support & capital for future phases
- A reliable estimated schedule for completion of right of way

The purpose of this estimate is to provide the necessary project information to complete a work plan estimate for R/W support resources needed for the 0 Phase (PA&ED) component of a project, as well as to provide a rough order of magnitude estimate.

The CCE Request will contain the basic project information, the proposed right of way requirements, and estimate mapping. The request will also note if a field review is requested or is not required at this time. See 04-EX-07, K Phase Conceptual Cost Estimate Request – Right of Way.

The CCE Estimate Form will be completed only if the CCE Request is submitted to R/W. See 04-EX-08, K Phase Conceptual Cost Estimate Form – Right of Way.

© 1994-2025 California Department of Transportation. All rights reserved.

4.01.08.00 Project Estimate Mapping

R/W Engineering is ultimately responsible for project estimate mapping. Guidelines for cost estimate map preparation are found in the R/W Manual, Chapter 6, Right of Way Engineering, Section 6.04.00.00, and the Plans Preparation Manual (PPM), Section 4-2. Some districts have made arrangements for R/W to receive mapping suitable for estimating purposes from other functional units; these arrangements are acceptable as long as the estimate mapping is in compliance with the outlined requirements.

4.01.09.00 Training

Each agent assigned estimating responsibilities should receive a thorough orientation on why estimates are prepared and how they are used. Ideally, an estimator should have practical experience as an appraiser and have taken the basic appraisal courses, at the very least. Additional courses in building cost estimating and a working familiarity with various cost estimating resources are recommended.

4.01.10.00 Hazardous Waste Site Identification

In the early stages of the project development process, Region/District Project Development and Environmental units will identify sites or facilities that have the potential for being contaminated with hazardous waste or materials. The presence of hazardous waste or materials in future right of way can cause costly project delays if discovered late in the project development process. It is imperative, therefore, that every effort be made to ensure early detection of hazardous waste sites.

As part of the estimating process, estimators must field review subject parcels. If an estimator suspects a hazardous waste site or hazardous materials are present in the proposed right of way and have not been previously identified, the estimator must immediately send written notification to the Region/District Project Development and Environmental units and both Region/District and R/W Hazardous Waste Coordinators. A copy of the memorandum is to be attached to the R/W Data Sheet.

© 1994-2025 California Department of Transportation. All rights reserved.

When field reviewing subject properties, estimators should pay special attention to improvements where structural components could contain large amounts of hazardous materials, such as asbestos. In addition, present and prior land uses may indicate the potential for contamination on the site, as well as the possible presence of underground storage tanks that may be in use or have been used for the storage of hazardous materials.

Examples of existing or former uses where hazardous wastes or material may exist include:

- Commercial and industrial sites, such as: service stations; muffler shops; bulk plants; paint manufacturing companies; machine shops; plating works; dry cleaning plants; chemical and fertilizer companies that may use or have used solvents, cleaning compounds, catalysts, cutting oils, plating solutions, dyes, paints, or other chemicals.

- Junkyards, auto wrecking yards, dumps, or landfills.

- Underground or aboveground tank storage facilities for liquid hydrocarbons, pesticides, or other toxic materials.

- Asbestos siding, roofing, flooring, or insulation on or in existing buildings.

- Disposal dumps or pits that may contain agricultural chemicals or industrial wastes.

- Utility substations or storage/maintenance facilities.

- Sites where contamination may have resulted from an adjacent property owner's operation, or where regulatory action involves implementation of hazardous waste regulations.

- Military bases and reservations.

- Atomic energy sites.

- Railroad sites.

© 1994-2025 California Department of Transportation. All rights reserved.

4.01.11.00 Use of Incentive Payment Program

If use of an incentive payment program is proposed or requested, these additional costs should be reflected in the R/W estimate as best as possible. If used, incentive payments must be applied to all parcels on a project regardless of type, size, appraisal amount, or ownership (including public agencies). Incentive payments are based on a lump sum payment of 10% of the appraised value of all parcels under the same ownership with a minimum payment of $1,000 and a maximum payment of $100,000. Use of incentive payments should be discussed with, at minimum, the Estimating Senior prior to use in an estimate.

© 1994-2025 California Department of Transportation. All rights reserved.

4.02.00.00 – PREPARING THE ESTIMATE

4.02.01.00 Estimating Theory

Estimates are forecasts of anticipated costs for properties that will be acquired at a future date. An estimating procedure has been developed to assist in identifying these costs. All districts must use this procedure in developing estimates unless an alternate method receives R/W Headquarters' prior approval.

The estimating procedure asks the estimator to look into the future to try to determine, to the highest degree possible, the value of subject properties at the time they are to be acquired (assumed to be the year of R/W Certification). This is accomplished in the following manner:

1. Determine the subject's most probable highest and best use including stage of development and probable improvements at the time of acquisition.

2. Determine the current value for the subject based on the rationale described in 1 above.

3. Determine value at time of acquisition by applying an escalation rate to the current value.

For Example: 20 acres of agricultural land today may have an estimated value of $1,000 per acre. It is anticipated that at the time of acquisition this property will have been developed into a commercial-industrial park site. Commercial-industrial property has a current land value of $10,000 per acre. The estimator determines the subject's current value based on future use. Therefore, the subject's estimated current value based on the future use is $10,000 per acre for a total of $200,000. If the escalation factor has been established at 10%, for example, the subject's escalated value would be $11,000 per acre for a total of $220,000.

4.02.02.00 Property Values

Although estimates are opinions, they are expected to be as solidly based as possible using appraisal principles. The estimator is not expected, however, to be put in the time and effort that goes into an appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

The estimator is allowed to use indicators of value that may not typically be acceptable in appraising. If District Appraisal staff has previously verified comparable sales and listings data, the estimator shall obtain this information. To prepare an estimate, the estimator will use this information as well as less direct indicators of market value such as:

- Staff appraisals of comparable properties.
- Assessor's information.
- Multiple listing service sales data.
- Observed listings.
- Information from brokers.

Factors to consider when preparing an estimate include increases in real estate values due to changes in land use resulting from anticipation of the proposed project, probable increases in values due to real estate improvements under construction at the time of the estimate, and any extraordinary costs that can be anticipated.

District experience and the experiences of other districts with payments for loss of goodwill should also be considered and factored into the estimate.

4.02.03.00 Curative Damages/Construction Contract Work

For estimating purposes, activities commonly referred to as Construction Contract Work (CCW) will be considered as Curative Damages when it is anticipated they will be satisfied with a cash payment to be included in the amount payable under clause 2(A) of the R/W Contract. (See R/W Manual Section 8.05.12.00, "Cost to Cure Damages.") If it is known at the estimating stage that the roadway contractor will satisfy Curative Damage type obligations during construction, the obligations will still be referred to as Construction Contract Work.

Project Development usually estimates the costs of Curative Damages and/or Construction Contract Work. Estimates for Curative Damages are to be included in Section 1.A. (Acquisition) on the R/W Data Sheet. This will ensure that Curative Damages are included as acquisition costs in the COST RW1-5 Screens and when the project is programmed. Estimates for Construction Contract Work will be included in the R/W Data Sheet in Section 1.G. (Construction Contract Work). Costs on this line are not entered in the COST RW Screens.

© 1994-2025 California Department of Transportation. All rights reserved.

Construction Contract Work is a Right of Way obligation regardless of how it is accomplished. It is Right of Way's responsibility to take a proactive role in ensuring that CCW costs in Section 1.G. of the R/W Data Sheet are provided to Project Development for inclusion in the PS&E.

4.02.04.00 Properties With Hazardous Waste or Materials

When estimating properties where hazardous waste or materials are known to exist, the estimator will observe the valuation guidelines found in Appraisal Chapter 7, Section 7.04.12.06.

4.02.05.00 Limiting Conditions

Limiting conditions are constraints that can reduce an estimate's reliability. They may include inadequate mapping or design information or short lead time. They are always stated in the appropriate section of the R/W Data Sheet; e.g., limiting conditions relating to acquisition are documented in section 6, while limiting conditions relating to utilities are documented in section 7 (see Exhibit 04-EX-01).

4.02.06.00 Assumptions

Assumptions are made both because of limiting conditions and the need to predict future costs far in advance of actual expenditures. They can be made on a parcel-by-parcel basis or may apply to the whole project. Estimators are expected to make reasonable assumptions. When more than one reasonable assumption can be made, the estimator is expected to select the assumption that yields the highest supported anticipated cost. All assumptions are to be documented in the appropriate section of the R/W Data Sheet; e.g., those relating to acquisition are documented in section 6, while those relating to utilities are documented in paragraph 7 (see Exhibit 04-EX-01).

Following are specific applications of the above general policy;

- Estimates will always represent the *most reasonable* and justifiable project delivery schedules.

- Estimates should always be based on the most probable "worst case" and "highest cost" assumptions.

© 1994-2025 California Department of Transportation. All rights reserved.

- When estimates are made for a project where several alternatives are under consideration, the estimate used for initial programming purposes should be the same alternative that is used for the construction cost estimate. If the alternative for the construction cost estimate has not been selected, the estimate for the most probable highest cost alternate of those considered by district management as most likely to be adopted shall be used. Estimates should not be artificially inflated by using the cost of an alternative included for study that does not have a realistic chance of being adopted.

- When in doubt because of inadequate right of way or construction details or other factors, a full acquisition should be assumed.

- For businesses, district experience and the experiences of other districts with payments for loss of goodwill in similar circumstances should be considered. Projected payments should be included in the estimate.

4.02.07.00 Documenting Limiting Conditions and Assumptions

It is very important to document limitations within which the estimate was prepared and assumptions made in developing the estimate. Without a clear understanding of this information, Project Development staff using the estimate will not know whether they have a very rough approximation or a complete estimate that is consistent with the current state of development of the project. In addition, statements of limiting conditions and assumptions may alert design staff to certain design conditions that if modified could reduce or increase project cost. Statements documenting the following limiting conditions and assumptions are to be included in the appropriate section of the R/W Data Sheet; e.g., those relating to acquisition are documented in paragraph 6, while those relating to utilities are documented in paragraph 7 (see Exhibit 04-EX-01):

- The specific parcels that may be partial acquisitions but are assumed to be full acquisitions due to incomplete mapping and/or design.

- The specific number of parcels with businesses where it is expected a payment for the loss of goodwill will be required.

- Any known or anticipated extraordinary cost for difficult or controversial acquisition cases based on the district's experience with the subject or similar type of property owner.

© 1994-2025 California Department of Transportation. All rights reserved.

- The anticipated additional costs for projects with aggressive schedules that will require rights of entry and/or condemnation proceedings.

- Any other unusual documented higher costs that are anticipated, such as revisions to the general plan, a city incorporation that may affect value, and other governmental actions or projects.

- Long lead time utility relocations.

4.02.08.00 Estimate Content

4.02.08.01 R/W Data Sheet

The completed R/W Data Sheet (Exhibit 04-EX-01) is the formal R/W estimate. The Data Sheet, with attachments, contains all relevant information and estimate conclusions.

Workload data from the R/W Data Sheet is entered in the EVNT RW screen. Cost data from the R/W Data Sheet is entered into the COST RW1-5 screens.

A Data Sheet is required for all viable alternates on all proposed projects. If an item on the Data Sheet is not applicable, it should be so indicated. A copy of the COST RW1 Screen reflecting the estimate is to be attached to the Data Sheet for the Preferred Alternate. (COST RW1 Screens are to contain escalated cost.) A Utility Information Sheet (Exhibit 04-EX-05) and a Railroad Information Sheet (Exhibit 04-EX-06) should be used whenever involvements dictate. The Data Sheet, including all attachments, becomes a part of the planning document for which it was prepared (PSR, PSSR, IPR, PR, PID, etc.). Copies of all Data Sheets and attachments and all supporting information, including comparable sales (specify which comparable sales or other data were used to estimate the value of each parcel), are to be placed in the estimate file. The first page of the Data Sheet contains data necessary for PMCS and should be used as the PMCS input document. Refer to Exhibit 04-EX-01, pages 5-6 for instructions on completing the Data Sheet.

© 1994-2025 California Department of Transportation. All rights reserved.

4.02.08.02 R/W Estimate Worksheet

The estimator will use the R/W Estimate Worksheet to arrive at individual parcel costs for each project alternate. Because of the varied forms used by the districts and types of projects estimated, statewide standardization of this form will not be mandated. Exhibit 04-EX-02 is a suggested format for the R/W Estimate Worksheet. To ensure that correct data is entered into PMCS, each district must use a worksheet form which contains the following 17 items for each parcel in the estimate.

1. Parcel type (see Exhibit 04-EX-03 for definition)
2. Parcel number
3. Postmile designation/kilometer post
4. Estimated cost
5. RAP cost
6. Clearance/demolition cost
7. Number of RAP displacements
8. Number of clearance/demolition units
9. Number of construction permits
10. Construction contract work cost
11. Title and escrow fees
12. Area in right of way
13. Area in excess
14. Permitter
15. Estimated cost of permit
16. Type of permit
17. Fiscal year when expenditure will occur

To standardize information entered into PMCS, any customized district forms used should be designed to maintain sequential order of the first six items shown above. Data for items 1 through 5 are required for each parcel in the estimate. Data for items 6 through 17 will be provided as appropriate. Information contained in the R/W Estimate Worksheet is summarized in the R/W Data Sheet. Copies of all worksheets are placed in the estimate file.

© 1994-2025 California Department of Transportation. All rights reserved.

4.02.08.03 Project Permit Fees

Project permit fees are those costs attributed to permits that must be acquired by the Department and *are required to construct the project*. The most common of these permits are Fish and Game 1601 permits, Water Resource Control Board National Pollutant Discharge Elimination System Permits (NPDES), and Regional Water Quality Control Board 401 Water Quality Certifications. Typically these and other permits are acquired during the project's Project Development stage. The fees for these permits are usually one-time expenses, although payment for time extensions on specific permits may occur. Although R/W does not participate in acquiring these permits, they will be treated as R/W capital expenses, and R/W must budget for them.

At the R/W Estimating stage, the R/W estimator will contact the Project Manager to obtain a list of required permits. This list shall include, at a minimum, the name of the permitter, type of permit, total anticipated cost, and the fiscal year when the fees are anticipated to be expended. This information shall be entered into Sections 14-17 of the Estimate Worksheet (Exhibit 04-EX-02). These costs will ultimately be reflected in the R/W Data Sheet (Exhibit 04-EX-01) under Section 1, Right of Way Cost Estimate, Subsection A., Project Permit Fees.

4.02.08.04 R/W Data Sheet Transmittal Memorandum

The R/W Data Sheet Transmittal Memorandum (Exhibit 04-EX-04) (internal Caltrans link) is used to transmit R/W Data Sheets to the unit requesting the estimate. The memorandum should contain a recapitulation of the limiting conditions and assumptions stated in the Data Sheet, along with a discussion of right of way lead time requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

4.03.00.00 – ESCALATION RATES

4.03.01.00 General

Escalation can be defined as an increase in cost due to upward changes in market conditions. Because costs typically do increase over time, escalation rates must be developed for estimating purposes. The rates are in the form of percentages and may be districtwide or countywide, although individual project rates should be developed and used wherever possible for the greatest accuracy.

The estimator prepares escalation rates for right of way costs; the utility estimator prepares escalation rates for utility relocation costs. (See also Chapter 13, Utility Relocation, for information on escalation rates for utility relocation costs.) The appropriate functional area should review supporting data, including the analysis used to substantiate rates, before the data is used. Escalation rate documentation is to be maintained in the estimate files.

4.03.02.00 Factors Affecting Escalation Rates

Escalation rates are influenced by many factors, such as increases in development and building costs, legislation, inflation, and general economic conditions. The effect of these factors can be estimated but cannot be precisely determined.

4.03.03.00 Methods of Determining Escalation Rates

Data used in establishing escalation rates may be found in assessed value trends from repeating sales, the direction and trends of future development of areas, private and governmental forecasts, and construction and building cost indices. Past experience in estimating, appraising, and acquisition in the subject area should not be overlooked.

Judgment and experience aid the estimator in determining the proper rate. Improved methods of determining proper rates should be continuously sought.

© 1994-2025 California Department of Transportation. All rights reserved.

4.03.04.00 Individual Escalation Rates

Right of way and utility costs may escalate at different rates. To accommodate these differences, separate escalation rates for right of way (which includes land, improvements, damages, RAP, demolition, and goodwill) and utilities may be applied.

Separate utility escalation rates can be used to show more reliable costs in the Program Documents. This can be important when utility costs are changing more rapidly than other right of way costs. Costs should be escalated to the year of R/W Certification, except where unusual circumstances dictate otherwise. (*For example*: Knowledge that a contract for relocation of a utility may have to be let a year or more before highway construction begins.) Knowledge of the escalated utility costs as an item separated from right of way costs contributes to the effectiveness of the Program Documents.

4.03.05.00 Using Escalation Rates

Escalation rates are applied to estimated costs for acquisition, RAP, utility relocation, etc. Estimated costs are escalated to the year of R/W Certification and then spread over the anticipated years of acquisition (including after R/W Certification if applicable). These costs are entered into the COST RW1 Screen, a copy of which is to be attached to the R/W Data Sheet.

© 1994-2025 California Department of Transportation. All rights reserved.

4.04.00.00 – UPDATING THE ESTIMATE

4.04.01.00 General

Estimates are prepared during various stages of the project development process. Preliminary estimates prepared at the beginning of the planning process need not be updated unless other units specifically request an update.

Any written request for a revised data sheet may require a field review, a review of property ownerships, a new utility estimate, and a check with the environmental unit.

Estimates prepared for Project Initiation Documents (PID), such as PSRs, PSSRs, and PRs, must be updated whenever project scope, scheduling, or value changes sufficiently to warrant the update. Updating an estimate may involve little more than substituting an amended page to an otherwise current R/W Data Sheet or could involve preparing a new Data Sheet.

4.04.02.00 For Programming Purposes

Once projects are part of one of the Department's Program Documents (STIP, SHOPP, TSM, etc.), updating of estimates may occur whenever it is determined the estimate is no longer valid.

At a minimum, all projects in the Department's Program Documents will be reviewed and updated at the Project Report stage. When cost estimates are performed for programming purposes, estimates for active projects must be kept current and updated at least once a year, in accordance with the Project Development Procedures Manual (Chapter 20).

4.04.03.00 Final Cost Estimates At R/W Certification and Construction Contract Acceptance

Final cost estimates representing all capital and support costs (phase 2 and phase 9) are required for all programs, except Minor, Maintenance, and Local Public Agency off-system projects. Typically performed by the R/W Project Coordinator and/or Planning and Management staff, the R/W Estimator may assist as needed to estimate remaining costs.

© 1994-2025 California Department of Transportation. All rights reserved.

At the Certification stage, final cost estimates are attached to R/W Certifications 1 or 2. For R/W Certifications other than a 1 or 2, the final cost estimate may be deferred until the R/W Certification is updated or upgraded (deferral not to exceed 12 months).

Final cost estimates are also required at the time of Construction Contract Acceptance (CCA).

See Programming and Budgeting policy for more information on final cost estimates.

5.01.00.00 – EARLY ACQUISITION

5.01.01.00 General

Under certain circumstances, the California Department of Transportation (Department) may initiate the acquisition of real property interests for a proposed transportation project before the completion of the Project Approval and Environmental Document (PA&ED). The Department may also create an Early Acquisition Project (Code of Federal Regulations [CFR] Title 23 Section §710.501) to acquire real property interests for corridor preservation, access management, or other purposes.

There are several options for funding an early acquisition. However, to preserve the eligibility of Federal participation, the following conditions must be met:

a) Property is acquired in compliance with all applicable Department's policy/procedures, State and Federal law and regulations, including but not limited to the provisions of the Uniform Act and regulations in 49 CFR part 24 and the requirements of Title VI of the Civil Rights Act of 1964 (42 United States Code [USC] 2000d-2000d–4).

b) Property interests will be acquired through negotiation, without the threat of, or use of, condemnation; and is in compliance with the Uniform Act and Title VI of the Civil Rights Act of 1964 (42 USC 2000d, et seq.).

c) Property is not protected under Section 4(f), which includes, publicly owned parks, recreation lands, wildlife, or waterfowl refuges and publicly or privately-owned historic sites listed or eligible for listing on the National Register of Historic Places.

d) Will not cause any significant adverse environmental impacts as a result.

e) Will not limit the choice of reasonable alternatives for a proposed transportation project or otherwise influence the selection of the final alternative.

f) Real property interests acquired under this section will remain as current uses, and there will be no demolition, site preparation, or construction taking place until after the completion of the environmental review process unless that is necessary to protect public health or safety.

g) Real property interest acquired under this section will be incorporated into the project.

© 1994-2025 California Department of Transportation. All rights reserved.

- If reimbursement is made and the real property interests are not incorporated in a transportation project within 20 years, pursuant to 23 USC 108(d)(7) FHWA must offset the amount against Federal-aid funds apportioned to the State.

h) Department determines and FHWA concurs the early acquisition does not influence the environmental review process for the proposed transportation project, including:

- The decision on need to construct the proposed transportation project;
- The consideration of any alternatives for the proposed transportation project required by applicable law; and
- The selection of the design or location for the proposed transportation project.

5.01.02.00 Definitions

a) Real property interest: any interest in land and any improvements thereto, with option to purchase or similar action to acquire and/or preserve the right of way.

b) Early Acquisition Project: acquisition of real property interests by an acquiring qualified agency prior to completion of the environmental review process for a proposed transportation project, as authorized under 23 USC 108 and implemented under 23 CFR 710.501.

c) Displaced person: Any individual, family, partnership, corporation or association who must be relocated as the result of the acquisition.

d) Core property interest: a common property interest identified in all alternatives.

5.01.03.00 Request to Proceed with Early Acquisition

Prior to commencing the acquisition, District will submit an authorization to proceed with Early Acquisition to HQ. The (Request) Early Acquisition Memo (Exhibit 05-EX-01 [internal Caltrans link]) should clearly describe the property interest(s), location(s), and reason(s) to acquire prior to PA&ED. Only core property interest(s) will be considered to be acquired and incorporated into the project. (See 05-EX-01 [internal Caltrans link]).

The (Request) Early Acquisition Memo should also include the District Environmental Service's analysis of the Early Acquisition Project (see 05-EX-01 [internal Caltrans link]). Once HQ's approval and FHWA's concurrence has

© 1994-2025 California Department of Transportation. All rights reserved.

been received, the requesting District can proceed with the acquisition when funding is available.

5.01.03.01 Commencing the Acquisition

The requesting District shall inform the property owner(s) in writing that the offer to purchase the early acquisition will be made by right of way contract, and under no circumstances shall the District seek to condemn the property by eminent domain authority. In the event an agreement is not reached and early acquisition does not take place, the District will retain the right to condemn the property, as needed, upon achieving the PA&ED milestone.

When acquiring property interest for mitigating purposes, District may consider the Option to Purchase as an alternative acquisition.

5.01.03.02 Relocation Assistance Program (RAP) Eligibility

District shall inform any displaced person in writing regarding the eligibility of the applicable Relocation Assistance benefits under the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (42 USC 4601, et seq.) as amended and Title VI of the Civil Rights Act of 1964 (42 USC 2000d, et seq.).

5.01.04.00 Early Acquisition Funding Options

The Code of Federal Regulations (CFRs) and the United States Code (USC) provides guidance for Early Acquisition of Right of Way.

The following options can be used to fund acquisition costs. Right of Way Planning and Management will provide guidance on which option is appropriate for the project. For projects in the State Transportation Improvement Program (STIP), State funding is only available after the Environmental Study has been completed and the preferred alternative has been chosen.

© 1994-2025 California Department of Transportation. All rights reserved.

1. ***State funded early acquisition without Federal credit or reimbursement.*** Use State funds to carry out the entire acquisition and later incorporate the acquired property interests into the project. In order to maintain eligibility for future Federal participation on the project, early acquisition activities funded entirely without Federal participation must comply with requirements of 23 CFR §710.501(c)(1) through (5) and conditions in Section 5.01.01.00.

2. ***State-funded early acquisition eligible for future credit.*** Use State funds to carry out the acquisition prior to completion of the environmental review process. The costs are eligible for use as a credit (soft match) toward the non-Federal share of the total project costs. No prior approval from FHWA is required to proceed with the acquisition. However, at the time Department requests Federal participation, the FHWA must concur that the Environmental Review process was not influenced by the early acquisition.

3. ***(Pending approval for use from the Governor's Office – until further notice, do not use this option)***

   State-funded early acquisition eligible for future reimbursement. The costs incurred by the State prior to completion of the environmental review process for early acquisition are eligible for reimbursement from Title 23 funds apportioned to the State. The following requirements, in addition to the conditions in 5.01.01.00, must be met:

   - The State has a mandatory comprehensive and coordinated land use, environmental, and transportation planning process under State law and the acquisition is certified by the Governor as consistent with the State plans before the acquisition;
   - The acquisition is determined in advance by the Governor to be consistent with the State transportation planning process pursuant to 23 USC 135;
   - The alternative for which the real property interest is acquired is selected by the State pursuant to regulations issued by the Agency Secretary which provide for the consideration of the environmental impacts of various alternatives.

4. ***Federally funded early acquisition.*** This is an option to allow for the financing of a STIP project. FHWA may authorize the use of funds apportioned to a State under Title 23 for an Early Acquisition Project if the Department certifies, and FHWA concurs, that all of the conditions in 5.01.01.00 and the following have been met and:

© 1994-2025 California Department of Transportation. All rights reserved.

- The Early Acquisition Project is included in an applicable transportation improvement program under 23 USC 134 and 135 and 49 USC 5303 and 5304.
- Only core property interest(s), common to all alternatives would be selected for early acquisition.
- The District Environmental Analysis Office and the HQ Division of Environmental Analysis have completed the environmental review process for the Early Acquisition Project, and the Early Acquisition Project is deemed to have independent utility. In most cases, a categorical exclusion will be prepared for the Early Acquisition Project.
- Department certifies that:
    - The Department has authority to acquire property interest(s) under State law, and
    - The acquisition of the real property interest
        - Is consistent with the State transportation planning process under 23 USC 135;
        - Will be acquired through negotiation, without the threat of, or use of, condemnation;
        - Will not result in a reduction or elimination of benefits or assistance to a displaced person.

5.01.05.00 Federal Authorizations

Federal-aid for right of way, including Hardship and Protection, shall be requested on all Interstate (I), Interstate 4R (I-4R), and Emergency Relief (ER) projects by submitting an E-76. Federal-aid is also requested for certain categories of special projects. Since Federal-aid policies have changed, the District should contact the District Planning and Management Branch or the Headquarters Office of Federal Resources to determine the best option to request Federal authorization.

When requesting Federal participation on a STIP project, the requesting District should consider 100% Federal participation since State funds will not be available until much later. Both support and capital costs should be included in the E-76.

© 1994-2025 California Department of Transportation. All rights reserved.

5.01.06.00 Local Public Agency (LPA) Funded Early Acquisition

When an LPA provides funding for the Early Acquisition cost on an "On-System" project, the same process should be followed as a State's project to preserve Federal participation eligibility. The District Right of Way Local Program Coordinator should be consulted. In addition, the Headquarters (HQ) Local Programs Liaison should be consulted to review the Early Acquisition Request and to coordinate a joint review of the Request with the Office of Project Delivery and FHWA for final recommendation and approval.

5.01.07.00 Acquisition by Donation

Donation is the voluntary conveyance of property, without compensation, for the improvement of a public project. Donation of real estate for highway purposes may be accepted at any time (Streets and Highway Codes 104.2 and 104.12)

The transfer of title instrument shall contain a reversionary clause stating that the ownership will revert back to the donor if the donated property interest has not been incorporated into the project after ten (10) years from the date of the donation. See Section 23 CFR §710.505 and 8.28.00.00 for additional information on donation.

5.01.08.00 Acquisition by Dedication

Dedication is the setting aside of property for public use without compensation as a condition prior to the granting of a building permit or zoning variance for land use.

See Section 8.29.00.00.

5.02.00.00 – CORRIDOR PRESERVATION

5.02.01.00 General

Exhibit 05-EX-11, Historical Director's Policy Memo DP-91-1 dated January 9, 1991, entitled "Transportation Corridor Preservation," requires the Department to work on a partnership basis with local land use authorities to identify transportation corridors early and to explore all appropriate means for acquisition and preservation of those corridors.

Right of Way works with Transportation Planning to preserve corridors through a variety of means including:

- Donations
- Dedications
- Transportation Impact Mitigations
- Advance Right of Way Purchase

5.02.02.00 Acquiring for Corridor Preservation – AB 3719 (Eaves)

Effective July 1, 1993, Government Code Section 65081.3 and Public Resources Code Section 33910 (Eaves) authorize the Department to acquire land located within a designated corridor of statewide or regional priority to be held and maintained for future transportation purposes. Acquisition may be through donations, purchase, or other means. Each acquisition proposal is submitted for review and recommended action to the regional transportation planning agency in whose jurisdiction the land is located. The Department may approve the acquisition only after the regional transportation planning agency holds a hearing and finds that potential transportation facilities to be located on the land can be constructed in a manner that will avoid or mitigate specified environmental impacts or values.

Property interest(s) can be acquired for corridor preservation under AB 3719 only when authorized by the local entity.

5.03.00.00 – HARDSHIP

5.03.01.00 General

Hardship is defined as a situation where unusual personal circumstances of an owner are aggravated by a proposed transportation facility and cannot be solved by the owner without acquisition by the State. There are two types of hardships:

- Those which occur in advance of the regular right of way acquisition process.
- Those which occur when the requirements for commencing the regular right of way acquisition process have been met, but funding and activity on the project have been deferred.

The Districts are authorized to approve both types of parcels for hardship acquisition. However, FHWA's prior approval is required for reimbursement.

Departmental practice is to investigate to determine need and to appraise and acquire the property with minimal delay. In some instances, this may require extraordinary efforts such as obtaining independent staff appraisals. Owners of hardship parcels should receive full consideration and service consistent with normal acquisition procedures, including appropriate relocation assistance and sufficient time to consider State's offer. The District shall make the first written offer to the applicant within 90 days from the date of the DDD-R/W's approval letter or the Federal authorization if requested.

5.03.02.00 RAP Eligibility

The District should notify the applicant in writing of the requirements for RAP eligibility when the hardship investigation commences. If the hardship application is not approved, the applicant shall be informed of benefits that will be lost if the applicant chooses to vacate prior to regular acquisition (first written offer). (See Exhibit 05-EX-04). In line with this intent, if an application is approved and the applicant is forced to move prior to the time a written offer can be presented, the District must mail a Notice of Intent to Acquire to preserve relocation eligibility. (See Forms RW 10-08, 10-09, and 10-10 [internal Caltrans link]). This letter should not be mailed until after approval of the hardship acquisition and should not be issued unless initiation of negotiations will commence less than 90 days subsequent to said Notice. This action will preserve the relocation eligibility of applicant and will avoid the possibility of creating more than one eligible displaced person.

© 1994-2025 California Department of Transportation. All rights reserved.

5.03.03.00 Cessation of Hardship

If it determines that a hardship no longer exists, the Acquisition Branch must immediately withdraw any outstanding offer to purchase and advise the owner of the right to appeal the case to the District Hardship Appeals Board. (See Sections 5.03.06.00 through 5.03.06.03.)

5.03.04.00 Guidelines for Processing Requests

5.03.04.01 Hardship Criteria

The following minimal requirements must be met and documented if a hardship request is approved:

- Owner demonstrates need to dispose of property.
- Owner is unable to dispose of property at fair market value because of transportation facility plans.
- Owner cannot reasonably alleviate the hardship in the absence of the State's purchase.
- State's purchase will either partially or totally alleviate the hardship.

Inconveniences experienced by all or most owners along a route are not satisfactory reasons for hardship purchase (for example, an owner's simple desire to move to another area).

5.03.04.02 Need to Dispose of Property

Some of the reasons that may require an owner to sell immediately and that can result in a significant financial loss in the absence of State purchase are listed below in "Reasons Requiring Immediate Sale."

REASONS REQUIRING IMMEDIATE SALE

- Medical
    - Advanced Age – needs care or assistance from others
    - Ambulatory Defects or Diseases – where present facilities are inadequate or cannot be maintained by owner
    - Major Disabilities
    - Doctor's Recommendation – to change climate or physical environments
    - Other Equivalent Disabilities

© 1994-2025 California Department of Transportation. All rights reserved.

REASONS REQUIRING IMMEDIATE SALE (Continued)

- Financial
  - Litigation – e.g., probate
  - Loss of Employment
  - Financial Distress – involving personal or business circumstances
  - Retirement – e.g., cannot afford maintenance or has purchased retirement home
  - Pending Mortgage Foreclosure, Tax Sale, etc.
  - Substantial Burden – maintenance, taxes, and/or rehabilitation costs

- Change of Work Location
  - Creates need to move

- Non-Decent, Safe, and Sanitary Housing
  - For example, overcrowded living conditions if the occupancy level did not exceed DS&S standards at the time the owner originally purchased the property.

- Monetary Loss – Income or Vacant Properties
  - These properties may be acquired when the proposed project is the immediate cause of a monetary loss. The owner must demonstrate an adverse impact of the project on profitability of business or property. A careful review should be made considering such nontransportation influences as:
    - Inability to obtain financing
    - Inherent risk of ownership associated with this type of property
    - Other outside factors affecting the profitability of the business operation or property ownership
    - Local governmental regulations affecting development or rehabilitation, such as requiring the owner to set aside right of way from development, without the requirement for dedication

© 1994-2025 California Department of Transportation. All rights reserved.

5.03.04.03 Hardship Application Submittal

The items listed below in "Submittal Items – Hardship Application" are considered when evaluating applications. At the initial meeting, the Agent informs the owner of the hardship criteria and explains why it is necessary to submit this information.

To expedite requests, some of the requirements may be eliminated at the discretion of the District as indicated below.

If any hardship request appears to be unjustified, the District may request all the information, including a financial statement and tax returns.

SUBMITTAL ITEMS – HARDSHIP APPLICATION

- Written Request or Statement
  - Outlining the reasons why owner(s) must sell the property at this time.

- Application
  - Completed and signed by owner(s). See Exhibit 5-EX-4.

- Personal Financial Statement
  - See Exhibit 05-EX-08 or 05-EX-09.
  - Circumstance: Not required (at the District's discretion) if the hardship request is due to medical problems, job transfer, advanced age, or retirement move.

- Market Substantiation
  - Evidence of reasonable attempt to market the property:
    - Copy of valid listing.
    - Statement from a broker citing reasons the property has not or cannot be sold.
    - Evidence or information obtained by the District.
  - Circumstance: If there have been other unsuccessful attempts to sell the property on the project at fair market value, listing the property is not required. The District should state in its recommendation that the property cannot be sold at fair market value because of the proposed project.

© 1994-2025 California Department of Transportation. All rights reserved.

SUBMITTAL ITEMS – HARDSHIP APPLICATION (Continued)

- Income Tax Authorization
  - Signed authorization to obtain a copy of Federal and State income tax returns (Exhibit 05-EX-06). The District secures copies of the latest tax returns if additional documentation is needed.
  - Circumstance: Optional if the District is satisfied with all the financial information submitted by applicant.

- Doctor's Statement or Equivalent
  - Required if hardship request is based on a medical reason.

- Verification from Employer
  - Required if hardship request is based on a transfer of employment.

- Index Map and Plat Map
  - Showing affected parcel in relation to project right of way. Maps should be 11"x17" if possible.

- E-76
  - Copy of the request for Federal participation if applicable.

- Hazardous Material Statement
  - Describing potential of hazardous material (including hazardous waste and contamination) at the property, if any.

- District Approval Letter

- Categorical Exemption/Exclusion Determination
  - And required statement.

- Review and Written Approval of Regional Legal Office
  - Determines if acquisition would influence environmental assessment of proposed project.
  - Circumstance: Required if project is not environmentally cleared.

The District is responsible for seeing that the information submitted is accurate and appropriately documents the request; e.g., a doctor's letter or affidavit from employer.

© 1994-2025 California Department of Transportation. All rights reserved.

5.03.04.04 Documentation of Files

For each application, the District maintains a file that becomes part of the parcel file upon commencement of acquisition. A parcel diary is initiated when application is made. Care should be taken to ensure that reasons for recommending approval or denial of application are clearly outlined in the diary or file. The date of notification of requirements for RAP eligibility shall be entered following the initial contact with the applicant. The application and other items submitted in support of the hardship are to be retained in the file. (See Section 5.03.04.03.)

The DDD-R/W is responsible for approving or denying each application. Statements of the District's action are made by a signed entry in the parcel diary. The following should be explained and included as part of the entry:

- Basis of decision to accept or deny the application.
- Fact that file has been reviewed prior to approval or denial and that reviewer is familiar with the contents of the file.

5.03.04.05 Notification of Approval or Denial

The Department considers hardship requests to be sensitive since the outcome of a request (approval/denial) could have a significant effect on the applicant. The District must ensure that proper notification is given as follows:

- **Request Approved** – the District notifies the applicant promptly by telephone and makes an entry in the diary.
- **Request Denied** – the District sends a letter to the applicant.

5.03.04.06 Negotiation Alternatives

If negotiations for a Hardship acquisition are unsuccessful, the District should either:

- Consider the merits of an Administrative Settlement.
- Explain the condemnation process to the owner. The Agent should inform the owner that if they wish the State to condemn the property, they should send a letter to that effect. The State will then proceed with an action in eminent domain. If owner wishes, the State could

© 1994-2025 California Department of Transportation. All rights reserved.

prepare such a letter on owner's behalf. A copy of the letter shall be submitted with the District's request for the CTC resolution.

- Withdraw the offer in writing. It is important that all offers of relocation assistance or payments to owners and tenants be formally withdrawn in writing no later than 10 days from the date of the determination not to acquire under hardship guidelines (see RAP Chapter for procedures to follow when withdrawing RAP offers).

5.03.04.07 Vacation of Property

The contract will require grantors to vacate the property within 120 days from the date of the close of escrow, providing replacement housing is available. See Section 8.09.15.00 of the Acquisition Chapter for appropriate clauses on application.

5.03.05.00 Disposition of Financial Information

The District shall maintain confidentiality of the financial statement and income tax returns and permit. Only authorized personnel shall have access to this information. Authorized personnel are those who process the application and those who make the final decision to approve or disapprove the application. While processing the application, the Agent shall store this information in the working file and will keep the file in a secure location.

The Agent shall note in the parcel diary when the financial information was received. This is essential to establish that the information was in State's possession before a decision was made on the application. Upon final disposition of the application, this information shall be returned by mail to the applicant and so noted in the parcel diary. No record of financial information shall be kept by the District. If the application is denied, the applicant should be advised in the denial letter that the returned material must be resubmitted if an appeal is filed. If for some reason the grantors' financial information cannot be returned, it shall be destroyed and so noted in the parcel diary.

5.03.06.00 Hardship Appeals

Applicants who have been denied by the Department shall have the opportunity to have their situations considered by an appeals board.

© 1994-2025 California Department of Transportation. All rights reserved.

5.03.06.01 Appeals Board

Each District shall establish and maintain a Hardship Appeals Board consisting of three (3) members:

- DDD-R/W or a Supervising Right of Way Agent.
- Project Development Branch representative.
- Legal Division representative where available.

Where legal participation is not practical, the third member shall be chosen by and served at the discretion of the District Director (DD). If a member of the Appeals Board is unable to participate in the particular appeals case being reviewed (e.g., due to absence or being personally involved with the case so as to prevent unbiased judgment), the DD shall appoint a substitute member to the Board for the case.

5.03.06.02 Eligibility

The District shall notify all applicants whose requests have been denied that they can appeal the decision in writing to the District Appeals Board. Exhibit 05-EX-10 should be completed by the applicant. The file shall be documented that the applicant was advised of the opportunity to appeal the request and to appear personally before the Board.

5.03.06.03 Appeals Board Action

The Board reviews the file and documents presented by the applicant, including personal presentation by the applicant if requested, to determine if minimum requirements per Section 5.03.04.01 have been met.

After a careful review of the circumstances, the Board shall prepare a summary of facts and findings and submit it with the Board's recommendation to the Division of Right of Way (DORW) for processing and final disposition. The DORW transmits the final decision to the DDD-R/W or a designee who shall notify the applicant of the final decision.

© 1994-2025 California Department of Transportation. All rights reserved.

5.04.00.00 – PROTECTION

5.04.01.00 General

Protection is defined as an acquisition where substantial development activity or appreciation of vacant land value in excess of the STIP inflation rate for construction projects is both likely and imminent in the event early purchase is not undertaken. The STIP inflation rate can be obtained from the District Program and Project Management Branch. For vacant land, follow the guidelines in Section 5.03.04.02 covering hardship applications.

A Protection Acquisition Savings Analysis/Estimate should be done by the District. Headquarters review and approval is not required for Hardship and Protection Acquisition.

The District should maintain a full economic justification of such purchases in its files.

Usually, improved properties can be acquired as protection parcels only in those cases where a definite showing can be made that the property owner has plans to remove the existing building improvements and/or replace the same with new building improvements that will represent a large increase in ultimate highway right of way acquisition cost. Consideration may also be given in those cases where existing building improvements are definitely planned to be altered or enlarged, or additional improvements are planned, resulting in a large increase in future acquisition cost.

The DDD-R/W shall approve each protection request. All appraisals submitted for approval must contain a copy of the written authorization approving the protection acquisition.

5.04.02.00 Protection Criteria

To be considered a valid candidate for protection acquisition, the property must be affected by a project that satisfies the following requirements:

- If there is no environmental clearance, then a negotiated settlement should have a high probability of success since condemnation will not be permitted without owner consent or the prior concurrence of the Legal Division Chief.
- Acquisition of the parcel is in compliance with the requirements of Section 5.01.05.00.

© 1994-2025 California Department of Transportation. All rights reserved.

- Substantial savings will accrue considering return on investment.

5.04.03.00 Request for Authority to Acquire

All requests should show that prompt acquisition is required to prevent further development of property, which would cause substantially higher acquisition or construction costs if acquisition were deferred. Relocation costs of people or businesses should also be considered in the financial analysis. (See Exhibit 05-EX-08 for sample format.) FHWA prior approval is required to receive Federal reimbursement.

Each request shall contain the information and material listed below in "Submittal Items – Protection Application."

SUBMITTAL ITEMS – PROTECTION APPLICATION

- Written Request and Acquisition Analysis
    - Addressed to the DDD-R/W or the DORW, as appropriate, including but not limited to the following:
        - Name of present owner
        - Location of property
        - Area of each parcel proposed for acquisition and remainders
        - Name of developer (owner where applicable) and the financial capability of proceeding with development
        - Information on progress of developers in obtaining permits and filing subdivision maps and likelihood of local authority approval
        - District's estimate of probability of land development as proposed and the imminence of said development
        - Any other information that might be useful
        - Statement concerning the potential that hazardous waste would/would not be present on the property. (See Hazardous Materials Disclosure Document – Acquisition [HMDD-A], Form ENV-0001-A] [internal Caltrans link].) If improvements are to be purchased, include:
            - Pictures of improvements
            - Description of improvements
            - Breakdown of estimated value of improvements separate from land

© 1994-2025 California Department of Transportation. All rights reserved.

SUBMITTAL ITEMS – PROTECTION APPLICATION (Continued)

- Protection Acquisition Savings Estimate (Exhibit 05-EX-02) (internal Caltrans link)
  - **Project escalation rate** – obtained from the District Estimating Branch. This rate is applied to estimated Right of Way Costs.
  - **STIP inflation rate** – obtained from the STIP. The Department of Finance (DOF) provides the inflation estimates every two years for use in the STIP Fund Estimate. If project is not in the STIP, then District develops a rate and explains how it was determined.
  - Brief summary of justification package contents.

- Detail Map (1 copy)
  - Showing the property in sufficient detail to properly evaluate the proposed purchase including property remainders, if any, and the location of access lines. Coloring or outlining of the subject parcel is required. Map should be no larger than half-scale 8-1/2"x11" appraisal map if possible.

- Strip Map (1 copy)
  - Showing the subject property in relation to surrounding area and project. Map should be no larger than half-scale 8-1/2"x11" appraisal map if possible.

- Federal Participation Request
  - Copy of the E-76.

- Review and Written Approval of Regional Legal Office
  - Required if project is not environmentally cleared.

© 1994-2025 California Department of Transportation. All rights reserved.

5.05.00.00 – DELEGATIONS

5.05.01.00 Delegations of Authority

As referenced in Section 2.05.01.00, the delegation matrix for Early Acquisition, Corridor Preservation, Hardship, and Protection is noted below. The delegation matrix reflects the associated policy and RW Manual reference for each delegated item. The matrix also distinguishes whether an item is delegated to the District or Headquarters (HQ) level, along with the lowest level of sub-delegation authorized.

Reference (Statutory, WBS, Director's Policy, Deputy Directive, etc.)	**RW Manual Section**	**Responsibility**	**Delegation**	**Lowest Level of Sub-Delegation**
	5.03.01.00	Approval of Hardship Acquisitions	District	Supervising RW Agent
	5.04.01.00	Approval of Protection Acquisitions	District	Supervising RW Agent

6.01.00.00 – GENERAL

6.01.01.00 Function and Responsibility

Land surveying is the art and science of determining the location of points and features on or near the surface of the earth. In transportation engineering, surveying provides the foundation and continuity for the design, property acquisition, and construction of capital projects. The Surveys function of transportation engineering consists of Field Surveys, Office Surveys, and Right of Way (R/W) Engineering.

For more information on the Surveys functions, see Chapter 1 of the Caltrans Surveys Manual.

R/W Engineering represents the boundary determination phase of the Surveys function. They are responsible for the preparation of maps, documents and legal descriptions for the acquisition and disposal of rights of way, and the preparation, maintenance and update of record maps of the highway right of way and other Caltrans properties.

6.01.02.00 Organization

R/W Engineering maintains its headquarters (HQ) in Sacramento within the Office of Land Surveys, which is a part of the Division of Right of Way and Land Surveys. The organizational structure of the Surveys function varies throughout the state and may reside under the reporting structure of the Division of Design, Construction, Project Delivery, or Right of Way. Regardless of hierarchy within Caltrans, this chapter is meant to establish uniform policies and procedures and provide background information for the R/W Engineering function.

HQ R/W Engineering is responsible for coordination of statewide R/W Engineering efforts, including updates and revisions for this chapter, Chapter 4 of the Plans Preparation Manual (PPM), and support of the Surveys Manual. To foster consistent and standardized interpretations of this manual and the R/W Engineering function, all questions or conflicts should be directed to the Chief, HQ R/W Engineering.

The headquarters (HQ) Division of Right of Way and Land Surveys also maintains an internet webpage.

© 1994-2025 California Department of Transportation. All rights reserved.

6.01.02.01 District Procedures

Districts may have a defined procedure to perform essential tasks associated with a Surveys function. Any agency or contractor working with a District is responsible for following current local District procedures, including the use of local manuals as long as they do not conflict with those published by HQ (this or any other Caltrans manual).

6.01.03.00 Knowledge, Skills and Abilities

R/W Engineering is a technical function that requires basic knowledge, skills and abilities in the field of land surveying, including the fundamentals of surveying, mapping, mathematics, and basic science.

To be considered fully qualified to perform all functions of R/W Engineering, an individual must possess a license to practice Land Surveying in the State of California and have demonstrated the appropriate levels of knowledge, experience, and education in the following areas:

- Boundary determination principles and procedures
- Mapping principles and procedures
- Legal description principles and procedures
- Caltrans R/W Engineering policies and procedures
- Coordinate Geometry (COGO) software
- Computer Aided Drafting and Design (CADD) software
- California Law including:
  - Business and Professions Code
  - Civil Code
  - Code of Civil Procedure
  - Code of Regulations
  - Government Code
  - Harbors and Navigation Code
  - Public Resources Code
  - Streets and Highways Code

6.01.03.01 Transportation Surveyor Series

Minimal requirements for entrance into the R/W Engineering function through the Transportation Surveyor series include graduation from a four-year curriculum in surveying, surveying engineering or related field, or possession of a valid certificate as a Land Surveyor in Training (LSIT) issued or accepted by the California Board for Professional Engineers, Land Surveyors, and Geologists or an equivalent certificate.

© 1994-2025 California Department of Transportation. All rights reserved.

An LSIT is the first step required under California law toward becoming a licensed Professional Land Surveyor (Section 8741 of the Business and Professions Code [BPC]).

Qualifications as a licensed Professional Land Surveyor or equivalent include thorough familiarity with the procedure and rules governing the survey of public lands as set forth in the Manual of Surveying Instructions (2009) published by the Bureau of Land Management and thorough familiarity with the principles of real property relative to boundaries and conveyance.

For more information on the Transportation Surveyor Series, contact the California Department of Human Resources.

For more information on the rules and regulations of the Professional Land Surveyor, see BPC Section 8700, et seq., also known as the Land Surveyors' Act.

6.01.03.02 Training

Caltrans encourages its employees to take advantage of every training opportunity. Supervisors are responsible for determining the training needs of their employees and developing a training plan. Those needs are then communicated to the District Training Coordinator and HQ Office of Land Surveys Training Coordinator to assist with budgeting and planning purposes. The employee is ultimately responsible for their own personal and professional development.

6.01.04.00 Project Process

R/W Engineering work for project delivery begins with the collection of information necessary to determine the location of boundary lines and property rights. It continues through preparation and delivery of maps, documents and legal descriptions to the R/W functions, including the appraisal, acquisition, and condemnation functions. It ends with relinquishment and vacation of legislative deletions, superseded highways and collateral facilities, disposal of excess lands, and in cooperation with the Surveys Office, preparation of Record of Survey Maps (monumentation maps) as required by State Law.

© 1994-2025 California Department of Transportation. All rights reserved.

6.01.04.01 Work Breakdown Structure

The Division of Project Management developed the Work Breakdown Structure to help improve and track deliverables and activities associated with a typical project.

For more information on the Work Breakdown Structure, see the current Workplan Standards Guide for the Delivery of Capital Projects.

6.01.05.00 R/W Engineering Mapping

R/W Engineering prepares many types of mapping products necessary for the acquisition and disposal of rights of way. They are described further in this chapter. The requirements for these mapping products can be found in PPM Chapter 4:

	Reference to PPM
General Mapping Standards	Section 4-1
Cost Estimate Mapping	Section 4-2
Right of Way Hardship Map	Section 4-3
Right of Way Protection Map	Section 4-4
Right of Way Appraisal Map	Section 4-5
Federal Lands Application Maps	Section 4-6
Map Application for State Sovereign Lands	Section 4-7
Resolution of Necessity Map	Section 4-8
Court Exhibit Map	Section 4-9
Director's Deed Maps	Section 4-10
Transfer of Jurisdiction Map	Section 4-11
Right of Way Record Map	Section 4-12
Relinquishment Maps	Section 4-13
Vacation Map	Section 4-14
Freeway Lease Area Map (FLA)	Section 4-15
Right of Way Map Files	Section 4-16

It is important to be aware of the end user for any mapping product. Maps should be created so that they are easy to read and clearly provide the information for which it was intended. Excess information can diminish the impact of a mapping product.

For electronic mapping (CADD) standards, see the CADD Users Manual published by the Division of Design.

© 1994-2025 California Department of Transportation. All rights reserved.

6.01.05.01 Visualization in Mapping

Advanced technology has made it easier to provide visualization to a project in support of our R/W counterparts. Visualization may include background aerial imagery and/or rendering of a project site or go beyond traditional mapping and include video-based fly-through of a project and more.

These visualization products may be used for court appearances, local agency/public meetings or simply as a discussion tool between the R/W Agent and property owner. When additional mapping is required that goes beyond the standard products used by R/W, the following information should be included:

- Source of the data: Caltrans Aerial Photography, Google Maps, Bing Maps, etc.
- Source Date: Google Maps 2010, etc.
- Accuracy disclaimer: *The [include type of visualization] has been provided for visualization use only and is not to be used for design or survey measurements. Usage of [include source] does not constitute endorsement, expressed or implied, by Caltrans.*

Techniques for visualization will not be prescribed, so as not to limit the user to what is or may be available through our changing technology.

It is important, when using external data, not to use copyrighted material without written permission from the copyright holder.

6.01.05.02 Subdivision Map Act

The acquisition and disposal of lands for the purpose of State transportation projects can result in a physical subdivision of the parcel in question. Section 66410, et seq., of the Government Code, known as the Subdivision Map Act (SMA), governs the subdivision of land for the purpose of sale, leasing or financing.

The SMA provides for local control over development. Caltrans is not subject to local control, but our actions can impact the property owners we acquire from or sell to.

Caltrans is not required to produce Subdivision or Parcel maps or provide for a Certificate of Compliance. R/W has the capacity to compensate for the costs that the owner may incur to comply with the SMA.

© 1994-2025 California Department of Transportation. All rights reserved.

6.01.06.00 R/W Engineering Documents

It is the function of R/W Engineering to prepare legal descriptions and other documents necessary for the acquisition and disposal of real property.

6.01.06.01 Document Types

There are four basic types of documents used by Caltrans. They include the following:

- Acquisition – Used when rights and title pass to the State (grant deed, easement deed, quitclaim deed, indenture deed). For additional information on Acquisition Documents, see Section 6.09.00.00 of this manual.

- Supporting – Used to clear liens, leases, deeds of trusts, etc. These documents are used to extinguish or subordinate a prior right. R/W Engineering may be asked to provide a written legal description describing the real property to be attached to the supporting document. For additional information on Supporting Documents, see Section 6.09.00.00 of this manual.

- Condemnation – The State exercises the power of eminent domain to acquire property for public use. For more information on Condemnation Documents, see Section 6.11.00.00 of this manual.

- Director's Deeds – The State conveys property or property rights to others. For more information on Director's Deeds, see Section 6.15.00.00 of this manual.

Standard document templates (previously called document forms) exist for each type of document described above.

For specific information on document templates, including policies and procedures regarding their use, see applicable sections of this chapter.

© 1994-2025 California Department of Transportation. All rights reserved.

6.01.07.00 Title Reports

A Title Report is a written analysis of the status of title to a real property, including property description, names of titleholders and how title is held, tax rate, encumbrances and real property taxes due.

R/W Engineering uses title reports in a variety of ways including the preparation of the following:

- Land-Net Maps
- Legal Descriptions for Deeds
- Resolutions of Necessity descriptions and maps

For more information on Title Reports, see Section 8.65.02.00 of this manual.

6.01.08.00 Expert Witness

On occasion, licensed personnel assigned to R/W Engineering may be called upon to testify in court proceedings. Those acting as an expert witness should be prepared prior to the court appearance or deposition. During the proceedings, the expert witness acts as a representative of Caltrans and will at all times be courteous and respectful to the court.

R/W Engineering staff will assist the Legal Division on all matters related to R/W Engineering.

© 1994-2025 California Department of Transportation. All rights reserved.

6.02.00.00 – OWNERSHIPS, PARCELS, SUBPARCELS

6.02.01.00 General

To identify parcels of real property impacted by a highway project, a unique numbering sequence is assigned. Assignment of parcel numbers is completed by R/W Engineering and is based on early evaluation of project need.

To allow for early estimates of the work involved for a project, the number of parcels impacting a project will equal the number of ownerships.

6.02.02.00 Definitions

Underlying Fee: that portion of an ownership that is encumbered by a public road easement. (This definition does not differentiate between record or non-record easements.)

6.02.02.01 Ownership

An ownership is any area of land that meets all of the following requirements:

- unity of title.
- a single perimeter.
- not separated by a city street or alley, county road, or State highway (fee, easement or prescriptive right).
- totally within one Right of Way (R/W) Expenditure Authorization/Project Identification Number.

Specific exceptions to definitions of ownership are:

- *Government Agencies* – Properties under jurisdiction of separate agencies of the same governmental body will be considered separate ownerships.
- *Long-Term Leases* – Where property is historically or customarily developed on the basis of long-term leases, i.e., subdivisions in the Irvine Ranch, where the leaseholds will be considered as separate ownerships. The term is generally considered to be over ten years.
- *Permits for Homesites on Federal Land* – Rights of occupancy in National Forests or National Park Lands, as covered in Section 104.4 of

© 1994-2025 California Department of Transportation. All rights reserved.

the Streets and Highways Code, will be considered as separate ownerships.

- *Undeveloped Subdivisions* – If a vesting is in a subdivision or tract in which the roads have not been improved or in which lots have not been sold individually, the streets and alleys within the subdivision will not be considered as dividing ownership.

NOTE: Lands held by or for individual Indians or Tribes under the various classes of Indian Lands, as defined by the Bureau of Indian Affairs, constitute a separate ownership.

For more information on Indian Lands, see Sections 6.13.00.00 and 8.20.00.00 of this manual.

6.02.02.02 Parcel

A parcel is all of the rights and interests from an ownership, as defined above (Section 6.02.02.01), which are required for certification of the project and which will be acquired by condemnation, if negotiations are unsuccessful. Excluded from the condemnation requirement are certain public lands which by law or policy will not or cannot be condemned but would be, if otherwise permitted. It should be recognized that "parcel," as defined in Caltrans' agreements with title companies, differs considerably from "parcel" as defined in this Section and is used only as a basis of paying for title company services.

Parcel identification will not affect existing practice of dividing or combining land areas for condemnation resolution or trial purposes.

For more information on Condemnations, see Section 6.11.00.00 of this manual.

6.02.02.03 Subparcel

A subparcel is each additional separate interest or degree of title of a parcel. It is the intent of the definition of the term "subparcel" that it applies only where two or more areas or interests are required by the State from an ownership. Subparcel does not apply to encumbrances that must be eliminated to perfect title.

© 1994-2025 California Department of Transportation. All rights reserved.

A. The following are examples of subparcels:

1. Non-contiguous areas of fee, within the same ownership, required by the State.

2. Permanent or temporary easements for highway purposes such as slope, drainage, scenic, retaining wall, detour, or construction easements.

3. Fee, permanent easements, and temporary easements, to be appraised or acquired in the name of the State or in the name of a third party for exchange purposes or under cooperative agreement. This includes acquisitions for sewer, storm drain, gas, water, electricity, pipeline, or ingress and egress.

4. Access rights when described separately from other right of way requirements. This primarily applies when acquiring access rights only or when a "together with access rights" clause will not obtain sufficient rights.

B. The following are examples of interests that are *NOT* subparcels:

1. Excess land.

2. Remainders.

3. A separate use or zoning.

4. Interests in property that consist of encumbrances that must be cleared, such as overlying easements of an adjoining property owner, a lease, a utility easement, a mining claim, a mortgage, or a deed of trust.

5. Oil and mineral rights.

6. Permits to enter and construct (rights that would not be condemned).

7. Appurtenant easements.

8. Underlying fee in a public road. (It may be described as a separate subparcel in Resolutions of Necessity.)

9. An option of all or a portion of a parcel.

© 1994-2025 California Department of Transportation. All rights reserved.

For more information on Supporting Documents, see Section 6.09.00.00 of this manual.

6.02.03.00 Numbering

Examples of parcel, subparcel, excess lands, and encumbrance numbering can be found in Exhibit 06-EX-01 of this manual.

6.02.03.01 Ownership

When it is determined that property rights will be required from an ownership, an identifying number will be assigned. The number assigned can then be used in the early stages of project development. Preliminary mapping, hard copies or base maps, title report orders, files, correspondence, and property surveys will carry this assigned number prior to the time right of way requirements are established.

An ownership having only appurtenant rights, lying within Caltrans' right of way requirements, will be assigned a parcel number when a separate title report, appraisal and escrow are required. Otherwise, appurtenant rights will be considered as an encumbrance on the servient tenement (Section 803, et seq., of the Civil Code). Determination of requirements affecting appurtenant rights normally occurs in the appraisal stage. It is the responsibility of the Appraisal function to initiate necessary action to establish such requirements as parcels.

6.02.03.02 Parcel

Each primary right of way requirement shall have the identical number as the ownership of which it is all or a portion and shall have the suffix "-1" added; e.g., 12345-1.

6.02.03.03 Subparcel

Each secondary right of way requirement, or subparcel, shall have the identical number as the ownership of which it is all or a portion and shall have a suffix beginning with "-2" and increase in number sequentially; e.g., 12345-2; 12345-3.

© 1994-2025 California Department of Transportation. All rights reserved.

6.02.03.04 Non-Right of Way Parcels

Properties required for office buildings, shops, maintenance station sites, mitigation sites, park and ride sites, disposal, and material sites follow the same rules of numbering as for right of way requirements.

6.02.03.05 Cancellations

If any parcel or subparcel is no longer required, its number should be canceled and not reused. The Division of Right of Way (HQ) shall be advised by memorandum if the parcel or subparcel is included in an appraisal which has been submitted to HQ. Said memorandum is the responsibility of the Appraisal function.

6.02.03.06 Additional Requirements

A parcel is closed upon recordation of the basic acquisition document. Additional right of way requirements from an ownership after the parcel is closed require the assignment of a new ownership number and treatment as a new acquisition.

6.02.03.07 Ownership Splits

When an ownership is divided by sale in such a manner that the parcel is split, the remainder of the ownership will retain the original number. The parcel from the new ownership created by the split will be assigned a new number. An ownership split is created when a portion is covered by a valid contract of sale.

6.02.03.08 Ownership Mergers

No change in numbering will be made when a merger of ownerships is discovered after transmittal of final appraisal maps from R/W Engineering to the Appraisals function when used in the initial appraisal of the parcel. If a merger of ownerships is discovered prior to the transmittal, the new ownership will assume one of the previously assigned numbers and R/W Engineering will cancel the other number.

© 1994-2025 California Department of Transportation. All rights reserved.

6.02.03.09 Combining Parcels for Appraisals and Acquisition

In certain cases when two or more parcels, as previously defined, are in one vesting, it will be desirable to appraise and acquire them together. In such cases, the "larger parcel" concept will apply, and the parcels will be combined for appraisal, considering the unity of use, unity of title and contiguity. However, the parcels will retain their identity and numbers in the appraisal and throughout the acquisition process.

When parcels are grouped for appraisal purposes, the lowest parcel number will be used as a primary number and the other parcel numbers placed in parentheses as a suffix to the primary number; e.g., 9053-1 (9054-1, 9055-1, 9060-1, etc.).

6.02.04.00 Excess Land Numbering

Excess land parcels shall be identified, numbered and shown on the appraisal map or R/W record map at the earliest possible date. R/W record maps, appraisal maps, and all excess land mapping shall show up-to-date excess land parcel numbers. R/W Engineering shall take the initiative on coordinating identification of excess with other R/W functions and Design so mapping changes can be kept to a minimum.

For more information on Excess Lands, see Chapter 16 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.02.04.01 Parcel Numbers

Excess land parcel numbers consist of a maximum six-digit alpha/numeric ownership number (parent parcel number), a two-digit unit number, and a two-digit item number; e.g., 012345-01-01. (All new ownership numbers shall be numeric.) The total excess land parcel number must be unique in each District.

Excess land parcel numbers consist of three parts:

1. Parent Parcel Number (Ownership Number): The parent parcel number is the ownership number as defined in Section 6.02.03.01 of this manual.

2. Unit Number: The unit number is always a two-digit number (01-99) and designates individual fee excess land parcels acquired from the same ownership. The first, or a single excess land unit, is number 01, additional units being 02, 03, etc. An alpha unit number now in the Excess Land Inventory need not be changed to numbers, but new unit numbers must be numeric.

3. Item Number: The item number is the numeric (01-99) designation of each conveyance out of an excess land unit.

See Exhibit 06-EX-01 of this manual for examples demonstrating various parcel numbering situations. This parcel numbering shall appear on appraisal maps, record maps, and all excess land mapping. "*REMAINDER*" is shown on some of the examples to indicate remainders. This does not need to be shown on the actual mapping.

6.02.04.02 Non-Inventory Parcels

Non-inventory parcels are specifically defined and include the following:

A. Excess lands which the Department intends to convey to a specific entity, including those:
    1. under the terms of a written agreement with that entity.
    2. identified as excess when acquired.
    3. identified after acquisition.

B. All decertified access rights, provided no other property rights are involved.

© 1994-2025 California Department of Transportation. All rights reserved.

Examples of non-inventory parcels of excess lands include:

A. Parcels acquired exclusively for exchange pursuant to an executed written agreement.

B. Parcels acquired exclusively for replacement or replenishment housing facilities.

C. Property rights to be conveyed pursuant to an executed utility agreement for facility relocations.

D. Property rights, including underlying fee in local streets, which are to be conveyed to a local agency under terms of a freeway and/or cooperative agreement.

E. All decertified access rights where no other property rights are involved.

F. Property specifically acquired for another agency under terms of a written agreement.

Numbering of Non-Inventory excess parcels on Deeds and Record Maps:

Parcel # Before Disposal	ELMS Number	Director Deed (DD) #	DD # Posted on Record Map
12345	012345-XX-XX	DK 12345 (012345-XX-XX)	DK 12345
12345-1	012345-X1-XX	DK 12345-1 (012345-X1-XX)	DK 12345-1
1234A	01234A-XX-XX	DD 1234A (01234A-XX-XX	DD 1234A
12345-A	012345-XA-XX	DE 12345-A (012345-XA-XX)	DE 12345-A
1234-2A	001234-2A-XX	DD 1234-2A (001234-2A-XX)	DD 1234-2A
12345-12	012345-12-XX	DE 12345-12 (012345-12-XX)	DE 12345-12

© 1994-2025 California Department of Transportation. All rights reserved.

NOTES:

- To number disposal unit with both non-inventory and inventory excess, use the same numbering procedure above, except use "9's" instead of "X's" as fillers. This will allow the lowest inventory parcel number to always be the key parcel.
- On non-inventory deeds, both the original parcel number and the computer parcel number are entered for cross-referencing purposes.
- ELMS – Excess Land Management System. For more information on ELMS, see Section 16.02.01.00 of this manual.

6.02.04.03 Cross-Reference Parcel Number

When an existing excess land parcel number is not compatible with the 10-digit excess parcel number system, the old number (up to 15 spaces; i.e., 012345-1.2a equals 11 spaces) may be entered into the computer on the Inventory Data Form as the "cross-reference parcel number." A "new" number, i.e., XXXXX, will be entered in the parent parcel number field with the appropriate unit and item numbers. This "new" or "dummy" number shall be entered on the R/W record map and on the Director's Deed map and document.

6.02.04.04 Director's Deed Numbering

R/W record maps and maps accompanying Director's Deeds shall show both excess land numbers and Director's Deed numbers. The Director's Deed number is an excess land number preceded by a DD, DE, or DK, depending on the type of title being conveyed. "DD" is for conveyance of fee; "DE" is for conveyance of an easement; and "DK" is used for Director's Quitclaim Deeds. If two or more parcels of excess land are combined for a single conveyance, the Director's Deed will be numbered using the lowest excess land number. The lowest number will be in the header (See Section 6.09.03.01 of this manual), with an asterisk. The remaining parcel numbers will be marked with an asterisk and placed at the bottom of the front page. Parcel numbers which are not part of the Director's Deed should not be listed on the deed. All parcels included in the deed must be shown on the record map and Director's Deed map.

© 1994-2025 California Department of Transportation. All rights reserved.

6.03.00.00 – BOUNDARY DETERMINATION AND RIGHT OF WAY REQUIREMENTS

6.03.01.00 General

It is the responsibility of Right of Way (R/W) Engineering to establish or determine ownership boundaries within the project limits and to calculate areas of ownerships, right of way requirements, excesses, and remainders as the foundation for all R/W maps and legal descriptions.

6.03.01.01 Datums

The survey and design data provided to R/W Engineering will be based upon the California Coordinate System, except as provided for in Section 6.03.02.00 of this manual. The datum (NAD 1927 or NAD 1983), datum tag (adjustment), epoch, and zone upon which the project is based will be clearly identified on any R/W Engineering mapping, document, or legal description.

For more information on Survey Datums, see Chapter 4 of the Caltrans Surveys Manual.

For more information on the California Coordinate System, see Section 8801 of the Public Resources Code.

6.03.02.00 Boundary Determination

Property boundaries are to be established on the same datum as new right of way requirements for:

- Partial acquisition parcels.
- Total acquisitions with a boundary line coincident with the right of way line.
- Total acquisitions which include excess land.

The acquisition of land can be made either in whole (total acquisition) or part (partial acquisition), dependent upon project requirements.

Ownership boundaries shall be located from field survey data and record information in accordance with established survey practices and legal principles.

© 1994-2025 California Department of Transportation. All rights reserved.

The underlying fee in an abutting public road will be mapped as part of an ownership as previously defined. The principle of separation of ownerships by a public road applies even though the underlying fee is continuous in the abutting owner on both sides of a public road.

6.03.02.01 Total Acquisition

For total acquisitions located entirely within the new highway right of way, it is not necessary to coordinate ownership boundaries on the project datum unless an ownership boundary is to be coincident with a right of way line. It is sufficient to use record dimensions and area identified, unless substantial error exists in the record, in which case further investigation should be made to determine more precise boundary dimensions and area.

6.03.03.00 New Right of Way Requirements

New right of way requirements are defined as:

> *Any fee, easement, or other property right (either permanent or temporary) needed to certify the project, necessary for the operation and maintenance of the State Highway, or any fee, easement, or other property right required to replace rights impacted by the project.*

New right of way requirements are normally established in Project Development. R/W Engineering makes necessary calculations to tie new lines to existing ownership boundary and right of way lines. R/W Engineering shall review each Project Development submittal of right of way requirements to advise and make recommendations including:

- Inclusion of all necessary access restrictions.
- Elimination of any sliver takings from ownerships that may eliminate cost of unnecessary acquisition, and the new construction and facilities are within the new right of way limits.
- Incorporation within the right of way, any small ownership remainders that would otherwise become uneconomic remnants.
- Inclusion of any slivers or superseded highway within the new right of way requirements, thereby eliminating the need for future vacation investigation and proceedings.
- Any additional property rights that may need to be addressed.

It is Caltrans policy to acquire fee for operating right of way. Exceptions for freeway or expressway rights of way shall be obtained from the Region/District Division Chief of Right of Way. Region/District approval is not required for a

© 1994-2025 California Department of Transportation. All rights reserved.

lesser title from governmental agencies that routinely only give easements to Caltrans. Exceptions for conventional highway rights of way shall be obtained from the Region/District Division Chief of Right of Way.

It is also Caltrans policy to acquire all abutter's rights on freeways and expressways whenever practical. "DFA" type clauses (Appurtenant Rights including Access) should be used unless there is economic justification to take a lesser right. Exceptions must be approved by the Region/District Division Chief of Right of Way.

For more information on DFA clauses, see Section 6.10.03.00 of this manual.

6.03.04.00 Minor Design Changes

Discussions between R/W Engineering and the appropriate Project Development personnel and the Region/District R/W Office should be made for minor design changes.

6.03.05.00 Property Ties

It is the responsibility of R/W Engineering to:

- Initiate requests for property ties required to establish the location of property boundaries.
- Determine record locations of monuments affected by highway construction, including those that may be useful in establishing property boundaries.

Some sources of monument information include U.S. Government Surveys, Subdivision Maps, Records of Survey, and other monumentation placed by State, cities, counties, public utilities, and private surveyors.

R/W Engineering should make a thorough field review of the project area and determine if additional data is available that should be located in the field. R/W Engineering should closely coordinate its request for field survey with the Surveys function to accomplish the following:

- Allow the Surveys function sufficient time to properly schedule work.
- Make certain that requested surveys clearly identify information needed for boundary determination. R/W Engineering should include any maps, plats, description, or other information necessary to clearly identify such requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

- Field notes supplied by the Surveys function contain all information requested by R/W Engineering. Information requested that has been searched for and not found in the field shall be noted.
- Minimize requests for the Surveys function to make return trips to the field for additional information.

Note: It is advisable for R/W Engineering and the Surveys function to review the required monuments (to be tied) that are necessary for the project.

For more information on R/W Engineering record research and monumentation, see Chapter 10 of the Surveys Manual.

For more information on the Surveys function, see the Surveys Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.04.00.00 – COST ESTIMATE MAPS

6.04.01.00 General

Cost Estimate Maps are used to show the approximate right of way requirements for a project in advance of precise design requirements. Adequate lead time and quality of mapping submitted to Right of Way (R/W) are critical factors in producing valid R/W cost estimates. These maps are used for:

- Studying alternative route locations.
- Studying alternative design features.
- Producing cost estimates comprising of:
  - Land (ownership and area)
  - Improvements
  - Severance Damages
  - Special Benefits
  - Demolition
  - Relocation Assistance
  - Utility Relocation

The Headquarters Division of Design (Design) and Division of Right of Way and Land Surveys have determined it is Design's responsibility to obtain aerial mapping, mosaics, or as-built plans for all major projects and for minor projects if available, covering affected properties and showing all improvements. Existing mapping or as-built plans may be used for minor projects or rehabilitation and operational improvement type projects, but should be field reviewed by Design to determine if affected property improvements are accurately shown.

6.04.02.00 Process

Design transmits approximate proposed right of way requirements to R/W Engineering. R/W Engineering will use current assessor's parcel information to graphically show the limits and size of parcels and the areas of the proposed requirements. R/W Engineering will also provide the location of existing right of way lines and existing access control line information.

R/W Engineering will transmit the completed Cost Estimate Map(s) to R/W and Design.

© 1994-2025 California Department of Transportation. All rights reserved.

It is Design's responsibility to frequently review the project's right of way requirements to determine if substantive design changes have modified those requirements. Revised maps showing design changes should be prepared and resubmitted to R/W Engineering as required.

Requirements for Cost Estimate Mapping are described in Section 4-2 of the Plans Preparation Manual.

For additional information on Cost Estimates, see Section 4.01.08.00 of this manual, Chapter 20 of the Project Development Procedures Manual, and the Division of Design's Cost Estimating website (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

6.05.00.00 – HARDSHIP MAPS

6.05.01.00 General

Hardship Maps are prepared to show parcels for acquisition in advance of normal acquisition scheduling. Hardships occur when a proposed transportation facility creates an unusual personal circumstance that cannot be resolved without acquisition of the property by the State.

Hardship maps are used for:

A. Appraisal of the property.

B. Negotiations with the property owner.

C. As a base for a Resolution of Necessity Map, if necessary.

D. An interim R/W Record Map.

For more information on Hardship Acquisition, see Section 5.03.00.00 of this manual.

Requirements for Hardship Maps are described in Section 4-3 of the Plans Preparation Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.06.00.00 – PROTECTION MAPS

6.06.01.00 General

Protection Maps are prepared to show parcels proposed for advance acquisition to prevent development of the parcel. The maps are used for submittal to the California Transportation Commission when requesting approval to appraise and acquire. They are also used for the same reasons as Hardship Maps.

Requirements for Protection Maps are described in Section 4-4 of the Plans Preparation Manual.

For more information on Hardship Maps, see Section 6.05.00.00 of this manual.

For more information on Protection Acquisition, see Section 5.04.00.00 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.07.00.00 – APPRAISAL MAPS

6.07.01.00 General

The Appraisal Map is a visual tool that shows land and improvements *to be acquired* for transportation facility right of way and nonoperating right of way for a project. It is a working document that changes throughout the life of a project and provides an ongoing overview of the project and its relation to real property. It is used for:

- Location of and familiarization with a property and its relation to the project.
- Assistance in determining property value and severance damages.
- Appraisal reports.
- Certification.
- Utility relocations.
- Relocation and clearance of improvements.
- A base for additional mapping including court exhibits and final right of way maps.

Maps for parcel appraisals shall consist of Appraisal and Index Maps. Appraisal Maps should be of a suitable scale to adequately show areas to be acquired for right of way. Index Maps shall show the general location of appraisal parcels and right of way project limits, extent of large individual ownerships, and relationship of the proposed highway to other roads and streets which might provide access to properties under appraisal.

Requirements for Appraisal Maps are described in Section 4-5 of the Plans Preparation Manual.

For additional information on the appraisal process, see Chapter 7 of this manual.

For additional information on Project Development relating to Right of Way (R/W) Appraisal Maps, see Chapter 14, Section 2, Article 5 of the Project Development Procedures Manual (PDPM).

© 1994-2025 California Department of Transportation. All rights reserved.

6.07.02.00 Ownership Extension

A total holding in one vesting often extends beyond the limits of a single ownership from which right of way is required. Occasionally, the Appraisal function may determine that it is necessary to consider such extension of ownership in appraisal calculations. Upon request, R/W Engineering will calculate additional areas and delineate the additional areas on the Appraisal Maps. Such delineation of total vesting will not require any change in the original ownership number.

6.07.03.00 Railroads

R/W Engineering shall furnish Appraisal Maps (and legal descriptions as soon as available) to the District Railroad Agent at the same time the Appraisal Maps are sent to the Appraisal function. Maps furnished by R/W Engineering to the person responsible for railroad negotiations should only have the Railroad parcel(s) colored.

For additional information on the acquisition of railroads, see Chapter 18 of this manual.

6.07.04.00 Certificate of Sufficiency

R/W Engineering will initiate the Certificate of Sufficiency process by including an unsigned Certificate of Sufficiency document (with appropriate parcel numbers inserted) with the Appraisal Maps transmitted to the Project Engineer. A copy of the Appraisal Maps and Certificate of Sufficiency document will also be transmitted to the District Hazardous Waste Coordinator.

The Certificate of Sufficiency document and its process, including the HMDD process, are outlined in Exhibit 06-EX-06 of this manual.

For additional information on the acquisition of hazardous materials (including hazardous waste and contamination), see Sections 7.04.12.00 and 8.16.00.00 of this manual, PDPM Chapter 18, Standard Environmental Reference (SER) Volume 1, Chapter 10, and PD-02-R1.

© 1994-2025 California Department of Transportation. All rights reserved.

6.08.00.00 – LEGAL DESCRIPTIONS

6.08.01.00 General

A legal description is a written document used to describe a specific parcel of land. It can be further described as a group of words properly arranged to define a specific parcel of land to the exclusion of all others. Legal descriptions are used in all documents that convey and transfer land, or any interests in land, from one person to another, including: deeds, condemnation resolutions, waivers, quitclaims, etc. Interpretation of legal descriptions requires extensive knowledge of the rules of evidence and proper use of legal terms, ability to write clearly and concisely, an understanding of the effects of the description writing process on land titles, and the use of a rigorous mathematical checking procedure.

Right of Way (R/W) Engineering is responsible for providing the R/W function legal documents, including the legal description of a parcel necessary for project delivery. R/W Engineering acts in responsible charge as required by Section 8700, et seq., of the Business and Professions Code (BPC), also known as the Land Surveyors' Act, which designates the writing of legal descriptions as part of the practice of land surveying.

Effective legal descriptions describe the land to the exclusion of all other interpretations. It then becomes essential in the construction of the legal descriptions to use standard methods and terminology that can be upheld in a court of law.

The information presented in this section is not intended as a complete "how to," but as a guide to recommended formats, and methods, as well as specific requirements of writing legal descriptions for Caltrans. They do not apply to any requirements related to the actual documents used for the transfer of rights, title, and interest in real property. Acquisition Documents are discussed in Section 6.09.00.00 of this manual.

The ultimate responsibility of the written legal description falls on the person in responsible charge, as defined in BPC Sections 8726 and 8761.

© 1994-2025 California Department of Transportation. All rights reserved.

6.08.01.01 References

Caltrans has many resources available on the subject of writing legal descriptions. Contact the HQ Office of Land Surveys for available training opportunities.

There are many books available to the surveyor on the subject of legal descriptions. The most common are *Writing Legal Descriptions* by Gurdon H. Wattles, *Boundary Control and Legal Principles* by Curtis M. Brown, and *Clark on Surveying and Boundaries* by Walter Robillard. The listing of these books is not meant to be an endorsement of the author or publisher, but rather a resource.

6.08.02.00 Elements

Legal descriptions are generally comprised of the following elements:

- Preamble or Caption – an introductory statement which establishes the general location and/or the larger property of which the parcel described is a part.
- Body – contains the language which exactly locates the subject parcel/property.
- Qualifying Clauses – reservations, exceptions and conditions affecting the property.
- Supplemental Statements (Optional)

6.08.02.01 Preamble/Caption

A typical preamble or caption of a legal description includes an introductory statement that establishes the general location and/or the larger property of which the parcel described is a part.

All descriptions of easements must include the purpose of the easement in the caption:

"An easement for [utility, drainage, access, etc.] purposes in and to that portion of ..."

In some cases, such as public land descriptions, the Preamble and the Body may be combined.

© 1994-2025 California Department of Transportation. All rights reserved.

Where legal descriptions are written for Resolution of Necessity descriptions, the preamble is prefaced with a purpose statement that includes a type of title or interest:

> *"For highway purposes, that portion of …"*

A purpose statement is never used in a grant deed where the parcel will be acquired in fee, as it can be interpreted as describing an easement.

See Section 6.11.00.00 for more information on Resolutions of Necessity.

Drainage Easements
The following format shall be used when describing easements for drainage purposes:

> *"An easement for drainage purposes under, over, through, and across the following described land; together with the right to construct, operate, and maintain such facilities as necessary to effect the purpose of the easement."*

For subsurface only pipes, remove the word "over."

6.08.02.02 Body

There are many styles of legal description writing including metes and bounds, line or strip, inclusive or exclusive, etc. It is the responsibility of the licensed surveyor (in responsible charge) to utilize the best method of writing a legal description based upon the available evidence determined through diligent research and discovery (both written and physical).

6.08.02.03 Qualifying Clauses

Qualifying clauses, which include reservations, exceptions, and conditions affecting the property, are to be included in the framework of the deed. Any qualifying clause that affects the boundary, or has a location element, must be included within the Legal Description under the signature and seal of a person authorized to perform Land Surveying.

Section 6.10.00.00, Standard Clauses for Freeway Deeds, and Section 6.12.00.00, Standard Clauses for Freeway Condemnation, contain clauses that have been preapproved for use in Caltrans' deeds.

© 1994-2025 California Department of Transportation. All rights reserved.

6.08.02.04 Reservation

A reservation creates and retains a right or interest for the grantor in the parcel of land being described. Typically, the right or interest is in the form of an easement, e.g., access, utilities.

Third Party Reservations
Caltrans sometimes reserves easements directly to another entity, such as a utility company. The following is an example:

"Reserving unto Utopia Water District, an easement for water line purposes, described as follows:"

6.08.02.05 Exception

An exception eliminates from the description a portion of the property just described. By the use of an exception, the grantor holds back, or retains an existing right or interest.

6.08.02.06 Conditions

A condition can be expressed or implied. An expressed condition is clearly stated and embodied in specific definite terms. An implied condition is presumed by law based upon a particular transaction or what would be considered reasonable in a particular event. Conditions may be included within the deed, but are not typically part of the actual legal description.

Care must be taken when using conditional statements in legal descriptions or deeds. Conditions expressing a contractual nature are not to be used in the condemnation process.

6.08.02.07 Supplemental Statements

Supplemental statements are used to clarify elements of the legal description, but do not generally effect the validity of the description. Some examples are described below.

© 1994-2025 California Department of Transportation. All rights reserved.

California Coordinate System
Caltrans uses the following statement on all legal descriptions based on the California Coordinate System (year, epoch, zone, and combined factor are project specific):

> *"The bearings and distances used in the above description are on the California Coordinate System of 1983 (Epoch 1991.35), Zone 5. Divide the above distances by 0.99998735 to obtain ground level distances."*

For more information on Survey Datums, see Chapter 4 of the Surveys Manual.

Area Calculation
Caltrans generally does not use statements of area unless specifically requested to do so by the R/W or Legal functions. The following are examples:

> *"The above described parcel contains 17.25 acres, more or less."*

> *"Containing 12.56 acres, more or less."*

Assessor's Parcel Number
Do not use the Assessor's Parcel Number (APN) on legal descriptions unless specifically requested to do so. The APN refers to the parcel from which the acquisition occurs, so in future references will not apply to the land described in the legal description. APN numbers are also subject to change, rendering any reference to the APN in the legal description ineffective.

6.08.03.00 Curves

Caltrans uses curves based on arc length. Length of curves described in legal descriptions used for Caltrans acquisitions and disposals must state the arc length, not chord length.

Curves require that at least two elements be identified to properly define the curve. Caltrans requires three elements be used to define the curve. While any three distinct elements would be valid, it is recommended that descriptions of curves for Caltrans include:

- radius of curve
- delta of curve (central angle)
- length of curve (arc length)

When describing a curve in a legal description, additional elements must also be included to properly tie the curve element into the rest of the description.

© 1994-2025 California Department of Transportation. All rights reserved.

Caltrans generally uses orientation and direction as these additional elements. The tangent bearing may be used to define the orientation of the curve. This method will establish the orientation of the curve from either North or South, depending in which quadrant the tangent bearing falls. Use of the radial bearing, where the direction of the radial line goes from the radius point to the curve may also be used. Since Caltrans projects are linear in nature along a transportation corridor, left or right is used to define the direction of the curve. Use of the direction of concavity is also acceptable, but not preferred since it is not easily understood by Right of Way Agents and property owners.

When possible, the description of the new right of way line should follow the same direction as the corridor. This will also help the R/W Agents with their efforts.

Use of spiral curves in Legal descriptions, even if the project alignment contains spirals, shall only be used when reciting a course from a record document.

6.08.04.00 Acquiring Interests in Public Ways

Caltrans acquires sufficient title to existing public roads under Sections 83 and 233 of the Streets and Highways Code by including such areas within the boundaries of the State highway. Acquisition of local street or road rights of way, interests, and/or control in accordance with these Sections does not require an acquisition document (i.e., deed). When Caltrans acquires title in accordance with these Sections, it does not leave a clear chain of title in the official records.

It is not necessary for construction, operation, or maintenance of the State highways for Caltrans to acquire the underlying fee in existing public ways. To avoid leaving isolated parcels of fee ownership underlying the highway right of way, it is Caltrans' policy to acquire underlying fee interests along with parcels which abut public ways within the proposed right of way. The underlying fee will generally pass with an abutting ownership unless the method of description precludes its conveyance. It is desirable to include in descriptions appropriate wording to assure the acquisition of grantors' fee interest, if any, in and to the area of adjacent public ways that fall within the necessary right of way.

If the description is not written so the underlying fee will pass, the description should be followed with a clause such as:

> "Together with underlying fee interest if any, contiguous to the above-described property in and to the adjoining public way."

© 1994-2025 California Department of Transportation. All rights reserved.

The clause above should be modified as necessary to positively identify the underlying fee area or underlying interest intended to be acquired. For example, "adjoining public way" could be replaced by naming the street or road.

In most cases, title searches are not needed to determine actual ownership of the underlying interest or fee in public ways. Likewise, it will not be necessary to obtain title insurance on such underlying fee or interest acquired by Caltrans.

When acquiring title, rights, control, and interest to an existing public road using Section 83 and Section 233. Right of Way Engineering may also lead or support in the preparation of documents (i.e., deeds, exhibits, or maps), to assist the responsible division/branch with the communication of notice to the local controlling agency.

6.08.05.00 Licensing Requirements

A licensed land surveyor or civil engineer registered prior to January 1, 1982 is authorized to practice land surveying as defined in BPC Section 8726. It is a requirement that the person in responsible charge provides their signature, seal or stamp of their license, and the date of the signing or stamping on each legal description according to BPC Section 8761(d).

In order to ensure quality, all legal descriptions prepared by Right of Way Engineering, or by consultants providing Right of Way Engineering services to Caltrans, shall be stamped (or sealed) and signed by the person in responsible charge.

For a Resolution of Necessity (RON) package legal description, the stamp (or seal) and signature shall appear on a transmittal memo, as prescribed in RW Manual Section 6.11.02.00.

For legal descriptions in Director's Deeds and in Acquisition documents other than RON packages, one of the following two rules shall apply:

1) When describing a parcel which has been previously recorded as described, it shall be at the discretion of the person in responsible charge of the description as to whether the stamp (or seal) and signature shall appear at the end of the description or on a transmittal memo.
2) When describing a parcel which has NOT been previously recorded as described, the stamp (or seal) and signature shall appear at the end of the description.

© 1994-2025 California Department of Transportation. All rights reserved.

For an example of a standard Acquisition Deed Transmittal and an example of a standard Director's Deed Transmittal, see Exhibit 06-EX-02 in the RW Manual.

A memorandum dated December 22, 2009 (internal Caltrans link) by Malcolm Dougherty, Interim Deputy Director for Project Delivery, requires the inclusion of the expiration date of a license on the seal or stamp, though it is not required by State law.

The following examples show the approved format for Caltrans:

The attached real property description has been prepared by me, or under my direction, in conformance with the Professional Land Surveyors' Act.

6.09.00.00 – ACQUISITION DOCUMENTS

6.09.01.00 General

The acquisition of rights, title, or interests for right of way purposes typically includes a legal document in the form of a deed. Right of Way (R/W) Engineering will deliver the deed, accompanied by a legal description of the required areas to the Acquisition function.

In addition, R/W Engineering prepares documents used to clear various liens, easements, trusts, mortgages and other encumbrances affecting the land. Information relating to these encumbrances is normally shown in a title report.

Although the majority of documents prepared by R/W Engineering are executed by the Acquisition function, it is important to understand the elements of the document being prepared, including rights associated with various clauses and the reasons for which the document is being prepared. This will ensure that the best interest of the State is protected when any right, title, or interest to real property is acquired or disposed of.

For more information on the acquisition of real property, see Chapter 8 of this manual.

For more information on the disposal of real property, see Chapter 16 of this manual.

For more information on disposal documents, also known as Director's Deeds, see Section 6.15.00.00 of this manual.

6.09.01.01 Resources

The following list of resources relate to legal documents (in general) within this manual, regardless of its use for the acquisition or disposal of lands:

- Legal Descriptions – Section 6.08.00.00
- Title Reports – Section 8.65.00.00
- Example Legal Documents – Exhibit 06-EX-02
- Vesting Information and Signature Blocks – Exhibit 06-EX-08
- Standard Clauses for Freeway Deeds – Section 6.10.00.00
- Standard Clauses for Condemnation – Section 6.12.00.00
- Standard Clauses for Director's Deeds – Section 6.15.00.00

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.02.00 Deed Documents

Documents commonly used for the acquisition of land include Grant Deeds (Fee), Easement Deeds, Quitclaim Deeds, and Indentures. R/W, R/W Engineering, and Legal functions at Headquarters have reviewed these types of documents and have created standard templates containing minimal rights necessary for normal use. These documents have also been formatted to contain the minimal statutory requirements of a deed as set forth in Section 1091, et seq., of the Civil Code (CIV).

Situations will occur where it is necessary for these documents to be modified. Prior approval from the Deputy District Director of R/W and the Division of R/W and Land Surveys (HQ) is required when the template needs modification outside of the basic addition of standard clauses as described in Sections 6.10.00.00 and 6.12.00.00 of this manual. Requests for HQ approval must be initiated through the Chief, R/W Engineering in the HQ Office of Land Surveys.

6.09.02.01 Grant Deed

The most common type of deed is the Grant Deed. Grant Deeds are primarily used to transfer real property in fee (all rights, title, and interest of the property). However, a Grant Deed may be used to transfer a lesser right, title, or interest as long as the lesser degree is clearly stated. This will typically occur when combining multiple legal descriptions into one document.

A Grant Deed may be used for the acquisition of an entire ownership, or for the acquisition of only a portion of the ownership. These partial acquisitions comprise the majority of Caltrans efforts.

When acquiring a portion of an ownership (partial acquisition), a clause must be added to the document to indemnify the State from future damages to the remaining ownership. This clause is shown as the "DM-1 General Waiver" clause in Section 6.10.10.01 of this manual.

For an example of a standard Grant Deed, see Exhibit 06-EX-02 in this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.02.02 Easement Deed

An Easement Deed is used to acquire rights over real property (CIV Section 801, et seq.). In acquiring an easement, Caltrans becomes the owner of the dominant tenement and the owner of the land to which the easement is attached is said to hold the servient tenement (CIV Section 803).

Easements are specific and may only be used for the purpose stated in the document. It can range from access rights to utilities, and may include aerial structures, etc.

For an example of a standard Easement Deed, see Exhibit 06-EX-02 in this manual.

Caltrans has created several easement deeds for specific purposes. They are addressed below:

Highway Easement Deed
A Highway Easement Deed is a common document used to obtain a general easement for highway purposes. This document includes the "DM-2 General Waiver for Easement Deeds" Clause, as described in Section 6.10.10.02 of this manual.

For an example, see *Easement Deed – Highway* in Exhibit 06-EX-02 in this manual.

Additional Highway Easement Deeds have been created specifically for Federal Lands and are further described in Sections 6.13.03.01 and 6.13.03.02 of this manual.

Aerial Easement Deed
An Aerial Easement Deed is used to obtain aerial rights for highway purposes (e.g., bridges). This easement can be specified as either exclusive or non-exclusive and includes clauses specific to access for maintenance and construction, height restrictions, material storage, and more. This document includes the second clause of the "DM-2 General Waiver for Easement Deeds" Clause, as described in Section 6.10.10.02 of this manual, and the "DM-4 Reservation of Oil, Gas, Mineral or Water Rights, Etc." Clause, as described in Section 6.10.10.04 of this manual. When preparing this deed, consult latest Structure Policy Directive reference to "Material Storage Under Bridges."

For an example, see *Easement Deed – Aerial* in Exhibit 06-EX-02 in this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

Railroad Easement Deed
The Railroad Easement Deed is used to obtain aerial rights for highway purposes (e.g., bridges) on lands owned by railroads. This easement is similar to the Aerial Easement Deed, but also contains language specific to regional railroads (interstate lines), referencing Section 1240.510 of the Code of Civil Procedure, allowing for the condemnation of an entity for the good of the public.

This document includes a portion of the "DM-2 General Waiver for Easement Deeds" Clause, as described in Section 6.10.10.02 of this manual, along with language used for the protection of the railroad property. It is common for additions and modifications to be made to this document through negotiations with a railroad for any specific project. Therefore, this deed should be prepared in cooperation with the District Railroad Coordinator. The Easement Deed – Aerial can be used as a starting point or reference.

Due to the above-cited reasons, an example of the *Easement Deed – Railroad* has been removed from Exhibit 06-EX-02 of this manual.

Additional standard clauses for railroads are described in Chapter 18 in this manual.

Railroad easement deeds for at-grade crossings, Union Pacific Railroad, and Burlington Northern Santa Fe Railway can be obtained from the District Railroad Coordinator.

For more information on Railroads, see Chapter 18 in this manual.

6.09.02.03 Quitclaim Deed

Quitclaim Deeds are used as a release with the intent to convey any interest the grantor may have in the real property conveyed without a guarantee that the title is valid. They are often used when there appears to be a cloud on the title and to clear miscellaneous encumbrances.

For an example of a standard Quitclaim Deed, see Exhibit 06-EX-02 in this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.02.04 Miscellaneous Deeds

Some deeds do not necessarily fit into the deed document types mentioned above, but are common enough to have a "standard" that can be modified to fit its purpose. Included are Indenture Deeds and Correction Deeds.

Indenture Deed
The term *indenture* is generally defined as any deed, contract, or sealed agreement between two or more parties. At times, the acquisition of properties may include assistance with clearing of title, including liens and encumbrances.

For more information on title exceptions, see Section 8.04.00.00 of this manual.

Examples of available standard documents that may be used for clearing title include: Partial Reconveyance Under Trust Deed and Request for Partial Reconveyance. These examples can be found in Exhibit 06-EX-02 in this manual.

Correction Deed
A Correction Deed is used to revise a deed that has been recorded with errors in the legal description. It cannot be used if the correction would impose any additional burdens on the current fee owner of the real property, altering a right, title, or interest beyond what was originally executed.

A Correction Deed may not be necessary if real property or interest was passed to the State inadvertently or by mistake. Section 119 of the Streets and Highways Code authorizes the reconveyance by the State in this situation, where a Director's Deed would be used to reconvey the real property (see Section 6.15.00.00).

To fulfill the requirements of Section 27361.6 of the Government Code (GOV), the Correction Deed includes the following statement:

> "… *for the purpose of correcting the deed from* [enter name of Grantor on original deed] *to* [enter name of Grantee on original deed]*, recorded* [enter recording information on original deed, i.e., "in Book XX at Page XXX"; "as Document Number XX-XXXXX"], *Official Records of the County of* [enter name of county]*, State of California."*

For an example of a standard Correction Deed, see Exhibit 06-EX-02 in this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.03.00 Document Structure

All Caltrans legal documents are similar in structure in which they include a Header, Body, and Signature Page(s). They are defined in the following subsections.

6.09.03.01 Header

The Header of a legal document typically includes:

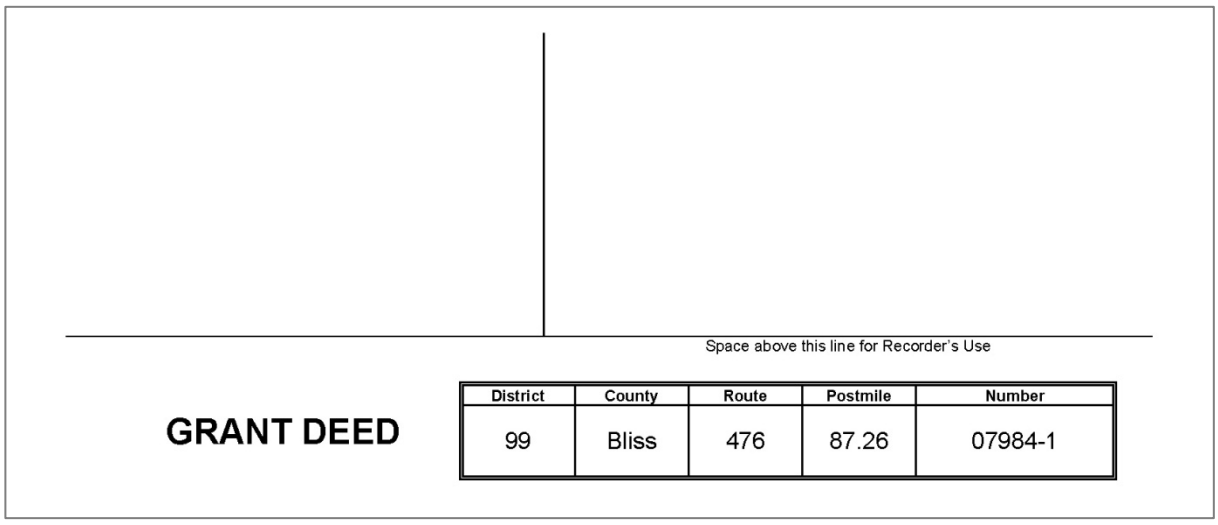
- An area reserved for the County Recorder (GOV Section 27361.6).
- Type of document (grant deed, easement deed, etc.).
- Identifying information unique to the real property for which the document refers to.

The identifying information is used internally as a reference to a specific project location and will include the District, County, Route, Postmile, and Document Number.

Typically, the Document Number is the same as the Parcel Number unless multiple parcels are included in the same document.

For additional information on Document Numbering, see Section 6.09.04.00 of this manual.

The following shows an example of the Header of a document:



© 1994-2025 California Department of Transportation. All rights reserved.

6.09.03.02 Body

The Body follows the Header of a legal document and includes:

- Vesting information describing all parties involved (e.g., Grantor, Grantee).
- A general purpose statement.
- A legal description of the real property.
- Clauses granting rights or other interests to the real property.

Vesting
For the purpose of this chapter, the term *vest* is defined as a right to title or ownership. Typically, Caltrans uses a Title Report to determine who and how a property is vested. This report is ordered through the R/W function from a title company.

To further clarify the parties involved with the legal document, the parties should be defined as either GRANTOR or GRANTEE. If Caltrans is named, the term STATE should be used. In the case of a condemnation, the term OWNER should be replaced for GRANTOR.

For more information on vesting information or title reports, see Sections 8.13.00.00 and 8.65.00.00 and Exhibit 06-EX-08 of this manual.

Purpose Statement
A general purpose statement allows the reader to quickly identify the basis for the legal document and can be described similarly as follows:

Grant – "…*hereby grants to*…"
Easement – "…*an easement for [enter type of easement], upon, over and across that real property*…"
Quitclaim – "… *hereby release and quitclaim to*…"

Legal Description
A legal description is a written document used to describe a specific parcel of land. It is the preferred method to reference the Legal Description on a separate exhibit.

For more information on Legal Descriptions, see Section 6.08.00.00 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

Clauses
Any interests into the real property can be made by way of adding a clause to a legal document. Several clauses have been previously approved by the R/W and Legal functions and can be found in Sections 6.10.00.00 and 6.12.00.00 of this manual.

Clauses that do not require a specific location be defined, such as indemnification clauses, or contractual clauses, should be kept separate from and not contained in the Legal Description.

Some clauses identify a party to a right and should be closely reviewed to ensure that the parties referred to in the clause match those for which it is intended.

For more information on Standard Clauses, see Sections 6.10.00.00 and 6.12.00.00 of this manual.

The following shows an example of a portion of the Header followed by the Body of a document:

GRANT DEED

District	County	Route	Postmile	Number
99	Bliss	476	87.26	07984

Aliquom Eu, LLC,
a limited liability corporation organized and existing under and by virtue of the laws of the State of Delaware,

hereinafter called GRANTOR, hereby grant(s) to the State of California, Department of Transportation, hereinafter called STATE, all that real property in the City of Total, County of Bliss, State of California, described as follows:

See Exhibit "A", attached.

GRANTOR further understands that the present intention of the STATE is to construct and maintain a public highway on the lands hereby conveyed in fee and the GRANTOR, for itself and its successors and assigns, hereby waives any claims for any and all damages to GRANTOR's remaining property contiguous to the property hereby conveyed by reason of the location, construction, landscaping or maintenance of said highway.

6.09.03.03 Signature Page(s)

The Signature Page(s) of a legal document follows the Body and contains an area for signatures and the date of signing, which are necessary to execute the document. The signatures must match the names (vesting ownership) as shown in the Body of the document.

© 1994-2025 California Department of Transportation. All rights reserved.

Although the Signature Page(s) can be described as an area for signatures and date of execution, it includes certificates of acknowledgments, statements of approval, and additional signatures, as necessary. These certificates and statements can be included on the form of the document or attached to the document. In general, Caltrans acquisition documents will always need the following:

- Certificate of Acknowledgment (see Section 6.09.05.01 of this manual).
- Certificate of Acceptance (see Section 6.09.05.02 of this manual).

For more information on vesting information and signatures, see Exhibit 06-EX-08 of this manual.

For more information on the execution of documents, see Sections 6.09.06.00 and 8.13.00.00 of this manual.

The following shows a sample of a portion of the Body followed by a Signature Page of a document:

GRANTOR further understands that the present intention of the STATE is to construct and maintain a public highway on the lands hereby conveyed in fee and the GRANTOR, for itself and its successors and assigns, hereby waives any claims for any and all damages to GRANTOR's remaining property contiguous to the property hereby conveyed by reason of the location, construction, landscaping or maintenance of the highway.

Dated: December 31, 2012

Aliquom Eu, LLC

By U. Iris Terrum
Member

By BEN E. TERRUM
Member

THIS IS TO CERTIFY, that the State of California, acting by and through the Department of Transportation (according to Section 27281 of the Government Code), accepts for public purposes the real property described in this deed and consents to its recordation.

Dated: January 3, 2013

Malcolm Dougherty
Director of Transportation

By J. B. Barrister
Attorney in Fact

NOTE: The above example includes a Certificate of Acceptance (Section 6.09.07.00) at the end of the document, which is signed *after* the Grantors have executed the document. This document will include a

© 1994-2025 California Department of Transportation. All rights reserved.

Certificate of Acknowledgment for each Grantor's signature (not shown), which is provided by a Notary Public.

6.09.04.00 Document Numbering

All deed documents contain a unique number within the header that correlates with the Parcel Number for which the document is written. There are two categories of deed documents: the Primary Document and the Supporting Document.

For more information on parcel numbering, see Section 6.02.02.00 of this manual.

6.09.04.01 Primary Documents

Primary documents include Grant Deeds and Easement Deeds. The document number used for a Primary Document is the same as the Parcel Number. For example, if the Parcel Number is 12345-1, the document number will also be 12345-1.

If more than one parcel is to be described in the document, the lowest number shall be used as the Primary Document Number, and the other numbers shall be enclosed in parentheses. For example: 12345-1 (12345-2, 12345-3). The same also applies if the document consists of parcels from different ownerships with the same vesting. Example: 12345-1 (12346-1).

If there are too many primary and other parcel numbers to fit them all in the header, then the primary number will be in the header, with an asterisk. The remaining parcel numbers will be marked with an asterisk and placed at the bottom of the front page.

6.09.04.02 Supporting Documents

Documents used to clear various liens, easements, trusts, mortgages and other encumbrances affecting the land are called supporting documents. Examples of types of documents that may be used for this purpose include Quitclaim Deeds, Partial Release of Trust Deed, and Partial Reconveyance Under Trust Deed.

Supporting documents use the primary document number with the addition of a letter suffix, beginning with "A" and going sequentially through the alphabet. For example: 12345-1A, 12345-1B, etc.

© 1994-2025 California Department of Transportation. All rights reserved.

When a supporting document applies to only one parcel of several parcels that were combined in a grant deed, the supporting document will carry only the parcel number involved with the appropriate suffix. For example: The grant deed is numbered 12345-1 (12345-2, 12345-3). A Quitclaim Deed (supporting document) covering only 12345-2 should be numbered 12345-2A.

When one supporting document applies to two or more parcels, the supporting document will carry the lowest parcel number with the appropriate suffix. The remaining parcel numbers with appropriate suffixes will be shown in parentheses following the assigned number. For example: 12345-1A (12346-1A, 12346-2A).

6.09.05.00 Certificates and Statements

The Signature Page includes the date of execution of the document along with the signature of the vesting ownership (Grantor). It also includes additional certificates and statements as required by law. They are described in the following subsections.

6.09.05.01 Acknowledgment

GOV Section 27287 requires that an executed document must be properly acknowledged before recordation. A notary public is commonly used to obtain a certificate of acknowledgment necessary to verify the identity of a person or persons executing the legal document. The commission of a notary public in California is regulated by the California Secretary of State.

In January 2015, R/W reaffirmed that it is the responsibility of the Notary Public to provide the appropriate certificate of acknowledgment to be attached to the document being executed. R/W Engineering is no longer responsible for including it with the deed provided to R/W for execution.

For more information on Acknowledgments, see Section 8.14.00.00 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.05.02 Certificate of Acceptance

GOV Section 27281 states that any deed or grant that conveys any interest to a government agency must be accepted by that government agency in order for the deed or grant to be recorded. The acceptance of a deed or grant will be in the form of a certificate and should only be signed after the document has been executed and acknowledged by the Grantor.

The following statement should be used:

> *This is to certify that the State of California, acting by and through the Department of Transportation (according to Section 27281 of the Government Code), accepts for public purposes the real property described in this deed and consents to its recordation.*
>
> *Dated* _____ _____
> *Director of Transportation*
>
> *By* _____
> *Attorney in Fact*

6.09.05.03 Recordation

GOV Section 27383 provides for exemption of recorder fees for services to the State. The following statement may be included on legal documents:

> *This is to certify that this document is presented for recordation by the State of California under Government Code 27383 and is necessary to complete the chain of title to property acquired by the State of California.*
>
> *DISTRICT DIRECTOR*
>
> *By*_____

© 1994-2025 California Department of Transportation. All rights reserved.

6.09.06.00 Execution of Documents

The completion of steps required to legally formalize or execute a document is as important as the document itself. The Acquisition function typically executes legal documents by obtaining necessary signatures as described in Section 6.09.03.03 of this manual and processing the documents as required by law. It is good practice for R/W Engineering to be familiar with the execution of legal documents.

For more information on the execution of documents, see Section 8.13.00.00 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.00.00 – STANDARD CLAUSES FOR FREEWAY DEEDS

6.10.01.00 General

The clauses contained in this section are standard and have had prior approval by the Right of Way and Legal functions for use in Caltrans deeds. On occasion, standard acquisition documents may need modification to fit the needs of a highway project. Care must be made to ensure that appropriate rights and titles are acquired for the project situation. Any modifications to the approved clauses, other than those allowable within this manual, and any clauses created for specific circumstances must be initiated and approved by the Chief, Right of Way Engineering in the Office of Land Surveys in the Division of Right of Way and Land Surveys, who will ensure that appropriate legal review occurs.

For more information on Acquisition Documents, see Section 6.09.00.00 of this manual.

6.10.02.00 Classification of Clauses

For the purpose of acquiring access rights and abutter's other appurtenant rights on freeway and expressway projects, a series of clauses have been devised to obtain these rights under various conditions. They include the following:

"DF" Series – For access only
"DFA" Series – For appurtenant rights including access rights
"DFO" Series – For freeway and frontage road
"DM" Series – Miscellaneous

Other clauses have also been devised for specific circumstances and are shown under their own Sections. Aside from access clauses, these clauses may also be appropriate for use on conventional highways.

6.10.03.00 "DF" Series--Access Only

"DF" clauses acquire the abutting owner's rights of ingress to and egress from the freeway.

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.03.01 DF-1 Fee or Easement Deed

The DF-1 is the basic clause used to acquire access on fee or easement deeds:

> *"This conveyance is made for the purpose of a freeway and the GRANTOR hereby releases and relinquishes to the STATE any and all abutter's rights of access, appurtenant to GRANTOR's remaining property, in and to the freeway."*

If access rights are to be acquired on only a portion of the highway frontage, add a phrase describing the location of the access acquired, such as one of the following:

A. *" . . . over and across the westerly 510 feet of the southerly line of the parcel of land described above"*

B. *" . . . over and across courses '(2)' and '(4)' and the easterly 10 feet of course '(3)' described above"*

(In this case, courses in metes and bounds would be previously numbered.)

If the grantor will retain some access rights over a specific area, add a phrase describing the location of the access retained, such as one of the following:

C. *" . . . reserving, however, to the GRANTOR, its successors or assigns, the rights of access to the freeway over and across the following described lines:*

(Describe lines over which access is to be permitted)"

D. *" . . . reserving, however, to the GRANTOR, its successors or assigns, the right of way access through the opening to the freeway over and across the S.W. 15 feet of the N.E. 81.06 feet of the course described above as N. 45° 38' E., 121.23 feet and over and across the Southwesterly 12.50 feet of the course described above as N. 45° 38' E., 838.34 feet."*

© 1994-2025 California Department of Transportation. All rights reserved.

In case of adjoining cross streets which are to be closed and will not connect into the proposed freeway, add a phrase to the clause such as:

E. *"… over and across the northerly line of the above described parcel and also over and across that portion of the easterly prolongation of the northerly line included within the side lines of Smith Street, 60 feet wide, as Smith Street is shown on the map of Tract No. 211."*

6.10.03.02 DF-2 Fee or Easement Quitclaim Deed

The DF-2 clause is to be used for access on quitclaim deeds for either fee or easement:

"This quitclaim deed is made for the purpose of a freeway and the undersigned hereby releases and relinquishes to the STATE any and all abutter's rights of access, appurtenant to the remaining property in which the undersigned has some right, title or interest, in and to the freeway."

6.10.03.03 DF-3 Partial Reconveyance Under Trust Deed

The DF-3 clause is to be used for access on the Partial Reconveyance Under Trust Deed:

"This partial reconveyance is made for purposes of a freeway and TRUSTEE hereby reconveys without warranty, to the person or persons legally entitled thereto, any and all abutter's rights of access, appurtenant to the remaining property described in the Deed of Trust, in and to the freeway."

6.10.03.04 DF-4 Partial Release of Trust

The DF-4 clause is to be used for access on the Partial Release of Trust:

"This partial release is made for purposes of a freeway and TRUSTEE hereby releases from the lien of the Trust any and all abutter's rights of access, appurtenant to the remaining property described in the Trust, in and to the freeway."

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.03.05 DF-5 Conveying Property on One Side of Highway and Relinquishing Access Rights on Other Side

The DF-5 clause is to be added following DF-1 when conveying property on one side of highway and relinquishing access rights on the other side:

"The undersigned GRANTOR being the owner of the real property described as follows:

(Description)

do hereby release and relinquish to the STATE any and all abutter's rights of access appurtenant to the property, in and to the freeway."

6.10.03.06 DF-6 Conveyance of Access Rights--No Property Acquired

Where access rights only are being relinquished (no property acquired), the following clause "Relinquishment of Access Rights" shall be used:

"I (We), _____, being the owner(s) of the real property in the County of _____, State of California, described as:

(Description of grantor's property)

do hereby release and relinquish to the STATE any and all abutter's rights of access, appurtenant to the above described property, in and to the adjacent State highway right of way as described in deed recorded in Book _____, Page _____, of Official Records of the County of _____."

(NOTE: See notes following Clause DF-1 for acquisition of access rights on only a portion of highway frontage, etc.)

"This conveyance is made for the purpose of establishing the State highway by the STATE as a freeway and it is agreed that GRANTOR's above described property shall have no access thereto (except as above set forth)."

© 1994-2025 California Department of Transportation. All rights reserved.

"IN WITNESS WHEREOF, we have hereunto set our hands and seals this _____ day of _____, 20___.

_____Signed_____
_____Signed_____

Where access rights only are being relinquished from properties encumbered with deeds of trust and the subordination agreement is a separate document, the following clause "Subordination of Deed of Trust to Relinquishment of Access Rights" shall be used:

"For value received _____, Trustee(s), and _____ Beneficiary(ies) under that certain Deed of Trust executed by _____, dated _____ and recorded _____ in Book _____ at Page _____, Official Records of the County of _____, State of California, hereby agree(s) that a relinquishment of access rights as set forth in that certain instrument described as Relinquishment of Access Rights executed by _____, dated the _____ day of _____, 20___, and to be recorded concurrently herewith, shall be and remain paramount, prior and superior to, and forever bind the interests of the undersigned under the Deed of Trust for all purposes as fully as though the Relinquishment of Access Rights had been executed and delivered prior to the creation of the Deed of Trust and the latter made and accepted specifically subject and subordinate thereto."

"The undersigned, _____, Beneficiary(ies) under the Deed of Trust, hereby request(s) Trustee(s) thereunder to join in the execution hereof.

Dated this _____ day of _____, 20___.

_____
Beneficiary
By: _____
Trustee"

© 1994-2025 California Department of Transportation. All rights reserved.

Where access rights only are being relinquished from properties encumbered with mortgages and the subordination agreement is a separate document, the following clause "Subordination of Mortgage to Relinquishment of Access Rights" shall be used:

"For value received _____, Mortgagee under that certain Mortgage recorded _____ in Book _____, Page _____, of Official Records of _____ County, hereby agrees that a relinquishment of access rights as set forth in that certain instrument described as Relinquishment of Access Rights executed by _____, dated the _____ day of _____, 20___, and to be recorded concurrently herewith, shall be and remain paramount, prior and superior to and forever bind the interests of the undersigned under the mortgage for all purposes as fully as though the Relinquishment of Access Rights had been executed and delivered prior to the creation of the Mortgage and the latter made and accepted specifically subject and subordinate thereto.

Dated this _____ day of _____, 20___. _____
Mortgagee"

6.10.04.00 "DFA" Series--Appurtenant Rights Including Access Rights

The "DFA" clauses acquire any and all appurtenant rights, such as view, light, and air, together with abutter's access rights. However, these clauses are for general usage and must be checked for conformance with each particular situation. Where necessary, it is permissible to modify them to conform to special situations as may be necessary. The "DM" series of clauses may be used when a DFA-series access clause is also in the deed. See 6.10.10.01

For example situations of Freeway, Waiver, and Miscellaneous Clauses, see Exhibit 06-EX-03 in this manual.

6.10.04.01 DFA-1 Fee or Easement Deed

"This conveyance is made for the purpose of a freeway and the GRANTOR hereby releases and relinquishes to the STATE any and all abutter's rights including access rights, appurtenant to GRANTOR's remaining property, in and to the freeway.

© 1994-2025 California Department of Transportation. All rights reserved.

"Reserving however, unto GRANTOR, its successors or assigns, the right of access to the freeway over and across the following described lines:

(Description)"

NOTE: If no access is permitted, delete the portion of the above clause beginning with the word "Reserving."

The above clause lends itself readily to describing the permitted openings into the expressway as exceptions. However, for deed writing purposes, in those cases where it is more convenient or desirable to affirmatively describe the line over which access rights are to be relinquished, in addition to the relinquishment of the other appurtenant rights such as light, air, and view, the following alternate clause may be used:

DFA-1 Alternate Fee or Easement Deed

"This conveyance is made for the purposes of a freeway and the GRANTOR hereby releases and relinquishes to the STATE any and all abutter's rights of access, appurtenant to GRANTOR's remaining property, in and to the freeway over and across the westerly 510 feet of the southerly line of the above described parcel of land and over and across _____; also releases and relinquishes any and all other abutter's rights other than access appurtenant to the remaining property, in and to the freeway."

6.10.04.02 DFA-2 Fee or Easement Quitclaim Deed

"This quitclaim deed is made for the purposes of a freeway and the undersigned hereby releases and relinquishes to the STATE any and all abutter's rights, including access rights, appurtenant to the remaining property in which the undersigned has some right, title or interest, in and to the freeway."

6.10.04.03 DFA-3 Partial Reconveyance of Trust Deed

"This partial reconveyance is made for the purpose of a freeway and the TRUSTEE hereby reconveys, without warranty, to the person or persons legally entitled thereto, any and all abutter's rights, including access rights, appurtenant to the remaining property described in the Deed of Trust, in and to the freeway."

© 1994-2025 California Department of Transportation. All rights reserved.

NOTE: "Request for Partial Reconveyance" is to be used with "Partial Reconveyance Under Trust Deed (Fee)."

6.10.04.04 DFA-4 Partial Release of Trust

"This partial release is made for purposes of a freeway and the TRUSTEE hereby releases and relinquishes from the lien of the Trust any and all abutter's rights, including access rights, appurtenant to the remaining property described in the Trust, in and to the freeway."

6.10.05.00 "DFO" Series--Freeway and Frontage Road

"DFO" clauses are for freeways having a frontage road. They acquire all appurtenant rights together with abutter's access rights to the inner traffic lanes only of the freeway.

6.10.05.01 DFO-1 Fee or Easement Deed

"This conveyance is made for the purposes of a freeway and adjacent frontage road and the GRANTOR hereby releases and relinquishes to the STATE any and all abutter's rights including access rights appurtenant to GRANTOR's remaining property, in and to the freeway, provided, however, that such remaining property shall abut upon and have access to the frontage road which will be connected to the freeway only at such points as may be established by public authority."

If in certain cases access to the frontage road is to be restricted or made to a certain portion of the frontage along that road, insert after the words "have access" in the above clause the following:

"as hereinafter provided"

Then add a description of the permitted access at the end of the clause, such as:

"The right of access to the frontage road is hereby expressly limited to the westerly 201.36 feet of the above described course having a length of 639.41 feet."

NOTE: Any other appropriate description specifically defining the limits of access will be satisfactory.

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.05.02 DFO-2 Fee or Easement Quitclaim Deed

"This quitclaim deed is made for the purposes of a freeway and adjacent frontage road and the undersigned hereby releases and relinquishes to the STATE any and all abutter's rights, including access rights appurtenant to the remaining property in which the undersigned has some right, title or interest, in and to the freeway, provided, however, that such remaining property shall abut upon and have access to the frontage road which will be connected to the freeway only at such points as may be established by public authority."

6.10.05.03 DFO-3 Partial Reconveyance of Trust Deed

"This partial reconveyance is made for purposes of a freeway and adjacent frontage road and the TRUSTEE hereby reconveys without warranty, to the person or persons legally entitled thereto any and all abutter's rights, including access rights, appurtenant to the remaining property described in the Deed of Trust, in and to the freeway, provided, however, that such remaining property shall abut upon and have access to the frontage road which will be connected to the freeway only at such points as may be established by public authority."

6.10.05.04 DFO-4 Partial Release of Trust

"This partial release is made for purposes of a freeway and adjacent frontage road and TRUSTEE hereby releases and relinquishes from the lien of the Trust any and all abutter's rights, including access rights, appurtenant to the remaining property described in the Trust, in and to the freeway, provided, however, that such remaining property shall abut upon and have access to the frontage road which will be connected to the freeway only at such points as may be established by public authority."

6.10.06.00 Access Clause for Deeds from Railroads Applicable to Freeways and Expressways

6.10.06.01 For Union Pacific Railroad Grade Separation Projects

"This conveyance is made for the purpose of a highway grade separation and the railroad hereby releases and relinquishes to the STATE any and all abutter's rights of access in and to the traveled way within the limits of the property hereinabove described."

6.10.06.02 For Railroads Other Than Union Pacific Railroad Company

"This relinquishment of all abutter's rights of access is made subject to all of the existing private crossings over and across the areas described in this conveyance."

6.10.07.00 Temporary Access and Deferment Clauses for Deeds

The following subsections illustrate methods of reserving temporary access to owners and acquiring easements for temporary purposes due to highway construction. Other cases for allowing temporary access or for acquiring temporary highway interests in property will not differ greatly from the following subsections.

6.10.07.01 Vehicular Separation Construction Deferment Clause

"Reserving unto owners of abutting lands, their successors or assigns, the right of access to a temporary crossing of the freeway, at grade, to the county road known as Los Positas Road over and across the course described above as N. 63° 46' 23" E., 151.23 feet, until such time as the construction of a vehicular grade separation for the purpose of a crossing over the freeway, at which time the temporary crossing at grade shall be closed and such rights permitting access to the temporary crossing shall cease and terminate in the same manner as if never made."

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.07.02 Temporary Railroad Detour

"The above described parcel is to be used as a right of way for a railroad detour pending construction of a bridge separating the grades of the San Diego and Arizona Eastern Railway and the State highway at F Street, and the rights acquired therein shall terminate on (enter date) or upon the opening of the grade separation to traffic, whichever occurs first."

6.10.08.00 Reservation for Overhead and Underground Facilities

When the District finds that:

A. The acquisition of right of way is through proven operating oil or gas fields where the oil company has a long-term oil and gas lease which specifically provides the lessee has surface rights including the right to install pipelines, power lines, etc.,

OR

B. The oil company owns the land in fee whether the location be a proven or potential oil field,

the District must use the following reservation clause in deeds:

"ALSO reserving unto GRANTOR, its successors or assigns, the right from time to time to install, replace, repair, remove and maintain the following facilities subject to the conditions hereinafter continued: (a) underground facilities consisting of pipelines, electrical lines and conduits, together with appropriate housings therefore under and transversely across any portions of the lands herein conveyed; (b) overhead facilities consisting of electrical power and telephone lines over and transversely across any portions of the lands herein conveyed. The reserved rights shall be subject to the following provisions:

A. *The underground facilities shall be installed beneath the surface of any highway or other structure built, owned or maintained by the STATE on the lands. The overhead facilities shall be suspended over and across the lands by means of poles or towers situated on lands outside thereof.*

© 1994-2025 California Department of Transportation. All rights reserved.

B. *GRANTOR shall have no right of entry on the surface of the lands and shall exercise its rights over or under the lands in a manner consistent with public safety and the continued unobstructed use of the land for highway purposes.*

C. *Before installing or performing any work on its facilities as herein provided, GRANTOR agrees to obtain STATE's approval of the location of such facilities which approval shall not be unreasonably withheld."*

NOTE: The above clause shall not be used in deeds covering property in undeveloped oil or gas fields except in those cases where the oil company owns fee title. In many instances, the lessee's rights are solely subsurface rights. Therefore, before consenting to the use of this clause, examination should be made of the terms of the lease to ascertain the extent of the lessee's rights.

6.10.09.00 Oil, Gas and Mineral Reservations

In transactions involving oil companies where the company conveys its fee land or leasehold interest to the State for highway purposes, which conveyances involve only the upper 100 feet of subsurface, the following clause shall be used:

"EXCEPTING AND RESERVING THEREFROM, all oil, oil rights, natural gas, natural gas rights and other hydrocarbons, by whatsoever name known, and all other minerals and mineral rights, whether or not similar to those herein mentioned (including the right to drill, mine, explore and operate under and through the herein conveyed land for the purpose of extracting and producing oil, gas and other hydrocarbons by whatsoever name known, and all other minerals, whether or not similar to those herein mentioned, from other lands); provided that GRANTOR shall not drill, mine, explore or otherwise operate upon, in or through the land herein conveyed, in the exercise of any of the herein excepted and reserved rights, so long as the land is used for public highway purposes."

NOTE: In cases where the leasehold rights are not as broad as the rights set forth in this clause, it will be necessary to modify the clause to the extent it will be compatible to the leasehold rights.

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.10.00 "DM" Series--Miscellaneous

The following Sections involve miscellaneous clauses consisting of a general waiver clause, divided highway clause, temporary construction easement termination clause, reservation clause for mineral rights, and a clause restricting public access to private property.

In some cases, it may be desirable, if not necessary, to have a similar clause in subordinate instruments such as quitclaim deeds, releases of trusts, etc. Whenever the corresponding clause is contained in the fee or easement deed from the State's grantor, it will not be mandatory to insert the "DM" clause in subordinate instruments involving ordinary highway right of way acquisition.

6.10.10.01 DM-1 General Waiver for Deeds

> *"The GRANTOR further understands that the present intention of the STATE is to construct and maintain a public highway on the lands hereby conveyed and the GRANTOR, for itself and its successors and assigns, hereby waive any and all claims for damages to GRANTOR's remaining property contiguous to the property hereby conveyed by reason of the location, construction, landscaping or maintenance of the highway."*

NOTE: This clause should be used in all fee acquisition deeds except when the acquisition involves acquiring entire fee parcel of grantor's property.

6.10.10.02 DM-2 General Waiver for Easement Deeds

> *"The GRANTOR hereby further grants to STATE all trees, growths (growing or that may hereinafter grow) and road building materials within the right of way including the right to take water, together with the right to use same in such manner and at such location as the STATE may deem proper, needful or necessary for the construction, reconstruction, improvement or maintenance of the highway."*

NOTE: This clause is used in acquisition of all highway right of way easements, but should not be used for specific easements (e.g., slope, drainage, etc.).

© 1994-2025 California Department of Transportation. All rights reserved.

"The GRANTOR, for itself and its successors and assigns, hereby waive any and all claims for damages to GRANTOR's remaining property contiguous to the right of way conveyed by reason of the location, construction, landscaping or maintenance of the highway."

NOTE: This clause is used in acquisition of all highway right of way easements, and may also be used for specific easements (e.g., slope, drainage, etc.).

6.10.10.03 DM-3 Temporary Construction Easement (TCE) Termination

"Rights to the above described temporary easement shall cease and terminate on (date).
The rights may also be terminated prior to the above date by STATE upon notice to GRANTOR."

If the TCE is no longer needed prior to date shown, written notice will be sent by Right of Way to the owner stating the area is no longer needed by State.

If the document containing the clause(s) above is recorded, a Quitclaim deed will be required.

6.10.10.04 DM-4 Reservation of Oil, Gas, Mineral or Water Rights, Etc., in Favor of State's Grantor

This clause is for use in fee or easement condemnation parcels when it is desirable and necessary that mineral or oil rights be excepted to the owner or some other party having interest in the oil, such as where the owner has leased or sold a fractional part of the oil rights to others or for the right of way through proven or potential oil fields.

When it is advisable, water rights may also be excepted by inserting after the word "all" in the first line, the words "water, water rights."

The clause is as follows:

"Excepting therefrom all oil, oil rights, minerals, mineral rights, natural gas, natural gas rights, and other hydrocarbons by whatsoever name known that may be within or under the parcel of land hereinabove described, together with the perpetual right of drilling, mining, exploring and operating therefore and removing the same from the land or any other land, including the right to whipstock or directionally

© 1994-2025 California Department of Transportation. All rights reserved.

drill and mine from lands other than those hereinabove described, oil or gas wells, tunnels and shafts into, through or across the subsurface of the land hereinabove described, and to bottom such whipstock or directionally drilled wells, tunnels and shafts under and beneath or beyond the exterior limits thereof, and to redrill, retunnel, equip, maintain, repair, deepen and operate any such wells or mines, without, however, the right to drill, mine, explore and operate through the surface or the upper 100 feet of the subsurface of the land hereinabove described or otherwise in such manner as to endanger the safety of any highway that may be constructed on the lands."

NOTE:

1. When EXCESS LAND is being acquired, the use of the above clause, especially as to water rights, shall be thoroughly investigated to avoid jeopardizing the State's salable title for later return to private ownership.

2. It is essential that any effect on the MARKET VALUE be investigated prior to incorporating the above reservations in a deed to the State.

3. Modification of DM-4 will be made when used with railroad companies. Contact District Railroad Coordinator for current language.

6.10.10.05 DM-5 Restricting Public Access to Private Property

"The foregoing release and relinquishment of right of ingress and egress above set forth is not intended and shall not be construed to authorize any entry by the STATE, its successors or assigns, or the public onto the remaining property of the GRANTOR."

NOTE: This clause should be used only in those cases where the property owner or the property owner's attorney insists that the clause relinquishing ingress and egress rights can be interpreted to mean the clause also grants to the State, its agency or representative, the right to enter upon the remaining property of the grantor. Whenever this paragraph is used in a grant deed, it will be necessary to insert a similar clause in supporting documents such as a Partial Reconveyance Of Trust Deed, Release of Trust, Quitclaim Deed, etc.

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.10.06 DM-6 Landlocked Remainders

The following clause shall be used in the Deed in each case involving the retention of a landlocked remainder by a grantor. This clause may be revised if necessary to meet special situations.

"It is mutually understood and agreed that GRANTOR's remaining property is landlocked, and without any direct access to the freeway or to any public or private road, and GRANTOR hereby relieve STATE of any liability to provide access to the remaining landlocked property."

6.10.10.07 DM-7 Grantor is Executor of a Last Will and Testament, Administrator of an Estate, or Administrator with the Will Annexed

"This deed is executed pursuant to an order given and made by the Superior Court of the State of California, in and for the County of _____, on the _____ day of _____, 20___, in a proceeding therein pending entitled, 'In the Matter of the Estate of _____, deceased, and numbered _____, in the files and records of the court,' a certified copy of which order is recorded contemporaneously herewith in the Office of the County Recorder of the county, to which reference is hereby made."

NOTE: If a certified copy of the order has been previously recorded, give the recording data.

6.10.10.08 DM-8 Grantor is the Guardian of the Estate of a Minor

"This deed is executed pursuant to an order duly given and made by the Superior Court of the State of California, in and for the County of _____, on the _____ day of _____, 20___, in a proceeding therein pending entitled, 'In the Matter of the Guardianship of the Person and Estate of _____, a minor, and numbered _____, in the files and records of the court,' a certified copy of which order is recorded contemporaneously herewith in the Office of the County Recorder of the county, to which reference is hereby made."

© 1994-2025 California Department of Transportation. All rights reserved.

NOTE:

1. If a certified copy of the order has been previously recorded, give the recording data.

2. The portion of the above statement enclosed within quotes is a fairly standard form. A check should be made to see if the title report shows a different form, and the quoted portion amended to conform. For example, the title report might say "*In the Matter of the Guardianship of the Estate of Joe Doakes, a minor,*" leaving out the words "*Person and.*"

6.10.10.09 DM-9 Grantor is Guardian of the Estate of an Incompetent or Insane Person

"This deed is executed pursuant to an order duly given and made by the Superior Court of the State of California, in and for the County of _____, on the _____ day of _____, 20___, in a proceeding therein pending entitled, 'In the Matter of the Guardianship of the Estate of _____, an incompetent _____ and _____, an incompetent person _____, an insane person numbered _____, in the files and records of the court,' a certified copy of which order is recorded contemporaneously herewith in the Office of the County Recorder of the county, to which reference is hereby made."

NOTE:

1. If a certified copy of the order has been previously recorded, give the recording data.

2. The portion of the above statement enclosed within quotes is a fairly standard form. A check should be made to see if the title report shows a different form, and the quoted portion amended to conform. For example, the title report might say "*In the Matter of the Estate of Joe Doakes, an incompetent person,*" leaving out the words "*guardianship of the.*"

© 1994-2025 California Department of Transportation. All rights reserved.

6.10.11.00 Actual Possession

This clause is used when the State has taken actual possession under a Right of Entry, Order for Possession, has the right to take possession under a Court Order for Possession, or acquired the property by negotiated purchase.

> *"The date of possession by STATE of the herein described property was _____."*

6.10.12.00 Slopes and Drainage Clauses

6.10.12.01 For Extension of Slopes and Drainage Structures Beyond Land Granted

On conventional highways, it has been found advantageous to secure the privilege and right to extend the embankment or excavation slopes and drainage structures on lands of the grantor beyond limits of side lines of the strip of land being granted. This is done using a clause similar to the following example:

> *"The undersigned hereby grants to the State of California, Department of Transportation, the privilege and right to extend and maintain drainage structures, 1:1 excavation slopes and 1-1/2:1 embankment slopes on the land of the undersigned beyond the limits of the above described 100-foot strip of land where required for the construction and maintenance of a 100-foot width of roadbed; also the privilege and right to plant and maintain grass, plants and trees on the slopes for the protection and beautification of same."*

NOTE: Whenever this clause is used in the deed, it will likewise be necessary to insert a similar clause in subordinate instruments such as a Partial Reconveyance of Trust Deed, Partial Release of Trust, Quitclaim Deed, etc.

6.10.12.02 For Right to Remove Slopes

The following clause is to be used primarily on conventional highways where the existing highway is being widened to its ultimate width of roadbed through fairly well-developed areas. Its use will be helpful in mitigating possible claims to damages where adjacent properties are zoned for commercial purposes. (Generally, this clause should not be used in agricultural areas or where the value of slope rights taken represents only a small consideration):

© 1994-2025 California Department of Transportation. All rights reserved.

"An easement for highway slopes in and to the following described parcel of land:

(Legal description of slope easement)

"Reserving unto GRANTOR of the above described parcel of land, their successors or assigns, the right at any time to remove such slopes or portions thereof upon removing the necessity for maintaining such slopes or portions thereof or upon providing in place thereof other adequate lateral support, the design and construction of which shall be first approved by the State of California, Department of Transportation, for the protection and support of the highway."

NOTE: When the slope easement is no longer necessary, the State may clear the easement from the public record by a Director's Deed quitclaiming the easement to the fee holder of the property.

6.10.13.00 Grade Change Waiver

The following clause is a sample for use where no land is being acquired but may be damaged by reason of change of grade:

"Edward L. Roberts, a single man, owner of _____ does hereby waive any and all claims for compensation against the State of California for any and all damages in any way resulting to the property by reason of the construction, maintenance and/or change of grade of _____ Street, provided the elevation of the proposed surface of the ground at the new street line fronting the property on _____ Street shall not exceed 0.7 feet below the present elevation of the ground thereat."

6.10.14.00 Deed Reservations for Irrigation Facilities

6.10.14.01 For Facilities 12 Inches in Diameter or Less and All High Pressure Lines

"Reserving, however, unto the GRANTOR, its successors and assigns, the right to install, replace, repair, remove and maintain a _____ irrigation pipeline transversely under the State highway at Engineer's Station _____. This underground facility shall be installed beneath the surface of the highway within a conduit to be constructed, owned

© 1994-2025 California Department of Transportation. All rights reserved.

and maintained by the STATE transversely across the State highway at (describe location)

"The rights reserved by the GRANTOR shall be subject to the following provisions:

A. *The GRANTOR's right to repair GRANTOR's facilities existing within the State owned right of way is limited to performing such maintenance and repair from outside the highway right of way. In no instance shall the GRANTOR have the right to traverse or use the highway right of way for maintenance or repair of GRANTOR's facilities without securing the issuance of a permit from the State, which approval shall not be unreasonably withheld."*

6.10.14.02 For Low Pressure Facilities in Excess of 12 Inches in Diameter

"Reserving, however, unto the GRANTOR, its successors and assigns, the right to install, replace, repair, remove and maintain a _____ irrigation pipeline transversely under the State highway at Engineer's Station _____.

"The rights reserved by the GRANTOR shall be subject to the following provisions:

A. *The GRANTOR's right to maintain and repair GRANTOR's facilities existing within the State-owned right of way is limited to performing such maintenance and repair from outside the highway right of way. In no instance shall the GRANTOR, in the exercise of the rights, traverse or use the highway right of way for maintenance or repair of GRANTOR's facilities without securing the issuance of a permit from the State, which approval shall not be unreasonably withheld."*

© 1994-2025 California Department of Transportation. All rights reserved.

6.11.00.00 – CONDEMNATION

6.11.01.00 General

When the State exercises the power of eminent domain to acquire property necessary for public use, it must do so through the process of condemnation as required by various sections of the Code of Civil Procedure (CCP) and the Streets and Highways Code (SHC). In order to proceed with the condemnation process, a Resolution of Necessity must be authorized by the California Transportation Commission (CTC) (CCP Section 1245.220 and SHC Section 103.5). Right of Way (R/W) works with the R/W Engineering and Design functions to provide documents necessary for a Resolution of Necessity (RON) package.

The requirements for a Resolution of Necessity can be found in CCP Section 1245.230.

For more information on the RON Process, see Chapter 28 of the Project Development Procedures Manual.

For more information on the Condemnation Process, see Chapter 9 of this manual.

6.11.02.00 Preparation

R/W will request R/W Engineering to prepare legal descriptions and maps for inclusion in the RON package, and other related condemnation documents. R/W is responsible for relaying information to R/W Engineering to assist in identifying the parcel, owner, the type of title or interests, and other rights to be condemned.

R/W Engineering will prepare a legal description of the parcel to be condemned and a map showing its location in relation to the project for which it is to be taken.

The mapping and legal description(s) for condemnation will be attached to the Resolution of Necessity Transmittal Memorandum. This document serves as a formal transmittal to R/W of the final RON package. It includes the parcel numbers of the parcels described and satisfies the legal responsibility of the land surveyor in charge of the legal description(s) per Section 8761(d) of the Business and Professions Code.

© 1994-2025 California Department of Transportation. All rights reserved.

For an example of a standard Resolution of Necessity Transmittal, see Exhibit 06-EX-02 in this manual.

The Division of Right of Way and Land Surveys (HQ) is responsible for preparing the resolution to be reviewed and approved by the CTC. R/W is required to provide HQ all the necessary information needed to prepare the resolution. This information is also used by the Legal Division (Legal) to prepare court filings associated with the condemnation.

It is critical to work in a timely fashion, as any delay in the processing of a condemnation may significantly impact a project schedule.

For more information on the requirements of a resolution request to HQ, see Section 9.01.11.00 of this manual.

6.11.02.01 Legal Descriptions

Legal descriptions for condemnation are written following the same rules of legal description writing applicable for grant deeds or other types of conveyance documents, and must be the same description as contained in the original Grant Deed prepared for contract negotiations (other than formatting changes for condemnation), except:

- When describing the vesting interest, "OWNER" should be used in place of "GRANTOR" and "STATE" should be used in place of "GRANTEE."

- Where underlying fee is to be separated into individual subparcels (see Section 6.11.02.03 of this manual).

- In condemnation descriptions involving excess, the excess must be described and mapped separately from the portion lying inside the right of way, and must be treated as a separate interest.

Generally, descriptions for total acquisitions are the same as the record description for the parcel contained in preliminary title reports.

In some cases, different interests, such as drainage or slope easements, are to be condemned together with fee title for the highway itself when condemned from the same ownership. Parcel Numbers shall be used to identify the different interests (see Section 6.02.02.02, et seq., of this manual).

If separate subparcels of like interests, i.e., two separate pieces of fee, were described together in the Grant Deed, they must continue to be described

© 1994-2025 California Department of Transportation. All rights reserved.

the same way. Include the additional subparcel numbers in parentheses, e.g., 12345-1(12345-2). It should be noted that in doing so Caltrans is forced to condemn these parcels together. If this becomes an issue, Legal and/or R/W may request the descriptions to be written separately, which could cause project delay. This must be a consideration when developing the descriptions for the Grant Deed.

A statement of area is not to be used in a legal description for condemnation.

For more information on legal descriptions, see Section 6.08.00.00 of this manual.

6.11.02.02 Type of Title or Interest

When submitting condemnation descriptions to HQ for CTC action, incorporate in the legal description of each parcel the *purpose* for which the type of title or interest is to be condemned. This procedure of describing interests to be acquired within the body of the parcel description allows for the acquisition of various rights in one resolution without the necessity of special recitals in the preamble of the resolution.

The following examples should be used for the acquisition of fee title:

For State highway purposes, that portion of _____, described as follows:

(Description of Parcel)

NOTE: The example above will be used even if the parcel is for a connecting road. No access rights are to be extinguished.

For freeway purposes, that portion of _____, described as follows:

(Description of Parcel)

NOTE: The example above will be used even though the parcel is partly for freeway, partly for connecting road, and partly for frontage road purposes.

© 1994-2025 California Department of Transportation. All rights reserved.

For freeway purposes, that real property, described as follows:
(Description of parcel)

NOTE: The example above will be used for an entire ownership, lying entirely within the right of way, or a description of that part within and a description of that part outside the right of way as excess property. If excess property is to be acquired through the adoption of a Resolution of Necessity, the resolution shall specifically refer to CCP Section 1240.410. These references are not intended to be part of the legal description.

The following examples should be used for the acquisition of other title:

An easement for State highway purposes in and to that portion of _____, described as follows:
(Description of Parcel)

An easement for drainage ditch purposes in and to that portion of _____, described as follows:
(Description of Parcel)

For freeway purposes, the extinguishment of all easement of access in and to _____ (street or highway) appurtenant to the following described property, over and across _____.
(Description of Parcel)

An easement for the purposes of a railroad detour over a temporary roadbed upon, over and across a portion of _____, described as follows:
(Description of Parcel)

© 1994-2025 California Department of Transportation. All rights reserved.

The following examples require special resolutions:

An easement for irrigation ditch purposes in and to that portion of _____, described as follows:
(Description of Parcel)

A fee simple estate for irrigation facilities in and to that portion of _____, described as follows:
(Description of Parcel)

A fee simple estate for a maintenance station site (or for a District Office site or for material site purposes) in and to that portion of _____, described as follows:
(Description of Parcel)

NOTE: When property is "necessary" for a project, "substitute" property may be acquired and then conveyed to a public agency or in the public agency's name, as long as reference is made to either CCP Section 1240.320 (acquisition for the conveyance to the public agency) or CCP Section 1240.330 (property necessary for relocation of a public use pursuant to a court order, judgment or agreement), depending on which situation applies.

If public use property is being acquired and the uses are compatible or being acquired for a more necessary public use, reference must be made to CCP Section 1240.610.

The above references are not intended to be part of the legal description.

6.11.02.03 Underlying Fee

It is not necessary to condemn the underlying fee in cases where the State has good easement title to a public way or will acquire good easement title under SHC Sections 83 and 233. However, it is the policy of the State to avoid creating isolated islands of underlying fee within State highway right of way. For that reason, appurtenant underlying fee will generally be acquired along with the State's requirements. In many cases, it will not be necessary to describe the underlying fee, as it will automatically pass with the abutting property. In those cases where it is necessary to describe the underlying fee,

© 1994-2025 California Department of Transportation. All rights reserved.

it will be described separately and will be assigned the next sequential subparcel suffix available.

NOTE: In cases involving property of substantial value and in cases requiring extensive survey costs to prepare a separate description, consult with Legal.

6.11.02.04 Clauses for Condemnation

It may be necessary to modify clauses in standard acquisition descriptions to meet specific requirements for condemnation. For example, a standard acquisition description may contain a clause for acquiring abutter's rights, but the State typically condemns only for the abutter's right of access. Many of these modifications have already been done and can be found in Section 6.12.00.00 of this manual. This includes items that would normally be handled in a R/W Contract, such as the right to sever and remove improvements. Any clauses that appear to be contractual in nature, and have not previously been included in Section 6.12.00.00 of this manual, require consultation with HQ R/W Engineering and Legal prior to submittal.

For more information on Standard Clauses used for Freeway Condemnation, see Section 6.12.00.00 of this manual.

6.11.02.05 Mapping

The necessity of quality mapping is important as it is used throughout the condemnation process. It provides a visual picture of the parcel to be condemned and its relationship to the overall project for which it is to be taken. It is also a requirement for various pleadings with the court (CCP Section 1250.310[e]).

The condemnation mapping shall consist of at least 2 maps:

1. Index Map (Exhibit A) – Shows parcel in relation to the overall project.
2. Detail Map (Exhibit B) – Shows parcel in detail.

Requirements for the Resolution of Necessity Maps are described in Section 4-8 of the Plans Preparation Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.11.03.00 Final Package

The final Resolution of Necessity package to be transmitted to R/W shall include:

- A file in Portable Data Format (.pdf) containing the Resolution of Necessity Transmittal Memorandum (signed and stamped), mapping and Condemnation legal description(s). (See Section 6.11.02.00 of this manual.) The pdf document must meet ADA remediation requirements to facilitate external website publication. The Resolution of Necessity package, including legal descriptions shall use Arial font, point size 12. This font is subject to change; please contact HQ Division of Right of Way and Land Surveys (RWLS) for the latest information.

- The Condemnation legal description(s) shall also be provided in Microsoft Word format (currently .docx, to be used by Caltrans Legal in the preparation of court documents).

  NOTE: Legal has requested descriptions to:
  - Use Century Gothic 12 Point font.
  - Use "normal" text style (not pleadings format).
  - Be in compliance with ADA remediation requirements.

- The different font requirements for the two copies is subject to change; please contact HQ RWLS for the latest information.

The original Resolution of Necessity Transmittal (signed and stamped) and accompanying condemnation mapping and legal description(s) should be kept in the project folder.

6.11.04.00 Posting

Recording information for a Final Order of Condemnation, or any related and recorded court document, will be posted on the Right of Way Record Map. Prior to posting, Right of Way Engineering will compare the description contained within the Final Order of Condemnation with the original Resolution of Necessity description. Any discrepancies noted will be immediately brought to the attention of Legal so the appropriate corrective actions may be taken.

© 1994-2025 California Department of Transportation. All rights reserved.

6.12.00.00 – STANDARD CLAUSES FOR CONDEMNATION

6.12.01.00 General

When Right of Way (R/W) Engineering prepares a legal description for a Resolution of Necessity, modification of standard clauses used in a standard acquisition may be necessary to meet the specific requirements for condemnation.

The information provided in this section includes common situations with example clauses that have been preapproved by the Legal and R/W functions.

For more information on a Resolution of Necessity or Condemnation, see Section 6.11.00.00 and Chapter 9 of this manual.

For more information on Legal Descriptions, see Section 6.08.00.00 of this manual.

6.12.01.01 Definitions

The following definitions will apply to this section:

Expressway: A highway having partial or complete access control regardless of whether it is divided or separated at grade. (Section 257 of Streets and Highways Code [SHC])

Freeway: A highway where owners of abutting lands have no right or easement of access to or from their abutting lands. A controlled access highway (SHC Section 23.5).

Highway: A public roadway maintained by the State.

6.12.02.00 Classification of Clauses

For the purpose of extinguishing access rights with or without additional land, a "CF" series of clauses known as the "CF," "CFO," and "CFNL" clauses have been devised. Other clauses have also been devised for specific circumstances and are shown under their own Sections.

© 1994-2025 California Department of Transportation. All rights reserved.

"CF" clauses are used when widening an existing highway or in converting existing highways into freeways or expressways and for the purpose of showing the nonexistence of access rights in acquiring land where no abutter's rights exist, such as a freeway on a new alignment. These clauses are for general usage and must be checked for conformance with each particular situation. Prior approval from the Division of Right of Way and Land Surveys (HQ) and Legal functions to modify the clauses to conform to special situations may be necessary. It may be practical to coordinate these approval efforts through the Chief, Right of Way Engineering in HQ Office of Land Surveys.

Exhibit 06-EX-04 shows examples of Condemnation Parcels requiring Access Clauses. The letters in parenthesis ( ) following each clause relate to the situations shown on Exhibit 06-EX-04.

For additional information on Standard Clauses for Freeway Deeds, see Section 6.10.00.00 of this manual.

6.12.03.00 "CF" Series--Extinguish Access Rights

The "CF" clauses extinguish the abutting owner's rights of access to or from the freeway.

6.12.03.01 CF-1 Condemnation and Extinguishment of Existing Access Rights or Condemnation Where No Access Rights Exist

The comprehensive access clause shown in A.1. below will be used where access rights exist, such as in widening an existing highway by a partial acquisition of the abutting property. In some cases, it will be used for constructive notice purposes where access rights do not exist, such as a partial acquisition on a new alignment.

A. *"Parcel 12345-1: For freeway purposes, that portion of _____, described as follows:*

(Description of Parcel)

1. *Lands abutting the freeway shall have no right or easement of access thereto."* (A)

© 1994-2025 California Department of Transportation. All rights reserved.

NOTE: In all cases, the word "freeway" means only the land lying within the described boundaries and no more.

If access rights are to be extinguished along only a portion of the highway frontage, delete the period after "thereto" in A.1. above and add a phrase such as the following:

2. *"except over and across a 20 foot portion of the course described above as "thence N. 0° 05' 18" E., 170.00 feet", the southerly terminus of the portion being 40 feet northerly from the southerly terminus of the course."* (B)

NOTE: By excepting certain lines from the above access restriction clause, the access the owner is to have is described in a positive manner.

In the case of an adjoining cross street at the same elevation as the freeway, which cross street *is not* to be closed, nothing further than the comprehensive access clause is necessary. The same is true if the cross road and freeway are to be at different elevations.

In the case of an adjoining cross street at the same elevation as the freeway, which cross street is to be closed and will not connect into the proposed freeway, the comprehensive access clause stated above would be preceded by a qualifying clause such as follows:

3. *"Together with the extinguishment of all easements of Access appurtenant to the remaining lands on and over Young Street, resulting from the closing of Young Street at the freeway along the northerly prolongations of the easterly and westerly lines of the above described 200-foot strip of land across Young Street. Lands abutting the freeway shall have no right or easement of access thereto."* (C)

B. If fee title is to be acquired in the adjoining public road but *it is not* to be closed, it would be described separately such as:

1. *"Parcel 12345-2: For State highway purposes, that portion of Young Street described as follows:* (D)

   (Description of Parcel)"

© 1994-2025 California Department of Transportation. All rights reserved.

If fee title is to be acquired in the adjoining public road and *it is* to be closed, it would be described separately such as:

2. *"Parcel 12345-2: For freeway purposes, that portion of Young Street described as follows:* (E)

   (Description of Parcel)"

In either case, the "-2" represents the next available subparcel number.

NOTE: If the adjoining cross street is to be closed, the comprehensive clause to extinguish existing access rights should not be added to the description of the road parcel because the public road parcel, without the extinguishment of access, has only nominal value. If extinguishment of access is included with the road parcel, it would prevent the court from so instructing the jury.

6.12.03.02 CF-2 Condemnation and Extinguishment of Access Rights; Extinguishment of Access Rights Along Side Line of Existing Longitudinal or Cross Road or Street Beyond Parcel; Condemnation Where No Access Rights Exist

If in addition to acquiring land for a freeway where access rights exist (such as in widening an existing highway, except along property lines) or where access rights do not exist (such as a highway on a new alignment), and it is necessary with a particular parcel to extinguish existing access rights over a portion of the boundary of an existing longitudinal or cross road or street, which portions are beyond the limits of the land to be acquired, a clause to extinguish access to such longitudinal or cross street or road will be used. Such clause will precede the comprehensive access clause (see C.1.).

Examples of this are:

"Parcel 12345-1: For freeway purposes, that portion of _____, described as follows:

(Description of Parcel)"

© 1994-2025 California Department of Transportation. All rights reserved.

A clause for access over existing longitudinal road boundary line which is to be a boundary of the freeway:

A. *"Together with the extinguishment of all easements of access appurtenant to the remaining lands in and to Louie Avenue (the avenue would be mentioned in the above description) over and across that portion of the easterly line of Louie Avenue extending northerly from the most northerly corner of the above described Parcel 6 to the northerly line of the remaining lands."* (F)

A clause for access over existing cross road or street boundary line beyond freeway boundary:

B. *"Together with the extinguishment of all easements of access appurtenant to that portion of the owner's remaining property which lies easterly of the above described Parcel 6 in and to Nyborg Road (the cross road or street would be mentioned in the above description) over and across that portion of the northerly line of Nyborg Road which extends easterly 200 feet from the southerly terminus of the above described course (7)."* (G)

In either of the above cases, the standard comprehensive access clause would follow:

C.

1. *"Lands abutting the freeway shall have no right or easement of access thereto."*

If access rights are to be allowed across part of the freeway parcel boundaries or across part of the highway or cross road or street frontage or side lines, delete the period after "thereto" and add a phrase such as follows:

2. *"except over and across courses (2) and (3) and the westerly 10 feet of course (4) described above."*

(In this case, courses in the metes and bounds description of the parcel would be previously numbered.) (H)

For a very irregular parcel with access to be allowed across several lines, a phrase such as follows could be used:

3. *"except over and across the southerly 30.00 feet of the northerly 81.06 feet of the course described above as N. 45° 38' E., 305.20*

© 1994-2025 California Department of Transportation. All rights reserved.

feet, and over and across the northerly 15.00 feet of the course described above as N. 44° 28' E., 627.50 feet."

NOTE: By excepting certain lines from the above access restriction clause, the access the owner is to have is described in a positive manner.

6.12.04.00 "CFO" Series--Extinguish Access Rights Frontage Road

The "CFO" clauses are for freeways having a frontage road. They extinguish all appurtenant abutter's access rights only to the main thoroughfare of the freeway.

6.12.04.01 CFO-1 Condemnation for Freeway and Frontage Road

"Parcel 12345-1: For freeway purposes, that portion of _____, described as follows:

(Description of Parcel)"

NOTE: The frontage road area is a part of the described parcel.

A. *"Lands abutting the freeway shall have no right or easement of access thereto; provided, however, that part of the remaining lands which lies _____ of the parcel shall abut upon and have access to an adjoining frontage road which will be connected to the main thoroughfare of the freeway only at such points as may be established by public authority."* (I)

If remaining lands lie on only one side of the freeway, delete the words *"which lies _____ of the parcel"* of the above description.

If access to the frontage road is to be restricted or limited to a certain portion of the frontage road frontage, insert after the words "have access" in the above clause, the following:

B. *", as hereinafter provided,"*

then add a description of the permitted access at the end of the clause such as the following:

© 1994-2025 California Department of Transportation. All rights reserved.

"The right of access to the frontage road is hereby expressly limited to Courses (2), (3) and (4) described above,"

or

"The right of access to the frontage road is hereby expressly limited to the northerly 301.36 feet of the course described above having a length of 639.41 feet." (J)

NOTE: Any other appropriate description specifically defining limits of access rights will be satisfactory.

If the frontage road is not to be connected to the freeway at any point, but is to be connected to a road or street which passes over or under the freeway, substitute in the above the road or street name to which the connection will be made, such as *"to Mah Boulevard only at such points as may be established by public authority."*

6.12.04.02 CFO-2 Condemnation for Freeway; Remainder to Abut on End of Stub Frontage Road

A special condition of abutting on a frontage road frequently occurs. It is the case of remaining property which abuts on the end, rather than along the side, of a stub frontage road. The access clause needs to state the provision that is made for the remainder to have access to the freeway along a stub frontage road which has been acquired from an adjoining owner as a part of the state highway right of way.

"Parcel 12345-1: For freeway purposes, that portion of _____, described as follows:

(Description of Parcel)"

"Lands abutting the freeway shall have no right or easement of access thereto; provided, however, that the remaining lands shall abut upon and have access to a frontage road over a 30-foot length of the northerly line of the remaining portion, which 30 feet extends easterly from the easterly line of the parcel." (K)

© 1994-2025 California Department of Transportation. All rights reserved.

6.12.04.03 CFO-3 Condemnation for Freeway; Remainder to Have Access Above or Beneath Freeway to Existing Adjoining Longitudinal Street or Road

"Parcel 12345-1: For freeway purposes, that portion of _____, described as follows:

(Description of Parcel)"

"Lands abutting the freeway shall have no right or easement of access thereto; provided, however, that the remaining lands shall have access to Toutges Boulevard, a city street, by passage under(over) the freeway over and across the following course(s) (A location approximately at which the access is to be allowed above or beneath the freeway is necessary)." (L)

6.12.05.00 "CFNL" Series

The "CFNL" clauses extinguish all abutter's access rights without acquiring any land.

6.12.05.01 CFNL-1 Condemnation of Access Rights Only

A. *"Parcel 12345-1: For freeway purposes, the extinguishment of all easement of access in and to _____ Street (or highway), appurtenant to Lot 6 of Tract 111, as per map recorded in Book 35, Page 16 of Miscellaneous Maps, records of _____ County over and across the east line of Lot 6."* (M)

If land to which access rights are appurtenant cannot be briefly described as shown above, the description should be rearranged in a manner such as follows:

B. *"Parcel 12345-1: For freeway purposes, the extinguishment of all easement of access in and to _____ Street, appurtenant to the following described property, over and across that portion of the westerly line of _____ Street described as follows:*

(Description of the portion of the westerly line of the street)"

© 1994-2025 California Department of Transportation. All rights reserved.

"The property to which the easement of access is appurtenant is described as follows:

(Description of the adjoining land to which the abutter's rights are appurtenant)"

6.12.06.00 For Temporary Access and for Temporary Purposes Due to Highway Construction

The following three Sections illustrate condemnation clause methods of reserving temporary access to owners and of acquiring easements for temporary purposes due to highway construction. They would be used only infrequently and in cases where the completion date of the ultimate construction is not definitely fixed. Other cases for allowing temporary access or for acquiring temporary highway interests in property will not differ greatly from the clauses given.

6.12.06.01 Vehicular Separation Construction Deferment Clause

"Reserving unto owners of abutting lands, their successors or assigns, the right of access to a temporary crossing of the freeway, at grade, to the county road known as Los Positas Road, over and across the southerly 30 feet of the course described above as N. 00° 00' 25" E., 157.25 feet, until such time as a vehicular grade separation for the purpose of a crossing over the freeway is constructed and open to traffic, at which time the temporary crossing at grade shall be closed and such rights permitting access to the temporary crossing shall cease and terminate in the same manner as if never made."

6.12.06.02 Temporary Railroad Detour Easement

"The parcel described above is to be used as a right of way for a railroad detour pending construction of a bridge separating the grades of the BNSF Railway and the State highway at F Street, and the rights to be acquired therein shall cease and terminate on completion of the grade separation and in any event shall cease and terminate not later than December 31, 2015."

© 1994-2025 California Department of Transportation. All rights reserved.

6.12.07.00 Access for Livestock

Access for livestock across freeway through cattle pass, livestock and agricultural equipment access under bridge, maintenance obligation.

"*Also excepting and reserving, unto the owners of abutting lands, their successors or assigns, the privilege of moving livestock across and beneath the freeway through a drainage and cattle pass structure to be constructed under the roadbed of the freeway over and across the course(s) described above as* (A location approximately at which the access is to be allowed beneath the freeway is necessary)*; also, the privilege of moving livestock, equipment, machinery and vehicles for agricultural purposes across and beneath the freeway at a bridge to be constructed across Dry Creek over and across the course(s) described above as* (A location approximately at which the access is to be allowed beneath the freeway is necessary)*; provided that such privilege shall not be exercised at the surface of the freeway, or by means other than the above described structure, or for any other purpose, and that such privilege shall cease and terminate upon the discontinuance of the use of the abutting lands for agricultural purposes; provided, further, that any maintenance of the crossings required by reason of the use thereof for purposes of the owners of abutting lands shall be the obligation of the owners of abutting lands.*"

6.12.08.00 Condemnation Improvement Clauses

The Condemnation Improvement clauses are used for acquiring the rights to enter a portion of the remainder of the landowner's property in order to sever or remove permanent structures that are located partially within the right of way to be acquired.

6.12.08.01 Condemnation Improvement Removal Clause

The following clause will be added to the description of the parcel being condemned:

> "*TOGETHER WITH all of the existing improvements which are located partially within and partially outside the boundaries of the above described parcel.*"

© 1994-2025 California Department of Transportation. All rights reserved.

A temporary easement will be added to cover the area of the owner's remaining property needed to accomplish the removal of the improvements. The temporary easement will be described as follows:

"TOGETHER WITH a temporary easement, to expire on (date), over and across the following described parcel for the purpose of removing existing improvements.

(Description)"

If necessary for access to the area of work, the following may be added:

"AND, a temporary easement, to expire on the date above, for the purpose of ingress and egress, described as:

(Description)"

6.12.08.02 Condemnation Improvement Severance Clause

The following clause will be added to the description of the parcel being condemned:

"TOGETHER WITH the temporary easement, to expire on (date), for the purpose of severing and removing the portions of improvements which lie within the parcel described above and for the purpose of constructing and maintaining any shoring, braces, foundations or walls necessary to support the remaining improvements on the remaining portion of owner's property. The temporary easement is described as:

(Description)"

If necessary for access to the area of work, the following may be added:

"AND, a temporary easement, to expire on the date above, for the purpose of ingress and egress, described as:

(Description)"

© 1994-2025 California Department of Transportation. All rights reserved.

6.12.09.00 Temporary Construction Easement (TCE) Termination

"Rights to the above described temporary easement shall cease and terminate on (date).
The rights may also be terminated prior to the above date by STATE upon notice to OWNER."

If the TCE is no longer needed prior to date shown, written notice will be sent by Right of Way to the owner stating the area is no longer needed by State.

If the clause above is contained in a Final Order of Condemnation, a Quitclaim deed will be required.

This section does not affect the TCE clauses contained in Sections 6.12.08.01 and 6.12.08.02.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.00.00 – FEDERAL LANDS

6.13.01.00 General

Caltrans may require a temporary or permanent use of property that is owned by the United States (U.S.) and controlled by a federal agency. Rights of way, material sites or other interests in these lands are regulated by Federal law.

A designated District/Regional Federal Lands Transfer Coordinator (FLTC) will work with the federal land agency controlling the property or the Federal Highway Administration (FHWA) when a temporary or permanent right of a property on federal lands for highway purposes is required.

The FHWA is an agency within the U.S. Department of Transportation that supports State and local governments in design, construction, and maintenance of the U.S. highway system and various federal and tribal owned lands (Federal Lands Highway Program).

For more information on Federal Land Transfer requirements, see Section 6.13.03.00 of this manual.

For more information on the acquisition of Federal Lands, see Section 8.18.00.00 of this manual.

6.13.02.00 Federal Land Agencies

The federal government owns over 47 million acres of land in California, accounting for more than 47% of the lands in the state (Ross W. Gorte et al., *Federal Land Ownership: Overview and Data*, CRS Report R42346, 2012). The majority of federal lands are administered through four agencies including: the National Park Service, the Bureau of Land Management, and the Fish and Wildlife Service (all through the Department of the Interior), and the Forest Service (through the Department of Agriculture). The lands are managed primarily for the purpose of preservation, recreation, and development of natural resources, while managing optimal balance between land use and protection for national or local benefits. Only a small percentage of lands are administered through the Department of Defense and other agencies.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.02.01 Forest Service

The United States Forest Service (USFS) is the oldest of the four federal land management agencies, created in 1905. The Forest Service has a multiple-use, sustained-yield mandate that supports a variety of products and services including timber harvesting, recreation, grazing, watershed protection, and fish and wildlife habitats. Most of the USFS lands are designated national forests.

For additional information on the regulations of the Forest Service, see Title 36 Code of Federal Regulations (CFR) Chapter II.

6.13.02.02 National Park Service

The National Park Service was created in 1916 where the mission is to preserve unique resources and to provide for their enjoyment by the public.

For additional information on the regulations of the National Park Service, see 36 CFR Chapter I.

6.13.02.03 Fish and Wildlife Service

The first national wildlife refuge was established in 1903. It was not until 1966 that the refuges were aggregated into the National Wildlife Refuge System, administered by the Fish and Wildlife Service. Its primary mission is to conserve and protect animals and plants.

For additional information on the regulations of the Fish and Wildlife Service, see 50 CFR Chapter I.

6.13.02.04 Bureau of Land Management

The Bureau of Land Management (BLM) was formed in 1946 and is responsible for subsurface mineral resources. It has a multiple-use, sustained-yield mandate that supports a variety of uses and programs including energy development, recreation, grazing, wild horses and burros, and conservation.

For additional information on the regulations of the Bureau of Land Management, see 43 CFR Chapter II and 43 US Code (USC) 1731.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.02.05 Bureau of Indian Affairs

The Bureau of Indian Affairs (BIA) is a federal agency within the U.S. Department of the Interior. It is responsible for the administration and management of land held in trust by the United States for the Native Americans, including over 110 federally recognized Tribes in California.

For additional information on the regulations of the Bureau of Indian Affairs, see 25 CFR Chapter 1.

For additional information on the acquisition of Indian Lands, see Section 8.20.00.00 of this manual.

6.13.02.06 Other Federal Agencies

Surplus federal lands are those lands under the jurisdiction of the General Services Administration (including military or other federally held lands).

A legal description of the lands required with appropriate clauses, area (acreage) and parcel number(s), in addition to a map are necessary when requesting an encumbrance on lands to the General Services Administration. If available, both map and legal description should contain a deed reference to the federal agency exercising supervision and control of the lands together with the total acreage originally acquired by that agency.

6.13.02.07 Resources

The following information includes links to various federal agency manuals to use as additional resources when communicating with our federal partners and when preparing mapping and or documents necessary for a Federal Land Transfer.

The BIA has collaborated with the BLM and the Office of the Special Trustee for American Indians to establish the *Standards for Indian Trust Lands Boundary Evidence Handbook*.

BLM Policy and Procedures for Issuance of "Long Term" Right-of-Way Grants and Easements Over Public Lands To Be Transferred Out of Federal Ownership, in accordance with 43 CFR 2800 and 43 CFR 2880.

© 1994-2025 California Department of Transportation. All rights reserved.

Federal Regulations:

- Bureau of Reclamation, see 43 CFR 429.
- Highways, see Title 23 of the CFR.
- Transportation, see Title 49 of the CFR.

For additional information on acquisition from other federal agencies, see Section 8.18.17.00 of this manual.

6.13.03.00 Federal Land Transfers

A Federal Land Transfer is the conveyance of property, usually by highway easement deed, to a State or local public agency either directly by a federal land management agency (as mentioned above) or by the FHWA on behalf of the land management agency. These transfers are made to allow the construction or improvement of a highway facility on Federal land.

Federal Land Transfers are subject to the Federal Highway Act of August 27, 1958 (23 USC 317 and 107[d]), which authorizes the Secretary of Transportation who further delegated to the FHWA to transfer lands under the jurisdiction of a Federal agency to a State or local public agency. The regulations implementing this authority can be found under 23 CFR 710.601.

The transfer of lands from a Federal Agency to Caltrans can be in the form of an easement, permit, grant or patent. The FLTC will coordinate with the federal agency to prepare the necessary application with support from R/W Engineering.

The procedures to obtain a Federal Land Transfer are regulated by 23 CFR 710.601.

For more information on Federal Land Transfers for Federal Aid Projects, refer to RW Manual 8.18.00.00 et. al, the FHWA Manual, and FHWA's *Synthesize Division Interagency Real Estate Agreements and Identify Practices for Improved Interagency Support*.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.03.01 Department of Transportation Easement

R/W Engineering will prepare a Department of Transportation (DOT) Easement containing the clauses required by FHWA and use deed template *Highway Easement Deed – Federal Lands* for conveyance of the easement from the Federal Agency with jurisdiction over the land in question.

In some cases, an agreement for cooperative work with a federal agency is made that may require additional verbiage to a DOT Easement.

For additional information on Cooperative Agreements, see Section 3.213 of the Cooperative Agreement Handbook (internal Caltrans link), published by the Division of Project Management.

For an example of the DOT Easement document, titled "Highway Easement Deed – Federal Lands," see Exhibit 06-EX-02 in this manual.

For additional information on Department of Transportation Easements, see Section 8.18.06.00 of this manual.

6.13.03.02 Perfection of Title

Caltrans, FHWA, and USFS have entered into a Memorandum of Understanding (MOU) (internal Caltrans link) to streamline the federal lands transfer process over federal lands under the jurisdiction of USFS over which a State Highway without properly documented rights traverses. This process is designated as the Perfection of Title. This method is to be used only where there is no new construction proposed.

For an example of the Perfection of Title easement document, titled "Highway Easement Deed – Perfection of Title (USFS only)," see Exhibit 06-EX-02 in this manual.

For additional information on Perfection of Title, see Section 8.18.07.00 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.03.03 Congressional Grant of Right of Way for Highways (Unpatented Public Lands)

The "Federal Land Policy and Management Act of 1976" (90 Stat. 2743; 43 USC 1701) provides that rights of way for construction of highways over public lands not reserved for public use is granted. This act should be used only on nonfederal aid routes.

The District shall file the approved map with the County Recorder with one print to the local Bureau of Land Management (BLM) Land Office. Two prints of the map, containing recording data, shall be submitted to HQ for filing in the general map archives.

6.13.04.00 Mapping for Federal Land Transfers

District R/W Engineering will prepare and submit the mapping necessary for Federal Land Transfers to the District/Regional FLTC for processing. This mapping is recognized as an *Application Map* and will show land required for rights of way or material sites.

Requirements for the Federal Lands Application mapping are described in Section 4-6 of the Plans Preparation Manual.

Federal Lands Transfer Application Maps may be filed in the State Highway Map Book (SHC Sections 128 and 129) in the appropriate county and referenced in the Federal Land Transfer document. The maps must contain the same basic information required when Federal Land Transfers are made entirely by legal description.

6.13.05.00 Legal Descriptions for Federal Land Transfers

Legal descriptions of State highway rights of way to be transferred from a Federal Agency may be described in general terms sufficient to identify the area agreed upon for transfer. This can be done through a standard written legal description (i.e., metes and bounds), a map filed with the deed incorporated as an exhibit, or a combination of the two. When using attached exhibits, care must be taken to ensure the proper designation of the exhibits in the deed.

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.05.01 Legal Description by Mapping Reference

Caltrans may describe land required from a Federal Agency by reference to a filed Application Map in the State Highway Map Book.

Example:

"… lands described as:

All those portions of land shown as Parcel 12345-1 and Parcel 12345-2 on the map filed in State Highway Map Book _____ at Page _____, _____ County Recorders Office."

The following is an example of an exhibit reference that may appear on the face of the document when using an exhibit for the legal description and a map.

Example:

"… lands described as:

All those portions of land described on "Exhibit A" and shown on "Exhibit B" as Parcel Number(s) [Parcel##, Parcel## …] on Sheets [##] through [##], attached."

© 1994-2025 California Department of Transportation. All rights reserved.

6.13.05.02 Legal Description for Perfection of Title

Generally, there is little or no new survey data collected for Perfection of Title transfers since these are used to clean up shortcomings in Caltrans' title over federal lands. Therefore, descriptions for Perfection of Title deeds follow three primary formats.

1. If sufficient mapping exists, the map may be filed in the State Highway Map Book or if the mapping can be legibly reduced to a size suitable for recording, then it can be recorded with the deed as an exhibit.

2. A strip map with reference to State Highway Postmiles and right-of-way widths can also be recorded with the deed if it meets the requirements addressed in Section 6.13.05.00 in this manual.

   The following is an example:

   "The land depicted on the map attached as "Exhibit A", and shown as Parcel Number(s) [Parcel##, Parcel## …] on Sheets [##] through [##]."

3. Postmiles and widths of the existing highway right of way may be described similarly to a written legal description or in tabular format. This method will use the deed template titled, "Highway Easement Deed – Perfection of Title (USFS only) – Post Mile Reference," see Exhibit 06-EX-02 in this manual.

   The following is an example in a written legal descriptions format:

   "PARCEL 12345-1

   Being a strip of land 100 feet in width lying 50 feet on each side of the existing centerline of said State Route 09-MN0-395, as said centerline existed on October 15, 2002, through lands of the Toiyabe National Forest, beginning at approximate Post Mile 80.35 and terminating at approximate Post Mile 82.26.

   The sidelines of said 100 foot strip of land shall be shortened or prolonged so as to commence and terminate at their intersections with adjoining private lands.

   Contains 23.2 acres, more or less."

© 1994-2025 California Department of Transportation. All rights reserved.

The following is an example in a tabular format:

03-ED-50, PM 34.2/66.48 Parcel No. 036156
Post Mile Log in Forest Service Area.
Distances from centerline.

County	*Post Mile*	*Kilo Post*	*Description*	*Width to C/L (left, right)*

ED	*34.80*	*56.004*		*120'lt, 200'rt*
ED	*34.92*	*56.206*	*Mill Run – W End*	*100'lt, 110'rt*
ED	*35.22*	*56.673*	*Peavine Ridge/Mill Run E*	*100'lt, 115'rt*
ED	*35.50*	*57.130*		*130'lt, 145'rt*

The following two clauses must be included in all Perfection of Title legal descriptions:

"TOGETHER with the above described parcel(s), any and all man-made features and drainages adjacent to and appurtenant to the existing Highway."

"EXCEPTING from the above described parcel(s), all frontage roads, trails, and waterways adjacent to and parallel with the roadbed of the existing Highway."

6.13.06.00 Clauses Specific to Federal Land Transfers

6.13.06.01 Reversion of Excess or Superseded Portions of Right of Way Over U.S. Lands

Historically, reversion has been accomplished through the vacation process. The following is an example of the procedure used for lands under the administration of the Bureau of Land Management:

Reversion shall commence by the District's preparation of a legal description of the area(s), together with a resolution of vacation, to revert to Bureau of Land Management jurisdiction. The description and resolution are to be submitted to HQ for California Transportation Commission (CTC) action in accordance with established vacation procedure.

Following CTC approval of the vacation, the District shall prepare and submit to HQ duplicate copies prepared for original acquisition of the right of way. Right of way and access rights to be retained should be clearly delineated on these maps and identified as such, i.e.:

> *"Right of way and access rights acquired under Bureau of Land Management Decision _____ dated _____; TO BE RETAINED."*

Excess or superseded right of way which is to be permitted to revert should also be clearly delineated, preferably shaded, and designated as:

> *"Portion of right of way obtained under Bureau of Land Management Decision _____ dated _____ no longer required for State highway purposes and to revert to former status."*

Land under the administration of other federal agencies used a similar vacation procedure. These procedures worked fairly well when the original rights of way obtained by the Department were based solely on maps and administrative actions.

The current policy is to record deeds covering the easement areas obtained for rights of way. The most efficient method to clear title on deeded rights is through a Director's Quitclaim Deed. This method will clearly show the removal of all rights, title, and interest of Caltrans in and to the land described in the Director's Quitclaim Deed within the public record. Wording similar to the clause above referring to the original document by which Caltrans obtained title, should be included within the Director's Quitclaim Deed.

© 1994-2025 California Department of Transportation. All rights reserved.

6.14.00.00 – STATE LANDS

6.14.01.00 General

Lands owned or controlled by the State of California can be under the jurisdiction of many State Agencies. This section addresses how Caltrans may interact with other State Agencies to:

- Obtain rights needed for state highway purposes over and across lands under the control of other State Agencies.

- Release lands under the control of Caltrans no longer needed for state highway purposes to other State Agencies.

6.14.02.00 State Lands Commission

The State Lands Commission has jurisdiction and management control over certain public lands received by the State from the United States. These lands include Sovereign lands and School lands. The State Lands Commission has the authority to grant easements and right of way to Caltrans for highway purposes per Section 6210.3 of the Public Resources Code (PRC).

For more information on the acquisition of State Lands, see Section 8.21.00.00, "Public Lands – State," in this manual.

For more information, see the State Lands Commission FAQ's webpage.

6.14.02.01 State Sovereign Lands

State Sovereign Lands include the beds of California's navigable rivers, lakes and streams, as well as tidal and submerged lands along the coastline and offshore islands from the mean high tide line to three nautical miles offshore. Section 101.5 of the Streets and Highways Code allows Caltrans to reserve Sovereign Lands that are needed for highway right of way or as a source of materials for construction, maintenance, etc.

Right of Way (R/W) Engineering will prepare a map delineating the proposed right of way or material site necessary for highway purposes to be filed for record with the State Lands Commission. Upon approval of the map by the State Lands Commission, lands described will be reserved for Caltrans' use.

© 1994-2025 California Department of Transportation. All rights reserved.

Requirements for State Sovereign Lands map applications are described in Section 4-7 of the Plans Preparation Manual (PPM).

6.14.02.02 State School Lands

State School Lands were originally granted to California by Congress in 1853 (Acts of March 3, 1853 – 10 Statute 244) to benefit public education. In order to acquire rights, permits, or easements, an application to the State Lands Commission must be completed.

R/W Engineering is responsible for providing a map and legal description to Right of Way for processing of the application.

Map requirements for State School Lands are the same as those for State Sovereign Lands. See PPM Section 4-7.

Legal descriptions follow the same rules of legal description writing as are used in the preparation of grant deeds or other types of acquisition documents.

For more information on legal descriptions, see Section 6.08.00.00 of this manual.

6.14.03.00 Other State Agencies

The Department of Parks and Recreation is the State agency designated to have control of the state park system (PRC Section 5001). It may grant permits and easements to public agencies for public roads and other uses (PRC Section 5012). For more information, see Section 8.21.04.00 in this manual.

The California Department of Veterans Affairs, through the Farm and Home Loan Division, may hold vesting title to properties. For more information, see Section 8.22.00.00 in this manual.

6.14.04.00 Transfer of Land Between State Agencies

Section 14673 of the Government Code states that jurisdiction of real property owned by the State may be transferred from one State agency to another State agency with written approval of the Director of General Services.

© 1994-2025 California Department of Transportation. All rights reserved.

R/W Engineering is responsible for providing a legal description and map to Right of Way for processing of the transfer of land between State Agencies. The instrument to be used, "Transfer of Jurisdiction of State-Owned Real Property" (Transfer of Jurisdiction), functions as both contract and deed. This instrument must contain all terms of the transaction together with a complete and accurate description of property being transferred. Two examples of the Transfer of Jurisdiction document can be found in Exhibit 06-EX-02. The first is exclusively for use with the State Department of Parks and Recreation. The second is for use with all other state agencies.

For more information on the acquisition process for the transfer of land between State Agencies, see Section 8.21.05.00.

6.14.04.01 Legal Descriptions and Maps

The transfer of jurisdiction to another State agency shall consist of a legal description of the property to be transferred, together with a map containing sufficient bearings and distances so that the legal description can be analyzed. Legal descriptions follow the same rules of description writing as are used in the preparation of grant deeds or other types of acquisition documents.

For more information on legal descriptions, see Section 6.08.00.00 of this manual.

Requirements for Transfer of Jurisdiction maps are described in PPM Section 4-11.

6.14.04.02 Interoffice Transfers

In addition to the above methods of disposal, excess property may be transferred to another office within Caltrans. Interoffice transfers will be accomplished on the basis of an appraisal report and completion of necessary forms as discussed in Chapter 16 (Excess Land) of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.00.00 – DIRECTOR'S DEEDS

6.15.01.00 General

A Director's Deed is a document used for the conveyance of any real property or interests, to be sold or exchanged under the provisions of Section 104.5 of the Streets and Highways Code (SHC). Director's Deeds are executed by the Caltrans Director (Director), or their delegate, upon approval by the California Transportation Commission (CTC), as required under SHC Section 118.

The Excess Lands function will determine the need for a Director's Deed and request the preparation of a document and mapping from Right of Way (R/W) Engineering.

For information on numbering of Excess Land parcels and Non-Inventoried Excess Land parcels, see Section 6.02.04.00 and Exhibit 06-EX-01 of this manual.

For more information on Excess Lands, see Chapter 16 of this manual.

For information on Requests to Decertify and Purchase, see Section 16.05.12.00 of this manual.

For more information on the Disposal of Rights of Way for Public and Private Road Connections, see Chapter 26 of the Project Development Procedures Manual.

6.15.02.00 Director's Deed (DD) Documents

Director's Deed document types include Grant Deeds, Easement Deeds, Quitclaim Deeds, Access Exchange Deeds, and Correction Deeds. R/W, R/W Engineering, and Legal functions at Headquarters have reviewed the most common types of Director's Deeds used and have created standard templates containing minimal rights necessary for normal use.

Situations will occur where it is necessary for these documents to be modified. Prior approval from the Deputy District Director of R/W and the Division of R/W and Land Surveys (HQ) is required when the template needs modification outside of the basic addition of standard clauses as described in Section 6.10.00.00 and Section 6.15.04.00 of this manual. Requests for

© 1994-2025 California Department of Transportation. All rights reserved.

HQ approval must be initiated through the Chief, R/W Engineering in the HQ Office of Land Surveys.

6.15.02.01 DD Grant

Similar to basic acquisition documents, the most common type of Director's Deed is the Grant Deed. Grant Deeds are primarily used to transfer real property in fee, under the provisions of SHC Section 104.5. However, a Grant Deed may be used to transfer a lesser right, title, or interest as long as the lesser degree is clearly stated.

For an example of a standard Director's Deed Grant, see Exhibit 06-EX-02 in this manual.

For additional information on Grant Deeds, see Section 6.09.02.01 of this manual.

6.15.02.02 DD Easement

A Director's Deed Easement is used to grant rights over real property from Caltrans (Section 801, et seq., of the Civil Code [CIV]). Easements are specific and may only be used for the purpose stated in the document. Easements range from access rights to utilities, and may include aerial structures, etc.

If a Director's Deed Easement is used to transfer title of an existing easement held by the State, the following statement will be used:

> *"…hereinafter called GRANTEE, an easement for [enter type of easement], upon, over and across that real property…"*

For an example of a standard Director's Deed Easement, see Exhibit 06-EX-02 in this manual.

For additional information on Easement Deeds, see Section 6.09.02.02 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.02.03 DD Quitclaim

A Director's Deed Quitclaim is used to release any interest in the real property conveyed without a guarantee that the title is valid.

If real property is to be quitclaimed, the following purpose statement should be used:

> *"…hereinafter called GRANTEE, all right, title and interest in and to all that real property in the…"*

If access is to be quitclaimed, the following purpose statement should be used:

> *"…hereinafter called GRANTEE, all right, title and interest in and to the right of access upon, over and across that [insert width of access] foot access opening in the right of way line of the State highway in the…"*

For an example of a standard Director's Deed Quitclaim, see Exhibit 06-EX-02 in this manual.

For additional information on Quitclaim Deeds, see Section 6.09.02.03 of this manual.

6.15.02.04 DD Access Exchange

Situations may arise when an exchange of access may be necessary within a single ownership for a project.

For an example of a Director's Deed Access Exchange, see Exhibit 06-EX-02 in this manual.

Additional clauses that can be used for access are discussed in Section 6.15.04.02 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.02.05 DD Correction

A Director's Deed Correction is used to revise Director's Deeds that have been recorded with errors.

Correction Deeds that involve a substantial change in interest to be conveyed will not be submitted to HQ until the District has reacquired the interest originally conveyed. Typically, a quitclaim deed will be sufficient for this purpose.

Correction Deeds prepared for the purpose of correcting minor errors occurring in the acquisition deed legal description may be submitted to HQ without reacquiring the interest conveyed. The Correction Deed will contain the following statement:

> "…*for the purpose of correcting the deed from* [enter name of Grantor on original deed] *to* [enter name of Grantee on original deed]*, recorded* [enter recording information on original deed, i.e., "in Book XX at Page XXX"; "as Document Number XX-XXXXX"]*, Official Records of the County of* [enter name of county]*, State of California.*"

For additional information on Correction Deeds, see Section 16.07.09.00 of this manual.

For an example of a Correction Deed, see Exhibit 06-EX-02 in this manual.

6.15.02.06 Inadvertence or Mistakes

SHC Section 119 authorizes the State through the Director to reconvey any real property that has been inadvertently or mistakenly passed to the State.

6.15.03.00 Deed Preparation

All Director's Deeds are forwarded to the District Excess Lands function at the time the request is made for execution of the deed. The pdf version of the deed document must meet ADA remediation requirements to facilitate external website publication. The legal descriptions shall use Arial font, point size 12. This font is subject to change; please check with HQ RWLS for the latest information.

© 1994-2025 California Department of Transportation. All rights reserved.

All parcels identified in the deed shall be numbered using the Director's Deed Numbering System in Chapter 6.02.04.04, except for correctory deeds or parcels that will reconvey real property that has been inadvertently or mistakenly passed to the state (see Chapter 6.15.02.06).

Director's Deed descriptions are written following the same rules of description writing used in the preparation of grant deeds or other types of acquisition documents. The State cannot convey any greater title than it acquired. Conveyance by Director's Deed is subject to all encumbrances that affect the property. Therefore, each Director's Deed must contain the following provision:

> "*Subject to special assessments, if any, restrictions, reservations and easements of record.*"

Any known title encumbrance that affects the property being conveyed, but is not of record, must be defined in the Director's Deed.

It is preferable to show the marital status of the grantee and the manner in which title will be conveyed. Unless due to some special condition, it is desirable to convey title to grantees in the same manner as they hold title to adjoining land, e.g., joint tenancy.

Easements for rights that were relocated by the project may be conveyed by Director's Deed Easement prior to the sale of the excess land or reserved in the Director's Deed to "*The State of California, its successors or assigns*" and conveyed to the appropriate party after the Director's Deed for the excess land parcel has been recorded.

NOTE: This will not be necessary if the replacement rights were transferred directly to the entity receiving replacement rights by separate acquisition, or reserved to the entity receiving replacement rights (third party conveyance) in the acquisition document to Caltrans.

6.15.04.00 Clauses

Similar to acquisition documents, additional clauses can be included in the Director's Deed for various rights, title and interest. Standard clauses as described in Section 6.10.00.00 of this manual are acceptable for use in a Director's Deed, but must be modified by changing the vesting verbiage to fit the use.

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.04.01 Exceptions and Reservations to State

The proper use of exceptions and reservations is important in Director's Deeds where the State will retain or reserve certain rights from land being conveyed, such as drainage easements, slope rights, access rights, oil, gas, and mineral rights, etc.

6.15.04.02 Access Clauses

For purposes of providing constructive notice of the nonexistence of access rights appurtenant to real property lying adjacent to a freeway, constructed or proposed to be constructed, one of the following two access clauses is to be used:

DD-1
The following clause shall be used in all cases where property being conveyed abuts directly upon the access restriction line of the freeway. The clause shall also be used in all cases where property being conveyed abuts only upon a sidewalk, a bikeway, and/or any other type of nonmotorized public thoroughfare lying between the real property and the access restriction line of the freeway.

The clause may be used where property being conveyed abuts only upon a frontage or connecting road, a cul-de-sac, cross street or alley that is closed at the freeway and/or any other type of motorized public thoroughfare lying between real property being conveyed and the access restriction line of the freeway. Use this clause where real property is being conveyed prior to construction of the freeway:

> *"There shall be no abutter's rights, including rights of access, appurtenant to the above described real property in and to the adjacent State freeway."*

When limited access is to be allowed directly into the freeway, such as an access opening, a phrase must be added to the above Clause that will precisely define the location of the access opening, such as:

> *"…except over and across the westerly 20 feet of the course described above with the length of 126.23 feet."*

© 1994-2025 California Department of Transportation. All rights reserved.

When the real property abuts upon an elevated freeway and upon a public way beneath the freeway, a statement permitting access to the public way is to be added to the Clause, such as:

> *"…provided, however, that said real property shall have access to a public way beneath the elevated freeway structure."*

DD-2
At interchanges where real property abuts upon the freeway and a city street or county road and the demarcation of freeway and local road is reasonably subject to misinterpretation, the following clause is used to designate the lines over which no access is allowed:

> *"There shall be no abutter's rights, including rights of access, over and across the courses described above with lengths of…"*

OR

> *"There shall be no abutter's rights, including rights of access, over and across course _____ through _____ described above." [Insert course limits such as 1 through 5]*

NOTE: In exceptional cases, when further clarification is needed of intent to restrict or permit access, modification of the above clauses will be made to clearly set forth the State's intent.

6.15.04.03 Landlocked Parcels

Director's Deeds for landlocked parcels sold at public auction shall contain the following constructive notice clause:

> *"The above-described real property is landlocked and without any direct access to the freeway or to any public or private road. The State of California is without obligation or liability to provide access to said real property."*

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.04.04 Power of Termination Clause for Conveyance for Public Purposes

Director's Deeds conveying excess land to public agencies may require a clause limiting use of property to public purposes and to provide for reversion to the State if such a limiting condition is broken. (CIV Section 885.010, et seq.)

Where it is desired to limit use of property to a public use without limiting the nature of the public use, the following clause shall be used:

> *"It is expressly made a condition herein that the conveyed property be used exclusively for public purposes for a period of fifteen (15) years from the recorded date of this deed; that if said property ceases to be used exclusively for public purposes during this fifteen (15)-year period, STATE may exercise its power of termination. In the event STATE exercises its power of termination, all title and interest to said property shall revert to the State of California, Department of Transportation, and that the interest held by GRANTEE, or its assigns, shall cease and terminate.*
>
> *The actual public use of the herein described property, must commence within _____ years from the recorded date of this deed and that public use shall continue through the remainder of the fifteen (15)-year period or STATE may exercise its power of termination."*

If a more restrictive clause that would limit use to a specific public purpose is desired, the following clause shall be used:

> *"It is expressly made a condition herein that the conveyed property be used exclusively for _____, a public purpose, for a period of fifteen (15) years from the recorded date of this deed; that if said property ceases to be used exclusively for _____, a public purpose, during this fifteen (15)-year period, STATE may exercise its power of termination. In the event STATE exercises its power of termination, all title and interest to said property shall revert to the State of California, Department of Transportation, and that the interest held by GRANTEE, or its assigns, shall cease and terminate.*
>
> *The actual public use of the herein described property as a _____, must commence within _____ years from the recorded date of this deed and that public use shall*

© 1994-2025 California Department of Transportation. All rights reserved.

continue throughout the remainder of the fifteen (15)-year period or STATE may exercise its power of termination."

For additional information on Direct Sales to Governmental Agencies, see Section 16.05.09.02 of this manual.

6.15.04.05 Clause for Soil Instability Caused by State Highway Construction

The following clause shall be included in all Director's Deeds, sales contracts, and public sales notices utilized in disposal of excess properties having a history of soil instability caused in part or in its entirety by State highway construction:

"It is mutually agreed and understood that this property may be subject to soil instability and that the grantees, for themselves and their successors or assigns, hereby waive any and all claims for damages resulting from further earth movement or soil instability which may occur because of prior actions by the State of California, its officers, agents and employees."

6.15.04.06 Slope Clause – Right to Remove

The following clause shall be included in applicable Director's Deeds, sales contracts, and public sales notices utilized in disposal of excess properties where its use might be helpful in the sale of property, or in realizing the maximum return on property:

"It is understood and agreed by the parties hereto that GRANTEE, for itself and their successors and assigns, shall have the right at any time to remove such slopes or portions thereof upon removing the necessity for maintaining such slopes or portions thereof or upon providing in place thereof other adequate lateral support. The design and construction of any support or changes in lieu of existing slopes shall first be approved by the State of California, Department of Transportation or such other public body having the right of said approval for the protection and support of said highway."

When the slope easement is no longer necessary, the State may clear the easement from the Public Record by a Director's Deed, quitclaiming the easement to the fee holder of the property.

© 1994-2025 California Department of Transportation. All rights reserved.

6.15.05.00 Execution of Documents

Similar to acquisition documents, the completion of steps required to legally formalize or execute a document is as important as the document itself. In addition to the signatures of the grantor (i.e., STATE), additional signatures are necessary for the disposal of real property and its interests, including:

- Certificate of Acknowledgment (see Section 6.09.05.01 of this manual).
- California Transportation Commission Certificate (see Section 6.15.05.02 of this manual).

For more information on the execution of documents, see Section 8.13.00.00 of this manual.

6.15.05.01 Certificate of Execution

SHC Section 118(b) requires that conveyance of real property by the State ***"shall be approved by the commission"*** and ***"executed on behalf of the State by the Director"***. The execution of a Director's Deed will be in the form of a certificate. The following statement should be used:

This conveyance is executed pursuant to the authority vested in the Director of Transportation by law and, in particular, by the Streets and Highways Code.

Dated _____ *STATE OF CALIFORNIA*
DEPARTMENT OF TRANSPORTATION

APPROVED AS TO FORM AND PROCEDURE

_____ *By*_____
ATTORNEY *Director of Transportation*

*By*_____
Attorney in Fact

© 1994-2025 California Department of Transportation. All rights reserved.

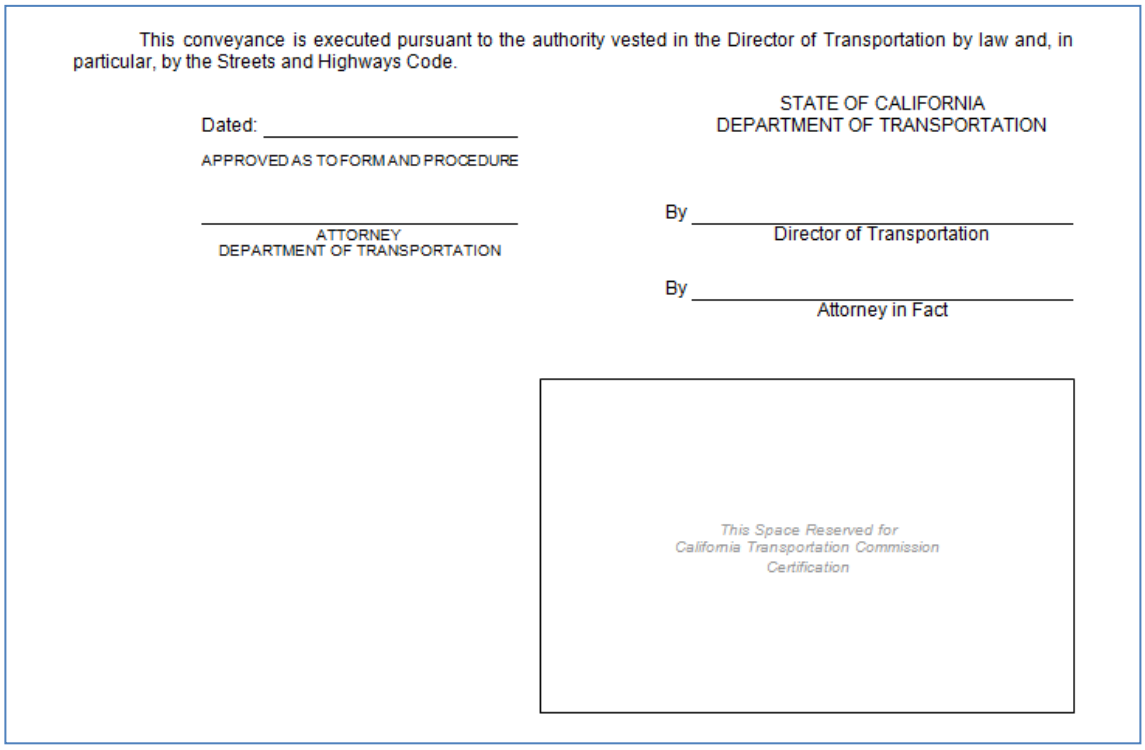
6.15.05.02 California Transportation Commission

The California Transportation Commission (CTC) is responsible for the programming and allocation of transportation funds used in the construction of highway and other transit improvements throughout California. Under the authority granted to the CTC by SHC Section 118 and Section 30410, and by agreement through CTC Resolution G-98-22 (revised October 28, 2004), Exhibit 16-EX-06.

Director's Deeds for conveying excess land under G-98-22 will include language stating that Caltrans has been delegated such prior approval authority by the CTC. The following statement will be affixed by the CTC Commissioner after approval:

> *"This is to certify that the California Transportation Commission has authorized the Director of Transportation to execute the foregoing deed under provisions of CTC RESOLUTION G-98-22, approved October 28, 1998, amending Resolution G-2, replacing Resolution G-97-12, pertaining to sale of excess property.*
>
> *Dated* _____ *By*_____

An area is to be reserved on the Director's Deed for CTC certification. This area should be no smaller than 4" wide by 2.5" tall, similar to:



© 1994-2025 California Department of Transportation. All rights reserved.

6.15.06.00 Maps

Director's Deed Maps or Excess Land Maps are used in appraisals, negotiations, and sales notices of real property or interest in real property being exchanged or sold by Caltrans. Director's Deed Maps are used by HQ in reviewing proposed transactions and may be referred to by members of the CTC. Director's Deed Maps will accompany all Director's Deeds and will consist of an Index and Plat Map.

There are four types of mapping requirements for Director's Deed Mapping. They include the following types of conveyances:

- Public Sale – Excess State land to be disposed of by public auction or public sealed bid.
- Findings A and B – Excess State land to be disposed of by direct sale to an adjoining owner.
- Exchange – Excess State land to be exchanged (typically with an adjacent property owner) for a right of way requirement.
- Contract Obligation – State land conveyed as in compliance with a contract obligation (utility agreement, cooperative agreement, clearance of cloud on title, etc.).

Requirements for Director's Deed Mapping can be found in Section 4-10 of the Plans Preparation Manual. The copies of the maps submitted to CTC must meet ADA remediation requirements to facilitate external website publication.

© 1994-2025 California Department of Transportation. All rights reserved.

6.16.00.00 – RECORD MAPS

6.16.01.00 General

A Right of Way (R/W) Record Map is used to present the *current status* of all real properties including interest in real properties under the jurisdiction and control of Caltrans. This includes operating right of way (fee, easements, etc.), excess lands, access rights, or other interests.

Data necessary to produce an intelligible, comprehensive right of way record should be shown on Record Maps. Construction details and data usually shown on plan layout sheets, not pertinent to the right of way, should be omitted.

Record Maps shall show all of the pertinent R/W information by one of the following methods:

A. All pertinent information contained on previously prepared Record Maps shall be incorporated into the most recent Record Map, and previous Record Maps shall be labeled "superseded" or destroyed.

B. The current Record Map shall show all the latest R/W requirements including R/W lines, access control, easements, etc. Parcels previously acquired shall be included in the new Record Maps by cross-referencing between the new and old Record Maps.

Public road connections approved by the California Transportation Commission are not required to be shown on the Record Map.

Requirements for R/W Record Maps are described in Section 4-12 of the Plans Preparation Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.16.02.00 Review of Record Maps

R/W Engineering shall verify with the Offices of Construction and Design as necessary, and make field reviews to ensure the following:

- R/W lines and legal access control are correctly represented.
- Easements outside the R/W lines, Joint Use Agreements (JUA) and Consent to Common Use Agreements (CCUA) within the R/W are correctly represented.
- Excess land is correctly represented.
- Areas to be relinquished and vacated have been entered on the relinquishment and vacation status and are correctly represented.
- All necessary cross-references to previous record mapping are complete.

6.16.03.00 Excess Land

Excess land is real property vested in the State of California, Department of Transportation, and is determined and certified to not be required for rights of way or other operational purposes of Caltrans.

For more information on Excess Lands, see Chapter 16 of this manual.

It may be necessary for R/W Engineering to advise Excess Lands by memorandum of all excess parcels created, eliminated, increased or decreased in size as a result of design changes subsequent to acquisition.

6.16.03.01 Porter Bill

A Director's lease of excess land, according to Section 104.15 of the Streets and Highways Code (SHC) (Porter Bill), shall be posted on the Record Map by showing graphically the boundary of the lease area and adding the Director's lease number on or adjacent to the lease area.

© 1994-2025 California Department of Transportation. All rights reserved.

6.16.04.00 Procedure for Making Public Records Available

For the purpose of complying with the California Public Records Act (CPRA), (Sections 7920-7391 of the Government Code), SHC Section 128 , and for the purpose of making required information available to the public in an orderly, uniform and economical manner, the following procedure is to be used:

A. A counter, desk or other suitable reception area will be maintained by R/W Engineering at a location where R/W Record Maps are readily available.

B. Specific R/W Engineering personnel will be assigned to receive parties making inquiries and aid them in finding parcels in the Record Maps.

C. When an inquiry is made on State-acquired parcels, the District will provide copies of the Record Map. Payments of fees are determined based on actual cost of copying the document(s).

D. All inquiries relating to any legal actions must be referred to the District Claims Officer for processing.

For more information on the CPRA, see Deputy Directive DD-79-R1 (internal Caltrans link) and its accompanying CPRA Guidelines (internal Caltrans link), set by Caltrans.

If certified copies are requested, the documents should be forwarded to the Division of Right of Way and Land Surveys for certification by the Director of Transportation. An additional charge per document will be made for certification. If requests are made for a Final Order of Condemnation or a Deed, the suit number or recording data will be furnished and the inquiring party should be referred to the County Clerk or County Recorder's office.

The above-mentioned procedures in no way affect the State's practices under the California Civil Discovery Act (Section 2016.010, et seq., of the Code of Civil Procedure) pertaining to information that can be obtained by means of various discovery devices in a condemnation action.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.00.00 – RELINQUISHMENTS

6.17.01.00 General

A relinquishment is a conveyance of all rights, title and interest of a state highway, or portion thereof, to a county or city (Streets and Highways Code [SHC] Section 73), infrastructural barriers (SHC Section 73.4), and specific to park and ride lots, to a county transportation commission, a joint powers authority (JPA) formed for purposes of providing transportation services, a transit district, or a regional transportation planning agency (RTPA) (SHC Section 73.01).

A relinquishment is a "statutory conveyance" by the California Transportation Commission (CTC).

The intent of a relinquishment is to dispose of lands no longer needed for the State Highway System, to a local entity for continued highway purposes. Disposal by excess lands should be used for lands determined to have a non-transportation purpose.

For additional information on Excess Lands, see Chapter 16 of the Right of Way Manual.

For additional information on Relinquishments, see Chapter 25 of the Project Development Procedures Manual (PDPM).

6.17.02.00 Definitions

The following list includes definitions to common terms used throughout this Chapter. Links and references to applicable laws, codes and references have been included to assist with further definition and context usage.

Collateral Facilities: a commonly used term for streets or roads and appurtenances constructed in connection with a state highway project that are not needed for continuity or the proper functioning of the State Highway System. Examples of these facilities include frontage roads, road connections, relocated or reconstructed roads, service roads, cul-de-sacs, and areas used by pedestrians, bicyclists, and equestrians. Facilities that are appurtenant may include landscaping, slope, and drainage or basin areas.

© 1994-2025 California Department of Transportation. All rights reserved.

Excess Lands: real property acquired by the state that is no longer necessary for highway purposes. (SHC Section 118)

Freeway: a highway in respect to which the owners of abutting lands have no right or easement of access to or from their abutting lands or in respect to which such owners have only limited or restricted right or easement of access. (SHC Section 23.5)

Highway: includes bridges, culverts, curbs, drains, and all works incidental to highway construction, improvement, and maintenance. May also include road, street, avenue, alley, lane, driveway, place, court, trail, or other public right-of-way or easement. (SHC Section 23 and Section 8308)

Infrastructural Barrier: a state highway for which high speeds, grade separation, or other design factors displaced residences or create an obstacle to connectivity (SHC Section 73.4), including any of the following:

1. Obstacles to walking, biking, or mobility.
2. Diminished access to destinations across the infrastructural barrier.
3. Barriers to the economic development of the surrounding neighborhood.

Legislative Deletion (Relinquishment): the removal of all or a portion of state highway from the State Highway System (SHS) through legislative action. This process removes the highway from the SHS prior to relinquishment. This type of relinquishment is mandatory to the local agency. The CTC shall relinquish and the local agency must accept it.

Legislative Enactment (Relinquishment): the use of legislative action to authorize the CTC to relinquish all or a portion of a state highway from the State Highway System that no longer serves interregional or statewide transportation needs.

Nonmotorized Transportation Facility: a facility designed primarily for the use of pedestrians, bicyclists, or equestrians. (SHC Section 887)

Park and Ride Lot: the term used to describe a parking facility located along or near the State Highway System that provides a location for individuals to park their vehicles to join carpools and to access bus and/or rail services. (Title 23, Code of Federal Regulations [CFR], Section 810.106)

State of good repair: a phrase used in SHC Section 73 to describe a highway that is safe, operable, and well-maintained. The phrase does not include widening, new construction, or major reconstruction, except when

© 1994-2025 California Department of Transportation. All rights reserved.

directed by the CTC. Capacity increasing improvements or betterments are not included when bringing a highway to a *state of good repair*.

Superseded State Highway: a state highway that has been relocated, realigned, or built on an alignment different from the prior alignment, making the superseded alignment unnecessary for state highway purposes.

6.17.03.00 Policy

It is the policy of the California Department of Transportation (Caltrans) to relinquish all interests in state highways deleted by legislative enactment, state highways superseded by relocation, and adjacent public ways (collateral facilities) which have been constructed as part of a highway project but are not essential to the proper functioning of the state highway facility (SHC Sections 73 and 73.01). For the purpose of this manual, the use of the phrase, legislative deletion is synonymous to relinquishment by legislative enactment.

Relinquishments are unnecessary for adjacent public ways improved as part of a state highway project if there was no additional acquisition of rights or title. These adjacent public ways lie outside of Caltrans' normal operating right of way.

Federal and State authorities have agreed to acceptable relinquishment procedures and federal conditions on all Federal Aid projects as follows:

A. Sections of the *state highway superseded by construction on a new location* are usually relinquished to local authority for control, maintenance and operation. According to SHC Section 73, "*The commission [CTC] shall not relinquish to any county or city any portion of any state highway that has been superseded by relocation until the department [Caltrans] has placed the highway, as defined in Section 23, in a state of good repair.*"

   Under these circumstances, a section of highway superseded by construction of a new project, approved by the Federal Highway Administration (FHWA) as the new location of the particular Federal Aid route, is not a part of the Federal Aid highway system and the superseded section may be disposed of without referral to the FHWA. Federal Aid funds may not participate in rehabilitation work performed for the purpose of placing the road to be relinquished in a condition acceptable to the local authority (23 CFR 620.203[c][1]).

© 1994-2025 California Department of Transportation. All rights reserved.

B. In connection with freeway projects, *reconstructed local facilities*, that are located outside access control lines, such as turnarounds of severed local roads or roads adjacent to the freeway right of way, and local roads and streets crossing over or under the project that have been adjusted in grade and/or alignment, including any new right of way required for adjustments, are relinquished to local authorities for control, maintenance, and operation. Structures over or under the freeway within the state highway right of way lines are retained under State jurisdiction.

   Under these circumstances, the State obtains custody of the local facilities. Any new right of way required for adjustments, and only for the time necessary for performing the construction involved in the adjustments, never become a part of the State highway system or Federal Aid highway system. These local facilities may be allowed to revert to local custody without referral to the FHWA. Eligibility of such adjustments for Federal Aid participation is as determined at time of Plans, Specifications & Estimates (PS&E) approval under policies of the FHWA.

C. Frontage roads, or portions of frontage roads not necessary as extensions of freeway ramps to connect the freeway with the nearest crossroads or streets, are constructed generally parallel to and outside of the access control lines of the freeway. This permits access to private properties, and thus reduces or eliminates claims for severance damages by those whose access rights are affected by freeway construction. This also restores local travel circulation that has been disrupted by the severing or adjustment of local streets and roads. Such frontage roads, or portions thereof, are relinquished to the local authority for control, maintenance, and operation.

   Frontage roads constructed under these conditions are not a necessary part of the State highway system or the Federal Aid system and may be relinquished to local public authority without referral to the FHWA. Eligibility of such frontage roads for Federal Aid participation will be as determined at the time of PS&E approval under policies of the FHWA.

D. Frontage roads, or portions of frontage roads outside access control lines of the freeway, are constructed to serve (in lieu of, or in addition to, the purposes outlined under C. above) as connections between ramps to or from the freeway and existing public roads or streets. In effect, these become part of the ramps, and are retained in the custody of the State for control, maintenance, and operation. A frontage road, or portion of a frontage road, which serves as an

© 1994-2025 California Department of Transportation. All rights reserved.

extension of a ramp from a freeway to a local public road or street, is necessary to the intended functioning of the Federal Aid freeway and may not be released from State jurisdiction without approval of the FHWA.

E. Ramps are constructed to serve as connections for interchange of traffic between the freeway and local roads or streets. Ramps are generally within project access control lines for the full length except at the point of connection with the local road or street. Ramps are retained in the custody of the State for control, maintenance, and operation.

   All ramps constructed to serve for interchange of traffic between the freeway and local roads or streets are necessary for the intended functioning of the Federal Aid freeway and may not be released from State jurisdiction without approval of the FHWA.

The State may relinquish to local government jurisdictions, without referral to the FHWA, on a project-by-project basis items A., B., and C. above, subject to the following conditions and understandings:

Immediately following action by the CTC in approving relinquishment to local governmental jurisdiction of facilities in which there has been participation of Federal Aid funds, Caltrans will furnish the FHWA Division Engineer, for record purposes, a copy of a suitable map, or maps, identified by the Federal Aid project number and the date of the CTC action, clearly delineating the facilities to be relinquished. (23 CFR 620.203[f][1])

If at any time after relinquishment the relinquished facility is required for proper operation of the Federal Aid freeway, Caltrans will take immediate action to restore such facility to State jurisdiction. (23 CFR 620.203[f][2])

If at any time a relinquished frontage road, or portion thereof, or any part of the right of way therefore, has been vacated by local governmental authority and a showing cannot be made that the vacated facility is no longer required as a public road, the FHWA may withhold Federal Aid highway funds due to the State an amount equal to the Federal Aid participation in the vacated facility. (23 CFR 620.203[f][3])

© 1994-2025 California Department of Transportation. All rights reserved.

In no case shall any relinquishment include any portion of the right of way within the access control lines as shown on the plans for a Federal Aid project approved by the FHWA without prior approval from the FHWA. (23 CFR 620.203[f][4])

There cannot be additional Federal Aid participation in future construction or reconstruction on any relinquished "off the Federal Aid system" facility unless the underlying reason for such future work is caused by future improvement of the associated Federal Aid highway. (23 CFR 620.203[f][5])

© 1994-2025 California Department of Transportation. All rights reserved.

FHWA Approval Summary Chart

Relinquishment Description	Legal Citation	Performed in Accordance with	FHWA Approval Required
Park and Ride Lots	Public Law 114-94, Section 1423	23 CFR 620.203(f) 23 CFR 620.203(i) 23 CFR 620.203(j)	Yes
Highway superseded by construction on new location	23 CFR 620.203(c)(1)	23 CFR 620.203(f)	No*
Interstate mileage	23 CFR 620.203(c)(1)	23 CFR 620.203(f)	Yes
Reconstructed local facilities outside access control	23 CFR 620.203(c)(1)	23 CFR 620.203(f)	No
Frontage roads outside access control for the purpose of permitting access to private properties	23 CFR 620.203(c)(3)	23 CFR 620.203(f)	No
Frontage roads outside the access control for the purpose of connections between ramps or public roads	23 CFR 620.203(d)(1)	23 CFR 620.203(g)	Yes
Ramps constructed to serve as connections between Federal Aid project and local roads or streets	23 CFR 620.203(d)(2)	23 CFR 620.203(g)	Yes
Any portion of the right of way within access control lines	23 CFR 620.203(f)(4)		Yes

*Relinquishment is approved as part of the project construction of the new highway location.

6.17.03.01 Status of Relinquishments

Deputy Directive DD-52-R2, Relinquishment of Transportation Facilities (internal Caltrans link), requires, in part, a quarterly status report of relinquishments previously identified by the Districts. The Districts shall prepare, maintain, and provide to the Division of Right of Way and Land Surveys, HQ Office of Land Surveys (OLS), an up-to-date listing of relinquishments that need to be completed. The list should include current status and reasons for any delay in

© 1994-2025 California Department of Transportation. All rights reserved.

completing the relinquishment process on schedule as well as containing sufficient information to describe without undue investigation the latest completed step in the relinquishment process.

If the relinquishment is delayed to the extent that the Project EA or Project Number is closed and cannot be charged to, arrangements must be made to complete the relinquishment projects to avoid long term costs and risks.

Relinquishments shall be entered on the status not later than 30 days after award of a construction contract for a project that contains highway right of way requiring relinquishment.

Relinquishments that are a result of policy change but that are not connected with new construction projects shall be entered on the relinquishment status within 90 days of issuance of the policy change.

Relinquishments that are a result of right of way requirement changes not connected with new construction projects shall be entered on the relinquishment status at the time right of way changes are completed on Right of Way Record Maps.

6.17.04.00 Relinquishment Types

The California Transportation Commission is authorized to dispose of highway right of way through the relinquishment process by resolution. Statute law (Streets and Highways Code [SHC] Sections 73, 73.01, and 73.4) governs the types of relinquishments allowed and are further described in this Section, including:

1. Legislative Enactment
2. Superseded State Highway
3. Collateral Facilities
4. Nonmotorized Transportation Facilities
5. Park and Ride Lots
6. Infrastructural Barriers

Portions of the state highway that fall under 23 CFR 620 Subpart B: Relinquishment of Highway Facilities, can only be relinquished "*for continued highway purposes*."

All other purposes must be disposed of through the excess land process. (Chapter 16 of the Right of Way Manual, 23 CFR 710.409)

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.04.01 Relinquishment to Local Agencies

SHC Section 73 authorizes relinquishment to a county or city in the following four situations:

1. Where a state highway has been deleted from the State highway system by legislative enactment.

2. When a state highway, or portion thereof, has been superseded by relocation.

3. Where frontage or service roads, or outer highways, having a right-of-way of at least 40 feet in width, have been constructed as part of a state highway project but do not constitute a part of the main traveled roadway.

4. Any nonmotorized transportation facility, as defined in SHC Section 887, that has been constructed as part of a state highway project and does not lie within the main traveled way. For additional information on nonmotorized transportation facilities, see PDPM Chapter 31.

The phrase *legislative deletion* describes a state highway deleted through a legislative action that changes the description of the route to no longer include all or a portion of a state highway from "here to there." The CTC *shall* relinquish the highway to the local agency and the local agency *must* accept it. The relinquishment is mandatory and no agreement with the local agency is required. In this case, the description of the route is changed before the relinquishment occurs.

In most cases, legislative action is used to authorize the CTC to relinquish a portion of or all of a state highway to a local agency having jurisdiction (legislative enactment). The action is made by a Senate or House Bill and appropriate language will be included in the relinquishment agreement and CTC Relinquishment Resolution. The enacted Senate or House Bill gives the CTC authority to relinquish, not SHC Section 73. In this case, the description of the route is changed after the relinquishment occurs, normally in the annual Omnibus Bill.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.04.02 Relinquishment of Park and Ride Facilities

Caltrans constructs, maintains, and operates parking facilities located along the State highway system. Such facilities are considered a part of the state highway (SHC Sections 146.5 and 148). If it is considered in the best interests of the State and there is an agreement with a local agency, these facilities can be relinquished to a city or county (SHC Section 73). FHWA approval must be obtained if Federal funding was used to acquire right of way for, or in the construction of, the parking facility.

California SHC Section 73.01
In January 2013, SHC Section 73.01 became law, which allows the CTC to relinquish to a county transportation commission or regional transportation planning agency (RTPA), park and ride lots that are within their respective jurisdictions. Effective January 1, 2015, SHC Section 73.01 was amended to include joint powers authority (JPA) and transit districts. An agreement is required between Caltrans and the county transportation commission, JPA, transit district, or RTPA. As a part of the agreement, the commission, district, or agency must maintain, at a minimum, the same number of parking spaces as were maintained by Caltrans at the time of the relinquishment.

US Public Law 114-94, Section 1423
The relinquishment of park and ride lots must also meet the requirements of Public Law 114-94, Section 1423 (Relinquishment of Park-and-Ride Lot Facilities). FHWA has determined that the relinquishment should be in accordance with the procedures in 23 CFR 620.203 (f), (i), and (j).

For additional information on Park and Ride Lot agreements, see Division of Project Management, Office of Delivery Improvement and Agreements (internal Caltrans link).

For additional information on relinquishments of Park and Ride Lots, see "Relinquishment of Park-and-Ride Lots to County Transportation Commissions and Regional Transportation Planning Agencies" in PDPM Chapter 25, Article 4.

For additional information on Park and Ride Lots, see the Park and Ride Program Resource Guide (internal Caltrans link), provided by the Division of Traffic Operations, Office of Mobility and System Performance (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.04.03 Relinquishment of Infrastructural Barriers

On September 30, 2022, SHC Section 73.4 was added to law by Assembly Bill 512, becoming effective on January 1, 2023.

SHC Section 73.4 introduces the relinquishment of an Infrastructure Barrier, defining it as a state highway for which high speeds, grade separation, or other design factors displaced residences or create an obstacle to connectivity, including any of the following:

1. Obstacles to walking, biking, or mobility.
2. Diminished access to destinations across the infrastructural barrier.
3. Barriers to the economic development of the surrounding neighborhood.

SHC Section 73.4 allows the CTC to "…*relinquish a portion of a state highway that constitutes an infrastructural barrier to a county or city if the department and the applicable county or city have entered into an agreement providing for the relinquishment of the portion of the state highway,*" if **ALL** of the following conditions are met:

1. The portion of the state highway is located within the territorial limits of the city or county entering into the agreement.
2. The commission determines the relinquishment is in the best interest of the State.
3. The commission holds a public hearing on the proposed relinquishment to solicit input from the public.
4. The purposes of the relinquishment are for restorative economic and social justice, including, but not limited to, transit-oriented development, affordable housing for low- and moderate- income people, green space, or active transportation infrastructure.
5. The infrastructural barrier shall be removed or retrofit in a manner that enhances community connectivity and that is sensitive to the context of the surrounding community. The retrofit of the infrastructural barrier may include, but is not limited to, placing a freeway cap on the infrastructural barrier or replacing the infrastructural barrier with an at-grade arterial roadway.
6. Any land made available by the removal or retrofit of the infrastructural barrier shall be redeveloped for the purposes specified in paragraph (4.) with a focus on implementing improvements that will benefit the populations impacted by or previously displaced by the infrastructural barrier.
7. A part of the relinquished portion of the state highway shall be used for transportation purposes to ensure the continuity of traffic flow.

© 1994-2025 California Department of Transportation. All rights reserved.

8. The relinquishment is consistent with federal law and regulations and does not require reimbursement to the federal government of any federal funding.
9. The relinquishment is consistent with Article XIX of the California Constitution.
10. The city or county determines that the construction of the infrastructural barrier had a significant impact on a disadvantaged community. An impact is significant if **ALL** of the following criteria are met:
    A. There was a disproportionate impact on the disadvantaged community, including, but not limited to, creating obstacles to mobility or economic development or exposing the disadvantaged community to high levels of particulate matter, noise pollution, or other public health and safety risks.
    B. A causal connection exists between the construction of the infrastructural barrier and the disproportionate impact.
    C. The construction lacks a substantial legitimate justification for the disproportionate impact and a reasonable nondiscriminatory alternative could not be identified.

Additionally, SHC Section 73.4 states that the relinquished portion of state highway under this statute shall be ineligible for future adoption under SHC Section 81.

6.17.05.00 FHWA Review and Approval

The foundation of current State relinquishment policy (6.17.03.00) is based on negotiations between FHWA and Caltrans, which began in 1961. Then State Highway Engineer, J.C. Womack, and Federal Highway Administrator, Rex M. Whitton developed and agreed upon procedures for relinquishments that were acceptable for use on Federal Aid projects.

Federal Aid projects are those projects in which federal funds were used to acquire right of way for or in construction of the project. Relinquishments must be "*for continued highway purposes*" and meet the requirements as stated in 23 CFR 620 Subpart B: Relinquishment of Highway Facilities and Public Law 114-94, Section 1423: Relinquishment of Park-and-Ride Lot Facilities.

Important Considerations:

- It is critical to have an informed transparent discussion with FHWA, early in the process, on all aspects of a proposed relinquishment. A relinquishment, without FHWA review, buy-in, concurrence and final approval, may never happen and efforts may well prove to be a waste of time and resources.

© 1994-2025 California Department of Transportation. All rights reserved.

- FHWA approval of a proposed relinquishment is required when any portion of the proposed relinquished right of way lies within access control lines as shown on the plans for a Federal Aid project previously approved by the FHWA.

- Design determines when access rights are no longer needed. They obtain necessary approvals for disposal from the FHWA. Access rights proposed to be relinquished should be brought to the attention of Design by Right of Way Engineering at the earliest practicable time. This will allow Design adequate time to work with Project Management to obtain FHWA approval and prevent delays in the relinquishment process. Right of Way Engineering relinquishment files should document the coordinating effort with Design and Project Management.

  FHWA approval must be obtained for relinquishment of any Park and Ride facility in which federal funds were used for right of way acquisition or construction.

- For relinquishment requests submitted to HQ OLS which require FHWA review and approval, the approval comes in a 2-step process:

  1. Obtain ***concurrence*** from the FHWA transportation engineer assigned to the District, which should occur as early as possible to not waste time or effort on relinquishments in which FHWA will not approve.
  2. Obtain formal ***approval*** from the FHWA Division Administrator after all required documents are approved and prior to relinquishment package submittal to HQ OLS.

  - In some situations, FHWA approval may have been provided in plans for a "new highway project." If the constructed facility has no changes to the original approved plans, the FHWA two-step process may not be required. Design should always be consulted.

Right of Way Engineering works closely with Design and Project Management in the relinquishment process. For more detailed information on the FHWA relinquishment approval process, as well as "FHWA Relinquishment Approval Letter" templates (internal Caltrans link), and documentation that must accompany the letter, see PDPM Chapter 25, ARTICLE 4 Essential Procedures, Federal Highway Administration Review and Approval.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.06.00 Environmental Review and Approval

Without exception, all relinquishments require Environmental review prior to disposal. An Environmental Disclosure Memorandum (EDM), formerly called Hazardous Waste Assessment, is an abbreviated Initial Site Assessment and is used to screen and assess projects for potentially hazardous waste involvement, providing environmental clearance for property disposal.

The EDM is prepared by District Environmental Analysis and must be reviewed by HQ Environmental Analysis. The local agency receiving a relinquishment must receive a copy of the EDM and agree to accept the relinquishment in its current environmental condition as stated in the EDM. Local Agency acceptance will be included in the language of the relinquishment agreement or if no agreement exists, in the language of the local agency acceptance document.

The EDM must be *current,* dated within one year of the anticipated CTC meeting date. If the EDM is not current, it must be updated. The District must coordinate with their Environmental Analysis staff to ensure they have obtained a current EDM at the time of the relinquishment submittal to HQ OLS.

Current practice allows for some leeway as to the necessity of obtaining local agency acceptance for updates to the EDM if there is no substantive change to the environmental conditions. This does not remove the one-year requirement by Environmental Analysis for an up-to-date EDM.

The following language was approved February 2023 by Legal and may be used in the local agency acceptance document:

> *"It is understood that within one year prior of the CTC date of approval of the resolution of relinquishment, CALTRANS will conduct a review of the above-referenced [specify EDM or other document(s) similar to EDM] and if it determines that there is substantive or potentially substantive adverse change to the environment that did not exist at the time of the above-referenced [specify EDM or other document(s) similar to EDM], CALTRANS shall immediately notify [LOCAL AGENCY] of said changes. If no substantive or potentially substantive adverse change to the environment is found to exist, acceptance of the relinquishment in its current environmental condition shall remain in effect. Copies of the above-referenced [specify EDM or other document(s) similar to EDM] and any updates are available at the district environmental office."*

© 1994-2025 California Department of Transportation. All rights reserved.

For additional information on the Hazardous Waste Program, see Division of Environmental Analysis, Office of Hazardous Waste (internal Caltrans link).

The Standard Environmental Reference (SER) Manual provides guidance for Caltrans staff and local agencies for transportation projects. See Volume 1, Chapter 10 (Hazardous Materials, Hazardous Waste, and Contamination) for specifics relating to relinquishments.

6.17.06.01 Preservation Covenants

The environmental assessment may reveal areas that have historical, cultural, or biological significance that must be preserved. Impacts upon the proposed relinquishment are resolved by Environmental Analysis staff on a case-by-case basis. Normally, the State and local agency will consent to and agree upon terms and conditions for preservation of these areas in a "Preservation Covenant." The covenant is further referenced in the CTC Relinquishment Resolution.

The Standard Environmental Reference (SER) Manual provides guidance for Caltrans staff and local agencies for transportation projects. See Volume 2 (Cultural Resources).

6.17.07.00 Local Agency Review and Approval

A relinquishment to a local agency must be reviewed and approved by the entity having jurisdiction over the area to be relinquished. SHC Section 73 requires *"90 days' notice in writing of intention to relinquish"* to the county (Board of Supervisors) or city (City Council) for relinquishments. The only exception is for a state highway that has been deleted from the State highway system by legislative action.

A 90-Day Letter of notification of intent to relinquish provides notice to a local agency of a pending relinquishment and is required for all other types of relinquishments.

It is assumed that a relinquishment of superseded highway has already received consent through negotiations with the local agency during early adoption of the new highway alignment. Although there is no legal requirement through SHC Section 73 for the consent from the county (Board of Supervisors) or city (City Council) to relinquish superseded portions of a state highway, in the interest of courtesy and cooperative effort District Directors will contact local authorities and advise them of the impending

© 1994-2025 California Department of Transportation. All rights reserved.

action and their responsibility for future maintenance before recommending relinquishment to HQ OLS.

Consent by a local agency of a relinquishment of collateral facilities, including park and ride lots, and nonmotorized transportation facilities is a legal requirement through SHC Section 73 and SHC Section 73.01. This is typically given in an agreement or by resolution adopted by the local agency, in a clause which provides for the local agency to accept control and maintenance over each of the "…*relocated or reconstructed city streets (or county roads), frontage roads and other State-constructed local roads*…" and "…*will also accept title to the portions of such roads lying outside the State highway limits upon relinquishment by the State.*"

SHC Section 73.4 also requires an agreement with a county or city for a relinquishment of an infrastructural barrier.

6.17.07.01 Agreements

Agreements can be formal and legally binding contracts between two or more entities. For state projects, they may describe details, obligations, and responsibilities agreed upon by all parties for a specific project. These agreements must adhere to standards, policies, and procedures that Caltrans would normally follow when it plans, designs, and constructs projects on the State highway system to ensure safe operations of the state highway.

Freeway or Controlled Access Highway Agreement
HQ Design (internal Caltrans link), Office of Project Development Procedures provides guidance for Freeway or Controlled Access Highway Agreements. These agreements document the understanding between Caltrans and the local agency regarding the planned traffic circulation features of the proposed freeway or controlled access highway.

Freeway agreements are required for all freeway projects. They occur before the purchase of right of way or start of construction and may highlight the need for relinquishment(s) after construction complete.

© 1994-2025 California Department of Transportation. All rights reserved.

In some cases, a freeway or controlled access agreement has the following "Notice of Completion" clause:

> *"[Local agency] will accept control and maintenance over each of the relocated or reconstructed [Local agency] roads, any frontage roads, and other local roads constructed as part of the project, on receipt of written confirmation that the work thereon has been completed, except for any portion which is adopted by STATE as a part of the freeway proper. If acquired by STATE, [Local agency] will accept title to the portions of such roads lying outside the freeway limits upon relinquishment by STATE."*

The above clause transfers control and maintenance to the local agency after written notification and minimizes any ambiguity of local agency use and Caltrans' liability.

The formal Notice of Completion (NOC) should be submitted by the Project Manager to the local agency as soon as possible after construction is complete to provide notice to the local agency and other Caltrans' functions of close-out activities, such as relinquishment, to be completed.

Contact HQ OLS for current examples of a formal NOC.

For additional information on Freeway and Controlled Access Agreements, see PDPM Chapter 24.

Cooperative Agreement

Cooperative Agreements between the State and local public entities outline high-level responsibilities and may include improvements, financial sponsors, implementing agencies, and funding commitments. These agreements must adhere to standards, policies, and procedures that Caltrans would normally follow when it plans, designs, and constructs projects on the State highway system to ensure safe operations of the State highway system.

The headquarters Office of Delivery Improvement and Agreements (ODIA) (internal Caltrans link) provides tools, training, and guidance to support Project Development Teams with the development and completion of consistent and responsible cooperative agreements.

For additional information on Cooperative Agreements, see the Cooperative Agreement Handbook (internal Caltrans link) and PDPM Chapter 16.

© 1994-2025 California Department of Transportation. All rights reserved.

Relinquishment Agreement
A Relinquishment Agreement is a cooperative agreement specific to relinquishments.

Two Relinquishment Agreement templates are available through ODIA and address specific types of relinquishments depending on the statute authority:

- Relinquishment (State Highway) Agreement – Addresses relinquishments made per SHC Section 73.

- Relinquishment (Park and Ride Lot) Agreement – Addresses relinquishments made per SHC Section 73.01.

Unlike a freeway agreement, a relinquishment agreement typically includes a waiver to the 90-day notice that is required by SHC Section 73, allowing the State to relinquish as soon as it has been reviewed, approved, and cleared by both District and HQ.

Local Resolution
In the absence of a relinquishment agreement, the local agency may provide a local resolution prepared and approved by the county (Board of Supervisors) or city (City Council), to accept the relinquishment. Including a clause to acknowledge receipt of the EDM and waiver for the 90-day notice (as required by SHC Section 73) can save time and effort. In the absence of acceptance and waiver of the 90-day requirement by the local agency, a 90-day notice of our intent to relinquish is required.

90-day Notice of Intention to Relinquish
For all relinquishments to a city or county, except for relinquishments by legislative enactment, Caltrans is required to give a 90-day notice of our intention to relinquish to the county (Board of Supervisors) or city (City Council). The notice is by certified mail, return receipt requested. Accompanying the notification letter are a draft CTC Resolution of Relinquishment, draft relinquishment map, and current environmental documents related to the relinquishment.

In most cases, a relinquishment will already have a local agency acceptance which includes a waiver to the 90-day notice requirement. However, there may only be a freeway agreement or there may be no local acceptance of the relinquishment at all. In this case, it is imperative that the District either obtains a documented waiver to the 90-day notice requirement or requests HQ OLS send the 90-day Notice of Intent. If there is no reply to the 90-day notice by a local agency the CTC Relinquishment Resolution will contain a

© 1994-2025 California Department of Transportation. All rights reserved.

recital as to the sending and receiving of the 90-day notice and the relinquishment will proceed to the CTC.

The 90-day period begins upon receipt of the letter by the local agency. The local agency then has 90 days in which to protest the relinquishment.

6.17.07.02 Protest by Local Agency

SHC Section 73 requires Caltrans to provide "90-days' notice in writing of intention to relinquish to the board of supervisors, or city council." During this time period, the local agency has a right to protest the relinquishment. The protest must be in writing, in the form of an official letter, outlining the reasons for the protest.

Caltrans works directly with local agency decision makers to address concerns they may have related to a particular relinquishment proposal. Common protests include what constitutes "state of good repair" or Caltrans denial of local agency requests for improvements.

Every "90-Day Notice of Intent to Relinquish" letter identifies a specific District contact should a local agency wish to protest a relinquishment. However, in practice, local agencies have also sent letters directly to the CTC, or to HQ OLS. If a protest letter is received by the CTC, the CTC will respond. If a letter is received by HQ OLS, HQ OLS will send a letter to the local agency, acknowledging receipt of the protest letter and informing them of the suspension of action on the proposed relinquishment until the protest has been resolved. If the protest letter is received by the District, a copy of the letter will be forwarded to HQ OLS, along with the District's plans of resolution to the protest.

It is Caltrans policy to resolve conflicts at the lowest level possible, at the District. If a solution to a local agency protest cannot be found at a low level, there is a progressive conflict resolution process in place.

If a local agency protests a relinquishment proposal, the District will follow procedures set forth in PDPM Chapter 25 Article 5 – Conflict Resolution Process.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.07.03 Changes Subsequent to Agreement

When changes occur in the project after an agreement has been executed, an amendment to the original agreement is recommended. In the absence of an amended agreement, or in situations which are appropriate for relinquishment and are not covered by an agreement, a Resolution of Acceptance or Letter of Consent from the county (Board of Supervisors) or city (City Council) shall be forwarded to HQ OLS with the letter of transmittal requesting the relinquishment resolution. It may save time to include in the resolution or letter, a waiver of the "90-Day Notice of Intention to Relinquish," as required by SHC Section 73 along with a copy of the EDM, as described in 6.17.06.00.

6.17.08.00 Segment Numbering

A number is given to each continuous segment of legislative deletion, superseded state highway, collateral facility, nonmotorized transportation facility, park and ride lots, or infrastructural barrier proposed to be relinquished to a single local agency. A continuous segment includes all contiguous rights of way, including slope and drainage easements, and is given a single number. Legislative deletions, superseded highway, collateral facilities, nonmotorized transportation facilities, park and ride lots, and infrastructural barriers are identified by separate numbers (e.g., Segment 1, Segment 2, etc.).

A collateral facility that is one continuous segment on the freeway agreement map will generally carry one segment number on the relinquishment map.

Park and ride lots (SHC Section 73.01) proposed to be relinquished to a county transportation commission, RTPA, JPA, or transit district are given a separate segment number for each distinct park and ride lot.

An Infrastructure Barrier (SHC Section 73.4) proposed to be relinquished to a single local agency will have an individual segment number for each continuous segment as shown on the relinquishment map attached to the relinquishment agreement. Segments having a transportation or non-transportation use will have separate numbers.

Exceptions may be made in the above-numbering procedure when necessary to expedite the relinquishment process or to clarify unusual situations. Exceptions should be explained in the Relinquishment Request submitted to HQ OLS.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.09.00 Access Restrictions

Access will not be reserved to the State on lines between private property and the road to be relinquished. Any deviation from this policy shall require a memorandum from the Project Engineer detailing the operational necessity of such action. The memorandum should be kept in the District files and a copy included within the relinquishment submittal package.

If access is to be restricted between the relinquished road and an adjacent State freeway, the following clause will be added at the end of the legal description:

> *EXCEPTING AND RESERVING to the State of California any and all rights of ingress to and egress from the highway hereby relinquished in and to the adjacent and adjoining freeway, except at such points as now are or may be established by resolution of this Commission.*

6.17.09.01 Ramp Junction Limits

It is the policy of Caltrans to acquire access rights and to protect such rights with appropriate fencing along interchange ramps to their junctions with the local road system. Details regarding this policy are stated in the Highway Design Manual.

For roads that have been constructed as a part of a state highway project, but which will become part of the local road system upon relinquishment, Caltrans policy is to establish cutoff lines between ramps and roads to be relinquished along normal right of way lines of the local road system of which the roads will become a part. In most cases, cutoff lines will be between the ends of access control fences constructed to protect ramp access rights.

Sound engineering judgment must be used in the application of this policy. In no case may facilities, which are essential to proper flow of traffic on freeways, be relinquished. In cases of doubt, Design must be consulted.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.10.00 Segment Descriptions

Relinquishment segments can be described in various ways, depending on the type of relinquishment and whether the description of the segment is through a written legal description, such as a metes and bounds description, or by making reference to a recorded map depicting the segments, which is the preferred method.

Legislative and Superseded by Relocation
Legal descriptions of state highway right of way, deleted by legislative enactment or superseded by relocation, may be described in general terms sufficient to identify the area to be relinquished, provided definite terminal limits are described.

Where the superseded highway is adjacent to the new state highway, the common boundary between right of way to be relinquished and right of way to be retained must be described or defined by some recorded reference or by an actual description of said line.

Collateral Facilities
Collateral Facilities include streets or roads and appurtenances constructed in connection with a state highway project. Frontage roads or relocated public roads that will constitute new public roads (as distinguished from a superseded existing road) must have their boundary fully described. This requirement may be fulfilled by giving either the correct centerline description with right of way widths stated, a metes and bounds description, or a description referring to recorded maps. The reason for the distinction between frontage roads or relocated public roads, and superseded public roads, is that the width and location of the superseded road can be determined by record. The construction of a frontage road or relocation of a public road to accommodate the new state highway creates a new road or roads that did not exist prior to construction.

Reference to a Recorded Map
Caltrans may file relinquishment maps in State Highway Map Books (SHC Sections 128 and 129) or record a Record of Survey map which depicts the proposed segments to be relinquished. The relinquishment is referenced to the filed/recorded maps. The maps must contain the same basic information required when a relinquishment is entirely by legal description.

Care should be exercised when using a Record of Survey to show the relinquishment segments. It is Caltrans policy to relinquish as soon as possible after completion of the related construction project. A relinquishment should

© 1994-2025 California Department of Transportation. All rights reserved.

not be delayed because of a lengthy amount of time required to gain County Surveyor approvals and to record a Record of Survey.

Requirements for Relinquishment Maps are described in Chapter 4-13 of the Plans Preparation Manual.

Requirements for Record of Survey Maps are described in Section 8762, et seq., of the Business and Professions Code (BPC) and must be made under the direction of a licensed Land Surveyor or pre-1982 registered Civil Engineer, as required by State law. An additional guide is available from the County Engineers Association of California, titled Guide to the Preparation of Records of Survey and Corner Records.

Written Legal Description
Legal descriptions for a relinquished segment must follow the rules of all other legal descriptions written by a licensed land surveyor (BPC Section 8700 et seq.).

6.17.11.00 Special Circumstances

Special circumstances may become important factors to consider when relinquishing highway right of way. Projects should be reviewed thoroughly to ensure they comply with State and Federal laws, and Caltrans policies, under the guidance of Caltrans Legal.

6.17.11.01 Excess Lands

In some cases, small portions of land that are unsalable or of nominal value that are included within the right of way lines may be relinquished as part of the highway right of way. These excess lands are the only exception to disposal by relinquishment. Work closely with HQ OLS when considering inclusion of excess lands as part of a relinquishment.

For additional information on Excess Lands, see Chapter 16 of the Right of Way Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.11.02 Federal Lands

Care should be exercised when contemplating a relinquishment of state highway over Federal lands, such as the US Forest Service or the Bureau of Land Management. If Caltrans acquired a highway easement from a Federal agency, it is possible that the easement is not transferable and must be vacated, with a new easement conveyed from the Federal agency to the local agency in a separate arrangement. Likewise, highway rights to Caltrans may be by permit and may not be transferable and may terminate upon relinquishment.

Caltrans, the local agency, and the Federal agency should meet and agree beforehand as to what procedures will be acceptable to all parties, prior to relinquishment.

6.17.11.03 Tribal Lands

Care should be exercised when contemplating a relinquishment of state highway over Federally recognized Tribal lands, served by the Bureau of Indian Affairs (BIA), U.S. Department of the Interior. The State may have acquired a highway easement from a Federal agency, such as the BIA, and it is possible that the easement is not transferable and must be vacated, with a new easement conveyed from the Federal agency (with Tribal approval) to the local agency in a separate arrangement.

It is advisable for Caltrans Staff along with the District Native American Liaison, the local agency, BIA, and Tribal leaders, agree beforehand as to what procedures will be acceptable to all parties. A Resolution from the involved Tribe(s) may be necessary along with other requirements from the BIA itself.

HQ Environmental Analysis lead the efforts of Native American Cultural Studies (internal Caltrans link) and should be consulted.

6.17.11.04 Stock Trails

SHC Section 104(i) allows acquisition of an interest in stock trails. A stock trail can approximately parallel any state highway that have been constructed, retained, and maintained by the State. Highway right of way designated as stock trails must be posted as such at the entrances to the trail.

Caltrans may designate a highway to be relinquished to a county as a stock trail and the county may not vacate the stock trail without consent by the State. (SHC Section 105)

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.11.05 Plant Establishment Periods

A period of time to ensure plant establishment on segments to be relinquished may be required for a project. Often, a plant establishment period may extend well beyond construction completion. A relinquishment should not be delayed due to this additional time.

An agreement or local resolution should include language where a local agency agrees to accept relinquishment prior to completion of the plant establishment period. Any difficulty in securing an agreement that will delay relinquishment of the collateral facilities is to be referred to HQ with full details. This agreement or local resolution should be referenced in the CTC Resolution of Relinquishment.

6.17.11.06 Railroad Crossings

Relinquishments may include railroad grade crossings or separations. Grade separation structures require 10' minimum clearance from the relinquishment. The relinquishment map should clearly show each crossing or separation, labeled with the railroad name and the specific California Public Utilities Commission (CPUC) rail crossing number.

The grant of rights between Caltrans and the railroad should be reviewed to ensure the area to be relinquished is transferable. It may be necessary to contact the railroad for approval.

6.17.12.00 General Timelines

Processing timelines to request and obtain CTC approval of a relinquishment is varied and determined by the CTC Liaison and based on regularly scheduled meetings of the CTC.

The purpose of the CTC Liaison (internal Caltrans link) (Division of Financial Programming) is to act as the department's single point of contact with the CTC.

In general, relinquishment requests are to be forwarded to HQ OLS at least four months prior to completion of construction. This allows time for the 90-day notification period to the local agency to elapse and permit presentation of the resolution to the CTC immediately after the project is completed.

© 1994-2025 California Department of Transportation. All rights reserved.

If the local agency provides a waiver to the required 90-day notice, timelines may be compressed. FULL packages that are complete, have been reviewed by HQ OLS and have no outstanding issues, must be cleared by the District no later than 8 weeks prior to the anticipated CTC meeting date.

Where counties or cities object to receiving the 90-day notice prior to completion of construction, the District should notify HQ OLS to delay issuance of the Notice of Intention to Relinquish.

Submittals of relinquishment requests to HQ for freeway collateral facilities are not to be delayed in the District's pending freeway contracts that may extend after completion of the construction contract. Agreements between Caltrans and the local agency shall reference these contracts and be executed prior to the acceptance of completion of the construction.

6.17.13.00 Preparation of Requests

The District Director shall appoint staff with the duty of preparing requests for all relinquishment resolutions. Each request shall be assigned a request number. This number will be the basic reference when communicating with HQ OLS regarding a specific resolution.

The request for relinquishment resolution by the CTC shall be prepared and submitted to the Chief, Office of Land Surveys, Division of Right of Way and Land Surveys, Attention: Relinquishment & Vacation Coordinator, with the personal recommendation (signature) of the District Director. The request shall be in the form of a "Relinquishment Request Package." The package will include a "District Relinquishment Request Memorandum" and copies of all documentation required to support the relinquishment request.

6.17.13.01 District Clearance

Prior to submittal of relinquishment proposals to HQ OLS, they should be circulated through internal district functions for their review and comment. Common functional areas to be contacted include Design, Construction, Maintenance, Traffic Operations, Excess Lands, Environmental, Planning, Right of Way Utilities, and others.

In order to prevent premature CTC action on relinquishments, HQ OLS will obtain written clearance from the District, prior to scheduling specific requests on the CTC's agenda. District clearance may be in the form of a letter or e-mail, which clearly states the relinquishment is clear to proceed to the CTC for action.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.13.02 District Relinquishment Request

A "District Relinquishment Request Memorandum" contains all the information necessary for a District to assemble a complete package for submittal to the CTC of a proposed relinquishment. The memorandum documents the submission of the request and aids the Districts by acting as a relinquishment checklist.

Contact the Statewide Relinquishment and Vacation Coordinator at HQ OLS for the current "District Relinquishment Request Memorandum" template.

6.17.13.03 Important Considerations

There are important considerations when completing the District Relinquishment Request Memorandum:

- In addition to county, route, and post miles, it is important to also describe the location of the proposed relinquishment by descriptive limits. An example would be to reference the beginning and end points to the nearest existing definable point on the ground, such as a road, street, river, or county line. A specific tie to a city limit should never be used because city limits are subject to frequent change.

- When asked if the relinquishment complies with Code of Federal Regulations 23 CFR 620.203(i), the answer should be "Yes" to the following questions:

    1) The lands to be relinquished will not be needed for Federal Aid highway purposes in the foreseeable future;
    2) The right of way being retained is adequate under present day standards for the facility involved;
    3) The relinquishment will not adversely affect the Federal Aid highway facility or the traffic thereon;
    4) The lands to be relinquished are not suitable for retention in order to restore, preserve, or improve the scenic beauty adjacent to the highway consonant with the intent of the Highway Beautification Act of 1965.

© 1994-2025 California Department of Transportation. All rights reserved.

- It is important to understand local agency expectations and any understandings made between the local agency and the District, when receiving a relinquishment. State whether the proposed relinquishment has been reviewed with the local agency within the past year and any additional information HQ should be aware.
    - What is the likelihood that the local agency will protest the action? If a protest is probable, this should be stated in the request reporting the kind of protest and action to be taken. Consult the PDPM Chapter 25, Article 5, if a local agency protests a relinquishment proposal.

- There may be special circumstances particular to a specific relinquishment. Refer to Section 6.17.11.00 of this chapter for additional information on the following:
    - Excess Lands
    - Federal lands (USFS, etc.)
    - Tribal lands
    - Stock trails
    - Plant establishment periods
    - Railroad crossings

- As part of the "District Relinquishment Request Memorandum," the number of lane miles relinquished must be reported for every relinquishment. The lane miles removed from the State Highway System are added to the County's maintained mileage, for purposes of funding apportionments. Annually, HQ Design reports to the Controller's Office, lane miles relinquished and related costs (SHC Section 2121[b]). The reports are known as GASB Reports (Governmental Accounting Standards Board Reports).

- If a local agency will be receiving funds for the relinquishment, the funding must be approved prior to the CTC approval of the relinquishment. District will notify HQ OLS when/if funding has been approved so there are no surprises or delays. Additionally, a note related to funding will need to be included in the CTC Relinquishment Resolution.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.13.04 Other Items to Include in a Relinquishment Request Package

In addition to the "District Relinquishment Request Memorandum," the following items shall be included in the relinquishment request package. This package may be submitted in digital format and e-mailed as attachments, such as PDF, except for the legal description which must be on bond paper, signed and sealed by a licensed land surveyor, and mailed.

1. **Legal Description** – Two original copies of the legal description of the right of way to be relinquished. The legal descriptions shall include: the signature, seal, date of signing, and expiration date by the person in responsible charge (BPC Section 8761).

   Relinquishment descriptions shall be submitted, double-spaced, on 8-1/2" x 11" good quality paper (bond) acceptable for recording, with 1-1/2" margin at the top and 1" margin at the bottom and sides, except the last page shall have a 3" minimum margin at the bottom. Legal descriptions should include an access clause, if applicable.

2. **Mapping** – One set of unrecorded relinquishment maps. After HQ OLS review and approval of the unrecorded maps, the District will be requested to record the maps and submit a copy of the recorded map for inclusion in the relinquishment package to be forwarded for review to Design and Legal at Headquarters. If a Record of Survey map is to be used instead of a relinquishment map, the Record of Survey must clearly show and identify the Segment(s) proposed to be relinquished and must not unduly delay the relinquishment process.

3. **Construction Layout Sheets** – If relinquishment maps do not show construction features, marked up layout sheets which show the proposed relinquishment and features of construction on the approved plans, should be submitted.

4. **Local Agency Acceptance Document** – A copy of the local agency acceptance document such as an agreement or a local agency resolution. In many cases, the local agency acceptance document includes a 90-day notice waiver and acceptance of the current environmental conditions.

© 1994-2025 California Department of Transportation. All rights reserved.

5. **Environmental Disclosure Memo (EDM)** – A copy of the current Environmental Disclosure Memo. If the local agency accepted an older version of the EDM and had agreed to *accept any future memos as long as no substantive adverse changes to the environment is found to exist*, a copy of the prior memo will also be included.

6. **FHWA Concurrence and Approval Documents** – If required, copies of FHWA "Concurrence" and "Approval" documents.

7. **Chronology of Events** – A "chronology of significant events" for the relinquishment that includes background information, significant milestones, dates, etc., to help communicate the reason and benefits for the relinquishment.

8. **Other** – Copies of any other documents that are useful for reviewing a particular relinquishment proposal. (RW Record Maps, site photos, imagery, etc.)

6.17.14.00 Headquarter Reviews

HQ OLS is the single focal point for all relinquishments of state highway right of way in California. All District relinquishment request packages are submitted to HQ OLS, which then examines and reviews packages to ensure that all required information and documentation for a relinquishment is complete and correct and that disposals through relinquishment are in the best interest of the State. HQ OLS works closely with the Legal Division to ensure that relinquishment proposals follow State and Federal laws, and Caltrans Policy.

It is in the best interest of the State for HQ OLS to work collaboratively in partnership with HQ Project Delivery Divisions, Districts, and other State and Federal agencies, such as CTC, CPUC, and FHWA, when a project includes a proposed relinquishment. As part of this cooperative effort, HQ OLS examines and discusses current and upcoming legislation and its impacts on proposed highway projects and resulting relinquishment proposals.

After review and District clearance, HQ OLS prepares draft CTC Relinquishment Resolution(s), along with CTC Agenda and Book Items. These additional documents are then added to the Relinquishment package and forwarded to HQ Design to be reviewed and included at an upcoming CTC meeting. HQ Design acts as the lead on all relinquishments presented to the CTC.

© 1994-2025 California Department of Transportation. All rights reserved.

6.17.15.00 Recordation and Final Closeout

HQ OLS will coordinate with the CTC to receive two certified originals of the approved CTC Relinquishment Resolution(s) authorizing the relinquishment of highway right of way for further processing and execution.

HQ OLS will notify the local agency of CTC's approval for relinquishment by mail, which will include a certified original of the resolution. The District, upon receipt of the second certified original from HQ OLS, shall record such certified original in the Recorder's Office of the county in which the relinquished right of way is located. Immediately upon recordation, the District shall inform, by letter, the county (Board of Supervisors) or city (City Council), that the relinquishment has been recorded, and will be provided full recordation data.

Upon recordation of the certified original of the relinquishment resolution with the County Recorder's Office, all of the State's right, title, and interest in the highway segment(s) identified in the resolution will have been transferred to the local agency.

The District shall submit to HQ OLS for filing, a copy of the letter sent to the local agency and a copy of the recorded CTC relinquishment resolution. The District shall also update the Right of Way Record Maps to reflect changes made by the approved relinquishment and inform the District's Maintenance Office and other interested offices in the District of the approved relinquishment.

HQ OLS, on a quarterly basis, will provide an update of recorded relinquishment resolutions to the Division of Research, Innovation, and System Information and other HQ Divisions that must be notified. FHWA and CPUC will also be notified, as applicable.

© 1994-2025 California Department of Transportation. All rights reserved.

6.18.00.00 – VACATIONS

6.18.01.00 General

A vacation is an action by the California Transportation Commission (CTC) by which the public right of use is removed from State highway right of way, which is held as an easement (Section 8309 of the Streets and Highways Code [SHC]). The easement is removed from the title of the underlying fee owner by vacation procedures described in the following sub-Sections. If State right of way is held in fee, the land should be disposed of as described in Section 6.15.00.00 (Director's Deeds) of this manual.

In addition to a vacation, an alternative method of the disposal of easement areas would be by Director's Deed in accordance with SHC Section 118. Cost effectiveness is the basis for determining which method is used.

6.18.02.00 Local Agency Consent

SHC Section 8330.5 – requires that a superseded highway, or portion thereof, to be vacated, must first be offered for relinquishment to the local agency.

SHC Section 8313 – requires that a vacation should not conflict with the local master plan in effect for the area.

SHC Section 892 – requires that highway right of way shall not be vacated until the local agency has indicated it does not need the right of way for nonmotorized transportation, as defined in SHC Section 887.

All vacations shall be offered to local agencies using the sample letter shown in Exhibit 06-EX-07 of this manual, which explains provisions of each Section of the SHC in detail. If a Right of Way (R/W) contract predates former Section 2381 (now Section 892), which was the first of the above three sections to be added to the SHC (September 30, 1975), a statement may be added to the letter that refers to the R/W contract. A second letter should be sent to the local agency, certified mail return receipt requested, if no reply is received within 90 days of the first letter.

NOTE: If particular local agencies have a history of "non replies" in your District, use Certified Mail and request a "Return Receipt" for the first letter.

© 1994-2025 California Department of Transportation. All rights reserved.

It is the policy of the Office of Land Surveys at Headquarters (HQ) that a R/W contract signed prior to September 30, 1975 providing for vacation of superseded State highway to the grantor does not preclude compliance with the above noted sections of the SHC. Any local agency with plans to use the area proposed for vacation will be referred back to Caltrans Legal Division for final disposition. That portion of a R/W contract providing for vacation that is signed after this date is invalid unless consent of the local agency has already been obtained.

Local agency clearance is not required for vacation of highway right of way across Federal lands.

6.18.03.00 Status of Vacations

The District shall prepare and maintain an up-to-date listing of vacations that need to be completed. The list should include current status and reasons for any delay in completing the vacation process on schedule. The status shall contain sufficient information to describe without undue investigation the latest completed step in the vacation process. The listing will be submitted to HQ on a quarterly basis.

Vacations shall be entered on the status not later than 30 days after award of a construction contract for a project that contains highway right of way requiring vacation.

Vacations that are a result of policy change but are not connected with new construction projects shall be entered on the vacation status within 90 days of the issuance of the policy change.

Vacations that are a result of right of way requirement changes not connected with new construction projects shall be entered on the vacation status at the time right of way changes are completed on R/W Record Maps.

6.18.04.00 Legal Description

Legal descriptions of State highway right of way to be vacated may be described in general terms sufficient to identify the area to be vacated, provided definite terminal limits are described. Where the highway right of way to be vacated is adjacent to the new State highway, the common boundary between right of way to be vacated and right of way to be retained must be described or defined by some recorded reference or by an actual description of said line.

© 1994-2025 California Department of Transportation. All rights reserved.

Caltrans may file vacation maps in State Highway Map Books (SHC Sections 128 and 129) or record a Record of Survey Map which depicts the proposed segments to be vacated. The vacation is referenced to the filed/recorded maps. The maps must contain the same basic information required when a vacation is entirely by legal description.

Requirements for Vacation Maps are described in Section 4-14 of the Plans Preparation Manual.

Requirements for Record of Survey Maps are described in Section 8762, et seq., of the Business and Professions Code (BPC) and must be made under the direction of a licensed Land Surveyor or pre-1982 registered Civil Engineer, as required by State law. An additional guide is available from the County Engineers Association of California, titled Guide to the Preparation of Records of Survey and Corner Records.

6.18.04.01 Utility Reservations

No vacation recommendation should go to the CTC without first determining the presence of any utility encroachments. This will require close working relations between R/W Engineering and District Utilities, Permits and Maintenance functions.

Whenever facilities belonging to utility owners are within the area to be vacated, Districts will notify the owners of the proposed vacation. SHC Section 8340(c) requires a reservation for "in-place" and "in-use" utilities unless a determination is made that the public convenience and necessity otherwise require. Consequently, unless Caltrans can demonstrate that *the public convenience and necessity* do not require utility reservations as provided in SHC Sections 8340 and 8341, a clause will be included in the legal description used for vacation.

A separate reservation clause identifying each affected utility company will be included in the legal description as follows:

> *EXCEPTING AND RESERVING to the (name of owner, e.g., Pacific Telephone and Telegraph Co.) an easement and right at any time, or from time to time, to construct, maintain, operate, replace, remove, renew, and enlarge the existing public utility facilities, namely, (insert description of the facilities with as much specificity as possible, e.g., underground telephone lines) and facilities incidental thereto, including access to protect the*

© 1994-2025 California Department of Transportation. All rights reserved.

property from all hazards, in, upon, under and over the highway herewith vacated.

Care should be exercised in using this clause when the vacation is over Federal lands. If Caltrans acquired a highway easement from a Federal agency, it is possible that the vacation may terminate all prior rights upon cessation of highway use. In this case, the utility company should apply for rights from the Federal agency.

6.18.04.02 Access Restrictions

If access is to be restricted between the vacated road and an adjacent State freeway, the following clause is to be added at the end of the legal description:

EXCEPTING AND RESERVING to the State of California any and all rights of ingress to and egress from the highway hereby vacated in and to the adjacent and adjoining freeway, except at such points as now are or may be established by resolution of this Commission.

It should be noted that Section 30609.5 of the Public Resources Code (PRC) restricts the sale or transfer of State lands located between the first public road and the sea. Said restrictions preserve existing or potential access rights to and along a sea. If a proposed vacation has potential impact to such rights, District should consult with the California Coastal Commission.

6.18.05.00 Scheduling Vacation Resolutions

The District Director shall appoint staff with the duty of preparing requests for all vacation resolutions. Each request shall be assigned a request number. This number shall be the basic reference when communicating with HQ regarding a specific resolution.

Prior to submittal of vacation proposals to HQ, they should be circulated through the various internal District functions for their review and comment. Commonly contacted functional areas are Design, Construction, Maintenance, Traffic Operations, Excess Lands, Environmental Planning, Right of Way Utilities, and others.

In order to prevent premature CTC action on vacations, HQ will obtain written clearance from the District prior to scheduling specific requests on the CTC's

© 1994-2025 California Department of Transportation. All rights reserved.

agenda. District clearance may be in the form of a letter or e-mail which clearly states the vacation is clear to proceed to the CTC for action.

6.18.06.00 Preparation of Requests

The request for vacation resolution by the CTC shall be prepared and submitted to the Chief, Office of Land Surveys, Division of Right of Way and Land Surveys, Attention: Relinquishment and Vacation Coordinator, with the personal recommendation of the District Director. The request shall be in the form of a District Vacation Request Memorandum.

The memo may be submitted electronically and shall contain the following information:

1. District, County, Route, Postmile Range.
   - Include number of segments.
   - Include name of the local agency where the relinquishment is located.
   - Include Contract Number and Project Limits.
   - Include date of acceptance or anticipated date of construction completion.

2. Describe location of proposed vacation by descriptive limits. An example would be to reference the beginning and end points to the nearest existing definable point on the ground, such as a road, street, river or county line. A specific tie to a city limit should never be used because city limits are subject to frequent change.

3. State the manner in which the State acquired title to the segments to be vacated.

4. State whether the property owner will be cut off from access by reason of the vacation (SHC Section 8330.5[c]).

5. If this vacation is a R/W contractual obligation, attach a copy of the R/W contract.

6. If a utility reservation is necessary, include the reservation needed in the legal description and list the name of the utility owner.

7. State whether or not access rights are to be reserved and give details.

© 1994-2025 California Department of Transportation. All rights reserved.

8. Describe any special conditions that may exist:
   a. Is the proposed vacation within U.S. Forest Service land?
   b. Does the proposed vacation involve a railroad grade crossing? Include the Public Utility Commission decision number by which consent was given.
   c. Can the proposed road be used for stock trail purposes? Give District recommendation (SHC Section 105).
   d. Can the superseded road be used for maintenance stockpile areas?
   e. Does the vacation involve Tribal Lands? Give District recommendation.
   f. Include any additional comments.

9. State whether the vacation complies with SHC Sections 892, 8313, and 8330.5. This statement is used by HQ when preparing agenda letters recommending approval of vacation resolutions by the CTC.

10. State whether the vacation involves public access to the sea (PRC Section 30609.5).

NOTE: Mileage of highway proposed to be vacated does not need to be submitted.

In addition to the District Vacation Request Memorandum, the following items shall be included in the vacation request package. This package may be submitted in digital format and e-mailed as attachments, such as *pdf*, except for the legal description which must be on bond paper, signed and sealed by a licensed land surveyor, and mailed.

A. Two original copies of the legal description of the right of way to be vacated. Vacation descriptions shall be submitted, double-spaced, on 8-1/2" x 11" good quality paper (bond) acceptable for recording, with 1-1/2" margin at the top and 1" margin at the bottom and sides, except the last page shall have a 3" minimum margin at the bottom. Legal descriptions should include utility and/or access clauses, if applicable.

B. A copy of the letter from Caltrans to the local agency regarding SHC Sections 892, 8313, and 8330.5 and a copy of the letter from the local agency affected, stating it has no objection to the vacation. In the absence of a letter from the local agency, a copy of both sides of the certified mail and signed return receipt showing proof of a second attempt to notify the local agency is sufficient.

© 1994-2025 California Department of Transportation. All rights reserved.

C. One set of unrecorded vacation maps. After HQ review and approval of the unrecorded maps, the District will be requested to record the maps and submit a copy of the recorded map for inclusion in the vacation package to be forwarded for review to Design and Legal at Headquarters. If a Record of Survey map is to be used instead of a vacation map, the Record of Survey must clearly show the area to be vacated and must not unduly delay the vacation process.

NOTE:

a. When bearings and distances used on maps or in legal descriptions are based on the California Coordinate System, identify the datum (NAD 1927 or NAD 1983), datum tag (adjustment), epoch, and state the zone.

For additional information on datums, see Chapter 4 of the Surveys Manual and PRC Section 8801, et seq.

b. The final maps or legal descriptions shall include: the signature, seal, date of signing, and expiration date of the license on the title sheet of the relinquishment map or legal description by the person in responsible charge (BPC Section 8761).

6.18.07.00 Recordation of Vacations

The District, upon receipt of certified copies of the CTC's resolution authorizing the vacation of highway right of way, shall file a certified copy with the county (Board of Supervisors) and record a certified copy in the Recorder's Office of the county in which the vacated right of way is located. Upon such recordation, the vacation is complete.

The District shall submit to HQ for filing, a copy of the recorded CTC vacation resolution. The District shall also update the Right of Way Record Maps to reflect changes made by the approved vacation and inform the District's Maintenance Office and other interested offices in the District of the approved vacation.

6.19.00.00 – FREEWAY LEASE AREA AIRSPACE MAPS

6.19.01.00 General

Freeway Lease Area (FLA) Airspace Maps are used to show State-owned property adjacent to or under freeways that is available for leasing. They are used for inventory purposes, for information to potential lessees, for circulation prior to leasing, and for estimating or appraising airspace lease areas. They consist of an Index Map and an FLA Parcel Map. FLA Parcel Maps consist of either an Inventory Map or an Appraisal Map.

All Freeway Lease Area maps shall be assigned FLA numbers as follows:

> Sites identified along a route would be assigned an FLA prefix followed by the highway route number and number of the particular site; i.e., sites along Route 5 will be designated FLA-5-1, FLA-5-2, etc. Sites along Route 101 will be designated FLA-101-1, FLA-101-2, etc.

Requirements for Freeway Lease Area maps are described in Section 4-15 of the Plans Preparation Manual.

For additional information on Airspace, see Chapter 15 of this manual.

© 1994-2025 California Department of Transportation. All rights reserved.

6.20.00.00 – DEDICATIONS

6.20.01.00 General

A dedication is the setting aside of real property (in fee or easement) for public use without compensation, typically as a condition of the local agency approval of a development project (building permit, land use zoning variance or change, tentative subdivision or parcel map, etc.). Where development occurs or land use changes are proposed, the local agency, through its regulatory authority, may require dedications.

Typically, the property owner or their agent initiates the request that triggers the dedication. Caltrans may also request a dedication when an encroachment permit is requested through the district Encroachment Permits Office. Both of these methods will be described further, below.

Dedications are not usually part of the project development process. However, they can be incorporated into it when occurring coincidentally.

For additional information on Dedications see Section 8.29.00.00 of this manual and Section 501.10A of the *Encroachment Permits Manual*.

6.20.01.01 Initiation Through Planning

The dedication process is initiated when an owner or their representative applies to a governmental entity for an action on the part of that agency that will enhance the value of the applicant's property. Where transportation facilities are impacted by the proposal and a logical connection can be established between the development or land use change and a transportation project, the Department should encourage local agencies to impose reasonable dedication requirements. This process will typically involve the Department's Transportation Planning Office or Branch through the Local Development - Intergovernmental Review (LD-IGR) process, with the Right of Way and Right of Way Engineering offices acting in a review and advisory capacity. Planning should include the Right of Way Engineering (RWE) office (or branch) in the review of all proposed developments. All Project Delivery functions should coordinate to determine whether any dedication should be required of the project. Such requirement would be communicated through Planning to the local agency.

Depending on the method of dedication, the local agency may have the option of accepting the dedication or referring the owner (or owner's

© 1994-2025 California Department of Transportation. All rights reserved.

representative) to dedicate directly to Caltrans. Specifically, if the dedication will be on a final subdivision or parcel map, the local agency must accept it directly. If it will be by deed, either the local agency or Caltrans can accept it. Caltrans acceptance will follow a process substantially similar to that which is described in Section 6.20.01.02.

6.20.01.02 Dedication Requirements

When a dedication is requested through Encroachment Permits, or through a local agency, the applicant must submit the following:

- A copy of title report with its supporting documents (maps, deeds, etc.) The title report must be no more than 1 year old when the dedication is accepted by Caltrans.
- Hazardous Waste Assessment
- A legal description of the grantor's property
- A legal description of the parcel offered for dedication or to be dedicated.
- Map or draft map of the area surrounding the proposed dedication (such as a parcel or subdivision map).
- Improvement or Site plans
- Detailed Exhibit or plat of the proposed dedication
- Copies of any recorded maps and/or deeds referred to in the legal description, map, and exhibit.
- Access rights, if any, shall be shown and described on the map, exhibit, and deed (if applicable).
- Other clearances which may be available or required

6.20.02.00 Review for Land Surveying Standards

The legal description and proposed mapping are reviewed by the Right of Way Engineering (RWE) office or branch. The description must meet statutory requirements for legal descriptions and be surveyable. It does not have to use the California Coordinate System as a basis of bearings or measurement. Monumentation and field survey requirements will be determined by district RWE on a case-by-case basis. If not approved by RWE, the description is returned to the applicant with an explanation of any issues.

© 1994-2025 California Department of Transportation. All rights reserved.

6.20.03.00 Approval and Acceptance

When RWE approves the legal description, it is inserted into the proper deed template by Caltrans and transmitted to the owner for Grantor's signature. (See Exhibit 06-EX-02 for dedication deed template examples.) After the owner (grantor) signs the deed with notarization and returns it to Caltrans, RWE verifies that the description was not altered, and Right of Way reviews the deed and signs it for state acceptance. Right of Way records the deed once all other requirements have been met. See Section 8.29.02.00 of this manual.

6.20.04.00 Recording and Hazardous Waste

The deed is not recorded until a hazardous waste assessment has been completed and signed by the owner. RWE and Right of Way will coordinate with District Environmental staff to ensure the property is acceptable and the documentation meets current guidelines and policies. This process should be initiated early to avoid delays in completing the dedication. The Hazardous Waste procedures prescribed in Section 8.16.00.00 of *this manual* are specific to project acquisitions; not all aspects apply to dedications. See Section 8.64.00.00 for recordation information.

6.20.05.00 Clear Title

Right of Way will determine whether existing encumbrances need to be cleared from the dedicated property in accordance with the pertinent provisions of Chapter 8 of this manual. A copy of the title report will be provided to Right of Way with the deed, or prior to obtaining Grantor's signature.

© 1994-2025 California Department of Transportation. All rights reserved.

6.20.06.00 Other Issues

In order to assist the permittee with demonstrating to the local agency that conditions have been met, RWE may request the permittee to add a statement to the map or deed substantially similar to the following:

"Condition #xx of _____ County's Conditions of Approval for Tentative Parcel Map #XXX/NAME (dated _____) is hereby met by this Dedication of State Route XXX right-of-way to the State of California."

If the dedication is part of a new subdivision or parcel map, the dedication shall be recorded with the county recorder prior to the final approval of the subdivision or parcel map and shall be delineated on the final map.

7.01.00.00 – APPRAISAL POLICIES AND GENERAL REQUIREMENTS

7.01.01.00 General Overview

Article I, Section 19 of California Constitution states ***"Private property may be taken or damaged for public use only when just compensation, ascertained by a jury unless waived, has first been paid to, or into court for, the owner."***

7.01.01.01 Definition of Market Value

The measure of "just compensation" is "market value." Section 1263.320 of the California Code of Civil Procedure defines market value as:

"(a) The fair market value of the property taken is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell but under no particular or urgent necessity for so doing, nor obliged to sell, and a buyer, being ready, willing and able to buy but under no particular necessity for so doing, each dealing with the other with full knowledge of all the uses and purposes for which the property is reasonably adaptable and available.

"(b) The fair market value of property taken for which there is no relevant, comparable market is its value on the date of valuation as determined by any method of valuation that is just and equitable."

A just and equitable method of determining the value of nonprofit, special use property as defined, for which there is no relevant, comparable market is:

> ***"The cost of purchasing land and the reasonable cost of making it suitable for the conduct of the same nonprofit, special use, together with the cost of constructing similar improvements."***

This method of valuation pertains only to those properties where all of the following apply:

1. Operated for a special nonprofit use such as a school, church, cemetery, hospital or a similar property.
2. Tax-exempt.
3. Not owned by a public entity.
4. There is no relevant, comparable market.

See Section 7.04.13.00 for further details.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.01.02 Necessity for Appraisal

An appraisal is necessary to ensure compliance with the Constitution in arriving at a conclusion of just compensation. The basic document in all appraisals is the Appraisal Report. It contains the appraiser's estimate of fair market value and all data and narrative necessary to support the appraiser's conclusions.

An approved report is generally required for acquisition, property management, relocation assistance and record purposes. It is of critical importance to further Right of Way activity. It must be complete and reliable in all its contents.

The report will be a summary of basic information and conclusions together with pertinent support. It shall contain information about the properties and general aspects of the entire project. Additional backup information such as detailed improvement descriptions and plans, additional photographs, bids, detailed cost studies, interview records, additional comparable data, utility relocation studies, etc., should be maintained until acquisition is complete and the files are no longer necessary for record, testimony, or RAP purposes.

7.01.02.00 Appraisal Report Not Required

When the Caltrans Region/District determines that the valuation problem is uncomplicated and the fair market value is estimated at $25,000 or less, a waiver valuation may be completed in lieu of an appraisal under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended. The increase in the waiver valuation limit to $25,000 is a temporary trial period for Caltrans valuations only and will extend through December 31, 2025. At the end of the trial period, the limit will revert to $15,000 unless permanently changed. Local public agencies will remain at the $15,000 limit for all waiver valuations.

The determination of whether a waiver valuation is appropriate must be made by someone with sufficient understanding of the local real estate markets, appraisal principles, and proper use of valuation methodologies to be able to reliably determine the valuation problem is uncomplicated.

© 1994-2025 California Department of Transportation. All rights reserved.

The $25,000 amount includes severance damages but excludes any nonsubstantial construction contract work. The authority to waive the appraisal is provided for in the Code of Federal Regulations (49 CFR 24.102[c][2][ii]). Authority to make this determination rests with the Region/District Right of Way Manager, given they meet the previous paragraph's requirements, who may delegate it no further than the Appraisal Senior. For approval delegations for Waiver Valuations, see Section 7.18.01.00 Delegations of Authority. The documentation required is the "Waiver Valuation." (See Section 7.02.13.00.) The Waiver Valuation **cannot** be used as a basis for deposit when obtaining an Order for Possession.

7.01.03.00 Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (Uniform Act)

The Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (Uniform Act) contains basic requirements for the appraisal of real property for Federal and federally-assisted land acquisition programs. These basic requirements shall apply to all projects, regardless of Federal participation. Appraisals are to be prepared according to these requirements, which are intended to be consistent with the Uniform Standards of Professional Appraisal Practice (USPAP).

49 CFR 24.1, 24.101, 24.102, 24.103, and 24.104 set forth these basic requirements.

7.01.04.00 Standards

The appraiser will thoroughly investigate and consider every material fact regarding the market value of the appraised property. Every effort will be made to interview the property owners and to secure factual information on the subject property sales, costs, alterations, income and expense data, age, etc. The subject properties and comparable data shall be viewed in the field and all improvements to be appraised shall be carefully inspected. The appraiser should refrain from furnishing detailed information regarding valuation, time schedule or construction items. At the appraisal stage, such information is usually incomplete and subject to change.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.04.01 Appraiser Qualifications

The Associate Right of Way Agent is considered the staff appraiser for routine to complex eminent domain real property appraisals not involving Federally insured financial lending institutions. Staff appraisers (Associate Right of Way Agent) are not additionally required to be licensed by any other State agency having real property appraisal oversight. Ranges A and B Right of Way Agents are considered the staff appraiser when the work product is directly supervised by and cosigned by an Associate Right of Way Agent.

7.01.05.00 Separation of Appraisal and Acquisition Functions

The Department of Transportation (Department) maintains a separation of the appraisal and acquisition functions, except that the same person can appraise and negotiate a parcel if total valuation, excluding nonsubstantial construction contract work, is $15,000 or less. This dollar limit also applies to revisions where the appraiser was previously assigned to negotiate the parcel. The valuation document can be either an appraisal or Waiver Valuation as discussed in 7.01.02.00 above.

A Senior Right of Way Agent, or above, supervising an agent performing a waiver valuation exceeding $15,000 will need to have another Senior sign off on the acquisition negotiations to comply with 49 CFR 24.102(n)(2).

When the same person prepares the appraisal and performs the acquisition, the Certificate of Appraiser must be revised from the standard Certificate. It should contain a statement substantially as follows: *"That I understand that I may be assigned as the Acquisition Agent for one or more parcels contained in this report, but this has not affected my professional judgment nor influenced my opinion of value."*

Members or candidates of professional appraisal organizations who are assigned to act in the dual capacity of appraiser and acquisition agent should check their organization's code of ethics for specific prohibitions and disclosure requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.06.00 Prerequisites for *"Preliminary Right of Way"*

Right of Way Planning and Management is the lead right of way function concerning prerequisites for commencement of all "preliminary engineering" activities, "preliminary right of way" activities, and "regular right of way" activities. See Chapter 3.

Preliminary Right of Way is defined as those Right of Way activities that occur after:

A. The project is programmed or lump sum funded. (Activities are typically charged as Right of Way support to the project's Phase 2 expenditure authorization.)

B. Budgeted spending has occurred.

    1. The project is in the current approved Right of Way Capital Plan or in the proposed Right of Way Capital Plan for the budget year.
    2. Other entity funding is secured. The source of funding is in accordance with the terms of a Cooperative Agreement with a Local Public Agency, if applicable.

The Preliminary Right of Way Activities are:

1. Ordering Title Reports.
2. Preparing Base Maps.
3. Preparing Appraisal Maps.
4. Conducting project-wide comparable sales searches once a preferred alternate is internally selected.

In addition, the preferred alternate must be made public in some manner, e.g., newspaper announcement, distribution of the final environmental document, or the like, before the following activities can take place.

5. Assigning appraisers to specific parcels.
6. Contacting the property owners to commence appraisal activity (i.e., sending the Notice of Decision to Appraise).
7. Completing the appraisal.

These prerequisites do not apply to hardship and protection appraisals.

© 1994-2025 California Department of Transportation. All rights reserved.

Final environmental clearance is a prerequisite to commencing regular right of way acquisition. The exception to this rule is when "early acquisition" is approved. See the Early Acquisition Guidelines (Reference 03-EX-06). Appraisal support costs may or may not qualify for federal aid. PA&ED along with E-76 approval is the point at which parcel specific right of way support costs become eligible for federal aid on a federally eligible project.

7.01.07.00 Dual Report Requirements

The District may determine that dual reports are needed to ensure the owner receives a fair market value offer. Duals should be considered for unusually large or complicated parcels or parcels exceeding $500,000 in value. This amount includes improvements pertaining to realty, severance damages, and substantial construction contract work.

The following are items to consider in determining which parcels may require dual reports:

- There is a serious question as to highest and best use.
- Market data is inconclusive because of its scarcity and/or absence of established patterns.
- There are substantial improvements not compatible with the highest and best use of the land.
- A significant portion of the appraised value is severance damages or there is a substantial question regarding damages or benefits.
- The value of the land is primarily on a development-analysis approach, or there is reliance on a specific plan of proposed development.

Dual reports shall be separate, and fully independent in calculations, analysis and conclusions. This will give a better basis for determining market value and help ensure a sound offer. The appraisers and their Region/District supervisors are responsible for maintaining the fact, spirit and appearance of this independence.

For dual report requirements pertaining to the direct sale of excess commercial property pursuant to SHC Section 118.1, refer to Excess Land Appraisals 7.14.02.02.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.08.00 Donations

Anticipated donations must first be appraised unless the following apply:

A. The donation is initiated by the owner, and

B. The owner, after being informed of the right to receive just compensation, provides the Region/District with a signed statement or letter waiving said right to receive just compensation and releasing the State from its obligation to appraise the property.

If an owner provides a signed statement or letter waiving just compensation but requesting an appraisal, the Notice of Decision to Appraise is not required.

In the past, IRS has indicated that staff appraisers may not be used to appraise donations in excess of $5,000 which are to be claimed as charitable contributions for Federal tax purposes. The owner should be advised to check with a tax consultant, IRS and/or the Franchise Tax Board if this or other questions of tax implications arise.

Donations may be used as matching fund credit to a Local Agency. This can apply on selected route segments where a local agency is required to match State right of way protection expenditures. The donation must be appraised to establish the contributory value to be credited to the local agency.

7.01.08.01 Credit Toward State's Matching Share

Section 146(a) of the Surface Transportation and Uniform Relocation Assistance Act of 1987 provides that the fair market value of land lawfully donated after April 2, 1987, and incorporated into the project, may be used as credit toward the State's matching share for a Federal-aid highway project. No credit can be allowed for any amount negotiated with the owner which exceeds the appraised fair market value. The credit applies only to bona fide donations. It does not apply to dedications. The fair market value shall be established by an appraisal made in conformity with the provisions of 49 CFR 24.103 and 24.104, subject to the following conditions:

A. Increases and decreases in the value of the donated property caused by the project are to be excluded.

B. The appraisal shall not reflect damages or benefits to remaining property.

© 1994-2025 California Department of Transportation. All rights reserved.

C. The fair market value shall be established as of the date the donation becomes effective or when equitable title vests in the State, whichever is earlier.

Donated land must be incorporated into the project to be eligible for credit purposes. Donations made by a Federal or State government agency are not eligible for project credit purposes. A contribution by a unit of local government of real property which is offered for credit, in connection with a project eligible for assistance under this title, shall be credited against the State share of the project at fair market value of the real property. Property may also be presented for project use with the understanding that no credit for its use is sought. Right of Way shall assure that the acquisition satisfied the conditions in 23 CFR 710.501(b) and the documentation justifies the amount of the credit.

All appraisals involving donations for credit to State matching funds must otherwise meet the same standards as normal acquisition appraisals. See Chapter 8 for further information related to Acquisition.

7.01.09.00 Dedications

Legal considerations concerning the appraisal of property having future street requirements as of the date of value are summarized in this section. Legal considerations are not to be confused with factual determinations which are to be made in every instance by the appraiser. Appraising a property with future street requirements can prove problematic when the property is located in such manner that in order to comply with the master plan of streets or the master plan of zoning, additional street areas will be required to be dedicated and improved in the reasonable near future as of the date of valuation for the purposes of the appraisal. These properties generally fall into four categories:

A. Those already improved to their highest and best use.

The property that is already enjoying the highest and best use and the street requirement, while considered, must be assumed to not affect valuation. It is unlikely that the local governing body could force a dedication if the property is already developed to its highest and best use. If the street were to be widened, the local governing body would be required to condemn the necessary area. Therefore, this property should be valued at full market value under the highest and best use.

© 1994-2025 California Department of Transportation. All rights reserved.

B. Those already zoned to their highest and best use.

   Generally, a dedication requirement arises as a condition for a change of zone. If that is the only requirement of the local governing body, then the conclusions under Category A would be followed. However, a significant number of local governmental entities have adopted building permit requirements, as opposed to zone change requirements, which impose dedication requirements as a condition for obtaining a building permit. If the property is found in such a political entity, then the conclusion under Category C would be followed.

C. Those not zoned or improved to their highest and best use.

   Since the required street area would have to be dedicated before the property could achieve its zoning or building permit for highest and best use, the required area would likely have a nominal value. In this instance, the value of the area to be dedicated is reflected in the higher unit value of the remaining property which is generated by such dedication. It follows then that the average unit value theory could not apply and the nominal value theory would be used. In any event, if the appraiser finds that by reason of the local agency's governing provisions the land probably will never be used for street purposes, the appraiser should take that into consideration in forming an opinion of value.

D. Those properties which would fall within Category C, except there is an interim use of some significant time period before the ultimate highest and best use is developed.

   The area to be dedicated would have the same unit value as either the whole property or the remaining property by the interim use, assuming, that the time of the interim use and the value of the interim use were of such significance as to affect the appraiser's ultimate conclusions of value.

In all of these instances, the future requirement of street dedication with the ultimate improvement of the street for city or county standards must be considered by the appraiser.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.10.00 Notice of Decision to Appraise

The appraiser must advise the property owner of the State's decision to appraise the property. The notice must be in writing and cover the following:

A. A specific area is being considered for a particular public use, i.e., the project;

B. The owner's property is located within the project area; and

C. All or a portion of the owner's property (which should be generally described) may be acquired for public use.

The letter will offer the owner (or the owner's representative) the opportunity to accompany the appraiser on an inspection of the property. It will give reasonable advance notice. There is no mandatory format for the notice; however, see Exhibit 07-EX-17 for a suggested format.

Enclosed with the letter to the owner will be the following:

A. Written explanation of the Department's land-acquisition procedures. The booklet *"Your Property, Your Transportation Project"* will satisfy this requirement; and

B. A Title VI brochure and other required items listed in R/W Manual Chapter 2, Section 2.04.01.02.

The Notice and acquisition procedure explanations may be modified as necessary when doing contract appraisal work for other agencies, when the property owner is a governmental agency, etc. Governmental agencies are entitled to written notice, etc., just like a private property owner; however, judgment should be used as to the need to send complete notices and packages to the same agency time after time.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.10.01 Notice of Decision to Inspect

The agent must notify the property owner of the State's decision to perform a waiver valuation of their property. The notice must be in writing and cover the following:

A. A specific area is being considered for a particular public use, i.e., the project;

B. The owner's property is located within the project area; and

C. All or a portion of the owner's property (which should be generally described) may be acquired for public use.

D. The grantor has the option to request the department perform an appraisal instead of a waiver valuation.

The letter will offer the owner (or the owner's representative) the opportunity to accompany the appraiser on an inspection of the property. It will give reasonable advance notice. There is no mandatory format for the notice; however, see Exhibit 07-EX-17A for a suggested format.

Enclosed with the letter to the owner will be the following:

A. Written explanation of the Department's land-acquisition procedures. The booklet *"Your Property, Your Transportation Project"* will satisfy this requirement; and

B. A Title VI brochure and other required items listed in R/W Manual Chapter 2, Section 2.04.01.02.

The Notice and acquisition procedure explanations may be modified as necessary when doing contract appraisal work for other agencies, when the property owner is a governmental agency, etc. Governmental agencies are entitled to written notice, etc., just like a private property owner; however, judgment should be used as to the need to send complete notices and packages to the same agency time after time.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.11.00 Parcel Diary

The appraiser will initiate the Parcel Diary Form RW 07-01 for each ownership. The appraiser shall include all required information covered in the instructions. The form should be initiated by an appropriate entry indicating the date the parcel is assigned for purposes of preparing an appraisal, together with entries documenting parcel data. The parcel diary is an internal document to be forwarded with the appraisal for review and kept in the parcel file for documentation.

7.01.12.00 Responsibility for Providing RAP Information

The Appraisal Branch is responsible for the following:

A. The Appraiser, when asked, shall give accurate, basic relocation information to all potential displaced persons encountered during the appraisal process.

B. Pursuant to Federal regulations, the RAP Branch is required to advise potential displacees of their possible RAP benefits as soon as the occupants are identified. The Code of Federal Regulations also requires each business to be interviewed by the RAP Agent prior to the initiation of negotiations. The appraiser is usually the first contact a potential displaced person has with the Department. When an appraisal (primary or alternate) indicates a displacement of people, businesses, and/or personal property, the appraiser is to complete the Parcel Occupancy Data Form RW 07-02 at the time of the first meeting or contact with the owner. This is true whether the displacement would result from the taking of right of way or from the effect of the taking on the remainder. Note that a displacement may occur even though there are no severance damages to the real property (a "consequential" displacement). This form may be modified to cover a residential or business only displacement. The RAP Agent may accompany the appraiser during the inspection of the subject.

The Parcel Occupancy Data Form is an internal document; as such, it does not go forward with the appraisal. The appraiser is to forward the Parcel Occupancy Data Form to the Region/District RAP Branch at the earliest possible date and note in the Parcel Diary the date it was forwarded. The RAP Branch will then provide general relocation assistance information to all potential displacees listed. The RAP Branch will send the Title VI (Civil Rights) Survey form and a Title VI brochure to all known tenants.

© 1994-2025 California Department of Transportation. All rights reserved.

The appraiser must immediately notify the appropriate branch (RAP, Acquisition, etc.) of information which may affect the displaced person's eligibility for RAP benefits (i.e., the knowledge that an occupant intends to move prior to the date of the first written offer), along with a parcel diary entry.

C. Where the appraisal of commercial, industrial, or other properties includes machinery, equipment, fixtures, and/or improvements pertaining to the realty, the appraiser shall, as part of the appraisal report:

   1. Itemize for identification: machinery, equipment, and fixtures which are considered realty, as well as those items determined to be Improvements Pertaining to the Realty (see California Code of Civil Procedure Sec. 1263.205). RAP will not pay for the relocation of realty.

   2. To the extent possible, determine the ownership or claims to ownership of the listed items as between the fee owner and tenants or lessees.

D. If the primary or alternate appraisal indicates occupied improvements will be acquired or may be acquired as uneconomic remnants (in the market or to the owner), then the State is usually obligated to provide relocation assistance to the occupants (residential or business). In questionable situations, the appraiser shall discuss the situation with the Region/District's RAP Branch.

E. Actual and Economic Rental Rates (see Section 7.03.08.00, "Rental Rates") – Actual and economic rental rates for all properties will be shown in the fair market value appraisal.

7.01.13.00 Legal Opinions

All appraisals shall consider potential legal items involved in the appraisal problem, and care must be exercised to see that they are clearly defined and resolved. The Region/District should consult with the Legal Division, normally through HQ R/W, when such problems are first encountered. The Region/District may request a legal opinion directly from a local office of the Legal Division generally where an interpretation of a condition or situation is involved.

© 1994-2025 California Department of Transportation. All rights reserved.

Any legal opinions involved in the appraisal process shall be documented in the report. It may be desirable to secure legal opinions on such questions as benefits, compensable damages, extent of larger parcel, personalty versus realty, valuation of dedications, etc. Strictly adhering to this policy will result in minimum loss of time for Region/District personnel and the State's attorneys.

7.01.14.00 Responsibility for Preparation

Appraisals will only be made by qualified appraisers. Field work and composition will be accomplished by or under the direct supervision of a Right of Way Agent of at least Associate grade. The agent assisting in the preparation will, at the Region/Districts' option, sign the Title Page and/or a Certificate of Appraiser as discussed in Section 7.02.03.00. The appraiser shall personally conduct the inspection of the subject and comparable properties.

7.01.15.00 Appraisal Review

All appraisals are reviewed to:

1. Ensure that the appraiser's documentation, including valuation data and the analyses, demonstrates the soundness of the appraiser's opinion of value and that the appraisal report conforms to the requirements of this Chapter and established appraisal practices.

2. Ensure that the appraised amount is equitable and represents a proper amount for the offer of just compensation in accordance with the Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970 and Government Code 7260 et seq.

Both the cumulative review and review appraiser process are recognized and acceptable methods for determining the adequacy and appropriateness of the appraisal report being reviewed to ensure that it is based on sound appraisal theory and contains appropriate documentation to support the appraisers' conclusions. Both methods will also accomplish the requirement that the approved appraisal represents the fair market value of the property and represents a proper amount for the offer of just compensation.

© 1994-2025 California Department of Transportation. All rights reserved.

Definitions:

Administrative Review – A review performed to confirm the appraisal contains the proper forms, is in proper sequence, and the arithmetic is correct. The administrative review is usually less detailed than a technical review, and the administrative reviewer does not render an opinion as to adequacy of the opinion of value.

Technical Review – Review performed for the purpose of forming an opinion as to whether the analyses, opinions and conclusions in the appraisal report under review are appropriate and reasonable and that the appraisal complies with the Uniform Act, Government Code 7260 et seq., the requirements of this Chapter, and established appraisal practices.

The technical reviewer, as the review appraiser or the cumulative review appraiser, must have the necessary appraisal knowledge, experience, and formal education to satisfy the requirements of 49 CFR 24.103(d). The qualifications of the review appraiser and cumulative review appraiser must be consistent with the scope of work for the appraisal assignment. The qualifications must meet the appraisal related criteria of the Senior Right of Way Agent classification (as defined by the California State Personnel Board and internal district duty statements) and must be based on formal appraisal education such as the courses listed on the Division of Right of Way Recommended Course List.

7.01.15.01 Cumulative Review Concept

The cumulative review process used by the Department requires that the appraiser's supervising Senior will conduct a technical review and approve or recommend for approval the appraisal report. If the supervising Senior is not delegated to approve the appraisal report, it will be submitted for approval to the Supervising Right of Way Agent (Branch Chief), Region/District Right of Way Manager, or HQ R/W in accordance with the current delegations. A flow chart outlining the typical steps in the cumulative review process is shown as Table I in Section 7.01.21.00.

There are limited instances where the Review Appraiser concept and its implementation are available to the staff reviewing appraiser. See Section 7.01.15.02.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.15.02 Review Appraiser Concept

The review appraiser is a unique position whose responsibility includes ensuring that appraisals under review are based on sound appraisal theory and contain appropriate documentation to support the conclusion of fair market value consistent with requirements of 7.01.15.00. As part of this responsibility, the review appraiser can reject an appraisal that does not meet the test of an adequate appraisal product and if unable to resolve the differences with the appraiser, require a new appraisal be prepared.

The review appraiser will conduct a technical review and will have the authority to approve appraisals consistent with current delegations.

Since the review appraiser is the only individual reviewing and approving the appraisal report at the Region/District level, it is imperative that the review appraiser have a solid appraisal background. This will include education and experience in preparing a wide variety of appraisals including partial acquisition appraisals with severance damages and/or benefits analysis. At a minimum, the review appraiser should be a Senior Right of Way Agent and report directly to the Region/District Right of Way Manager. Review appraisers receive their approval authority/review appraiser delegation through Headquarters based on individual appraisal background and experience.

In limited instances, this concept and its implementation are available to the cumulative review appraiser.

This process may be used when a contracted/independent fee appraiser prepares an acquisition report or, in rare instances, on a staff appraisal. This situation may also be encountered when a local agency hires a fee appraiser, and the Department provides appraisal review and approval services.

When the review appraiser finds the report lacking in content, support, reasoning, or conclusion, the reviewer may elect to assume the capacity of review appraiser (when delegated) and supplement the areas considered lacking, including modifying the appraised value. This would be accomplished by written memorandum clearly delineating the areas in question and providing full support and documentation for the reviewer's conclusions. Approval requirements will be in accordance with existing delegations.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.16.00 Review Appraiser Process

A flow chart outlining the typical steps in the review appraisal process is shown as Table II in Section 7.01.21.00.

A. Roles and Responsibilities of Review Appraiser.

To better define the role and responsibilities of a review appraiser, a Review Appraiser Task/Duties is included as Table III in Section 7.01.21.00. While some of the tasks may be discretionary, the table provides the basis for the expectations of the duties to be performed by a review appraiser.

B. Approval Certificate

In conjunction with the approval of the appraisal, the review appraiser will sign the Review Appraiser Certificate, Exhibit 07-EX-24D, and Appraisal Title Page – Review Appraiser, Exhibit 07-EX-21B.

C. Dual Report Process

The current process for dual reports as stated in 7.01.07.00 remains the same. The review appraiser duties regarding dual reports are as follows:

- Review and concur with all requests for waiver of dual reports prior to submitting the request to the Region/District Right of Way Manager.

- When dual reports are prepared, the review appraiser will perform a technical review of both reports and recommend both reports to HQ R/W for approval.

  The review appraiser's recommendation of both reports is not necessarily a recommendation of two separate fair market values. Rather it is an indication that both reports are based on sound appraisal theory and contain appropriate documentation to support the appraisers' conclusions. See Section 7.02.09.02 for an additional discussion on resolving significant judgmental differences between the two reports.

  Only the approved appraisal will be provided to the Grantor. The second report will be stamped "Reviewed for Documentation" and kept in the office files.

© 1994-2025 California Department of Transportation. All rights reserved.

D. Role of Supervising Senior in the Review Appraiser Process

Although the supervising senior will not be approving and/or recommending for approval the appraisals produced by their unit, they need to have a good understanding of appraisal theory and practice. In this context, the supervising senior will:

- Make appraisal assignments.
- Track progress of appraisals.
- Provide staff the necessary guidance and training.
- Assure consistency in application of data and valuations, particularly between different appraisers who are preparing appraisals in the same area.
- Perform an administrative review of the appraisal for accuracy, adequacy of documentation, and consistency in the application of data and valuation prior to submitting the appraisal to the review appraiser for approval. This administrative review is not considered a review for purposes of approving the appraised value, nor is it a first step in the cumulative review process. Rather it is a review for form and content to ensure that the appraisal product is complete and contains appropriate documentation to support the appraiser's opinion. Upon completion of the administrative review, the supervising senior will complete the Appraisal Checklist, Exhibit 07-EX-22, and sign a certificate indicating an administrative review of the appraisal for form and content has been completed. Exhibit 07-EX-23 is a suggested format for the transmittal letter.
- Assist the appraisers in responding to the review appraiser's concerns.

7.01.16.01 Minor Deficiencies

Minor deficiencies are deficiencies that do not affect the value, but should be corrected prior to approval. They include:

1. Mathematical errors not affecting the value conclusion
2. Project identification data
3. Parcel numbers
4. Typographical errors which could lead the reader to an erroneous conclusion. Possible errors in location, zoning, or present use of either the subject property or of comparable sales, if not a major deficiency (i.e., one which affects value)
5. Other minor deficiencies not affecting value

© 1994-2025 California Department of Transportation. All rights reserved.

In the case of minor deficiencies in the appraisal report, the review appraiser can either request the appraiser correct the deficiencies or make the changes to the report as the review appraiser. Any changes made by the review appraiser should be initialed and dated and the appraiser notified of the changes.

7.01.16.02 Major Deficiencies

Major deficiencies are deficiencies that affect the value conclusion and, unless corrected, will result in a rejection of the appraisal report. They include:

1. Highest and best use analysis
2. Insufficient analysis, reasoning, and erroneous conclusions
3. Errors in valuation
4. Analysis that mislead the user of the report
5. Nonadherence to the requirements of this Chapter
6. Other deficiencies that will cause the report to be rejected

In the case of major deficiencies in the appraisal report, the review appraiser should immediately notify the appraiser and supervising senior, preferably in writing, stating the deficiencies and/or need for clarification. If the review appraiser is unable to resolve the deficiencies, the review appraiser will reject the appraisal and request a new appraisal or prepare a Reviewer's Appraisal Report.

A. Appraisal Rejection

When an appraisal is rejected, the review appraiser prepares a memorandum to the supervising senior (Appraisal Branch Chief) with a copy to the Region/District Right of Way Manager stating the reasons for the rejection, the major areas of disagreement, and efforts taken to obtain an acceptable report. The supervising senior will then make arrangements to have a new appraisal prepared.

B. Reviewer's Appraisal Report

If it is not practical to obtain a new appraisal, the review appraiser, after consulting with the supervising senior (Appraisal Branch Chief) and Region/District Right of Way Manager, may develop appraisal documentation to correct the rejected report for the parcel in question. In arriving at their own estimate of value, the review appraiser may use valid market data available, including data contained in any appraisals received for review. The review appraiser must personally verify any data

© 1994-2025 California Department of Transportation. All rights reserved.

obtained on their own initiative and provide written analyses of the data, plus reasoned justification or explanation supporting their conclusions consistent with the requirements of this chapter and established appraisal practices.

When the review appraiser makes changes to an existing appraisal report to cure a deficiency which results in the reviewer's own opinion of value, the entire appraisal report is considered to be that of the review appraiser and no longer that of the original appraiser.

7.01.17.00 Approval Authority

Regardless whether the Region/District utilizes the cumulative review or review appraisal process, approval of the appraisal products will be in accordance with the existing delegations as discussed in R/W Manual Chapter 2. Any approvals not specifically delegated are retained in HQ R/W.

7.01.18.00 Criteria for Use of Contracted or Independent Fee Appraisers

When the Department uses a Contracted or Independent Fee Appraiser to prepare a regular acquisition, condemnation, excess land or airspace appraisal, the Contracted/Independent must have a current California "Certified General" (AG) real estate appraiser license issued in accordance with Title XI of Reform, Recovery and Enforcement Act of 1989 and the California Code of Regulations Title 10, Chapter 6.5 (Real Estate Appraisers). Further, the Contracted/Independent must have experience in eminent domain valuations consistent with California Code of Civil Procedure and be compliant with the Uniform Act. These requirements also apply to all Federally-aided local streets and roads projects and all special funded projects.

Contracted or Independent Fee Appraisers are required to follow all Right of Way Manual guidelines when preparing appraisal reports for acquisition, excess land, or airspace purposes. All appraisal reports prepared by contracted/independent appraisers for acquisition, excess land, or airspace will include all Caltrans required forms and exhibits as denoted by Chapter 7 of the Right of Way Manual. In addition, the fee appraiser must complete a R/W Diary documenting their efforts. Review and approval of all in lieu of staff appraisal reports will be in accordance with current District delegations as outlined in Right of Way Manual Section 7.18.00.00.

© 1994-2025 California Department of Transportation. All rights reserved.

7.01.19.00 Report Processing and Record Keeping

The original appraisal shall be held by the Region/District as their record of appraisals for the applicable retention period. An electronic copy is acceptable. All appraisals shall be loaded into ROWMIS immediately upon approval; a copy is not required to be sent to HQ R/W unless specified by delegation or policy. This includes Local Programs contract appraisals when acquisition is to be performed by the Region/District.

1. Appraisals may contain multiple parcels in a single ownership for both HQ R/W and Region/District approval. Waiver Valuations may also contain multiple parcels in a single supplement. In these cases, parcels will be arranged in the report in numerical order regardless of approval authority.

2. The Title Page will indicate whether HQ R/W approved or Region/District approved.

3. If used, a Parcel Summary Sheet may be kept in the parcel file for documentation.

4. Internal documents including the Certificate of Sufficiency (COS), the Hazardous Materials Disclosure Document (HMDD), the Parcel Diary, the Parcel Occupancy Data Sheet, the Parcel Summary Page, and the Excess Property Inventory Valuation (VTA), and Notification of Loss of Business Goodwill are part of the appraisal. As such, they must go forward with the appraisal for review and also with the copy that goes to Acquisition. The internal documents are then retained in the District's file. All internal documents shall be removed prior to providing a copy of the appraisal to the Grantor.

7.01.20.00 Memo of Transmittal

A memo of transmittal is not required for routine submission of Appraisal Reports. A memo is required on resubmission of unapproved reports or the submission of corrected or revised appraisal pages. In these cases, the memo will briefly summarize the reason for resubmission and corrections made.

© 1994-2025 California Department of Transportation. All rights reserved.

© 1994-2025 California Department of Transportation. All rights reserved.

Table III
Review Appraiser Task/Duties

1. To become familiar with all projects involving the acquisition and disposal of parcels including field reviews, if necessary.
2. Meets with supervising senior to review the maps of projects involving R/W acquisitions/disposals and to discuss potential appraisal problems.
3. In conjunction with supervising senior, determines which parcels require dual reports and when dual reports may be waived.
4. Although supervising senior will author all requests for waiver of dual reports, appraisal reviewer recommends approval of such waivers to the Region/District Right of Way Manager.
5. May attend STM meetings, Public Hearings, etc., for projects involving R/W acquisition.
6. Consults with the supervising senior to discuss appraisal issues that arise during the preparation of the appraisals.
7. Reads all single and dual reports and field reviews subjects and comparable sales in accordance with existing policy in the R/W Manual.
8. Assures that Appraisal Branch Senior has completed the standard "Appraisal Checklist," which verifies that appraisal meets requirements of R/W Manual.
9. When reviewing a report where the dual was "waived," has the right to request preparation of the dual should the single report display that the appraisal assignment did indeed not meet the criteria for waiver of a dual.
10. Consults with the supervising senior and the appraiser to discuss appropriate corrective action, if any, on concerns that arose during the appraisal review.
11. May make minor corrective changes to the report, which do not materially affect the value conclusion without assuming responsibility for the appraisal.
12. Approves all single project appraisals up to $1,500,000.
13. For dual reports, reviews both reports regardless of value. Recommends both and sends to HQ liaison for review/approval, one for acquisition, and the other for documentation.
14. Reviews and recommends to HQ for approval all other nondelegated project appraisals, e.g., goodwill, railroad, etc.
15. Prepares Review Appraiser Certificate for all parcels approved.
16. Prepares Review Appraiser Report when appraisal is modified in some manner by review appraiser.

© 1994-2025 California Department of Transportation. All rights reserved.

Table III
<u>Review Appraiser Task/Duties</u> (Continued)

17. In exceptional cases, can elect to revise appraisals under the review appraiser concept. When does so, must author revised pages, appraiser certificate, etc., as required and assumes role of the appraiser.
18. Is responsible for assuring consistency of appraised values on any given project. When inconsistencies are observed, meets with the supervising senior to discuss appropriate corrective action.
19. Is responsible for assuring that individual appraisal branches are being consistent in the application of Department's appraisal policies. Consults with supervising senior when discrepancies are observed to discuss appropriate corrective action.
20. In conjunction with supervising senior, provides appraisal training to appraisal staff.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.00.00 – APPRAISAL REPORTS

7.02.01.00 Federal Project Numbers

Federal project numbers are required for projects involving Federal participation in Right of Way costs. The Federal project number will appear on the following:

A. All appraisal correspondence (including a letter of transmittal, if used)

B. The Front Cover (07-EX-01)

C. Appraisal Title Page (07-EX-21)

D. Parcel Summary Page, if used (RW 07-04)

E. Appraisal Summary (RW 07-09)

F. Appraisal Maps

7.02.02.00 Report Identification Numbers

Appraisal Reports will use Phase 9 Expenditure Authorizations and be numbered in sequence. Each expenditure authorization will have its own series of report numbers. If an expenditure authorization is subdivided, each new expenditure authorization number will warrant a separate series of numbers. The Title Page will also show the Control Expenditure Authorization.

Project post mile and project limit descriptions of each report must coincide exactly with Phase 1 Expenditure Authorization limits. Right of Way Planning and Management can provide the most current description.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.03.00 Organization, Content, and Sequence

The material in most reports shall be arranged in the following order as applicable. All pages in the report shall be numbered consecutively and completed as described.

A. Front Cover

HQ R/W copy of the report will be bound and the information shown on Exhibit 07-EX-01 will be typed in the upper right-hand corner of the cover sheet.

For a revised parcel, place the word "Revised" and the old report number in parentheses following the parcel number. All parcels appraised together as a larger parcel will be listed in parentheses under the lowest parcel number of the group, regardless of number sequence.

B. Title Page

The Title Page will be organized substantially as shown on Exhibit 07-EX-21 if the cumulative review process is used or Exhibit 07-EX-21B if the review appraiser concept is used.

One signed original or a scanned copy of the Title Page will be submitted to HQ R/W so one hard copy with the Headquarters approval signature can be returned to the Region/District as a receipt. The hard copy of the approved Title Page will be bound into the report, inside the front cover. This procedure provides the Region/District with a positive verification of HQ R/W having received their copy of the appraisal and any revisions.

Each person signing this page certifies the appraisal has had appropriate review for accuracy and the report is approved or recommended for approval. Signatures shall be in accordance with current delegations.

The person verifying the calculations certifies that all mathematical calculations have been checked, verifies the accuracy of the maps in comparison with parcel appraisals, and certifies that no typographical errors or content inconsistencies exist in the report.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Parcel Summary Page (if used)

This will be prepared in accordance with RW 07-04.

D. Senior Field Review Certificate

This will be organized substantially as shown on 07-EX-24. The Senior Agent supervising preparation of the appraisal will sign the Certificate which summarizes the Senior's field review and certification statements regarding all parcels in the report.

The 07-EX-24A will be used when the Senior has not performed a field review. The 07-EX-24D will be used by the Review Appraiser.

E. Certificate of Appraiser

This is executed by the Appraiser and by any other Agent who participated in preparing the appraisal. A new Certificate is required whenever a parcel appraisal is revised resulting in a change in value. See RW 07-06.

F. Excess Land Review Certificate

The Excess Land Review Certificate is an internal document. This will not be included in the appraisal report, but transmitted separately for review with reports proposing purchase of excess. A new Certificate will be submitted with any change in excess parcels. See RW 07-07.

The Certificate will be executed by the Region/District Excess Land Manager. The purpose of the excess land review is to minimize or eliminate fragmentary excess land parcels.

G. Introduction

The Introduction shall contain information of a general nature applying to the Appraisal Report as a whole. It may also contain parcel description or valuation information pertaining to several parcels, if more than one parcel is included in a supplement (e.g., more than one parcel in a single ownership or Waiver Valuation).

Data which apply only to individual parcels should be shown on the pages for those parcels and not in the Introduction.

© 1994-2025 California Department of Transportation. All rights reserved.

H. Outdoor Advertising Structures

All outdoor advertising structures owned by entities other than grantor or occupants of the subject property will be listed on the Summary of Outdoor Advertising Structures prepared in accordance with the format and instructions shown on RW 07-08.

The cost of outdoor advertising structures appraised will be carried forward to the Parcel Summary Page (RW 07-04), if used, and to the Appraisal Summary (RW 07-09).

I. List of Access Openings

A list will be included in each report noting parcels with proposed private access openings within the access - restriction line. The list will show the openings by parcel number, station location, width, and type (permanent, temporary, or locked gate). The list and pertinent maps will be reviewed and confirmed with Region/District Project Development immediately prior to submission of the report for approval.

J. Photographs

Each Parcel Appraisal and each Comparable shall include photographs. They are to show all major improvements. Approximate location and direction of the view and the right of way line should be indicated where possible. Each photograph will be clearly identified with the parcel number, date, and photographer's initials or other suitable identification.

K. Appraisal Summary

Separate Appraisal Summary pages will be included covering all parcels (and subparcels when necessary) included in the report. See RW 07-09. An Appraisal Summary may be used to recapitulate the values for all subparcels in the parcel appraisal and for all parcels appraised together as a larger parcel.

© 1994-2025 California Department of Transportation. All rights reserved.

L. Parcel Remarks

The Parcel Remarks shall contain information of a specific nature, applying to the individual parcel only. Included in this narrative section are site descriptions, improvement descriptions, Highest and Best Use, valuation analysis, damages/benefits discussions, and reconciliation.

To aid the acquisition agent with the preparation of either the Appraisal Summary Statement (08-EX-15A or B) or the Valuation Summary Statement (08-EX-15C) (internal Caltrans link), in the Department's compliance with Section 7267.2 of the Government Code, the appraiser shall provide a paragraph entitled, "Summary of the Basis for Just Compensation." The paragraph shall be reproduced, verbatim, and inserted by the acquisition agent into either the Appraisal Summary Statement or the Valuation Summary Statement. This paragraph shall provide a concise summary of the reconciliation of value, (i.e., method most heavily relied upon, and reason); the reason for damages, or the lack thereof; the reason that damages can or cannot be cured; and a discussion of benefits, or a lack thereof. Numerical calculations should not be included in the narrative discussion.

M. Sales Data

The subject's sales history will be reported on the form and according to the instructions shown on RW 07-10. Each change of vesting of the subject during the last five years will be explained on a separate Sales Data form. Starting with the most recent sale that occurred during this period, all sales shall be verified by the appraiser with both the grantor and the grantee if at all possible. If not verified with both parties, efforts to do so must be described.

A complete verification shall be made, not only as to price paid and terms of the sale and what the sale included, but why the seller sold the property, why the buyer purchased the property, was the buyer aware of the State's proposed construction and acquisition, if the buyer had knowledge of the proposed construction and the effect it had on the purchase price, and how the purchase price was determined.

Any difference in appraised value and sales price must be explained.

This page is not required for sales of portions of the subject ownership outside the right of way.

© 1994-2025 California Department of Transportation. All rights reserved.

N. Summary of Comparable Data

All comparable data used in a report should be separately summarized in tabular form similar to Exhibit 07-EX-02.

A specific comparable or group of comparables may be related to one or more specific subject properties.

O. Comparable Data

All comparable data will be carefully investigated with as many parties involved as warranted. All reasonable attempts should be made to confirm the transaction with both the seller and the buyer. In the rare instance when the sale cannot be confirmed with one or both of the principals to the transaction, the appraiser will provide the full explanation on the Comparable Data form. In these cases, confirmation with secondary sources such as brokers, closing agents, and lenders with direct knowledge of the transaction should be included. Information solely obtained from the Assessor, Recorder, or private data services such as Costar, FARES, and Multiple Listing Service is not adequate for verification and confirmation purposes. Comparable improvements should be inspected when possible and/or appropriate, including interiors, and square feet obtained. If not possible, the Comparable Data form will so state.

Recent listings of the subject parcel should be investigated, considered, and discussed in the appraisal. If the listing is considered to be a reliable indicator of value, it may be included in the comparable data. In this case, it will also be referenced as a subject parcel.

All comparable data will be described on Comparable Data forms in accordance with RW 07-11 or RW 07-11A.

Other State appraisals or settlements will not be used for comparable data purposes.

An appraiser using the data verified previously by another State appraiser must investigate and analyze the data as appropriate, to enable reliance on the information for valuation purposes. This does not require reverifying the data with the principals unless the circumstances warrant. It does require viewing the data in the field and reviewing all pertinent information necessary to become familiar with the data in all the aspects necessary for reliable comparison purposes. It is imperative that each appraiser analyze any zones of

© 1994-2025 California Department of Transportation. All rights reserved.

land value or contributory value of improvements indicated on the Comparable Data form. Independent judgment will be documented by appropriate comments on the sales sheet to the effect that the figures have been reviewed and found reasonable or changes made to reflect the second appraiser's judgment. Each appraiser is free to change items on sales sheets previously used if he or she disagrees with the judgment of the original appraiser.

The Comparable Data form will show the date and name of the agent who originally verified the data. If the comparable data is used by other appraisers in subsequent appraisals, the date and name of the using appraiser will be shown immediately below that of the verifying appraiser.

Not all comparable data discovered need be included in the report. Include only that data considered most reliable and indicative of market value and which has been referenced in support of the parcel appraisal. Additional data should be retained in the Region/District's files.

The Comparable Data form shall be numbered, indexed, and filed for easy and rapid retrieval.

The inclusion of an Assessor's Plat of the comparable is strongly encouraged for clarity and understanding.

See Section 7.05.02.00 for further information on comparable data.

P. Appraisal Maps

The report will contain all the maps necessary for proper analysis, identification, and documentation. Each report will contain an Index Map (if available from Right of Way Engineering), an Appraisal Map, and a Comparable Data Map.

The report will include any additional maps required for proper understanding and documentation of specific parcel valuations, such as contour maps, topographic maps, or design plans. Significant topography should be included for partial acquisitions. Where a total ownership is very large, it can be shown on a reduced sketch, plat, or map.

© 1994-2025 California Department of Transportation. All rights reserved.

Exhibit maps showing pertinent design detail are required for parcels with damages, benefits, and/or construction contract work of other than routine curative nature, utility relocations, or road approaches. Such exhibit maps may be on a reduced scale and need show only the affected parcels. The maps should show the main lanes, frontage roads, and the nearest interchanges, drainage structures, construction contract work locations, and information regarding cuts and fills (if significant) for the affected parcels. At the Region/District's discretion, this information may be on separate maps, or plotted on the Appraisal Maps. If a large number of parcel appraisals are involved, the possibility of consolidating the Appraisal Map and the topographic design map should be investigated.

The Appraisal Branch is responsible for the completeness of the maps, and for requesting delineation of pertinent data and topography not previously included.

It is also the Appraisal Branch's responsibility to ensure that maps, including coloring, are correct. If corrections are required, the maps will be returned to R/W Engineering for correction.

Q. Comparable Data Map

This map will be produced from information supplied by the appraiser. The map must show the proper locations of the comparable data, the subject properties, and other pertinent information necessary for the understanding of the comparable data.

The map will be prepared by the appraiser or Right of Way Engineering. It will be of sufficient size or scale to show the following:

1. Size, shape, and location of subject property(ies) and comparable data as related to each other.

2. Zone(s) of the various properties (when pertinent).

3. Comparable sales colored orange, comparable listings colored green, and subject property(ies) colored red.

4. Utility service mains (when pertinent).

Additional information may be included when necessary or when considered by the appraiser to contribute to the understanding of the comparable data. A North arrow will be included on all maps.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.04.00 Parcel Numbering

The parcel numbering shown on the Appraisal Maps and certified for right of way acquisition will be utilized in the report. If parcels merge prior to final Appraisal Maps being received by the Appraisal Branch, the parcel numbering will be revised. If a merger occurs after final Appraisal Maps are received, at the Region/District's option, the assigned parcel numbering will continue and the merged parcels will be appraised together as a larger parcel. Merged parcels will be colored one color; both separate and combined areas will be shown, and the correct vesting will be shown on the maps. The lowest parcel number will be used for reference and the other number(s) will be shown in parentheses. If the Region/District prefers, it can revise the maps and numbering and combine the parcels into one.

Occasionally, an ownership lies outside the right of way but has appurtenant rights affected by the project requirements (access rights, easements, etc.). The effect of the project requirements may not become known until the appraisal stage. Such rights may be cleared by quitclaim deed in the encumbered parcel transaction. Frequently, however, the right of way acquisition of the appurtenant rights may materially affect the dominant remainder. If a separate appraisal of the affected ownership is required, the Appraisal Branch will request a parcel number be assigned and the ownership delineated. Separate appraisals may be required when (1) improvements are affected, (2) damages occur to the remainder, (3) construction contract work is required, or (4) a separate escrow is necessary.

Subparcel numbers will be used to designate separate requirements. Occasionally, subsidiary interests, such as mining claims or oil rights, will require separate appraisals. These will be separately identified by subparcel letters by the Appraisal Branch and need not be delineated on Appraisal Maps unless required for clarity.

Parcel numbering for right of way purposes may not necessarily coincide with condemnation parcels nor with title company parcels.

It is the Region/District Appraisal Branch's responsibility to ensure that vestings, parcel numbering, and appurtenant rights are correct.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.05.00 Number of Parcels Per Report

Generally, only one parcel will be contained in each report as the report will be provided to the Grantor in compliance with Section 102 of Streets and Highways Code. However, multiple parcels within a single ownership may be contained in a report. Waiver Valuations may also contain more than one parcel in a supplement.

7.02.06.00 Parcels Straddling an Expenditure Authorization

If requirements from a single ownership straddle an expenditure authorization, it will be acceptable to charge the total property cost to a single project expenditure authorization. Minor overlaps warrant investigation of possible project limit adjustments.

7.02.07.00 Parcel Groups – Mutual Owners

A project may contain multiple parcels with the same ownership, but the parcels not comprising an integrated operation. In these cases, the remarks for each parcel should contain clear references to other parcels required from the same owner. All requirements from a single owner on a project should be included in the same report, if possible.

7.02.08.00 Parcel Groups – Integrated Operation

A. General

Parcels that compose an integrated operation will be included in one appraisal with sufficient discussion to illustrate the relationship of the parcels. If the inclusion of all of the parcels in one appraisal is impractical, the Region/District may approve the variance.

B. Procedure

When appraising parcels which are part of an integrated operation, the following instructions apply:

1. All parcels in the group will be included together in the report regardless of numbering sequence. If revision of an unclosed transaction is necessary, either revised appraisal pages may be used or the entire group included in a revised appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

2. A recapitulation Appraisal Summary (RW 07-09) will summarize the values for the total group. The page will reference in the upper margin all parcels included in the group. It will use the lowest parcel number as file reference.

3. Following the recapitulation will be the pro rata segregations of value for each parcel and subparcel, including excess portions. Subparcels will follow each parcel. Below the words "Parcel No." on the Appraisal Summary, insert the words "See also Parcel _____" and the lowest parcel number in the group.

4. Following the Appraisal Summary will be the basic appraisal data for the group.

5. On the Appraisal Report front cover and Parcel Summary Page, list the parcels appraised together as a larger parcel in parentheses showing the lowest parcel number regardless of number sequence. On the Parcel Summary Page, the total value of each parcel in the group will be shown.

6. On the Appraisal Maps, the group will be colored as a whole with the same color. A plot plan of the group will also be shown if the total group cannot be seen on one map.

7.02.09.00 Dual Report Process

When a Dual Report Process is utilized, the second report may be prepared by either a second staff appraiser or by a contract appraiser under the supervision of another Senior, or both reports may be done by contract appraisers. Contract appraisals shall comply with all pertinent appraisal instructions. This includes the front cover through the Appraisal Summary (RW 07-09) which will be prepared by the reviewing Senior from information in the report. The two reviewing Seniors shall act as a liaison between the appraisers to ascertain that both are following the same legal premises and have benefit of all the sales and other supporting data. (See 7.01.07.00 and 7.01.16.00, C.)

Senior Review Certificates will be prepared for each appraisal.

The excess property inventory valuation and replacement housing estimates will be prepared by Staff (following HQ R/W approval) and not by independent appraisers.

© 1994-2025 California Department of Transportation. All rights reserved.

The report to be used for acquisition will be approved. The other report will be reviewed for documentation. The judicious use of joint factual data is encouraged; however, independent analyses, judgments, valuations, and conclusions are required. A joint factual data section may include any data of a factual nature mutually accepted as such by the appraisers, and other data such as acquisition authorization documents, list of access openings, photos, maps, and cost-new estimates.

7.02.09.01 Corrections and Revisions

Where two reports were prepared and revision or correction of the approved appraisal becomes necessary, the following guidelines are to be observed:

A. In general, only the approved appraisal need be revised; except,

B. In these situations where there is a major change which substantially affects the fair market value estimate, it is necessary to revise both reports.

7.02.09.02 Review Process

Region/District cumulative reviewers above the Senior level are responsible for resolving significant differences between reports due to factual matters only. Determining the reasons for major divergences is important. It may be necessary to inquire into the support for significant judgmental differences. However, any attempt to simply narrow the spread of values resulting from differences is inappropriate and contrary to the purpose for securing dual reports. HQ R/W will consider these differences in its review process.

The Region/District Appraisal Supervisor's signature recommending approval of both reports is not considered a recommendation of two separate fair market values. It is just indicating that both reports are based on sound appraisal theory and contain appropriate documentation and analysis to support the appraisers' conclusions. HQ R/W is responsible for reviewing both reports and approving the report which best supports its conclusions.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.10.00 Replacement Housing Valuation Reports

The Appraisal Branch may prepare these reports for use by the Relocation Assistance function. Instructions for preparing them are contained in Relocation Assistance, Chapter 10.

One individual cannot prepare both the Acquisition Appraisal and the Replacement Housing Valuation on the same dwelling unit. One Senior Right of Way Agent may review and recommend for approval both reports on the same dwelling unit as long as that Senior does not also have responsibility for the Region/District's Relocation function.

7.02.11.00 Calculations

All monetary appraisal calculations shall normally be carried accurately to the nearest cent without rounding of figures or adjustment of unit values to yield rounded figures. The total appraised value is to be rounded as follows:

A. From $500 to $2,500, to the nearest $50.

B. From $2,501 to $100,000, to the nearest $100.

C. Parcels exceeding $100,000, to the nearest $1,000.

When several approaches to value are used, the final value found after reconciliation will normally be a rounded figure. Minor rounding adjustments are permitted on condemnation appraisals for clarity of testimony presentation.

Generally, land areas should be shown to at least two decimal places where acres or front feet are used, and to the closest square foot where areas are so expressed.
Building areas should be calculated to the closest square foot.

All calculations shall be carefully checked prior to first level recommendation for approval.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.12.00 Noncomplex Valuations of $25,000 or Less

Noncomplex parcel valuations of $25,000 or less may be appraised utilizing either the memorandum appraisal format (Exhibit 07-EX-25), or a very succinct narrative appraisal using RW 07-09. The $25,000 amount includes severance damages, but excludes minor construction contract work such as: replacement of existing facilities such as road approaches, fencing, irrigation pipelines, etc. A Noncomplex Valuation is still an appraisal and must meet all the requirements of 49 CFR 24.103(a) and applicable California State Statutes.

The determination as to which parcel valuations are noncomplex rests with the Region/District. Among the criteria to be considered in making the determination are:

A. There is no serious question as to highest and best use.

B. Adequate market data is available.

C. Substantial damages and benefits are not involved.

D. There is no substantial decrease in market value due to the presence of hazardous material/hazardous waste.

Exhibit 07-EX-25 shows the minimum content requirements for the narrative portion of the appraisal. The amount of analysis and degree of documentation should be in proportion to the appraisal problem and valuation involved. However, substance and brevity should be the norm. If RW 07-09 is used, then the narrative should be the same succinct format as the Memorandum Appraisal. A narrative paragraph, as described in Section 7.02.03.00, L., shall be included in the report.

All appraisals must include at least the following:

- Certificate of Sufficiency and HMDD
- Senior Field Review Certificate
- Certificate of Appraiser
- Photograph(s) of subject
- Summary of the Basis for Just Compensation
- Index map
- Appraisal map
- Comparable Data forms with photographs
- Comparable Data Map

© 1994-2025 California Department of Transportation. All rights reserved.

Where applicable, the appraisal must also include: Summary of Outdoor Advertising Structures, List of Access Openings, and Sales Data form.

7.02.13.00 Waiver Valuation In Lieu of an Appraisal

An appraisal is not required if the Region/District determines one is unnecessary because the valuation problem is uncomplicated, and the fair market value is estimated at $25,000 or less based on a review of available data, per 49 CFR 24.102(c)(2)(ii).

The $25,000 amount should include severance damages, if any, but exclude any insignificant construction contract work. See Section 7.01.02.00 for Authority to make this determination.

The "Waiver Valuation" does not qualify as an appraisal under 49 CFR 24.103(a) and is to be used merely for documentation for support of the amount of just compensation to be paid to the property owner. A Waiver Valuation cannot be used in eminent domain proceedings.

The determination as to which parcel is uncomplicated rests with the Region/District. Among the criteria to be considered in making the determination are:

A. There is no serious question as to highest and best use.

B. Adequate market data is available.

C. Substantial damages and benefits are not involved.

D. There is no substantial decrease in market value due to the presence of hazardous material/hazardous waste.

The Waiver Valuation may be based on a review of available relevant data such as: comparable sales and listings already in the Region/District files, comparable sales and listings from multiple-listing services, and commercial databases, opinions of Assessor's Office appraisers or real estate brokers, and other data sources. Comparable Data forms and Comparable Data Maps are not necessary.

The documentation to support the Waiver Valuation is contained in Manual Sections 7.02.13.01 and 7.02.13.02. The required content will differ depending on whether the value is $2,500 or less, or $2,501 to $25,000.

© 1994-2025 California Department of Transportation. All rights reserved.

Requirements regarding the Certificate of Sufficiency and HMDD for environmental clearance, project identification, certification date, confidentiality statement, and certification of need for the right of way and access control by Project Development still apply. A narrative paragraph, as described in Section 7.02.03.00, L., shall be included in the report.

Property owners of these parcels shall be sent the "Notice of Decision to Inspect" letter (07-EX-17A) with the appropriate Title VI information and booklet *"Your Property, Your Transportation Project."* On all waiver valuations, Grantors shall be offered the option to request an appraisal in lieu of the waiver valuation. Also, parcel diaries should be initiated and included in the estimate and the file.

A Waiver Valuation must be approved in accordance with present approval delegations. It may be prepared by an Agent of less than Associate grade, however an Associate level agent shall sign recommending it for approval on Waiver Valuations that exceed $15,000. 49 CFR 24.102(c)(2)(ii)B requires that the Agent preparing the Waiver Valuation shall have a good understanding of appraisal valuation concepts.

Members or candidates of professional appraisal organizations who are assigned to act in the dual capacity of Appraiser and Acquisition Agent should check their organization's Code of Ethics for specific prohibitions and disclosure requirements.

7.02.13.01 Waiver Valuation ($2,500 or Less) – Contents and Requirements

In addition to the documentation mentioned in Section 7.02.13.00, a Waiver Valuation valued at $2,500 or less can be documented with a diary entry. The diary entry should state the basis of the value conclusion, i.e., land value, improvement value, and severance/cost to cure damages. In addition, a photograph(s) of the subject must be included.

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.13.02 Waiver Valuation ($2,501 to $25,000) – Contents and Requirements

In addition to the documentation mentioned in Section 7.02.13.00, a Waiver Valuation with a value estimate of $2,501 to $25,000 must include the following:

- Waiver Valuation Title Page, Exhibit 07-EX-21A
- Senior Review Certificate Form – Waiver Valuation, Exhibit 07-EX-24B
- Certificate of Waiver Valuation, RW 07-06A
- Waiver Valuation, RW 07-15
- Photograph(s) of subject
- Index map (if available)
- Appraisal map
- Certificate of Sufficiency and HMDD

The Certification of Waiver Valuation may have to be modified as to the statements concerning comparable sales. It should also contain a statement as follows:

> "That I understand I may be assigned as the Acquisition Agent for one or more parcels contained in this report, but this has not affected my professional judgment nor influenced my opinion of value."

© 1994-2025 California Department of Transportation. All rights reserved.

7.02.14.00 Nominal Values ($2,500 or Less)

Regardless of the type of valuation report prepared, i.e., narrative appraisal report, memorandum appraisal report, or Waiver Valuation, if the amount of all property rights or interests is $2,500 or less, the value of the required property is considered to be nominal. Calculations supporting this conclusion shall be shown in the valuation report to illustrate the basis for the $2,500 or less conclusion. For example, the report will show 0.025 acres at $5,000/ac = $125.

The word "Nominal," as discussed above, shall be shown in the $2,500 or less valuation report as the following:

A. If the value of the requirement is so minimal as to not be calculable or to not have an effect on the market value of the parcel, show "Nominal" in the amount column.

B. If the calculated amount is $500 or less, show "$500 (Nominal)" in the amount column.

C. If the calculated amount is between $501 and $2,500, show the actual amount rounded to the nearest $50 with "(Nominal)" in the amount column.

Under options A, B, or C, the word "Nominal" or the valuation amounts with Nominal in parenthesis shall be carried forward to the RW 07-09 value column, the Parcel Summary Page, if used, the Senior Field Review Certificate, and the Certificate of Appraiser.

The Senior Field Review Certificate and Appraisal Review Report shall be prepared substantially as shown on the 07-EX-24. Minor modifications may be made to suit the approval requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

7.03.00.00 – APPRAISAL PREPARATION

7.03.01.00 The Appraisal Summary – Purpose

This page presents a summation of parcel data, value elements, and total appraised valuation.

7.03.02.00 Appraisal Summary Format

The Appraisal Summary (Form RW 07-09) will be completed in accordance with the directions following the form. Each of the described headings will be completed as appropriate.

Under the heading "Land," show the valuation of the land or other property rights to be acquired. Each class of land required will be shown by type, area, unit value, and total value. Mining claims or other land rights separately valued will be separately described. If access rights are the only rights required, the remark "Access Rights Only" and a nominal value will be shown. Loss in parcel value will be reflected under "Damages." If excess property is to be acquired, including parcels with excess proposed for exchange or as replacement sites, a segregation between Right of Way and Excess will be shown. If subparcels are included, clearly indicate the separate values, including those of excess.

All improvements proposed to be acquired, including those valued with land, will be listed under the "Improvement" heading. If improvements are on excess to be acquired, there will be a segregation of value between right of way and excess.

Improvements proposed for relocation in lieu of purchase and fixtures, machinery, equipment, and other "items pertaining to the realty" proposed for purchase will be shown under separate subheadings. Improvements may be listed either on the Appraisal Summary page, a Summary of Improvements page, or in the Cost Approach.

© 1994-2025 California Department of Transportation. All rights reserved.

7.03.03.00 Alternate Appraisals

Alternate appraisals are secondary acquisition approaches and will be shown on supplemental Appraisal Summary pages. When alternate appraisals are included, the words "Primary" or "Alternate" will be shown in the headings of the Appraisal Summary pages. See the following sections on appraisals of Uneconomic Remnants and Excess Acquisitions regarding which approach should be the primary and which approach should be the alternate. The amount carried forward to the Parcel Summary Page, if used, will be the appraisal, either alternate or primary, that represents the higher cost to the State.

Both the Primary and Alternate valuations will be provided to the Grantor in compliance with Section 102 of the Streets and Highways Code, as they are both part of the approved appraisal.

7.03.04.00 Appraisals of Excess Property for Acquisition

The appraisal of excess property will be done according to one of the following subsections:

7.03.04.01 Uneconomic in the Market

Staff appraisals will normally propose only acquisition of the right of way required plus net damages to the remaining property, if any. A small uneconomic remnant should be reviewed for possibility of including it in the right of way. However, with full substantiation, the appraisal may propose purchase of uneconomic remnants and/or improvements in the following instances:

A. When net severance damages, construction contract work, and utility relocations are substantial in relation to the value of the remainder in the before condition.

B. When the remainder is landlocked or so reduced in size or irregularly shaped as to be legally or economically incapable of independent development in the after condition.

© 1994-2025 California Department of Transportation. All rights reserved.

Whenever the purchase of excess is proposed, purchase of the excess is required as the primary appraisal and will be approved for acquisition in accordance with current appraisal approval delegations. Justification for the acquisition of the excess from an economic standpoint in the market must be included in the report. The partial acquisition appraisal including estimated net severance damages must be included as the alternate appraisal. On Federally funded projects, the Department's policy is to seek Federal reimbursement for the value of the partial acquisition, plus the amount of net damages accruing to the remainder.

NOTE: Whenever feasible, a valuation of the minor remnant left in the after condition should be included in the acquisition appraisal if: (1) the uneconomic remnant "is landlocked or so reduced in size or irregularly shaped as to be legally or economically incapable of independent development;" and (2) the uneconomic remnant is likely to have a value of $5,000 or less as an independent parcel or as plottage to an adjoining property. The valuation should be prepared in the appropriate excess land appraisal format and processed as a nominal value parcel (see Section 7.14.00.00). The valuation amount is the VTA. See Section 7.03.07.00.

If an exchange appears likely, the acquisition may be accelerated by completing the excess land appraisal concurrently with the acquisition appraisal, regardless of dollar amount.

7.03.04.02 Uneconomic to the Owner, or for the Convenience of the Owner

FHWA [(49 CFR 24.2)] defines "uneconomic remnant" as follows: "a parcel of real property in which the owner is left with an interest after a partial acquisition of the owner's property, and which the acquiring agency has determined has little or no value or utility to the owner." NOTE: An uneconomic remnant may have substantial market value and still have little or no value or utility to the owner.

The Uniform Act [49 CFR 24.102(k)] states:

> "If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the Agency shall offer to acquire the uneconomic remnant along with the portion of the property needed for the project."

© 1994-2025 California Department of Transportation. All rights reserved.

Statutes on the subject of "uneconomic remnants" are as follows:

A. State Government Code Section 7267.7(a) states:

> "If the acquisition of only a portion of a property would leave the remaining portion in such a shape or condition as to constitute an uneconomic remnant, the public entity shall offer to, and may acquire, the entire property if the owner so desires."

B. Code of Civil Procedure Section 1240.150 states:

> "Whenever a part of a larger parcel of property is to be acquired by a public entity for public use and the remainder, or a portion of the remainder, will be left in such size, shape, or condition as to be of little value to its owner or to give rise to a claim for severance or other damages, the public entity may acquire the remainder, or portion of the remainder, by any means (including eminent domain) expressly consented to by the owner."
>
> Law Revision Commission Comment: "Inasmuch as exercise of the authority conferred by this section depends upon the consent and concurrence of the property owner, the language of the section is broadly drawn to authorize acquisition whenever the remainder would have little value to its owner (rather than little market value or value to another owner)."

At the appraisal stage, it may be difficult to determine whether or not a remainder is an uneconomic remnant to the owner. The determination must be made on a case-by-case basis. The Region/District should consult with the Division Appraisal Branch when questions arise. Ultimately, the appraiser needs to explain in the appraisal that the proposed changes to the remainder will affect the utility of the parcel in such a way as to make the use no longer viable to the owner, and make a determination that the owner's request for acquisition is not merely for the owner's convenience. If the remainder is not identified initially by the appraiser as an "uneconomic remnant to the owner," the Acquisition Branch may later request an alternate appraisal that includes the uneconomic remnant and document such request by the owner in the Parcel Diary.

© 1994-2025 California Department of Transportation. All rights reserved.

Identified uneconomic remnants to the owner will be included for acquisition as an excess parcel in an alternate appraisal. A partial acquisition appraisal is required as the primary appraisal, which will be reviewed and approved for acquisition. The alternate will be approved for valuation purposes only. The specific justification and authorization for the acquisition of the excess in the alternate will be the responsibility of the Region/District Right of Way Manager (Region/District R/W Mgr.).

The partial acquisition appraisal including damages sets the limit for Federal participation. The residual value of the excess after damages is not eligible for Federal participation.

The exception to the requirement of preparing both a primary and alternate appraisal, as described above, is in situations where the property owner, at the time of the appraisal, requests that the State acquire the remnant that has been identified by the appraiser to be an "uneconomic remnant to the owner." In these cases, the Region/District R/W Mgr., may authorize the Appraisal Branch, in writing, to prepare a single, full take appraisal that proposes acquisition of the remnant as an excess parcel. A copy of the memorandum authorizing the single appraisal will be included in the appraisal report. The appraiser must also document such requests in the Parcel Diary. This exception only applies if there is no Federal participation in funding the acquisition since the appraisal would not contain a before and after damage analysis.

Additionally, property owners may request the purchase of a remainder merely for their convenience under circumstances which do not fit within the reasons as described above. Again, the partial acquisition appraisal including damages sets the limit for Federal participation. An alternate appraisal proposing the purchase of excess will be prepared when authorized in writing by the Region/District R/W Mgr. A copy of this memorandum will be included in the report with appropriate reference.

When the property owner requests the purchase of a remainder for convenience, a partial acquisition appraisal is required as the primary appraisal, which will be reviewed and approved for acquisition. The alternate will be approved for valuation purposes only, in accordance with current delegations. The specific justification and authorization for the acquisition of the excess in the alternate will be the responsibility of the Region/District R/W Mgr., considering among other things, the availability of State funds. The alternate excess acquisition appraisal may be made at the time of the initial appraisal or subsequently at the request of the Acquisition Branch.

© 1994-2025 California Department of Transportation. All rights reserved.

If primary and alternate appraisals are made pursuant to this Section, the appraisal report must include a statement to that effect.

7.03.04.03 To Avoid Large Windfall Relocation Payments to Single Family Owner-Occupants

In some situations involving improved single family residential sites, a partial acquisition may result in a large windfall purchase price differential payment to the owner-occupant. This may occur when the taking includes the residence, and the remaining site has substantial value. The Appraiser must discuss these cases with the Relocation and Acquisition Branches to determine if a windfall situation exists, and thus a need to offer to acquire the remainder as excess (a total take) to avoid the windfall. If yes, a total take appraisal (including excess) will be made as the primary approach and a part take appraisal will be made as the alternate approach. A statement must be included that both appraisals are being made to avoid creating a windfall situation.

The total take must first be offered to the owner-occupant. If the owner elects to retain the remainder, the relocation payment can be calculated on the basis of a full take, thus avoiding the windfall payment.

In these situations, both the primary and alternate appraisals will be reviewed for approval in accordance with current appraisal approval delegations. While the purchase of the excess under this circumstance is not eligible for Federal participation, reimbursement can be sought for the value of the requirement plus the appraised amount of the damages (as set by the partial acquisition appraisal) on Federally funded projects.

© 1994-2025 California Department of Transportation. All rights reserved.

7.03.05.00 Legal Parcel, Subparcels, and Larger Parcel

A. Generally, each parcel, together with all subparcels, will be included on one Appraisal Summary (RW 07-09). It may be necessary to have separate Appraisal Summary pages for subparcels. In these cases, the total value for the parcel will be compiled on one Appraisal Summary page.

   There will be cases when more than one ownership will be included in a legal parcel. It may be necessary to appraise the separate ownerships as one legal parcel for proper damage and benefit valuation. A separate Appraisal Summary page will be included to summarize the combined analysis of these separate ownerships.

B. Generally, a Larger Parcel Analysis will be required for all project appraisals.

   A Larger Parcel is defined as:

   In governmental land acquisitions of partial interests in property such as easements, the tract or tracts of land that are under the beneficial control of a single individual or entity and have the same, or an integrated, highest and best use. Elements for consideration by the appraiser in making a determination in this regard are contiguity, or proximity, as it bears on the highest and best use of the property, unity of ownership, and unity of highest and best use. In California, unity of ownership, contiguity, and unity of use are the three conditions that establish the larger parcel for the consideration of severance damages.

   The Larger Parcel Analysis should be completed by the appraiser prior to the determination of highest and best use of the subject property, as the determination of the larger parcel may have direct bearing on the highest and best use determination.

© 1994-2025 California Department of Transportation. All rights reserved.

7.03.06.00 Allocation Between Excess and Right of Way

Land value will be segregated by area, unit value, and total value of each class of land in the right of way and excess area. Additional requirements on excess land (drainage easements, etc.) are to be valued and attributed to the right of way. The excess is valued after encumbrances of any additional requirements.

Improvement values, including Relocations in Lieu of Purchase and Improvements Pertaining to the Realty, will be allocated between the required right of way acquisition area and the proposed excess area depending on their location and subject to the following instructions:

A. Building improvements straddling the right of way line will be charged to Right of Way. Building improvements, including garages and auxiliary buildings, located entirely on excess will be charged to Excess.

B. Landscaping, miscellaneous yard improvements, minor sheds, patios, fencing, and improvements pertaining to the realty located on excess are to be charged to Right of Way if the property's major improvements are charged to Right of Way.

C. Damages to remainders not acquired as excess will be charged to Right of Way.

Separate totals will be shown for right of way and excess areas.

7.03.07.00 Excess Parcel Inventory Value (VTA)

Every proposed excess parcel will be appraised at inventory value (Value at Time of Acquisition, or VTA) for accounting purposes.

A. Inventory Value is the value of the excess, as a partial acquisition under condemnation rules, immediately after acquisition and considered as a separate parcel. The inventory value may not exceed the pro rata cost of the parcel except when this cost is less than $1. The minimum inventory value is $1.

B. The inventory value of each proposed excess parcel will be shown on an Excess Property Inventory Valuation Page (Form RW 07-13) in each parcel appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Inventory Value may be based on the appraiser's judgment without detailed supporting documentation. Excess valued in a partial acquisition appraisal need only be summarized on Form RW 07-13.

D. It is anticipated that Form RW 07-13 will not contain sufficient data to document a partial acquisition. If grantor desires to retain the excess and the excess has not been appraised on a partial acquisition alternate, the Acquisition Branch will request a revised appraisal.

E. Inventory value will be changed only if the staff Appraisal is revised. Inventory values will not be revised to agree with administrative settlements, independent appraisals, stipulations, or condemnation judgments.

7.03.08.00 Rental Rates

Rental rates for all improved properties where the improvements are affected by the taking and rented unimproved properties shall be shown on the Appraisal Summary (RW 07-09).

The actual existing rental rate and the estimated economic rental rate will be shown on tenant-occupied properties. An estimate of the economic rental rate will be shown for all improved owner-occupied properties. The basis for the appraiser's estimate of economic rent on dwelling units to be acquired shall be documented in the appraisal usually by specific reference to comparable rental data (see Exhibit 07-EX-03). State ownership will not be considered in estimating the rate. All actual and estimated economic rental rate data that include utilities should be specific as to type of utility(ies) involved.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.00.00 – VALUE CONCEPTS AND CONSIDERATIONS

7.04.01.00 Value Basis

Required property rights will be appraised at current fair market value. The property will be appraised as though free and clear of all liens, bond assessments, and indebtedness. The property will be appraised at its highest and best use, considering its legal and economic utility and desirability. Highest and best use is considered to be the reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and results in the highest value.

Any decrease or increase in the fair market value prior to the date of valuation of real property caused by the public improvement for which such property is acquired, or by the likelihood that the property would be acquired for such improvement, other than that due to physical deterioration within the reasonable control of the owner, will be disregarded in determining the compensation for the property.

7.04.02.00 Total Value

The market value of required property is the total appraised value of the property rights proposed for purchase including net damages, if any, to the remainder. This amount is carried forward to the Appraisal Summary (RW 07-09) and the Parcel Summary Page (RW 07-04), if used.

7.04.03.00 Encumbered Fee

The condition of title of each subject parcel will be examined. The effects of land restrictions and existing rights of way and easements, recorded and unrecorded, will be considered in the land valuation. The effect of routine tract restrictions, domestic utility easements, and easements of nominal effect may be reflected in the overall valuation of the land. Fee areas encumbered with extensive easements and rights of way which materially affect the use or desirability of the land are to be valued separately, reflecting the effect of the encumbrances. Great care must be exercised in evaluating the effect of private land restrictions or easements in which the subject parcel is a servient tenement. In these cases, a separate appraisal of the dominant tenement and the effect on the servient tenement may be required.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.04.00 Mineral, Water, Oil and Gas Rights

Mining claims, water rights, mineral reservation, and oil and gas rights will be valued as separate rights in land, if separately owned, or if comparable data supports other than nominal valuation. The appraisal will include the land value of the right, the improvements appurtenant to the right, and the damage payments and construction contract work necessitated by the proposed highway construction. The value of the fee ownership should reflect the loss of the surface area and other rights required to exploit the resource.

Frequently, these rights may be exploited in the after condition without interfering with the use of the surface for highway purposes. In these cases, the appraisal may show the right at a nominal land value and appropriate payments for improvements, damages, and construction contract work.

When necessary to make separate appraisals of these interests, the Appraisal Branch will identify the separate rights by subparcel letter designation. These rights need not be delineated on Appraisal Maps unless required for clarity.

7.04.05.00 Improvement Bonds and Assessments

Property will normally be appraised free and clear of improvement bonds and assessments. This assumes that the appraised value reflects these improvements over properties not so improved and therefore not subject to bonds and assessments. Comparable data are to be adjusted to reflect these differences where the comparables are not subject to the same bonded indebtedness.

Exception to this policy will be allowed only if both the following conditions are met:

A. The assessment Region/District is relatively new, and few, if any, sales have occurred which reflect the effect of the bonded improvements on property values.

B. The appraisal indicates that the bonded improvement will be adequate for the area and will add value to the properties, at least, commensurate with its cost.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.06.00 Leasehold Interests "Bonus Values"

The valuation of parcels will be made as if free and clear of leasehold interests. However, leasehold information is required. The appraisal will contain the name of the lessee, lease rate, and general summary of the lease terms. The contract, estimated economic rents and any circumstances which may indicate a "bonus value" situation, including the statement that one does or may exist, will be discussed.

"Bonus Value" is defined as the value of a tenant's leasehold interest in the real estate arising from contract rent that is less than the economic rent. The economic rent must be consistent with the highest and best use of the property. The amount of "bonus value" is a matter between lessor and lessee. Any "bonus value" shall be estimated only at the request of the Acquisition Branch for assistance in negotiations and not included in the Appraisal Report.

7.04.07.00 Access Rights

The value of restriction of abutter's rights, including access rights, is measured by the loss in value of the remaining property before and after the restriction. The requirements for abutter's rights and/or access rights will be marked on the Appraisal Summary (RW 07-09) of all partial acquisitions. If abutter's rights and/or access rights are the only property rights acquired, the remark "Abutter's Rights and/or Access Rights Only" and nominal value will follow the "Land" heading. Valuation of any loss will be shown under "Damages." (See Section 7.09.00.00.)

When the Department proposes to dispose of access rights, Project Development may request an appraisal of the market value of the property right being transferred. The measure of market value for access rights is the potential increase in value of the abutting property before and after the access is granted. See Project Development Procedures Manual, Chapters 26 and 27, as well as Chapter 16 of the Right of Way Manual for guidance.

7.04.08.00 Temporary Easements

A temporary easement is an encumbrance for a specific use over a specified duration of time. Temporary requirements are valued by the loss in utility and enjoyment of the encumbered area for the entire easement term/duration. The appraiser shall discuss the proposed use of the temporary easement area

© 1994-2025 California Department of Transportation. All rights reserved.

with Design in order to understand and estimate the impacts to the subject parcel.

An appraiser is often unable to accurately calculate any varying levels of loss, as Caltrans may not control when "actual" physical work starts and ends on a parcel within the span of the temporary easement term. Although the actual/physical use of a property may be anticipated for a limited duration within a set time frame, a property is considered to be encumbered for the entire duration of the easement term. While the extent of an owner's loss of utility and enjoyment may be influenced by a potential constraint to the lease or general use of the encumbered area, the temporary easement valuation shall employ one consistent (flat) rate for the compensable period. This loss may be expressed as a discounted land rental rate.

The compensable period for a temporary easement shall commence on the "start date" and expire on the "end date." The start date shall be the project's Right of Way Certification date. The end date should be confirmed with Design, if possible. If the end date cannot be confirmed with Design, the end date shall be the project's Construction Contract Acceptance date.

If there are additional acquisitions and/or impacts to the subject property, timing of the temporary easement encumbrance shall be considered appropriately in order to avoid any potential double payment and/or minimize damages.

7.04.09.00 Permanent Easements

A permanent easement is a perpetual encumbrance for a specific use. Permanent requirements, such as drainage easements, etc., will be valued by the loss in utility and enjoyment before and after the imposition of the encumbrance. This loss may be expressed as a percentage of unencumbered fee value. The appraiser shall discuss the proposed use of the permanent easement area with Design in order to understand and estimate the impacts to the subject parcel. The requirement may also involve improvements and possible damages and benefits to the remaining property.

Care must be exercised that easements existing within the subject fee acquisition are properly valued and that double payment is not proposed for easement replacement requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.10.00 Underlying Fee

Caltrans defines "underlying fee" as the portion of ownership encumbered by a public road easement. Per Streets and Highways Code Section 83, the underlying fee "*within the boundaries of a state highway . . . constitute a part of the right of way*" and shall be without compensation paid. As the public has full control over the surface use and the only right the underlying fee owner has is one of reversion, underlying fee is typically valued at $1.00. Also see Section 7.13.70.00 G (2).

7.04.11.00 Unit Values

Comparable data, land, and improvement values are normally expressed as unit values. The unit values are then adjusted and applied to land and/or improvements of the subject, as appropriate, after taking differences into account.

Occasionally, land may be valued by comparison on a site or lot basis. This method must be supported by the comparable data. In a partial acquisition, the land will be valued at the comparable unit value of the class of land of which it is a portion. Distribution of value between right of way requirements and excess will be shown at the component unit land values of the classes of land of which the portions are a part.

7.04.12.00 Hazardous Material and Hazardous Waste Definition

A material is hazardous if it poses a threat to human health or the environment. The term "*hazardous waste*" is applicable to the storage, deposit, contamination, etc., involving a hazardous material (HM) which has escaped or been discarded or abandoned and which may be defined in general terms as being any of the following:

- Flammable
- Reactive (subject to spontaneous explosion or flammability)
- Corrosive
- Toxic

"*Hazardous materials*" may be any of a large group of the above products. If their use is under control and managed in accordance with applicable statutes and regulations, there is generally no appraisal problem.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.12.01 Hazardous Materials/Hazardous Waste General

Each Region/District has a designated Region/District Hazardous Waste Coordinator; this is the contact person for all hazardous materials and hazardous waste information that may pertain to the development of a project. They will be responsible for ensuring implementation of and compliance with the Director's policy memorandum that outlines the Department's policy/procedure relative to hazardous materials and hazardous waste. The major points affecting Right of Way are:

A. No real property acquisition or possession is to take place until hazardous materials and hazardous waste investigation reports have been completed and the appraisal reflects those findings.

B. The parcel Certificate of Sufficiency (COS) from Project Development to Right of Way is to have attached a Hazardous Materials Disclosure Document (HMDD) that provides a narrative certification from the District Hazardous Waste Coordinator that the property can be:

    1. considered free of significant hazardous materials and hazardous waste; or

    2. the COS and HMDD will include a completed and approved property investigation report stating the nature and extent of contamination and an appropriate remedial cost estimate; or

    3. if appropriate, the COS and HMDD will state the owner's approved cleanup plans, schedule and current status.

The COS and HMDD are internal documents. As such, they are to be transmitted with the appraisal for review and retained in the file.

7.04.12.02 Hazardous Material (Including Hazardous Waste and Contamination) Identification and Investigation

During the early stages of project development, the Region/District Environmental Engineering Branch, as part of the Project Development Team (PDT), will identify sites or facilities that may be impacted by hazardous materials (including hazardous waste and contamination) for further

© 1994-2025 California Department of Transportation. All rights reserved.

investigation. Note: R/W, as a PDT member, shall provide functional input on hazardous materials parcel issues early in the project development process.

Environmental Engineering thereafter administers hazardous materials site investigations and should furnish resulting parcel reports and estimated costs to R/W by the time the parcel Certificate of Sufficiency with attached Hazardous Materials Disclosure Document-Acquisition (HMDD-A) (ENV-0001A) (internal Caltrans link) is approved and forwarded to Right of Way.

The R/W Appraisal Branch must receive and consider in the appraisal the effect of the parcel hazardous materials site investigation report, unless the HMDD-A indicates that the parcel is considered "free" of hazardous materials, before a resulting parcel appraisal can be approved for acquisition purposes.

Right of Way, as part of the Project Development Team, will assist in the identification and investigation phases whenever possible and will provide the primary source of contact with property owners and operators. As such, Right of Way will:

A. Alert the PDT whenever a new potentially hazardous materials site is discovered.

B. Obtain necessary Permits to Enter for hazardous materials site investigation from property owners and operators, including securing court orders through the Legal Division.

C. Provide normal right of way clearance activities to include cleanup of minor hazardous materials situations which can be handled as part of the clearance contracts.

Early identification of potential hazardous materials is essential. The Region/District Project Development Branch is responsible for developing and maintaining an hazardous materials tracking system database; however, Right of Way should assist in any possible way and ensure that the PDT is aware of any suspected hazardous materials sites.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.12.03 Hazardous Materials in Structures or Stored on the Property

Asbestos containing materials (ACMs) and other hazardous materials in structures must be fully considered to ensure property with such hazardous material is not acquired without adequate prior investigation, valuation analysis, and planning for clearance abatement. Hazardous Materials primarily include asbestos, but can include polychlorinated biphenyls (PCBs), lead based paints, etc.

The identification, investigation, and evaluation of parcels which may contain hazardous materials must be made early to assure project delivery schedules are met. This early identification requires the appraiser to use common sense and knowledge to identify possible hazardous material-containing property. Once identified, inspections will be performed by licensed, qualified persons, usually contractors hired by contracts awarded under the bidding process either by task order or separate contract.

The property owner must give prior written permission before an inspection can be made.

The inspection for asbestos will include a determination of:

A. The type, extent, location, and quantity of ACM within the structure;

B. Condition of the ACM – friable, nonfriable, stable or deteriorating, etc.;

C. Identification of and cost of appropriate remedial action(s):

1. Removal

2. Other acceptable steps (encapsulation, etc.)

3. Cost of restoration.

Every improved property will be inspected except:

A. Residential improvements of one to eight units when:

1. The market approach is the only, or clearly the primary, basis for valuation;

© 1994-2025 California Department of Transportation. All rights reserved.

2. Comparable data shares the general characteristics of the subject; and

3. The existing improvements represent the highest and best use of the property;

B. Improvements constructed entirely after January 1, 1980.

C. Those improvements constructed with materials which can be easily determined to not contain hazardous materials (example: all-metal storage buildings).

7.04.12.04 Hazardous Materials (Including Hazardous Waste and Contamination) Site Identification

The existence of hazardous materials sites, as well as information about analytical test results and, if necessary, cleanup requirements, including a cleanup cost estimate appropriate for fair market value appraisal analysis, should be furnished by the project Hazardous Waste Technical Specialist for all parcel appraisals including replacement utility easements to be acquired by the Department. The appraiser may obtain information to assist the project Hazardous Waste Technical Specialist in identifying possible hazardous material sites that may have been missed. This includes observing potential problems during the inspection of the subject property. It also includes questioning the owner and lessee about current and past possible hazardous materials storage and usage and possible contamination on the site including underground storage tanks. When previously undiscovered tanks do exist, the appraiser must obtain as much information as possible regarding tank size, age, construction, location, contents, etc.

The appraiser must document observations and discussions with the property owner, lessee or other occupants regarding possible hazardous materials concerns in the Parcel Diary. This must be passed on to Project Delivery Team and the Hazardous Waste Technical Specialist. (See 7.04.12.05, "Notification.")

As a general guide for appraisers, some present and prior land uses where hazardous materials concerns may exist are set forth below.

A. Commercial and industrial sites such as service stations, muffler shops, bulk plants, paint manufacturing companies, machine shops, plating works, dry cleaning plants, chemical and fertilizer companies (which

© 1994-2025 California Department of Transportation. All rights reserved.

may use or have used solvents, cleaning compounds, catalysts, cutting oils, plating solutions, dyes, paints, or other chemicals);

B. Junk yards, auto wrecking yards, dumps, or landfills;

C. Underground or aboveground tanks for storage of liquid hydrocarbons, pesticides or other toxic materials;

D. Existing buildings with asbestos siding, roofing, ceiling material, floor tiles, fire-proof doors, or insulation on water pipes, heaters, heating ducts, steel framing, etc.

E. Disposal sumps or pits which may contain agricultural chemicals or industrial wastes;

F. Utility substations or storage/maintenance facilities, and;

G. Sites where contamination may have resulted from an adjacent property owner's operation.

7.04.12.05 Notification

When a suspected hazardous materials site has not previously been identified, R/W is to immediately notify Project Development by memorandum with a copy to the Hazardous Waste Technical Specialist. This memorandum is to give full details as to the appraiser's observations and findings regarding the potential hazardous materials concern. The memorandum will request an evaluation to determine future actions. If the evaluation finds potential hazardous materials and sampling and analytical testing necessary, the Hazardous Waste Technical Specialist will write a task order to direct the consultant to determine the nature and extent of the hazardous materials released. If analytical testing confirms the need for cleanup, the Hazardous Waste Technical Specialist will furnish the Appraisal Branch with a cleanup cost estimate.

© 1994-2025 California Department of Transportation. All rights reserved.

7.04.12.06 Valuation

Regardless whether the right of way requirement is fee or easement title, the real property will be appraised recognizing the effects of hazardous materials released on its market value.

A. HAZARDOUS MATERIALS RELEASE SITE -

The valuation of property that involves an identified hazardous materials release will include: 1) The market value of the property as if free and clear of the hazardous materials released. 2) The market value of the property considering the effects of the hazardous materials released.

The opinion of market value of a property with a hazardous materials release must consider the following:

- Local regulatory agency cleanup requirements.
- Estimated cleanup cost furnished by the Hazardous Waste Technical Specialist.
- Market data involving sales, offers or listings of properties with comparable cleanup requirements.
- Marketability of parcels with known hazardous materials releases cleanup requirements considering opinions of developers, brokers, lenders, insurers, investors or other informed persons.
- Any other pertinent data, opinions, etc.
- Comparable data verification will at a minimum include the following:

    1. Was site investigation or testing done as a condition of sale? What were the results?
    2. Did the transaction price or terms reflect the results and/or cost of correction?
    3. Was an indemnification agreement to protect the buyer from risks associated with the hazardous materials release a part of the deal?

© 1994-2025 California Department of Transportation. All rights reserved.

- If investigation indicates that the property being appraised either originated or caused a hazardous materials release that has or may have also impacted adjacent property, then HQ R/W is to be contacted.

- Adequate comparable data may not be available to directly conclude a fair market opinion of a property with a hazardous materials release. In such cases, the alternate appraisal may consider deducting the estimated cleanup cost from the value of the property as if free and clear of the hazardous materials release. The estimated cleanup cost should reflect what a knowledgeable buyer would reasonably expect to pay in order to utilize the property at its highest and best use. This does not necessarily follow the remedial methods, costs or construction schedule associated with the Department's project. Also, the property's highest and best use could change depending on the nature and extent of the hazardous materials release and alternate remediation options and costs.

- Analysis must consider the cleanup requirements, for highest and best use, of the local regulatory agency having jurisdiction. Full cleanup may not be required or can be delayed for a certain period of time. Thus, the cleanup estimate as furnished by Hazardous Waste Technical Specialist may need to be adjusted or discounted to reflect the market value situation.

Appraisals that result in a negative value (cost of cleanup exceeds market value of cleared property) will be shown as "$0."

The existence or absence of a possible hazardous materials release will be noted on the Appraisal Summary (RW 07-09) in every appraisal by checking "Yes" or "No" after "A possible hazardous materials release (including underground tanks)." Where a possible or confirmed hazardous materials release does exist, a full discussion will be included in the body of the appraisal. This discussion will describe the nature of the problem or suspected problem, regulatory agency cleanup requirements, status of analytical testing or cleanup plans and any other pertinent information, including the impact on market value, if any.

B. IMPROVED PROPERTY – HAZARDOUS MATERIALS IN STRUCTURES -

The Appraisal Branch must obtain and fully evaluate the impact of ACM, or other, before an appraisal report can be approved for acquisition purposes. The Appraisal Branch retains the responsibility for requesting needed inspections on improved properties which were originally

© 1994-2025 California Department of Transportation. All rights reserved.

excluded from inspection. The appraisal report will document if an inspection was not required.

Appraisals of all improved properties to be acquired will reflect market adjustments for the presence of ACMs or other significant hazardous materials in the structure on the property.

Evaluation of improved comparable sales data will, at a minimum, include verification of the following:

1. Was an inspection of the buildings for hazardous materials made as a condition of sale? If "Yes," what were the results of the inspection?

2. Did the transaction price or terms reflect the results and/or the cost of correction or other hazardous materials considerations?

3. Was there an indemnification agreement provided by the seller that affected the property's sale price by protecting the buyer from liability, risk or exposure associated with a known or possible hazardous materials condition?

Valuation will consider the impact of hazardous materials on the property. The market may react to the presence of hazardous materials in an improvement on the subject by adjusting the price/terms of the purchase agreement. Dollar adjustments, if any, may be more, less, or equal to the cost of the remedial action to remove, restore, or otherwise mitigate the problem.

The effect of hazardous materials on value will vary depending on whether the existing improvements are the highest and best use of the land. Cost of remedial action may change the highest and best use. Further, any remodeling, renovation, repair or modernization which requires disturbance of otherwise dormant hazardous materials in order to achieve or maintain highest and best use must be analyzed. Economic life of improvements may be shortened as a result.

The fact that the Department will incur cleanup costs as part of the right of way clearance process does not necessarily indicate that the market value of the property is affected. In appraisals where the estimated demolition cost of an improvement is being deducted from the market value of a property as if vacant and ready for development, the estimated demolition cost should include the removal of any hazardous materials.

© 1994-2025 California Department of Transportation. All rights reserved.

Containerized hazardous materials used in an operation that represents the highest and best use of a property will ordinarily that will be removed by the property owner not affect market value — i.e., paint stored in cans in an auto paint shop. On the other hand, containers of hazardous materials that must be removed to utilize a property to its highest and best use may impact market value — i.e., abandoned drums of paint or toxic chemicals on a vacant site.

Following investigation, the existence or absence of hazardous materials will be noted in the appraisal. Where hazardous materials occur, the appraisal discussion will include a description of the materials, their location and condition, any regulatory controls applicable, the effect on the property's current or future use, present and/or future remediation actions and costs, and the estimated impact on market value.

7.04.13.00 Market Value of Nonprofit, Special Use Properties

The statutory definition of market value for nonprofit, special use properties is defined by Evidence Code Section 824(a) as:

> *"The cost of purchasing land and the reasonable cost of making it suitable for the conduct of the same nonprofit, special use, together with the cost of constructing similar improvements."*

These provisions are applicable only if the property meets all four of the following criteria:

1. The subject property is operated for a special, nonprofit use.
2. The operator must have an exempt status with the State or Federal Income Tax offices.
3. The property is not owned by a public entity.
4. There is no relevant, comparable market data.

"The cost of purchasing land" is considered to be the estimated cost to acquire an area of sufficient size to conduct the special use. It is not necessary to identify any specific property. The cost should usually be estimated on the basis of typical unit or site prices for a land area with sufficient utility to conduct the use. The geographical area analyzed to arrive at the typical price should be suitable to the special nonprofit use.
"The reasonable cost of making it suitable for the conduct of the same nonprofit, special use" should be based on the typical or appropriate factors in the geographical area suitable to the use. There is no requirement to base

© 1994-2025 California Department of Transportation. All rights reserved.

the cost on a specific site, and there is no requirement that the nonprofit entity relocate in order to be compensated under this method.

"*The cost of constructing similar improvements*" shall be based on the value of reproducing the improvements without taking into consideration any depreciation or obsolescence of the improvements per Evidence Code Section 824(b).

The total sum of these three costs is the market value under this method. It is important to note that Federal participation in acquisition costs is limited in these cases to fair market value as commonly measured on the basis of replacement cost new less depreciation. For accounting purposes, appraisal reports shall include the market value of the subject property using a conventional cost approach (considering any applicable depreciation).

The difference between the two valuations will be a nonparticipating, state-only payment.

Properties of this type may not be acquired often but have potential for significant effects on capital and scheduling, and should be discussed with the Headquarters Appraisal Branch before the owner is contacted and the appraisal begun. All nonprofit, special use property appraisal reports are to be approved consistent with current delegations.

© 1994-2025 California Department of Transportation. All rights reserved.

7.05.00.00 – METHODS OF VALUATION

7.05.01.00 Value Approaches

The appraisal of all properties will utilize the three approaches to value as appropriate. If an approach is not used, an explanation will be given for the nonapplicability of the particular approach. Even if not required, separate approaches may be used if helpful.

The final reconciliation of value will be made considering the relative validity and reliability of each approach and will be the best estimate of the value of the entire property. The basis of reconciliation and relative considerations will be explained as necessary. Averaging is not a satisfactory reconciliation procedure. Exhibit 07-EX-04 is a suggested format. The final Estimate of Value should be further segregated for total charges to lessee-owned improvements, partial acquisition, joint acquisitions, etc.

Separate approaches and reconciliations for before and after conditions may be required to measure severance damages.

7.05.02.00 Sales Comparison Approach

The Sales Comparison Approach is required in most appraisals. The only exception to this rule is in certain governmental, public utility, or special-purpose parcels under specified circumstances. Comparable data will be fully utilized for direct comparison of total values, land values, improvement values, for information for other approaches, and for damage and special benefit studies.

Gross Income Multipliers are a unit for comparison of income properties and are indicated when there are sufficient sales of similar properties. It is extremely important to use similar properties when employing this method.

7.05.02.01 Comparable Data

The most reliable comparable data are the sales and listings of properties similar to subject parcels. Comparable data are not to be limited to sales and listings or to use in the Sales Comparison Approach. Valuable information may be gained for all three approaches by studies of similar properties with regard to use and development, well-informed opinions, independent appraisals, depreciated values, after condition land use, remainder parcel and excess parcel sales, options, income-expense

© 1994-2025 California Department of Transportation. All rights reserved.

experience, etc. Each factor or value element in the appraisal which can be supported by comparable data attains greater reliability.

Significant comparable data of all types are expected to be included in the Appraisal Report in support of appraisal conclusions.

Sections 7.02.03.00 O and P contain additional requirements for comparable data collection, confirmation, and reporting.

7.05.02.02 Analysis of Comparable Data

Proper analysis of comparable data in relation to the subject is basic to the Sales Comparison Approach. The following procedures are intended to achieve the optimum quality in the discussion relating comparables to the subject parcel:

A. Comparable-data prices may be compared in terms of whole properties. However, to facilitate comparison, reduction of comparable prices to a common denominator or unit of comparison may be desirable. Examples are price per square foot and price per dwelling unit. Applicable adjustments may be made on either the whole property or unit of comparison basis.

B. The six basic elements of comparable adjustment are:

   1. Property rights conveyed (i.e., conveyance of leasehold interest, etc.)

   2. Financing terms

   3. Conditions of sale (i.e., motivations of the buyer or seller)

   4. Expenditures immediately after purchase (expenditures a buyer will have to make immediately upon purchase, i.e., demolition costs, hazardous waste cleanup)

   5. Market conditions (time)

   6. Physical characteristics (e.g., location, size, shape, topography, access, etc.)

© 1994-2025 California Department of Transportation. All rights reserved.

C. Adjustments to Comparable Data

Both California Department of Transportation (Department) and FHWA appraisal policy recognizes the need to have an appraisal that is well supported and demonstrates a thorough analysis of the elements of comparison necessary to arrive at a factual conclusion in the sales comparison approach. Each appraisal must contain a sufficient description of the comparable sales including the specific elements of comparison made thereto so that it is possible for the reader to understand the conclusions drawn by the appraiser from the comparable sales data. Department and FHWA policy mandates that quantified adjustments shall be the primary method of adjusting comparable data. The quantified adjustments can be expressed as a percentage or dollar amount and represent a market derived adjustment or, absent that, the appraiser's opinion of the comparative weight for the element of comparison to be made.

In very limited circumstances when the appraiser cannot find market derived adjustments and/or cannot form an opinion of the comparative weight for the element of comparison to be made, qualitative adjustments can be used. When the appraiser must resort to qualitative adjustments, they must recognize that this form of comparative analysis will require a more extensive discussion. Merely to state that the comparable is superior or inferior, either overall or for a particular element of comparison, is not suitable. Each element of comparison must be discussed in sufficient detail to allow the reader to clearly understand the appraiser's reasoning for the adjustment and the comparative weight that the appraiser is attributing to that element of comparison. To facilitate clarity and consistency, seven levels of comparison are to be used in qualitative adjustment: similar, slightly inferior, inferior, far inferior, slightly superior, superior, and far superior. The degree of difference may be expressed as one, two, or three pluses or minuses applied to each element in a grid. In addition, the appraiser must state whether the comparable sale is overall superior or inferior to the subject.

© 1994-2025 California Department of Transportation. All rights reserved.

Quantitative and qualitative adjustments are not mutually exclusive methodologies. Because one element of comparison cannot be quantified does not mean that all adjustments to a comparable sale must be qualitative. All factors that can be quantified should be adjusted accordingly. When quantitative and qualitative adjustments are both used in the adjustment process, all quantitative adjustments should be made first.

If no adjustment of any element is needed, a statement explaining the reason(s) shall be included in the appraisal.

In developing a final value estimate by the sales comparison approach, the appraiser shall explain the comparative weight given to each comparable sale, no matter whether quantitative or qualitative adjustments or a combination thereof are used. A comparative adjustment chart or grid is strongly recommended and may assist the appraiser in applying the adjustments consistently and help the reader follow the appraiser's reasoning and analysis.

© 1994-2025 California Department of Transportation. All rights reserved.

D. Sequence of Adjustments

The following sequence for making adjustments is required whenever percentage adjustments are used either solely or in combination with dollar adjustments. The first series of adjustments are sequentially applied with resulting subtotals for each adjustment. After applying the market condition adjustment, all other adjustments for items such as location, physical characteristics, etc., are combined and applied to the market conditions adjusted price to arrive at a final adjusted sales price.

This sequence is depicted in the following example:

Unadjusted sales price		$100,000
Adjustment for property rights conveyed	0%	$0
Adjusted price		$100,000
Financing terms	-$5,000	-$5,000
Adjusted price		$95,000
Conditions of Sale	+10%	+$9,500
Adjusted price		$104,500
Adjustment for expenditure immediately after purchase		+$5,000
Adjusted price		$109,500
Adjustment for market conditions	+10%	+$10,950
Adjusted price		$120,450
Location	+5%	
Size	-10%	
Shape	-5%	
Topography	-5%	
Access	+5%	
Net Adjustment	-10%	**-$12,045**
Final Adjusted Sales Price		**$108,405**

© 1994-2025 California Department of Transportation. All rights reserved.

7.05.03.00 Assessor's Office Data

Under Section 408 of the Revenue and Taxation Code (AB 82-Chapter 1641), County Assessors are required to provide information, abstracts, or access to records to Department staff appraisers "pursuant to their authorization to examine such records."

The code provides that Department will reimburse the Assessors for their actual costs incurred in furnishing data pursuant to the code. These costs and the resulting charges to Department can vary from county to county.

The obtaining of data and arrangements as to fees involved should be handled directly between the Region/District and the Assessor's Office involved.

7.05.04.00 Cost Approach

The Cost Approach is required in the valuation of improved properties where income and market data are nonexistent, limited, or inconclusive. In the valuation of improved properties where there is sufficient comparable data to estimate the value of the property by the market and income approaches, the Cost Approach is optional. However, the Cost Approach may still be appropriate and advisable in these cases for reconciliation with the Income and Sales Comparison Approaches. The Cost Approach is not required for the valuation of minor improvements and improvements that have only interim, salvage, or a negative value.

An analysis and support of depreciation must accompany the Cost Approach. The basis for the "cost new" estimates must be supported by acceptable cost sources. This applies to the valuation of buildings, structures, machinery and equipment and all other improvements pertaining to the realty defined in Code of Civil Procedure Section 1263.205.

Support of the cost new estimates with acceptable cost sources applies to all appraisals using the Cost Approach prepared by either staff or independent appraisers, including separate specialty-type appraisals (e.g., machinery and equipment). The same support for cost estimates also applies to cost-to-cure damages.

© 1994-2025 California Department of Transportation. All rights reserved.

The following are some of the cost-new sources which are acceptable:

- Recent actual construction costs of similar improvements.
- Cost data services (e.g., Marshall & Swift).
- Architects, engineers, contractors, builders and supplier estimates.
- Actual written bids from contractors, engineers, suppliers, etc.
- Manufacturers' catalogs.

When estimates from architects, engineers, contractors, etc., are used as cost sources and the estimated cost new of any improvement is substantial, a secondary cost source must be used as collateral support. If more than one cost source is used and the costs differ, the appraiser must furnish rationale for the final cost estimate.

When a cost-data service such as Marshall & Swift is used as a cost source, the appraiser must show the page, section, and date of each reference, together with support for any adjustments used in estimating the cost new. Cost references must be identified or referenced on an item-by-item basis in the Cost Approach. Exhibit 07-EX-05 is a suggested format for displaying the Cost Approach.

7.05.05.00 Income Approach

The Income Approach is appropriate and usually required for valuation of properties that are bought and sold in the market on the basis of income.

There may be instances where there is sufficient comparable data to very clearly support the value indicated by the Sales Comparison Approach without the need for analysis by other approaches. This would most often occur with smaller residential income properties. Use of the Income Approach in those cases is optional. However, its use may still be appropriate as a check against the other approaches. In most cases involving income property, inclusion of an Income Approach is expected.

The Income Approach is not required for minor partial acquisitions with no severance damages, which have little or no effect on the income stream and where there is no necessity for entire property valuation.

© 1994-2025 California Department of Transportation. All rights reserved.

When the Income Approach is used, documentation to support each element, including income, expenses, and rate(s) must be included in the Appraisal Report. If possible, the same comparable sales used in the Sales Comparison Approach should be analyzed in sufficient detail to reflect these elements. If these sales cannot be utilized, other comparable data must be gathered and analyzed to obtain the necessary information. These data or a detailed summary must be included in the Appraisal Report.

Where economic rent varies from existing or contract rent, the increase or decrease shall be explained and supported by market information.

7.05.05.01 Income Schedule

A schedule of actual and fair income will be included as a supplement. The schedule will show the rental basis including furniture or utilities supplied, and the reasons for adjustment to fair rents. It will also include significant leasehold terms and conditions and may include a Gross Income Multiplier valuation. An example for an income residential property is Exhibit 07-EX-07, which also provides basic relocation assistance information.

7.05.06.00 Review of Owner's Claimed Out-of-Pocket Expenses

The Acquisition Branch must verify any payment to reimburse owners for out-of-pocket expenses claimed to be incurred by the development of property when development is interrupted by State's Acquisition. (See Chapter 8.) This will include appropriate audits, and, if necessary, review by the Regional Legal Office. However, the Acquisition Branch should request the Appraisal Branch to assist in the review of the reasonableness of the expenses claimed by the owner. This review will be to determine whether or not any of these expenses claimed have already been considered and included in the appraisal. This review should eliminate any duplication of payments.

© 1994-2025 California Department of Transportation. All rights reserved.

7.06.00.00 – LAND

7.06.01.00 General

Final appraised land value will assume the land to be vacant and ready for development to its most probable highest and best use. Land value will be established in almost all cases by the Sales Comparison Approach.

It is proper to use zones of value due to differing amenities or utilities of portions of the parcel. Examples of zones of value would be illustrated in differences between level and hillside, commercial and residential, or irrigated and nonirrigated portions of an ownership. Differing land values by zone must be supported by comparable data. When using zones of value, it is important to consider the effect each zone has upon each other and the value of the whole. Without this, merely aggregating the different zones of value is not a complete analysis.

Valuation of timber land, agricultural land, government land, land which is encumbered by a conservation easement, and fee-owned public utility properties may be subject to special treatment as noted in this Section and in Section 7.13.50.00.

The effect of existing private expressway access openings on the development potential of the land should be investigated. The reasonable probability of developing such an opening as a future public street connection to and from the interior of the property is a valid valuation consideration.

Retaining walls and utility services necessary for proper use of the land should be included in land valuation.

Certain specific improvements such as agricultural wells, fencing, etc., may be included with land, as described in 7.07.05.00 and 7.07.06.00.

7.06.02.00 Timber Land

Valuation of commercial timber will be based on in-place value of the uncut timber estimated by timber cruise. The value of the timber and the value of cut-over land will be shown separately but totaled in the land valuation. Care must be exercised that proper market consideration is given to possible recreational or residential use of the timbered area.

© 1994-2025 California Department of Transportation. All rights reserved.

7.06.03.00 Agricultural Land

Adequately developed agricultural properties such as orchards and vineyards frequently sell on acreage values, considering the state of development and productive capacity of the land as improved. As such, the value of trees, vines, irrigation systems, agricultural wells, fencing, etc., may properly be included as part of the land value. The unit value should reflect adjustment to the comparable data for differences in age, condition, and productive capacity as compared to the subject. If valued by this method, agricultural improvements other than trees and vines will be briefly described under "Improvements" with zero value and the remark that their value is included in the "Land." The description of pumps and motors will include model and serial numbers.

Although Code of Civil Procedure Section 1263.250 requires the valuation of and payment for growing crops when possession is taken before harvesting, it is usually not necessary to make such a valuation in reports prepared for negotiations. The owner will generally be afforded the opportunity to harvest the existing crop.

7.06.04.00 Valuation of Williamson Act or Farmland Security Zone Lands and Timberland Production Zone Land

If the land proposed for acquisition, in whole or in part, is under contract with a local agency pursuant to the California Land Conservation Act of 1965, special notification and valuation procedures apply. This Act, which is also known as the Williamson Act, is found in Government Code (GOV) Sections 51200 – 51295 inclusive. Article 6, GOV Sections 51290 – 51295, governs eminent domain procedures for Williamson Act lands. Agricultural properties may also be held subject to Farmland Security Zone contracts, which are similar to but expand upon Williamson Act contracts (GOV Sections 51296 – 51297.4). Generally, the same eminent domain provisions applicable to Williamson Act lands will also apply to Farmland Security Zone properties (GOV Section 51297.1).

The Williamson Act and Farmland Security Zone provisions require special notification under GOV Section 51291(b) to the Director of the California Department of Conservation and the local governing body administering the preserve ***"…whenever it appears that land within an agricultural preserve may be required by a public agency or person for a public use..."*** Usually such notification would take place during the environmental phase of the project,

© 1994-2025 California Department of Transportation. All rights reserved.

with facts and findings in the approved environmental document. The appraiser should confirm with the Environmental Branch that this notification has been performed.

As to valuation for eminent domain acquisitions, the law requires that Williamson Act contracts shall be considered never to have existed for the purpose of valuation in the case of a total acquisition, and disregarded in the valuation of the land actually taken in a partial acquisition. If the remaining land subject to contract will be adversely affected by the acquisition, the value of the damage shall be computed without regard to the contract (GOV Section 51295). As noted above, the same procedures apply for properties under the Farmland Security Zone contracts.

Similar notification and valuation procedures apply for land zoned Timberland Production Zone (TPZ) (GOV Section 51155). Like lands subject to Williamson Act contracts, these specialized zones artificially affect highest and best use, and are to be disregarded in eminent domain appraisals as outlined above. However, the notification is to be sent to the Secretary of Resources and the local governing body (GOV Section 51151[b]). Again, the appraiser should confirm with the Environmental Branch that this notification has been performed. Timberland Production Zones are governed by the "California Timberland Productivity Act of 1982" under GOV Sections 51100 – 51155 inclusive. Article 6, GOV Sections 51150 – 51155 governs eminent domain procedures for TPZs. In valuation, the TPZ shall be deemed never to have existed. Under GOV Section 51155, when any action in eminent domain is filed in court for a full acquisition, the parcel is immediately rezoned as to the land actually being condemned; for the purposes of establishing the value of the land, the TPZ must be treated as though it never existed. When an action to acquire less than all of a parcel of land subject to a TPZ is filed, the parcel is deemed immediately rezoned as to the land actually condemned or acquired and must be disregarded in the valuation process only as to the land actually being taken, unless the remaining land subject to the TPZ will be adversely affected by the condemnation, in which case the value of that damage shall be computed without regard to the TPZ. As a result, the appraiser should contact the County Planning Department to ascertain the zoning of the parcel upon the removal of the TPZ.

Each of these special zones will be disclosed by investigation at the local planning agency as part of the appraisal process.

© 1994-2025 California Department of Transportation. All rights reserved.

7.06.05.00 Valuation of Land Encumbered by Conservation Easement

If the land proposed for acquisition is encumbered by a conservation easement, special procedures apply. These properties are distinguished from Section 7.06.04.00 above in that the properties noted above are owned in fee and have restrictive zoning overlays, whereas the properties covered in this Section are encumbered by conditions in a recorded deed. The term "conservation easement" is defined in Civil Code (CIV) Sections 815-815.5 and refers to a restriction placed by (or on behalf of) the owner upon the use of land for the purpose of retaining land in its natural, scenic, historical, agricultural, forested, or open-space condition. Public entities, qualified tax-exempt, nonprofit organizations, and certain California Native American Tribes [see CIV Section 815.3(c) for specific information regarding qualifying tribal entities] can hold conservation easements, but all conservation easements must be recorded under CIV Section 815.5.

California law recognizes several special types of conservation easements that involve specific approaches to valuation and acquisition (Open-Space, Wildlife, and Agricultural Easements, discussed further in this Section). However, conservation easements are generally acquired and valued by the Department in the manner set forth in Code of Civil Procedure (CCP) Section 1240.055. Under the statute, the Department has authority to acquire conservation easements solely under either CCP Section 1240.510 (compatible public use) or CCP Section 1240.610 (more necessary public use). The following provisions apply:

NOTIFICATION:

When sending the *Notice of Decision to Appraise* to the fee land owner, the appraiser shall also send a letter to the easement holder notifying them of the State's proposed acquisition and including the project description and appraisal map. This notice is mandatory and provides for early communication with the parties involved with the conservation easement acquisition; CCP Section 1240.055(c) states ***"Not later than 105 days prior to the hearing held pursuant to Section 1245.235, or at the time of the offer made to the owner or owners of record pursuant to Section 7267.2 of the Government Code, whichever occurs earlier, the person seeking to acquire property subject to a conservation easement shall give notice to the holder of the conservation easement as provided in this subdivision."*** CCP Section 1240.055(c)(1)(D) requires the easement holder, under certain circumstances set forth in CCP Section 1240.055(c)(2)(B), to take several steps – one of which is to forward the State's notice within 15 days to any

© 1994-2025 California Department of Transportation. All rights reserved.

and all public agencies funding or having direct involvement in the approval or permitting of the original easement.

An example of this notice is included in the Exhibits as 07-EX-17B Notice of Decision to Appraise (Conservation Easement).

The holder of the conservation easement or the public entity receiving notice, or both, may respond with written comments on the acquisition, including identifying any potential conflict between the public use proposed for the property and the purposes and terms of the conservation easement. Written comments on the acquisition may be submitted no later than 45 days from the date the notice was mailed to the easement holder. The statute requires the Department to respond to comments from the easement holder and the notified public entity within 30 days. Any comments received shall be referred to the project environmental coordinator for expert analysis and input. The result of that coordination shall be utilized in preparing responses to comments. It shall also be considered in the appraisal of the impacts of the proposed project on the conservation easement.

VALUATION:

- CCP Section 1240.055(g)(1)(A) provides general parameters for valuing conservation easements: "***The total compensation for the acquisition of all interests in property encumbered by a conservation easement shall not be less than, and shall not exceed, the fair market value of the fee simple interest of the property as if it were not encumbered by the conservation easement."***

- The statute further reads: "***If the acquisition does not damage the conservation easement, the total compensation shall be assessed by determining the value of all interests in the property as encumbered by the conservation easement."*** (CCP Section 1240.055[g][1][B], emphasis added). A "before and after" analysis will be the primary means of valuing the rights acquired from the interest(s).

- The final valuation guidance in the statute (CCP Section 1240.055[g][1][C], emphasis added) reads that ***"If the acquisition damages the conservation easement in whole or in part, compensation shall be determined consistent with Section 1260.220 and the value of the fee simple interest of the property shall be assessed as if it were not encumbered by the conservation easement."*** That section (CCP Section 1260.220) provides that each property interest and the damage to the remainder of each interest shall be

© 1994-2025 California Department of Transportation. All rights reserved.

separately "assessed," but allows the condemning agency to present an undivided offer at its discretion.

While the appraisal shall present separate valuations of just compensation due to the fee and easement holder, it is the Department's usual policy to follow CCP Section 1260.220(b) that allows an undivided offer.

The acquisition may damage the conservation easement by reducing the environmental and/or ecological goals and values for which the easement was acquired. The appraiser shall consider damages to the remainder of the conservation easement. Damages to the remainder of the conservation easement may occur due to reduction in the critical size of the protected area (i.e., size of the remainder limits ability to serve intent of easement), fragmentation thereof, or related issues. These are technical questions that require communication with our Division of Environmental Analysis and input from the affected stakeholders through the notification and communication process outlined above.

The following concepts are consistent with appraisals in general: there may be the "value of the part acquired" and/or "damages to the remainder" from the encumbered fee area, in addition to "the value of the part acquired" and/or "damages to the remainder" from the unencumbered fee area (that is, free of the conservation easement). The appraiser must be careful not to duplicate compensation to the fee and easement areas.

The general case is that most road or highway acquisitions involve fee or highway easements that may potentially impair the value of the conservation easement as public improvements typically physically impair the natural resource values for which the conservation easement was acquired in the first place. In such cases, the Department will typically invoke the authority of CCP Section 1240.610 to acquire the property. The measure of compensation is based on the rights that the express deed language grants to the Department, and upon the assumption that the Department's exercise of its granted rights are "more necessary" and will displace the conservation use(s) of the property. Anecdotal or unrecorded assurances of about lesser impacts, regardless of the source(s) of the assurances, should be disregarded.

However, instances may arise where the acquisition will not impair the conservation easement. This occurs where the Department's authority to acquire is based on CCP Section 1240.510, in that the use to be put to the land is "compatible" with the conservation easement purposes, and the easement deed language has been specifically modified to perpetuate and protect the environmental values for which the conservation easement was created. In such cases, the acquisition would result in no impairment to the

© 1994-2025 California Department of Transportation. All rights reserved.

conservation easement. As previously described, the property should then be valued as though encumbered by the conservation easement.

In order for the appraiser to incorporate these compatibility findings into the appraisal, specific documentation must be provided from the certified project environmental document. In addition, communication with the project's Environmental Coordinator, the easement holder, and impacted public agencies should be undertaken to reach a mutual concurrence on the compatibility finding. Any modifications to the acquisition easement deed to ensure compatibility would necessarily be drafted and/or approved by the Legal Division in conjunction with the discussions with the stakeholders. The appraiser should fully discuss the findings in the appraisal and attach a copy of the easement deed with the modified language.

Regardless of possible damage(s) to the remainder of the easement, the valuation analysis of all reports should include the unencumbered fee value of the acquisition. The Appraisal Summary (RW 07-09) will show the just compensation to the fee interest and just compensation to the conservation easement interest.

If the recorded conservation easement, recorded deed, or other document encumbering the acquisition parcel includes a "condemnation clause" which specifies a different procedure from the statutes by which just compensation will be segregated between the underlying fee owner, the conservation easement holder, and/or funding entities, then the recorded easement language shall be cited and attached in the appraisal and acquisition. The appraiser still performs the analysis between the conservation easement and the fee interest as above.

The appraiser should find conservation easements of all types disclosed in the exceptions to the preliminary title report as they are required to be recorded by law. In addition, the appraiser should also consult the certified environmental document, the approved project report, and/or the project environmental coordinator for guidance and consistency regarding how the project Department plans to address any acquisitions of conservation easements.

Identification and evaluation of conservation easements frequently involve complex legal issues in the areas of real property and State and Federal environmental law. In the event that legal assistance is needed in assessing the Department's and grantors' rights and/or duties with respect to conservation easements, the Legal Division should be contacted.

© 1994-2025 California Department of Transportation. All rights reserved.

7.06.05.01 Open-Space Easements

Open-Space Easements (easements established to preserve the natural character of open-space land for the benefit of public use and enjoyment) should be treated in the appraisal as other conservation easements (in accordance with CCP Section 1240.055), with one exception. If the open-space easement was gifted or donated, the easement shall terminate at the time of condemnation complaint filing; the owner is compensated as if the easement did not exist (GOV Sections 51063 and 51095).

7.06.05.02 Wildlife Conservation Easements

Wildlife Conservation Easements (easements held by state agencies at least 10 years in duration primarily to benefit wildlife) will be acquired in accordance with Fish and Game Code (FGC) Section 1348.3. The eminent domain law regarding conservation easements (found in CCP Sections 1240.055(g)(1)(A)-(C) as referenced in the previous section) does not apply in its entirety to wildlife conservation easements acquired by a state agency, as stated in CCP Section 1240.055(h). The following principles are specified in FGC Section 1348.3, which is part of the "Wildlife Conservation Law of 1947" under FGC Sections 1300-1375.

Under FGC Section 1348.3(b), prior to the initiation of condemnation proceedings against a state agency-held wildlife conservation easement, the condemning entity shall give notice to the holder of the easement, provide an opportunity for the holder of the easement to consult with the condemning agency, provide the holder of the easement the opportunity to state its objections to the condemnation, and provide a response to the objections. CCP Section 1240.510 (authority to acquire for a compatible public use) and CCP Section 1240.610 (authority to acquire for a more necessary use) apply to wildlife conservation easement acquisitions. The condemning governmental entity is required to prove by clear and convincing evidence that its proposed use satisfies the requirements of those statutes. At the appraisal stage, the FGC Section 1348.3(b) notice of the proposed acquisition shall be given to the holder of the wildlife conservation easement. Exhibit 07-EX-17B may be used for this purpose. Upon receiving the response to the notification, the appraiser shall forward the response to the project environmental coordinator, the project manager, and the Acquisition Senior. The Department is required to provide a response to any objections to the acquisition.

© 1994-2025 California Department of Transportation. All rights reserved.

The statute does not explicitly identify a valuation methodology, nor does it preclude one; therefore, the following valuation approach is recommended, consistent with similar special conservation easement valuations. In valuing the acquisition, the owner of the land in fee shall be paid the full value that would have been payable to the owner but for the existence of the wildlife conservation easement less the fair market value of the easement, and the easement holder shall be paid the value of the wildlife conservation easement. The appraisal shall take into account any reasonable impacts disclosed by the comment process as outlined above.

7.06.05.03 Agricultural Conservation Easements

Agricultural Conservation Easements are interests in land, less than fee simple, which represent the right to prevent the development or improvement of the land, as specified in Civil Code Section 815.1, for any purpose other than agricultural production. Such easements are granted for the California Farmland Conservancy Program by the owner of a fee interest to a local government, nonprofit organization, resource conservation district, or to a regional park or open-space district/authority that has the conservation of farmland among its stated purposes as provided by statute, or as expressed in the entity's locally adopted policies. Agricultural conservation easements are granted in perpetuity as the equivalent of covenants running with the land (Public Resources Code Section 10211).

Agricultural conservation easements will be appraised in accordance with Public Resources Code (PRC) Section 10261. According to PRC Section 10261(a)(1), ***"The owner of the land in fee shall be paid the full value that would have been payable to the owner but for the existence of the easement less the fair market value of the easement, as determined by an independent appraisal, at the time of condemnation."*** Furthermore, PRC Section 10261(a)(2) states ***"The [California Farmland Conservancy] program, and any other contributing parties if so provided in the easement, shall be paid the value of the easement at the time of condemnation."*** In valuing the acquisition, the owner of the land in fee shall be paid the full value that would have been payable to the owner but for the existence of the agricultural conservation easement less the fair market value of the easement, and the easement holder shall be paid the value of the agricultural conservation easement.

© 1994-2025 California Department of Transportation. All rights reserved.

However, CCP Section 1240.055 subdivisions (a) through (f), which govern scope, notification, resolutions of necessity and court proceedings, still apply. It is only the valuation subsection, CCP Sections 1240.055(g)(1)-(2), that does not apply to agricultural conservation easements acquired under PRC Section 10261.

7.06.05.04 Replacement Conservation Easements

In some cases where the Department is acquiring a property encumbered by a conservation easement, it may propose replacement of the conservation easement. This may occur by replacement with a substitute property or easement elsewhere, or by acquiring a replacement conservation easement area from the existing fee owner (this applies where there is a remainder that is not encumbered by an existing conservation easement). Usually, this type of an arrangement will be developed through the environmental phase of the project and documented in the approved environmental document, license, certification, or permit. In addition, there will be cases where the certified environmental document will require a replacement easement area that exceeds the existing easement area by a ratio that is higher than 1:1. The appraiser will appraise the project requirement and any replacement property as per normal procedures and cite the approved environmental document, license, certification, or permit's specific provisions for the treatment of conservation easement and the replacement conservation easement.

7.06.05.05 Comparison of Statutes Regarding Valuation of Conservation Easements

The following table shows the relationship between the statutes regarding the valuation of existing conservation easements.

© 1994-2025 California Department of Transportation. All rights reserved.

Comparison of Statutes Regarding Valuation of Conservation Easements

Easement Type	Scope of Law (Application)	Measure of Compensation
Conservation Easements	• Applies to recorded conservation easements (CIV Section 815.5), whether local, special district, state, federal, or tribal, (CCP Section 1240.055[a]) or held by a tax-exempt nonprofit entity whose primary purpose is conservation, etc. (CIV Section 815.3). • Does not apply to wildlife conservation easements if they were acquired by a State agency. (CCP Section 1240.055[h]). • Per CCP Section 1240.055(g)(2), the valuation methodology (CCP Section 1240.055[g][1]) does not apply to Agricultural Conservation Easements acquired under PRC Section 10261. **CIV Section 815, CCP Sections 1240.55 and 1260.220**	• Allocation between encumbered fee and easement areas as provided in CCP Section 1240.055(g)(1): ➢ If the acquisition does not damage the easement, compensation is assessed as encumbered. ➢ If the acquisition does damage the easement, compensation is assessed as not encumbered. ➢ The total compensation of all interests shall not be less than, and shall not exceed, the fair market value of the fee simple interest as if it were not encumbered by the easement.
Open-Space Easements	• These apply only to open-space easements acquired by or on behalf of a city or county. **GOV Sections 51063 and 51095**	• Similar to the methodology for conservation easements above, with one exception: ➢ If the open space easement was gifted, then the compensation shall be calculated as if the easement does not exist.

© 1994-2025 California Department of Transportation. All rights reserved.

Easement Type	Scope of Law (Application)	Measure of Compensation
Wildlife Conservation Easements	• Applies only to state-agency acquired wildlife conservation easements (FGC Section 1348.3[a][3]) as defined in CIV Section 815.1 and recorded in CIV Section 815.5. **FGC Sections 1300-1375**	• Not specified in FGC Section 1348.3 or related statutes. FGC Section 1348.2 provides that the (original) acquisition price "…shall not exceed the fair market value of the property." Suggested methodology consistent with similar special conservation easement valuations: ➢ The land fee owner is compensated for the fair market value as encumbered. ➢ The easement-holder is compensated for the value of the easement.
Agricultural Conservation Easements	• Applies to agricultural conservation easements acquired through the "California Farmland Conservancy Program" (PRC Section 10211), administered by the Department of Conservation and held by an entity defined in PRC Section 10212, "city, county, nonprofit organization, resource conservation district, or a regional park or open space authority…" **PRC Sections 10211-10212 and 10261**	• Allocation between the encumbered fee and the conservation easement as specified in PRC Section 10261(a): ➢ The land fee owner is compensated for the fair market value as encumbered. ➢ The easement-holder is compensated for the value of the easement.

7.06.06.00 Outdoor Advertising Sites

Where a property is improved with an existing outdoor advertising sign and the comparable sales are not so improved, it will be necessary to analyze the additional contributory value of the outdoor advertising site. Any additional value may take the form of, and require the consideration of, either an interim use, an ancillary use, or a highest and best use.

Interim use value is defined as that increment in value which a short-range use, usually not exceeding five years, other than the highest and best use of the property, would contribute to the total value of the property.

Ancillary use value is defined as an additional source of income other than from highest and best use of the property which may or may not influence the economic rent of the dominant use.

Highest and best use is used in the regular appraisal context.

Complete Exhibit 07-EX-10. The value on Line 28 will be carried forward to the Land Valuation portion of the Appraisal Page under the heading of "Contributory Value of Outdoor Advertising Sign Site(s)."

The appraisal will contain sufficient explanation to document adjustments, conclusions, and assumptions, including "Comparable Sign Board Site Rental Adjustment Chart" (Exhibit 07-EX-10 pg. 3).

The valuation process described here is usually not used to value sites of outdoor advertising signs removed as a part of the Highway Beautification Billboard Removal Program. A formula method is used by the Region/District Right of Way Billboard Coordinators for that program's site valuations.

7.07.00.00 – IMPROVEMENTS

7.07.01.00 General

Improvements will be appraised at the value they add to the land, assuming the land to be vacant and ready for development to its most probable highest and best use. As such, improvements will be appraised at their depreciated value in place, considering the effect of depreciation from all causes.

Appraisal of improvements at the value they add to the land, if vacant, does not assume that existing improvements are necessarily an improper development of the land. Appraisal by this method will reflect the amount the well-informed buyer would pay for the total property, considering the estimated remaining useful and economic life of the improvements and probable use of the land, if the improvements are removed.

(See the following Right of Way Manual [RW Manual] Sections 7.07.04.00, 7.07.05.00, and 7.07.06.00 regarding classification of fences, water sources and agricultural improvements, and Exhibit 07-EX-09 regarding improvements.)

7.07.02.00 Single Family Residence and Two to Four Unit Multi-Residence – Form Appraisal

The Uniform Residential Appraisal Report form (URAR) may be used for appraising total acquisitions of either improved single family residential or 2 to 4-unit multi-residential properties. The acquisition may include excess property providing an appropriate allocation of land and improvement values between excess and right of way is made as set forth in R/W Manual Section 7.03.04.00.

The URAR form appraisal may be used only if the land's highest and best use is single family residence and the property is improved with one single family residence or, the land's highest and best use is a 2 to 4-unit multi-residence and the property is improved with one 2 to 4-unit multi-residence. This includes properties improved with mobile homes as realty. See R/W Manual Section 7.12.00.00.

© 1994-2025 California Department of Transportation. All rights reserved.

When using the form appraisal, a Parcel Appraisal Page, Form RW 07-09, must still be included in the appraisal report for each parcel appraised, together with any other forms listed in R/W Manual Section 7.02.03.00 that are pertinent to the appraisal.

When appraising a total acquisition of either a single-family residence or a 2 to 4-unit multi-residence, with no excess land to be acquired, an allocation between land and improvement values is not required.

When using the URAR form, the total price shown on the Comparable Data Page (Form RW 07-11) does not need to be allocated between land and improvements. However, a detailed description of the improvements located on the comparable must be shown on the Comparable Data Page.

The URAR forms may be purchased from various business form companies. The smaller region/districts not needing as many of the forms may consider obtaining them from a larger region/district having a greater need for the forms.

There are several books available providing instructions for using the URAR forms for appraising single family residences and 2 to 4-unit multi-residences. Information on the availability of these books can be obtained from HQ R/W Appraisal Branch. The URAR form appraisals may also be completed by use of a computer. There are various companies that sell computer software packages for the URAR form.

7.07.03.00 Miscellaneous Improvements and Landscaping

Normal and adequate landscaping and miscellaneous yard improvements (including residential Private Fencing, driveways, and walks) may be briefly listed and valued at their lump-sum contribution to the total value of the property. Normal and adequate porches, stairways, and breezeways need not be separately evaluated if they are considered in the basic building value. Private retaining walls are included in the land value.

Minor curative work, such as the relocation of very minor improvements, can be proposed in an appraisal without including a separate value for purchase. Mailboxes, gate posts, Private Fence end posts, yard lights, capping landscaping irrigation lines, and small signs are examples.

© 1994-2025 California Department of Transportation. All rights reserved.

7.07.04.00 Agricultural Improvements

Agricultural buildings and farm residences will be valued as Improvements at depreciated value in place.

If agricultural use represents only an interim use, particular care should be taken to consider only the value the improvements add to the land. If conversion of the land to a higher use is anticipated in the near future, agricultural improvements might better be valued under the "Improvement" headings at interim, salvage, or demolition values rather than included with the land. (See R/W Manual Sections 7.07.07.00 and 7.07.08.00.)

7.07.05.00 Valuation of Fences

Fences are defined and described in the Highway Design Manual, Chapter 700, Miscellaneous Standards, Topic 701 – Fences; and the Maintenance Manual, Chapter C5, Section 2 - Fences. For purposes of this chapter, fences are divided into two (2) categories: 1) Departmental Fences, and 2) Private Fences.

Departmental Fences are State owned and act as physical barriers to ensure integrity of access lines or right of way lines. All Departmental Fences are placed on State property either on the access lines or immediately adjacent to the right of way line and are maintained by the State. Departmental Fences are not valued as part of the requirement. Cost to install, replace or relocate Departmental Fences will be included in construction costs.

Private Fences are located outside the State's right of way. Private Fences are owned by the adjacent property owners and only serve the property owners' needs. The property owners maintain Private Fences. Private Fences are valued as follows:

A. Private Fencing Included in Land Value

Private Fences on agricultural, grazing, timber, desert, or undeveloped subdivision land, or Private Fence of marginal utility, should be included in the land value unless the comparable data indicates the contrary. Private Fence included in the land value will be briefly described as to type and condition under "Improvements" with a zero value and the remark that the value is included with the land. Specialized Private Fence may still be valued under "Improvements" at the contributory value it adds to the total property.

© 1994-2025 California Department of Transportation. All rights reserved.

B. Private Fencing Appraised as an Improvement

Any Private Fence within the requirement not included in land value will be valued as an improvement for the contributory value to the land. The method is to value the improvements at the depreciated value in place. Care should be exercised that double payment is not made for Private Fence owned by two property owners.

C. Damages to the Remainder for Private Fencing

After total Damages are assessed, the State may pay to mitigate those Damages by replacing, adding to, or internally rearranging Private Fences for permanent or temporary construction. The appraiser must be careful not to double pay for Damages. The amount paid as a Damage cannot be more than the difference between 100% cost of a new replacement Private Fence and the amount paid as the improvement (the depreciated value in place). (See Damages Section 7.09.00.00.) Damages may also be mitigated by reinforcing grantor's remaining Private Fence. Private Fences can be replaced or rearranged by construction contract work to mitigate Damages.

7.07.06.00 Valuation of Water Sources

Agricultural water sources and pumping and distribution systems will usually be included in the land value, as adjusted, to reflect the productivity of the water supply. The improvements being acquired, such as the pump, are to be fully described as to type, distribution and condition under the "Improvement" heading. Water sources included in the land value will be valued at zero with the remark that the value is included with the land.

Water sources which are replaced or relocated will be valued at zero. If an agricultural water source or system is to be relocated or replaced, the cost of such work will be shown under "Damage" or "Construction Contract Work," and must be justified as mitigating greater severance damages to remainder (see also Damages Section 7.09.00.00).

Nonagricultural water sources will be appraised as an improvement. If water-system equipment is proposed for relocation, the water source will be valued at the relocation cost estimate under "Improvement" subheading of "Relocation in Lieu of Purchase." This relocation cost estimate will include necessary expenses to reestablish a source of equivalent quality and quantity, including well drilling and test holes, if required.

© 1994-2025 California Department of Transportation. All rights reserved.

Increased size, capacity, power, etc., necessary due to relocation of a water source must be justified as mitigating greater severance damage to the remainder. Where physical relocation of the water source equipment is not feasible, the equipment will be valued at depreciated value in place under "Improvements." Additional expenses which become necessary to avoid greater severance damage due to loss of the water source must be shown under "Damages."

If relocation or replacement of a water system is proposed to be performed by a State contractor, the water source and equipment will be described under the "Improvement" heading and valued at zero value. The entire relocation or replacement cost will then be shown under "Construction Contract Work."

7.07.07.00 Improvements – Little or No Value

Occasionally, improvements add little or no economic value, or may even decrease the value of land suitable for a higher and better use. In these cases, the improvements will be described for Acquisition and Property Management purposes and valued at the amount they contribute to the market value of the property. This would be a positive amount if the improvements have a salvage value; such an amount should be identified as "salvage value." This would be a negative amount if the improvements have no salvage value and a cost would be incurred for their removal. This amount should be identified as "clearance" or "demolition" cost.

7.07.08.00 Improvements – Interim Value

Occasionally, improvements may have value due to a brief period of productive income until conversion of the land to a higher and better use. Such value should be identified and supported as interim value. Estimated short term net income, giving consideration to proper risk and expenses, may be an appropriate valuation method.

© 1994-2025 California Department of Transportation. All rights reserved.

7.07.09.00 Improvements – Purchase or Curative Work?

It may be more economical to relocate, rearrange, or alter improvements such as garages, other auxiliary buildings, storage sheds, on-premise signs, etc. For these cases, the primary appraisal must value the improvement for purchase. The curative work should be included as an alternate appraisal.

Where substantial savings may result if the grantor or the State relocates, rearranges, and/or severs and reconstructs improvements that would otherwise be purchased or damaged, only the curative approach need be included in the appraisal. An alternate providing for purchase may be included at the request of the Acquisition Branch. The alternate appraisal will be processed in accordance with Section 7.03.03.00.

Relocation curative work is normally considered economically feasible if the cost (including utility relocations and other damages) does not exceed the depreciated value of the improvements, less salvage value at State sale. This information will be included in the appraisal to support the feasibility of proposed relocation work.

7.07.10.00 Improvement Relocations or Replacements Exceeding Depreciated Value Less Salvage

Occasionally, improvements within the right of way (including excess) may be valued at their relocation or replacement costs rather than at their depreciated value in place to avoid greater severance damages to the remainder. The improvement will be described and valued at the relocation or replacement cost. If the relocation or replacement cost is greater than the depreciated value in place, less salvage, the additional cost must be justified as mitigating greater severance damage to the remainder. This additional cost will be shown under "Damage."

The only exceptions to these rules are relocation or replacement of improvements valued as part of the land or proposed for replacement in kind or utility by a State contractor. In these cases, the total relocation or replacement cost will be shown as a Damage or Construction Contract Work and must be totally justified as mitigation of greater severance damages.

© 1994-2025 California Department of Transportation. All rights reserved.

7.07.11.00 Relocation, Rearrangement, or Reconstruction Estimates

This work on minor improvements, such as mailboxes, sheds, Private Fencing, gates, cutting and capping utility lines, etc., may be briefly described and valued at lump sum amounts directly on the Appraisal Page. On major improvements, it must be supported by a work estimate included in the appraisal. The estimate may be made by the Appraisal staff based on the Region/District's cost experience and interviews with house movers, contractors, and the Region/District's Project Development, Property Management, and/or Utility Clearance Units.

The estimate will:

A. Include all necessary expenses involved in the proposed work, including storage, security, overhead, and supervision; but will exclude, or take credit for avoidable betterments.

B. Contain the source of the cost data. If the estimate involves highway construction contract work, it will be made or verified by the Project Development Unit. Certain estimates should be made or verified by the Region/District Property Management or Utility Clearance Units.

C. Show the estimated depreciated value in place and salvage value of building improvements proposed for relocation.

D. Show the Region/District's recommendation whether final bids are required prior to settlement.

Estimates involving relocation of improvements from within the right of way (including excess) will be shown under "Improvements" with the subheading "Relocation in Lieu of Purchase." The only exception to this rule is the relocation, from within the right of way (or excess), of improvements valued with the land or proposed for relocation by a State contractor. In these cases, the improvement will be listed under the "Relocation" subheading with a zero value. The relocation estimate amount will be shown under "Damage" or "Construction Contract Work."

All other rearrangement, replacement, and severance and reconstruction work will be considered as a Damage or as Construction Contract Work.

© 1994-2025 California Department of Transportation. All rights reserved.

Severance and reconstruction of improvements straddling the right of way line may involve payment for the portion of the improvement required as well as payment for the curative work.

7.07.12.00 Building Check Sheets

Exhibit 07-EX-08 is for use in assembling the basic information required to describe residential improvements in a uniform, systematic manner with a limited amount of actual writing. The grid on the back is to record improvement measurements and is for field use. This exhibit without the grid will be inserted in the Report. If the URAR form is used, Exhibit 07-EX-08 is not necessary.

Types of improvements not listed on the exhibit will be described in detail in the appraisal. This description will include the use, age, construction, condition, specialized features, if any, and any other factors which may be important in valuing the improvement.

7.07.13.00 Service Station, Commercial and Industrial Buildings

When appraising these, Exhibit 07-EX-09 should be used to assemble the basic data.

The exhibit, without the grid, will be included in the Report.

7.07.14.00 Tenant or Lessee-Owned Improvements (Excluding Personal Property)

The appraisal will contain a specific list of tenant or lessee-owned improvements (realty) which include buildings, structures, other improvements and improvements pertaining to the realty. The appraiser will separately show the value of the improvements on the Appraisal Page according to their ownership, such as:

Lessor Owned (List improvements)	$100,000
Tenant or Lessee Owned (List improvements)	$25,000
Total Value of Improvements	$125,000

© 1994-2025 California Department of Transportation. All rights reserved.

Tenant or lessee-owned improvements will be appraised at the amount they contribute to the fair-market value of the real property to be acquired or their fair-market value for removal from the real property, whichever is greater (49 CFR §24.105[c]).

Fair-market value for removal means "salvage value." It is the probable sales price of an item, if offered for sale on the condition that it will be removed from the property at the buyer's expense, allowing a reasonable period of time to find a person buying with knowledge of uses and purposes for which it is adaptable and capable of being used, including separate use of serviceable components and scrap when there is no reasonable prospect of sale except on that basis.

The Appraisal Report will show both the contributory and salvage value of such improvements. The greater value will be carried forward to the Appraisal and Summary Pages.

If the salvage value is greater than the contributory value, the existing improvements may not constitute the highest and best use of the property. Where the tenant-owned real property improvements do not contribute any value to the property, the tenant is still entitled to any salvage value of such improvements.

In some situations, it is possible for both the contributory value and the salvage value of lessee-owned improvements to equal zero. In these cases, the improvements should be shown at "nominal" in the Report.

Structural improvements are normally classified as real property and not personal property. If there is any doubt whether a tenant or lessee-owned improvement is part of the real estate or personal property, the Division should be consulted and/or a legal opinion obtained.

In some cases, there may be controversy between lessors and lessees regarding ownership of the improvements (real property). Then, the appraiser will make a statement in the Report regarding the controversy of ownership to alert the Acquisition and RAP Branches of the problem.

The appraiser should separately show three categories, such as:

Lessor Owned (List improvements)	$100,000
Lessee Owned (List improvements)	$15,000
Ownership Claimed by Both Lessor and Lessee	$10,000
Total Value of Improvements	$125,000

© 1994-2025 California Department of Transportation. All rights reserved.

7.07.15.00 Retention Value

A separate retention value may be included in a Report when the owner wants to retain the structural improvements. This is in addition to either the full or part-take appraisal that proposes the purchase of the improvements, as applicable, and any "Relocation in Lieu of Purchase" alternate that may be appropriate. Retention value in this instance is the same as salvage value. It should normally be established through a comparative analysis of improvements sold at public sale.

It is not intended to allow "piecemeal" retention of portions of structural improvements which, if removed, would leave the structure in an unrentable condition. Also, this concept does not apply to improvements pertaining to the realty, such as machinery and equipment, as defined in the California Eminent Domain Law (Section 1263.205 of the Code of Civil Procedure). These items are available to owners by other means.

Owner retention of improvements for salvage value is at the Department's option and is not a right of the owner. Accordingly, it should not be proposed in situations that have the potential of producing an indefensible windfall to the owner.

Retention value estimates will be provided on written request from the Acquisition Branch if they were not a part of the original appraisal. These requests will be processed like any other revised page(s) to the original appraisal.

The above instructions do not apply to those miscellaneous minor improvement items which grantors often wish to retain, e.g., drapes, antennas, etc. If a separate valuation of such items is requested, they will be listed with their contributory values.

7.07.16.00 Removal of Improvements Straddling the State's Right of Way Line

When buildings or improvements are discovered to be straddling the State's right of way line, a TCE is required to allow the Department to enter private property in order to modify/remove the buildings/improvements. The TCE should be designed, mapped and included in the appraisal report. Care must be taken to avoid potential duplication of payment for any damages to the remainder of the property and the acquisition cost of the TCE. If a damage payment fully compensates the grantor for the loss in use

© 1994-2025 California Department of Transportation. All rights reserved.

during the modification or removal of the private building or improvement, the TCE may have nominal value.

Please refer to 07-EX-20, "TCEs – Improvements Straddling the Right of Way Line Memorandum."

© 1994-2025 California Department of Transportation. All rights reserved.

7.08.00.00 – IMPROVEMENTS PERTAINING TO THE REALTY

7.08.01.00 General

Trade fixtures, equipment, machinery, and other items installed for use on a property will only be appraised if they are "improvements pertaining to the realty" as defined in CCP Section 1263.205. These improvements include items that "...cannot be removed without a substantial economic loss or without substantial damage to the property on which it is installed, regardless of the method of installation." The appraiser must compare the value in place against the value if removed and sold.

This decision is a matter of economics. It must be fully documented so the decision can be supported without question. This requires a comparison of the items' depreciated value in place and its salvage value to establish that it cannot be removed "without substantial economic loss." The nature and extent of the damage must be explained.

Whenever a separate valuation of machinery and equipment or other specialty items is required by the Appraisal Branch, it shall be prepared by a qualified individual, either staff or independent. Separate specialty reports shall be prepared in accordance with current and appropriate standards and will contain cost sources for each item as shown in Section 7.05.04.00, "Cost Approach."

Independent specialty reports shall be reviewed by a specialist in those Regions/Districts staffed with building cost estimators before distribution to the real estate appraisers. In those Regions/Districts without cost estimators, a Senior assigned to the Appraisal Branch shall review independent specialty appraisals. The specialty reports shall be reviewed to the same degree as is now done on regular realty appraisals before being utilized in establishing the market value of the total property required.

When a separate valuation of trade fixtures, equipment, machinery, and/or other items pertaining to the realty is required, the value of such items shall not be arbitrarily added to the valuation of other realty. It shall be considered to the extent of their contributory value in establishing the value of the whole property. If the specialty appraisal is used to establish the value of the whole, a narrative discussion of the adjustments or lack of adjustments from the values in the specialty report will be included in the appraisal. The appraiser

© 1994-2025 California Department of Transportation. All rights reserved.

may consider the specialist's factual data, information, and opinions, but the final conclusions of value remain the appraiser's responsibility.

7.08.02.00 Appraisal Page Format

Trade fixtures, equipment, machinery, and other items determined to pertain to the realty will be listed on a separate page in the parcel appraisal with the following information:

- Item identification, including make, model, and serial number.
- Age (approximate age is sufficient where actual age is not known or is not appropriate due to extensive remodeling).
- Estimated new and remaining service life.
- General condition.
- Replacement cost new in place with cost sources.
- Depreciated value in place.
- Salvage value in place.
- Relocation expense estimate.
- Cost sources of each item and basis of relocation estimate.
- Photographs of major items.
- Comment on which items may be easily moved or utilized in circumstances other than the existing use.

Lessee-owned items will be separately shown. The items' value, relocation estimates, and salvage value totals will be appropriately proportioned between lessee and lessor.

The contributory value in place of trade fixtures, equipment, machinery, and improvements pertaining to the realty will be carried forward to the Appraisal Page (Form RW 07-09) and entered under the appropriate subheading under "Improvements." In partial acquisitions and alternate appraisals where grantor requests relocation in lieu of purchase and on minor improvements, the relocation estimate amount may be used in lieu of the contributory value in place.

7.08.03.00 Replacement Cost

Replacement cost new of equivalent machinery should be shown at catalog price plus freight, tax, cartage, and installation costs to yield cost new in place. Freight, tax, cartage, and installation costs should consider installation of the entire operation at one time and not as separately installed items. However, costs should be distributed to individual items when practical. Care

© 1994-2025 California Department of Transportation. All rights reserved.

should be exercised that specialized plumbing, electrical and structural work is not included in both the building appraisal and the installation charges.

7.08.04.00 Depreciated Value

Depreciated value in place is to reflect depreciation due to all causes as related to each item and to the total operation. This should include physical deterioration, functional obsolescence, and any economic obsolescence. A dollar or percentage breakdown of each type is not necessarily required. The appraiser should state whether the item contains functional obsolescence and provide a reasonable explanation of the depreciation basis.

While depreciation may be attributed to the entire operation, distribution of an estimate of depreciation to each item is desirable, when practical.

7.08.05.00 Salvage Value

Salvage value is the price the State would obtain for the equipment in place at auction with the buyer removing the equipment in a relatively short time.

7.08.06.00 Improvements Not Pertaining to Realty Under Section 1263.205

Appraisals of furnished or partly furnished rental homes, duplexes, motels, hotels, or apartment houses need to include an inventory of the improvements not pertaining to the realty under CCP Section 1263.205. It should show the total estimated in-place market value. The State may have to purchase these items to prevent eviction of tenants who will be unable to continue their occupancy of the premises if such items are retained and removed by the owner. Items which would not cause the tenants to move from the premises if not purchased by the State are not to be included. The total value of such improvements not pertaining to the realty is not to be carried forward to the Appraisal Page nor included in the "Market Value of Required Property." This is in contrast to improvements which do pertain to the realty which shall be carried forward and included in the market value.

Purchase of furniture from vacated homes or homes which are not the permanent residence of the occupants would only be done when the property is purchased long enough in advance of right of way clearance that the State can amortize the cost of the furniture from increased rentals during the time the property will be available for rent.

© 1994-2025 California Department of Transportation. All rights reserved.

7.09.00.00 – DAMAGES, BENEFITS, AND CONSTRUCTION CONTRACT WORK

7.09.01.00 General

The possibility of damages and benefits will be investigated in every partial acquisition. This investigation will include local market data, similar after-condition land development and highest and best use analyses, and other applicable information.

Any damages and/or benefits will be supported and clearly documented in the parcel appraisal. Severance damages and benefits will be shown as separate totals. Benefits, if any, will be subtracted from severance damages. Any net benefits or damages will be shown separately.

The results and support of the investigation which reveals that no damages and/or benefits occur must be shown in the appraisal report. Such analyses may materially assist negotiations in cases where unsubstantiated claims for damages might be made.

Benefits which result due to construction of the project in the manner proposed should be described, valued, and supported even if it is determined that there are no damages. Benefits may presently be incapable of being valued; the nature of the benefits should then be described in the appraisal. Legal opinions should be secured when there is uncertainty regarding compensable damages.

7.09.02.00 Severance Damages

A severance damage is a loss in value to the remaining property after acquisition and construction in the manner proposed. Severance damages are valued by the appraisal of the remainder as a portion of the total property in the before condition and as a freestanding remainder in the after condition (disregarding the benefits of the construction project). The remainder is considered damaged if it is worth less after construction of the project due to a legally compensable reason. The after condition valuation requires the same support as the before condition valuation. Severance damage analyses should consider when the damages will occur (Code of Civil Procedure Sections 1263.420 and 1263.440).

© 1994-2025 California Department of Transportation. All rights reserved.

The parcel appraisal must specifically state the reasons for the severance damage and discuss the comparable data or investigation results supporting the severance damage estimate. Comparable data used will be referenced under the heading "Market Data (After)."

Generally, any severance damages to a larger parcel functioning as a unit, especially under an agricultural use, will be measured by any decrease in market value of the remainder(s) (*Department of Public Works v. Lundy*). Under very narrowly described circumstances, damages to the continued operation of the remainder(s) as a unit may be considered (*Department of Public Works v. Cozza*); these include items such as increased cost, difficulty, and hazard. If this form of damages is considered applicable, the Region/District must furnish particulars to HQ R/W Appraisal Branch and request a legal opinion prior to completion of the appraisal.

Compensable damages to the remainder may be caused by either or both of the following (see CCP Section 1263.420):

(a) The severance of the remainder from the part taken.

(b) The construction and use of the project for which the property is taken in the manner proposed by the plaintiff, whether or not the damage is caused by a portion of the project located on the part taken.

7.09.03.00 Noncompensable Damages

The following types of damages have been found by the courts not to be compensable, or in certain respects, may be compensable only under laws other than those of eminent domain. Therefore, the following noncompensable damages should generally not be included in real property acquisition valuations:

A. *Damages to business*

However, loss of goodwill is compensable if proven by the owner. Handling of such losses is treated under R/W Manual Section 7.17.00.00.

B. *Expenses for moving personal property*

However, displaced property owners and tenants may be entitled to payment for moving personal property under the Relocation Assistance Program.

© 1994-2025 California Department of Transportation. All rights reserved.

C. *Temporary damages to the use and occupancy of property reasonably incident to construction requirements*

Unnecessary and substantial interference may be compensable. The appraiser should confer with HQ R/W Appraisal Branch and Legal to assist in the determination of damage compensability.

D. *Damage due to annoyance and inconvenience suffered by the public generally*

Exceptions to this may include diminution in property value of the remainder caused by noise, fumes, and/or other annoyances inherent in the daily use of a freeway. These types of severance damages are generally dependent on the specific circumstances in each case and must be measurable within the market. It is important to note that the damage must be sustained by the property itself rather than the owners. The appraiser should confer with HQ R/W Appraisal Branch and Legal to assist in the determination of damage compensability.

If noise damages are assessed in the appraisal, written documentation from Project Development will be included in the report. This documentation should confirm that no noise attenuation measures are included in the proposed construction plans.

E. *Circuity of travel caused by dividing a highway*

Damages concerning circuity of travel can occur under many circumstances. The appraiser should confer with HQ R/W Appraisal Branch and Legal to assist in the determination of damage compensability.

F. *Rerouting or diversion of traffic or changing of a two-way street to a one-way street*

G. *In general, all those types of damages which can be considered to be conjectural, speculative, and/or remote*

© 1994-2025 California Department of Transportation. All rights reserved.

7.09.04.00 Cost to Cure

Some severance damages may be mitigated or entirely eliminated by estimating the cost to cure the damage. The appraiser must first show the total estimated severance damages to the remainder which would occur if not cured. After the damage amount is estimated, the appraiser can explore potential costs to cure those damages. Damages are measured by the lesser of these two costs: the potential damage (loss in value) to the remainder or the cost to cure the damage. The estimated cost to cure may not exceed the estimated severance damage. Since cost to cure damages are a form of severance damages, they are to be offset by any benefits.

The supporting data and sources used to estimate cost to cure damages must be shown in the appraisal report in accordance with R/W Manual Section 7.05.04.00 relating the documentation of cost estimates.

7.09.05.00 Benefits

Benefits are valued by the appraisal of the remainder before and after the acquisition and construction of the project in the manner proposed. Benefits analyses should consider when the benefits will occur. (See CCP Sections 1263.430 and 1263.440.)

The appraiser must provide a descriptive analysis with adequate support for any estimated benefits.

Benefits are to be offset against any severance damages in the valuation. If benefits are estimated to the remainder, such benefits will be quantified and shown in the appraisal report, even if it is determined that there are no severance damages to the remainder. When excess benefits remain after the offset against severance damages, the excess benefits shall be shown in the report. Benefits can be used to offset any loss of goodwill that may occur to a business located on the property if owned by the fee owner. (See CCP Section 1263.410.)

7.09.06.00 Summary of Severance Damages and Benefits

Severance damages and/or benefits shall be summarized on a before-and-after value basis in the appraisal report. A "Summary of Severance Damages and Benefits" (Form RW 07-12) shall be used for the summary.

© 1994-2025 California Department of Transportation. All rights reserved.

In cases where severance damages and/or benefits are relatively minor, it will not be necessary to include a before-and-after value summary.

7.09.07.00 Damage Alternatives

The "Summary of Damage Alternatives" and "Discussion of Damages" (Exhibit 07-EX-06) are the suggested formats to be used to compare practical alternative damage approaches and to discuss damage elements. The "Discussion of Damages" section will be used in cases where damages, other than minor adjustment curative work, are present.

If no feasible curative work alternative can be proposed to mitigate severance damages, the "Discussion of Damages" will so state. If severance damage estimates are inconclusive using before-and-after valuations, or are impractical due to the size or nature of the remainder, or if the cost to cure the severance is the best measure, the "Discussion" will give the reasons for the approach used. If the severance damages are valued by market comparison, the "Discussion" will reference the comparable data used and explain the comparative analysis. If market data is inconclusive as a basis for the estimation of damages, the "Discussion" should include a description of the scope of the market investigation and the reason supporting the opinion of damages.

The formats contained in Exhibit 07-EX-06 should be used to substantiate a purchase of excess land, except in the following cases: (1) landlocked remainders; (2) properties with major improvements straddling the right of way line; (3) sites reduced below zoning minimums; (4) public utility or governmental properties. Even in these exceptions, comments should describe investigations of possible curative work alternatives and reasons for rejections.

It is important to note that in some cases, potential curative work alternatives may include substitute condemnation. The most common situation where substitute condemnation should be considered occurs where an acquisition would deprive a property of access to a public road or utility service. To restore the utility of such parcels, and in doing so, to minimize severance damages, the State may provide substitute access or utility service. CCP Section 1240.350 provides the discretionary authority for substitute condemnation of additional property "as reasonably necessary and appropriate (after taking into account any hardship to the owner of the additional property) to provide utility service to, or access to a public road from, any property that is not acquired for such public use but which is cut off

© 1994-2025 California Department of Transportation. All rights reserved.

from utility service or access to a public road as a result of the acquisition by the public entity."

When proposing substitute condemnation as a means to minimize severance damages, the appraisal report (along with the resolution of necessity) shall specifically refer to CCP Section 1240.350 and include a statement that the substitute property is necessary for the purpose specified in this section.

7.09.08.00 Utility Service Damage

The grantor must be fully compensated for all justified damages due to relocation of utilities, including payment for severing water, sewer, and gas lines and wiring extending into the right of way area, if such work is to be performed by grantor.

7.09.09.00 Construction Contract Work

Occasionally, work in or outside of the State right of way is required to restore the utility of remaining property (i.e., road/driveway approach, cattle pass, utility sleeve) and may be most economically and/or practically performed by the State's highway contractor. The work and estimated cost will be described as "Construction Contract Work." The feasibility and cost of the proposed work must be estimated or verified by Region/District Project Development prior to submission of the appraisal. Sources of estimated costs will be included in the report and documented in the Region/District's appraisal file. Costs must be justified by the value of the remainder and must be less than the potential damage which would occur if the construction work was not performed.

Only work for the grantor's benefit to the remainder is considered to be "Construction Contract Work" as it is a form of a damage payment. Work of greatest benefit to the public or required by the highway construction will not be classified as "Construction Contract Work."

The appraisal must clearly show the computations and explain the reasons for proposing construction contract work that is not offset when benefits are present. Minor construction contract work for driveway reconstruction, domestic utility reconnections, etc., should be proposed regardless of the presence of benefits.

© 1994-2025 California Department of Transportation. All rights reserved.

Construction contract work may also include curative work for a remainder which is to be performed by a clearance contractor or public utility agency. The feasibility and cost of the proposed work will be estimated or verified by the Region/District Property Management or Utility Clearance Branches prior to submission of the appraisal.

The Appraisal Summary (RW 07-09) will show a "Construction Contract Work" heading for all partial acquisitions. The heading will show the remark "None Required" or contain a description and valuation of required construction contract work, including proposed engineering station locations. The total of all construction contract work will be carried forward to the Parcel Summary Page (if used).

Construction contract work can benefit more than one property. If multiple properties are benefited, the total amount of construction contract work will be split among the various properties at the amount of benefit each property receives. A reference will be made in each parcel appraisal that the construction contract work benefits other parcels.

7.09.10.00 Utility Main Relocations

Relocation of utility transmission lines up to the point of owner's service is usually included in agreements with the utility company. Such relocations need not be considered in the parcel appraisal, with the one exception: the extension of utility mains for the sole benefit of few properties remaining after State acquisition. In these cases, the utility main relocation costs must be justified by the values of the affected remainders.

If payment of severance damages or purchase of remainders is less costly, it should be considered.

7.09.10.01 Private Utility Connections

The relocation of private connections can be handled in one of the following ways:

- Reconnection by the grantor through a damage payment.
- Reconnection by the utility company as part of the utility agreement.
- Reconnection by the highway contractor as construction contract work.
- Reconnection by the clearance contractor as construction contract work.

© 1994-2025 California Department of Transportation. All rights reserved.

Whenever possible, the appraisal analysis should anticipate how private relocations and reconnections will be accomplished. The estimated cost for work performed by the grantor will be shown as a "Damage." Reconnection by any other means will be shown as "Construction Contract Work." If construction plans or utility company plans are incomplete, the appraisal will describe the various utility services and discuss possible relocation and reconnection requirements, potential challenges (if any), and estimated costs.

An analysis will also describe the parcel's utility sources and possible relocation requirements, if any. Such analyses should consider grantor-owned well water, sewerage, and other utility systems.

7.09.11.00 Access Openings

All proposed openings within areas of access restriction to allow direct private access to the highway (either permanent, temporary, or locked gate) will be listed on the Appraisal Summary (RW 07-09) under the heading "Access Openings." Do not list public road openings included in Freeway Agreements or road approaches from conventional highways or frontage roads. Costs will be valued under "Damages" or "Construction Contract Work," if appropriate.

All access openings must be confirmed by Region/District Project Development. The necessity for locked gates or temporary openings must be fully explained in the parcel appraisal. All listed access openings will be properly delineated on the Appraisal Map and included on the List of Access Openings in the appraisal report.

© 1994-2025 California Department of Transportation. All rights reserved.

7.10.00.00 – REVISION AND REVIEWS

7.10.01.00 General

Offers may be made only on the basis of approved appraisals or authorized adjustments; therefore, it is imperative that revisions be made without undue delay.

The Region/District shall devise and maintain an efficient procedure for systematic appraisal review for "updating" unclosed parcels in areas where significant new data is revealed.

It is the Acquisition Branch's responsibility to develop any new data, make an investigation thereof and determine if such new data warrants further review by the Appraisal Branch. When requested, the Appraisal Branch shall investigate the new data and determine the applicability to unacquired parcels. If adjustment is not justified, the Acquisition Branch will be immediately notified.

If significant adjustment is in order, an appraisal revision will be immediately processed so negotiations may proceed without undue delay. Review will be expedited upon request.

7.10.02.00 Changes in Unapproved Appraisals Requiring Division Approval

If a report is returned to the Region/District without action, or a report is approved except for certain parcels, the Region/District will take such corrective action as necessary. A cover letter of transmittal will describe the action taken on the points raised by HQ R/W.

© 1994-2025 California Department of Transportation. All rights reserved.

7.10.03.00 Changes in Approved Appraisals-Unacquired Parcels

The contents or valuation of an unacquired parcel appraisal may be changed by one of the following methods, in accordance with current delegations:

- Revised appraisal pages.
- Revised parcel appraisal canceling and superseding an existing appraisal by inclusion in a later report.
- Memorandum of Adjustment.

7.10.04.00 Revised Appraisal Pages

Parcel appraisals may be revised by submitting revised appraisal pages for replacement in the approved report, providing the change can be substantiated without extensive changes in supplemental appraisal pages. The following are examples of cases in which revised appraisal pages may be used:

A. Mathematical or typographical errors.

B. A valuation change resulting from an orderly change in price level which can be clearly supported by new comparable data and the original appraisal relied predominantly on a market approach.

C. The change involves addition or deletion of a subparcel, or parcel split or merger with little change in value factors.

D. The change involves addition or deletion of minor improvements without effect on the land valuation.

E. The change involves increase or decrease in right of way requirements or excess with no significant change in damages, benefits, or construction contract work.

F. The change involves including an alternate appraisal with little change in the valuation of the total property.

G. The change involves parcel grouping.

© 1994-2025 California Department of Transportation. All rights reserved.

7.10.04.01 Submittal of Revised Pages

Revised pages and maps will be submitted with a memorandum of transmittal detailing the changes. A change in right of way requirement or access control will be approved by the Region/District Division of Design. Revised pages will have the word "Revised" and the revision date shown at the top of all pages. Revised maps, when necessary, will have only the affected parcel(s) colored and will have the word "Revised" and the date visible on the map when both opened and folded. A revised Comparable Data Map is required whenever new comparable data is used. A new Senior Field Review Certificate and a revised Certificate of Appraiser are required whenever there has been a change in the value, improvements affected, or area taken. Minor typographical corrections do not require new Certificates.

7.10.05.00 Revised Parcel Appraisals

If extensive changes are required, a revised parcel appraisal canceling and superseding the existing appraisal must be submitted. They will be submitted in succeeding reports and will be complete with all necessary information and supporting data.

The Appraisal Summary (RW 07-09) will contain a brief résumé of the reasons for the revision. At the top of the page, show the remark "Revises and Supersedes the Parcel Appraisal in Appraisal Report No. _____, Dated _____."

Revised parcels contained in a report with other parcels will be marked "Revised" on the Parcel Summary Page (if used) and on the front cover. In addition, the front cover will show the old Appraisal Report number. Revised parcel appraisals must keep the original parcel number, except that subparcels may be added or deleted.

7.10.06.00 Memorandum of Adjustment

This method will be used for nonsubstantial valuation adjustments and minor variations which do not warrant revised appraisal pages. The revision may be at the request of the Acquisition Branch or as a result of a subsequent appraisal or discovery of new information and data. Each Memorandum must follow the same approval process as the original appraisal.

If a Memorandum of Adjustment is completed to add a right of way requirement and subsequently it is determined that the right of way requirement is no longer needed, a new Memorandum must be completed

© 1994-2025 California Department of Transportation. All rights reserved.

to rescind the original Memorandum. If the new Memorandum changes the value, a revised offer must be presented to the grantor.

If HQ R/W approved the original appraisal, it must approve the Memorandum. If there is not enough time for HQ R/W review and approval due to imminence of trial or possession date, the Memorandum will be prepared and submitted with a detailed discussion supporting the insufficiency of time and the need for the Memorandum. Telephone approval should be obtained and referenced in the Memorandum.

7.10.07.00 Changes in Approved Appraisals on Acquired Parcels

There are very few occasions where an approved appraisal can be revised after the parcel is acquired and escrow has closed. In certain instances, the Acquisition Branch may find it necessary to amend a Right of Way Contract to correct a situation discovered after close of escrow. Acquisition should direct a memo to Appraisals setting forth the reasons for the amendment and the need for a change in the approved appraisal. Appraisals will then prepare a Memorandum of Adjustment valuing the additional rights taken or damages incurred as if they were part of the original appraisal. The approval process will be the same as the original appraisal.

A. Additional right of way over a grantor's remainder requires a new appraisal under a new parcel number in a new appraisal report. Legal advice should be obtained concerning the use of before or after condition values in the appraisal of additional requirements.

B. If no new right of way is required, the Acquisition Branch may nonetheless find it necessary to amend a contract. In such an instance, when related to value, the Appraisal Branch shall, prior to such necessary amendment and at the request of the Acquisition Branch, prepare a Statement of Value, in the same form as a Memorandum of Adjustment, valuing the additional rights taken as part of the original appraisal. Approval of the Statement of Value will be in accordance with the existing delegations.

© 1994-2025 California Department of Transportation. All rights reserved.

7.10.08.00 Parcel Splits and Mergers

Splits or mergers due to change in ownership, or addition and/or cancellation of subparcels, may be submitted by revised appraisal pages or revised parcel appraisals, as the extent of necessary reappraisal requires. Parcel splits will comply with the following instructions:

A. The original ownership (or one parcel) will retain the original parcel and appropriate subparcel numbers and will be identified as a revised appraisal.

B. The new ownership will have new parcel and subparcel numbers issued. It will be considered a new appraisal.

C. The headings of both parcels' Appraisal Summaries (RW 07-09) will cross-reference the other parcel.

D. Both appraisals will be submitted concurrently if revised appraisal pages are used or in the same report if submitted as revised parcel appraisals.

In parcel mergers (merged after the initial appraisal), the merged parcels will be grouped under the lowest parcel number and appraised as a larger parcel. Originally assigned parcel and subparcel numbers for each parcel will be retained. The parcels will have typed in the upper margin "Revised (date), merges with Parcel _____ and supersedes the parcel appraisal in Appraisal Report No. _____ Dated _____." Revised maps are necessary showing new gross areas, vesting, and correct coloring.

7.10.09.00 Parcel Cancellations

Parcel appraisals may be canceled for any number of reasons. Typically, Design may change the requirements or the construction date is delayed and the project is no longer budgeted. Prior to cancellation, the Acquisition and RAP Branches must be advised and they must determine that there are no outstanding obligations to the owners or occupants of the property.

7.10.10.00 Review of Condemnation Parcels

Upon written request, the Appraisal Branch will investigate all new data discovered relating to condemnation parcels and will revise affected parcels.

Prior to engaging contract or staff condemnation appraisers, the Acquisition Branch will request the Appraisal Branch to make a review of a

© 1994-2025 California Department of Transportation. All rights reserved.

condemnation parcel and all pertinent data. Upon receipt of the Confirmation of Market Value request, the Appraisal Branch will issue an appraisal revision with a new date of value and new comparable data, if any, supporting the opinion of value as of the new date. For nonsubstantial valuation adjustments, a Memorandum of Adjustment should be used.

After engaging condemnation witnesses, the staff appraisal would not normally be revised except for mechanical changes (in areas, subparcels, etc.), substantial changes in design, or protracted delays or changes in data which would normally require significant adjustments in witnesses' reports. In these latter two cases, revision of the staff appraisal is optional with the Region/District considering the most cost-effective approach to acquisition.

7.10.11.00 Preparation of the Report Analysis for Expert Witness Appraisals

Preparation of the Report Analysis (07-EX-18) shall be consistent with current appraisal report approval delegations; if the acquisition report was approved in Headquarters through the Region/District cumulative review process, then Region/District will prepare the 07-EX-18 for Headquarters review and concurrence. The appropriate Headquarters Appraisal Liaison will prepare the exhibit for the Supervising Acquisition Agent and the State's attorney, keep the original to be filed with the corresponding staff report, and forward an electronic copy to the Region/District Supervising Acquisition Agent and State's attorney with copies to the Chief of the Office of Project Delivery.

The Report Analysis (07-EX-18) shall include the following:

- **Compliance** – Comment on compliance with applicable reporting and valuation standards. When comparing staff/independent reports, note and explain any significant differences.

- **Value** – Tabulate the major value conclusions in the current staff appraisal, the experts' appraisals, and/or other experts' appraisals received to date in the Analysis Section. If the submission is a revision of a previous appraisal, show both the original and updated amounts. Comment on major differences in value or other important information.

The Appraisal Branch shall neither approve nor disapprove the report. The analysis shall state if the report is in compliance with professional appraisal standards (e.g., the Uniform Standards of Professional Appraisal Practice [USPAP]), in addition to the valuation-related components of Federal

© 1994-2025 California Department of Transportation. All rights reserved.

and State laws applicable to the acquisition and appraisal of real property rights (e.g., the Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally-Assisted Programs [Uniform Act], California Eminent Domain Law, etc.).

The analysis will not contain recommendations as to possible settlement amounts or negotiation approaches.

© 1994-2025 California Department of Transportation. All rights reserved.

7.11.00.00 – OUTDOOR ADVERTISING SIGNS

7.11.01.00 Valuation

A. Signs owned by grantors or occupants, located on a subject property, and identifying or advertising the business or activity conducted on that property (known as on-premise signs) will be valued on the Appraisal Page under "Improvements" at depreciated value in place. If relocation of such signs is feasible, the relocation costs may be shown in parentheses for information purposes, or may be included on Alternate Appraisal Pages.

   Grantor or occupant-owned business signs located off the subject parcel may be subject to severance damages.

B. Signs owned by outdoor advertising companies will be valued by use of payment Schedules A, B, C, D, E, G, and H (Exhibit 07-EX-14). This valuation will be shown on the Summary of Outdoor Advertising Structures, Form RW 07-08. If the outdoor advertising company refuses the schedule, the signboard structure will be appraised as an improvement. See Section 7.11.05.00.

7.11.02.00 Definitions

A. On-Premise Sign – A sign identifying or advertising the business or activity conducted on the property where the sign is located.

B. Off-Premise Sign – All outdoor advertising signs other than on-premise signs.

C. Poster Panel – A structure designed to support a flat surface of 300 square feet upon which printed advertising or other messages are pasted to the panel built on one or more posts imbedded in the ground or attached to the wall of a building.

D. Back-To-Back Poster Panel – A structure designed to support two or more flat surfaces of 300 square feet built on one or more posts imbedded in the ground.

   Printed advertising or other messages are pasted to the panels.

© 1994-2025 California Department of Transportation. All rights reserved.

E. Roof Poster Panel – A Poster Panel built on one or more posts imbedded into the roof of a building. Each flat surface supported by such post(s) is a separate Roof Poster Panel.

F. 8-Sheet Poster Panel – A structure designed to support a flat surface of 72 square feet upon which printed advertising or other messages are pasted to the panel, built on one or more posts embedded in the ground.

G. Offset Sign – A sign constructed so that the advertising surface is supported upon horizontal members not less than 2 feet in length, and these members are joined to vertical posts imbedded into the ground.

H. Special Build – Any sign not covered under Schedule A, D, E, F, G, or H. Usually this type of structure is on one post imbedded in the ground and utilizes torque bar construction.

I. Urban Rotate – Painted bulletins which always have full illumination and the advertising facing sections are in modular form, designed and constructed to be moved from one structure to another on a periodic basis. The standard size is 14' x 48', but they are often larger and may have special embellishment features, such as cutouts, special lighting effects, freestanding letters, neon and space extensions to cover the advertisement of a specific product. The structures are usually steel and always have two back decks designed and constructed to State and local safety standards so that working crews can have easy and safe access to the back of the facing sections during the rotation process. They are generally found in urban areas in the more desirable locations at points of maximum advertising exposure. Their advertising message is most often of a national product or of regional interest.

J. Painted Bulletin – A structure designed to support one or more flat surfaces upon which at least one advertising or other message is painted in whole or substantial part, built on one or more posts imbedded into the ground or attached to the wall or roof of a building.

K. Wood Sign – A sign with wood posts.

L. Steel Sign – A sign with steel posts.

M. Illuminated Sign – A sign with attached lighting fixtures to make the advertising message visible at night.

© 1994-2025 California Department of Transportation. All rights reserved.

N. Outdoor Advertising Company – This refers to any business or individual who erects or maintains an outdoor advertising display.

O. Professional Signs – Well constructed signs with quality materials and workmanship evidenced throughout, providing a uniform appearance and extended physical life with minimum necessary maintenance. The advertising message is normally professionally lettered.

Schedules A, B, C, D, E, G, and H should be utilized for signs in this classification.

P. Miscellaneous Signs – Signs normally built with minimum quality and amounts of material and may be characterized by "do it yourself" workmanship. This type of construction tends to shorten physical life and increase the necessity for maintenance over the life of the sign. In many instances, the advertising message is of a nonprofessional type and advertises the sign owner's business.

Signs in this classification should be valued by the use of Schedule F.

7.11.03.00 Process

A. When starting an appraisal that includes outdoor advertising signs, the appraiser will take the following steps:

1. Send a request to the Headquarters Outdoor Advertising Coordinator for determination of the legality of the sign and feasibility of relocation. Use Exhibit 07-EX-11 as a format.

2. When Schedule B is utilized for a special build, send a letter to the sign company requesting the information required on Exhibit 07-EX-12.

B. If a sign may be relocated pursuant to Business and Professions Code Section 5412 or 5443.5 or onto the grantor's remaining property, the relocation payment should be determined as follows:

1. Poster Panel – Use Schedule C.

2. Special Builds, Painted Bulletins or Urban Rotate Bulletins:

a. Obtain an estimate from the sign company by use of Exhibit 07-EX-13, or

© 1994-2025 California Department of Transportation. All rights reserved.

b. Obtain an estimate from the Region/District Building Cost Estimator, or

c. Obtain estimates from at least two sign companies other than the company that owns the sign to be relocated.

C. For each structure, show the average height of the bottom of the sign panel above the ground (HAGL) on the Outdoor Advertising Structures Page. A close-up photograph of each sign will be included.

D. The photographs shall be placed in the Appraisal Report immediately following the Summary Page.

E. The appraisal must include the results of the legality and relocation determination from the Region/District Outdoor Advertising Coordinator. When a sign may be relocated, the relocation cost will be shown with the removal (i.e., purchase) cost shown in parentheses. If it is necessary to receive information from the sign company to complete the valuation and it is not available by the time the Appraisal Report is ready for completion, the sign will be listed in the "Summary" with the valuation space showing "N.A." The Remarks section should state when the letter was sent to the sign company.

F. Signs within the existing right of way are not entitled to payment but will be listed in the Summary of Outdoor Advertising Signs at a zero value.

G. Signs located on property under the Williamson Act (Government Code Sections 51200-51295) contract as an agricultural preserve may or may not be compensable, depending primarily on when they were erected.

1. A structure erected on property after the land is placed in an agricultural preserve is illegal and payment must not be made for its removal. Removal of such structure should be enforced by the county or the local entity as a party to the Williamson Act contract. It will be listed on the Summary Page.

2. Property placed in an agricultural preserve with an existing structure in place.

Generally, the Surface Transportation Act of 1978 requires payment for the removal of any structure located adjacent to an Interstate or Primary highway, if it was legally placed prior to November 6, 1978. Not all aspects of the compensation provisions are clear. These payment provisions do not

© 1994-2025 California Department of Transportation. All rights reserved.

apply to structures located adjacent to highways not included in the Interstate or Primary systems. The Region/District should seek advice from the Legal Division prior to proceeding with the appraisal and acquisition of signs in these locations.

7.11.04.00 Payment Schedules/Application Renewal Permit Fees

The sign payment schedules (see Exhibit 07-EX-14) are to be used as follows:

- Schedule A – Payment Schedule for Poster Panel Removal (straight or offset single and double plus rooftop).

- Schedule B – Payment for "Special Build" removal and relocation of "Special Builds," Painted Bulletins (Professional and Miscellaneous), and Urban "Rotate" Bulletins based on sign owner cost claims.

- Schedule C – Payment Schedule for Relocating Poster Panels onto Adjacent Property or pursuant to Business and Professions Code 5412 or 5443.5.

- Schedule D – Payment Schedule for Urban "Rotate" Bulletin Removal. Painted Bulletins that do not fall under the definition of an Urban "Rotate" should be covered by Schedules B, E, or F.

- Schedule E – Payment Schedule for the removal of Painted Bulletins in the "Professional" category.

  This schedule is to provide a basis for payments in lieu of appraisals or cost claims (Schedule B) for painted bulletins not falling under the definition of Rotate Bulletin (Schedule D) or "Miscellaneous" Sign (Schedule F).

- Schedule F – Payment Schedule for "Miscellaneous" Sign Removal.

- Schedule G – Payment Schedule for 8-Sheet Poster Panel Removal.

- Schedule H – Payment Schedule for Relocating 8-Sheet Poster Panels onto Adjacent Property or pursuant to Business and Professions Code 5412 or 5443.5.

© 1994-2025 California Department of Transportation. All rights reserved.

7.11.05.00 Appraisal Procedures for Outdoor Advertising Signs

If the schedule is not used, the valuation of the real property, including the sign structure, will follow normal appraisal practice and must adhere to the Uniform Act and applicable statutes. The following items must be considered when appraising a sign structure:

- The sign will be considered an improvement and will be analyzed as a primary or secondary use in appraising the value of the land as consistent with its highest and best use.

- Only cost information and that market and income data attributable solely to the real estate should be considered. Using this real-estate-only data, accepted real-estate-valuation methods should be used to the extent necessary and possible to value the land and improvements. Since data can be difficult to obtain, the cost approach may be of primary importance.

- If the fair market rent of the structure as real estate, in contrast to advertising business income, can be determined, that income may be processed to an indicated value or be reconciled with one or both of the other approaches.

- Sign structures will be appraised at the amount they contribute to the fair market value of the real property. The value of the structure will be shown on the RW 07-09 as an improvement at its value in place and included as part of the total value for the parcel. Tenant-owned sign structures will be indicated as such.

- Even though a sign structure alone may not represent the highest and best use of a site as though vacant, it may still have value. If the sign is located on the site in such a manner as to not interfere with development of the site to its highest and best use, it remains an economically viable asset.

- In considering the sales comparison approach, the Appraiser should make a reasonable search for comparable sales that included a sign structure considered as realty.

- The application of multipliers to the advertising income is not proper in arriving at the value contributed to the property by the sign structure. Advertising revenues are to be distinguished from the economic rent for land and improvements.

© 1994-2025 California Department of Transportation. All rights reserved.

- The ground lease to the outdoor advertising company will generally add value to the fee. If the contract rent is less than the market rent, the outdoor advertising company may have a bonus value in the lease. The ground lease should be thoroughly reviewed to ensure a complete understanding of what it covers.

- As with any tenant business, the sign company compensation is provided for in the payment for the land and improvements or in the payment for compensable loss of goodwill.

- Each sign company should be advised of its right to claim a loss of goodwill due to the taking, and the fact noted in the diary sheet. If a claim and tax returns are filed, the business aspect and loss of goodwill, if any, can be determined by a goodwill appraisal.

7.12.00.00 – MOBILE HOMES

7.12.01.00 Mobile Homes – General

Mobile homes, or manufactured homes, are built in factories and then relocated onto a site where they can be placed onto a permanent foundation. The term "mobile home" refers to manufactured homes built prior to June 15th, 1976, when the Manufactured Housing Construction and Safety Standards Act of 1974 went into effect. If one was constructed after that date, then it is categorized as a manufactured home. While both are manufactured at a factory, manufactured homes are perceived to be of better quality since they are constructed in accordance with federal standards. In California, both are registered and titled through the California Department of Housing and Community Development. Neither should be confused with modular homes, which are homes that are built off-site and then transported and assembled on-site with a permanent foundation.

An appraiser assigned to either a manufactured or mobile home should be familiar with the different foundation methods used to affix these homes to the land prior to inspecting the site.

Mobile home appraisals are treated somewhat differently than other types of appraisals only because of their unique nature. The first determination to be made is whether it is realty or personalty.

7.12.02.00 Mobile Homes – Realty

Mobile homes installed on the owner's land in compliance with Health and Safety Code Section 18551 may be indexed on County Recorder's records as subject to real property taxation. Mobile homes so indexed should be considered real property and be appraised as such. They can also be appraised with a URAR form, see Section 7.07.02.00. If the mobile home is not indexed, the appraiser should consider the following tests to determine if the mobile home should be classified as real property:

A. Does the physical manner in which the mobile home is affixed to land (particularly the nature of the foundation) indicate an apparent intention that the home be permanently annexed to the realty?

B. Would removal of the mobile home completely or materially render other significant real property improvements associated with the use of

© 1994-2025 California Department of Transportation. All rights reserved.

the mobile home (e.g., pads, utilities, etc.) to be unfit for their intended use? Minor improvements should not be considered in this respect.

If the mobile home clearly fits either of these tests, it should be considered real property and appraised accordingly. If there is doubt, a legal opinion should be obtained.

7.12.03.00 Mobile Homes – Personalty

Mobile homes classified as personalty are eligible for purchase by the State only if they are determined to be owner-occupied and to fall within at least one of the following categories:

A. The mobile homes do not meet "decent, safe, and sanitary" standards.

B. There are not an adequate number of suitable replacement sites for the mobile homes being displaced.

C. The mobile homes cannot be made roadworthy and are thus incapable of being moved.

These mobile homes will be appraised only after the District/Region's Relocation Assistance Branch has determined that they qualify for purchase by the State. The Relocation Assistance Branch will normally initiate the appraisal by memorandum specifying the conditions requiring the appraisal. A copy of this memorandum will be included in the Report.

It is the responsibility of the appraiser to review all mobile homes when inspecting the parent property site. If it appears that any will not meet D. S. & S. standards, the Relocation Assistance Branch should be notified so that a definitive determination can be made.

7.12.04.00 Mobile Homes – Special Procedures

The parcel number to be used for mobile homes on rented or leased space (such as in a mobile home park) will be the parcel number of the property in which the mobile home is located, with an "MH" suffix added together with a unit number; e.g., 11456(MH-1). Mobile homes will be appraised in the same manner as other property, (i.e., fair market value in place). Normally, there should be ample market data available. Comparison factors should be based on industry standards. Although they should not be included in the report, current Mobile Home Appraisal and Condition Report forms are often available through lenders and dealers and list many of the factors considered

© 1994-2025 California Department of Transportation. All rights reserved.

in mobile home valuations. The Residential Building Check Sheet (Exhibit 07-EX-08) should be used in the appraisal. As an alternate, a modified URAR Form can be used. Additional considerations involved in the appraisal of mobile homes are the license or tax status of the unit and possible penalties to the seller, differences between nominal and actual length of the unit, the quality, condition and desirability of the mobile home park, and the impact of space rental rates on the subject and the comparables.

The National Automobile Dealers Association (NADA) publishes the Manufactured Housing Cost Guide, which may yield useful information for arriving at a Replacement Cost New for a comparable unit, but it will not include the cost to establish a new unit on the site.

7.12.05.00 Mobile Homes – Format

Mobile home appraisals will conform to normal format except that the following additional information is required:

A. Year built and manufacturer.

B. Nominal dimensions; e.g., 10 feet x 40 feet and actual dimensions (if different);
e.g., 10.5 feet x 39.5 feet.

C. Vehicle serial number.

D. Vehicle license plate number, State, and expiration date. Instead of a license plate number, some mobile homes will have a substitute State of California Title Control Number ("Q" series number) on the Ownership Certificate (if sold new in California after July 1, 1980, if sold more than 120 days after the expiration date of the license plates, and certain other circumstances). The number used should be the two-letter four-digit license plate or control number indicated on the title to the current owner.

© 1994-2025 California Department of Transportation. All rights reserved.

7.13.00.00 – SPECIAL APPRAISAL REPORTS

7.13.01.00 General

Some special appraisals shall be prepared in separate reports. Such Special Reports may have modified formats, and follow modified review and approval processes as discussed below. These Special Reports include appraisals for material and disposal sites; sites for maintenance stations, shops, and offices; joint acquisitions by the California Department of Transportation (Department) and other public agencies; and inverse condemnation actions.

7.13.02.00 Material Site Appraisals

If a material site is to be acquired in conjunction with a right of way acquisition, both requirements will be appraised as a whole and separated into two reports.

The "Introduction" will include economic justification for purchase of the site as compared with the cost of securing the material by royalty agreement. The approximate quantity of material to be taken from the site should be noted. A comparison can then be made as to the equivalent cubic meter cost should the material be secured by materials agreement. The going price for similar material in the vicinity on a metric basis should be indicated. The estimated salvage value of the land after removal operations have been completed shall also be shown.

The format, content, and approval process is the same as any other regular acquisition appraisal.

The appraisal will contain the following information:

A. A statement by the Region/District Materials Engineer as to the quantity and quality of the material.

B. The name of the office originating the request (Construction, Project Development, or Maintenance).

C. The termini of the project or projects on which the material is to be used.

© 1994-2025 California Department of Transportation. All rights reserved.

D. The budget or program in which the project or projects may be found (if there is a specially voted project by the California Transportation Commission, so state and indicate the date of the vote).

E. The average haul distance from the site to the project or projects, or to that portion of the project or projects on which the material is to be used.

F. A statement that the location of the material site does not violate any of the provisions of the Standard Specifications (prohibiting excavation which would result in scars which will present an unsightly appearance from any highway). If the provisions of the Standard Specifications cannot be complied with, a statement must be included to the effect that the Region/District will take such action as is necessary to correct any unsightly appearance.

G. A statement that the location of the material site is not in violation of any ordinance or zoning regulations.

H. Approximate date of termination of use.

7.13.03.00 Disposal Site Appraisals

If a disposal site is to be acquired in conjunction with a right of way acquisition, both requirements will be appraised as a whole and separated into two reports.

The introduction should include the same information as listed for material sites under 7.13.02.00 B through H.

7.13.04.00 Office and Maintenance Station Site Appraisals

Appraisals of new sites for maintenance stations, shops, or office buildings shall be separate reports. If the site is to be acquired in conjunction with a right of way acquisition, both requirements will be appraised as a whole even though separated into two reports. All other appraisals not a part of a right of way project will be in the standard format and content with the same approval process as a regular acquisition appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

7.13.10.00 Joint Acquisition Appraisals

The Department may enter into Cooperative Agreements with other public agencies for purchase of property for other public purposes. The date and title of the Cooperative Agreement will be referenced in the report. The highway requirements and the other agencies' requirements will be shown separately with the appropriate values distributed to each in accordance with the agreement.

The appraisal will assume that all agencies' acquisition and construction occur together and no damages or benefits caused by one shall affect the before value of the other. This does not preclude proper apportioning of damages occurring to remaining property due to specific construction features of one. Similarly, benefits due to the construction project of one agency may be used to offset damages caused by the other.

If the Cooperative Agreement provides for specific proportions for sharing right of way costs, these proportions will be used in the report and shown on the Appraisal Page.

Legal opinions should be obtained before condemnation of joint acquisitions.

7.13.20.00 Protection Appraisals

Protection acquisitions require prior approval by Project Development and Construction, and approval to proceed with a protection appraisal requires prior Region/District Manager approval. Upon receiving authority, the Region/District shall proceed to prepare an appraisal covering this acquisition. The appraisal will be prepared the same as a regular program appraisal, but identified as a "Protection" appraisal.

Appraisals submitted for HQ R/W approval must contain a reference to the date of the approval authorizing the protection acquisition. Any special funding approval must also be noted in the report.

7.13.30.00 Appraisals for Other Agencies

Appraisals prepared for other State or Local Agencies will be comparable in format and documentation to that of a staff appraisal for the Department except where the agreement with the agency specifies a different product.

© 1994-2025 California Department of Transportation. All rights reserved.

7.13.40.00 Staff Litigation Reports

An appraisal for condemnation or inverse litigation testimony shall be of sufficient detail, consistent with legal and professional requirements for format and documentation to present a clear and accurate opinion of value. The staff appraiser will be furnished all data that would be furnished a contract appraiser at the time of the assignment. A Report Analysis Form (Exhibit 07-EX-18) will be prepared by the District originally delegated the type of report or values. Condemnation appraisals are to be completed and submitted for review at least 14 days prior to exchange with opposing counsel and 60 days prior to the trial date. The completed Exhibit 07-EX-18 will be forwarded to the District, the State's Attorney of Record (Caltrans Legal Division), and Right of Way Headquarters Acquisition Section with a recommend or discommend approval for the Staff Report.

If the Legal Division requests preparation of a staff independent appraisal for purposes of inverse litigation, the report will conform to the same standards as a condemnation report, but will show the phrase "Inverse Condemnation Appraisal" on the front cover. A description of the claim will be included.

The following two statements will be included in the Certificate of Appraiser:

A. "This report is pursuant to the request of and for the confidential use by the Legal Division for the purpose of defending the State."
B. "Valuation conclusions are the result of using given legal assumptions for analysis purpose only and in no way imply acceptance or rejection of the validity of the claim to which this report relates."

© 1994-2025 California Department of Transportation. All rights reserved.

7.13.50.00 – UTILITY, RAILROAD AND GOVERNMENTAL OWNERSHIPS

7.13.50.01 Public Utility Property

Property owned in fee by public utilities (including governmental utility agencies, irrigation district/regions, and flood control district/regions) may be subject to special appraisal treatment, including the purchase of replacement land for exchange, where necessary. If the public utility and the State have entered into a master agreement at variance with instructions, the master agreement will prevail. In these cases, the title and date of the master agreement will be noted in the appraisal. Appraisers should first confer with the Utility Branch when assigned public-utility owned parcels to appraise.

7.13.50.02 Fee Land

A. If joint use of fee-owned property is proposed, the land required for highway use will be appraised at the market value of the underlying fee. This envisions the land utilized by the utility facility has a secondary use. For example, an electric tower line traverses a property. The area under the line may still be used for agriculture, parking or residential assemblage.

B. If the State proposes to replace the land in full required by exchange, land value of the fee-owned parcel should be shown as zero (Market Value may be shown in "Remarks"). In "Remarks," describe the location and parcel numbers of the replacement land, if determined.

   When the State is replacing the fee-owned utility right of way with a replacement right of way that is not as wide as the existing utility property being acquired, the valuation approach will be the same as set forth in Section 7.13.60.01 for valuation of railroad operating right of way.

C. If the public utility proposes to acquire the replacement property, the land value should be the market value of the minimum requirements of the replacement property. The basis of the valuation and description of the replacement property must be fully documented in the appraisal.

D. If the public utility proposes to abandon the use of the property without replacement, market value would be paid for the required property

© 1994-2025 California Department of Transportation. All rights reserved.

considering the property clear of the public utility use. Cost of abandonment and removal of improvements may be covered by utility agreement.

E. Public utility corporation yards, shops, office and other proprietary properties will be valued by normal methods.

7.13.50.03 Improvements

Relocation and/or replacement of buildings, equipment, and lines involved in the utility production or transmission will normally be handled by utility agreement. Improvements which are relocated and/or replaced under the utility agreement will be clearly described and assigned a zero value. Improvements which are not included in the utility agreement will be valued using normal appraisal methods, with depreciation and salvage value given full recognition.

7.13.60.00 Railroad Property General Prerequisites

All appraisals of railroad-owned properties are to be submitted to HQ R/W for review and approval, regardless of the monetary amount involved. All appraisals of railroad-operating properties connected with rights of way, depots, station grounds, switching yards, or public team tracks, etc., are specialized and require special handling, including being submitted to HQ R/W for review and approval, regardless of the monetary amount involved.

All railroad properties will be appraised in the full, narrative format at market value of underlying fee and be in compliance with all other sections in the Right of Way Manual for appraisal reporting (except where noted in this section). The Non-Complex Valuation of $10,000 or Less and the Waiver Valuation formats shall not be used. Railroad parcels are not eligible for the one-agent appraise/acquire process.

Proper handling of railroad properties requires a high degree of coordination between numerous departments, including Legal, Structures, Project Development, and Right of Way. The following prerequisites apply:

A. Upon assignment of a railroad property appraisal, the appraiser shall first confer with the Region/District Railroad Agent. The delivery of the Notice of Decision to Appraise letter shall be coordinated through the Region/District Railroad Agent. The Railroad Agent may also facilitate inviting a railroad representative on the inspection of the subject.

© 1994-2025 California Department of Transportation. All rights reserved.

B. Railroad appraisals are to be submitted on a construction project basis including all takings from the railroad ownership in a single appraisal.

C. Due to extraordinary lead time requirements, appraisals of land located within the railroad's transportation corridor must be submitted a minimum of 24 months prior to the project certification date. Single transverse crossings of railroad transportation corridor which do not require substantial relocation of rail facilities are excepted from this requirement and may be submitted one year prior to the certification date. Any other exception to this policy must have prior approval of HQ R/W.

D. The appraisal shall include a general description of the items, e.g., track and signals, which are proposed to be covered by a future construction and maintenance agreement or service contract.

E. The appraisal will include copies of the permanent and temporary easement deed language for property rights being appraised. If it is a Permanent Easement, the Appraiser will use the most recent version of the RW 6-1(Z) Deed form.

F. In all cases, the appraisal will include a clear statement describing the property rights held by the railroad in the property being acquired.

Railroad Property Terms:

Railroad Right of Way: Title, in fee and/or easement, or by adverse possession, to a strip of land between two points, all or a portion of which land is used for railroad purposes that include freight and/or passenger service.

Transportation Corridor: A corridor which includes existing operating and nonoperating railroad property with reasonably probable future transportation uses, including railroad tracks, excess width, utility lines, pipelines, fiber-optic lines, etc. These uses must not be speculative. See Section A.1.d. below.

Operating Railroad Property: The property necessary for operation of rail service over the railroad right of way. The area covered by the nonabandoned tracks plus the minimum additional clearance width as set by the Public Utilities Commission (PUC) and/or the safety standards set by the railroad. It may include switching yards, station sites and their parking lots, and crossing gates and associated equipment. All operating railroad property is located within a transportation corridor.

© 1994-2025 California Department of Transportation. All rights reserved.

Nonoperating Railroad Property: Anything other than operating railroad property; i.e., property which is not required to operate rail service on a right of way. This may include unused right of way where track has been removed, area required for flood protection, grading, land leased to others, administrative properties, etc. It is important to note that railroad property converted to hiking or biking trails might not change the "transportation corridor" status.

Abandoned Railroad Right of Way: A right of way for which a termination of rail services has been approved by the Surface Transportation Board, and all further requirements have been fulfilled.

7.13.60.01 Valuation of Railroad Properties

Takings from railroads may involve complex legal and appraisal problems in determining fair market value for all or a part of the transportation corridor being acquired. Whenever it becomes apparent that unusual problems exist or there is a problem with defining whether the property is located inside or outside of the transportation corridor, the Region/District should confer with the Region/District Railroad Agent, or if necessary, HQ R/W. In most cases, the following guidelines may be used:

A. Appraisals of Railroad-Owned Lands

1. Land within the transportation corridor:

a. Where the State proposes replacement of the required land or facility, the part taken will be assigned a nominal value. A description of the replacement land will be included in "Remarks" and delineated on the Appraisal Maps.

When the State is replacing the transportation corridor needed for the project with a transportation corridor that is not as wide as the existing transportation corridor, generally, only the portion replaced will be assigned a nominal value. For example, assume the existing transportation corridor is 80 feet wide and the State is proposing to convey a 60-foot wide transportation corridor to the railroad company as the replacement transportation corridor. Under this circumstance, the appraisal will show 60 feet of the existing transportation corridor at nominal (because it is being replaced). The remaining width, 20 feet in this example, will then be handled in one of two ways:

© 1994-2025 California Department of Transportation. All rights reserved.

1) If the additional width of the existing transportation corridor is required only because of uneven topography (slopes, etc.), it will also be valued at nominal.

2) Otherwise, the additional width will be appraised at market value.

The appraisal report will show as follows (on Form RW 07-09):

Total area taken – 80 x 500 feet =	40,000 sq ft
Area being replaced – 60 x 500 feet (30,000 sq ft) =	nominal
Area not being replaced – 20 x 500 feet (10,000 sq ft) @ $5.00/sq ft (market value) =	$50,000
Est. Total Value =	$50,000

However, if the existing transportation corridor is 80 feet wide because of an adverse terrain condition (cut or fill) and the replacement transportation corridor is on level ground thus only requiring 60 feet of transportation corridor to replace the utility of the existing transportation corridor, then the total area being acquired of 40,000 sq ft will be assigned a nominal value.

If the railroad company requests that the State acquire and convey a replacement transportation corridor which is wider than their existing transportation corridor to be acquired by the State for the project, then the appraisal will show the extra width at market value to be paid for by the railroad company in the exchange transaction.

© 1994-2025 California Department of Transportation. All rights reserved.

The appraisal report will show as follows (on Form RW 07-09):

Total area to be acquired – 60 x 500 feet =	30,000 sq ft
Replacement transportation corridor – 80 x 500 feet =	40,000 sq ft
Transportation corridor take – 60 x 500 feet (30,000 sq ft) @ nominal	nominal
Replacement area in excess of take – 20 x 500 feet (10,000 sq ft) @ $5.00/sq ft (market value) =	$50,000
Total amount to be paid to the State by railroad company	$50,000

However, if the replacement railroad transportation corridor is 80 feet wide because of adverse terrain condition (cut or fill) and the replacement transportation corridor merely replaces the functional utility of the existing transportation corridor, then the appraisal will show nominal value for an even exchange.

Width with utility will be the criterion. Length and area alone will not.

If the total area of the replacement transportation corridor is different from the total area of the existing transportation corridor to be acquired for the project merely because of the different lengths of the two transportation corridors, the appraisal will be nominal value as stated in the first paragraph of this Section.

b. Where the State does not propose replacement of the required land, the State's requirement shall be identified as either a transverse crossing or a longitudinal taking.

"Transverse Crossing" means any portion of a public road project physically crossing a transportation corridor from one side of the transportation corridor to the other regardless of the angle of the crossing.

© 1994-2025 California Department of Transportation. All rights reserved.

"Longitudinal taking or acquisition" means any taking of any portion of a transportation corridor other than a transverse crossing. However, a transverse crossing may also physically share a portion of the area within a longitudinal taking.

Where the State does not propose replacement of the required land, the longitudinal takings will be appraised at fair market value. An example of this type of taking occurs when the State is acquiring a longitudinal strip of existing transportation corridor and the railroad company is able and willing to continue its operations without any replacement transportation corridor; e.g., the existing transportation corridor is 80 feet wide and the State needs a 20-foot strip for the project and replacement transportation corridor is not required.

c. Where portions of the transportation corridor property may reasonably be converted to nontransportation uses by minor adjustments of facilities without affecting the reasonably probable transportation uses, the longitudinal taking will be appraised at market value, reflecting the costs of conversion.

d. Transverse crossings require special consideration by the appraiser. Existing California law establishes certain principles regarding the valuation of transverse crossings. The leading case in California establishing those principles is City of Oakland v. Schenck (1925) 197 Cal. 456. The main principle is that the public has the right to construct crossings necessitated by a public road project for a nominal consideration when the crossing does not interfere with the railroads' use. Subsequent cases have expanded the "rail use" to a "transportation use." This is why the transportation corridor is defined above. Information about railroad operations and uses should be obtained through the Region/District Railroad Agent.

The transportation corridor may contain operating right of way, nonoperating right of way, excess land, communication corridor, pipeline corridor, Outdoor Advertising Structures, etc. The following are factors to consider in defining the transportation corridor and should be included when testing for uses which are physically possible, legally permissible, financially feasible, and maximally productive.

© 1994-2025 California Department of Transportation. All rights reserved.

1. Determine the area that is subject to PUC and Federal Surface Transportation Board (STB) regulation. Determine what restrictions, if any, the PUC and the STB place on railroad operations within the area subject to PUC and STB jurisdiction. This information should be obtained through the Region/District Railroad Agent.

2. Determine what interest the railroad has in the land, i.e., fee or easement. Determine what deed restrictions have been placed on the railroad's use of that area.

3. Determine whether the railroad has any documented plan for the use and/or development of its property. This information should be obtained through the Region/District Railroad Agent.

4. Railroad properties are not zoned by the Cities and Counties even though county zoning maps might show railroad properties zoned similar to adjacent parcels. This is due to the fact the counties have no authority of use over railroad properties. Railroad properties are under federal government jurisdiction acting through the Surface Transportation Board (STB) and are not accountable to county regulations.

5. Determine which uses are considered to be for legitimate railroad purposes. Some uses may be precluded by existing physical limitations, such as steep terrain. Legitimate railroad uses may include air or subsurface space, which may be reasonably usable for valuable nontransportation uses or for other transportation uses, and these uses are reasonably probable.

   The appraiser must also be familiar with the construction in the manner proposed to determine the impact on the existing and potential uses. The physical impact of construction should be analyzed as to its effect on the reasonable and probable transportation uses.

   Construction details, such as footings and pillars, shall <u>not be valued</u> separately, but shall be included in the analysis of the overall impact of the State's requirement.

© 1994-2025 California Department of Transportation. All rights reserved.

The valuation of permanent easements for transverse crossings is similar to other easement valuations. The value of the easement is the difference in the parcels value from the unencumbered condition and the encumbered condition (Right of Way Manual Section 07.04.09.00 on Permanent Easements). The appraiser must ask the following questions: 1) Does the exercise of the rights being acquired unduly interfere with the railroad's existing use of its transportation corridor for legitimate railroad and other existing transportation purposes? The appraiser must also determine whether the transverse crossing will interfere with a reasonably probable future transportation use.

If it does not and there is no loss of use, utility or capacity in the after condition, the holding in City of Oakland v. Schenck (1925) 197 Cal. 456 applies, and the value is nominal. If the State's project does interfere with any one of the above uses, then two additional questions must be answered: 2) What are the reasonably probable uses that are impacted; and, 3) What is the market value of those impacts as measured by the loss in utility and desirability of the transportation corridor? When the State's transverse crossing interferes with any one of the above-listed uses, the impact will be reflected in the valuation. With respect to transverse crossings, after making the above-listed determinations, including the width of the corridor and the permitted uses, the transverse crossing will be valued by the loss in utility and desirability before and after the imposition of the encumbrance.

Each transverse crossing must be evaluated as described in the preceding paragraph. Merely including the Manual reference or the simple citation of California Case Law in the written appraisal is not sufficient documentation of the valuation. Based on the appraiser's thorough analysis when the value of the transverse crossing is nominal, the loss can be expressed as "nominal" in the equation instead of as a percentage.

© 1994-2025 California Department of Transportation. All rights reserved.

Temporary Construction Easements (TCEs): In the valuation of TCEs, the appraiser must consider whether the easement is an exclusive or nonexclusive (shared use) easement (please refer to Right of Way Manual Section 07.04.08.00 on Temporary Easements). If the temporary easement is nonexclusive, the appraiser must determine the resulting loss of use the railroad has incurred during the easement term. That percentage of loss will be multiplied by the fee unit value, the rate of return to vacant land, and easement's term. It is important to note that the Schenck ruling can be interpreted to include Transverse TCEs if the appraiser's findings are consistent with the "combined use" and nominal loss holding of the ruling.

A "Summary for the Basis of Just Compensation" is required to be included at the end of all appraisal reports. Appraisal reports for railroads are no exception. Where the easement values are determined to be nominal, a statement similar to the following paragraph shall be included in the appraisal to summarize the analysis:

> "The appraiser has ascertained that the Highest and Best Use of the subject property is as a transportation corridor including all legitimate railroad and other transportation purposes. The required transverse crossing will not diminish the market value of the railroads' property or unduly interfere with the railroads' use for legitimate transportation purposes, as ascertained by analysis of the before and after conditions. Therefore, the compensation is nominal, consistent with California state law."

e. Longitudinal takings that cross existing structural transverse easements will be appraised at market value if the existing transverse easement was obtained at nominal value. The effect on land uses or values because of the existing highway-railroad grade separation structure, within the new longitudinal easement area, will not be considered in estimating the market value of the longitudinal taking. The reasoning behind this premise is that if the original transverse crossing easement was obtained at nominal value and provided no benefit to the railroad, the new longitudinal taking should be paid for by the State.

© 1994-2025 California Department of Transportation. All rights reserved.

2. Land outside of the transportation corridor:

   Land considered to be outside of the railroad's present or future transportation corridor will be appraised at market value. Where the property is not capable of independent use or development, the appraiser should consider any potential additional use or utility of the property as assembled to the adjacent properties.

B. Appraisals of Railroad-Owned Improvements

1. Railroad improvements (other than trackage) being acquired without replacements or relocation and lessee-owned improvements on railroad properties will be valued using normal appraisal methods, with depreciation and salvage value given full recognition.

2. Railroad improvements, including trackage, which are to be relocated or replaced under the terms of a construction and maintenance agreement will be clearly described and assigned a zero value.

7.13.70.00 Governmental, Indian, Functionally Replaced Publicly Owned Facilities, and State Land

A. Federal public lands, including national forests, will be appraised at zero land value, unless the Region/District believes land value may become an issue during acquisition. In this event, the land is to be appraised and shown at market value.

B. Federal military reservations and Federal reservoirs, canals, and flood control channels will normally be appraised at zero land value unless the Region/District believes value may become an issue during acquisition. In this event, the land is to be appraised and shown at market value.

C. Federal General Services Administration properties will usually be appraised at market value. There may be circumstances where the property will be conveyed at zero value if the use as a highway is compatible and a benefit to the Federal facility.

D. State School Lands will be appraised at market value.

© 1994-2025 California Department of Transportation. All rights reserved.

E. Proposed acquisitions of public parks will be appraised at replacement cost. Per the Public Park Preservation Act of 1971, the acquiring entity pays sufficient compensation, or land, or both, to enable the operating entity to replace the park land and the facilities thereon. Ballantine's Law Dictionary defines "park" as a "tract of land acquired by a city, town, or other public authority, for ornament, and as a place for the resort of the public for recreation and amusement."

   The substitute land should be of comparable characteristics and of substantially equal size, located in an area that would allow for use by generally the same persons who used the existing park land and facilities. The cost will include the land and the cost of development into park land, including placing of substitute facilities thereon. See Sections 5400 through 5409 of the California Public Resources Code.

F. Indian tribal and allotted lands will normally be conveyed as easement title only and will therefore be appraised at market value less one dollar.

G. All other federal, state, county, special district, school district, and city lands will be appraised at market value except:

   1. If State will purchase the replacement property and functional replacement of improvements is proposed, and the owning agency has waived its right to have an estimate of compensation for the acquisition parcel established by the appraisal process in preference to functional replacement, the subject acquisition parcel will be valued at zero value. It will be necessary that there be compliance with all provisions of 23 CFR 710.509, et seq. (See Acquisition Chapter 8 and Exhibit 08-EX-34 [internal Caltrans link]).

      The parcel numbers of the replacement land will be noted if available and the valuation basis discussed. The market value of the subject land will be included for information in "Remarks."

      It will always be necessary for the Appraisal Branch to supply cost-estimate data for the acquisition property. These data are for inclusion in the submittal to FHWA seeking their concurrence in functional replacement. This will normally occur during the project-development stage of a project.

   2. If acquisition of replacement property by the governmental agencies is proposed, the value of the minimum requirements of

© 1994-2025 California Department of Transportation. All rights reserved.

the proposed replacement property may be used as land value of the subject. The basis of valuation and description of the replacement property will be fully documented in the appraisal. The market value of the subject land will be included for information in "Remarks."

These instructions do not preclude donation, dedication, consent to joint use, or transfer of possession and control, without consideration, from any public agency to the Department for highway purposes.

City streets and county roads closed by freeway agreement will not be valued except as to the underlying fee for adjacent properties, if separate valuation of the underlying fee is necessary. Normally, the underlying fee is valued at $1 because the public has full control over the surface use and the only rights the underlying fee owner has is one of a reversion. See Section 83 of the Streets and Highways Code.

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.00.00 – EXCESS LAND APPRAISALS

7.14.01.00 General

Requests for excess property valuations will originate in the Excess Land Branch or the Acquisition Branch. A copy of the written request will be included in the report, as well as the *Hazardous Material Disclosure Document-Disposal* (ENV-0001-D) (internal Caltrans link) to certify the property can be sold or exchanged.

Excess land Market Value Appraisals, Market Value Determinations (of $10,000 or Less), and Public Sale Estimates may be prepared by a Right of Way Agent, Range B, provided the Agent's qualifications are commensurate with the complexity of the valuation problem.

At the discretion of the Region/District Right of Way Manager (Region/District R/W Mgr.), Market Value Determinations and Public Sale Estimates of market value may be prepared by an agent assigned to the Excess Land Branch. However, the Market Value Determination must be reviewed and recommended for approval by a Senior Right of Way Agent assigned to the Appraisal Branch.

When the same agent prepares the Market Value Determination or Public Sales Estimate and conducts the sale, the RW 07-17A, Certificate of Market Value Determination, must be revised. It should contain the following statement:

> "That I understand I may be assigned as the sales agent for one or more parcels contained in this report, but this has not affected my professional judgment nor influenced my opinion of value."

Only in the instances cited above, may an excess land valuation be prepared by an agent assigned to the Excess Land Branch.

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.01.01 Excess Land Methods of Disposal

The following are commonly used methods of disposal that typically require valuation:

A. Public sale by auction or sealed bid.

B. Private sale by auction or sealed bid between adjoining owners.

C. Direct conveyances.

1. Direct sale to adjoining owner (Findings "A" and "B").

2. To other governmental agencies.

3. To public utilities.

4. By Cooperative Agreements.

5. Pursuant to legislation.

6. To qualifying occupants under certain statutory requirements.

7. Exchange pursuant to a contractual obligation.

D. Transfer of Jurisdiction to other State agencies.

7.14.01.02 Excess Land Valuations

There are three basic types of excess land valuations. They are Market Value Appraisals, Market Value Determinations (of $10,000 or Less), and Public Sale Estimates. A Market Value Appraisal or a Market Value Determination will be prepared for all properties to be sold at other than a public sale. All excess land valuations are based on the same definition of fair market value used in acquisition appraisals. All valuations shall be approved in accordance with the current delegations.

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.02.00 Market Value Appraisals

A Market Value Appraisal will be prepared for all excess parcels unless they are to be sold at public auction or meet the criteria for a Market Value Determination ($10,000 or less). The Market Value Appraisal must consider the full market effect of all damages and benefits, and the economic effect of delay in the use of the property pending completion of construction of the transportation project. "Market value" is based on the value of the parcel at its highest and best use, which may be as assemblage to adjoining property.

There are some specific valuation concepts and considerations associated with Market Value Appraisals of excess land.

A. Excess property with a highest and best use as assemblage to an adjoining property will be appraised at plottage value, i.e., the increment of value created by assemblage. The before and after valuation method will be used. Thus, the adjoining property will first be appraised as a separate parcel and then as assembled with the excess property. Plottage value created by assemblage must then be allocated between the adjoining parcel and the excess parcel, recognizing that both parcels are needed to create plottage value, but taking into consideration what each contributes to that value. The portion of the allocation attributed to the excess parcel is the "market value" of the excess. Note: Where the excess parcel is a minor remnant and an analysis of the adjoining property indicates that the excess parcel is likely to add $5,000 or less to its value, a simple approximation of the value of the adjoining property is sufficient.

   In valuing the assembled parcels, the appraiser must also consider costs of physically joining the excess property with the adjacent property; for example, earthwork necessary to eliminate a substantial grade difference. The appraiser must also take into consideration soft costs such as time, carrying costs, and profit for any development required to realize the plottage value.

   When the excess parcel being valued adjoins more than one ownership, it will be appropriate to indicate the value of the excess parcel as assembled with each of the adjoining ownerships. The value as shown on page 1 of the Excess Land Market Value Sheet (Form RW 07-18) will be that which is the highest value. Lower values considering assemblage to other adjoining ownerships may be indicated by notation on the Excess Parcel Market Value Sheet or attachment thereto.

© 1994-2025 California Department of Transportation. All rights reserved.

In assemblage situations, the appraisal will include a map showing the excess and all adjoining ownerships.

When an adjoining property(s) requests decertification of right of way, the appraised value will not be reduced by the costs of relocating or reconstructing any necessary highway facilities such as freeway fencing, drainage facilities, slopes, landscaping, etc. The buyers of decertified right of way must pay for necessary costs of rearranging utilities, fencing, landscaping, and other improvements which may be affected by the decertification.

B. Utility easements to be conveyed to utility companies will be appraised at market value.

1. If the valuation amount is between $0 and $500, show "nominal" in the amount column.

2. If the valuation amount is between $501 and $2,500, show the actual amount rounded to the nearest $50, or, show "nominal" followed by the amount shown in parentheses.

C. Access rights will be valued at the difference between the values of adjoining property with and without encumbrance of the access rights.

D. Current market data are normally the best comparables. State sale comparables may be used if they meet normal criteria of comparability in time, desirability, market transaction, etc. State sales may best be used to demonstrate damage/benefit relationships between a State sale and contemporary market data in its locality. This relationship may be helpful in applying similar damage/benefit ratios to local market data and the subject parcel.

7.14.02.01 Format, Content, and Standards

A. Market Value Appraisals must follow the general standards of right of way acquisition appraisals.

However, the amount of analysis and degree of documentation should be in proportion to the appraisal problem and valuation involved. Only relevant data should be included. The relevant data should be concisely stated and succinctly analyzed.

© 1994-2025 California Department of Transportation. All rights reserved.

The standard right of way acquisition appraisal format is used except that the Excess Land Appraisal Title Page (RW 07-16), Senior Field Review Certificate – Excess Lands (07-EX-24C), Certificate of Appraiser – Excess Land (RW 07-17), and Excess Land Market Value Sheet (RW 07-18) will replace the standard forms/exhibits used in the acquisition appraisal. The report will also include the excess land appraisal request and Director's Deed Map(s).

The excess land appraisal request from the Excess Land Branch or the Acquisition Branch should include the acquisition cost of the excess.

B. The Uniform Residential Appraisal Report form (URAR) may be used for appraising single family residential properties or 2 to 4-unit multi-residential properties. For further information regarding the use of the URAR form appraisal, see Section 7.07.02.00.

If the URAR form appraisal is used for proposed direct sales of excess pursuant to Government Code Section 54235 et seq. (SB 86, Roberti), the following is to be considered when preparing the appraisal:

- If improvement rehabilitation work is to be completed prior to sale and the parcel is appraised as though the work has been completed, list the rehabilitation work on a separate page attached to the form appraisal.

- The form may also be used to appraise the property before rehabilitation if the Excess Land Sales section requests such an appraisal. The appropriate premise must be indicated in the appraisal request letter from the Excess Land Sales section.

7.14.02.02 Dual Report Requirements

The District may determine that dual Market Value Appraisals are needed for excess land parcels of $500,000 or more that are proposed for direct sale to private parties. The criteria for determining the necessity for dual reports are similar to those related to project appraisals (Section 7.01.07.00) except for issues related to severance damages. The appraisals can be prepared by staff appraisers who shall be at the journey level or higher. Exceptions may be made by the Region/District for noncontroversial direct sales to private entities. The requirement for approval of the dual excess land appraisal remains with Headquarters Right of Way.

© 1994-2025 California Department of Transportation. All rights reserved.

Proposed direct sales of excess property to a public agency do not require a dual appraisal and staff may prepare the single report. However, if the parcel is controversial, or politically sensitive, the Region/District should strongly consider hiring an independent appraiser.

Per Streets and Highways Code, Section 118.1, dual appraisals are required for the sale to a qualified occupant of commercial real property that was acquired by the Department for construction of a state highway but is no longer required because the construction will not take place. This is applicable when the current occupant is actively renting or leasing the real property from the Department, has used and occupied the real property, and has made improvements exceeding $5,000 in value at his or her own expense consistent with the terms of the rental/lease agreement. The Department must obtain at least two independent appraisals of fair market value from qualified appraisers. Reports may be prepared by either qualified staff or contracted fee appraisers. To maintain independence, qualified staff appraisers should report to different supervisors and the appraisals shall be reviewed and recommended for approval by each supervisor. Contracted fee appraisals shall be completed by separate appraisal companies. Dual reports shall be separate and fully independent in analyses and conclusions.

7.14.03.00 Market Value Determination of $10,000 or Less

A Market Value Determination can be substituted for a Market Value Appraisal if the Region/District determines that the latter is unnecessary because the valuation problem is uncomplicated and the fair market value is estimated at $10,000 or less based on a review of available data. The Market Value Determination (MVD) is not an appraisal but is used to document the fair market value of the excess land to be disposed of. Like the Market Value Appraisal, the MVD must consider the full market effect of all damages and benefits, and the economic effect of delay in the use of the property pending completion of construction of the transportation project.

The determination as to which parcel is uncomplicated rests with the Region/District. Among criteria to be considered in making the determination are:

A. There is no serious question as to highest and best use.

B. Adequate market data is available.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Substantial enhancement value to adjoining parcel will not occur with the assemblage of the excess parcel.

An MVD cannot be used for a valuation problem that is considered complicated and/or complex, regardless of value. A preliminary analysis of potential plottage value, as detailed in Item A of Section 7.14.02.00, must be made in order to determine whether or not an MVD is appropriate.

The Market Value Determination may be based on a review of available relevant market data such as: comparable sales and listings already in the Region/District files, comparable sales and listings from multiple-listing services and commercial databases, opinions of Assessor's Office appraisers or real estate brokers, and other data sources. Comparable Data forms and sales location maps are not necessary.

A Market Value Determination can, subject to approval delegations, be approved at the Senior level. They may be prepared and recommended for approval by an agent of less than Associate grade. It is strongly recommended that the Agent preparing the Market Value Determination have a good understanding of appraisal valuation concepts.

When applicable, a Market Value Determination can be used to document the fair market value of excess land in a direct sale transaction to a public agency. In this case, the Market Value Determination would be approved at the Headquarters level consistent with the direct sale to a public agency delegation. (Reminder that all valuations involving direct sale to a public agency are currently delegated to Headquarters, regardless of dollar amount or reporting format.)

The same Agent who is assigned to sell the excess parcel can prepare a Market Value Determination. Refer to 7.14.01.00 for the proper statement to include in RW 07-17A when a single Agent is assigned both activities.

Members or candidates of professional appraisal organizations who are assigned to act in a dual role of Appraiser and Acquisition Agent should check with their organization's Code of Ethics for specific prohibitions and disclosure requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.03.01 Format, Content, and Standards

Market Value Determinations of $10,000 or less may be prepared in the format shown in Memorandum – Market Value Determination (07-EX-16).

1. If the valuation amount is between $0 and $500, show the word "nominal" in the amount column.

   In addition to the 07-EX-16, the report includes a Senior Field Review Certificate – Excess Lands (07-EX-24C), Certificate of Market Value Determination – Excess Land (RW 07-17A), excess land appraisal request, and the Director's Deed Map(s). Photographs and narrative support of the valuation are not required unless HQ R/W approval is requested.

2. If the valuation amount is between $501 and $2,500, show the actual amount; or show "nominal" followed by the amount, rounded to the nearest $50, shown in parenthesis.

   Report requirements are the same as are given under item #1 above.

3. If the valuation amount is between $2,501 and $10,000, show the actual amount rounded to the nearest $50.

   In addition to the 07-EX-16 and the report requirements given under item #1 above, the Market Value Determination will ordinarily require a brief valuation analysis, and the content can be similar to that required for a Public Sales Estimate as indicated in 7.14.04.02 and 7.14.04.03.

   Any number of parcels on a single project with a like use can be valued on the same form.

   The excess land appraisal request from the Excess Land Branch or the Acquisition Branch should include the acquisition cost of the excess.

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.04.00 Public Sale Estimates

A Public Sale Estimate will be prepared for all excess parcels to be sold by public sale, except where a Market Value Appraisal or Market Value Determination has already been prepared. It is an estimate of current market value, in brief written form, containing the minimum reasonable parcel description, value analysis and supporting data. While the intention is to complete the estimate as rapidly as possible, it is also important that the appraiser strive for a reasonable level of quality and accuracy.

It is intended to provide the Excess Land Branch with an estimate of market value in the least possible time. The estimate will be used as the basis for setting the minimum bid on property to be offered at public sale.

This estimate of market value is to consider the parcel at its highest and best use as a separate parcel. It must consider present zoning as it affects the value for such use, along with the potential for rezoning.

The full market effect of all damages and benefits including noncompensable damages and general benefits must be considered. Also consider the economic effect of delay in the use of the property pending completion of construction of the transportation project.

7.14.04.01 Format

The Public Sale Estimate report should usually be prepared in the format of Exhibit 07-EX-15 and have map(s) attached. The report may be typed, but a legibly written, reproducible estimate is acceptable.

7.14.04.02 Content

The essential items to appear on the report page(s) are:

- Excess property identification (Region/District, County, Route and Director's Deed number, Excess Land parcel number(s) and property address).
- Zoning of the property.
- Highest and Best Use of the property and comment in support thereof.
- A brief narrative description of the subject (including improvements), and its neighborhood setting.

© 1994-2025 California Department of Transportation. All rights reserved.

- A description of easements or other legal encumbrances.
- A brief statement about the supporting data used.
- A brief analysis.
- Estimate of market value, including separate land and improvement values if applicable.
- Date of value.
- Estimator's name, signature and date.
- Senior Appraiser's name, signature and date.
- Approving Right of Way Agent's name, signature, title and date.

7.14.04.03 Examples of Supporting Data

- Primary
  a. Comparable sale(s).
  b. Comparable listing(s).
- Secondary
  a. Market value opinion(s) from:
  b. County assessor or staff appraisal members.
  c. Real estate brokers or sales persons.
  d. Real estate developers.
  e. Real estate buyers and sellers.
  f. Real estate appraisers, public or private.
  g. Other people with credible knowledge about real estate values relevant to the subject.
- State excess land sales

© 1994-2025 California Department of Transportation. All rights reserved.

7.14.05.00 Review of Request for Proposal Submittals (RFP)

Proposal Forms received as the result of a Request for Proposals, in the course of sale of residential properties under Government Code Sections 54235 et seq., will be reviewed by the Region/District Appraisal Section. This is to validate the reasonableness of the offers received.

Upon receipt of written request from the Excess Land Sales Section, the Appraisal Branch's responsibility will be to review the Proposal Form to verify that the estimated operating expenses appear appropriate to the particular property involved. That is, fixed and variable operating expenses and reserves for replacements will be reviewed to see that they conform to local practice experience, market expectations and reasonable anticipated costs and economic life standards.

In addition, proposed rehabilitation work and its estimated cost as contained in the proposal should be reviewed to determine whether the work and cost appear appropriate. The review will be commensurate with the extent of the information furnished. Excess Land Sales is responsible for furnishing additional data for consideration if any is required.

The review memorandum should be signed by the Appraisal Manager and a copy retained in the Appraisal files.

© 1994-2025 California Department of Transportation. All rights reserved.

7.15.00.00 – AIRSPACE ESTIMATES, BID LEASE VALUATIONS AND APPRAISALS

7.15.01.00 General

Airspace appraisers should familiarize themselves with the Airspace Chapter and the Standard Airspace Development Lease to better understand the procedures and terms used by the Department.

Estimates, valuations and appraisals of airspace parcels will be made at the written request of the Region/District Airspace Branch. A copy of the written request will accompany the estimate or appraisal. Requests will provide necessary maps, plans and profiles of the freeway, the airspace parcel numbers and any available information pertinent to the valuation. The property (rights) to be appraised and any special conditions that would affect value must be defined.

The appraiser should include any collateral data useful in marketing the area to be leased. Whenever possible, the appraiser and the airspace agent will discuss the site prior to the start of the appraisal. There must be effective coordination between the Airspace Branch and Appraisal Branch as well as a mutual understanding of the functioning of each other's Branches. If special restrictions have a significant effect on value, the necessity for the restrictions should be reviewed and discussed between the appraiser and the seniors of the Appraisal and Airspace Branches.

The Airspace Branch will furnish, on an annual basis, by June 1 the projected airspace appraisals needed for the next fiscal year. This list will identify the lease areas to be appraised and the dates by which the appraisals are needed. It will form the priority basis for preparation of airspace appraisals. If the Airspace Branch must change this schedule, a written request for change and/or an updated schedule is to be furnished to the Appraisal Branch. Updates should be requested well in advance of the need.

The appraiser should consider all legal potential and proposed uses for the parcel. A proposed use should be discussed in the Report even if the appraiser subsequently decides that this use does not represent highest and best use. Each analysis must be thorough and complete so the reader/reviewer is clearly and logically led to the appraiser's conclusion. Among other questions, the analysis should answer those such as:

© 1994-2025 California Department of Transportation. All rights reserved.

A. Can the subject airspace parcel be legally developed as an independent parcel?

   1) Is it physically possible to develop it independently?

   2) What can it be used for as an independent parcel?

   3) What markets exist for the most profitable anticipated uses?

B. Can it be joined for use with an adjacent parcel?

   1) How are the adjacent parcels developed?

   2) Can the airspace parcel be used through joinder?

   3) Does it enhance/improve the use of the adjoining property?

C. The conclusion:

   1) Which will yield the highest net return, joinder or use as an independent site?

   2) What is the highest and best use and the reasoning leading to this conclusion?

Experienced associate grade appraisers should be assigned the preparation of airspace appraisals because of their specialized nature. The assignment should be for at least three years. Region/District airspace appraisers should meet periodically to exchange data and ideas. The need for such meetings should be expressed to HQ RW Appraisal Branch which will coordinate them. Free interchange of data and ideas between the Regions/Districts at all times is strongly encouraged.

Each Region/District should routinely transmit material which might be informative or useful to all Region/District Appraisal Branches. This would include market data indicating the effect of typical lease areas, impacts of physical or legal encumbrances, and copies of feasibilities studies.

© 1994-2025 California Department of Transportation. All rights reserved.

7.15.02.00 Estimates

Estimates may be requested to provide the Airspace Branch with a figure for preliminary discussions with potential users or for minimum value sites. A regular airspace appraisal can be made in lieu of an estimate if deemed necessary by either the Airspace or Appraisal Branch.

Estimates should be minimum-type valuations similar to letter-type appraisals. Only a minimum amount of comparable data to support the conclusions of value is necessary.

The estimate will consider all factors directly or indirectly affecting the utility of the rights to be leased. Full recognition will be given to any enhancement of real estate values in the area because of the location of the freeway. A statement of highest and best use will be made with supporting data and rationale. The appraiser should consider any possibility of plotting the airspace parcel with a State excess land parcel or a privately-owned parcel in the immediate area to determine the highest and best use.

A completed Form RW 07-19 will be accompanied by a vicinity and parcel map.

Airspace estimates will be Region/District approved and it will not be necessary to send copies to Division.

7.15.03.00 Appraisals – General

The parcel may have to be appraised based on various uses or premises; for example, as a separate parcel, in conjunction with uses of adjacent or nearby properties, etc. The primary appraisal will be the fair market value of the parcel based on its highest and best use, with consideration to the restrictions outlined in Sections 15.07.09.03 and 15.04.01.00 of the Right of Way Manual. Any other requested values based on uses or premises that do not represent the highest and best use of the parcel will be shown separately in the Appraisal Report as alternate appraisals on separate Airspace Parcel Appraisal pages Form RW 07-21 labeled as "Alternate Appraisals." When alternate appraisals are included, the primary appraisal as described above will be labeled "Primary Appraisal."

The appraiser, after deciding on the highest and best use of the parcel and before proceeding with the appraisal, should consult with the Airspace Branch to advise them of the conclusion. Once the Airspace Branch knows

© 1994-2025 California Department of Transportation. All rights reserved.

the highest and best use, they may see a need for an alternate appraisal based on some other premise or use.

For example, if the highest and best use is concluded as joinder with the adjacent ownership, the Airspace Branch may also need an alternate valuation as an independent parcel.

By holding these consultations during the initial appraisal process, any need for alternate appraisals can be identified at an early stage so the alternate can initially be done and included in the Appraisal Report.

7.15.03.01 Format

The format for airspace appraisals will generally be the same as for acquisition appraisals. However, airspace appraisals use Form RW 07-20 for the Appraisal Title Page and Form RW 07-21 in lieu of Form RW 07-09, and use Exhibit 07-EX-26 for the Certificate of Appraiser. If the appraisal contains more than one parcel, include a summary page listing the parcels and the appraised values.

7.15.03.02 Standards and Methods

Regular market value airspace appraisals will be required for any airspace parcel that will be leased on a direct basis without calling for competitive bids, and those situations not meeting the specified criteria for bid lease valuations.

All airspace appraisals shall be performed to meet the same quality standards as used for acquisition appraisal reports with respect to analysis, documentation, market data, and market data analysis. Only one appraisal is required, even for airspace parcels to be directly negotiated.

Methods will be the same as those applied in appraising any right of way acquisition parcel, except that consideration should be given to all of the factors that may limit or enhance its utility because of the existence of the freeway improvement located on or near the parcel. Full recognition will be given to any enhancement of real estate values in the area because of the location of the freeway.

© 1994-2025 California Department of Transportation. All rights reserved.

7.15.03.03 Preparation

The appraiser must thoroughly discuss and analyze the effect that the freeway improvement has on the use of the parcel, with special emphasis on the restrictions imposed by the following jurisdictions:

- The Department of Transportation
- The State Fire Marshal (standard requirements are on file in the Region/District offices)
- 23 CFR, Section 710.405
- Local planning and building departments
- Any other agencies having controls

The appraiser should look closely at the location of the freeway structure across the parcel. If the viaduct structure were confined to one side of the parcel, it could have a different effect on the overall use of the parcel than if the structure traversed the center of the parcel only, leaving small strips of open land on each side.

Comparable data directly applicable to the physical condition of the subject may be difficult to find in the market. However, the appraiser must use what market data is available and make the necessary adjustments. The appraiser may use lease data in an income approach for the purpose of estimating the value of the parcel. Lease data from existing airspace leases may be useful if the leases were recently determined through a bid-lease.

There should be a thorough analysis of adjustments with market-data support if possible. The use of dollar or percentage adjustments follows the same requirements as for acquisition appraisals. The appraiser must fully support the conclusion of value the same as is presently required in any appraisal of acquisition parcels.

All airspace appraisals will be reviewed for approval by the Division. Only the primary appraisal based on the highest and best use of the airspace parcel will be approved for lease purposes.

© 1994-2025 California Department of Transportation. All rights reserved.

Alternate appraisals will be reviewed "as to value only" based on the premise used in the Report. Any subsequent use of the alternate appraisal for lease purposes will require prior administrative authorization by the Division Airspace Development Branch.

An Airspace Appraisal Summary Form RW 07-22 will be prepared and submitted to the Division with each parcel appraisal.

The summary will be given to the Airspace Advisory Committee of the California Transportation Commission for their review. The function of the Committee is to review proposed airspace leases and make recommendations to the Transportation Commission regarding acceptability. Form RW 07-22 shows the format to be used. For consistency purposes, please adhere to the format shown.

The summary should be brief, but long enough to adequately cover the important aspects of the appraisal. Under "Brief Property Description," include a description of the freeway facility that is located on or over the airspace parcel.

7.15.04.00 Bid Lease Valuations

An airspace bid lease valuation is used for establishing minimum rental rates for leasing airspace parcels on the basis of competitive bids. They will be approved according to the current delegations.

Each valuation will contain a range of value and will be prepared upon written request from the Airspace Branch.

Range of Value is defined for this purpose as the range of most probable sales price if the rights being valued were to be sold on the open market. The range should be based on the typical low and high prices paid for similar properties in the market adjusted for comparability.

Because the airspace rights so valued will be exposed to the market through the bid process, documentation and support need not be as extensive as in the standard airspace appraisal which estimates fair market value. Nevertheless, at least a reasonable amount of documentation and support must be presented. However, every bid lease valuation will contain a thorough, complete statement and analysis of the highest and best use of the rights under study. This analysis will be as comprehensive and definitive as one required for an airspace market value appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

7.15.05.00 Rental Rate Appraisals

In order to streamline the airspace appraisal process, for those qualifying nondevelopmental uses on directly negotiated airspace leases, Regions/Districts may use an Airspace Rental Rate Appraisal process in lieu of a regular airspace appraisal report.

The purpose of this airspace appraisal category is to facilitate the appraisal process for numerous noncomplex and noncontroversial airspace parcels. Appraisals responds directly to a request for a specific use rental rate by the Region/District Airspace Manager. In this specific case, the appraiser is not asked or required to perform an independent highest and best use analysis or resulting land valuation.

Generally, Airspace rental rate appraisals can be used for vacant:

1) Landlocked Parcels

2) Minimum-sized or oddly-shaped parcels that have little value or utility

3) Park-and-ride lots

4) Public parks (Marler-Johnson)

5) Parcels leased to bona fide public agencies

6) Parking and/or storage uses when there are ample comparable rents available

Rental rate appraisals will not be used for the following:

1) If comparable rents are scarce or nonexistent and rental value is not easily determined

2) If the proposed use is controversial or complex

3) If the parcel is to be leased for plottage to an adjoining owner to meet minimum use requirements or intensify the development of such a privately-owned parcel

Qualifying Rental Rate Appraisals will be Region/District approved in accordance with current Delegations, with a report copy forwarded to HQ RW. Regular full-market value appraisals are still required for all other

© 1994-2025 California Department of Transportation. All rights reserved.

proposed uses that will be leased on a direct basis without calling for competitive bids.

The decision to request a full appraisal or Airspace Rental Rate Appraisal is entirely that of the Region/District Airspace Manager.

The Region/District Airspace Manager also assumes exclusive responsibility for specifying the highest and best use/specific use to be assumed by the appraiser, and for providing all proposed rental information for use and reliance by the Appraisal Branch.

The written airspace request for a rental rate appraisal must clearly describe the proposed use, term and renewal options, any special conditions or credits, and any limitations to be placed on the parcel by the Department. The rental rate appraisal will therefore not contain a highest and best use determination, but will rely strictly on the use and parcel data information provided by the Region/District Airspace Manager. However, the Region/District Airspace Manager should consider any input from the Appraisal Branch, including whether comparables are available that provide a good indication of a market rental rate.

The rental rate appraisal will conclude a specific market lease rate as appropriate to the airspace parcel's attributes, limitations and benefits, and its proposed rental use and lease terms. In extenuating circumstances involving marginal market data only, the appraisal may as an exception include a lease rate range as supported by the limited market data.

The rental rate appraisal format will follow regular airspace appraisal standards and methodology. As with any appraisal, the amount of analysis and degree of documentation should be in proportion to the appraisal problem and valuation involved. Since the report will not include the appraiser's independent highest and best use analysis, but rather rely on the use proposed by the Airspace Manager, the appraisal will include the limiting conditions on the new Airspace Parcel Appraisal Form RW 07-21 in conformance with Uniform Standards of Professional Appraisal Practice, S.R. 2-2. The Airspace Advisory Committee does not review Rental Rate Appraisal Reports, and Summary Form RW 07-22 will not be included in these reports.

© 1994-2025 California Department of Transportation. All rights reserved.

7.16.00.00 – RENT DETERMINATION

7.16.01.00 General

A fair market rent determination is an estimate of the amount of rent which a parcel would command in the open market, if offered under the terms and conditions typical of the market for similar properties. The fair rent for property for which there is no relevant market data shall be estimated by any reasonable method that is fair and equitable. The justification for use of such method and a full explanation of the rationale on which the method is based will be set forth. The following process will be followed for both residential and nonresidential fair market rent determinations.

Property Management may prepare residential fair market rent determinations in accordance with Right of Way Manual Sections 11.04.02.00, 11.05.01.00, and 11.06.02.00.

The Appraisal Branch prepares, reviews, and approves fair market rent determinations for all nonresidential properties except as noted in R/W Manual Section 11.05.00.00.

This service is provided by the Appraisal Branch upon written request from Property Management. These requests should be scheduled so as to give Appraisals as much lead time as possible, and will include the following information:

- A map of the property.
- Parcel number, county, route, post mile (P.M.), and property address.
- Improvements that belong to the tenant and should be excluded from consideration.
- Special items on the property, such as machinery or equipment. An inventory should be available if needed.
- Whether construction of improvements on the property will be permitted.
- Term of the proposed lease and estimated length of time property will be available for rent.

Rent determinations will be updated upon written request from Property Management.

© 1994-2025 California Department of Transportation. All rights reserved.

7.16.02.00 Content

Fair market rent shall be based on the most reasonable highest and best use, taking into consideration the term of the State's proposed lease. Other appropriate market-related factors shall also be considered in the rent determination.

The rent determination will be a specific estimated fair market rent. Rent determinations will be rounded to the nearest $10. (Example: A fair market rent estimate of $545 will be rounded to $550.)

The rent determination will be based on current rents being paid in the area for comparable properties. An analysis of comparable rentals and other market data supporting and leading to the appraiser's conclusion of fair market rent must be included in the report. The amount of analysis, number of comparables used, and the degree of documentation required should be in proportion to the value of the property to be rented.

Property Management will use the rent determination as a benchmark from which to reach the actual rental rate. The actual rental rate will be concluded after any special adjustments which may be appropriate to Property Management's operation. Therefore, it is important that the appraiser clearly indicate those items for which adjustments were made in arriving at the appraiser's estimate of fair market rent.

Individual Rental Comparable Data Sheets shall be used, and should include the following information:

- Property identification
- Property description
- Condition and effective age of improvements, if any
- Present use and highest and best use
- Rental rate, including escalation rate, if any
- Date rental rate established
- Terms, including who pays utilities, taxes, and insurance and any other recurring expenses
- Period of lease
- Names of data sources
- Names of owner and tenant, if pertinent

© 1994-2025 California Department of Transportation. All rights reserved.

All fair market rent determinations will include parcel maps. Improved properties will include pictures showing the improvements. In addition, an index map, comparable data map, and comparable data pictures are required for all rent determinations where fair market rent is $5,000 per month or more. These latter three items are optional in Region/District approved rent determinations (where fair market rent is less than $5,000 per month).

Rent determinations requiring HQ R/W approval will be submitted with a transmittal page showing county and route, parcel number, and date of value. It will include the required signed recommendations for approval.

7.16.03.00 Review and Approval Process

The review and approval process is discussed in Sections 7.01.15.00, 7.01.16.00, and 7.01.17.00. The Senior who reviews and recommends the fair market rent determination cannot execute the resulting lease on the same parcel.

7.16.04.00 Special Circumstances

Occasionally, there will be requests for rent determinations for specific uses. In many cases, the property is already rented for some use consistent with constraints the Department has imposed. This existing use may not be the most reasonable highest and best use. If the appraiser's analysis indicates there is a significant difference between the existing use and the most reasonable highest and best use, this should be pointed out in the report. Both a statement of the most reasonable highest and best use and an estimate of the fair market rent under this use will be included. This analysis will be in addition to the rent determination for the specific use as requested.

An example of this is a parcel which has a highest and best use as a parking lot. For special reasons, it may not be feasible or practical to raze the existing improvements and put it to this use. A request for a rental determination on the parcel as improved is appropriate, provided the most reasonable highest and best use is cited and the estimated fair market rent, on this basis, is also included.

© 1994-2025 California Department of Transportation. All rights reserved.

7.16.05.00 Nominal Value Nonresidential Rentals

Many properties cannot be rented for more than nominal rental rates because of size, irregular shape, and/or location. Nominal rental for this purpose is defined as $2,400 per year ($200 per month) or less.

At the Region/District's option, the Appraisal Branch staff or the Property Management Branch staff may be used for rent determinations on nominal value nonresidential rentals.

In these cases, only an 11-EX-53 appraisal is required. It should identify and describe the parcel, and summarize the data and analysis that leads to the appraiser's conclusion of fair market rent. The nominal rental conclusion should be stated as a specific rental amount. A map of the appraised property is required (8½" x 11" print is sufficient); photographs are recommended. See 11.05.02.00.

The rent determination should include a signed statement that the appraiser has personally viewed and inspected the parcel. The determination should also be signed by the function's Senior.

© 1994-2025 California Department of Transportation. All rights reserved.

7.17.00.00 – BUSINESS GOODWILL APPRAISALS

7.17.01.00 Statute – Compensation for Loss of Goodwill

Code of Civil Procedure, Title 7, Eminent Domain Law, Chapter 9, Article 6, Compensation for Loss of Goodwill, Sections 1263.510, .520, and .530 provide the basis for compensating the owner of a business for the loss of goodwill. These sections should be reviewed by the appraiser prior to completing any appraisal involving a commercial property. See the reference volume.

7.17.02.00 Interpretation of the Eminent Domain Law, Court Cases, and Legal Issues

The courts are continuing to interpret the statutes on loss of goodwill. The first major court ruling by the State Supreme Court was the Department of Transportation v. Muller. This case has established that the increased cost of doing business at the replacement site is a compensable cost.

The Regions/Districts should consult with HQ R/W concerning any problems with interpretation of the compensability for loss of goodwill. Requests for legal opinions must be directed through HQ R/W for action by Sacramento Legal.

7.17.03.00 Burden of Proof

The law provides that a business owner shall be compensated for the loss of goodwill if the owner proves that the loss is caused by the State's taking of the property and that the loss cannot reasonably be prevented by a relocation of the business or by taking steps and adopting procedures that a reasonably prudent person would take and adopt to preserve the goodwill. The business owner has the burden of proof for loss of goodwill.

7.17.04.00 Notification Letter to the Business Owner (Form RW 07-30)

At the initiation of each staff real estate appraisal of a parcel occupied by one or more businesses, the appraiser will provide each business owner a written notification of the owner's right to claim a loss of business goodwill using Notification of Right to Claim Loss of Business Goodwill (RW 07-30). It is highly recommended that the RW 07-30 be sent to the business owner by certified mail, with return receipt requested. Form RW 07-30 includes a

© 1994-2025 California Department of Transportation. All rights reserved.

questionnaire asking for information about the business for the owner to return when claiming a loss of goodwill.

The RW 07-30 will set a reasonable time limit for the owner to respond. No follow-up requests by the appraiser are required. The appraiser must not delay the initiation and completion of the real estate appraisal while waiting for the business owner to respond. If the appraiser does not have the business owner's name and contact information at the time the real estate appraisal report is written (such as when outdoor advertising signs are present), it will be the acquisition agent's responsibility to send the notification letter as soon as the name and contact information become available.

The date the notification letter is sent to the business owner and any responses from the owner, written or oral, must be documented in the parcel diary. The section of the parcel diary with entries relating to business goodwill shall subsequently be copied and attached to the parcel diary for the goodwill appraisal or a separate goodwill diary can be initiated.

If the owner does not submit a claim or makes a claim but does not furnish copies of State Income Tax returns, as required by California Code of Civil Procedure Section 1263.520, the appraiser must so document in the parcel diary and the real estate report. The appraiser must still make a preliminary analysis and tentative conclusion as to whether or not the business owner will be able to relocate without a loss. The research and analysis for the tentative conclusion will be included in a separate section of the staff real estate appraisal or in the addendum to the report. The research and analysis will include, as a minimum, a statement of the observed availability of replacement sites.

7.17.05.00 Timing for the Preparation and Completion of the Goodwill Appraisal

It will be prepared as soon as possible after receiving the claim from the owner with copies of the owner's tax returns and any other supporting financial data that is furnished. To ensure confidentiality, only HQ R/W copy of the appraisal report will contain the owner's income tax returns. All goodwill appraisals will be in separate reports and not part of the real estate appraisal report.

The appraiser will not complete the goodwill valuation appraisal if the owner does not furnish copies of the State Income Tax returns. The business' "in-house" financial records do not constitute acceptable income and expense information. The appraiser will make a statement in the real estate

© 1994-2025 California Department of Transportation. All rights reserved.

appraisal report that since the owner has not furnished income tax returns, there is insufficient data to estimate whether or not the business possesses goodwill value in the before condition. Therefore, any loss of goodwill is indeterminable.

7.17.06.00 The Goodwill Appraisal Report

The report may contain more than one business under the same ownership. Each business will be valued independently in the before condition and the after condition. If the business goodwill in the before condition is $0.00 or a negative number, it is not necessary to calculate an after condition value. The report will be prepared by or under the direct supervision of, and will be signed by, a Right of Way Agent of at least Associate grade. The duties and responsibilities of the appraisers and reviewers are the same as those for real estate appraisals.

Upon receipt of the goodwill questionnaire from the grantor, if the Senior Right of Way Agent determines it is obvious that there is no goodwill in the before condition (e.g., negative net income for the previous three years) as shown from the loss of business goodwill claim and tax returns for the previous five years, the Region/District has the option of utilizing a memorandum appraisal format or a very succinct narrative appraisal to document these conclusions. The memorandum is to give a full explanation of the valuation and will contain sufficient supporting documentation.

7.17.07.00 Parcel Diary

The appraiser will initiate a parcel diary, Form RW 07-23, for each goodwill parcel appraisal. A copy of the diary shall be included in the report forwarded to HQ R/W.

7.17.08.00 Cross-referencing the Goodwill and Real Estate Appraisal Reports

The report for the goodwill appraisal will carry the same basic number as the real estate report with a subreference of the letter "G." For example, if the real estate report is AR-7, the goodwill report on a business located on the parcel will be numbered AR-7G1. Any subsequent reports made on other businesses located on properties appraised in AR-7 will carry AR numbers running consecutively, e.g., AR-7G2, AR-7G3, AR-7G4, etc.

© 1994-2025 California Department of Transportation. All rights reserved.

A goodwill appraisal which supersedes a prior valuation of the same business will be given a new AR designation. The new report will cross reference the prior appraisal(s). For example, "AR-7G8: This appraisal supersedes AR-7G3, approved (date)."

7.17.09.00 Parcel Numbering

The parcel numbers for goodwill parcels will be the same as the parcel number for the real estate on which the business is located with a subreference of G-1, G-2, G-3, etc., i.e., 12345 and 12345G-1.

7.17.10.00 Review and Approval Process

All staff and in-lieu of staff goodwill appraisals will be reviewed for approval by Headquarters Right of Way.

7.17.11.00 Project Influence

Goodwill valuations shall not include any increase or decrease in the value of the business that is attributable to the project. See Section 1263.330 of the Eminent Domain Law.

7.17.12.00 Appraisal Report Components and Sequence

- Appraisal Title Page – Business Goodwill Valuation (RW 07-24)
- Parcel Summary Page – Goodwill (RW 07-25)
- Business Goodwill Valuation – Senior Field Review Certificate (RW 07-26)
- Business Goodwill Valuation – Certificate of Appraiser (RW 07-27)
- Appraisal – Business Goodwill Valuation (RW 07-28)
- Business Sales Data Page – Goodwill (RW 07-29)
- Business Comparable Data Page – Goodwill (RW 07-31)
- Purpose of Appraisal

© 1994-2025 California Department of Transportation. All rights reserved.

- Date of Value

  The date of value shall be the date funds are deposited by the State into the grantor's escrow account unless the court otherwise stipulates the date. In the case of pre-condemnation, the date of value is the date of possession.

- Description of Business

  In addition to a comprehensive description of the business operation, include the name of business and the owner(s), location, history of the business ownership, areas of land and description of improvements used (owned or leased) by the business, lease/rental amounts and terms including expenses paid by tenant, geographical area served by the business, hazardous materials used by the business and hazardous waste observed.

- Recent sales of the subject business

  Each sale of the subject business during the last five years preceding the appraisal will be explained in detail. Use a separate sales data page for each sale. The most recent sale during the period shall be verified by the appraiser with both seller and buyer, if possible. If not verified with both parties, efforts to do so must be described. A complete verification of the most recent sale will be made including sale price, terms, and a breakout of the amount paid for tangible and intangible assets such as machinery, equipment, liquor licenses, and goodwill. Any difference between the appraised value of goodwill and the price paid for goodwill must be explained.

- Availability of suitable sites for relocation

  Include a detailed study of the availability or lack of availability of suitable replacement sites for the business. If the business has already relocated prior to the date of the appraisal, the analysis will state whether or not other suitable sites were available at the time of relocation and, if utilized, would have resulted in a lesser loss or no loss.

- Valuation

  The valuation section shall include a comprehensive analysis of the appropriate approaches to value and the conclusion of the goodwill value at both the existing location and the new or proposed location. This

© 1994-2025 California Department of Transportation. All rights reserved.

also applies to businesses affected by partial acquisitions that may continue operations on the remainder.

- Reconciliation of valuation approaches and final conclusion

  Where two or more approaches to value are used, the appraisal will reconcile the separate indications of value derived and include a reasonable explanation for the final conclusions of business goodwill. The final conclusion will state whether or not the business will suffer a loss of goodwill as a result of the taking. This will usually be a comparison of the goodwill valuation of the business at the old location and at the new or proposed location (before and after).

- List and valuation of tangible and intangible assets
- Comparable data pages and maps
- Index maps (if available), subject map, relocation site map
- Parcel diary
- Addendum

The addendum should include supporting data such as financial statements, copies of the State income tax returns, relocation site studies, market analysis studies, questionnaire supplied by business owners, etc.

7.17.13.00 Goodwill Valuation

The first step is to estimate the value of goodwill, if any, of the business at the location being taken or affected by the project.

The premises for the goodwill appraisal should be consistent with the premises used in the real estate appraisal. Examples of premises that are ordinarily expected to be consistent are highest and best use, economic rent, and value of business improvements such as fixtures, machinery and equipment. Any differences in these and other important elements must be explained in the report.

Normally, the value of the goodwill is not estimated directly but is derived by a residual process. The first step is to estimate the value of the total business enterprise and then subtract the value of the separately valued assets of the business, both tangible and marketable intangible, from the total value. The

© 1994-2025 California Department of Transportation. All rights reserved.

residual value, if any, represents the intangible asset of goodwill. The following is a summary of this residual process:

Total value of business
(-) less value of tangible assets owned by business
(-) less value of marketable intangible assets owned by the business
Value of goodwill (intangible asset)

(Intangible marketable assets are those which can be sold off separately from the business, such as a liquor license.)

If the analysis indicates no goodwill value, the appraisal process ends and the report is completed. If no goodwill value exists in the before condition, there cannot be a loss of goodwill.

If the analysis results in a goodwill value, the appraiser must proceed with the appraisal process. The next step is to repeat the above process for the business after project construction in the manner proposed (and if the business required relocation), to determine the value of the goodwill at the new or proposed location. If the business has already relocated at the time of the appraisal, the business operation must be analyzed by repeating the valuation process outlined above to determine the value of the goodwill at the new location.

The compensable loss is the amount, if any, that the value in the before condition exceeds the value in the after condition.

Example:

Estimated value of goodwill before	$15,000
Estimated value of goodwill after	-$10,000
Estimated compensable loss of goodwill	$ 5,000

If the business has not been relocated at the time of the appraisal, the appraiser and the relocation agent will make a comprehensive study regarding the availability of either existing suitable sites or those sites that are expected to become available within a reasonable period of time to which the business can relocate. A suitable site is considered to be one which a prudent business owner would select in attempting to preserve goodwill to the greatest extent possible. The report will contain a section detailing the appraiser's study of the availability or lack of availability of suitable replacement sites. If suitable sites are or will become available, the appraiser will value the goodwill in the after condition as described above as if the

© 1994-2025 California Department of Transportation. All rights reserved.

business were relocated to a property which would be selected by a prudent business owner seeking to preserve or enhance the value of the business goodwill.

This is in keeping with the Eminent Domain Law (CCP Section 1263.510).

If the study shows that there are no available suitable relocation sites, and none can be expected within a reasonable period of time, then the estimated business goodwill value in the before condition will be the loss of goodwill shown in the report. In other words, there is a total loss of goodwill value to the business. If these circumstances exist, the appraiser must fully document, in detail, the reasons why the business is unable to relocate.

If a business is highly complex or specialized it may be necessary or advisable to contract with consultants for appropriate market analyses and/or relocation studies.

7.17.14.00 Business Valuation Methods

There are many methods by which the value of a business and its goodwill can be estimated. The following are three methods commonly used for business valuation:

A. Market Approach

The most common market approach is the utilization of income multipliers derived from the market transactions of similar businesses. For example, retail store businesses might sell for two times annual gross income. Particular market multipliers may be based on income or sales and vary widely, depending on the type of business.

B. Capitalization of Excess Earnings

This is an income approach where excess earnings are calculated by subtracting from business net profit, a return on and of depreciable tangible assets and a return on marketable intangible assets. The return of a depreciable tangible asset is made over the remaining economic life of the asset. If marketable intangible assets have a limited life, then it will be necessary to also subtract a return of the asset over its remaining economic life. The excess earnings of a business, if any, are then capitalized at an appropriate rate to estimate the value of the goodwill.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Discounted Cash-Flow Analysis

This approach is focused on the projected earnings and expenses of a business over a period of time (usually the anticipated investment period). Value of goodwill is the present value of the projected net cash flow (either before or after taxes) for a period of years plus any reversion value of the goodwill. This method takes into account the effects of changes in the net return each year.

These are brief descriptions of the more commonly used valuation methods. For a more detailed explanation of the various valuation methods, the appraiser must refer to appraisal textbooks or other instructional materials on business valuations.

7.17.15.00 Analyzing Financial Statements and State Income Tax Returns

In processing the various business valuation methods, such as the "capitalization of excess earnings," it will be necessary to analyze financial statements and State income tax returns. As part of this process, the appraiser must reconstruct the income and expenses reported to arrive at a net income applicable to the value of goodwill.

The following list includes examples of items that must be considered in reconstructing the income and expenses reported:

- Depreciation must be deleted.

- Payments (principal and interest) on loans used to purchase the business must be deleted.

- Payments (principal and interest) on loans used to purchase real property must be deleted and an economic rent for the real estate used by the business substituted for the payment.

- Use economic rent instead of contract rent in the statement. Also, economic rent must be used at the new location. This approach is based on legal interpretation of the law. The appraiser must look at the real estate report to see what was determined to be economic rent. An explanation must be made by the goodwill appraiser if the economic rent used in the goodwill appraisal is different than the economic rent used in the real estate appraisal. There could be a difference in the economic rents if substantial time elapsed between the dates of the two appraisals.

© 1994-2025 California Department of Transportation. All rights reserved.

- Owner's salary and draws must be adjusted to reflect reasonable compensation for the owner's role or activity in the business operation. In some cases, corporation officers receive a salary even if they do not work in the business. These salaries may be disguised as profit-sharing compensation and must be deleted because they are not an expense.

- Use of unsupported future earnings are not acceptable. All earnings in the after condition must be factual and supportable. Expectations for growth on investment or changes in the economy cannot be utilized in the calculations.

7.17.16.00 Betterment at the Relocation Property

In the process of reconstructing and/or estimating an income and expense statement for the business at a relocated property, the appraiser must adjust the statement for avoidable property betterments. The following is an example of an avoidable betterment which must be adjusted in the income and expense statement as a part of the process of estimating goodwill value at the new business location.

Assume that the business at the old location occupied a building containing 9,700 sq ft with an economic rent of $10,000/month. Also assume that the business owner chose to relocate to a 15,000 sq ft building with an economic rent of $15,000/month, even though there were other suitable relocation properties on the market containing 9,700 sq ft at a rent of $10,000/month comparable to the old property. In this example, the appraiser must use an economic rent of $10,000/month in the statement instead of the actual rent of $15,000/month at the new location.

On the other hand, an adjustment should not be made if there were no other comparable replacement properties available in the market with 9,700 sq ft renting for $10,000/month, and the owner was forced to relocate to a 15,000 sq ft, $15,000/month rent in order to continue business and preserve the goodwill (patronage). This may be considered an "unavoidable betterment." In this case, the appraiser must use an economic rent of $15,000/month. However, if the business owner were forced to relocate to the larger 15,000 sq ft building, but could sublet the 5,000 sq ft of excess area for $5,000/month, then the appraiser must, of course, take that rental income into account at the new location.

The appraiser must be careful in deciding which betterments must be adjusted as part of the process of estimating the value of the goodwill at the relocated property in the after condition. The basis for the appraiser's

© 1994-2025 California Department of Transportation. All rights reserved.

decision that there is an "unavoidable betterment" must be included in the goodwill report. If the Region/District has any difficulty in identifying betterments which should be adjusted, HQ R/W Appraisal Branch should be consulted. There may be a need to request legal advice on specific issues.

7.17.17.00 Disadvantages at the Relocation Property

There may be certain conditions at the relocated property which cause a reduction of net income and, thus, a reduction from the level of goodwill value that the business had at the old location (loss of goodwill). Some examples are loss of net patronage and increased (economic) rent or other increased operating expenses. (The increased rent or other expenses must, of course, not be a result of avoidable betterments.)

Note that the phrase "loss of net patronage" is used in this section. The reason that the word "net" is used is because Eminent Domain Law Section 1263.510, paragraph (b), states "within the meaning of this article 'goodwill' consists of the benefits that accrue to a business as a result of its location, reputation for dependability, skill, or quality, and any other circumstances resulting in probable retention of old or acquisition of new patronage." Therefore, if some of the old patronage was lost by the move, but an equal amount of new patronage was gained at the new location, there would be no net reduction of patronage.

If the Region/District has any difficulty with a particular appraisal in determining which disadvantages must be considered in estimating the compensable loss of goodwill, HQ R/W Appraisal Branch should be consulted. There may be a need to request legal advice on specific issues.

7.17.18.00 Compensation to Business Owners Under the Relocation Assistance Program (Pursuant to Section 7262 of the Government Code and 49 Code of Federal Regulation Part 24)

Certain compensable goodwill losses and Business Relocation Assistance Program items may fall into overlapping areas of the various laws. An owner is entitled to only one payment for a loss. Therefore, the appraiser must furnish the best information possible as to identifying the components of a loss of goodwill. It is then up to the Acquisition and RAP Branches to apply the information appropriately in determining proper payments. This will ensure compliance with 49 CFR 24.3 regarding no duplication of payments.

© 1994-2025 California Department of Transportation. All rights reserved.

The statute for compensation for loss of goodwill, California Code of Civil Procedure Section 1263.510, provides that there shall be no duplication of payments for loss of goodwill which are provided to the business owner pursuant to the Relocation Assistance Program. In addition, Section 1263.010 of the CCP provides "where two or more statutes provide compensation for the same loss, the person entitled to compensation may be paid only once for the loss."

The following are items for which the business owner may receive compensation under the Relocation Assistance Program. Some of these may also be included in a particular finding of a loss of goodwill. The Relocation Assistance Program covers the following:

A. Moving and related expenses that are actual, reasonable and necessary (49 CFR 24.301 and 303).

B. Reestablishment expenses (limit $25,000) (FHWA Guidance Letter, Implementation of MAP-21 Uniform Act Benefit and Eligibility Change, HEPR-10, March 25, 2014. Effective date: October 1, 2014). Only "small businesses" are entitled to compensation for these reestablishment expenses. A small business is defined (49 CFR 24.2[a][24]) as "a business having not more than 500 employees working at the site being acquired or displaced. Sites occupied solely by outdoor advertising signs, displays or devices do not qualify as a business for purposes of receiving reestablishment benefits under 49 CFR 24.304."

1. **Eligible expenses** – Reestablishment expenses must be reasonable and necessary, as determined by the State. They may include, but are not limited to, the following:

   a. Repairs or improvements to the replacement real property as required by Federal, State, or local law, code, or ordinance.

   b. Modifications to the replacement property to accommodate the business operation or make replacement structures suitable for conducting the business.

   c. Construction and installation costs, for exterior signing to advertise the business.

   d. Redecoration or replacement of soiled or worn surfaces at the replacement site, such as paint, paneling, or carpeting.

   e. Advertisement of replacement location.

© 1994-2025 California Department of Transportation. All rights reserved.

f. Estimated increased costs of operation during the first 2 years at the replacement site for such items as:

i. Lease or rental charges

ii. Personal or real property taxes

iii. Insurance premiums, and

iv. Utility charges, excluding impact fees.

g. Other items that the State considers essential to the reestablishment of the business.

2. **Ineligible expenses** – the following is a nonexclusive listing of reestablishment expenditures not considered to be reasonable, necessary, or otherwise eligible:

a. Purchase of capital assets, such as, office furniture, filing cabinets, machinery, or trade fixtures.

b. Purchase of manufacturing materials, production supplies, product inventory, or other items used in the normal course of the business operation.

c. Interest on money borrowed to make the move or purchase the replacement property.

d. Payment to a part-time business in the home which does not contribute materially to the household income (49 CFR 24.2[a][7]).

C. In Lieu or Fixed Payment for a business, a farm operation or a nonprofit organization for not less than $1,000 nor more than $40,000. (FHWA Guidance Letter, Implementation of MAP-21 Uniform Act Benefit and Eligibility Change, HEPR-10, March 25, 2014. Effective date: October 1, 2014). (This is a fixed payment in lieu of actual moving and related expenses, actual reasonable reestablishment expenses, and loss of patronage.)

A business owner may be entitled to payments for eligible items listed under both Categories A and B. As an option, a business owner may elect to receive a payment under Category C, "In Lieu of or Fixed Payment." If the owner selects the "In Lieu of or Fixed Payment," the

© 1994-2025 California Department of Transportation. All rights reserved.

owner is not entitled to any payments under either Categories A or B. It should be noted that the portion of the in-lieu of or fixed payment that is not moving and related costs must be offset against goodwill.

To enable the Acquisition and RAP Agents to comply with the law and fully compensate the business owner for proper costs and/or losses, but still ensure there is no duplication of payment, the appraiser must show the following in any goodwill appraisal which finds a compensable loss of goodwill:

The appraiser must list in the loss of goodwill report each of the items listed above which contributed to the loss of goodwill, i.e., any of the eligible reestablishment expenses and/or loss of patronage which contributed to the loss of goodwill. The amount of loss of goodwill attributed to each such item shall be shown separately, if possible.

Example:

Total estimated loss of goodwill:	$18,000
Allocation (causes of the loss):	
1. Increased economic rent	$9,000
2. Necessary modification at new location	$4,000
3. Loss of patronage	$5,000
Total Loss	$18,000

If the goodwill appraisal report concludes a loss of goodwill, the appraiser is to include a statement in the appraisal that if any amounts relating to loss of goodwill were paid to the business owner under the Relocation Assistance Program, such amounts must be deducted from the amount of the loss of goodwill shown in the appraisal report. The purpose of the statement is to serve as a reminder to the acquisition agent and to the Relocation Branch that no duplication payments for loss of goodwill are to be made as provided in the Eminent Domain Code.

See the Relocation Assistance Chapter for further information.

8.01.00.00 – ACQUISITION GENERAL

8.01.01.00 Function and Responsibility

The Acquisition Branch is responsible for the timely securing of those property rights necessary to the certification of a project. Certification, insofar as the Acquisition Branch is concerned, means that any and all interests in the property adverse to State's use have either been cleared or the documents or legal process which will legally authorize entry by the Department have been secured.

Private property or interests therein will be acquired in accordance with Article I, Section 19 of the California Constitution.

"Sec. 19. Private property may be taken or damaged for public use only when just compensation, ascertained by a jury unless waived, has first been paid to, or into court for, the owner. The Legislature may provide for possession by the condemnor following commencement of eminent domain proceedings upon deposit in court and prompt release to the owner of money determined by the court to be the probable amount of just compensation."

8.01.02.00 Government Code Requirements

In addition to the constitutional requirement, acquisition of private property for public use is also to be in accordance with sections of the Government Code entitled "Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended," (Uniform Act). Compliance with the Department's policy of paying just compensation should be assured when the constitutional and Government Code requirements are adhered to by the Acquisition Agent in dealing with the owners.

8.01.02.01 Real Property Acquisition Practices

7267. In order to encourage and expedite the acquisition of real property by agreements with owners, to avoid litigation and relieve congestion in the courts, to assure consistent treatment for owners in the public programs, and to promote public confidence in public land acquisition practices, public entities shall, to the greatest extent practicable, be guided by the provisions of Sections 7267.1 to 7267.7, inclusive, except that the provisions of subdivision (b) of Section 7267.1 and Section 7267.2 shall not apply to the acquisition of any easement, right of way, covenant, or other nonpossessory interest in real property to be acquired for the construction, reconstruction, alteration,

© 1994-2025 California Department of Transportation. All rights reserved.

enlargement, maintenance, renewal, repair, or replacement of subsurface sewers, water lines or appurtenances, drains, septic tanks, or storm water drains.

8.01.02.02 Appraisal and Negotiation

***7267.1*.**

(a) The public entity shall make every reasonable effort to expeditiously acquire real property by negotiation.

(b) Real property shall be appraised before the initiation of negotiations, and the owner, or his designated representative, shall be given an opportunity to accompany the appraiser during this inspection of the property.

8.01.02.03 Offers, Value, and Appraisals

7267.2*. *Prior to adopting a resolution of necessity pursuant to Section 1245.230 and initiating negotiations for the acquisition of real property, the public entity shall establish an amount which it believes to be just compensation therefor, and shall make an offer to the owner or owners of record to acquire the property for the full amount so established, unless the owner cannot be located with reasonable diligence. The offer may be conditioned upon the legislative body's ratification of the offer by execution of a contract of acquisition or adoption of a Resolution of Necessity or both. In no event shall such amount be less than the public entity's approved appraisal of the fair market value of the property. Any decrease or increase in the fair-market value of real property to be acquired prior to the date of valuation caused by the public improvement for which the property is acquired or by the likelihood that the property would be acquired for such improvement, other than that due to physical deterioration within the reasonable control of the owner or occupant, shall be disregarded in determining the compensation for the property. The public entity shall provide the owner of real property to be acquired with a written statement of, and summary of the basis for, the amount it established as just compensation. Where appropriate, the just compensation for the real property acquired and for damages to remaining real property shall be separately stated.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.02.04 Prior Notice to Move

7267.3. The construction or development of a public improvement shall be so scheduled that, to the greatest extent practicable, no person lawfully occupying real property shall be required to move from a dwelling, assuming a replacement dwelling will be available, or to move his business or farm operation, without at least 90 days' written notice from the public entity of the date by which such move is required.

8.01.02.05 Continuation of Possession on Rental Basis

7267.4. If the public entity permits an owner or tenant to occupy the real property acquired on a rental basis for a short term, or for a period subject to termination by the public entity on short notice, the amount of rent required shall not exceed the fair rental value of the property.

8.01.02.06 Coercion

7267.5. In no event shall the public entity either advance the time of condemnation, or defer negotiations or condemnation and the deposit of funds in court for the use of the owner, or take any other action coercive in nature, in order to compel an agreement on the price to be paid for the property.

8.01.02.07 Institution of Condemnation Proceeding

7267.6. If any interest in real property is to be acquired by exercise of the power of eminent domain, the public entity shall institute formal condemnation proceedings. No public entity shall intentionally make it necessary for an owner to institute legal proceedings to prove the fact of the taking of his real property.

8.01.02.08 Uneconomic Remnant

7267.7. If the acquisition of only a portion of a property would leave the remaining portion in such a shape or condition as to constitute an uneconomic remnant, the public entity shall offer to acquire the entire property if the owner so desires.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.02.09 Indemnity Clauses in Right of Way Contracts

Government Code Section

Indemnification of Grantor Includes Railroads

14662.5. In any agreement entered into whereby the State obtains a grant of easement, lease, license, right of way, or right of entry (including without limitation, a right of way, or right of entry on or over property of any railroad), the state agency or its director entering into the agreement on behalf of the State may agree to indemnify and hold harmless the grantor, lessor, or licensor and may agree to repair or pay for any damage proximately caused by reason of the uses authorized by such easement, lease, license, right of way, or right of entry agreement.

8.01.03.00 Negotiating Procedure

All acquisition discussions shall be directed to accomplish the end result that the property owner receives just compensation which is also just and fair to the public; that every courtesy, consideration, and patience is extended to the property owner, and to foster a feeling of confidence and respect by the property owner toward the Department of Transportation and its employees. All offers shall represent the best and most current estimate of market value determined through sound, approved appraisal and acquisition practices.

Prior to any discussion as to the terms of the Right of Way Contract and the compensation to be paid, the property owner should be given full information as to the following:

A. The role of the Department and its acquisition functions.

B. The necessity for the proposed transportation improvement.

C. Project design and how the proposed improvement will affect the property.

D. The ability of our appraisal staff and the honest and sincere effort that has been made to determine the market value of the property. During the course of acquisition discussions, agents must remember that they are representing the interests of the public as well as that of the property owner. Care should be exercised at all times to protect the interests of the property owner, particularly if the owner may be unfamiliar or inexperienced in real estate transactions and real estate values.

© 1994-2025 California Department of Transportation. All rights reserved.

If during the course of discussions for the purchase of the property, conditions or characteristics are discovered which were not available to be properly considered in the appraisal, these matters shall be fully considered and evaluated before acquisition of the property is continued.

Prior to conducting any acquisition discussion, the Acquisition Agent should be familiar with the following referenced material:

A. Acquisition Chapter of the Right of Way Manual.

B. Housing and Community Development (HCD) Guidelines, Article 6 (Exhibit 08-EX-01).

C. 23 CFR 710.101 through 710.603 and 49 CFR 24.101 through 24.108.

D. Sections 301 and 302, Title III, Uniform Real Property Acquisition Policy Act (Exhibit 08-EX-02).

Section 6194(a) of the HCD Guidelines, 2nd paragraph, dealing with rental rates based upon financial means, is neither the policy nor procedure of the Department. Again, any conflict in these guidelines is to be resolved in favor of the Uniform Act (Government Code Section 7260, et seq.). The HCD guidelines have been supplied for information purposes and are not to be construed as establishing a policy or procedure at variance with the Uniform Act.

The Acquisition Agent shall be familiar with Departmental policy relating to the acquisition of property and, in particular, the following statements of policy.

A. All discussions for the acquisition of property or an interest therein shall be directed to result in the payment of just compensation.

B. The Department shall make every reasonable effort to expeditiously acquire property through agreement with its owner.

C. The property or interest therein shall be appraised prior to the initiation of discussions leading to its purchase.

D. A prompt offer to acquire the property shall be made.

E. The full amount of the appraisal shall be offered when price is first discussed.

© 1994-2025 California Department of Transportation. All rights reserved.

F. When acquiring real property subject to a lease, determine if there is a need to segregate the lessor's and lessee's interests prior to making a written offer.

G. The property owner shall not be permitted any option privileges of repurchasing either land or improvements that the Department may subsequently declare to be excess property. No such obligation will be included in any right of way contract. No oral or written representation in this respect shall be made.

H. The Acquisition function shall be conducted in such a way and manner as to assure that no person shall, on the grounds of race, color, sex, national origin, or disability, be denied the benefits to which the person is entitled, or be otherwise subjected to discrimination, in compliance with Title VI of the 1964 Civil Rights Act and related statutes.

I. Agents who prepare appraisals shall not negotiate for the acquisition of parcels they have appraised except as noted in Section 8.01.08.00 and the Appraisal chapter.

J. Agents shall not negotiate for any property in which they or their relatives, friends, business associates or others with whom they are closely associated have any personal or financial interest.

K. The Agent assigned to acquire a property shall maintain a timely written record (parcel diary) of all contacts with the owner or owner's representative and any tenants or lessees.

L. In completing and reporting a transaction, the Acquisition Agent shall prepare a complete written explanation (Memorandum of Settlement) which will leave no doubt in the mind of the reviewer that all elements of the transaction were given adequate and equitable consideration.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.04.00 Assignments

The Agent assigned parcels for acquisition will review the appraisal with the Senior Right of Way Agent-Acquisition and the appraiser. A field review with the appraiser will be made, if necessary, so the agent will have the benefit of all information used by the appraiser for determination of values.

The DDC-RW or the Acquisition Branch Chief will ascertain that the agent has all of the information necessary to conduct and complete negotiations for the orderly and efficient acquisition of the right of way. This information shall include, but not be limited to:

A. Current title reports.

B. Approved appraisal.

C. All factual data compiled by the Appraisal Branch for preparation of the appraisal.

D. Necessary right of way maps, plans, profiles, cross sections, and construction details.

E. Adequate time to study the parcels in the field.

8.01.04.01 Acquisition Offers, Offers by Mail and Electronic Mail

When establishing contact with property owners to initiate negotiations and make the first written offer (FWO), it's the Department's policy (consistent with federal regulations) that FWOs be made in person (face-to-face contact), if feasible. There is no substitute for personal contact with the property owner during negotiations. However, property owners may voluntarily elect to have the offer delivered by mail or electronically via email. In the event the property owner or his or her designated representative voluntarily elects to receive the FWO via electronic mail (in lieu of a personal delivery or via certified mail), the District can then email the offer to the owners. If this electronic method of delivery is used for the first written offer, care must be taken to ensure that the offer was delivered to and received by the recipient. Therefore, when emailing offers, a "request a delivery receipt" and a "request a read receipt" shall be used so that the computer can generate proof that the email address the offers are sent to is valid and that the email was delivered and received. However, as not all external email addresses recognize a "request a delivery receipt" and a "request a read receipt," agents should request that the recipient reply that they, in fact, received the email and the offer documents that were sent. Agents should remember to archive and/or print out a copy of the computer-generated proof that the email was successfully delivered, received, and possibly read by the recipient. In addition, agents shall follow up with a phone call as soon as practicable after the offer is emailed to confirm delivery. A courtesy copy of the offer shall also be mailed by certified mail, in the event the offer by email can't be confirmed as being received. All efforts and attempts to confirm receipt of the offer should be documented in the agent's diary. Making offers via email is not intended to be a substitute for personal contact and face-to-face meetings with the property owner and rather should be a supplement. See Appendix A, 49 CFR 24.5, for more information regarding electronic notices and offers.

When warranted by cost and good business considerations, the Districts may accomplish acquisition through the mail or email – especially the acquisition of noncomplex parcels.

For example, where the appraiser of a noncomplex $15,000 or less parcel also acts as the Acquisition Agent, the initial inspection of a property with the owner and the initial offer (if made to the owner at the same time as the initial inspection) will, of course, take place in the course of a personal contact with the owner. The District, however, may consider conducting any subsequent negotiations with the owner by mail or email.

© 1994-2025 California Department of Transportation. All rights reserved.

If a property owner resides in the State but in a county outside of the District, and it is not practical for the agent to make a personal call, a letter may be addressed to the DDC-RW in whose District the property owner resides. This letter shall contain details relative to the purchase, together with the necessary documents, to enable the DDC-RW to assign an agent to handle the acquisition.

The District should always consider the complexity of the transaction prior to requesting that property be acquired by the District in which the absentee owner lives. This is primarily because the agent assigned the parcel will have personally inspected the property in the process of reviewing the appraisal and have more familiarity with it and the related comparable sales. This approach should be used only in acquisitions which do not involve relocation assistance and which are nominal in value. Individual cases otherwise qualified for handling by mail may require personal contact. In addition, if the property owner resides outside of the State, Initiation of Negotiation (first written offer) and the acquisition is to be carried out through the mail and/or email. Any subsequent offers (revised offers) can then be made via email. In transmitting the Contract and Deed, the agent is to express the terms and conditions of the transaction clearly and concisely and include maps showing the right of way requirements. See Section 8.01.11.00 for a discussion on the delivery of documents.

8.01.05.00 Acquisition Branch Responsibility in Certification Process

The Acquisition Branch must assure that all property interests affected by a project, except utility relocation, have been or will be secured. Arrangements must be made for the removal, relocation or protection of any building improvement or other obstruction. All of these steps must be performed within the limits of Departmental policy and in compliance with the Uniform Act. They must also be completed in time to meet the scheduled project certification date.

Prompt calls must be made on all property owners or interests which will be affected by clearance of the right of way. Early identification of design, construction or relocation problems should assure that ample time is available for their resolution.

© 1994-2025 California Department of Transportation. All rights reserved.

For certification purposes, real property interests are secured by obtaining a properly recorded conveying document, Contract with possession clause, Order for Possession, Recordation of Final Order of Condemnation, Possession and Use Agreement, or Right of Entry. Bureau of Land Management Decisions, Department of Transportation (DOT) Easements, Forest Service Letters of Consent and Construction Permits qualify as conveying documents in the certification process.

The Branch Chief will establish lead time requirements which will allow time for the sending of a Notice of Intent. California Transportation Commission (CTC) action, suit preparation, service of summons and complaint, and Order for Possession procedures all require substantial periods of time which affect certification dates. There should be a clear understanding between the Branch Chief and Agents regarding problem areas, such as difficult or complex acquisitions, property owners unavailable for discussions, whether publication of summons is necessary, or difficult or complex acquisitions involving building relocation, cutting and refacing of improvements, or abandoned property within the right of way.

Essentially, the responsibility of the Acquisition Branch in the certification process is to document that all interests adverse to the Department's ability to enter and/or clear a property have either been secured or all such interests will be secured by a certain date based on an executed document or legal process.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.06.00 Parcel Diary

The purpose of the parcel diary is to record all contacts and efforts used by the Department to acquire the assigned parcel through settlement and negotiation prior to litigation.

If an action in Eminent Domain is filed, the parcel diary will be turned over to the attorney assigned to assist in the presentation of the Department's position. Parcel diaries are protected, to a small degree, from the Public Records Act and should not be provided to the owners or their representatives per an informal request. However, the parcel diary can be entered into the court proceedings (including relocation assistance appeals) as evidence, especially when the agent or attorney refers to a statement in the diary about the offer. Therefore, it is imperative that remarks in the diary refer only to the negotiations and discussions with the owners/occupants, and do not include any comments or feelings that would cause embarrassment if they become a part of the court records.

The parcel diary is generally initiated by the appraiser. The Acquisition Agent must maintain the diary for each assigned ownership. It will reflect the offer and status of the Department's contacts and conversations with all interested parties. It will remain with the agent's individual parcel folder until the parcel is acquired and thereafter shall become part of the permanent parcel file.

All contacts with property owners, attorneys for State or owner, witnesses or other interested parties must be shown until the parcel is closed.

The form of parcel diary and detailed instructions regarding entries are shown on Form RW 07-01. Form RW 07-23 shall be used when a loss of goodwill claim is involved.

8.01.07.00 Separation of Acquisition and Relocation Assistance Functions

A clear separation must be maintained between the acquisition and relocation assistance functions except when using the single agent/ "caseworker" approach (Section 8.01.09.00). Departmental legal opinions have stressed that the enactment of the Uniform Act was not meant to be an expansion of just compensation, but a separate obligation of the displacing agency.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.07.01 Waiver of RAP Benefits

Waivers of RAP benefits shall not be made a part of a negotiated acquisition settlement. Waivers for reimbursement of moving costs when an owner retains items of realty as provided in Section 8.06.03.00 are not involved herein. See Section 8.06.22.00 for procedures where RAP benefits do not accrue.

8.01.08.00 Separation of Acquisition and Appraisal Functions

The Departmental policy is to avoid assignments which may result in conflicts of interest. An agent shall not act as both the appraiser and acquisition agent of real property where the cash to grantor exceeds $15,000 and/or there is significant Construction Contract Work (other than replacement of existing facilities such as road approaches, fencing, irrigation pipelines, etc.). This $15,000 limit may be exceeded by the use of nonsubstantial administrative settlements (see Sections 7.01.05.00, 8.02.02.00, 8.03.08.00, 8.50.01.00, and 10.01.13.00 for single agent, under $15,000 process).

If the total fair market value of a parcel, including construction contract work, is $15,000 or less, the same person may estimate and acquire the required interest through the use of a Waiver Valuation. (See Valuation Summary Statement requirements, Section 8.02.00.00.) The Waiver Valuation is not an appraisal and cannot be used for condemnation purposes. Prior to requesting a Resolution of Necessity for condemnation, an appraisal report must be prepared and a copy of the approved report provided to the property owner/lessee. An Appraisal Summary Statement (08-EX-15A) (internal Caltrans link) and a Summary Statement Relating to the Purchase of Real Property or an Interest Therein (08-EX-16) (internal Caltrans link) must also be prepared and given to the property owner/lessee. See Sections 7.01.02.00, 7.02.13.00, 7.02.13.01, and 7.02.13.02 for a complete discussion of Waiver Valuation.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.09.00 Explanation of Relocation Assistance Program (RAP)

When negotiations are initiated with the property owner, or the owner's representative for any owner-occupied property, and upon receipt of the U.S. Residency Information (Form RW 10-44), the agent will explain the Relocation Assistance Program to the owner or representative. Tenants in possession under valid agreement will have the Program explained by the RAP agent. The Acquisition Agent must be familiar with the contents of the RAP Chapter.

At the option of the District RW Office, the Acquisition Agent may implement a single agent/"caseworker" approach for nonresidential/business owner-occupied properties.

If the single agent/"caseworker" approach is used, the agent doing the combined acquisition and RAP work should be well experienced and trained in both functions, and have sufficient time to handle both transactions. In cases of complex nonresidential moves, it is desirable to have a highly experienced RAP agent or a specialist handle such cases.

Under the conditions outlined above, it would be acceptable to have an assigned Acquisition Agent handle simple tenant-occupied nonresidential/business moves as well.

The single agent/"caseworker" approach is most often utilized on parcels where the total fair market value, including construction contract work, is $15,000 or less. In these situations, the agent should be cognizant of relocation issues that may be encountered. See Section 10.01.13.00 of the RW Manual for more information regarding relocation associated with the single agent process and the proper forms to be used. The agent's file should fully document all appraisal, acquisition, and relocation activities associated with the transaction.

8.01.10.00 Offers to Purchase Must Be Made Promptly

Federal, State, and Departmental policy require that a prompt offer be made to purchase property. In an active market, an appraisal may be outdated in a very short time. Failure to make prompt offers in such cases is not only inconsistent with proper acquisition procedures, but may lead to unnecessary reappraisal activity.

© 1994-2025 California Department of Transportation. All rights reserved.

All offers should be made within 30 days of the approval of the appraisal. If circumstances cause delays in making prompt offers, the parcel diary must contain appropriate entries to document the reason for that delay.

8.01.11.00 Offers and Documents Delivered to Owner

The Contract containing the offer should be handed to the property owner, or owner's authorized representative, by the agent at the first contact when price is discussed. In limited instances, an acquisition discussion could occur without handing the contract to the owner, i.e., lessee-owned improvements or lack of agreement as to ownership of improvements. When improvement ownership is established, a copy of the approved appraisal, Appraisal Summary Statement or Valuation Summary Statement and Summary Statement Relating to the Purchase of Real Property or an Interest Therein are to be delivered without delay. See Section 8.02.00.00.

In addition to the Contract, copy of the approved appraisal report, Appraisal Summary Statement or Valuation Summary Statement and the Summary Statement Relating to the Purchase of Real Property or an Interest Therein, the agent shall also deliver the following documents to the owner as applicable: Grant Deed, Easement Deed, Owner's Certification of Tenants (RW 10-01), Certificate of Occupancy and Receipt of Relocation Information (RW 10-25), Rental Escrow Instructions (Exhibit 08-EX-03) (internal Caltrans link), Rental Agreement (Exhibit 08-EX-04), Appraisal Cost Reimbursement Agreement (Form RW 08-31), Information Sheet for Owner(s) Regarding Property Tax Relief (Exhibit 08-EX-49), and the Department's "Your Property Your Transportation Project" Brochure. The agent must verify that the property owner has received the Title VI Civil Rights information. Appropriate entries shall be made in the Parcel Diary and the information supplied if the property owner has not received it.

All occupancy certifications must be completed at the time of Initiation of Negotiations (ION) to establish eligibility for relocation benefits. Certifications obtained along with a copy of all RAP documents presented at the ION are to be forwarded to the RAP Senior within two working days of the ION (see Manual Section 10.01.12.05). Diary entries on the correct form are to be included with the above documents. Certification of vacant unimproved land is also needed even if there is no personal property stored on the property. This will ensure that the RAP Senior is informed that there are no relocation benefits associated with a particular property. If the property owner will not sign the occupancy certifications, a complete diary entry to that effect must be made.

© 1994-2025 California Department of Transportation. All rights reserved.

An Offset Statement should be secured, if feasible, on properties occupied by tenants who own or claim ownership in some of the improvements. See Section 8.04.15.00.

If Rental-Escrow instructions are secured, copies of such instructions are to be delivered to the Relocation Assistance Branch subsequent to the ION and to the Property Management Branch immediately after the Contract has been accepted on behalf of the State by the DDC-RW, or delegate. If the property owner has received rent for vacated units, as described in Section 8.01.31.00, a reconciliation of such payments and Rental-Escrow instructions shall be made in order to avoid conflicts and ensure that State payment ends at close of escrow or date of possession.

When structural improvements are within or partially within the right of way, the initial offer will be on the basis of purchase of the improvements. The property owner *may* then be given the option to either retain improvements or arrange for their relocation in lieu of purchase. See Sections 8.06.07.00, 08.00 and 09.00.

The Acquisition Agent will provide a copy of the approved appraisal and Summary Statements to parties having an interest in the property. These statements shall show values of the property required, damages, if any, and the total payment. If the value of the appraisal is changed, approved revisions shall be provided in a timely manner. See Section 8.01.12.01. Administrative settlement offers or independent condemnation appraisals do not require revised Summary Statements. See Section 8.02.00.00, et seq., for a detailed discussion on Summary Statements.

When it becomes necessary to transmit offers by mail or email, as in the instances described in Section 8.01.04.01, or when an owner or authorized representative demands that the offer be presented in writing, the offer shall be stated in the following manner:

A. In instances where no condemnation action has been filed: "Enclosed is a Right of Way Contract (in duplicate), in the amount of $_____, which contains all of the terms and conditions of this transaction."

B. In instances where a condemnation action has been filed: "In order to dispose of pending litigation, we hereby offer you $_____ to settle the above-named parcel."

8.01.11.01 Administrative Methods to Avoid Acquisition of Excess Parcels

To avoid acquiring low-valued, fragmentary excess parcels and carrying such parcels in the excess lands inventory, the Districts may offer the following incentive to property owners as a nonsubstantial Administrative Settlement: Whenever uneconomic remnants have an after-value of $5,000 or less, the property owner may retain the uneconomic remnant remainder and be paid as if the Department had acquired it as excess land.

Acquisition Agents are encouraged to exchange excess lands adjoining or near the acquisition parcel at time of acquisition. If necessary, excess land can be exchanged subject to a temporary construction easement required to construct the Department's project. See Manual Sections 8.12.01.00, et seq., for further procedures regarding Exchanges and Abandonments.

8.01.12.00 Property Owner's Right to a Copy of the Department's Appraisal

Section 102(b) of Streets and Highways Code reads as follows:

> "For any property that the department is acquiring by, or under threat of, eminent domain, the department shall, in a timely manner, provide a copy of all appraisals it performed or obtained for the property to the property owner. If appraisals that are performed or paid for by the department are first provided to the property owner, the appraiser shall provide a copy of those appraisals to the department."

This statutory right will be complied with by giving each property owner a copy of the approved appraisal at the ION. Approved appraisal revisions, if any, will also be provided to the property owner in a timely manner. A parcel diary entry is to be made indicating the property owner was provided with a copy of the department's approved appraisal, and revisions, if any.

If a segregable property interest is appraised, such as for lessee owned improvements, machinery and equipment, crops, timber or mobile homes, the owners of these segregable interests shall receive an Appraisal Summary Statement along with a copy of the pertinent information contained in the approved appraisal for their respective property interest valuation.

© 1994-2025 California Department of Transportation. All rights reserved.

The above procedures are also applicable for any appraisals approved in lieu of staff, as well as appraisals performed or contracted by Local Public Agencies for work on the State Highway System. However, these procedures do not apply to independent or staff reports prepared for condemnation, nor do they apply to Loss of Business Goodwill Appraisal Reports.

8.01.12.01 Owner Initiated Appraisals – Appraisal Cost Reimbursement Agreement Procedures

Pursuant to Code of Civil Procedure Section 1263.025(a), "a public entity shall offer to pay the reasonable costs, not to exceed five thousand dollars ($5,000), of an independent appraisal ordered by the owner of a property that the public entity offers to purchase under a threat of eminent domain, at the time the public entity makes the offer to purchase the property. The independent appraisal shall be conducted by an appraiser licensed by the Office of Real Estate Appraisers." It should be noted that as of July 1, 2013, the Office of Real Estate Appraisers is now known as the "Bureau of Real Estate Appraisers" (BREA).

To comply with this statutory requirement, all offers made to owners will include a written notice indicating they are eligible to receive payment/reimbursement of up to $5,000 for the actual reasonable costs of an independent appraisal ordered by the owner of a property the Department intends to purchase under threat of eminent domain. The Department's written notice is contained under item number 5 in the Summary Statement Relating to the Purchase of Real Property or Interest Therein (Exhibit 08-EX-16) (internal Caltrans link) which is provided at the time of the ION. The payment/reimbursement of reasonable costs is subject to a number of conditions that are also outlined in Exhibit 08-EX-16.

When a copy of the property owner's appraisal is provided to the Department, the Acquisition Branch will review and determine if the new data warrants further consideration by the Appraisal Branch (see Section 7.10.01.00). If so, the Appraisal Branch should then offer a written response to the Acquisition Agent regarding its impact on the Department's appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

To seek payment, the owner will submit the required information/documentation and enter into an Appraisal Cost Reimbursement Agreement (Form RW 08-31) with the Department. Upon review of the owner's information/documentation, if it is subsequently determined by the Region/District to pay the owner for the actual reasonable cost associated with obtaining an appraisal, the Acquisition Agent will then process the payment. Guidelines to process the Appraisal/Cost Reimbursement Agreement, which outline the documents required to request payment, and the specific coding requirements in order to track and capture these costs to the Department, are also attached to Form RW 08-31.

In the event a property owner requests that the Department pay their appraiser directly, (as opposed to reimbursing the property owner), the Regions/Districts have the option of using Exhibit 08-EX-06A. Guidelines to process this Appraisal Cost/Reimbursement Agreement, and making payment directly to the owner's appraiser, are the same as those guidelines used for Form RW 08-31.

8.01.13.00 Use of Primary or Alternate Appraisal Reports

The District may pursue negotiations with a property owner on the basis of either the primary or alternate appraisal, provided both have received unqualified approval.

The decision to use the alternate must be justified and documented in the file. See Section 7.03.03.00 for a discussion of Alternate Appraisals. Approval as to value only, or other limiting language, is not considered as unqualified approval.

8.01.14.00 Current Status of Market Value

The Acquisition Agent, in discussions with property owners or owner's representative, should solicit information such as sales which the owner may be relying on to support an opinion of value.

Whenever pertinent information is obtained that suggests a change in value on the property to be acquired, the Acquisition Agent shall supply such data to the Appraisal Branch with a request that the appraisal be reviewed and updated as necessary. The analysis of such sales data is the function of the Appraisal Branch. In an active real estate market, the Appraisal Branch should be supplied with any new data so investigation and analysis of such is reflected as soon as feasible in revision of appraisals.

© 1994-2025 California Department of Transportation. All rights reserved.

The Appraisal Branch will analyze the new data and determine its applicability to unacquired parcels. If the Appraisal Branch determines adjustment is not warranted, the Acquisition Branch will be notified. If the Appraisal Branch determines adjustment is necessary, the following action will be taken:

Depending upon time and available personnel, the appraisal will be either revised and submitted for approval, or a Memorandum of Adjustment made and furnished to the Acquisition Branch.

8.01.15.00 Negotiating with an Owner's or Tenant's Designated Representative, an Attorney, or Third Party

Unless otherwise authorized by the property owner, all acquisition discussions shall be with the owner. When an attorney has been retained by the property owner, acquisition discussions will generally be with the attorney. In some instances, an attorney will consent to further discussions between the agent and property owner. Since variations of this are probable, the agent should attempt to establish clear guidelines with the attorney, in writing, for such discussions. These same protocols and procedures shall also apply when acquisition discussions are with a tenant.

If the property owner or tenant employs someone as a designated representative to conduct discussions, care must be exercised in establishing the extent of the authority of the owner's or tenant's representative. Such authority or agreement must be in writing from the property owner or the tenant. (See 49 CFR 24.2[a] for a definition of an owner's or tenant's designated representative).

Whether dealing with an attorney or other type representative, it is essential that clear ground rules are established since no two such acquisitions involving third parties are identical. The Acquisition Branch may sometimes find it desirable or necessary to involve the Regional Legal Office in communicating with the property owner's or tenant's attorney.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.16.00 Exchange of Noncontiguous Land or Land Yet to be Acquired

All exchanges are subject to approval by the CTC. Excess real property may be used in exchange for all or part consideration for other property required for State Highway purposes. Exchanges of land in right of way transactions should be limited to those cases where the excess real property is contiguous to the remaining property owned by the grantor of the property being acquired. However, noncontiguous excess real property or property yet to be acquired can also be proposed for exchange in a Contract. A copy of the Region/District's authorization will be included in the MOS. Finding "A" or "B" situations are the most acceptable type exchange. It is Departmental policy to dispose of excess property by public sale whenever possible. Exchanges are justified if sale of an excess parcel to the general public would be injurious to the interests of the abutting owner or if damages are minimized by an exchange and the grantor's property is rehabilitated to permit the highest and best use. For a complete discussion of this topic, see Section 8.12.00.00.

8.01.17.00 Request for Appraisal Review Prior to Commencement of Eminent Domain Proceedings

The District must ensure that the outstanding offer reflects current market value. The Departmental policy is to make every reasonable effort to acquire property expeditiously and pay just compensation. During the negotiation process, the agent should be able to determine if an adjustment in the appraisal could lead to a settlement. Prior to commencing eminent domain action, the agent will provide the Appraisal Branch with all pertinent information which has been obtained and which may have an effect on the market value of the property.

At least 14 days prior to the mailing of the Notice of Intent, the Acquisition Branch shall submit a "Request for Confirmation of Market Value" (Exhibit 08-EX-05) (internal Caltrans link) to the Appraisal Branch to ascertain whether the staff appraisal represents current market value. The Appraisal Branch will review and either confirm or revise the valuation of parcels to be included in a condemnation suit and report their findings to the Acquisition Branch. Regardless of whether there is a change in value, the date of value shall always be updated. The only exception would be if the most recently approved staff appraisal has a date of value which is within six months of filing the condemnation lawsuit. See also Sections 7.10.10.00 and 8.01.19.00.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.18.00 Appearances by Property Owners Before the Transportation Commission

Initiation of the condemnation process, as it affects a property owner, commences with the mailing of the Notice of Intent (Notice). See Exhibit 09-EX-01 (internal Caltrans link) and Section 9.01.04.00.

The Notice advises the property owner that the State intends to seek authority from the CTC to institute eminent domain proceedings. Authority is the Resolution of Necessity (Resolution) adopted by the CTC. This gives the Department the right to file a condemnation action and, subsequently, with the approval of the Superior Court, take possession of the property.
The property owner has the right to contest the adoption of the Resolution. The Notice informs such owner what steps are to be taken to exercise that right. (See Section 9.01.06.00.)

Property owners must file a written request to appear before the CTC within 15 days of the mailing of the Notice (CCP Section 1245.235[3]). Upon receipt of the owner's request to appear, Headquarters will instruct the District to conduct a Condemnation Evaluation Meeting (see Section 9.01.07.00). The participants at this meeting will be the District Director, Deputy District Directors from Design and Right of Way, and the owner and/or their representative(s). This meeting should be limited to the appropriate functional managers, the Single Focal Point, and the Headquarters Design Coordinator. Other staff should be available on standby or by phone to be called upon as deemed appropriate to provide supplemental project information to the participants, if necessary. The Deputy District Director of Right of Way will chair the meeting. The Chair reminds the owner the CTC will only consider issues of project need, project design, and necessity of purchasing the owner's property; the CTC will not consider issues of compensation.

District management will have the opportunity to hear and discuss the issues of both sides regarding the acquisition of the subject property. This may result in the District modifying its requirements, resulting in agreement, or confirming their position.

© 1994-2025 California Department of Transportation. All rights reserved.

If this review does not result in agreement and the District's recommendation is to proceed with the project, District Design in coordination with Right of Way will prepare an Appearance Information Sheet (AIS) and a Resolution of Necessity Fact Sheet (Fact Sheet) which will be sent to the Headquarters Chief, Division of Design (DOD) for processing, with a copy to HQ Chief, Division of Right of Way and Land Surveys (RWLS). Suggested formats for the AIS and Fact Sheet can be found in Appendix JJ of the Project Development Procedures Manual. This submittal serves as the District's request to HQ to schedule the Condemnation Review Panel (Panel) to begin review of the project in pursuit of a Resolution of Necessity. After the Panel has reviewed the facts presented in the AIS, a decision will be made by the Division Chiefs of both HQ DOD and RWLS, whether or not to proceed to a Condemnation Panel Review Meeting (see Section 9.01.08.00) by the Condemnation Review Panel. The Panel will consist of representatives from HQ RWLS (as Chairperson), Legal, and DOD. The RW panel chairperson will designate a RW staff person to serve as the secretary to the Panel. As with the District Condemnation Evaluation Meeting, the owner and/or their representative will present their position as to why the property should not be acquired by the Department and the District will present the project scope and project impact.

After this review, the Panel will make either a recommendation to the District for action to resolve the problem or to the Chief Engineer to proceed to the CTC to secure a Resolution. The determining factor will be whether or not the District has complied with all of the requirements necessary in designing the project and in attempting to acquire the property in question. The date selected for presentation to the CTC will be governed by the completeness of the AIS and Fact Sheet, whether or not the matter is to be elevated by the Panel, and the time required for the Panel to perform its function in relation to the monthly cutoff dates for submitting agenda items (with supporting documentation) to the CTC.

The CTC is limited in its consideration by Section 1245.230 of the CCP to the following three conditions: (1) the public interest and necessity require the project; (2) the proposed project is planned or located in the manner that will be most compatible with the greatest public good and the least private injury; and (3) the property described in the resolution is necessary for the proposed project.

Section 1245.230 of the CCP also requires that an offer required by Section 7267.2 of the Government Code has been made to the owner or owners of record.

© 1994-2025 California Department of Transportation. All rights reserved.

At the CTC meeting, property owners or their representatives may raise questions regarding the acquisition during the presentation of the arguments opposing adoption of the Resolution. As such, it is imperative the information contained in the AIS and Fact Sheet be up to date, complete and factual.

The District Condemnation Evaluation and Condemnation Panel Review meetings shall be conducted separately to afford the District every opportunity to discuss the project and to negotiate a settlement with the property owner. The District Condemnation Evaluation meeting must be held far enough in advance of the Condemnation Panel Review meeting to allow adequate time for the District to consider and evaluate recommendations discussed at the District meeting. Results of all evaluations are to be included in the Appearance Information Sheet (AIS) and the District's presentation during the Condemnation Panel Review meeting.

The Chief Engineer has delegated the District Director the authority to combine the District Condemnation Evaluation and Condemnation Panel Review meetings for those projects where the property owner's issues are not related to the project's design. When this authority is exercised, the District Director shall provide in writing to the Chief Engineer, Attn: Chief DOD, a notice of the decision to combine the meetings and verification that the property owners' issues are not design related. The District will be responsible for notifying the Panel secretary to coordinate the Panel's participation at the combined meeting. The District also assumes the responsibility of preparing and finalizing the Appearance Information Package which includes the Panel Report (see Form RW 09-02), and to prepare the District Director or Deputy District Director to present the Department's draft CTC presentation to the Chief Engineer at the Resolution of Necessity Dry Run (Dry Run) held in Headquarters. The Single Focal Point will coordinate the District's handling of the necessary deliverables and will be responsible for assessing potential risks for the District. The Chief Engineer will determine at the conclusion of the Dry Run presentation if the Resolution is ready to move forward to the CTC for consideration. The Panel Report, which is approved by the Chief Engineer, is the Department's authorization to proceed before the CTC to obtain the Resolution of Necessity. The District is required to meet the Office of CTC Liaison's predetermined deadlines for submittal of documents and presentations so book items can be finalized for the CTC's agenda (refer to current year Preparation Schedule).

© 1994-2025 California Department of Transportation. All rights reserved.

Specific details regarding the Resolution of Necessity Process, procedures for performing the District Condemnation Evaluation Meeting and the Condemnation Panel Review Meeting, along with outlines and suggested formats for the AIS and Fact Sheet are found in Chapter 28 of the Project Development Procedures Manual as well as the Headquarters Division of Design Intranet page (internal Caltrans link) regarding Resolutions of Necessity.

8.01.19.00 Use of Staff Independent or Fee Appraisers

Once the decision to proceed with condemnation is made, the Appraisal Branch will be requested to complete Exhibit 08-EX-05, "Request for Confirmation of Market Value" (internal Caltrans link), including page 2 regarding "Employment of Appraiser."

This procedure is intended to ensure:

A. That the staff appraisal is revised, if market data justifies such a revision, so current market value offer can be made to the property owner *before* condemnation is started; and

B. That qualified *staff* personnel are used whenever possible in lieu of independent fee appraisers, in accordance with State Personnel Board rules.

8.01.20.00 Payment of Out-of-Pocket Expenses

The Department may reimburse property owners for expenses incurred in development of a property, when development is interrupted by acquisition, provided certain criteria are met and a review and investigation of the validity of the claimed expenses supports such payment. When an owner requests payment for such expenses:

A. The property owner will be requested to complete and sign two copies of Exhibit 08-EX-07, "Claim for Payment of Expenses Actually Incurred." One copy should be retained by the owner, and one copy for the District Right of Way files. Upon receipt of the property owner's claim, the Acquisition Branch must verify the validity of the out-of-pocket expenses claimed for payment.

© 1994-2025 California Department of Transportation. All rights reserved.

B. In addition to verification of the expenses, the review and investigation will identify the expense items that are reimbursable by the State, e.g., map checking fees, building permit fees, architectural plans, materials, services, etc. The investigation will also identify those items which are not reimbursable and the reasons therefor.

C. During the course of the investigation, the Acquisition Branch shall request the Appraisal Branch and, if necessary, the Regional Legal Office to assist in the review and provide a written response as to the reasonableness of the expenses claimed. Development plans will be reviewed to determine whether they are reasonable for the proposed development and contribute to the market value of the property. This review may also reveal whether any expense item claimed might have already been considered and included in the approved appraisal (see Chapter 7, Section 7.05.06.00).

D. A payment based on the total of the recommended expenses may be authorized by the Region/District on an administrative basis. Agents must check the current RW Planning and Management Delegation of Authority matrix to determine who in the Districts and Regions may authorize such payments.

   Claims for these types of expenses may also be made on unacquired parcels when negotiations have been suspended on routes which are deleted. If the property owner's financial outlay meets the criteria of a contribution to the value of the property and subsequently the materials, services, plans, etc., cannot be used as a result of our actions, or lack thereof, then such claim should be processed (and coordinated with the Regional Legal Office in cases involving abandonments or the elimination of contractual obligations) on the same basis as though the State were completing the acquisition of the property.

8.01.21.00 Impounded Funds Held for Tax Payments

Lending institutions may, as part of monthly real estate loan payments, require sufficient funds to accumulate in an impound account for payment of property taxes. When the agent determines that a lending institution is impounding funds for tax payments on the parcel being acquired, the agent should advise the grantor to contact the lending institution and arrange for a refund of the pro rata share of such impounded funds.

8.01.22.00 Notification to Property Owner Regarding Tax Liability and Property Tax Relief

Sections 5084, 5085 and 5086 of the Revenue and Taxation Code provide procedure for the collection or cancellation of real property taxes on property being acquired under authority of eminent domain statutes. See Sections 8.04.24.00 and 8.04.26.00.

While the Revenue and Taxation Code authorizes payment of unpaid taxes and current taxes out of escrow or out of the award in an eminent domain action, some tax collecting agencies may not, after notification by the District, place a demand for such taxes. These tax collecting agencies may prefer to have such taxes transferred to the unsecured roll for eventual payment, or in the case of a partial acquisition with subsequent segregation, the unpaid or current taxes are billed with future tax bills. Also, see Section 8.66.04.00.

The property owner should be advised that unpaid or current taxes may be paid out of escrow if the tax collector places a timely demand or they may be transferred to the unsecured roll for subsequent payment. Notification to the tax collecting agency of our acquisition and the availability of funds should eliminate any State liability imposed by the Revenue and Taxation Code.

Payment for property being acquired must not include payment for any tax – delinquent, unpaid or current.

The agent should explain to the grantor that the area conveyed to the state in a partial acquisition will be segregated and not subject to future liability by the local taxing agency.

When the grantor retains improvements, they should be informed that when the improvements are removed from the secured property roll and transferred as personal property to the unsecured property roll, they will be assessed as the personal property of the grantor. Grantor should be advised that personal property taxes are their obligation and are generally included as a separate item on the tax bill. See Section 8.06.11.00.

The property owner should be advised that Section 2(d) of Article XIII A of the California Constitution and Section 68, Revenue and Taxation Code generally provide that property tax relief shall be granted to any real property owner who acquires comparable replacement property after having been displaced by governmental acquisition or eminent domain proceedings.

© 1994-2025 California Department of Transportation. All rights reserved.

Exhibit 08-EX-48 lists guidelines prepared by the State Board of Equalization and Exhibit 08-EX-49 is an informational sheet to be reproduced and given to owners.

8.01.23.00 Refund of Prepaid Current Taxes

The taxpayer whose property is to be acquired is entitled to a refund of prepaid current taxes which would have been subject to cancellation, if unpaid. The person who paid the taxes must request the refund after the close of escrow. The Acquisition Agent shall inform the grantor (taxpayer) that any refund will be paid only after the grantor personally applies to the City or County Tax Collector.

For disposition of prepaid current taxes on property acquired by Eminent Domain, see Sections 8.04.24.00 through 8.04.26.00.

8.01.24.00 Grantor's Obligation to Pay Personal Property Tax

Property owners should be advised of their obligation to pay personal property taxes. These personal property taxes are generally included as a separate item in the tax bill.

8.01.25.00 Title Services on Low-Valued Parcels

Normal title services may be waived for parcels where the indicated value will be $25,000 or less, except where it is prudent to utilize those services or as a condemnation proceeding requirement. The potential existence of parcels falling into this value range should be identified early by joint effort of the Right of Way Engineering personnel with the Appraisal and/or Estimating staff(s).

Ownership and legal descriptions of these properties may be obtained by staff personnel from the public records or by title company Statement of Record Ownership. In either event, the Acquisition Agent shall make a reasonable attempt to determine what items, if any, should be taken subject to and what items may be so detrimental as to require clearance. Provision must be made for the payment of any delinquent taxes on a total acquisition. One of the standard indemnification clauses should be included in the contract. See Section 8.04.04.00. Waiver of normal title services does not mean the Acquisition Agent should not make a reasonable effort to eliminate title exceptions which may be detrimental to State's title.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.26.00 Payment for Parcels Appraised as Nominal

When the total appraised value of all property rights or interest to be acquired from an ownership is $2,500 or less, the "Market Value of Required Property" may be shown as "Nominal" on the parcel appraisal page. Districts have the authority to offer up to $2,500, but not less than $500 on parcels appraised as "Nominal." A minimum value offer of $1,000 is required prior to submitting a request for a Resolution of Necessity.

The District will determine the amount to be offered prior to the first call on the owner. The determination of the amount to be offered will be a judgmental decision based on both a project basis as well as the classification (title, size, etc.) of the acquisition.

Alternately, when the compilation on the appraisal page shows a figure less than $2,500, the offer will be that figure as a minimum, but not less than $500. Also, see the Appraisal Chapter (Section 7.02.14.00).

8.01.27.00 "One Call" Draft Purchase Order (DPO) Process

Payment to grantors may be expedited by using the Draft Purchase Order (DPO) Process, when settling a low-valued transaction of $10,000 or less, after the basis for just compensation has been established with either an approved appraisal or a Waiver Valuation. The grantor may be paid during the initial call with a DPO. The interest acquired must be $10,000 or less, and only one DPO may be issued per parcel.

DPOs should be limited to "One Call" transactions, including payment to the grantor. However, unusual circumstances may lead to up to three calls, if necessary.

The agent must obtain a DPO from the fund custodian. The agent and the grantor must countersign the DPO. The DPO, along with the payment package, must be submitted to Right of Way Accounting as soon as possible, but not later than five working days after issuance of the DPO. Any questions regarding the DPO procedures should be directed to the Region/District RW Planning and Management Senior.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.28.00 Administrative Settlements

Prior to the filing of an eminent domain suit and the hiring of an independent expert witness/appraiser, property may be acquired through settlement at a payment which varies from an approved appraisal through the Administrative Settlement process. When the difference between the approved staff appraisal and proposed settlement is $500,000 or less, the increase is considered Nonsubstantial. When the difference between the approved staff appraisal and proposed settlement is more than $500,000, the increase is considered Substantial. A Substantial increase requires the prior authorization and approval of HQ RW. Reference should be made to the current Delegation of Authority matrix to determine the maximum amounts Districts and Regions may approve.

Any increase must be based on and be supported by the guidelines contained in 49 CFR 24.102(i). The final offer of compensation required by Code of Civil Procedure, Section 1250.410 (see the Condemnation Chapter) is to be made in anticipation of protecting the Department against payment of attorney's fees and related costs. It also must be supported by the guidelines in the CFRs.

When an administrative settlement is reached on owner-occupied residential property, the RAP staff must be notified so that any necessary adjustment to the Price Differential Benefit may be determined.

Administrative settlements are based on factors other than those which are used as market value premises in the preparation of an appraisal. Administrative Settlements are not to be used in lieu of an updated appraisal report. All of the guidelines included in the CFRs are pertinent. However, the more commonly used guidelines in determining whether an administrative settlement should be made are:

A. All available appraisals, including owner's appraisal.

B. Recent court awards for similar properties.

C. Acquisition Agent's recorded information.

D. Range of probable testimony in trial. (Trial Risks)

E. Opinion of legal counsel, where applicable.

F. Trial cost when considered with other information.

© 1994-2025 California Department of Transportation. All rights reserved.

Requests for approvals of Substantial administrative settlements are to be submitted to the Acquisition Section of HQ RW utilizing Exhibit 08-EX-50 (internal Caltrans link). A supporting memorandum or documentation (legal memorandum, where applicable) is to be attached as necessary. If time does not permit a memorandum, the form may be emailed for conditional telephone approval. Approval may take the form of a range of acceptable values. When settlement on conditional approvals is made, the District must submit a memorandum as discussed above, or a confirming memorandum containing the justifying details within 15 working days. Approved administrative settlements are to be incorporated into the Memorandum of Settlement.

It should be noted that all administrative settlements involving Railroads, regardless of the dollar amount (with the exception of those parcels defined under Section 8.01.26.00), require HQ approval and submittal of Exhibit 8-EX-50 with the Region/District's recommendation for settlement.

Exhibit 8-EX-50 may be used to justify and/or approve Nonsubstantial administrative settlements.

8.01.29.00 Legal Settlement Recommendations

A. Once an Eminent Domain Suit has been filed, an Expert Witness has been hired, AND a settlement that exceeds the amount of the approved staff appraisal is proposed based upon new appraisal data from said witness, the settlement will be considered a LEGAL SETTLEMENT subject to the requirements of 23 CFR 710.105 and 710.203 and Department procedures pertaining to a LEGAL SETTLEMENT. All LEGAL SETTLEMENT recommendation memoranda shall be written by the attorney assigned to the case. All Substantial LEGAL SETTLEMENTS are approved by HQ RW and are not delegated.

   The assigned attorney should make every reasonable effort to submit to R/W a written request for settlement authority no later than two weeks before the date settlement authority is needed (i.e., two weeks before the mandatory settlement conference, mediate, or informal settlement meeting). Extenuating circumstances (receipt of a settlement demand at any time during the litigation, court orders for an early settlement conference) may preclude compliance with the two-week deadline. In such cases, Legal may obtain conditional approval (telephonic, email or otherwise) from R/W with the understanding that such approval will later be memorialized in a Memorandum Requesting Settlement Approval in the event the case settles.

© 1994-2025 California Department of Transportation. All rights reserved.

Requests for settlement authority exceeding the District or Region's settlement delegations must be submitted to Headquarters R/W for approval. These requests must be reviewed and recommended for approval by the R/W Regional Division Chief or R/W Deputy District Director before they are submitted to Headquarters R/W. In extenuating or unforeseeable circumstances, Legal may obtain conditional verbal approval from the Region/District and Headquarters R/W. Legal must then submit to the Region/District and Headquarters R/W a written memorandum requesting either settlement authority or (in the case of an actual settlement) settlement approval within 15 business days after R/W has granted Legal such conditional settlement authority.

The Regions/Districts are authorized to approve Nonsubstantial LEGAL SETTLEMENTS (see Section 8.01.28.00 for definition of Substantial vs. Nonsubstantial administrative and legal settlements).

In processing payment for LEGAL SETTLEMENTS, the Attorney's Legal Settlement Memo must be received and approved prior to the actual disbursement of any funds. However, as an expedient, issuance of a check by Accounting (Form RW 09-20 [internal Caltrans link]) should be requested as soon as settlement is confirmed.

B. All other settlements that exceed the amount of the approved staff appraisal will be considered ADMINISTRATIVE SETTLEMENTS and subject to the requirements of 49 CFR 24.102(i) and Department procedures pertaining to an ADMINISTRATIVE SETTLEMENT.

C. It should be noted Administrative and Legal Settlement requests are for the entire action that exceeds the approved real property appraisal report, which includes fixtures and equipment, but excludes claims for Loss of Business Goodwill.

8.01.30.00 Easements in Limited Vertical Dimension

The Department may acquire easements in limited vertical dimension (aerial easement). Typically, this occurs when a proposed structure passes over land on which the surface use is to continue. The conveying document will contain conditions which limit, for safety or other reason, the uses to which the property under the structure may be put or the present use continued. (See Page 12 of Exhibit 06-EX-02.) Changes or modification to the standard limiting conditions can be approved by the Region/District with the concurrence of the Regional Legal Office. The legal description attached to a Notice of

© 1994-2025 California Department of Transportation. All rights reserved.

Intent advising owners of our intention to secure a Resolution of Necessity must contain all of the limiting conditions.

8.01.31.00 State Rental of Residential or Commercial Units Prior to Acquisition

The Relocation Assistance Program allows the payment of benefits to qualified rental displacees as soon as the initiation of negotiations, or settlement, has been made to the property owner. When the displacee vacates the property pursuant to such a payment but prior to acquisition of the property by the State, acquisition problems may be created. During the period that negotiations are underway, the property owner may feel it necessary to re-rent the property to provide an income stream, sometimes at lower than market rental rates. This can leave the Department with additional relocation assistance payment costs and work that can delay project delivery.

In certain circumstances, vacant residential or nonresidential units may be rented by the Department prior to acquisition to keep the units vacant and thus to expedite project delivery and minimize relocation assistance costs. This procedure is especially useful in regard to multiresidential properties, mobile home spaces, ministorage units and similar properties.

Districts are encouraged to use the provisions of this section when anticipated savings will be substantial and/or when project delivery schedules indicate it will be necessary. When it is clear that units should be rented under the provisions of this section but for some reason this cannot be accomplished, consider obtaining an early Order for Possession.

8.01.31.01 Arranging for Pre-Escrow Rentals

Acquisition must obtain the written approval of the DDC-RW prior to instituting this procedure on any project. This approval will also be the authorization to institute a "No Re-rent" policy after acquisition. (See the Property Management Chapter.)

An estimate of the potential relocation benefits by type of unit affected, along with other justifying material, will be prepared by RAP. It will be a part of the written authorization. It must show that using this procedure will expedite project delivery and/or minimize overall costs to the Department. Consider the estimated lead time on the project and the aggregated rental cost to the State versus the estimated relocation expenses which could be incurred if the units were not rented by the Department.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.31.02 Initiating Rental Agreement

Districts will offer to enter into rental agreements concurrently with Initiation of Negotiations (ION) in cases where pre-escrow rents are approved. This procedure should also be applied where master tenants are operating properties such as mobile home parks under leases with the owners.

The Rental Agreement format set forth in Exhibit 08-EX-04 will be used. It will be prepared in advance of the ION and presented to the property owner(s) with the other acquisition documents when initiation of negotiations is made. Payment of rents may be set up in the rental agreement in two ways:

A. Accumulation of rents owed during the rental period, and payment at close of escrow.

B. Periodic payments during the rental period. This provision will normally be used when the fiscal condition of the property owner is such that a single delayed payment at close of escrow is not acceptable.

The existing rent schedule for the units shall be continued. If there is no existing schedule, the rental amount shall be set by the Appraisal or Property Management Branch.

8.01.31.03 Paying and Accounting for Pre-Escrow Rents

These rental payments are considered to be acquisition costs, not relocation assistance costs. FHWA participates in these costs, provided they are properly documented and billed. Payments made prior to acquisition may be expedited by completing the Acquisition Invoice (Form RW 08-17 [internal Caltrans link]) and attaching the documents listed on the form. Allow 30 days for processing payments. The rental agreement must provide for proration of rents that are paid/owed at close of escrow.

A copy of Form RW 08-17, with the attachments, will be placed in each parcel file for which rental payments have been made. It will be included as an attachment to the MOS. Districts should minimize the rental period by allowing for a reasonable negotiation period and then initiating the condemnation process.

Schedules for payment of pre-escrow rent (payment packages) are submitted to District Planning and Management offices.

© 1994-2025 California Department of Transportation. All rights reserved.

Pre-escrow rent transactions are considered administrative settlements. The MOS and Federal Participation Memorandum (Form RW 08-16 [internal Caltrans link]) must reflect the full cost of acquisition including all pre-escrow rents. The total amount of pre-escrow rents is entered on the "Rent" line of Form RW 08-16. The Federal Participation Memorandum Form should not reflect the schedules for pre-escrow rent payments made prior to close of escrow. Therefore, the amount of pre-escrow rents paid should be entered on the 'Other' line in parenthesis to indicate to RW Accounting to subtract that amount. A full explanation of pre-escrow rent aspects of the transaction must be included in the MOS.

Where rental payments are made in advance of escrow, a tabulation of all payments made, by amount and date, will be maintained in the parcel file. A copy of this tabulation will be included in the MOS as page 3A – Recapitulation of Pre-escrow Rents.

Schedule packages for pre-escrow rents to be paid prior to the close of escrow will be reviewed in the same manner as other schedule packages. After the schedule is forwarded to Accounting for payment, the supporting documents and a copy of the schedule will be maintained in the parcel file and accumulated as periodic payments are made. When the acquisition payment package is forwarded, the accumulated materials will be used in the review to ensure that the MOS and Federal Participation Memorandum include all pre-escrow rent payments made.

8.01.32.00 Acquisition Offers and Relocation Assistance Benefits on Parcels for Projects Not Funded

All offers for acquisition of rights of way and relocation assistance benefits on projects not supported by budgeted funds should be withdrawn. This does not refer to offers on parcels which have been approved as hardship or protection.

Sample letters to be used for the withdrawal of offers from owners and, when applicable, tenants occupying such properties are included as Exhibits 08-EX-09, 08-EX-10, and 08-EX-11 (internal Caltrans link). The sample letters refer to the right to appeal the withdrawal of relocation benefits. Such appeal will be to the Relocation Assistance Program Appeals Board in Sacramento. An application to reinstate an acquisition offer should be directed to HQ RW.

© 1994-2025 California Department of Transportation. All rights reserved.

8.01.32.01 Acquisition Offers on Parcels for Projects Where Funding is Uncertain or Delayed

When Right of Way Capital funding for projects is uncertain or delayed, either of the following clauses shall be used in all Right of Way Contracts to avoid future liability due to lack of funds. The Regions/Districts have the option of using either clause below, one of which allows for the payment of interest until funding is available, or the other provides for cancellation of the transaction.

Supplemental interest payment clause due to funding constraints:

"It is understood and agreed that to complete this transaction, sufficient funds must be made available to the State by the [*insert appropriate funding body/authority, i.e., United States Government and/or the California State Legislature, Local Transportation Authority, etc.*]; therefore, the close of this escrow may be delayed until sufficient funds are appropriated. It is further understood that, in the event the transaction funds have not been deposited into escrow within 120 days of the State's execution of this agreement, interest shall accrue on the amount shown in Clause [*insert appropriate clause number, i.e., 2, 2(A), etc.*] above commencing 120 days after the State's execution of this agreement until the close of escrow controlling this transaction. The rate of interest will be the rate of earnings of the Surplus Money Investment Fund and computation will be in accordance with Sections 1268.350 and 1268.360 of the Code of Civil Procedure. The parties further agree that they will not institute a claim or legal action to seek damages, costs, fees, or any other remedies associated with the delay of escrow where the delay results from the lack of appropriated funds necessary to close escrow."

Cancellation clause due to funding constraints:

"It is understood and agreed that to complete this transaction, sufficient funds must be made available to the State by the [*insert appropriate funding body/authority, i.e., United States Government and/or the California State Legislature, Local Transportation Authority, etc.*]; therefore, the close of this escrow may be delayed until sufficient funds are appropriated. It is further understood that, in the event the transaction funds have not been deposited into escrow within 120 days of the State's execution of this agreement, either party may cancel the agreement at any time subsequent to the expiration of the 120 days by giving written notice to the non-canceling party. Written notice shall be delivered by first-class mail as follows: [*insert*

© 1994-2025 California Department of Transportation. All rights reserved.

mailing addresses if not already included elsewhere in agreement]. The parties further agree that they will not institute a claim or legal action to seek damages, costs, fees, interest, or any other remedies associated with either the delay of escrow or the cancellation of this contract, and that cancellation is the sole remedy in the event either party exercises its rights under this clause."

8.01.33.00 Filing of Right of Way Contracts and Other Papers in Official Files

All correspondence, memoranda and other papers or data relating to a particular right of way transaction shall be placed in the proper official office file for such transaction. This shall also include executed but unapproved contracts which have been superseded by new contracts. Where a project has a Federal Aid Project Number, the contract, deed and all other documents and correspondence in the parcel file must have the project number listed thereon.

8.01.34.00 Review of Acquisition Parcel Files

The Regions/Districts are responsible for ensuring compliance with Federal, State, and Departmental policies and procedures. Review of Acquisition parcel files is the responsibility of the District Acquisition Senior. The Senior may use the acquisition checklist (Exhibit 08-EX-12 [internal Caltrans link]) as a guide to the items which are the most sensitive. The checklist is not intended to include all items which may be the subject of a review.

8.01.35.00 Reimbursement of Litigation and Transfer of Title Expenses – Appeal Process

Federal regulations require that property owners be reimbursed for expenses incidental to the transfer of property as well as specified litigation expenses. These are enumerated in 49 CFR 24.106 and 24.107. FHWA also requires that property owner have an appeal process available if reimbursement or direct payment by the State is unavailable. The expenses listed under 24.106(a) are paid by the State as part of our normal process. The Code of Civil Procedure, Section 1265.240, prohibits the State from paying the expenses listed in 24.106(a). A procedure is in place for reimbursement of expenses listed in 24.106(a). Those listed in 24.107(a), (b), and (c) are paid at the direction of a court order. There does not appear to be an area under which owners would have expenses borne by themselves. However, property owners shall be advised that if they have incurred any of the expenses listed for which they

© 1994-2025 California Department of Transportation. All rights reserved.

have not been reimbursed, they have the right to appeal to the Director of the Department for reimbursement. To qualify for reimbursement, such expenses must have actually been incurred, be reasonable, and not at the option of the owner.

8.01.36.00 Hazardous Materials (Including Hazardous Waste and Contamination)

It is the *policy* of the Department, in the development of transportation projects, to fully consider all potential aspects of hazardous materials (including hazardous waste and contamination) sites. See Section 7.04.12.01, Hazardous Materials/Hazardous Waste General. Where hazardous materials are involved in any kind of property acquisition, the Department must ensure that adequate protection is afforded employees, workers, the public, and the environment both during and after construction. See Section 8.16.00.00 for a complete discussion on how Acquisition is to handle Hazardous Waste and Hazardous Materials. See Section 7.04.12.00, et seq., for Appraisals' involvement.

Be aware that there are times when property cannot be acquired at all because the long-term liability and risk uncertainty outweighs the benefit. Examples may include but not limited not to landfills, industrial properties, etc. The risk/benefit will be documented by the project development team using form Request for Acquisition of Contaminated Property (RACP) (ENV-0002) (internal Caltrans link). Depending on the level of liability and risk, the decision to acquire the property will be decided by the District Director or Chief Engineer.

It is the Department's policy to not pay for the cleanup of hazardous materials generated by other responsible parties. Any property known or suspected to be contaminated with hazardous materials will not be acquired or possession taken unless:

A. The suspected site has been sufficiently investigated to the point of providing a reasonable assurance that no significant problem exists; or

B. The confirmed site has been cleaned up by the responsible party prior to possession by the Department; or

C. The estimated cost of the cleanup has been reflected in the appraisal and acquisition process in those cases where the Department will do the cleanup work and a Request or Acquisition of Contaminated Property (RACP) that fully evaluates liability is prepared and approved

© 1994-2025 California Department of Transportation. All rights reserved.

by appropriate executive management documented in form ENV-0002.

The Department's policy is not to acquire contaminated property. Any exception must follow the approval process outlined in PD-02 (Request Acquisition of Contaminated Property) and approved by the District Director and/or Chief Engineer. This is outlined in more detail in SER Volume I, Chapter 10 and Section 8.16.01.01.

A hazardous material is any material that, because of its quantity, concentration, or physical or chemical characteristics, is or is potentially injurious to human health and safety or harmful to the environment if released into the workplace or the environment. When such hazardous materials are released or discarded, they may become a hazardous waste or cause contamination.

8.01.37.00 Incentive Payment Program

On June 12, 2014, the Division Chief of Right of Way and Land Surveys signed a memorandum implementing an acquisition incentive payment program. This memorandum is included as Exhibit 08-EX-29. Regions and Districts must adhere to the requirements of the memorandum and use the following clause in the Right of Way contract when incentive payments are used on a project:

> "In addition to the Fair Market Value, it is agreed by and between the parties hereto that the amount in clause ## above includes the sum of $_____ as an incentive to the grantor for the timely signing of this Right of Way Contract. This incentive payment offer expires sixty (60) days from the Initiation of Negotiations (DATE)."

© 1994-2025 California Department of Transportation. All rights reserved.

8.02.00.00 – APPRAISAL SUMMARY STATEMENTS AND VALUATION SUMMARY STATEMENTS

8.02.01.00 General

Appraisal Summary Statements and Valuation Summary Statements consist of a form and transmittal letter. The letter describes certain legal rights of the owner and lessees having a compensable interest in the property being acquired. The form sets out some specific financial data relative to land, improvements, and damages.

All owners and tenants having a cumulative compensable interest of $15,000 or more in land, buildings, structures, and other improvements located on the real property to be acquired, must receive both an Appraisal Summary Statement (Exhibit 08-EX-15A) and a Summary Statement Relating to the Purchase of Real Property or an Interest Therein (Exhibit 08-EX-16) (internal Caltrans link) on the first acquisition call when price is discussed (49 CFR 24.102[e]).

All owners and lessees having a compensable interest in land, buildings, structures, other improvements, or a business located on the real property to be acquired, must also receive both an Appraisal Summary Statement and Summary Statement Relating to the Purchase of Real Property or an Interest Therein (internal Caltrans link), or if the parcel is valued using a Waiver Valuation, then both a Valuation Summary Statement (Exhibit 08-EX-15C) and Summary Statement Relating to the Purchase of Real Property or an Interest Therein (internal Caltrans link) must be provided on the first acquisition call when price is discussed.

The Summary Statement Relating to the Purchase of Real Property or an Interest Therein shall be modified depending on whether an Appraisal Summary Statement or Valuation Summary Statement is utilized. When an Appraisal Summary Statement is used, item 4 of Exhibit 08-EX-16 (internal Caltrans link) will refer to the "Appraisal Summary Statement." When using the Valuation Summary Statement, item 4 of Exhibit 08-EX-16 (internal Caltrans link) will refer to the "Valuation Summary Statement," and the word "valuation" should appear in items 4.a. and 4.b.

Appraisal and Appraisal Summary Statements must be prepared and the offer made prior to proceeding with a condemnation action.

© 1994-2025 California Department of Transportation. All rights reserved.

Exhibit 08-EX-15B (internal Caltrans link) covers "Loss of Goodwill." Depending on whether or not this "Loss" has been appraised will determine which statement needs to be checked.

When a Loss of Goodwill appraisal report is approved, a statement indicating the amount of the loss shall be delivered at the time of initiation of negotiations for such loss. While a "business" is not an interest in real property, the Summary Statement Relating to the Purchase of Real Property or an Interest Therein shall be delivered to cover other aspects of the acquisition. In some instances, consultation with the Legal Division may be advisable prior to offering the amount of the Loss of Goodwill Appraisal.

8.02.02.00 Statement Types

Appraisal Summary Statements are to be used for appraisal reports only, whether full narrative or memorandum format. When an appraisal report was not prepared or when a Waiver Valuation was prepared, then the Valuation Summary Statement must be used. All Appraisal Summary Statements for the purchase of real property, or interest therein, are to be on a single basic form (Exhibit 08-EX-15A) (internal Caltrans link) with the data provided varying dependent upon the type of property and the appraisal approaches utilized. If lessees or other interest(s) are involved, they are to be appropriately identified in the space provided for "Owner."

NOTE: Federal regulations require that the Summary Statement identify any separately held ownership interest in the property, such as a tenant-owned improvement, and indicate that such interest is not covered by the offer. In such cases, appropriate information is to be added in the space available at the bottom of page 3 of Exhibit 08-EX-15A (internal Caltrans link), and the bottom of page 1 of Exhibit 08-EX-15C (internal Caltrans link).

All Valuation Summary Statements for the purchase of real property or interest therein, valued at $25,000 or less, using a Waiver Valuation or other non-appraisal process, are to be on a single basic form (Exhibit 08-EX-15C) (internal Caltrans link) with the data provided varying dependent upon the type of property, and the valuation approaches utilized. If lessees or other interest(s) are involved, they are to be appropriately identified in the space provided for "Owner."

© 1994-2025 California Department of Transportation. All rights reserved.

The Appraisal Summary Statement (Exhibit 08-EX-15A) and Valuation Summary Statement (Exhibit 08-EX-15C) (internal Caltrans link) shall also include a mandatory paragraph entitled "Summary of the Basis for Just Compensation" (see Sections 7.02.03.00 L., 7.02.12.00, and 7.02.13.00).

This paragraph prepared by the appraiser is to be included verbatim by the Acquisition Agent following item 3, under the "Basis of Valuation" section of the summary statement.

Exhibit 08-EX-15B (internal Caltrans link) is for Loss of Goodwill Appraisal Summary Statements.

8.02.03.00 Lessee's Interest

At the initiation of acquisition discussions for an ownership which is subject to a lease, and prior to making any offer, the Acquisition Agent will confirm the ownership of the improvements as between the parties with an offset statement. (See Section 8.04.15.00 and Forms RW 08-18A and RW 08-18B.)

Determination of compensation to be paid for any improvements shall be as a part of the real property to be acquired. This is notwithstanding the obligation of the tenant to remove any improvements at the expiration of the lease.

Separate Appraisal Summary Statements or Valuation Summary Statements and Right of Way Contracts will be delivered to the lessor and lessee at the time initiation of negotiations are made. Sections 8.04.15.00, 8.04.15.01, 8.04.15.02, and 8.04.15.03 must be reviewed prior to preparing summary statements.

Each Appraisal or Valuation Summary Statement in a Lessor/Lessee Acquisition will indicate which improvement, machinery, equipment or improvements pertaining to the realty is claimed or owned by each of the parties.

8.02.04.00 Revised Offers

When the appraisal or Waiver Valuation is revised, the owner and/or lessee will be provided with a new Appraisal Summary Statement or Valuation Summary Statement, reflecting the revised appraisal or Waiver Valuation.

© 1994-2025 California Department of Transportation. All rights reserved.

8.02.05.00 Expert Witness Appraisals for Condemnation Purposes

Expert Witness appraisals, whether prepared by staff or independent appraisers, are obtained for litigation purposes. These are privileged, and Appraisal Summary Statements will not be required.

© 1994-2025 California Department of Transportation. All rights reserved.

8.03.00.00 – RIGHT OF WAY CONTRACTS AND CONTRACT APPROVALS

8.03.01.00 Form of Right of Way Contracts

Right of way transactions are usually completed through use of the approved form, appropriate insert sheets and approved clauses. (Forms RW 08-03, RW 08-04, [internal Caltrans link] and RW 08-05.)

Special agreements with other public agencies, railroads, etc., may require the use of a special form in lieu of a Right of Way Contract.

All Contracts should consist of standardized clauses, primarily. Most aspects of acquisition are covered by use of the appropriate standard clauses.

The wording of the clauses should not be altered unless absolutely necessary. If situations arise which require modification of these clauses or use of special clauses, the Memorandum of Settlement (MOS) will explain and justify the special wording. A minimum of two signed copies of the Contract shall be secured from the grantor.

Revisions, deletions, additions, or attachments to the Contract shall be initialed by the grantor(s) and the Agent.

8.03.02.00 Contract Obligations

The Contract must include all the terms and conditions mutually agreed upon and reflect a complete agreement on all matters involved in the acquisition. No obligation other than those set forth in the Contract will be recognized and the performance of those terms and conditions relieves the State of all other obligations or claims.

The State can enter into a contractual obligation involving a contingency occurring more than three years after acceptance of the Contract only in exceptional cases.

© 1994-2025 California Department of Transportation. All rights reserved.

8.03.03.00 Amendments to Right of Way Contracts

Changes required by either the State or State's grantors may require revision of portions of approved contracts. Such revisions are to be accomplished by an amendment to the Contract. The format for an amendment is shown as Exhibit 08-EX-19.

8.03.04.00 Canceling or Superseding Signed Right of Way Contract

A signed Contract (regardless of approval status) may be superseded or canceled and returned to the grantor only with the written consent of the DDC-RW or Supervising Agent in charge of the Acquisition Branch. If the Contract has been scheduled for payment, a letter with reference to the appropriate schedule number should be sent to the title company informing them that the State's warrant should be returned to the Disbursing Officer in Sacramento. The District should advise HQ RW that the Contract has been canceled or superseded and the title company has been instructed to return the warrant. This procedure applies only to those cases where the Contracts are being canceled and superseded and not to Contracts to be amended.

Where an entirely new Contract is being substituted for a prior Contract, the following clause is to be used.

> "This Right of Way Contract shall supersede, cancel, and void all terms and conditions of that certain Right of Way Contract heretofore entered into between the parties hereto on (date)."

8.03.05.00 Acquisition from an Employee of the California State Transportation Agency

Where the grantor is an employee of the Agency, the Agent, in preparing the Contract, shall make a notation immediately after the grantor's name indicating Civil Service Title and place of employment, e.g.:

John Doe
Senior Right of Way Agent
District 13
Department of Transportation

© 1994-2025 California Department of Transportation. All rights reserved.

8.03.06.00 Payment Clauses

The standard Contract contains a printed payment clause. There are a number of different situations which may require specialized payment clauses. A series of specialized clauses are in Section 8.05.00.00 under .04, .05, .09, .10, .11, and .13.

8.03.07.00 Contracts Which Require Approval by HQ RW

The only transaction that requires HQ RW approval is one in which a commitment is made by the State to acquire private property for private use. For this type of transaction, a transmittal memo must accompany the contract submitted to HQ RW for approval, providing background data on the transaction.

8.03.08.00 Contracts Approved by District Office of Right of Way

The District may approve all Contracts with the exception of those specifically requiring HQ RW approval as listed above and listed in the current District delegations. Prior to acceptance of the Contract on behalf of the State, one copy of the signed Contract must be certified as to availability of funds by the Division of Accounting.

The MOS and signed Contracts, including the one certified by the Division of Accounting, shall be processed for acceptance as follows:

A. For parcels $25,000 or less cash to grantor, the MOS shall be recommended for approval by the Acquisition Agent and approved by that agent's Senior. The same Senior will approve the Contract by signing, on behalf of the State, both copies of the Contract previously signed by the grantor. Parcels which would otherwise qualify under this provision except that a nonsubstantial administrative settlement has pushed that cash to grantor to over $25,000 can be processed in the same way; however, the administrative settlement must be approved in accordance with the provisions of Manual Section 8.01.28.00.

© 1994-2025 California Department of Transportation. All rights reserved.

B. For parcels with more than $25,000 cash to grantor:

1. The MOS shall be recommended for approval by the Acquisition Agent and the Senior Agent Acquisition Branch.
2. If the Contract meets all of the criteria set forth above, the Supervising Agent for Acquisition or the DDC-RW will approve the Contract by signing, on behalf of the state, both copies of the Contract previously signed by the grantor.

These are the minimums required and no further delegations should be made. Any District Director may wish to retain the right to accept the Contract on behalf of the State. An executed copy of the Contract is mailed or delivered to the grantor after acceptance.

A signed copy of the MOS and a reproduced or conformed copy of the Contract will be forwarded with the schedule package to the Division of Accounting. Scheduling procedures may be initiated as soon as the Contract has been accepted by the district.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.00.00 – TITLE EXCEPTIONS

8.04.01.00 General

Normally, a preliminary title report is obtained on every property to be acquired. There are instances, however, where no report will be obtained or just a "Statement of Record Ownership" will be obtained. Then, it is incumbent on the Appraiser and the Acquisition Agent to examine the county records to determine the condition of title. This would include vesting information, liens, encumbrances, easement, covenants, conditions and restrictions, leases, reservations, taxes, assessments, bonds, trust deeds, mortgages, contracts of sale and bonds. Every effort to secure clear title for the State must be made. Items which cannot be cleared will have to be taken subject to in the Contract.

The preliminary title report must be analyzed to determine which exceptions will be cleared and which will remain and title to be taken subject to the encumbrance. All encumbrances which will appear as exceptions in State's policy of title insurance must be included in the Contract in sufficient detail to be readily and adequately identified. Those involving the public record should include the appropriate book and page or date and instrument number.

Since the property owner will be obligated to deliver title to the State as specified in the Contract, liens and encumbrances not listed must be cleared before payment is made. The Acquisition Agent should assist the property owner in clearing title of such liens and encumbrances.

If an encumbrance affects a portion of the grantor's land other than that being acquired by the State and it cannot be eliminated, the encumbrance must be shown in the Contract and proper explanation included in the MOS.

All encumbrances adverse to State's title must be cleared unless adequate reason clearly justifies taking title subject to such encumbrances. Consider both the actual and potential effect of each exception on State's title. Any title encumbrance or subordinate interest to be cleared by separate Contract must be taken subject to in the Contract with the fee owner. This will provide a basis for clearance of the encumbrance or interest as a separate transaction even though the separate transaction is being processed concurrently with the parent transaction.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.02.00 Clearance of Unrecorded Interests

The standard form of title insurance policy insures the title to the property predicated on matters disclosed only by the public records. The Acquisition Agent must assume full responsibility and do those things necessary for protecting the State against loss due to any matters affecting the title which do not appear of record.

The law provides that a buyer is bound by the constructive notice afforded by the public records and such notice to which buyer is exposed. A purchaser is deemed to have notice of such interests as would be disclosed by an investigation of ground conditions. Some items which inspection of the property should disclose are:

- Parties in possession under an unrecorded deed or contract of purchase;
- Community driveways, pole lines, pipe lines, irrigation ditches, or roadways indicating easements or rights of way which do not show in the title report;
- Streams, lakes, rivers, or oceans which may affect boundaries;
- Overlapping or encroaching improvements;
- Violations of restrictions or zoning ordinances.

Although the title company normally insures against loss sustained by reason of a forgery, the only precaution they ordinarily take to justify such insurance is the requirement of a statement of identity from the grantor. A policy of title insurance insures the State against loss sustained by reason of a forgery only to the amount of the insurance.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.03.00 Instruments to Clear Title

Standard right of way forms should be used to clear or eliminate interests affecting title. If there is no standard form, ask the title company for an acceptable instrument. If State's grantor agrees to clear a subordinate interest, the instrument may be in favor of such grantor rather than the State. The Contract shall specifically obligate grantor to eliminate such interest at grantor's sole cost and expense.

Whenever a subordinate interest is cleared by Quitclaim Deed in favor of State and no payment is to be made to the interest holder, the District will insert the following words:

"without any demand for monetary or other consideration" immediately after the printed words,

"do hereby release and quitclaim to the State of California" as stated in the preamble of Quitclaim Deed forms.

8.04.04.00 Grantor's Indemnification

Where the State is acquiring title subject to exceptions of a questionable nature, the appropriate indemnification clause must be in the Contract. The MOS must contain sufficient information supporting the acceptance of title subject to defects and imperfections. If the exception is specifically listed under Paragraph 2(A) of the Contract, use Clause 1, otherwise use Clause 2.

1. "In consideration of the State's waiving the defects and imperfections in the record title, as set forth in Paragraph 2(A), the undersigned Grantor covenants and agrees to indemnify and hold the State of California harmless from any and all claims that other parties may make or assert on the title to the premises. The Grantor's obligation herein to indemnify the State shall not exceed the amount paid to the Grantor under this contract."

2. "In consideration of the State's waiving the defects and imperfections in all matters of record title, the undersigned Grantor covenants and agrees to indemnify and hold the State of California harmless from any and all claims that other parties may make or assert on the title to the premises. The Grantor's obligation herein to indemnify the State shall not exceed the amount paid to the Grantor under this contract."

See also Section 8.01.02.09 (Government Code Section 14662.5).

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.05.00 Covenants, Conditions and Restrictions

Title may be taken subject to the conventional, general, or individual type of tract restrictions, provided the nature and effect are known and considered. Unusual covenants or conditions which restrict land for a specific use, such as park purposes, school purposes, railroads, etc., shall be considered particularly as to a possible forfeiture of title upon breach or violation. Conveyances to clear such reversionary interests should be secured as necessary.

8.04.06.00 Easements – General

All easements are to be considered as to both the present and future effect on property being acquired. The location of the easement in relation to the part taken is to be determined prior to preparation of the Contract. If an easement constitutes a present or future adverse interest in the part taken, it should be eliminated by appropriate instrument prior to scheduling if possible. Where the nature of the easement does not warrant the cost in time and effort to eliminate, it should be handled in conformance with Sections 8.04.01.00 and 8.04.04.00.

8.04.07.00 Easements – Gross or Appurtenant

All easements in favor of third parties for personal or business use, such as driveways, roads or pipelines, whether in gross or appurtenant, should be cleared prior to scheduling. If payment is to be made to clear an easement, this must be taken into consideration in the transaction with the fee owner. This clearance should be done concurrently with the fee acquisition.

Elimination of easements in gross which can be arranged through one transaction covering the entire project may be delayed if it is advantageous from the standpoint of efficiency or expediency.

The effect and intended disposition of such easements must be reported both in the MOS and schedule letter. It is incumbent on the DDC-RW to see that all such easements are satisfactorily cleared prior to certifying the project for construction.

Interests not cleared prior to the close of escrow must appear as an exception in the Contract since they will also appear as exceptions in the Policy.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.08.00 Easements – Blanket

The interest of easement holders in so-called "blanket" or "floating" easements should be cleared if the choice of location has been exercised. Such easements affect title to the entire property and will be shown as encumbrances in title policies unless eliminated by proper conveyance. Title Company agreements to eliminate such easements should be in writing and the information included in the schedule letter and escrow instructions.

8.04.09.00 Easements – Obsolete

Easements or rights that are discovered by either observation or inquiry to be obsolete, abandoned, extinct and of no present or future adverse effect are nonetheless to be listed in the Contract and a brief but adequate explanation included in the MOS.

8.04.10.00 Utility Easements

Public or private utility easements may or may not have a facility located (overhead, surface or underground) therein. Clearance or elimination of these facilities from the right of way being acquired will be the responsibility of the Acquisition and/or the Utility Relocation Branch.

The elimination of a private easement and clearance of any facility located therein is the responsibility of the Acquisition Agent. This is usually done by Quitclaim Deed with an obligation in the Right of Way Contract to secure a replacement easement, if necessary. Relocation (i.e., an irrigation pipeline) may be provided for by payment in the Contract. If the facility is to be removed and use discontinued, it may be desirable to have removal by the road contractor. Relocation of a private facility may be handled by or with the assistance of the Utility Relocation Branch.

If the easement is public (easement in gross), first determine whether a facility exists within the easement. Visual inspection should suffice for surface and overhead facilities. The Utility Coordinator must consult with the vestee of the easement to assure that no other facility exists in the area.

© 1994-2025 California Department of Transportation. All rights reserved.

The Acquisition Agent and the District Utility Coordinator must jointly determine whether to take title subject to the easement where no facility exists. The utility company may have plans to use the easement for a future facility. Taking title subject to the easement will thus create a situation in which additional costs will have to be borne by the State. The Utility Coordinator should enter into an agreement with the company recognizing such future use.

The Acquisition Agent cannot assume that when a public utility easement exists on property to be acquired, the disposition of such easement is the sole responsibility of the Utility Coordinator. The Utility Coordinator must be advised of the existence of any easement without a facility, including its dimensions, so that a reasonable determination may be made whether to take title subject to the easement or if discussions between the utility company and Utility Coordinator are necessary.

The District Utility Coordinator will arrange for relocation of all facilities installed in public utility easements. The substitute easement will be acquired either by the company or the Department at the request of the company. If acquired by the Department, the location shall be agreeable to the company. This replacement area is subject to the same controls and clearances that apply to regular highway rights of way, including hazardous waste clearances.

Acquisition of right of way from a utility company involves a variety of approaches, i.e., fee or easement; vacant, site or corridor; improved site or corridor; replacement right of way; and consent to condemnation for exchange.

The Acquisition Agent should be thoroughly knowledgeable with the procedures involved in acquiring right of way from a utility company. Reviewing appropriate sections of the Utility Procedure Chapter will provide insight. Discussions with the District Utility Coordinator are essential.

8.04.11.00 Judgments, Attachments, Mechanics' Liens, Etc.

Appropriate releases or satisfactions of all such exceptions are to be secured and filed or recorded. Quitclaim deeds are not effective in eliminating such liens. Refer to the Title Handbook and discuss these matters with the title company to determine the proper procedures.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.12.00 Release of Liens Under Unemployment Insurance Act

A. A release of lien shall be requested by letter addressed to the Employment Development Department (EDD), Attention: Tax and Collection Section, 800 Capitol Mall, Sacramento, California 95814. The letter shall contain the reason for the request, the legal description of the property and the amount of the consideration. A copy of the title report and the escrow instructions shall be attached to the letter.

B. Tax Collection Section (EDD) will forward a demand for the delinquent amount to the escrow company handling the transaction. After satisfaction, a release of lien will be recorded in the county in which the lien was recorded.

C. When it is necessary to condemn land encumbered by lien(s) of the EDD, the District shall, prior to filing the complaint, forward a letter to the Chief, Tax Collection Section, at the above address informing of our proposed condemnation action. The letter shall indicate the legal description and appraised value of the land and include a copy of the title report. The Chief, Tax Collection Section, will immediately determine EDD's interest in the land, if any, and telephone the Agent with the results of such determination. This procedure should eliminate naming EDD a defendant in any condemnation action.

8.04.13.00 Court Actions

Title may be taken subject to the State's pending condemnation action. Elimination of other court actions is generally required.

8.04.14.00 Consent to Dismissal and Deposit Waiver

In all instances involving right of way on which the State has filed a condemnation suit, *it is imperative that the dismissal clause be included in the Right of Way Contract.*

8.04.14.01 Dismissal Clause

"The undersigned Grantor(s) hereby agree(s) and consent(s) to the dismissal of any eminent domain action in the Superior Court wherein the herein described land is included and also waive(s) any and all claims to any money that may now be on deposit in said action."

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.15.00 Negotiating Clearance of Lessee Interests

The interest of a lessee or other legal occupant, e.g., tenant, is cleared through either a Quitclaim Deed running to the lessor or to the State or through the eminent domain process. Leases that are in effect must either be eliminated or assigned to the State. If they appear in preliminary title reports as exceptions but are no longer in effect, they will be eliminated if possible. Title companies will generally disregard a lease which is no longer in effect on receipt of conclusive evidence. This type of evidence is usually provided by the owner of the property. An explanation and justification must be included in the MOS on any lease that is impossible to eliminate will be listed as an exception in the Contract.

When the State must take assignment of the lease, the Agent shall obtain "Lessee Offset Statement" signed by the lessee. This sets forth the pertinent facts of rental payments made to the lessor, credits the lessee claims, if any, etc., (a sample "Offset Statement" is shown as Forms RW 08-18A and RW 08-18B).

Sufficient information is to be set forth so that the State will have full knowledge of any offsets, claims or defenses under the lease that are inconsistent with those of the lessor. This information may dictate terms of the Contract or escrow instructions covering the transaction. Exhibit 08-EX-20, "Assignment of Lease-to-State," should be attached to grantor's copy of the lease and executed by grantor upon delivery of the lease to State. An Offset Statement should also be utilized to clarify ownership of realty. This would be appropriate regardless of whether the tenant is a lessee or month-to-month occupant.

Whenever there is any question as to the interpretation or intent of the conditions in a lease which is being assigned to the State, the District should submit a copy of the lease to HQ RW and/or the Regional Legal Office for review and advice before concluding the transaction.

A lessee may have a compensable interest in improvements which they have installed on the property. The lessee must be offered the salvage value of lessee owned improvements or the value they contribute to the property, whichever is greater. This would apply provided the lease does not call for them to be owned by the lessor at the end of the lease. Agreement between the lessee and lessor as to ownership of the improvements is essential. The lessee will be given a separate offer for the improvements, provided the lessee secures a written waiver of interest from the lessor. If agreement is not

© 1994-2025 California Department of Transportation. All rights reserved.

reached, an unsegregated statement of value is to be made to all of the parties.

The staff appraiser will ascertain ownership of improvements and segregate values in the appraisal. Either the offset statement or some other written confirmation as to ownership must be secured prior to settlement. The lessee shall not be deprived of payment for improvements on the property when the State acquires the leased fee. Based on State and Federal Court cases, the State should not attempt to assume the rights of a lessor and cancel a lease to avoid payment for improvements.

Settlement of lessor/lessee interests separately is a permissible procedure. It may not be feasible without agreement between the lessor and lessee. Usually disagreement occurs over either the ownership of improvements or the existence of a bonus value in a leasehold interest. The lessee may lose the right to a bonus value because of a condemnation clause in the lease.

A lessee, in relocating a business, may prematurely vacate the premises and in so doing, give up or waive valuable rights. The Agent should ensure through early contact that the lessee is fully informed so the lessee does not inadvertently forfeit rights to compensation for relocation benefits or possible loss of goodwill.

Acquisitions which involve lessor/lessee relationships call for thorough analysis by the Agent. Such acquisitions may have variations that cannot be covered by broad or general rules. The following statements may prove helpful in minimizing difficulties with these acquisitions.

8.04.15.01 Offset Statement

A document completed and signed by the lessor and lessee which sets forth lease information, such as length of lease, amount of rent, how rents are paid, prepaid rents or any claim for offsets for rent and ownership of improvements, shall be considered part of the realty.

8.04.15.02 Ownership of Improvements

If not segregated in the appraisal, the ownership of improvements should be ascertained prior to initiation of negotiations and in any event, confirmed. If ownership cannot be resolved, an unsegregated statement of value is to be made to each of the parties. The appraisal should identify those improvements of which ownership is in dispute.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.15.03 Unsegregated Statements of Value

If the lessor and lessee are unable to agree regarding ownership of improvements on the property, then an unsegregated statement of value shall be made. The owner/lessor should be given a reasonable time in which to resolve disputes as to ownership. If there is no agreement, then parties who are to receive Appraisal Summary Statements or Valuation Summary Statements shall have an entry on the Statement that the amount set forth is the value of the required property and that the Statement has been prepared in such a manner because ownership of some part of the property has not been resolved. Care should be exercised when parties are given Appraisal Summary Statements or Valuation Summary Statements prepared in this manner. The Agent shall ensure that the parties understand the meaning and content of an unsegregated statement of value and why it is being handled in this manner.

The District, and specifically the Senior Acquisition Agent and Agent, should not hesitate to consult with the Legal Division or HQ RW at the earliest time feasible on areas not covered here or for assistance or interpretation of these guidelines.

This section has dealt primarily with the termination of the interest of an occupant of property other than the fee owner. The Agent must recognize that these occupant interests often involve leasehold interests, lessee-owned improvements, possible loss of goodwill, relocation benefits and relocation of business. The Agent should have a full understanding of the acquisition procedures as they involve relocation assistance and realize that settlements must not include a duplication of payment.

8.04.15.04 Bonus Value in a Leasehold Interest

If noted in the appraisal, the terms of the lease must be carefully reviewed. A condemnation clause in the lease could eliminate the lessee's bonus value. This situation may have to be resolved in court.

8.04.15.05 Value of Improvements

Lessees are entitled to the value their improvements contribute to the property or their salvage value, whichever is greater, provided the lease does not call for ownership rights to transfer to the lessor in the event of condemnation.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.15.06 Presumption of Interest

A lessee or tenant in possession is to be presumed to have some interest in the property until the contrary is established.

8.04.15.07 Acquiring Lessee Interest Separately

A lessee interest may be acquired separately provided the lessor agrees in writing that the items covered in such settlement are not claimed by the lessor.

8.04.15.08 Lessor's Right to Cancel Not Available to State

After acquiring the leased fee from the lessor, the State shall not attempt to use any lease cancellation clause to acquire improvements at less than their salvage value or contributory value, whichever is greater.

8.04.15.09 Premature Vacation

A lessee should be cautioned regarding the potential consequences involved if a premature vacation of the property occurs. At or about the initiation of the appraisal process and prior to initiation of negotiations, the lessee may find it desirable to relocate. In this circumstance, the district shall advise the lessee that relocation payments cannot be made until initiation of negotiations have been made to acquire the property. Occupants must be made aware that they may lose RAP eligibility if they move before the initiation of negotiations. However, there are exceptions in the event a Notice of Intent to Acquire has been issued. See Section 10.01.08.01.

8.04.15.10 Bonus Value Not to Be Offered to Lessee

If a bonus value is shown in the appraisal, the Agent is not to offer it to the lessee. Ultimately, the lessor and lessee will either agree as to its existence and value or the court will decide. The bonus value in a leasehold interest is included in the appraisal for the guidance of the Acquisition Branch and may be helpful in discussions with the owner/lessor. It may be suggested to the lessor that because of the terms of the lease, the lessee's interest may be more than a compensable interest in the improvements.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.15.11 Condemnation Clause

A lease may contain what is commonly referred to as a "condemnation clause." This clause usually provides that in the event the property is taken under the actual or potential exercise of eminent domain, the lease shall terminate; lessee will pay prorated rent to the date of vesting or possession by condemnor; and lessee has NO claim to the compensation paid to the lessor by the condemnor. In a partial acquisition, the lease may provide the lessee with the option to terminate the lease or continue in occupancy with a proportionate reduction in rent. Since there are many variations and clauses in use, it is essential that a copy of the lease be secured for analysis. It may be appropriate for the Acquisition Senior to secure advice from the Legal Division.

8.04.16.00 Clearance of Adverse Interests When Acquiring Access Rights Only

In cases involving acquisition of access rights only, relinquishments or subordinations are to be secured from all parties whose interest would be detrimental to the achievement of access control. Ordinarily, these include trustees and beneficiaries under deeds of trust; mortgages; lessees; holders of liens, the foreclosure of which would either nullify or jeopardize the rights being acquired by the State; vendees in agreements to convey; and holders of easements or rights of way of any kind whose ability to utilize and enjoy such easements or rights of way would be materially diminished or damaged by State's acquisition of access rights to the subject property.

Where clearance of a specific interest hereunder is deemed not feasible or necessary, an explanation of the circumstances and justification for nonclearance is required. (See Section 8.65.06.00 for provision for CLTA endorsement.)

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.17.00 Clearance of Oil, Gas, Other Hydrocarbons and Mineral Interests in Fee Acquisitions

The Department does not generally acquire these interests when rights of way are being acquired in either a proven or potential bearing area. If local conditions or records indicate either actual or potential bearing land, the Deed Clause DM-4 should be included in deeds to the State describing any portion of such land. This will reserve the rights to the current holder of them.

When a fractional interest appears as an exception to the description of land to be acquired, the interest shall be shown as an exception in the deed to the State. If the owner of the land is also vested with a fractional interest and desires to retain same, the DM-4 Clause shall be included in the deed. The deed to the State should be definite as to which fractional interest is excepted from a description and which fraction is being reserved by the fee owner. A Quitclaim Deed to the surface rights and containing the DM-4 Clause is used to secure fractional interest of other than the fee owner.

A reasonable effort should be made to secure such rights. If the owner or owners cannot be located, completion of the acquisition of the required right of way need not be held up. Consider the potential risk to the State in not clearing such interest. If the risk is not material, title may be accepted by the State subject to such interests.

8.04.18.00 Clearance of Oil, Gas, Other Hydrocarbons and Mineral Interest in Easement Acquisitions

In clearing these interests in easement acquisitions, use the same procedure as in fee acquisitions except the description in easement deeds to the State will not contain the outright exception of interests vested in the fee owner of the land. The DM-4 Clause will be used in the easement deed from the fee owner of the land.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.19.00 Clearance of Oil, Gas, Other Hydrocarbon and Mineral Leases

When property is encumbered with a lease, a Quitclaim Deed containing the DM-4 Clause should be obtained to eliminate surface rights of lessees. Leases which endanger the present or future integrity of rights being acquired shall be cleared if the lease is active and if production of products is either present or prospective.

Community leases may not be canceled as to any portion without the consent of all parties in the lease.

If an operating well or mine is to be acquired, it will be necessary to clear all community lease interests in the facility and the surface rights to the affected portion of the leasehold by Quitclaim Deed and Contract.

If operating facilities are not affected, a Quitclaim containing the DM-4 Clause should be secured from the lessee. Such a Quitclaim Deed will not cancel the community lease of record as to the property acquired by State but will provide evidence of lessee's consent and should be recorded.

If the lease has lapsed, either by time or by its terms, product has never been produced or operation has been abandoned, and clearance could be done only with difficulty or major expenditure of time, title may be taken subject to the effect of such lease. A full explanation of the conditions and reason for nonclearance of the lease shall be included in the MOS and schedule letter. The Contract must show that title is to be taken subject to the lease.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.20.00 Reservation for Operating Company Facilities Through Product Fields

When the acquisition of right of way (1) through proven operating fields where the operating company has a long-term lease which specifically provides that the lessee has surface rights including installations of pipelines, power lines, etc.; or (2) where the company owns the land in fee, where the location is not a proven or potential field, use the appropriate deed clause(s) reserving company's rights. See the RW Engineering Chapter.

These clauses shall not be used in acquiring right of way through undeveloped fields where the company owns fee title. In such areas, the product potential that may possibly exist can be developed without these reserved rights. In some instances, the lessee's rights under a lease are limited solely to the subsurface rights; therefore, before consenting to the use of these clauses, examine the terms of the lease to ascertain the extent of lessee's rights.

Where unusual conditions exist, modify the above-cited clause to reasonably fit the actual conditions.

Where the company is operating existing pipelines or other facilities pursuant to a prior right, such pipelines or other facilities shall be covered in the customary manner by joint use agreement.

8.04.21.00 Royalty Interest

Although royalty interests have been construed as an interest in the land itself, the multiple fractions into which royalty interests are commonly divided preclude their elimination. If deeds to the State contain our reservation clause, royalty interests may be ignored. The Contracts should show such interests as exceptions to which the State will take title.

8.04.22.00 Reservation by Grantor

Even though ground conditions or record title disclose no activity or exceptions, the DM-4 Clause may be inserted in the deed to the State at grantor's request.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.23.00 Real and Personal Property Taxes

These are defined and discussed in full detail in the Title Handbook. The appropriate chapters should be reviewed and the Acquisition Agent should be familiar with this information. All Contracts shall contain the statement when permanent rights are acquired:

"Taxes for the tax year in which this escrow closes shall be cleared and paid in the manner required by Section 5086 of the Revenue and Taxation Code, if unpaid at the close of escrow."

8.04.24.00 Tax Procedure – Acquisition of Entire Parcel

A. Delinquent taxes. The owner will be required to convey title free and clear of all delinquent city and county taxes. Delinquent taxes will normally be paid out of the escrow and supported by a bill from the taxing agency(ies). If the amount of the delinquent taxes exceeds the market value of the required property, the District may either:

1. Request the tax collecting agency to make the property available for sale and the District may then make a fair and reasonable bid. Or,

2. Request the tax collecting agency to accept a partial payment of the delinquent (unpaid) taxes in an amount mutually agreed on, but not exceeding the appraised value. Remaining delinquent taxes would be transferred to the unsecured roll in accordance with Section 5090 of the Revenue and Taxation Code.

B. Current Taxes. Sections 5085 and 5086 of the Revenue and Taxation Code provide for the payment of current taxes.

1. If title passes to the State between the lien date (first day of January) and the day prior to the beginning of the tax year, inclusive, neither the property owner nor the public entity that acquired the property is liable for taxes which, for description purposes, may be called "precurrent." It is permissible to take title subject to "precurrent" taxes. See Section 5085 of the Revenue and Taxation Code.

© 1994-2025 California Department of Transportation. All rights reserved.

2. If title passes during the tax year (normally July 1 to June 30 inclusive), that portion of current taxes including "delinquent" current taxes and any penalties and costs allocable to the part of the tax year ending on the day before the date of apportionment shall be paid through escrow at the close of escrow or from the award in eminent domain. If any of the current taxes are unpaid for any reason, they shall be transferred to the unsecured roll and are collectible from either the person from whom the property was acquired or the public entity that acquired the property.

   Current taxes, penalties, and costs allocable to the part of the tax year that begins on the date of the apportionment shall be canceled and are not collectible either from the person from whom the property was acquired or from the public entity that acquired the property.

C. Refund of Prepaid Taxes. Section 5096.7 of the Revenue and Taxation Code requires the taxing agency to refund any prepaid taxes in excess of the prorated amount due for the portion of the tax year prior to acquisition.

D. Procedure with Tax Collecting Agencies and Escrow Agent. Unpaid taxes which have been transferred to the unsecured roll are not the responsibility of the acquiring agency if timely written notice was given the tax collecting agency that funds are available for the payment of such taxes in an escrow or out of an award in eminent domain.

The District should notify the tax collecting agency of the impending purchase concurrently with sending the escrow letter. If any taxes are due and payable, a demand should be submitted to the escrow agent by the tax collecting agency. The escrow letter should advise the escrow agent there may be a demand for unpaid taxes and such demand is to be honored. The tax collecting agency should be notified that escrow is anticipated to close on or about a certain date.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.25.00 Disposition of Taxes, Assessments, Bonds – Acquisition of Access Rights Only

If the acquisition is limited to access rights, it must be determined whether nonpayment of taxes, assessments, or bonds would involve a risk of loss to the State.

Payment of either taxes, assessments, or bonds is generally not required if the compensation is nonsubstantial. If the compensation is substantial, taxes, assessments and bonds are to be paid. Latitude is permitted as long as the interest of the State in the acquired access rights has been considered and protected. Cancellation or segregation of taxes on an access-only acquisition is not required.

8.04.26.00 Tax Procedure – Partial Acquisitions

A. Delinquent Taxes. Unpaid or delinquent taxes should, in nearly all cases, be paid out of escrow or by the owner separately from, but prior to close of escrow. The owner must be required to convey title free and clear of all delinquent city and county taxes except in those rare cases in which we would take title subject to delinquent taxes.

   The following clause is to be included in all Contracts for clearance of delinquent taxes after the phrase "The State shall"

   > "Have the authority to deduct and pay from the amount shown in clause 2(A) above, any amount necessary to satisfy any bond demands and delinquent taxes due for any year except the tax year in which this escrow closes, together with penalties and interest thereon and/or delinquent and unpaid nondelinquent assessments which have become a lien at the close of escrow."

   This clause gives the State an option to have delinquent taxes from prior years paid from the escrow proceeds. This may not always be possible where the unpaid taxes exceed the payment to be made for the property.

   Title may be taken subject to delinquent taxes if the acquisition involves a small portion of a large holding and the remaining property is obviously adequate security for the tax lien.

© 1994-2025 California Department of Transportation. All rights reserved.

B. Current Taxes. Taxes for the tax year in which the escrow closes shall be cleared and paid in accordance with Article 5, commencing with Section 5081 of the Revenue and Taxation Code. This includes a request by State to the tax collecting agency for segregation of taxes and providing the segregation request to the escrow agent.

When a permanent easement is acquired in lieu of fee and as a partial acquisition, it will be in order to take title subject to current taxes.

The Contract on acquisitions handled through an internal escrow should provide for payment of taxes if the tax collecting agency has indicated they will segregate and make a demand.

8.04.27.00 State Inheritance Taxes

Effective June 9, 1982, Inheritance taxes were eliminated through the initiative process. The following instructions apply only to any tax liability prior to that date. The District should cooperate with and advise the State Controller's Office of the acquisition and proposed payment where there is a recorded lien. If the tax is only a possible lien, the Acquisition Agent should assist the grantor in preparing the appropriate Inheritance Tax Declaration Form obtained from the State Controller's Office, Inheritance and Gift Tax Division.

8.04.28.00 Federal Estate and Gift Taxes

Title may be taken subject to Federal Estate and Gift Taxes.

8.04.29.00 Federal Income and State Income Taxes or Sales Tax Liens

Federal income tax liens must be paid by the grantor prior to close of escrow. On partial acquisitions, a partial release of tax lien should be secured covering the property being acquired. For details, contact the nearest office of the Internal Revenue Service.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.30.00 Disposition of Assessments on Entire Acquisitions

All special assessments, such as irrigation district, water conservation district, drainage district, sanitary and lighting district, etc., shall be paid in full including any future and as yet unpaid installments owed by grantors. If the assessments are for the next tax year only, title may be taken subject to such assessments if the District has the reassurance of the assessment-levying body that our request for cancellation of such assessments will be honored.

Should the assessment-levying body not agree to cancellation, the procedure will be to require payment of such assessments by grantors as a contractual obligation in order to deliver title to the State free and clear of such assessments.

8.04.31.00 Disposition of Assessments on Partial Acquisitions

Title may be taken subject to such assessments if the remaining property is adequate security for the assessment. The obligation to pay off such assessments will usually be a continuing obligation of grantor. No request for cancellation shall be made unless the District has the reassurance of the assessment-levying body that a request for cancellation of such assessments will be honored. When title is taken subject to assessments which cannot be canceled, it should be made clear to grantor that:

A. State's acceptance of title subject to unpaid assessments does not mean State assumes responsibility for either the payment or subsequent cancellation of such assessments,

B. Required payment of assessments is not made a part of the contractual obligation of grantor, as between grantor and the State,

C. State's payment for the part acquired is made only on that basis and grantor's obligation to pay such assessments to the levying body is not relieved by reason of State's acquisitions.

   Cancellation of assessments will not normally be made by the levying body because such a procedure would involve readjustment of their entire assessment schedule.

© 1994-2025 California Department of Transportation. All rights reserved.

When title is taken subject to assessments, the following clause must be included in the Right of Way Contract:

"The parties hereto agree that State, in acquiring title subject to unpaid assessments as set forth herein, is not assuming responsibility for payment or subsequent cancellation of such assessments. The assessments remain the obligation of the grantor; and, as between State and grantor, no contractual obligation has been made requiring their payment."

8.04.32.00 Franchise Tax Board Withholding

Where the grantor has an out-of-State address and the property has a value over $100,000, the following clause will be included in the Contract:

"Under Section 18662, Subdivision (e), of the California Revenue and Taxation Code, a person who sells California real property worth more than $100,000 and has a last known street address outside of California at the time of transfer of title, is required to pay tax equal to 3-1/3 percent of the sales price."

Unless an agreement between the California Franchise Tax Board and the grantor of the real property states otherwise, the tax shall be withheld from the escrow proceeds and transmitted to the California Franchise Tax Board.

No money is to be withheld if, during the taxable year of withholding and transfer, the grantor receives a homeowner's property tax exemption, or the sales price does not exceed $100,000.

A copy of Section 18662 of the Revenue and Taxation Code is hereby acknowledged to have been received by grantor.

8.04.33.00 Deeds of Trust-Mortgages

Deeds of trust and mortgages are to be reconveyed or released in full or part as appropriate. Title may be taken subject to a deed of trust or mortgage where a partial acquisition is a small part of a large parcel or of nominal value. An indemnity clause against potential loss by the State must be included in the Contract (see Section 8.04.04.00).

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.34.00 Lost Notes or Deeds of Trust

Trustees usually require a surety bond for twice the amount of a Note or a certified copy and an affidavit in the prescribed form of the Deed of Trust that has been lost or destroyed. The payment of premiums on such surety bonds is the responsibility of the Trustor (Grantor).

8.04.35.00 Trust Deed and Mortgage Payment

Where deeds of trust or mortgages are to be cleared, the following clause will be included in the Contract:

> "Any or all monies payable under this contract up to and including the total amount of unpaid principal and interest on note(s) secured by mortgage(s) or deed(s) of trust, if any, and all other amounts due and payable in accordance with the terms and conditions of said trust deed(s) or mortgage(s), shall, upon demand(s), be made payable to the mortgagee(s) or beneficiary(ies) entitled thereunder; said mortgagee(s) or beneficiary(ies) to furnish Grantor with good and sufficient receipt showing said monies credited against the indebtedness secured by said mortgage(s) or deed(s) of trust."

If the property being acquired has an owner-occupied dwelling unit on it, add the following clause:

> "The grantor will instruct (escrow agent's name) to obtain a copy of the promissory note(s) referenced above and deliver it(them) to State if grantor wants to be considered for an interest differential payment."

8.04.36.00 Prepayment Penalties

Land acquired for public use is exempt from prepayment penalties on mortgages and deeds of trust. Reference may be made to CCP Section 1265.240 when requesting either partial or full releases or reconveyances.

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.37.00 Home Improvement Loan Payment

The following clause will be included in the Contract when a Federal Home Improvement is to be cleared from the title:

"Any monies payable under this contract (and not demanded under the trust deed referred to above), up to the total amount of unpaid principal and interest, on the Federal Housing Authority Title Improvement Loan made to grantor through (Name of Bank) shall, on demand, be made payable to the persons entitled thereto. The above-mentioned lender will furnish grantor with a receipt showing said monies credited against the indebtedness."

8.04.38.00 Agreements or Contracts of Sale

If the parcel to be conveyed is encumbered with an agreement to sell, the interest of the party possessing the interest is to be cleared. A grant deed may be secured from the vendor to the vendee with a demand by the vendor for the use of this grant deed. The vendee will then execute the Contract, making provision for payment of the demand of the vendor, and a grant deed to the State. The two grant deeds are then processed concurrently in the State's escrow. This procedure, or the alternate of having vendor and vendee join in the execution of the Contract and deed, will serve to complete the terms of the original agreement.

The allocation of funds may be provided for in the Contract or by separate escrow instructions between the parties. One of the following clauses will be included in the Contract when Agreements of Sale are to be cleared from the title.

8.04.38.01 Payment Not Yet Determined

"Any or all monies payable under this contract, up to and including the total amount of unpaid principal and interest on the Agreement of Sale dated _____ between _____ Vendors, and _____ Vendees, shall, upon demand, be paid to the vendor. Vendor shall furnish vendee a proper receipt showing said payment has been credited to the above Agreement of Sale."

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.38.02 Payment Predetermined

"$_____ of the total monies payable under this contract shall be paid to _____, Vendor, to apply to the unpaid principal and interest on the Agreement of Sale dated _____, between Vendor, and _____, Vendees. Vendor shall furnish Vendee a proper receipt showing said payment has been credited to the above Agreement of Sale."

For instructions on Cal-Vet Loan property, see Section 8.22.00.00.

8.04.39.00 Financing Statements

The Uniform Commercial Code, Article 9, makes provision for the filing of Financing Statements with the Office of the Secretary of State or the County Recorder depending on the collateral. This is to protect the holders of security interest in personal property. Financing Statements have replaced crop and chattel mortgages, and when recorded, should be reflected in the title report obtained by the State.

Local filing is specified for the following types of collateral:

- If the collateral is crops or timber to be cut, filing is in the Office of the County Recorder in which the land involved is located.

- If the collateral is consumer goods, filing is with the Office of the County Recorder of the county where the debtor resides. If the debtor is an organization, the county for filing is the county of its "chief place of business." If the debtor is a nonresident of this State, filing is with the Office of the County Recorder in the county where the goods are kept.

The Department is interested in the existence of Financing Statements when equipment and/or machinery used in commercial, manufacturing, or industrial operations is purchased under the provisions of Code of Civil Procedure Section 1263.205.

The debtor and creditor may regard this as personal property, is used as collateral and may be considered to be a fixture and part of the realty under the above Code section.

© 1994-2025 California Department of Transportation. All rights reserved.

When manufacturing, industrial, or commercial machinery and/or equipment is being acquired as defined by Section 1263.205, the District will send Request for Information – Form UCC-3 (Form RW 08-21) (internal Caltrans link), in duplicate to the Secretary of State, Uniform Commercial Code Division, P.O. Box 1738, Sacramento, California 95808, to ascertain if Financing Statements are on file affecting said items. If the owner is doing business under a name different from that in which the property is vested, then both names will be furnished and a Form UCC-3 will be prepared for each name. An exempt stamp referring to Government Code Section 6103 should be placed to the right of the return address on Form UCC-3 to relieve the Department from payment of fees.

The Agent will assist in securing the release or termination along with the demand of the secured party if a secured interest develops. This is accomplished by the filing of Uniform Code Form UCC-2 (Form RW 08-22) (internal Caltrans link) with the Secretary of State or the County Recorder dependent upon the type of collateral. It should be filed prior to the close of escrow.

Any Contract involving property subject to a "Financial Statement" will have the following clause to provide for payment of obligations covered by the "Financial Statement."

> "Any and all monies payable under this contract, subject to the demands made by superior lienholders, up to and including the total amount due on financing statements, if any, shall, upon demand, be made payable to the holder thereof, said holder to furnish debtor with good and sufficient receipt showing said monies credited against the indebtedness secured by said Financing Statement."

© 1994-2025 California Department of Transportation. All rights reserved.

8.04.40.00 Procedure for Securing Partial Releases from Federal Land Bank

Mortgages and deeds of trust held by the Federal Land Bank may be partially released upon proper application by the property owner using Federal Land Bank Form FSA-2060 entitled "Application for Partial Release." The "Application for Partial Release" should be directed to the Manager of the Federal Land Bank Association for the particular region. The Federal Land Bank Associations can grant partial releases, consent to easements, authorize removal of improvements, gravel, borrow dirt, timber, trees and vines.

If questions arise as to policy concerning unusual features of a transaction, the Manager of the local Land Bank Association should be contacted.

In condemnation cases, the Federal Land Bank will be served or mailed the appropriate condemnation documents and information at the Regional Federal Land Bank Office.

8.04.41.00 Improvement Bonds

Public improvement bonds are a first lien against real property, being prior to mortgages and trust deeds, and should be considered in all acquisitions.

Bonds are to be cleared and eliminated as a lien against the property in all entire acquisitions or partial acquisitions constituting a major portion of the whole.

Where the remainder of the property in partial acquisitions is ample security for payment of the bond, title may be taken subject thereto. A clause setting forth the future obligations of the grantor must be included in the Contract to indemnify the State in the event of possible foreclosure proceedings (see Section 8.04.05.00). Under foreclosure of a bond, fee title will vest in the bond owner, and the State would not have title to the right of way, even though a grant deed was acquired from the original property owner.

The State is liable for the payment of assessments if it acquired property after the date of filing of a copy of the map of an Assessment District with the County Recorder. A lien is created even though an improvement contract has not been awarded and the amount of assessment has not been determined. It is anticipated that during the time between the creation of the lien and the date the amount of assessment is known, purchasers of comparable properties will be acquiring subject to the future assessments. The effect of the lien on properties being acquired for the State should be

© 1994-2025 California Department of Transportation. All rights reserved.

considered as part of the appraisal process. If the market indicates that other purchasers will be paying the assessments in addition to the purchase price, this will provide the basis for the State to follow a similar procedure. The appraisal should contain sufficient documentation through verification of sales and other interviews to support the appraiser's conclusion. This information will assist the Acquisition Branch in acquiring properties subject to this type of lien.

If the District Office of Right of Way has bills for the payment of assessments and the State is liable as outlined above, payment should then be scheduled. The schedule should include the following:

A. A copy of the bill showing the amount and billing agency.

B. The date of recording of the Deed to the State, effective date of possession, or the date of recording of the Final Order of Condemnation, whichever is applicable.

C. The date of recordation of the Notice of Assessment, Notice of Award of Contract, or the date of filing of the Assessment District map, whichever is applicable.

8.04.42.00 Tax Identification Numbers

The Department is obligated under Internal Revenue Code Sections 6041 and 6045 to report payments for real estate transactions. Information required includes the grantor's Tax Identification Number (Social Security Number or Federal Employer Identification Number). Title Companies routinely collect this information for the Department in formal escrows by using IRS Form 1099-S.

For internal escrows, the Department utilizes the Payee Data Record (Accounting Form STD-204) (internal Caltrans link). The Acquisition Agent must secure separate forms for each grantor, with the following exceptions: (1) where transferors are husband and wife at the time of closing, a single form is sufficient, and (2) where the transferor is a partnership, a single form for the partnership should be prepared rather than for the individual partners. Payee Data Record forms should be included with every claim schedule package. Failure to secure this information may result in either no check being prepared or 31% tax withholding. Questions concerning the use of Payee Data Records should be addressed through the RW Accounting liaison for your Region/District.

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.00.00 – ESCROW PROVISIONS

8.05.01.00 Escrow Identification

When a title company escrow is to be utilized, the following clause shall be included in the Contract:

"This transaction will be handled through an escrow with (name and address of title company), their No. (Escrow Number.)"

8.05.02.00 Escrow and Title Fees – State Acquisitions

The following clause will be included in all Contracts following the phrase "The State shall":

"Pay all escrow and recording fees incurred in this transaction, and if title insurance is desired by the State, the premium charged therefor."

8.05.03.00 Escrow and Title Fees – Director's Deeds

Whenever a Director's Deed is involved in an exchange transaction, the State will not pay any additional title service fees unless it is specifically part of the consideration in the Contract. Except as noted below, there should be no documentary transfer taxes involved as the conveyance to the grantor is in lieu of other consideration for the State-acquired parcel.

The possible exception to payment of documentary transfer taxes is when the Director's Deeded property exceeds the consideration for the property to be acquired, and a net consideration is to be received by the State. Under such circumstances, the Contract should clearly identify which party is responsible for payment.

8.05.04.00 Payment – Title Company Escrow

Where payment is to be made into escrow, the following clause will be included in the Contract:

"Pay the undersigned grantor(s) the sum of $_____ for the property or interest conveyed by above document(s) when title to said property vests in the State free and clear of all liens, encumbrances, assessments, easements and leases (recorded and/or unrecorded), and taxes except:"

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.04.01 Property Loss During Escrow

So the grantor may have notice of who bears the risk of loss if the property is materially damaged during the escrow period, the following clause will be included in Contracts for improved property:

"Should the property be materially destroyed by fire, earthquake or other calamity without the fault of either party, this contract may be rescinded by State; in such an event, State may reappraise the property and make an offer thereon."

8.05.05.00 Payment (No Formal Escrow-Internal Escrows)

Title companies do not normally handle escrows involving mobile home purchases and certain other type transactions. The District will act as the escrow holder in these cases. The following clause will be used in the Contract to clarify this aspect of the transaction:

"This transaction will be handled through an internal escrow by the State of California, Department of Transportation, District _____ Office, (address, city and ZIP Code.)"

Where payment will not be made through a title company escrow, the following clause will be included in the Right of Way Contract:

"Pay the undersigned grantor(s) the sum of $_____ for the property as conveyed by (grant, easement or quitclaim) Deed No. _____ when title to said property vests in the State free and clear of all liens, encumbrances, assessments, easements and leases (recorded and/or unrecorded) and taxes except:"

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.06.00 Release of Liability – Executors, Administrators, Guardians

Where title is being acquired through an Executor, Administrator, or Guardian and the Contract is executed prior to Superior Court confirmation of the sale, the following clause may be used in the Right of Way Contract:

> "It is understood and agreed that this contract is being signed by _____ Executor/Administrator/Guardian of the _____ at the request of the Department of Transportation, STATE OF CALIFORNIA, prior to the presentation of the subject matter hereof to the Superior Court of _____ County, and that neither said person or estate nor _____, as Executor/Administrator/Guardian acquire any liability or responsibility by reason of such signing and that the provisions of this contract are all and each of them, subject to the confirmation of the Superior Court of the County of _____, State of California."

8.05.07.00 Dedication by Executors, Administrators, Guardians – Probate Code Section 587

Whenever it is for the advantage, benefit, and best interest of the estate, and those interested therein, the executor or administrator may, either with or without consideration: (1) dedicate or convey any real property of the estate or interest therein to the State or any county or municipal corporation, or the United States of America or any agency or instrumentality thereof, for street or highway purposes, or any other purpose; (2) dedicate or convey an easement over any real property of the estate to the State or any county, municipal corporation, public district, any person, firm, association, or public or private corporation, or the United States of America or any agency or instrumentality thereof; or (3) convey, release, or relinquish to the State or any county or municipal corporation any access rights to any street, highway, of freeway from any real property of the estate, upon order of court based upon the petition of the executor or administrator or of any person interested in the estate, and after notice is given by the petitioner in the manner specified in the Probate Code.

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.08.00 Deeds from Executors, Administrators, Guardians

Deeds from the above must be executed and acknowledged in their official capacity and must be accompanied by a proper order of the court authorizing execution of the instrument. The Order must be referred to in the instrument by saying it was executed pursuant to and in conformity with the Order in the matter of the estate in question, giving the probate case number, and stating that a certified copy of the Order has been recorded, is being recorded along with or is made a part of the deed to which reference is thereby made (see Miscellaneous Deed Clauses in the RW Engineering Chapter).

8.05.09.00 Delayed Payment Clause

The following clause shall be included in the Contract where the owner requests that payment be delayed and where such payment is to be made in excess of 90 days from the date of Contract. Explanation for use will be included in the Memorandum of Settlement (MOS):

"It is understood and agreed that State, at the request of the undersigned grantor(s) shall not make payment of the amount set forth in Clause _____ above until after _____ unless grantor(s) request(s), in writing, payment at an earlier date."

"In consideration for such delayed payment grantor(s) agree(s) that should the condition of the improvements located on the property described in the above-referenced document be materially changed, excepting normal wear and tear, or be removed from the property prior to the above date, this agreement shall be voidable at the option of the State and the subject of further negotiations."

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.10.00 Fractional Payment Clause

Where grantor desires to divide payment between parties, the following clause shall be used:

"It is agreed that the net proceeds of the amount payable under Clause _____ above shall be divided as follows:

One-half to _____
One-half to _____ (or in appropriate fractions)
The odd cent, if any, to be paid to _____."

8.05.11.00 Donation-No Cash Payment by State

Use the following clause in lieu of the normal payment clause where the property is being donated or there is no cash consideration being paid, e.g., the consideration involved an exchange of land, or the performance of construction contract work.

"Accept delivery of property or interest conveyed by above document(s) and record same when title can be vested in the State free and clear of all liens, encumbrances, assessments, easements and leases (recorded and/or unrecorded), and taxes, except:"

If the property is conveyed by donation, the following clause must also be included:

"It is agreed that the property conveyed by document No. _____ is being donated to the State by the undersigned grantor(s). Grantor(s), having initiated this donation, has/have been informed of the right to compensation for the property donated and hereby waive(s) such right to compensation."

© 1994-2025 California Department of Transportation. All rights reserved.

8.05.12.00 Cost-to-Cure Damages

Use the following clause when a cost-to-cure damage payment is being made. It is to eliminate misunderstandings. The wording used to describe the work must clearly specify each item.

"It is understood and agreed by and between the parties hereto that included in the amount payable under Clause 2(A) above is payment in full to compensate grantors for the expense of performing the following work: (Insert the cost-to-cure items which grantor is being paid to correct.)"

8.05.13.00 Payment Where Deposit Money Previously Withdrawn

If a condemnation action has been filed and the Security Deposit withdrawn by grantors, the following payment clause will be included:

"Pay the undersigned grantor(s) the sum of $_____ less the sum of $_____ heretofore withdrawn by grantor(s) from the State's security deposit in the action entitled People vs. _____, _____ County, SCC No. _____ for the property or interest conveyed by above document(s) when title to said property vests in the State free and clear of all liens, encumbrances, assessments, easements, and leases (recorded and/or unrecorded), and taxes except:"

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.00.00 – IMPROVEMENTS AND EXCESS

8.06.01.00 General

The State generally acquires all of the improvements within the right of way required. Often the grantor may want to retain certain improvements and relocate them or State must acquire improvements on remainder property. Each situation requires careful consideration and must be covered by appropriate contract clauses. Also, the appraisal must reflect the appropriate valuation analysis.

Relocation as used in this Chapter is an acquisition concept where improvements are moved from the required property to a replacement, substitute, or remainder property. Improvements pertaining to the realty which an owner has severed from the real estate prior to an acquisition agreement are converted to personal property. As such, they are to be handled under the Relocation Assistance Program.

8.06.02.00 Miscellaneous Realty Items Acquired

Where there are items that could be easily removed or create possible misunderstandings as to acquisition, such as well pumps, water softeners, television antennas, wall-to-wall carpeting, venetian blinds, drapes, etc., the following clause will be included in the Contract:

> "It is understood and agreed by and between the parties hereto that payment in Clause 2(A) above includes, but is not limited to, payment for _____ which are considered to be part of the realty and are being acquired by the State in this transaction."

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.03.00 Miscellaneous Realty Items Retained by Grantor

Where the owner is retaining items considered part of the realty, the following clause will be included in the Contract. In these cases, the Memorandum of Settlement (MOS) should indicate the monetary credit being received by the State due to retention of any such items.

"It is agreed that grantor shall retain and remove the following items considered as realty (e.g., wall-to-wall carpeting, TV antenna, evaporative cooler, etc.). It is further agreed that the items retained by grantor will be removed upon termination of any rental agreement between grantor and State or on the day after date of recordation of the Deed conveying title to State, whichever date is later. If grantor fails to remove said items within the time limit specified, said items shall become the property of the State to dispose of as it sees fit."

"With respect to the payment of the sum stated in Clause 2(A) above and other valuable consideration, receipt of which is hereby acknowledged, the grantor hereby agrees no other rights will accrue under the Federal and State Uniform Relocation Assistance Acts (42 U.S.C. Section 4601, et seq.; Government Code Section 7260, et seq.) to receive reimbursement for the expense of moving and/or reinstallation of the above item(s)."

8.06.04.00 Machinery and Equipment – Removal or Acquisition – Improvements Pertaining to the Realty

The initial offer where properties contain machinery and/or equipment which are classified as improvements pertaining to the realty must be made based on purchase of such at the approved appraisal amount. If settlement cannot be effected on this basis, an offer may be made based on retention of the machinery and equipment at its in-place value, less salvage. The owner then assumes the cost to relocate and reinstall. The agent must explain that this is an acquisition concept and that relocation assistance is available as a right and the retention at in-place value less salvage is merely an alternate acquisition approach which is entirely optional.

When this type of machinery or equipment is severed from the real estate by the owner prior to agreement, it becomes personal property. Its value is deducted from the appraisal offer and the RAP compensates for the relocation and/or reinstallation of such personal property.

© 1994-2025 California Department of Transportation. All rights reserved.

Contracts covering either purchase or removal of machinery and/or equipment shall clearly state that the consideration set forth in the Contract includes payment for either purchase or removal and reinstallation. This applies whether the machinery and equipment is grantor or lessee owned. The owner, therefore, must have the options clearly explained so that the decision made is fair, equitable and in conformance with State and Federal requirements.

If machinery and equipment is purchased by State and the former owner purchases such items at public auction, the terms of such sale or purchase will require the purchaser (former owner) to bear the cost of its removal and installation at a different location.
When the grantor or the lessee desires to retain, remove, and/or reinstall items which are considered as realty or improvements pertaining to the realty on the basis of payment for their in-place value, less salvage value, use the following clause:

> "The undersigned grantor (lessee) is retaining the following listed equipment (specify each and every item being retained). Grantor (lessee) acknowledges that payment in Clause 2(A) above includes the in-place value of the retained equipment, less its salvage value. It is understood and grantor (lessee) agrees that retention, cost of removal and cost of reinstallation of such equipment is included in the payment herein made and grantor (lessee) acknowledges no further payment of any kind will accrue."

The Contract shall list those items which the grantor may remove and the time allowed for removal. Any items to be acquired by the State should be clearly identified as to number, make, and type.

8.06.05.00 Acquisition of Personal Property

When acquiring motels, hotels, or furnished apartments, it may be necessary to acquire the furnishings to prevent the eviction of tenants who would be unable to continue to occupy the premises if the furniture is retained and removed by the fee owner.

The appraisal of these types of properties will contain an inventory and estimated market value of the furnishings.

© 1994-2025 California Department of Transportation. All rights reserved.

Whenever the State acquires personal property, the Contract must specify and identify the items being acquired. If the items are numerous, a separate inventory will be made part of the Contract. The inventory must describe each item so it can be readily identified. The manufacturer's number must be given if available, as well as brand name or model. Acquisition of personal property must be authorized by the DDC-RW or delegatee.

8.06.06.00 Exchange of Improvements

An improvement may be exchanged as whole or part consideration with proper economic justification (see Section 8.12.06.00).

8.06.07.00 Relocation of Improvements – General

Whenever structural improvements are partially or totally within the required right of way, the owner may, at the option of the District, be given the choice of either (1) relocating the improvement in lieu of purchase, (2) having State purchase the improvement, or (3) retaining the improvement. The determination must be based on economic feasibility. The Agent should advise the owner to consider whether relocation in lieu of purchase or retention is a desirable alternative to State's purchase of the improvement. If the appraisal does not contain estimates and the owner indicates the desire to retain or relocate the improvements in lieu of purchase, the Agent should then formally request that estimates be made.

It is essential that the contract be specific as to the items which the owner will retain and remove and those which will become the property of the State. The amount to be paid by the State should be adequate to compensate the owner for all reasonable costs and risks involved.

When payment for moving cost is to be made directly to the owner, it is extremely important that the amount be based on the best and most reasonably competitive moving bids obtainable from qualified contractors. The acquisition agent must see that such bids are obtained. When moving costs represent small sums of money, the District may submit its own detailed estimate prepared by the Appraisal Branch to substantiate the contract payment. When the moving costs represent substantial sums of money, the Acquisition Branch shall endeavor to secure at least two outside bids.

© 1994-2025 California Department of Transportation. All rights reserved.

When property is acquired well in advance of construction and the consideration includes payment for rearrangement of improvements on the grantor's remaining property, or payment has been made for replacement of improvements on remaining property, the following clause shall be used in **BOTH** the Contract and Deed:

"It is agreed that the consideration for this conveyance includes all costs that have been or may hereafter be incurred by the grantors herein, or their successors or assigns, for the relocation or rearrangement of any and all improvements that are located on the remaining property of grantors and the grantors, for themselves and their successors or assigns, hereby waive any and all claims for damages of whatever nature that may hereafter accrue to said remaining property by reason of the construction of the highway improvement in the manner proposed, including any damages that have or may hereafter arise to such remainder in the event said existing or future improvements are not relocated or rearranged."

"It is further agreed grantor has been compensated for those improvements (specify them) lying within the right of way and which grantor will replace on the remaining property."

8.06.08.00 Owner Relocation of Improvements

Relocating in lieu of purchase is based on bids secured by the owner or the agent. This option generally has the State involved in assisting the owner in the structure relocation, providing guidance as to local requirements relating to ordinances or permits, etc. The agent should assist in ensuring that the relocation bids cover all the costs involved. If the owner wants to relocate a structural improvement and it is economically feasible, then the following clause shall be used:

"It is agreed that payment in Clause 2(A) above includes funds for the relocation and reestablishment of (here identify the improvement), it being understood the improvement is to be relocated and reestablished by the grantor at State expense. Grantor acknowledges that no payment is made for the purchase of the improvement, it being understood that payment for relocation and reestablishment precludes purchase price."

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.09.00 Owner Retention of Improvements

Retention of structural improvements by the grantor relieves the State of any responsibility for their removal and clearing of the site. The grantor/owner of the improvements assumes the entire obligation of improvement removal and site clearance.

If payment to the owner is the in-place value of the improvement less its salvage value as determined by the Appraisal Branch, then no relocation and reinstallation costs are to be made. The retention cost is normally the amount estimated to be bid at an auction. If the owner is compensated for the improvements in-place value less its salvage value, use clause in Section 8.06.04.00 and substitute the name or type of improvement for the word "equipment."

8.06.10.00 Removal Time Limitations

If either relocation or retention is part of the settlement, it is advisable to conclude the transaction on the basis the improvement is relocated or removed by the owner as quickly as possible. Structural improvement removal should normally be completed in a 60-90 day period. There may be exceptional cases where it will be appropriate to have improvements remain for a longer period. The file should contain documentation supporting such decision.

The Contract shall specify a date by which the improvements are to be removed and provide for clearance of the site. A portion of a payment shall be withheld to cover State's cost if the owner fails to perform. The amount should protect the State and provide sufficient funds if the State has to pursue other courses of action to clear the right of way.

The Contract must provide that any structural improvement remaining on the property subsequent to 90 days after close of escrow will result in the State charging market rent for such improvement and the land previously purchased from the grantor.

In either relocation or retention, the Contract shall specify that title to the improvement remains with the grantor/owner and the State is not responsible for any damage due to an Act of God or nature, fire, or vandalism.

"Piecemeal" removal of portions of a structural improvement which leaves the structure in an unrentable condition will not be allowed.

© 1994-2025 California Department of Transportation. All rights reserved.

Relocation assistance benefits, while not part of terms of the Contract, may have some influence on the eventual settlement. Close coordination with RAP is essential to ensure that owner and State are fully protected.

8.06.11.00 Tax Liability

The following clause will be used whenever improvements are retained by the grantor:

> "It is understood that the undersigned grantor retains full responsibility and liability for all delinquent and current taxes on building improvements hereinabove reserved."

8.06.12.00 Improvements Retained by Grantor – Entire Acquisition

The following clause will be used in the Contract:

> "The grantor reserves the right to remove the hereinafter described improvements located on said property on or before _____. Upon exercising said reserved right, grantor covenants and agrees to remove all combustible materials and other rubbish upon completion of moving operations, leaving only concrete foundations and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete foundation; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct temporary barricades around the holes or basements, to the satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."
>
> "The said improvements, which the grantor reserves the right to remove, consist of: _____.
>
> "$_____ of the total payment provided for under Clause 2(A) hereinabove shall be withheld by the State until said improvements, including combustible materials and rubbish, have been removed from the premises and until all of the conditions above have been complied with within the time limit set forth above.

© 1994-2025 California Department of Transportation. All rights reserved.

"If said improvements are not removed in their entirety, at the grantor's expense on or before said date for any reason whatsoever, the right to remove said improvements shall terminate and the State shall dispose of said improvements as it may see fit and the grantor hereby agrees that the State shall retain the sum of $_____ as liquidated damages and costs to the State for removing the improvements."

Where utility service lines to buildings other than those being reserved by the grantor are affected, it will be necessary to add the following to the first paragraph in the above clause:

"In the event any utility service lines to other buildings are disconnected, destroyed, or otherwise impaired in any way by reason of the removal of said improvements, grantor, at grantor's own cost and expense, shall provide such other buildings adequate, substitute utility service lines in lieu of those affected."

8.06.13.00 Improvements Retained by Grantor – Partial Acquisition (Sufficient Remainder for Setback)

The following clause is to be used in these cases to relocate improvements situated in the right of way area. The amount to be withheld shall be sufficient to remove, but not reset, the improvements from the right of way area and dispose of combustible materials and other rubbish.

"The grantor reserves the right to remove the hereinafter described improvements located in the right of way area on or before_____. Upon exercising said reserved rights, grantor covenants and agrees to remove all combustible materials and other rubbish from within the right of way area upon completion of moving operations, leaving only concrete foundations, and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete foundations; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct temporary barricades around the holes or basements, to the satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."

© 1994-2025 California Department of Transportation. All rights reserved.

"The said improvements, which the grantor reserves the right to remove, consist of: _____. $_____ of the total payment provided for under Clause 2(A) hereinabove shall be withheld by the State until such improvements, including combustible materials and rubbish, have been removed from the right of way area and until all of the conditions above have been complied with within the time limit set forth above."

"In the event said right of way area has not been cleared of said improvements on or before said date, the State, or its authorized agent, is hereby granted the right to enter upon the adjacent property of the grantor for the purpose of moving said improvements clear of the right of way and onto grantor's adjacent property without incurring any liability or responsibility for the location or condition of said improvements, and grantor hereby agrees that the State shall retain the said sum of $_____ as liquidated damages and costs to the State of removing said improvements from the right of way area."

8.06.14.00 Improvements Retained by Grantor – Partial Acquisition (Insufficient Remainder for Setback)

The following clause is used in these cases. Where improvements have salvage value, the amount to be withheld shall be sufficient to guarantee cleaning up the premises. If improvements have no salvage value, the amount withheld shall be sufficient to cover State's out-of-pocket cost for removal or demolition in clearing the right of way area.

"The grantor reserves the right to remove the hereinafter described improvements located in the right of way area on or before_____. Upon exercising said reserved right, grantor covenants and agrees to remove all combustible materials and other rubbish within the right of way area upon completion of moving operations, leaving only concrete foundations and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete foundations; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct temporary barricades around the holes or basements, to the satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."

© 1994-2025 California Department of Transportation. All rights reserved.

"The said improvements, which the grantor reserves the right to remove, consist of: _____. $_____ of the total payment provided for under Clause 2(A) hereinabove shall be withheld by the State until said improvements, including combustible materials and rubbish, have been removed from the right of way area and until all of the conditions above have been complied with within the time limits set forth above."

"If said improvements are not removed in their entirety, at the grantor's expense, on or before said date for any reason whatsoever, the right to remove said improvements shall terminate and the State shall dispose of said improvements as it may see fit. State, or its authorized agent, is hereby granted the right to enter upon the adjacent property of the grantor for the purpose of removing said improvements from the right of way area, and grantor hereby agrees that the State shall retain the said sum of $_____ as liquidated damages and costs to the State of removing said improvements from the right of way area."

8.06.15.00 Improvements Retained by Grantor – Partial Acquisition (Greater Portion of Building in Right of Way Area) Right to Remove Entire Building

In these cases, where improvements have salvage value, the amount to be withheld shall be sufficient to guarantee cleaning the premises after completion of moving or demolition operations. If improvements have no salvage value, the amount withheld shall be sufficient to cover State's out-of-pocket cost for removal or demolition in clearing the right of way area. The following clause applies:

"The grantor reserves the right to remove the hereinafter described improvements located in the right of way area on or before_____. Upon exercising said reserved right, grantor covenants and agrees to remove all combustible materials and other rubbish from within the right of way area upon completion of moving operations, leaving only concrete foundations and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete foundations; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct temporary barricades around the holes or basements, to the

© 1994-2025 California Department of Transportation. All rights reserved.

satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."

"The said improvements, which the grantor reserves the right to remove, consist of: _____. $_____ of the total payment provided for under Clause 2(A) hereinabove shall be withheld by the State until the improvements, including combustible materials and rubbish, have been removed from the right of way area and until all of the conditions above have been complied with within the time limit set forth above."

"If said improvements are not removed in their entirety from right of way area at the grantor's expense, on or before said date for any reason whatsoever, the right to remove said improvements shall terminate and the State shall dispose of said improvements as it may see fit. State, or its authorized agent, is hereby granted the right to enter upon the adjacent property of the grantor for the purpose of removing said improvements from the right of way area, in which event title to that portion of the building described as a (type of building) and located (location or address) resting on or supported by the remaining property of the grantor is thereon conveyed to the State, and the State is granted the right to remove said improvements in their entirety, to dispose of as it may see fit, and grantor hereby agrees that the State shall retain the said sum of $_____ as liquidated damages and costs to the State of removing said improvements from the right of way area."

8.06.16.00 Improvements Retained by Grantor – Partial Acquisition (Small Portion of Building in Right of Way Area) Right to Cut Off Building

Use the following clause in these cases. The amount to be withheld shall be sufficient to cover the cost of cutting the building on or near the right of way line, installing temporary bracing to the remaining portion of building, constructing temporary closure, and cleaning the premises.

"The grantor reserves the right to remove the hereinafter described improvements partially located in the right of way area on or before_____. Upon exercising said reserved right, grantor covenants and agrees to remove all combustible materials and other rubbish from within the right of way area upon completion of moving operations, leaving only concrete foundations and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete

© 1994-2025 California Department of Transportation. All rights reserved.

foundations; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct temporary barricades around the holes or basements, to the satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."

"The said improvements, which the grantor reserves the right to remove, consist of: _____. $_____ of the total payment provided for under Clause 2(A) hereinabove shall be withheld by the State until the improvements, including combustible materials and rubbish, have been removed from the right of way area within the time limit set forth above."

"If said improvements are not removed in their entirety from the right of way area, at the grantor's expense, on or before said date for any reason whatsoever, the right to remove said improvements shall terminate and the State, or its authorized agent, is hereby granted the right to enter upon the adjacent property of the grantor for the purpose of severing and removing those portions of the improvements situated in the right of way area and may dispose of all such improvements or portions thereof situated in the said right of way area, in such manner as it may see fit, and grantor hereby agrees that the State shall retain the said sum of $_____ as liquidated damages and costs to the State of removing said improvements from the right of way area."

8.06.17.00 Improvements Retained by Grantor – Garages and Service Stations

The following clause is for use when grantor retains service stations, garages, and underground gasoline and oil storage tanks. The amount to be withheld shall be sufficient to guarantee the removal of the tanks and the cleaning of the premises.

"The grantor reserves the right to remove the hereinafter described improvements located in the right of way area on or before_____. Upon exercising said reserved right, grantor covenants and agrees to remove all combustible materials and other rubbish upon completion of moving operations, leaving only concrete foundations and concrete flatwork in place; provided, however, that all mudsill steel tie bolts and reinforcing steel protruding from said remaining concrete foundations shall be removed or sheared at all exposed surfaces of the concrete

© 1994-2025 California Department of Transportation. All rights reserved.

foundations; and in the event there are holes or basements under any of the buildings removed, upon completion of moving operations the undersigned grantor shall construct a temporary barricade around the holes or basements, to the satisfaction of the State, for the purpose of protecting pedestrians or animals from falling into such holes or basements."

"The said improvements, which the grantor reserves the right to remove, consist of: _____. Gasoline and oil storage tanks shall be removed in their entirety, any and all contaminated soil shall be removed and disposed of in accordance with existing regulations and the holes backfilled with suitable material and compacted. The Fire Prevention Bureau shall be notified before removing tanks."

"$_____ of the total payment provided for under Clause 2(A) above shall be withheld by the State until said improvements, including combustible materials, contaminated soil, and rubbish, have been removed from the right of way area and until all of the conditions above have been complied with within the time limit set forth above."

"If said improvements are not removed in their entirety, at grantor's expense on or before said date for any reason whatsoever, the right to remove said improvements shall terminate, and the State of California shall dispose of said improvement as it may see fit, and the grantor hereby agrees that the State shall retain the said sum of $_____ as liquidated damages and costs to the State of removing said improvements."

8.06.18.00 Service Connections – Improvements to be Moved by Grantors-Partial Acquisitions

The following clause must be included in the Contract:

"It is understood and agreed that the above payment to grantor also includes any and all costs of grantor for relocation or extension of utility service connections to the buildings so relocated.

"In the event any utility service lines to other buildings are disconnected, destroyed, or otherwise impaired in any way by reason of the removal of said improvements, grantor, at grantor's own cost and expense, shall provide such other buildings adequate substitute utility service lines in lieu of those affected."

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.19.00 Relocation of Improvements by State

Whenever a Contract provides for the relocation or installation of improvements by the State, the Contract must be specific in describing the work to be performed. The District's estimate of the cost involved shall be incorporated in and made part of the MOS (see also Sections 8.10.02.00 and 03.00 and the RAP Chapter).

Sketch maps showing the proposed work should be made a part of the Contract.

When there are service connections to be replaced, the following clause must be in the Contract:

> "It is understood and agreed that all utility service connections to the buildings to be relocated shall, without cost to the grantor, be extended to said buildings in the new location."

8.06.20.00 Permission to Enter Grantor's Land for Improvement Removal

Acquisition of improvements, which straddle the new right of way line, requires the use of the following clause without exception:

> "It is understood and agreed between the parties hereto that payment shown in Paragraph 2A above includes payment to grantor for certain improvements located partly within and partly without the right of way area.
>
> "Said improvements consist of: _____. The State, or its agent, is hereby granted the right to enter upon the remaining property of the grantor for the purpose of removing said improvements."

Note: If desired by the grantor, the following may be added:

> "It is further agreed that the State or its agents will remove said improvements on or before_____."

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.20.01 Improvements and/or Removal of Buildings Straddling the Right of Way Line

When buildings and/or improvements are straddling the right of way line and the State and/or its authorized contractor needs to enter private property in order to modify/remove buildings or other improvements, a Temporary Construction Easement (TCE) is required. In the event eminent domain is initiated, the Acquisition Branch must advise Right of Way (RW) Engineering on the appropriate Condemnation Improvement Removal Clause and/or Condemnation Improvement Severance Clause to be used in the legal description. (See Sections 6.12.08.00, 6.12.08.01, and 6.12.08.02).

If it is discovered during the acquisition phase a TCE is/was required for improvements which straddle the right of way line, the RW agent in consultation with the appraiser, RW Engineer, Project Engineer, and Construction Resident Engineer will establish the need for the TCE. Like all project requirements, prior to submitting a request for a Resolution of Necessity, the TCE shall be designed, mapped, and included in the Department's approved appraisal and subsequent offer to the property owner. (See Section 9.01.09.00, Legal and Policy Requirements).

8.06.21.00 Partial Acquisition of Residential Property with Owner/Occupant Displaced but Owner Requests Retention of Remainder

There may be times when the owner will want to retain a remainder even though the owner is displaced. The appraisal will have been prepared on a primary total acquisition basis because the remainder was considered to have little market value. If the owner requests retention of the remainder, an alternate partial acquisition appraisal will have to be prepared. It must not be used as the basis for a revised offer until the RAP Branch has had the opportunity to calculate the RAP benefits. This is essential to preclude the possibility of making an excessive purchase differential payment.

Since this particular subject could develop into several variations, a general instruction is not possible. Individual cases will require careful analysis and the assistance of the RAP section to avoid the circumstance of either withdrawing an offer or having an insupportable offer accepted.

© 1994-2025 California Department of Transportation. All rights reserved.

8.06.22.00 Acquisition of Uneconomic Remnants and Excess Acquisition

Occasionally, when properties are partially within the right of way, the owner will request that the entire property be purchased. Categories of acquisition of the excess are:

Category 1. Uneconomic Remnant [May be condemned (see Section 9.01.12.00 Specific Statutory Authority)]

a. in the market
b. to the owner
c. due to construction costs or large damages

Category 2. Excess Acquisition

No RAP accrues to the excess area.

These categories are discussed in Appraisal Chapter Section 7.03.04.00. If the purchase is made under Category 2, the following clause must be included in the Right of Way Contract:

"It is understood and agreed that the purchase of the entire property described in Grant Deed No. _____ is at the sole request of and as a convenience to the undersigned grantor and relocation assistance benefits will not accrue since this is not a State initiated displacement."

RAP benefits may accrue to tenants. See the RAP Chapter for discussion relating to acquisition of remainders by voluntary transactions or condemnation initiated with the consent of the owner.

In those cases where management considers acquiring the remainder as excess, it must be kept in mind that excess land and improvements thereon are not eligible for federal participation. Damages to the remainder in excess land acquisitions are eligible. The acquisition cost of the excess is not eligible.

For uneconomic remainder and excess land acquisition, the Appraisals Branch will prepare a primary appraisal and an alternate appraisal. If the need for acquiring excess becomes apparent only after the original appraisal is completed, the alternate appraisal must be requested by the Acquisitions Branch. (See Sections 7.03.04.01 and 8.50.04.01.)

© 1994-2025 California Department of Transportation. All rights reserved.

8.07.00.00 – WATER WELLS

8.07.01.00 Wells – General

Water wells are handled in several different ways. The existing well must be properly abandoned and a new well provided where necessary. This section pertains to water supply wells. If the well is related to a hazardous materials site, then coordinate with the Hazardous Waste Technical Specialist who will confer with the appropriate regulatory agency regarding abandonment and replacement.

Abandonment procedures are discussed in the Property Management Chapter and should be reviewed by the Acquisition Agent. Their acquisition must be discussed in the Memorandum of Settlement (MOS) and the proper notification sent to the Project Engineer for inclusion in the Resident Engineer's file. The replacement of an existing well can be done by a cash payment to the grantor or by the State contracting for the drilling of a replacement well. Both are discussed below.

8.07.02.00 Cash Payment with State Option

Where the State is paying the owner for drilling a replacement well the following clause may be used in the Contract. The agent shall make certain that the State is supplied with copies of all the standard quantity tests on both the existing well and the new well so an accurate record may be established.

> "It is agreed that payment in Clause 2(A) includes the sum of $_____, as the cost to grantor for (description of well drilling work to be performed) on grantor's remaining property and that said sum of $_____, is based on the bid obtained from (Name of Company).
>
> It is further agreed that it is the intent of the parties hereto that the grantor be reimbursed by the State for the drilling of a well that will produce a quantity of water equal to, or greater than, that produced by the existing well. The quantity of water produced by the old well and the new well shall be ascertained by standard orifice tests to be secured by the grantor and complete copies of the results of the tests supplied to the State.

© 1994-2025 California Department of Transportation. All rights reserved.

If the grantor has one well drilled to a depth as deep as or deeper than the existing well, which fails to produce a satisfactory water supply, the State may, at its option elect to use either or both of the following alternatives:

1. Amend this Contract to provide additional monies and authorization to grantor to proceed with other attempts to produce a satisfactory water supply on grantor's remaining property.

2. Withhold authorization to the grantor to proceed with further attempts to produce water and enter into an Amended Contract for the purpose of reimbursing the grantor for the loss or depreciation in market value to the remaining property served by the water supply resulting from the lack of, or decreased quantity of, water available. If the amount of such loss or depreciation in the market value cannot be determined by agreement between grantor and State, the State will then bring appropriate legal proceedings for the purpose of ascertaining the same, and will pay the amount ascertained by such legal proceedings, together with the grantor's legal costs in such proceedings.

It is further agreed that if the State is not notified in writing prior to _____ of the failure of said new well on grantor's remaining property to produce a quantity of water equal to, or greater than, that produced by the existing well, the payment of said sum of $_____ shall be considered as full payment by the State for the existing well and grantor waives any and all future claim for compensation."

8.07.03.00 State Contract

If neither a cash settlement nor the well clause above are satisfactory, the following clause may be used:

"The State shall drill a well on the grantor's remaining property that will produce a quantity of water equal to, or greater than, that produced by the existing well. The quantity of water produced by the old well and the new well shall be ascertained by the standard orifice test, and the grantor shall be supplied with complete copies of the results of said tests.

© 1994-2025 California Department of Transportation. All rights reserved.

If the State drills one well to a depth as deep as, or deeper than, the existing well, and which fails to produce a satisfactory water supply, the State may, at its option, elect to use either or both of the following alternatives:

1. Proceed with other attempts to produce a satisfactory well on grantor's remaining property.

2. Discontinue all further attempts to produce water.

If the State, within a reasonable period of time, drills a new well or subsequent well which produces no water or a lesser quantity of water than that from the existing well, and thereafter discontinues further attempts to produce additional water, the State shall reimburse the grantor for the loss of depreciation in market value to grantor's remaining property resulting from the decreased quantity of water available therefor. If the amount of such loss or depreciation in the market value cannot be determined by negotiations between grantor and State, then State will on written notice from the grantor, bring appropriate legal proceedings for the purpose of ascertaining the same, and will pay the amount ascertained thereby, together with the grantor's legal costs in such proceedings.

If the State drills a well or wells that produce the required volume of water, but are so located or so numerous as to result in a measurable loss or depreciation in market value to grantor's remaining property, the State shall reimburse the grantor for such loss in the manner provided for in the paragraph next above."

© 1994-2025 California Department of Transportation. All rights reserved.

8.08.00.00 – ACCESS AND ENCROACHMENT PROVISIONS

8.08.01.00 Access – General

Access rights are to be acquired in accordance with the approved plans and as shown in the approved appraisal. Should there be a change, the valuation premise will have to be reviewed to determine if there are any changes warranted. On the Interstate System, the State cannot add any points of access to or exits from approved projects without FHWA approval.

8.08.02.00 Interim Access – Without Frontage Road

Where interim access is to be allowed prior to freeway construction, the following clause will be included in the Contract:

> "It is recognized that the freeway construction on the property hereby conveyed may be deferred, and it is therefore agreed that the undersigned grantors, or their successors in interest, shall have access to their remaining property, over the property hereby conveyed, in the same manner as they now enjoy until such time as the new freeway construction is commenced."

8.08.03.00 Interim Access – Frontage Road

Where interim access is to be allowed prior to frontage road construction, the following clause will be used:

> "Until construction of the proposed frontage road, the grantor(s) shall have access by means of (number and width of openings) (right or left) of (kilometer post or kilometer posts, post mile or post miles) from grantor's remaining property to and from the existing State highway or freeway, provided that all rights reserved in this paragraph shall terminate when construction of the frontage road is commenced."

© 1994-2025 California Department of Transportation. All rights reserved.

8.08.04.00 Landlocked Parcels

The following clause shall be included in the Contract and Deed in each case involving the retention of a landlocked remainder by a grantor.

This clause may be revised, if necessary, to meet special situations.

> "It is agreed that grantor's remaining property is landlocked, and without any direct access to the freeway or to any public or private road, and grantors hereby relieve grantee of any liability to provide access to the remaining landlocked property."

8.08.05.00 Encroachments on Federal Aid Highways

The State shall not add any points of access to, or exits from, approved projects on the Interstate System without prior Federal approval. Federal legislation and regulations also indicate that all real property, including air space, within the right of way boundaries of a project shall be devoted exclusively to public highway purposes. Exceptions can be made, however, wherein temporary or permanent occupancy or use of the right of way, including air space, is permitted for nonhighway purposes which includes a reservation of surface or mineral rights; provided, however, they are first approved by FHWA. FHWA will determine if such occupancy, use, or reservation is in the public interest and will not impair the highway or interfere with the free and safe flow of traffic thereon.

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.00.00 – RENTAL AND POSSESSION PROVISIONS

8.09.01.00 Clauses for Grace Period, Early Vacation and Rent Confirmation

A. Contracts with owner-occupants of residential units who wish to remain in occupancy after close of escrow will contain fair market rental provisions and shall have the following clauses included in the Contract:

> "It is agreed that the grantor(s) shall have a 15-day grace period commencing on the day following the date of recordation of the deed conveying title to the State. It is agreed that commencing on the day following the expiration of the grace period and thereafter, the State will rent the property to the grantor using the State's standard form of Rental Agreement."

If desirable, the rental rate may be included in the Contract by adding the following:

> "The rental rate shall be $_____ per month subject to all the terms and conditions as contained in said rental agreement, including the right of either party to cancel and terminate such rental agreement upon written notice as specified in said rental agreement. Said rental rate shall remain in effect for a period of at least one year, if the property is available for occupancy for that period, and subject to the right of the State to establish a new rental rate after one year if the property remains available for rent."

© 1994-2025 California Department of Transportation. All rights reserved.

B. If early vacation of an owner-occupied residential unit is necessary, use the following:

"It is agreed that grantor(s) shall, on the day following the expiration of the fifteen day grace period, vacate and deliver the above-described premises vacant to the State and in good order and condition, without further notice, and immediately thereafter deliver the keys thereto to the Department of Transportation (address) and also pay all closing utility bills up to and including the date of vacation.

In the event, however, grantor(s) does (do) not vacate the premises, grantor(s) agree(s) to pay the State at the rate of $_____ per day for use and occupancy of said premises beginning the day following the recordation of the deed conveying title to the State; and the acceptance of such payment by the State shall in no way create a new tenancy between the parties.

In the event grantor vacates the premises prior to the recordation of the deed conveying title to the State, the State is hereby granted possession to use, occupy, or rent the property as it sees fit."

C. If the grantor insists on written confirmation of the rental rate to be charged for continued occupancy after State takes title to the property, the following clause will be included in the Right of Way Contract:

"It is agreed State will rent the property to grantor, using State's standard form (Rental or Lease Agreement) commencing the day following the close of escrow. The (Rental-Lease) rate shall be $_____ per month subject to all the terms and conditions in said (Rental-Lease) agreement, including the right of either party to cancel and terminate said agreement upon written notice as specified in said (Rental-Lease) Agreement. Said (Rental-Lease) rate shall remain in effect for a period of at least one year, if the property is available for occupancy for that period. State has the right to establish a new (Rental-Lease) rate after one year if the property remains available for occupancy."

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.02.00 Delivery of Property Vacant at Close of Escrow

If early vacation of owner-occupied, nonresidential property is necessary, the following clause will apply:

> "It is agreed grantor(s), on the day following the date title vests in State, will vacate and deliver the above-described property to State in good order and condition without further notice and immediately thereafter deliver the keys thereto to the Department of Transportation, (address), and also pay all closing utility bills up to and including the date of vacation."

8.09.03.00 Delivery of Property Vacant After Close of Escrow

Where the owner desires to retain possession of the property beyond the date of close of escrow, the following clause will be included in the Contract. (The Memorandum of Settlement [MOS] must indicate the consideration the State is receiving for granting such occupancy.)

> "It is agreed that grantors shall deliver the above-described premises vacant to State on or before _____ days after the date of recordation of the deed conveying title to State, in good order and condition, without further notice, and immediately thereafter deliver the keys thereto to the Department of Transportation (address) and also pay all closing utility bills up to and including the date of vacation."

8.09.04.00 90-Day Notice of Intention to Take Possession

It is Department policy to schedule construction projects so that no persons lawfully occupying real property required for highway or related purposes shall be required to move from their home, farm, or business location without at least 90 days' prior written notice from the State or other political subdivision having the responsibility for such acquisition. (Refer to the RAP Chapter for details.) See the Condemnation Chapter for a discussion on Orders for Possession.

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.05.00 Eviction by State

The State must either own the property or have legal possession under an Order for Possession (OP) before eviction proceedings can begin. Acquisition must work closely with Relocation to assure that State and Federal procedures are fully complied with. Property Management should be consulted with on how to proceed with evictions since procedures can vary by local jurisdiction.

8.09.06.00 Lease Warranty Provision

Where the owner claims that tenants occupy the property being acquired on a month-to-month tenancy, the following clause will be included in the Contract:

> "Grantor warrants that there are no oral or written leases on all or any portion of the property exceeding a period of one month, and the grantor agrees to hold State harmless and reimburse State for any and all of its losses and expenses occasioned by reason of any lease of said property held by any tenant of grantor for a period exceeding one month."

8.09.07.00 Rent Proration and Security Money Collection for Other Than Owner-Occupied Single Family Residential Properties

The following clause will be included in the Contract where property is tenant occupied:

> "The grantor(s) shall retain possession of the property conveyed up to and including the date of recording of the deed conveying title to State upon compliance by the grantor(s) with the conditions of this contract. All rents and all security money collected by grantor(s) applicable to any period thereafter shall be paid to the State. Either party hereto collecting rents or security money to which the other party is entitled shall forthwith pay such amount to the other as is necessary to comply with the provisions of this clause."

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.07.01 Rent Proration by Escrow Agent

If the District desires that rent be prorated by the escrow agent through use of separate Rental-Escrow Instructions made a part of the Right of Way Contract, use the following clause:

"The grantor(s) shall retain possession of the property conveyed up to and including the date of recording of the deed conveying title to State upon compliance by the grantor(s) with the conditions of this contract. All rents and all security money collected by grantor(s) applicable to any period thereafter shall be paid to the State in accordance with the terms and conditions of the Rental-Escrow Instructions attached hereto and made a part hereof. Either party hereto collecting rents or security money to which the other party is entitled shall, in the final settlement of this contract, pay such an amount to the other as is necessary to comply with the provisions of this clause."

8.09.07.02 Definite Rent Proration Date Established

If grantor insists on a definite date for proration of rents, the following clause may be used:

"All rents shall be prorated as of (date). All rents derived from said property up to and including said date shall be paid to the grantor(s), and all rents derived thereafter shall be paid to the State of California. If any rentals on said property have been or are collected by the undersigned grantor(s) for any period beyond said date, the undersigned grantor(s) shall immediately refund such rentals to the State.

All security money collected by the undersigned grantor(s) shall be paid to the State of California."

8.09.08.00 Grantor Retaining Temporary Possession

The following clauses may be used where it is advantageous to allow the grantor to retain possession and use of the property, e.g., avoidance of crop damage payment, control of noxious weeds, agricultural land without an independent water supply or property not capable of independent use. Prior approval of the DDC-RW must be secured before either of these clauses are included in any Contract.

© 1994-2025 California Department of Transportation. All rights reserved.

It is essential in the use of either of these clauses that complete justification be included in the Memorandum of Settlement (MOS). Without justification, it is tantamount to a gift of State property.

"Until such time as the State elects to take possession of any or all of the property acquired herein, the grantor shall have the use and enjoyment of its surface in the same manner as now used, except that in no event shall any advertising sign of any nature whatsoever be placed upon or allowed to remain on the property. Grantor agrees to keep the premises in a neat and clean condition.

The grantor agrees that no improvements other than those already on the property, shall be placed thereof; and the planting of any crops, trees, or shrubs, or alterations, repairs, or additions to existing improvements which may hereafter be placed thereon are at grantor's risk and without expectation of payment if removed by the State."

Where temporary possession is being allowed and the land is improved with an orchard, or similar enterprise, the District should use the following clause which provides for good husbandry practices, including pest control.

"It is agreed that the undersigned grantor(s) shall harvest the existing _____ crop on that portion of grantor's property being acquired by the State. It is further understood that said crop shall be harvested on or before_____ and, if not harvested by said date, shall become the property of the State to dispose of as it may see fit. The undersigned grantor(s) agree(s) to cultivate and maintain the existing crop in conformance with the practices of good husbandry, including pest control, up to and including date grantor(s) harvest(s) said crop.

It is further understood that this property shall be used only for the purpose of maintaining and harvesting the crop on the subject property.

Upon the failure of the grantor(s) to comply with any condition or provision of this agreement, the authorization to harvest said crop by the grantor(s) shall immediately cease and possession shall be taken by the State."

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.09.00 Right of Entry-Waiver Clause

All Rights of Entry shall be restricted to only those circumstances which are exceptional or emergency in nature (49 CFR 24.102[j]). Complete documentation for such action and approval must be contained in the acquisition file.

The only exception to the above-referenced requirements are those Rights of Entry for transactions between other Federal, State, and Local (County, City) governmental agencies.

Rights of Entry prior to initiation of negotiations involve emergency projects or situations which constitute a hazard to the traveling public, or additional areas required during construction of the transportation facility and are not in conflict with the environmental document related to the project. The normal appraisal and acquisition process must not be unduly delayed after the securing of a Right of Entry prior to the initiation of negotiations.

Whenever the content of a Right of Entry is revised or modified from the standard form, approval of Legal must be obtained prior to submitting the Right of Entry to the owner for execution.

The Right of Entry – Long Form (Exhibit 08-EX-23) and Possession and Use Agreement (Exhibit 08-EX-25) contain a standard clause waiving the owner's right to appear before the California Transportation Commission.

This clause must be included since omission of the clause would provide the owner with the right to question the validity of a project which may be under construction or completed at a time when a Resolution of Necessity may be sought. In limited instances, the Right of Entry – Short Form (Exhibit 08-EX-24), which does not include the waiver clause, may be used. There may be circumstances in which the Right of Entry will not be used. This could occur in emergency situations where there is an immediate danger to life, property, or the highway facility. Under such circumstances, the Department may rely on its Police Power.

The use of a Right of Entry is only appropriate in those situations where the State would ultimately acquire the needed interest by eminent domain proceedings. Whenever it becomes necessary to institute such proceedings on parcels under the State's possession by Right of Entry or Possession and Use Agreement, there is no need to mail the Notice of Intent.

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.09.01 Possession and Use Agreement

The Possession and Use Agreement provides the legal right for the State to possess and use the owner's property prior to the execution of a Right of Way Contract, and, at the same time, allows the owner to receive just compensation for the State's possession and use of the parcel.

Use Exhibit 08-EX-25 for the Possession and Use Agreement. The Possession and Use Agreement requires that the State record a Memorandum of the Agreement (Form RW 08-35) and deposit funds into an escrow account to allow the owner to withdraw funds. Refer to Sections 8.60.00.00 through 8.68.00.00 and Form RW 08-36 (internal Caltrans link) for more detailed instructions. The process should include proper notification of the owner on the withdrawal of funds. It is critical that lien holders be notified that an escrow and sale are pending to ensure the owner does not withdraw funds that will be needed to satisfy any liens against the property.

8.09.10.00 Construction Permits and Permits to Enter and Construct

When temporary rights are needed to perform work for grantor's benefit, a Permit to Enter and Construct or Construction Permit may be used. These documents provide no permanent right to the State and may be used when the State would not condemn the rights secured. See Exhibits 08-EX-26 and 08-EX-27.

8.09.11.00 Temporary Easements

Where State must enter adjoining property for temporary use during construction, the appropriate right is a Temporary Easement. This is also the right to be acquired through eminent domain when negotiations fail.

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.12.00 Indemnification by State

Where rights of a temporary nature (material agreements, detour easements, drilling permits, etc.) are required, and the property owner or other party to the agreement requests to be indemnified by the State for any damage caused by reason of the uses authorized by such agreement, the following clause may be used:

> "State agrees to indemnify and hold harmless (name of other party to agreement) from any liability arising out of State's operations under this agreement. State further agrees to assume responsibility for any damages proximately caused by reason of State's operations under this agreement and State will, at its option, either repair or pay for such damage."

Easements for slope purposes, whether temporary or permanent, are not considered as being "temporary" for the purposes of this section.

8.09.13.00 Right of Possession

Where possession is required and no Order for Possession has been obtained, add the following clause to the Contract:

> "It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by the State, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Clause 2(A) herein are deposited into the escrow controlling this transaction. The amount shown in Clause 2(A) herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date."

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.13.01 Right of Possession – Internal Escrow

Where possession is required and no Order for Possession has been obtained, add the following clause to the Contract for those transactions handled through an internal escrow:

> "It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by the State, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Clause *2(A) herein are paid to the grantor(s). The amount shown in Clause *2(A) herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date."
>
> *If using RW 08-04 Right of Way Contract – State Highway – Temporary Easement (internal Caltrans link), specify Clause 2.

8.09.14.00 Confirming Date of Possession

Whenever State has secured an Order for Possession or a Right of Entry and settlement is by Contract, the contract shall include the following clause:

> "It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by the State, including the right to remove and dispose of improvements, commenced (effective date of Order for Possession or Right of Entry) and that the amount shown in Clause 2(A) herein includes, but is not limited to, full payment for such possession and use, including damages, if any, and interest from said date."

See the RW Engineering Chapter for deed clause where an Order for Possession or Right of Entry has been obtained.

© 1994-2025 California Department of Transportation. All rights reserved.

8.09.15.00 Confirming Vacation in Hardship Acquisitions

The following clause is only to be used in hardship acquisitions. Although it should be adequate to accomplish the stated objective, the District should use extreme care in implementing it. Under California Code of Regulations Section 6034, the District must be able to assure the grantor (who, upon acquisition, becomes eligible for benefits under the Relocation Assistance Act) that within a reasonable period of time prior to displacement, comparable replacement housing will be available. Further, Section 6042 of the Department of Housing and Community Development (HCD) Guidelines requires that the displacee be actually offered replacement housing before forced to vacate the property. For this reason and because eviction can only be used as a last resort, the 90-day notice should be served on the grantor only after having been given a reasonable number of offers of a replacement dwelling (HCD Guidelines SS6042[d], 6058).

> "It is understood and agreed between the parties hereto that the sole reason for the State's purchase of the subject property at this time is to alleviate a hardship condition presently suffered by the grantor(s) and that said hardship can only be cured by the grantor(s) selling and vacating the premises. It is, therefore, confirmed by the parties hereto that the grantor(s) has (have) received notice of the State's intent to serve a 30-day Notice to Vacate and that said Notice to Vacate will be served either (1) after the close of escrow or (2) after 90 days from the date of said notice of intent to serve the 30-day eviction notice. Grantor(s) will deliver the premises vacant to the State in good order and condition without further notice and will immediately thereafter deliver the keys to the premises to the Department (District Office address) and also pay all closing utility bills up to and including the date of vacation."

© 1994-2025 California Department of Transportation. All rights reserved.

8.10.00.00 – CONSTRUCTION OBLIGATIONS

8.10.01.00 General

Construction contract obligations require the State to do certain work on grantor's remaining property to avoid payment of damages. This work can range from construction of fences and irrigation facilities to replacement of structures. As such, the conditions must be completely described in the Contract and discussed in the Memorandum of Settlement (MOS). Project Development and Construction must be notified in writing of these obligations. Appropriate entry clauses must be included in the Contract.

8.10.02.00 State Performed Work

The following clause shall, in all cases, be the last paragraph of any clause in a Contract where the State will move, relocate, or reconstruct buildings or fences, pipelines, cattle passes, etc.:

> "All work done under this agreement shall conform to all applicable building, fire and sanitary laws, ordinances, and regulations relating to such work, and shall be done in a good and workmanlike manner. All structures, improvements or other facilities, when removed, and relocated, or reconstructed by the State, shall be left in as good condition as found."

8.10.03.00 Permission to Enter Grantor's Land for Construction Purposes

When it is necessary to enter onto owner's remainder property to perform construction contract work on facilities for owner's use, the following clause will be included in the Contract. This clause can be used with appropriate modification to allow entry for more than one type of construction work. It is not necessary to repeat the clause for each and every entry requirement.

> "Permission is hereby granted to State or its authorized agent to enter on my/our land, where necessary, to (relocate or reconstruct road approaches, cattle guards, trails, pipes, culverts, etc.), as shown on the attached map(s) and as described in Clause(s) _____ of this Contract.

© 1994-2025 California Department of Transportation. All rights reserved.

I (we) understand and agree that after completion of the work described in Clause(s) _____, said facility(ies) will be considered as my/our sole property and I (we) will be responsible for its/their maintenance and repair."

8.10.04.00 Road Approach Within State Highway Right of Way

When it is necessary to perpetuate existing private roadways which lie partially or entirely within highway right of way, the following clause will be included in the Contract:

"At no expense to the grantor(s) and at the time of highway construction, construct road approach(es) _____ of Engineer's Station(s) _____, Department of Transportation Survey between _____ and _____. Upon completion of construction of said road approach(es) it/they will be considered as an encroachment under permit on the State highway and is/are to be maintained, repaired and operated as such by grantor(s) in accordance with and subject to the laws of the State of California and the rules and regulations of the Department of Transportation of said State."

Since the Permit Section must be aware of all encroachments within the highway right of way, a copy of the Contract shall be forwarded to the District Permit Section. They may feel it necessary to issue a Standard Encroachment Permit in lieu of using the Contract as the permit. If so, the agent should assist the Permit Section in obtaining any necessary signatures, however, the permit should be issued without charging any fees.

This same clause should be used where pipelines or conduits are being installed within the highway right of way as encroachments. The clause would have to be revised to suit this type of installation. Again, a copy of the contract should be provided the Permit Section.

© 1994-2025 California Department of Transportation. All rights reserved.

8.10.05.00 Property Monuments

The Land Surveys unit will notify the Right of Way Project Coordinator when it is discovered through project survey work that a property monument will be impacted as part of a project's proposed construction. The RW Project Coordinator will share this information with the appropriate RW unit that will be handling the acquisition. If during the negotiations the property owner expresses a desire to have the property monument(s) replaced, the RW Agent will handle each request on a case-by-case basis. Where it is determined that compensation will be provided, it will be handled via an administrative settlement. If it is determined that compensation is in order for the destroyed monument, the RW Contract must expressly provide that the grantor has received payment in full and the State is released from any additional obligation in regard to property monuments. The following clause may be used:

> "Grantor understands and agrees that the amount to be paid under Clause 2(A) includes payment in full to compensate Grantor for the destruction of his/her property monument(s). Grantor releases and holds the State harmless from any additional obligation or liability with respect to this(these) monument(s)."

8.10.06.00 Divided Highway Crossovers

No obligation is to be assumed in any Contract or Judgment to install crossovers in a median strip. Any such obligation would be contrary to highway design and safety standards.

8.10.07.00 Fruit Trees Within the Right of Way

Because of potential problems involving disease or insect infestation, the Department should not maintain fruit-bearing trees as such within the right of way. Where conditions justify, this procedure may be modified to allow trees to remain solely for shade or ornamental purposes. This may involve removing extra trees so that spacing will conform to highway standards. The maintenance forces will be responsible for necessary spraying and care of the trees.

© 1994-2025 California Department of Transportation. All rights reserved.

When right of way is being acquired through orchard land in anticipation of future construction, the Contract may provide for the owner to retain the responsibility for the care of the trees, including harvesting, pest control, proper cultivation, pruning, etc., pending highway construction (see Section 8.09.08.00). If the grantor is not desirous of retaining this obligation, the District should immediately arrange for removal of the trees as soon as feasible after close of escrow.

8.10.08.00 Fencing – Access Control

The Project Development Procedures Manual classifies fencing either as "freeway" or "property" depending on whether the fence is used for access control or to serve the abutting property owner's needs. Freeway fences are placed within the right of way to act as physical barriers to enforce access control. Property fences are privately owned and maintained to serve the abutting property owner's needs. Although they are the property of the owner, certain types of fences may satisfy access control requirements.

No condition shall be included in the Contract which would limit State's right to construct access control fences or barriers within the right of way of any access controlled highway.

8.10.09.00 Installation of Property Fence

Where it is the State's obligation to either build or relocate a property fence, a clause must be in the contract patterned after the following:

The State shall:

> "Install 2 foot 7 inch +/- wire mesh and three lines of barbed wire fastened to metal posts spaced at _____ foot intervals or spacing to conform to standard specifications for this project along and immediately adjacent to the State highway right of way line, but on the undersigned grantor's remaining property, and extending from (left or right of) Engineer's Station _____ to Engineer's Station _____.

© 1994-2025 California Department of Transportation. All rights reserved.

8.10.10.00 Payment in Lieu of Construction Obligation Covering Fencing

If grantor insists on payment to perform fence installation, the Contract must expressly provide that grantor has received payment in full to do the work and that the State is released from any obligation in regard to fencing. The following clause is to be used:

> "It is agreed that included in the amount payable under Clause 2(A) above is payment in full to compensate grantor for the expense of installing fencing between (left or right of) Engineer's Station _____ and Engineer's Station _____. The grantor releases the State from any obligation to construct said fencing."

In some instances, it will be appropriate to withhold funds to ensure construction of the fencing.

8.10.11.00 Construction of Sidewalks

Under no circumstances shall any obligation be assumed to construct or pay for sidewalks except as a replacement or as an offset against other consideration owed to the grantor. Where frontage roads are to be connected to local streets that would otherwise dead-end at the freeway, and where such intersecting streets have sidewalks, it will be in order to construct sidewalks along the frontage roads. Such sidewalks are considered to be a replacement of existing facilities and, as such, are not right of way obligations.

8.10.12.00 Approval of Change Orders

The Construction Department will submit to the DDC-RW, for approval, all change orders covering the performance of work which is in fulfillment of a right of way obligation. It shall be the responsibility of the DDC-RW to investigate and determine if the work proposed in the change order is proper.

If the work proposed by the change order is a right of way obligation, the DDC-RW will note approval on the yellow copy of the change order. In the event the work involves a right of way obligation not covered by a Right of Way Contract, then a letter of explanation shall be prepared by the DDC-RW and submitted to Office of Construction Engineer along with the change order.

© 1994-2025 California Department of Transportation. All rights reserved.

8.11.00.00 – TRANSVERSE INSTALLATION OF PRIVATE IRRIGATION FACILITIES WITHIN FREEWAY RIGHT OF WAY

8.11.01.00 General

Whenever a partial acquisition severs grantor's property and it is necessary to maintain irrigation facilities to permit operation of the remaining lands on each side of the freeway, procedures set forth in the following paragraphs apply.

8.11.02.00 Classification of Crossings

Type "A" consists of pipeline facilities of 305 mm in diameter or less and all high-pressure pipelines.

Type "B" consists of pipeline facilities in excess of 305 mm in diameter and low-pressure pipelines.

Type "C" consists of open irrigation ditches which are converted to a pipeline facility to be installed transversely within the freeway right of way.

8.11.02.01 Type "A"

A reservation will be made in the conveyance to the State on behalf of the grantor which will permit the installation and maintenance of privately-owned irrigation facility within a State-owned conduit. The conduit will traverse the full width of the controlled access right of way (less than full width of the right of way will be permitted in special cases). It will remain the property of the State with the obligation to maintain and replace. The State shall not be liable for any betterments, changes or alterations in the conduit made by, or at the request of the grantor for the grantor's benefit.

The State shall install the required irrigation pipeline within the conduit at State expense; however, the irrigation pipeline shall become the property of the grantor and it will be the grantor's obligation to repair and replace the subject pipeline. This right to maintain and repair facilities existing within the conduit is limited to performing such maintenance and repair from outside the freeway right of way. The grantor shall have no right to traverse or use the freeway right of way for maintenance or repair of these facilities, except where the conduit does not extend to the freeway right of way. In those

© 1994-2025 California Department of Transportation. All rights reserved.

cases, an encroachment permit shall be granted to the grantor to provide for maintenance and repair between the freeway right of way and the conduit. A condition covering this situation shall be included in the Contract.

The Contract clause to be used in cases of Type "A" pipelines is as follows:

> "At no expense to the grantor, and at the time of construction, furnish and install (type, size of pipeline) under and across the roadbed at Engineer's Station_____. Grantor understands and agrees that, upon the completion of said work of installation, said (pipeline) shall become the property of the grantor and it will be the grantor's obligation thereafter to maintain and repair said (pipeline).
>
> It is understood that at no expense to the grantor, the State shall install across the roadbed at Engineer's Station _____ a conduit within which the above-mentioned pipeline shall be installed. It will be the State's obligation to maintain and repair the conduit.
>
> In no event shall the State be liable for any betterments, changes or alterations in the conduit made by or at the request of the grantor for grantor's benefit."

8.11.02.02 Type "B"

A reservation will be made on behalf of the grantor in the conveying deed which will permit the installation and maintenance of privately-owned underground irrigation facility within the State highway right of way. The State shall install a conduit within the right of way area reserved to the grantor for the full width of the controlled access right of way (less than full width of the right of way will be permitted in special cases). The conduit will be the property of the grantor with the obligation on the grantor to maintain and replace the conduit.

The portion of the conduit within the highway right of way shall have a diameter 152 mm greater than the diameter of the pipe required. This will permit the grantor, at a later date, in the event a replacement is necessary, to pull in a pipe of sufficient size to replace the existing facility.

The grantor's right to maintain and repair the facilities existing within the State right of way is limited to performing such maintenance and repair from outside the freeway right of way. In no instance shall the grantor have the right to traverse or use the freeway right of way for maintenance or repair of the facilities except in those cases where the conduit has additional diameter

© 1994-2025 California Department of Transportation. All rights reserved.

and does not extend to the freeway right of way. Then, an encroachment permit shall be issued to the grantor to provide for maintenance and repair of these facilities between the freeway right of way and the oversize conduit. A condition covering this situation shall be included in the Contract. The Contract will include the following clause in the case of Type "B" and "C" pipeline crossings:

> "At no expense to the grantor, and at the time of construction, furnish and install (type, size of conduit) under and across the roadbed at Engineer's Station _____. Grantor understands and agrees that, upon the completion of said work of installation, said (conduit) shall become the property of the grantor and will be the grantor's obligation thereafter to maintain and repair said (conduit)."

8.11.02.03 Type "C"

All requirements listed under Type "B" facilities apply to Type "C." The Contract will include the clause in Section 8.11.02.00. Also, the following requirements apply to Type "C." The Contract will provide that the grantor shall keep the irrigation pipeline, placed within the freeway right of way, free and clear from obstructions, debris and other substances, so as to ensure the free passage of water in the pipe.

8.12.00.00 – EXCHANGES AND ABANDONMENTS

8.12.01.00 General

Subject to approval by the California Transportation Commission (CTC), excess real property may be used in exchange for all or part consideration for other property required for highway purposes. Exchanges of land in right of way transactions should be limited to those cases where the excess real property is contiguous to the remaining property owned by the grantor of the property being acquired. Noncontiguous excess real property exchanges must have the prior approval of HQ RW. A copy of the authorization will be included in the Memorandum of Settlement (MOS). Finding "A" or "B" situations are the most desirable type of exchange.

It is Department policy to dispose of excess property by public sale whenever possible. Exchanges are justified if sale of an excess parcel to the general public would be injurious to the interests of an abutting owner, or if damages are minimized by an exchange and the grantor's property rehabilitated to permit its highest and best use. See the Excess Lands Chapter.

8.12.02.00 Exchanges of Superseded State Highway Right of Way

When all or a portion of a State highway has been superseded by a change in location and is no longer necessary (including need for bike paths, vista points, and roadside rests, etc.) and title to the right of way is easement only (either prescriptive or by easement deed), and said highway is not to be relinquished to the county, it may be vacated or disposed of in accordance with Streets and Highways Code (SHC) Section 118 (see Section 8.12.10.00). A superseded right of way may be retained in the State Highway System when its use changes solely to such as a bike path, vista points, and roadside rests, etc. Under these circumstances, the highway is not to be vacated (see SHC Section 104 [j]).

The District will not contractually obligate the State to vacate an easement without first complying with the requirements of Streets and Highways Code Sections 2381, 8313, and 8330.5. These sections require contact with local agencies having jurisdiction over the areas. SHC Section 8340 allows the reservation of easements for utility purposes prior to vacation.

© 1994-2025 California Department of Transportation. All rights reserved.

When title to such superseded right of way is owned in fee, the State may convey title to a private individual only by Director's Deed. Saleable segments of such right of way may be used in exchange the same as any other fee-owned property.

8.12.03.00 Appraisal for Exchange

Excess real property, or an interest therein, proposed for exchange shall be appraised in accordance with Chapter 7. The appraisal shall be approved in accordance with current delegations. This requirement will not apply to parcels acquired specifically as substitute parcels for public utilities, government-owned land or railroads.

The appraisal report of exchange property shall, however, be assigned a Register number for filing and reference purposes. In lieu of a Register number the District may use the number assigned to the Director's Deed.

8.12.04.00 Acquisition and Exchange of Excess

The State may acquire land in excess of its needs by authority of SHC Sections 104.1 and 104.2 and exchange it for other property needed for highway purposes. Title is to be taken in the name of the State and conveyance from the State will be by Director's Deed. Acquisition of excess land must be in accordance with CCP Sections 1240.150 and 1240.410 to 1240.430.

The acquisition agent is responsible for the completion of the identification, pro-rata cost, and inventory value sections of the Excess Land Inventory and Disposal Record (see Excess Lands Chapter). Refer to the discussion on preparation of MOS in Section 8.50.00.00. Where excess lands are included in an Order for Possession, an Excess Land Inventory and Disposal Record is to be prepared at the time the Order is filed and immediately forwarded to the appropriate Branches.

In an exchange transaction consummated simultaneously between the State and two landowners (from each of whom State will acquire right of way), it is permissible to take title to excess land in the name of a title company, or one of such owners. For example, all of A's lot is purchased; A conveys one-half to the State for right of way and the other half to B, or to the title company who conveys to B, as all or part consideration for B's granting a right of way to the State. In such cases, the Contracts and the MOSs must clearly show the basis of the entire transaction, including the extent of allowance which the State is receiving for the exchanged property and its cost to the State.

© 1994-2025 California Department of Transportation. All rights reserved.

The Contract with the grantor of the property to be exchanged, and with the grantor who is to accept the exchanged property, should be submitted simultaneously for approval. In all cases other than simultaneous exchange transactions, title shall be taken in the name of the State.

8.12.04.01 Commitment to Convey Excess Prior to Acquisition

When entering into an agreement obligating the State to convey excess land yet to be acquired by the State, the following clause will be used in the Right of Way Contract:

> "If, for any reason, the land described in Clause No. _____ hereinabove is not acquired by the State of California, prior to _____, 19__, or if the land so described is acquired by the State, but is subsequently found to be necessary for a public highway or other public purposes, the State shall, in that event, pay the undersigned grantor, and grantor agrees to accept, the sum of $_____ in lieu of the State conveying the real property described in Clause No. _____ and grantor agrees to release and forever discharge the State of California from any further obligation on this account."

Obligations to convey excess land not yet acquired should be carefully considered since the owner of the excess need not convey it to the Department and may also prevent its acquisition in a condemnation proceeding.

© 1994-2025 California Department of Transportation. All rights reserved.

8.12.05.00 Land Exchange

The Contract must contain the following clause in these transactions:

> "Subject to approval by the California Transportation Commission, deliver to Grantees (designating them as joint tenants, or tenants in common, or whatever is desired), a good and sufficient Director's Deed, properly recorded, to the following described property, free and clear of all liens and encumbrances except taxes and special assessments, if any, easements, restrictions and reservations of record***."

or

> "Subject to the approval by the California Transportation Commission, deliver to Grantees (designated them as joint tenants, or tenants in common, etc.), a good and sufficient Director's Deed, properly recorded, to the property outlined in red on the sketch attached hereto and made a part hereof free and clear of all liens and encumbrances except taxes and special assessments, if any, easements, restrictions and reservations of record***."

When necessary to reserve access rights, add the following to the above:

> "*** and excepting and reserving therefrom access rights from said property to be conveyed along and across a line (here insert description of line), said line also being the _____ line of the State highway. It is understood that the State in no way will be obligated to pay escrow charges, title insurance fees or documentary transfer taxes incurred in the conveyance to the grantor referred to above."

NOTE: It is imperative that any defects in the title of the State be listed in the contract under the exceptions in the above clause so that the State will not be obligated to convey a better title than it possesses.

As to taxes, it is important, prior to conveyance, to have the taxes canceled. The reconveying of title into private ownership will have the effect of reviving the tax lien unless the proper procedure for cancellation has been taken while the property is under State ownership.

If it is decided not to cancel the taxes, then the agreement to deliver the deed should specifically call attention to the fact that taxes may be a lien and the State does not guarantee title in that regard.

© 1994-2025 California Department of Transportation. All rights reserved.

In many instances, it will be necessary to insert reservations or exceptions in the Director's Deed. The most common instance would be the reservation of access rights where the lands being conveyed adjoin a freeway. Reservations of oil and mineral rights will not apply to exchange transactions where grantors are conveying all oil and mineral rights to the State. However, if grantor reserves the mineral rights, then the State shall do likewise.

Care should be taken to see that any necessary restrictions are included in the Director's Deed, not only concerning access rights, but to protect sight distance, possible setback lines, etc.

The District shall arrange for the recordation of the Director's Deed before delivery to the grantee. The State may pay recording fees as part of the consideration in exchange transactions.

8.12.06.00 Improvement Exchange

The following special procedures will apply where a building improvement is to be exchanged in a right of way transaction as whole or part consideration for land being conveyed to the State for highway purposes:

A. The District shall prepare an improvement disposal report, in duplicate, covering the building improvements involved, which report will clearly justify the proposed exchange value.

B. Upon execution of the Contract, a bill of sale for such building improvements shall be delivered to State's grantor.

C. The building improvement exchanged shall be removed from State property within 60 days after title to the improvement passes to the grantor.

The exchange of building improvements shall be used only in cases where the State will receive full credit in the exchange for the amount of the market value of such improvements.

Where State-owned improvements are to be exchanged for required right of way, the following clause will be included in the Contract:

"The State shall deliver to _____ a bill of sale for the (description and address of building being exchanged) located (legal description, if same is not too long) ***."

© 1994-2025 California Department of Transportation. All rights reserved.

This clause shall be followed by a provision which will ensure the removal of the improvements by the grantor, i.e., forfeiture of title to the improvement or a withholding of a portion of the monies payable under the contract. See Section 8.06.12.00 for a clause which can be modified to fit this situation.

8.12.07.00 Exchanges with No Monetary Consideration

Where excess real property or interest therein is used in exchange and no monetary consideration is received as a credit against any payment made to the State's grantor, a monetary evaluation of any benefits or savings accruing to the State (such as an offset to severance damages, substitute access to avoid buy-out, etc.) shall be provided in the MOS to assure State is receiving consideration commensurate with the value of the property to be conveyed.

8.12.08.00 Payment by Grantor

Where the exchange will involve a payment to the State by the grantor the following clause will be included in the Contract:

> "In consideration of the proposed recordation and delivery by the State of the Director's Deed referred to in Clause _____, it is agreed between the parties herein that the undersigned grantors shall deposit with the Department of Transportation the sum of $_____. Said deposit will be made at District _____ Office located at _____, within ____ days after State, by certified mail, notifies grantors that this Right of Way Contract has been accepted by the State as evidenced by the signature of the District Director or the delegated representative on the copy of the contract delivered with said notification.
>
> In the event grantors do not deposit said sum within the time period specified, then the State is relieved from any and all obligations to deliver said Director's Deed and shall pay $_____ for the property conveyed by Document No. _____."

© 1994-2025 California Department of Transportation. All rights reserved.

8.12.09.00 Release of Liability-Director's Deed

Where the exchange conveyance will be by Director's Deed and the grantor insists on the privilege of entering upon the land in advance of the date the Deed is recorded, the following clause must be in the Contract:

> "In the event the grantor elects to enter upon the land to be conveyed by Director's Deed under Clause _____, in advance of the recording of said Director's Deed, the State is to be relieved from all liability and all claims for damages by reason of any injury to any person or persons, or property of any kind whatsoever and to whomsoever, from any cause or causes whatsoever, while on the area to be conveyed as described herein.
>
> The grantor herein further understands and agrees to indemnify and save harmless the State from all liability, loss, cost and obligation on account of or arising out of any such injury, however occurring.
>
> It is further understood that this agreement shall not in any way imply or be construed to grant any additional rights of possession, occupancy, or use of said property until recordation of the Director's Deed as provided in Clause herein.
>
> It is further understood that if this transaction is not completed under the terms of this contract, any improvements which the grantor may erect or cause to be erected shall become the property of the State, which shall have the right to use or dispose of said improvements as it may see fit."

8.12.10.00 Vacation

Vacation is the complete or partial abandonment or termination of a public right to use a street, highway, or public service easement. A State highway may be vacated only by the CTC. If the CTC determines that a public service easement is no longer needed by the public, the Department may dispose of the property through the vacation process. As an alternate to vacation, the Department may elect to dispose of the property as provided in SHC Section 118.

There may be instances when disposal through vacation or other procedure is not acceptable. Examples of this are when all access to an adjoining property would be cut off or if there are public utility facilities in place which are in use and which would be affected by such disposal or vacation or when hazardous materials are present for which the Department is responsible.

© 1994-2025 California Department of Transportation. All rights reserved.

Additionally, the Department is required, by statute, to advise local agencies prior to vacation. See Section 8.12.02.00 for statutory references.

The DDC-RW will determine the method of disposal. Disposal under SHC Section 118 should, in most circumstances, be at market value. There may be exceptions and consultation with Legal and HQ RW may be necessary.

When an easement is vacated as part of a right of way transaction and if grantor requests confirmation of such vacation, the following clause may be used in the Right of Way Contract:

> "Upon completion of the project designated as _____ and opening the same to public travel, there will be presented to the California Transportation Commission the customary form of resolution and favorable recommendation of the Department of Transportation covering vacation of the portion of the existing highway across the grantor's property superseded by the new construction."

© 1994-2025 California Department of Transportation. All rights reserved.

8.13.00.00 – EXECUTION OF DOCUMENTS

8.13.01.00 General

Deeds and other documents must be prepared to show the names of grantors or other parties identical to that disclosed by the record (i.e., title report), except where a change of name by marriage or otherwise is encountered. This must be shown by an appropriate recital in the caption.

If the grantor conveys under a form of name different from that under which title was acquired, such variation must be accounted for in the caption of the instrument by showing both the name under which the grantor presently is conveying, as well as that under which title was acquired.

Signatures and acknowledgments must be in agreement with the names of grantors or other parties appearing in the caption or the body of the instrument. All parties named as grantors must sign and the signatures acknowledged.

Improper executions may be cured by Curative Statute. See the Title Handbook for further discussion.

8.13.02.00 Property Vested Separately

When title is vested or record at the "separate property" of either a husband or wife, only the signature of the vestee need be obtained. The deed caption, however, should disclose the marital status of the grantor. This should be discussed with the title company to satisfy its requirements.

8.13.03.00 Property Not Vested Separately

Unless property is explicitly vested of record as separate property, it may not be assumed that it is actually separate property.

If record title is vested in a married woman and not explicitly "as her separate property," the assumption should not be made that it is her separate property. In such cases, the husband's signature to Deed, Contract and other required documents should be formally solicited. If the husband refuses to join, no coercion should be attempted, but his reasons for refusing should be stated in the MOS. The title company should be requested to provide assurance in writing that it will insure State's title on a deed executed only by

© 1994-2025 California Department of Transportation. All rights reserved.

the wife, and such assurance transmitted to the DORW at the time of scheduling.

8.13.04.00 Declaration of Homestead

Both spouses must personally execute and personally acknowledge deeds conveying property subject to Homestead (Code of Civil Procedure Section 704.710). Conveyances of homesteaded property otherwise executed are void. No power of attorney or acknowledgment by subscribing witness may be used. The curative act as to defective acknowledgments is not applicable to homesteaded property.

8.13.04.01 Liens on Homesteads

If money judgments or other liens have been entered or recorded after recordation of a Declaration of Homestead, do not presume such judgments or liens are ineffective because of the existence of the homestead. Consult with the title company prior to contacting owners. If the title insurer is willing to insure against judgments or liens because of the homestead, its agreement to do so should be obtained in writing. Liens in favor of a governmental agency are never defeated by a Declaration of Homestead.

8.13.05.00 Partnership

The caption of a deed from a partnership should show "Blank and Son, a partnership, composed of John Blank, and Henry Blank, partners." Such should be signed, "Blank and Son, a partnership by John Blank, partner, by Henry Blank, partner."

Spouses of partners need not join with partners in deeds or other instruments affecting property of a partnership if title is vested in the partnership name. If the title is vested in the names of individual partners, their spouses should join in the execution of deeds.

8.13.06.00 Fraternal, Religious or Charitable Corporations and Organizations

Instruments from these organizations are executed in conformity with the by-laws and constitutions of such groups. Resolutions of authority to execute such instruments and copies of by-laws must be obtained from the controlling body, such as a board of trustees or directors and a copy of such resolution, certified or attested to by its secretary, must be secured.

© 1994-2025 California Department of Transportation. All rights reserved.

8.13.07.00 Corporations

Deeds from corporations must be executed in corporation form. The name of the corporation must appear in the signature. The authorized officers, usually the president or vice-president and secretary or assistant secretary must sign on behalf of the corporation. A special resolution of authority from the Directors should be secured if the president or vice-president does not sign. The corporate seal must be affixed, unless the officers have been specially authorized to execute without the seal. The seal must show the name of the corporation, the state and date of incorporation. The name of the corporation on the seal must agree with the name of the corporation in the deed.

If the corporation is one whose articles of incorporation do not specifically provide for acquisition or sale of real property, our title insurer may request a special resolution of authority to convey from the corporation's board of directors. If the title company requests such a resolution, it is to be supplied.

The capacity of defunct, dissolved or suspended corporations to convey title is contingent upon the various dates on which the consecutive laws controlling their status became effective. Consult the title company as to its requirements in passing a deed from any such corporations.

8.13.08.00 Proof of Termination of Joint Tenancies

A joint tenancy is terminated upon the death of one of the joint tenants and title vests in the surviving joint tenant. However, proof of death of the deceased joint tenant must be recorded to provide continuity of record title. Such proof is provided by:

A. Recording a certified copy of the death certification accompanied by an affidavit identifying the decedent as a former joint tenant, provided the deceased was a resident of this State;

B. Special proceedings under Probate Code Section 210, and the recording of the decree obtained;

C. The issuance of letters testamentary or of administration in probate proceedings upon the estate of the decedent, provided an affidavit of identity is recorded referring to these proceedings rather than to a death certificate.

© 1994-2025 California Department of Transportation. All rights reserved.

8.13.09.00 Minors Without Legal Guardians

In the case of nominal land value or a donation of small areas vested in a minor where a guardianship has not been established, a deed from a presumptive guardian or guardians, describing them as such in the caption, maybe obtained provided prior approval of the DDC-RW or Supervising Right of Way Agent, Acquisition Branch is obtained.

Where a presumptive guardian signs for the minor, the Contract must include as an exception to State's title the fact that a legal guardianship has not been established for the person and estate of the particular minor.

See Section 8.05.06.00 and 08.00 for deeds from minors through a guardian.

8.13.10.00 Power of Attorney

Deeds executed under a power of attorney must be executed as "Vestee by Agent, his/her Attorney-in-fact", and the signature of the attorney-in-fact must be subscribed in attorney's own hand. The power of attorney must be recorded in the county in which the land in question is situated. The sufficiency of such power of attorney should be confirmed by the title insurer prior to relying upon its validity.

8.13.11.00 Political Subdivisions

Documents from cities, counties or other political entities must be executed by the proper officer or officers, and supported by a proper resolution from a governing board or body authorizing the execution of the documents. A seal should be affixed. This procedure applies to the execution of Deeds, Contracts, Joint Use Agreements, etc.

8.13.12.00 Incompetent Persons

No person, either legally adjudged incompetent or who is incompetent in fact without legal adjudication, may execute a Deed. In all such cases, a legal guardian must be appointed and an order of the court authorizing execution of the Deed must be obtained (see Miscellaneous Deed Clauses in the RW Engineering Chapter).

© 1994-2025 California Department of Transportation. All rights reserved.

8.13.13.00 Signature by Mark

Persons unable to provide a signature to a document may sign by mark. The name of the party must be subscribed near the mark by one of the two required witnesses to such signature by mark. Deeds so executed may be acknowledged as if a signature had been subscribed by the party personally. The following clause is advisable:

> "_____, being unable to write, made his/her mark in my presence and I signed his/her name at his/her request and in his/her presence.
>
> _____
>
> Additional Witness _____"

A deed executed by mark with only one witness is good as between the parties. Two witnesses are necessary to allow recordation. Where two other witnesses are not available, the Agent may sign as an additional witness.

8.13.14.00 Signature by Foreign Script

Such signature should show a witness opposite the signature and state: "Witness to signature of _____ who signs in (Hebrew, etc.)." Acknowledgment may be in the usual form.

© 1994-2025 California Department of Transportation. All rights reserved.

8.14.00.00 – ACKNOWLEDGMENTS

8.14.01.00 General Recordation Requirements

Proper acknowledgment of documents is a necessary prerequisite to recordation. All Deeds to the State are to be properly acknowledged.

The Agent can do much to ensure that acknowledgment certificates will be properly executed by notaries. If the document is being transmitted to grantors by mail, the names of the grantors should by typed in the Certificate of Acknowledgment the same as the Deed is to be executed. The correct acknowledgment form should be attached to the document before it is transmitted.

Preliminary precautions such as cited above and an occasional "assist" from the Agent can save time and effort in completing a transaction.

8.14.02.00 Parties Authorized to Take Acknowledgments

Acknowledgments may be taken only by officers specified in the Civil Code. The specified officers include:

A. A notary public at any place within the State.

B. A county recorder, county clerk, court commissioner, judge of a municipal or justice court and a clerk of a municipal or justice court within the county or city and county in which such officers were elected or appointed.

C. Officers of the Armed Forces per Civil Code Section 1183.5. This section sets forth the requirements regarding acknowledgments by officers of the armed forces of the United States for military personnel and their spouses. If questions arise concerning the validity of an acknowledgment by military personnel, the District should seek the advice of the title company that will handle the escrow.

© 1994-2025 California Department of Transportation. All rights reserved.

8.14.03.00 Acknowledgment Form

Acknowledgments made in California must be in the form and manner prescribed by the Civil Code. The All-Purpose Acknowledgment is to be used whenever a signature is directly acknowledged by a Notary. To obtain a copy of the most recent All-Purpose Acknowledgment, go to the California Secretary of State website.

8.14.04.00 Certificate of Conformity for Foreign Acknowledgments

Acknowledgments made outside California and which deviate in form from that prescribed by the Civil Code of California, should be accompanied by a certificate of conformity as set forth in Civil Code Section 1189, which reads:

> "Provided, however, that any acknowledgment taken without this State in accordance with the laws of the place where the acknowledgment is made, shall be sufficient in this State; and provided further, that the certificate of the clerk of a court of record of the county or district where such acknowledgment is taken, that the officer certifying to the same is authorized by law so to do, and that the signature of the said officer to such certificate is his true and genuine signature, and that such acknowledgment is taken in accordance with the laws of the place where the same is made, shall be prima facie evidence of the facts stated in the certificate of said clerk."

© 1994-2025 California Department of Transportation. All rights reserved.

8.15.00.00 – LOSS OF GOODWILL

8.15.01.00 Acquisition Function When Owner Claims Loss of Goodwill

8.15.01.01 State Law Requirements

Both Federal and State law provide that just compensation must be paid for private property which is taken for public purposes. A separate part of State law provides that in certain cases, an owner of a business may be compensated for the loss of goodwill. That law requires that the owner of a business conducted on the property taken, or on the remainder if such property is part of a larger parcel, shall be compensated for loss of goodwill if the owner proves four items. These are set out in the clause in 8.15.03.00.

Within the meaning of this article, "goodwill" consists of the benefits that accrue to a business as a result of its location, reputation for dependability, skill, or quality, and any other circumstances resulting in probable retention of old or acquisition of new patronage.

8.15.01.02 Recoverability

Goodwill loss is recoverable only to the extent it cannot reasonably be prevented by relocation or other efforts by the business owner to mitigate. The law places the burden on the business owner to prove the loss.

A copy of the Goodwill Information Sheet (Exhibit 08-EX-30) (internal Caltrans link) will be given to each business owner as an attachment to the Appraisal Summary Statement (Exhibit 08-EX-15B) (internal Caltrans link). Depending on whether or not this "Loss" has been appraised will determine which statement needs to be checked on the Appraisal Summary Statement.

© 1994-2025 California Department of Transportation. All rights reserved.

8.15.01.03 Definition

For the purposes of this section, a "business" is defined as:

A. A commercial or mercantile activity engaged in as a means of livelihood;

B. A commercial, sometimes industrial, or nonprofit enterprise;

C. A particular field of endeavor – patronage.

The operation of residential, nontransient, rental housing units (SFR, duplexes, apartments) is not considered as being a business. However, the operation of housing units where rental is ordinarily billed on a daily basis (i.e., hotels, motels) is to be considered as a business.

A farm is not generally considered as a business unless there is an on-premise full-time, retail, commercial operation involving products grown or developed on the property. A seasonal retail fruit stand operation would not typically be considered as a business.

8.15.01.04 Claim for Loss

During the acquisition of real property interests required for a project, two situations may arise with respect to claims for the loss of goodwill. They are:

A. The operator of a business on the property demands an offer prior to any settlement; or

B. The operator of a business on the property agrees to defer the determination of any loss of goodwill until after settlement.

In either case, an estimate of the loss of goodwill or the evaluation of documentation submitted by the business owner will be made by the Appraisal Branch. The results will be used by the Acquisition Agent to conclude the transaction, recognizing any "in-lieu" payments that may have been or will be made under Relocation Assistance.

Sections 8.15.04.00 and 05.00 must be reviewed and followed to the extent possible to ensure that payments for loss of goodwill do not include either relocation assistance in-lieu payments or reestablishment payments made or being made by the Relocation Assistance Branch. The Acquisition Branch must maintain clear lines of communication and responsibility with the

© 1994-2025 California Department of Transportation. All rights reserved.

Relocation Assistance Branch to ensure duplication of payment is avoided. Review the Relocation Assistance Chapter sections dealing with loss of goodwill, reestablishment costs, and in-lieu payment.

8.15.02.00 Settlement Includes Full Compensation for the Loss

When an owner of a "business," defined above, accepts a settlement for land, improvements and damages as well as compensation for the loss of goodwill, the following clause will be included in the Contract:

> "It is understood and agreed between the parties hereto, that included in the payment under Clause 2(A) above, is the amount of $_____ to compensate grantors for any and all loss of goodwill. Grantor (business owner) agrees and acknowledges that the statute which authorizes this payment also provides that compensation for such loss will not be duplicated in the compensation otherwise awarded to the owner."

8.15.03.00 Settlement with Deferment of Claim for Loss

When the owner of a "business" accepts a settlement for land, improvements and damages and is agreeable to deferring compensation for the loss of goodwill, the following clause will be included in the Contract:

> "It is understood by the undersigned grantor that the laws of the State of California permit the owner of a business located on property, all or a portion of which is to be acquired for a public improvement, to be compensated for the loss of goodwill to the business provided the owner of the business established that:
>
> 1) The loss is caused by the acquiring of the property or the injury to the remaining property.
>
> 2) The loss cannot reasonably be prevented by a relocation of the business or by taking steps and adopting procedures that a reasonably prudent person would take and adopt in preserving the goodwill.
>
> 3) Compensation for the loss will not be included in payment under Section 7262 of the Government Code. (Relocation Assistance Program.)

© 1994-2025 California Department of Transportation. All rights reserved.

4) Compensation for the loss will not be duplicated in the compensation otherwise awarded to the owner.

It is further understood and agreed that the undersigned grantor, as required by State law, shall make the State tax returns of the business available for audit solely for the purpose of assisting and determining the amount of compensation to be paid for the loss of goodwill. It is understood that payment under Clause 2(A) above does not include compensation for the loss of goodwill, if any.

It is further understood and agreed that compensation, if any, for the loss of goodwill shall be payable to the undersigned grantor at a later date following the establishment of proof of such loss. Claims for such loss must be submitted to the Department of Transportation at _____, by *_____ Date _____."

It is further understood and agreed that, if grantor and the Department cannot reach agreement on compensation, if any, for the loss of goodwill by (**_____ Date _____), the Department shall file a declaratory relief action in superior court for the purpose of determining compensation, if any, for loss of grantor's business goodwill. It is understood that the sole issues to be determined in any declaratory relief action will be those contained in Code of Civil Procedure Section 1263.510 including the amount of compensation, if any, for grantor's loss of business goodwill and that no other issues will be raised by grantor therein or in preliminary proceedings thereto challenging the public use or necessity of the project, or the utilization therefor of grantor's property."

*Two years from date of right of way contract.

**Three years after date of right of way contract (to allow one year for appraisal and negotiations after receipt of claim).

8.15.04.00 Payment Adjustments

The following clause will be used when payment is made subsequent to RAP payments for either in-lieu, move-related, or reestablishment expenses.

"It is understood and agreed that the payment made for loss of goodwill as herein provided has been adjusted to reflect and avoid duplication of payments already made under either an in-lieu payment, move related payment, or a business reestablishment expense claim."

© 1994-2025 California Department of Transportation. All rights reserved.

8.15.05.00 Payments Made Prior to In-Lieu, Move Related, or Reestablishment Payments

In some instances, a Goodwill report will include costs to reestablish the business at a new location or revise and reestablish certain features of the business on the remaining property. If these reestablishment costs are in a Goodwill report and the amount of the loss of goodwill is offered and accepted, then the contract covering the payment for the loss shall identify these reestablishment items. Inclusion of any of these items in the contract is essential if the Relocation Assistance Branch has not compensated a business owner for in-lieu, move-related, or business reestablishment costs. If they are not identified by type in the contract, the probability exists that such costs may be duplicated by Relocation Assistance payments. In the situation described above, use the following clause with only the applicable items (1 through 8):

"It is understood and agreed that payment for loss of goodwill herein includes, but is not limited to the following:

1) Moving and related expenses such as:

   a. Transportation of personal property.
   b. Connection to available nearby utilities from the right of way to improvements at the replacement site.
   c. Modifications to personal property.
   d. Storage of personal property.
   e. Licenses, permits, fees and certifications.
   f. Professional services.
   g. Relettering and reprinting.
   h. Feasibility surveys in connection with the purchase or lease of a replacement site.
   i. Impact fees for one time assessments for anticipated heavy utility usage.
   j. Other items that the Department considers moving and related costs.

2) Repairs or improvements to the replacement real property as required by Federal, State or local law, code or ordinance.

3) Modifications to the replacement property to accommodate the business operation or make replacement structures suitable for conducting the business.

© 1994-2025 California Department of Transportation. All rights reserved.

4) Construction and installation costs for exterior signing to advertise the business.

5) Redecoration or replacement of soiled or worn surfaces at the replacement site, such as paint, paneling, or carpeting.

6) Advertisement of replacement location.

7) Estimated increased costs of operation during the first 2 years at the replacement site for such items as:

   a. Lease or rental charges.
   b. Personal or real property taxes.
   c. Insurance premiums.

8) Other items that the Department considers essential to the reestablishment of the business."

Use of this clause should ensure that duplication of payment is avoided and the grantor/business owner is made aware what the payment covers. Any of these eight items specifically identified in a Goodwill report may make portions of such item(s) eligible for Federal participation.

Items 1 through 8 are portions of items contained in the revised Uniform Relocation Assistance and Real Property Acquisition Regulations for Federal and Federally-Assisted Programs, Section 24.304. Their inclusion herein neither implies, nor should any reestablishment costs be limited to, any preconceived or predetermined amount of Federal participation. An appraiser may determine, for example, that exterior signing may cost $2,500. This may not necessarily be excessive. The relocation assistance payment of $1,500 is federally reimbursable, while the additional amount of $1,000 is not. See the Appraisal Chapter.

Items 1 through 8, listed above, are not guidelines for the preparation of any report dealing with loss of goodwill. They may or may not be a part of such report. The sole purpose for their inclusion is to assist in the process of ensuring that duplicate payments are not made by the Acquisition and Relocation Assistance Branches which is to ensure that we comply with the law. It is essential, therefore, that when a payment is to be made for Loss of Goodwill, the Acquisition Branch supervisor or the Acquisition Agent shall contact the Relocation Assistance Branch to ascertain whether relocation payments have been made, are in the process of being made or will be made after the claimant relocates. A Contract will be prepared using the appropriate clauses set out above, depending on the situation. In each of these

© 1994-2025 California Department of Transportation. All rights reserved.

situations, Acquisition and Relocation Assistance must advise each other regarding the status of payments on claims when Loss of Goodwill/in-lieu payments are involved. When Loss of Goodwill is settled, the appropriate contract, or stipulation if the claim is contested, must be provided to the Relocation Assistance Branch.

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.00.00 – HAZARDOUS WASTE

8.16.01.00 General

Hazardous Waste (HW) is of great concern to the Department and the California Transportation Commission (CTC). The Department must not acquire property contaminated with HW without adequate prior investigation and proper contractual and valuation safeguards.

Decisions on follow-up investigation to determine cleanup costs must be made as soon as possible to allow for timely certification of a project and to avoid limiting the Department to the option of (1) delaying the project or (2) acquiring property with possible contamination. To achieve this, it is critical that Project Development, Right of Way, and the HW Advisor coordinate their activities.

Properties required for right of way which either contain or are suspected to contain HW may be acquired only after the established conditions and procedures have been complied with. Some HW acquisitions may require HQ approval by the Chief Engineer (see Section 8.16.01.01). Once contamination is known, the property owners shall be advised of their responsibility under the law to clean up all identified HW. The preferred procedure is to not acquire property in its contaminated state, and all efforts possible should be extended to obtain cleanup prior to acquisition.

As a normal rule, HW problems must be dealt with at the earliest stage of the project as is possible. If HW is discovered during the acquisition process:

A. RW is to immediately advise District Project Development, in writing, with a copy to the District HW Coordinator.

B. Project Development will inspect site and advise:

    1. RW to proceed with acquisition if, in their opinion, no significant problem exists and further investigation is unnecessary; or

    2. HW Coordinator will contract for further investigation to determine if contamination exists and, if so, the nature and dimension of the waste. Further investigation by a contractor to determine costs of cleanup may be necessary.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Project Development may advise RW to proceed, because it is in the best interest of the State to acquire property as potential HW contamination risks and costs are low or the problem can be handled with engineering methods during construction. This decision to acquire is made by Project Development and must be fully documented in the parcel file with a copy attached to and made a part of the MOS. Prior approval of HQ RW is not required.

   The appropriate clause must be included in the Right of Way Contract (see Sections 8.16.02.00 through 8.16.06.00).

D. If further investigation is necessary, Acquisition will continue contact with owner(s)/operator(s) to advise of the process being pursued and to obtain necessary permits to enter.

   When testing is complete and cleanup costs are known, the appraisal must be revised to reflect the effect contamination and required cleanup has on market value.

E. Settlements, whenever possible, are to be based on cleanup prior to acquisition using the primary appraisal. Settlements made where cleanup occurs after acquisition are to be handled as follows:

   1. Offers made prior to obtaining a revised appraisal will be made contingent on cleanup and shall be confirmed in writing. When the appraisal has been revised to include an alternate, considering the effect on the market value, the current offer must be withdrawn and a new offer made.

   2. If settlement is reached based on the Department doing the cleanup based on the primary appraisal, the amount of the estimated cleanup shall be withheld and the appropriate clause will be included in the Right of Way Contract (see Section 8.16.03.00). Prior written approval of District Project Development and appropriate documentation are required.

© 1994-2025 California Department of Transportation. All rights reserved.

3. If settlement is not reached where money is withheld, it may be necessary to acquire based on the alternate appraisal wherein the Department is purchasing the property as is, after the consideration of cleanup is reflected in the acquisition offer. Again, prior written approval of District Project Development and appropriate documentation in the file and in the MOS are required. The appropriate clause will be included in the Right of Way Contract (see Section 8.16.03.00 Alternate Clause).

4. Where settlement cannot be reached and the property owner will not clean up the property, it may be necessary to file a condemnation suit and obtain an OP. The appraisal must be revised to include an alternate that reflects the effect of the HW on market value. The current offer must be withdrawn and a new offer made prior to filing an action. The Approval Process for acquisition of HW contaminated property (see Section 8.16.01.01) will be required when the net value of the property after deduction for hazardous waste cleanup is $0 (or the cost of cleanup exceeds the fair market value of the property) and the parcel is to be presented to the CTC for approval of a Resolution of Necessity.

8.16.01.01 Approval Process for Acquisition of Hazardous Waste Contaminated Property

HQ approval by the Chief Engineer is required to purchase contaminated property when any of the following four conditions exists:

1. Remediation costs (excluding investigation costs) relative to the specific parcel are estimated to exceed $300,000, and;

    a) The estimated cost of remediation exceeds 50% of a parcel's appraised value as if clean, or

    b) The estimated cost of parcel remediation exceeds 10% of the total capital costs for the project (right of way and construction).

2. Contamination on the parcel has resulted in groundwater contamination requiring cleanup.

© 1994-2025 California Department of Transportation. All rights reserved.

3. The net value of the property after the fair market value deduction for HW cleanup is $0 (or the cost of cleanup exceeds the fair market value of the property) and the parcel is to be presented to the CTC for approval of a Resolution of Necessity.

4. The parcel is or was a high risk site (such as a mining, milling, or salvage site – see Standard Environmental Reference Chapter 10 and Project Development Procedures Manual Chapter 18), or a site with previously known contamination that was closed meeting federal and state standards less stringent than those currently in effect.

The District Project Engineer works with the Project Manager, District Right of Way, District Hazardous Waste Manager, and Legal, to complete the Request for Acquisition of Contaminated Property (Form ENV-0002) (internal Caltrans link) for Headquarters approval.

Once the Request for Acquisition of Contaminated Property (RACP) is completed and signed by the District Project Manager, Project Engineer, Hazardous Waste Manager, Legal and the District Deputy of Right of Way, a transmittal memo signed by the District Director is attached and the request and supporting information is sent to the HQ Chief, Division of Environmental Analysis (DEA), for review and processing. The Chief, DEA will then make a recommendation to the Chief Engineer, who then either approves or denies the District's request for the acquisition of contaminated property and signs a response letter. DEA Hazardous Waste will then send the Chief Engineer's response letter and attached RACP back to the District Project Engineer. If the acquisition is approved, the RACP and Chief Engineer's approval become an attachment to the Hazardous Materials Disclosure Document.

The District should allow at least 30 calendar days from DEA's receipt of a completed RACP for DEA's review, and approval or denial by the Chief Engineer.

Additional information regarding the Department's policies and procedures for Contaminated Property Acquisition, and the Exception Process for Contaminated Property Acquisition can be found in Chapter 10 of the Standard Environmental Reference and Chapter 18 of the Project Development Procedures Manual, as well as the DEA Contaminated Properties page.

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.01.02 Permit to Enter

A detailed visual examination of the property to collect data for risk analysis can legally be performed without the need for a signed Permit to Enter, providing the property owner concurs. A Permit to Enter will be required for any physical testing to be done by the State to determine HW contamination.

The statutory procedure for obtaining a voluntary permit for testing, etc., is set forth in CCP 1245.010 and 1245.060. The statutes speak of consent, notice and compensation to "the owner of the property." "Owner" should be given a broad interpretation to include the holder of any interest likely to be affected by the testing, including, for example, a tenant in possession. All parties with an interest in the property should sign the entry form, where possible.
The following guidelines and the Permit to Enter forms are based on consideration of the law and recent court decisions. Future legal actions may be compromised if required entry is not specific as to the proposed Department activity and specific as to location.

A. Voluntary permit to allow State to perform test. See Exhibit 08-EX-13 for underground tank testing and Exhibit 08-EX-14 to be modified as necessary for other testing.

B. Refusal of voluntary entry.

1. Contact Legal Division for court order to enter property. This entry must be for specific testing and must identify exact locations for borings, etc.

2. Any additional testing may necessitate further court orders which must also be obtained by the Legal Division and must be specific and exact.

C. Payment for Permit to Enter

Payment for a Permit to Enter is appropriate under the law. The amount to be paid will be determined in the same manner as if a nominal appraisal had been made and will be based on Section 8.01.26.00 for property rights valued at $2,500 or less. Documentation for the "Nominal" valuation will be in accordance with Section 7.02.13.01. In the event consideration is likely to exceed $2,500, a memorandum or concise narrative appraisal or "Waiver Valuation" will be necessary in accordance with the requirements set forth in Section 7.02.13.02.

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.01.03 Certificate of Sufficiency and Hazardous Materials Disclosure Document

RW Engineering initiates the unsigned Certificate of Sufficiency upon submitting appraisal maps to Right of Way (see RW Engineering Section 6.04.04.00). Preliminary appraisal work may begin at this time, but appraisal reports cannot be approved until the Certificate of Sufficiency is completed and signed (see Appraisals Chapter 7.04.12.01 Hazardous Waste General).

The Senior Design and Project Engineer approves and issues the Certificate of Sufficiency to Right of Way using the standard format (Exhibit 06-EX-06) with an approved Hazardous Materials Disclosure Document – Acquisition (HMDD-A) attached. Certificate of Sufficiency will include the parcel numbers of all properties contained in the appraisal report and the HMDD-A (Form ENV-0001-A) (internal Caltrans link)will identify any Hazardous Material consideration pertaining to those parcels.

A. A new HMDD-A will be required whenever the area of right of way requirements is increased.

B. Changes to right of way requirements will require a new Certificate of Sufficiency to be approved.

8.16.01.04 Contaminated Properties

Properties known or suspected to contain HW should be cleaned up by the grantor, to the satisfaction of Project Development, prior to the close of escrow. When this is not feasible or practical, the appropriate clause(s) listed below, depending on the situation, will then be included in the contract. New or special clauses drafted in the District or by an owner don't need approval of HQ RW and Legal prior to being incorporated into a settlement contract.

Underground tank removals must be given a high priority and completed well ahead of construction.

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.02.00 Tested – No Contamination Found

When Project Development has advised Right of Way to proceed with acquisition, because the property has been examined and/or tested and no contamination has been found, the following clause will be included in the contract:

"The acquisition price of the property being acquired in this transaction reflects the fair market value of the property without the presence of contamination. If the property being acquired is found to be contaminated by the presence of HW which required mitigation under Federal or state law, the State may elect to recover its cleanup costs from those who caused or contributed to the contamination."

8.16.03.00 Tested – Contamination Found

When contamination has been found, the amount of cleanup costs for which the grantor is liable, shall be deducted from the settlement, and one of the following clauses will be included in the Contract:

(Preferred)

"It is understood that the property being acquired has been used for _____ and that there is contamination of the soil and/or groundwater. Therefore funds in the amount of $_____ have been withheld from the Grantor by the State to be used for cleanup costs. If actual cleanup costs exceed the deducted amount, the Grantor will reimburse State for the additional costs. If actual cleanup costs are less than the amount withheld from grantor, the excess withheld will be refunded to Grantor."

(Alternate)

"It is understood that the property being acquired has been used for _____ and that there is contamination of the soil and/or groundwater. The acquisition costs of $_____ reflect a deducted amount of $_____ to be used for the anticipated costs of cleanup of such contamination."

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.04.00 Not Tested – Present Owner's Hazardous Material Use

When Project Development has advised Right of Way to proceed with the acquisition and when the nature of the grantor's current or past operations and hazardous material use is known to all of the parties, the following clauses will be included in the Contract:

"The acquisition price of the property being acquired in this transaction reflects the fair market value of the property without the presence of contamination. If the property being acquired is found to be contaminated by the presence of HW which requires mitigation under Federal or State law, the State may elect to recover its cleanup costs from those who caused or contributed to the contamination.

It is understood that the property being acquired has been used for _____, and that there is a possibility of _____ contamination of the soil. The seller of this property, _____ warrants that it will be responsible for the costs of any mitigation required by any regulatory agency as the consequence of _____ contamination of the soil and/or groundwater.*

Seller hereby agrees to indemnify and hold harmless the State from any and all past, present and future claims, liabilities, obligations, or causes of action from any person or source arising out of or connected with hazardous materials on the property or HW on, in, or under the property which is the subject of this agreement."

_____

*Tailor for the particular acquisition.

© 1994-2025 California Department of Transportation. All rights reserved.

8.16.05.00 Not Tested – Known Past Hazardous Material Use

When Project Development has advised Right of Way to proceed with the acquisition, and when the current use/operation has not been contaminated, and grantor says they have some knowledge that previous use/operations may have caused contamination, then the following clause will be included in the Contract:

> "It is understood that the property being acquired in this transaction may contain HW requiring mitigation under State or Federal law to protect the public health. The acquisition costs reflect the fair market value of the property without the presence of contamination. If site cleanup is required on the property, the State may elect to exercise its right to pursue the responsible parties to recover cleanup costs from those who caused or contributed to the HW contamination on, in or under the property."

8.16.06.00 Not Tested – Unknown Hazardous Material Use

When Project Development has advised Right of Way to proceed with the acquisition, and the possibility of HW is suspected, but the grantor(s) indicate no knowledge of present or past operations which could have resulted in contamination, the following clauses will be included in the Contract:

> "The seller hereby represents and warrants that during the period of Seller's ownership of the property, there have been no disposals, releases or threatened releases of hazardous substances or HWs on, from, or under the property. Seller further represents and warrants that Seller has no knowledge of any disposal, release, or threatened release of hazardous substances or HWs, on, from, or under the property which may have occurred prior to Seller taking title to the property.
>
> The acquisition price of the property being acquired in this transaction reflects the fair market value of the property without the presence of contamination. If the property being acquired is found to be contaminated by the presence of HW which requires mitigation under Federal or State law, the State may elect to recover its cleanup costs from those who caused or contributed to the contamination."

© 1994-2025 California Department of Transportation. All rights reserved.

8.17.00.00 – ACQUISITION OF MOBILE HOMES

8.17.01.00 General

Mobile homes which are non-DS&S and owner-occupied or cannot be moved from their present locations due to the manner in which they are affixed to the site may be purchased.

The District's Relocation Assistance Branch will be responsible at the appraisal stage for determining if a mobile home should be purchased.

The reasons underlying this decision will then be communicated to the Appraisal Branch in a memorandum request that the mobile home be appraised. This memorandum should be included in and become a part of the appraisal.

The acquisition of the mobile home will be handled by the District's Acquisition Section upon approval of the appraisal. A mobile home is personalty rather than realty and special procedures are required. The transfer of title is handled through the Department of Housing and Community Development (HCD). HCD's Registration & Titling Forms page contains forms for transfers, bills of sale, power of attorney, etc.

To convey title to a mobile home, the owner's signature must be obtained on the following:

- Right of Way Contract (original and one copy)
- Notice of Transfer (Form No. 9-S Bower)
- Bill of Sale
- Authorization for Payoff (if the mobile home is financed)
- A Power of Attorney form (from each owner)
- Certificate of Ownership (pink slip)
- Quitclaim Deed (if occupancy is by Lease)

The owner will have the Certificate of Ownership (pink slip) if the mobile home is free and clear. If the unit is subject to liens, owner will have the Green Trailer Registration Card. This will show both Legal and Registered Owner.

© 1994-2025 California Department of Transportation. All rights reserved.

The standard form Right of Way Contract (Form RW 08-03) (internal Caltrans link) will be used with appropriate clauses added. The following clauses have been prepared especially for use in acquiring mobile homes.

8.17.02.00 Payment

This clause will be used to provide for payment and identification of the mobile home being acquired. It will be included as Item (A) under Clause 2 of the Contract. Clause 2 will read:

> "The State Shall pay the undersigned seller(s) the sum of $_____ for the x _____19___ trailer, said vehicle manufactured by manufacturer's vehicle serial number _____, and bearing State of California vehicle license plate number _____ within 90 days after title to said vehicle vests in the purchaser (State) free and clear of all liens, encumbrances, taxes, assessments and leases."

8.17.03.00 Transfer Fees

This clause will be used to clarify the fees to be paid by the State. It will be included under Clause 2 as Item (B):

> "Pay all fees and charges required by the State Department of Housing and Community Development in connection with the transfer of title to the vehicle to the purchaser (State), except as provided in Clause 2(C) of this agreement."

8.17.04.00 Lien Clause

This clause will be used to provide the State with authority to deduct and pay liens, encumbrances, assessments, taxes, delinquent registration or license fees from the consideration being paid. It will be included under Clause 2 as Item (C):

> "Have the authority to deduct from the amount shown in Clause 2(A) above, any amount necessary to satisfy any liens, encumbrances, assessments, taxes, delinquent registration fees, delinquent license fees on the vehicle or other property described herein and to be acquired by purchaser (State in this transaction)."

© 1994-2025 California Department of Transportation. All rights reserved.

8.17.05.00 Certificate of Ownership

This clause will be used to clarify the fact that the Certificate of Ownership is being delivered at the time of execution of the Right of Way Contract and grants the State the right to act on behalf of the seller(s) in completing the transfer.

> "At the time of execution of this agreement, the seller(s) shall deliver to the purchaser (State) the Certificate of Ownership to the above-described vehicle. In the event said Certificate of Ownership and/or other documents required to effect transfer of title to said vehicle is not available, purchaser (State) may act as seller(s)' Attorney in Fact to secure said Certificate and/or other documents on seller(s)' behalf."

8.17.06.00 Clearance of Lienholder's Interest

The Acquisition Agent must obtain a release of lien and demand from the lienholders if any exist. The lienholders should be informed that they will not be paid until the close of escrow. The following clause will be used to clarify that the lien will be cleared and paid.

> "Any and all amounts payable under this agreement up to and including the total amount of unpaid principal, interest, and unpaid charges due the lienholders named in the Bill of Sale, shall, on demand, be made payable to the person or persons entitled thereto. The lienholders to furnish seller(s) with good and sufficient receipt showing said monies credited against said indebtedness."

8.17.07.00 Miscellaneous Personalty Clause

When there are items that could easily be removed or create possible misunderstandings as to acquisition, such as carpeting, air conditioning, television antenna, etc.; the following clause will be included in the Right of Way Contract:

> "It is understood and agreed by and between the parties hereto that payment in Clause 2(A) above includes, but is not limited to, payment for the following accessories and appurtenances attached to the vehicle being acquired in this transaction:
>
> (List items.)"

© 1994-2025 California Department of Transportation. All rights reserved.

8.17.08.00 Closing Procedures

A MOS will be prepared and submitted with the signed Contracts. Upon approval of the Contract, the District can process the transaction through the HCD. Prior to presenting the forms to HCD, a decision must be made as to whether the State will rerent the mobile home to other than the occupant at the time of purchase. If the intent is to rerent, the Use Tax must be paid at the time the documents are presented to HCD for registration. If the mobile home is not to be rerented, visit the California Department of Tax and Fee Administration for additional resources.

All of the forms signed by the owner with the exception of the Contract will be presented to the HCD for transfer of registration. In addition, the license plate of the mobile home will be delivered to HCD since an exempt plate will be issued upon the State becoming the registered owner. When the transfer is complete, payment to the owner and lienholders may be scheduled.

Since there will be no formal escrow, payment will be handled through an internal escrow as discussed in Section 8.05.05.00.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.00.00 – FEDERAL LANDS

8.18.01.00 General

With about 46 percent of land in California controlled by federal agencies, it is common for a project to require federal land. Caltrans may require temporary or permanent use of property that is owned by the United States and controlled by a federal agency. Rights of way, material sites, or other interests in these lands are secured under appropriate federal statutes.

Generally, Caltrans will use Title 23 authorities to acquire federal land for highway purposes. Title 23 US Code (USC) Section 317 authorizes the U.S. Secretary of Transportation (the Secretary) to transfer federal land or an interest in land to a State Transportation Agency, or its local agency nominee, for purposes of a conventional Federal-Aid highway. Title 23 USC Section 107(d) authorizes the Secretary to transfer federal land or an interest in land to a State Transportation Agency for Interstate System right of way. Prior to transfer, the Secretary is to seek concurrence from the granting federal agency (GFA).

Under these authorities, Caltrans can obtain a highway easement without compensation for the federal land conveyed, but the land reverts to the granting federal agency. In California, this authority is delegated from the Secretary to the Administrator of the California Division of the FHWA. Importantly, if Caltrans uses Title 23 authorities for the transfer, then Caltrans' NEPA assignment applies and Caltrans is the lead agency for completion of the NEPA document. If Caltrans acquires federal land directly from a GFA using non-Title 23 authorities, then usually the GFA is the lead agency for the NEPA document. Regardless of whether Title 23 or another Federal Code is the authority for the transfer, Caltrans may reimburse the GFA for its staff time and processing costs under a reimbursement agreement provided by the GFA's federal authorities. If used, generally these reimbursement agreements are initiated during the environmental phase of a project.

Further procedures are outlined in 23 CFR 710.601 Federal Land Transfers, as cited herein. 23 CFR 710.601(b) allows that federal land transfers may be made directly to a "non-Federal owner for use for highway purposes." Subsection 23 CFR 710.601(c) provides that an eligible party may apply directly to the FHWA or the GFA. FHWA prefers that Caltrans start negotiations with the GFA. FHWA should only be engaged when the GFA has been unresponsive or has taken an inordinately long time to decide on the transfer.

© 1994-2025 California Department of Transportation. All rights reserved.

Among the classifications of land involved are vacant or unpatented public lands, military reservations, national forest, Indian lands, power site and reclamation reservations, and surplus U.S. lands disposed of through the General Services Administration (GSA). Functional replacement of real property in federal ownership is discussed below in Section 8.18.04.01.

The federal statutes under which we acquire rights or interests in lands in federal ownership provide that the Secretary of the granting federal agency supervising the administration of such lands may agree to the appropriation under conditions deemed necessary for the adequate protection and utilization of the reserve.

8.18.02.00 Region/District FLT Coordinator

Each Region/District must appoint a Federal Land Transfer Coordinator (FLT Coordinator) who is the single point of contact between the GFA and the Region/District. Regions may also designate a person in each district to deal directly with the granting federal agency. The Regional FLT Coordinator will be responsible for assisting the district staff and coordinating final review and approval from the FHWA through Caltrans HQ. Interactions with FHWA should go through the right of way headquarters (HQ) federal land transfers liaison. The Region/District single point of contact should communicate with HQ and have HQ communicate with FHWA.

The Region/District FLT Coordinator, or a District FLT Contact, initiates negotiations with the local office of the GFA that has jurisdiction over the required parcel. The Region/District FLT Coordinator processes all requests to transfer permanent or temporary rights to Caltrans. The Region/District FLT Coordinator is responsible for the full review, final approval, and transmittal of all Federal Land Transfers to Caltrans HQ who will notify FHWA.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.03.00 Early Coordination

In the early planning stage, each affected governmental agency must be advised of Caltrans' proposed highway project so the impact of the transportation facility can be evaluated. RWLS will have notice of potential future Federal lands acquisitions from PID documents and project RW estimates. The Region/District FLT Coordinator, or a District FLT Contact, initiates discussion with the granting federal agency at the earliest possible stage in development of these projects. Typically, this will be early in the environmental phase of a project, and the contact will be coordinated with district environmental staff who are preparing the environmental document. For USFS properties, the contact person will be the District Forest Ranger. The contact person for BLM properties will be the Resource Area Field Manager. The Commanding Officer is the contact person for military reservations.

The Region/District FLT Coordinator should have field discussions with personnel of the local or district office of the granting federal agency. The Region/District FLT Coordinator or Contact should request the attendance of the following people:

- Caltrans – Project Manager, Project Engineer, and environmental staff
- Granting federal agency – Field or Area Manager, Lands Officer, and an environmental specialist

The field meeting should provide the federal agency with maps and other data as early as possible. This allows the granting federal agency adequate time to analyze the impact of the proposed transportation facility on the federal ownership. Involving the granting federal agency in the early stages of the project should help identify potential problems and possible solutions. Early coordination will also help identify some of the conditions and stipulations that will need to be addressed in the FLT package (8.18.19.02).

The Region/District FLT Coordinator or District FLT Contact and a District design engineer will determine the real property requirements and request maps of the proposed right of way needs. Where possible, construction details, access control and other pertinent data will be developed and, to whatever extent possible, resolved at the District and the local office of the granting federal agency. The Region/District FLT Coordinator or District FLT Contact should identify granting federal agency's resources such as timber and materials that may affect the RW certification.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.04.00 Compensation for Federal Land Transfers

Transfers of U.S. lands to Caltrans for highway purposes under Title 23 authorities are generally made without the payment of compensation for the real estate (the GFA may still request reimbursement for staff time and expense through a separate agreement with Caltrans – these are usually executed during the planning phase). However, a few federal or quasi-federal agencies may require compensation because they are intended to be self-supporting or have a fiduciary responsibility to bondholders or other creditors. In these cases where federal land is acquired under the GFA's own authorities (that is, non-Title 23 statutes or regulations), usually fair market value compensation is paid according to Federal law.

8.18.04.01 Functional Replacement of Federal Facilities

The granting federal agency is entitled to compensation for those appurtenances to its facilities that will be removed or destroyed in connection with the highway project. Thus, a granting federal agency could require Caltrans provide substitute land and pay to construct comparable facilities. This is further addressed in 23 CFR 710.509 "Functional replacement of real property in public ownership" and 23 CFR 601(f) which covers FHWA participation in functional replacements.

Under 23 CFR 710.509:

§ 710.509 Functional replacement of real property in public ownership.

(a) General. When publicly owned real property, including land and/or facilities, is to be acquired for a Federal-aid highway project receiving grant funds under title 23, in lieu of paying the fair market value for the real property, the acquiring agency may provide compensation by functionally replacing the publicly owned real property with another facility that will provide equivalent utility.
(b) Federal participation. Federal-aid funds may participate in functional replacement costs only if the following conditions are met:

(1) Functional replacement is permitted under State law and the acquiring agency elects to provide it;
(2) The property in question is in public ownership and use;
(3) The replacement facility will be in public ownership and will continue the public use function of the acquired facility;

© 1994-2025 California Department of Transportation. All rights reserved.

(4) The acquiring agency has informed, in writing, the public entity owning the property of its right to an estimate of just compensation based on an appraisal of fair market value and of the option to choose either just compensation or functional replacement;

(5) The FHWA concurs in the acquiring agency determination that functional replacement is in the public interest; and

(6) The real property is not owned by a utility or railroad.

(c) Federal land transfers. Use of this section for functional replacement of real property in Federal ownership shall be in accordance with Federal land transfer provisions in subpart F of this part.

(d) Limits upon participation. Federal-aid participation in the costs of functional replacement is limited to costs that are actually incurred in the replacement of the acquired land and/or facility and are: -

(1) Costs for facilities that do not represent increases in capacity or betterments, except for those necessary to replace utilities, to meet legal, regulatory, or similar requirements, or to meet reasonable prevailing standards; and

(2) Costs for land to provide a site for the replacement facility.

Under 23 CFR 601(f), FHWA participation in functional replacements of public land:

The FHWA may participate in the payment of fair market value or the functional replacement of impacted facilities under 710.509 and the reimbursement of the ordinary and reasonable direct costs of the Federal land management agency for the transfer when reimbursement is required by the Federal land management agency's governing laws as a condition of the transfer.

Refer also to Section 7.13.70.00.

8.18.05.00 Types of Rights of Interest from Federal Agencies

Caltrans may request the transfer of real property from a federal agency for permanent use as part of a highway project or a maintenance facility, or for a temporary use for construction purposes. Additional temporary uses might be for a disposal site, material site, or maintenance need.

The transfer may take the form of an easement, a use permit, a grant or patent. Types of federal land transfers are: Department of Transportation Easement – DOT Easement (New Construction or Perfection of Title), Right of Way Grant, Special Use Permit (SUP) or Free Use Permits (BLM), R.S. 2477 Rights of Way, and in rare cases, a federal land patent.

© 1994-2025 California Department of Transportation. All rights reserved.

Transfers can be obtained from any federal agency, but due to their relatively large holdings in California, most sites required for highway purposes are requested from the Department of Agriculture's (USDA) United States Forest Service (USFS), Department of Interior's (DOI) Bureau of Land Management (BLM), or the United States Military Departments (Department of the Army, Department of the Navy, Department of the Air Force).

8.18.05.01 Direct Letter of Consent Procedure

For a Federal land transfer, a key step in the acquisition process is the request for a letter of consent from the GFA. As of June 28, 2017, the California Division of the FHWA provided special authority to Caltrans to request the Letter of Consent directly from the GFA. This is shown as Exhibit 08-EX-56 Direct Letter of Consent Correspondence Authority – Federal Land Transfer.

The FLT Coordinator requests the Letter of Consent by letter using Exhibit 08-EX-55 Request for Letter of Consent – Federal Land Transfer (internal Caltrans link).

The granting federal agency issues a Letter of Consent authorizing the appropriation of public land for highway purposes. Conditions and stipulations can vary for unique properties or sensitive areas. The Project Manager must approve the conditions and stipulations in the Letter of Consent before RW Engineering prepares the DOT Easement. The DOT Easement contains certain clauses required by the FHWA, (49 CFR 21.7[a][2]) relating to nondiscrimination, and includes all conditions and stipulations provided in the Letter of Consent. Caltrans can certify the project as soon as the Letter of Consent is obtained from the GFA as it functions like a right of entry.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.06.00 Department of Transportation Easement (DOT Easement)

This is an easement over United States public land for the construction, operation and maintenance of a highway, and the use of the space above and below the established grade line of the highway pavement for highway purposes on, over, across, in and upon the required parcel of land.

A document known as a Department of Transportation Easement (DOT Easement) is prepared after the granting federal agency issues a Letter of Consent that appropriates a certain parcel of land for highway purposes. Caltrans requires a federal land transfer on all federal-aid projects on federal lands. The FHWA grants a DOT Easement on behalf of the United States, following the concurrence of the granting federal agency having control over the lands.

Sometimes there is a need to amend an existing DOT Easement, such as when the project area adjacent to the existing easement area needs to be incorporated into the project. Amending existing DOT easements is allowable using the same federal land transfer process. Example: Caltrans acquired a DOT Easement from the USFS ten years ago for a two-lane highway, and now the proposed four-lane project requires the acquisition of more land. Since Caltrans is proposing to change the highway's "footprint," a new DOT easement will be added to the existing DOT easement.

Conditions and Stipulations: The DOT Easement will include the required conditions and stipulations established by the granting federal agency. Caltrans entered into a Memorandum of Understanding with the USFS, which lists general stipulations. These additional requirements to be included in the DOT Easement will be listed in the Letter of Consent and must be approved by the FHWA.

8.18.07.00 Perfection of Title

Caltrans, the FHWA, and USFS have agreed to perfect the title on all existing rights of way. The Perfection of Title process was designed so that Caltrans can convert USFS R.S. 2477 Rights of Way to recorded DOT Easements. The Perfection of Title process will eliminate most USFS R.S. 2477 Rights of Way. The Perfection of Title process has not been approved for use on properties controlled by BLM. See 8.18.20.00 for the Perfection of Title process.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.08.00 "Rights of Way" Under R.S. 2477

When the State of California constructed a highway in the 1930's over public lands, titles were not recorded. "Rights of Way" were usually obtained for a small state-funded project over R.S. 2477 lands (Congressional grants to the states to build access roads across the federal ownership). The Region/District FLT Coordinator submitted an "Application for Transportation and Utility Systems and Facilities on Federal Land" to the granting federal agency to start the acquisition process.

The Congressional Grant of Right of Way (Revised Statutes, Section 2477, Title 43, Chapter 22, Section 932, U.S. Code Annotated) was repealed October 21, 1976. Roads which were constructed under authority of R.S. 2477 for which a grant of right of way was not secured should be applied for under the Federal Land Policy and Management Act of 1976 (Title V).

8.18.09.00 Right of Way Grant

A Right of Way Grant is usually obtained for small state-funded projects over federal lands with no recorded title. To start the acquisition process, the FLT Coordinator will provide the granting federal agency with the Standard Form 299. The process will not require Caltrans to survey the construction area, but a detailed map will be required. The granting federal agency will obtain all environmental documents. Caltrans will obtain a Right of Way Grant and a Decision document from the granting federal agency. The Right of Way Grant document should be recorded. The Right of Way Grant should be applied for under the Federal Land Policy and Management Act of 1976.

8.18.10.00 Use Permit (Special Use Permit or Use Permit)

Sometimes, Caltrans only needs to obtain from the granting federal agency a temporary right to use their real property; e.g., environmental field work, material and disposal sites, or space for the disposal of construction materials, restoration work on a slide, or a seasonal location to conduct tests. For these types of uses that are not in the operating right of way, the granting federal agency will generally issue a permit. For some agencies (including the USFS) this is a Special Use Permit and for other agencies this is a Use Permit. Caltrans will provide the granting federal agency an application to start the acquisition process. If the terms and conditions are acceptable, the District Director or a designated representative executes the permit on behalf of the State. The permit provides for the conditions under which Caltrans occupies or makes use of the property.

© 1994-2025 California Department of Transportation. All rights reserved.

Use Permits normally expire within ten years of the date the permit was issued. Renewals may require a new environmental document. The permit is not ordinarily recorded.

8.18.10.01 Use Permit Process

The process to obtain a Use Permit begins when the Region/District FLT Coordinator meets with the granting federal agency to discuss the project. After it is determined that the Use Permit is the appropriate document, the Region/District FLT Coordinator will:

- Coordinate with RW Engineering to obtain a legal description to accompany the Use Permit application. For material sites, the application must describe the area of the materials source and the haul road by metes and bounds.
- Attach a plat or map adequately showing the area to be acquired.
- Provide the estimated cost and time schedule for the construction project.
- Include a copy of the Environmental document, plus any further supporting documents such as Coastal Zone Management (CZM) consistency determinations, archeology reports, Corps of Engineers permits, etc.

8.18.10.02 Material Sites

For guidance regarding the sale of mineral materials on BLM lands for use in Federal-aid highway projects, refer to Exhibit 08-EX-57, Mineral Materials Sales for Use in Federal-Aid Highway Projects. Note that US DOI legal opinions prohibit the free use of mineral materials for use in Federal-aid highway projects.

For other Federal agencies, note that the materials located on federal land (such as stone and earth) belong to the granting federal agency. Caltrans should recognize that unless otherwise stated, no interest granted shall give Caltrans the right to use or remove any such material for construction or other purposes. However, stone or earth removed from within the right of way in the construction of a project may be used elsewhere within the right of way for that project. The FLT Coordinator must ensure that all conditions and stipulations of the Letter of Consent are in Caltrans' Construction Specials. Also, the FLT Coordinator must ensure that Caltrans' Construction Specials do not give excess materials to the contractor.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.11.00 Patents

If the U.S. land has been granted or patented to a private party but the United States retains some control of the property, such as mineral rights, Caltrans may get a government grant or a patent for its required use. These documents are rare, and the Region/District FLT Coordinator should contact their Legal Office immediately if the granting federal agency states that the transfer of the real property will be by way of a grant or patent.

A Patent is the closest document to a fee title that can be obtained from a granting federal agency. The time frame to obtain a patent is approximately two years. Caltrans should obtain a patent for maintenance stations on federal lands.

8.18.12.00 Federal Highway Administration (FHWA)

The FHWA is the appointed lead agency for all requests to cross federal property for a highway or a highway-related purpose. Though some federal agencies have their own statutory authority to transfer land to Caltrans without the involvement, and coordination with the FHWA, FHWA involvement is recommended.

The FHWA obtains approval from the granting federal agency, including the handling of any necessary arrangements for relocation or replacement of existing federal agency facilities such as USFS campgrounds. Caltrans is not responsible for this phase of right of way acquisition and no charge for expenditures incidental thereto should be made against right of way funds.

8.18.13.00 United States Forest Service (USFS)

The United States Forest Service (USFS) is an agency under the United States Department of Agriculture. Caltrans' need to traverse lands under jurisdiction of the USFS will be made under provisions of the Federal Highway Act of August 27, 1958 (23 USC Section 317). If the project is on the Interstate System, Section 107(d) will also be cited. Generally, Caltrans will follow the interagency agreement that the USFS and the FHWA executed in 2008 which authorizes the transfer of highway rights of way at no cost under Sections 107(d) and 317 of the Federal Highway Act.

© 1994-2025 California Department of Transportation. All rights reserved.

Right of way over National Forest Service Lands is covered by USFS approval of plans and specifications prepared by the FHWA. Caltrans is responsible for the acquisition or clearance of all private interests affected by the project, including mining claims and the relocation of existing utility installations. Caltrans also obtains material sites on privately owned lands when requested by the FHWA.

Section 104.4 of the Streets and Highways Code enables Caltrans to expend highway funds for the acquisition of privately-owned improvements placed on National Forest Service Lands under permit. Expenditures essential to the acquisition of such private interests constitute proper right of way charges.

8.18.14.00 Bureau of Land Management (BLM)

The Bureau of Land Management (BLM) is an agency under the US Department of Interior (DOI). Generally, Caltrans will follow the interagency agreement that the BLM and the FHWA executed in 1982 which authorizes the transfer of highway rights of way at no cost under Sections 107(d) and 317 of the Federal Highway Act. (According to recent legal opinions of the Solicitor's Office of the DOI, this agreement is still deemed to be in effect.) However, in certain situations Caltrans will utilize the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat 2766), Title 43 US Code Section 1737, which also authorizes the transfer of public lands for rights of way and other purposes. These situations include acquisitions which require a greater interest than a highway easement, or projects ineligible for Federal aid under Title 23. Under the FLPMA, Caltrans generally pays fair market value for the interests acquired.

Applications for material sites or uses other than rights of way shall be independent of applications for right of way. See Section 8.18.10.02 above.

8.18.15.00 Military Reservations

10 USC 2668 ("Easements for rights-of-way") gives military departments statutory authority for granting rights of way over lands under their jurisdiction. If Sections 317 and 107(d) of the Federal Highway Act are used to obtain the rights of way, the FHWA will be the lead agency. Applications for rights of way over military reservations should be initiated with the local commanding officer. Prior consultation with the FHWA is advisable since the FHWA may need to intervene if the military department does not readily grant approval.

© 1994-2025 California Department of Transportation. All rights reserved.

The military will only issue a limited DOT Easement with standard conditions and stipulations, though there may be a need to add or modify some of the conditions for a particular military base.

8.18.16.00 United States Fish and Wildlife Service (USFWS)

50 CFR Part 29 provides that where the land administered by the Secretary of the Interior through the USFWS is owned in fee by the United States, and the requested right of way is compatible with the objectives of the area, a permit or easement may be granted. Generally, the DOT Easement or Special Use Permit will be issued for a term of 50 years, or for as long as it is used for the purpose granted. The DOT Easement should recognize that unless otherwise stated, no interest granted shall give Caltrans the right to use or remove any material, earth, or stone for construction or other purposes. However, stone or earth removed from the right of way in the construction of a project may be used elsewhere along that right of way in the construction of the same project.

Caltrans may obtain the right to cross USFWS lands under the authority of the National Wildlife Refuge System Administration Act of 1966 as amended. Lands within the boundaries of a National Wildlife Refuge remain subject to the laws governing use and development of that refuge.

The USFWS will provide a DOT Easement or a Special Use Permit depending on Caltrans' need; however, the requests for transfer are made directly to the local/regional USFWS office and are time-consuming. Early coordination is necessary.

8.18.17.00 Other Federal Agencies

Bureau of Indian Affairs (BIA): Applications for right of way or interest in land on Indian Lands are submitted directly to the BIA per 25 CFR Parts 162 and 169. Transfer is effected by the BIA pursuant to its own authority. See 8.20.00.00.

Army Corps of Engineers: See 8.25.10.00.

United States Postal Service (USPS): Under the authority of 39 USC 411, reimbursement for property transferred to Caltrans for highway purposes is not compensable. Unusual issues related to the transfer of USPS lands should be referred immediately to the FHWA liaison.

© 1994-2025 California Department of Transportation. All rights reserved.

Federal Housing Projects: In the case of federal housing projects, negotiations should be carried on directly with the local housing authority. The housing authorities have power to grant easements rather than permits.

Veterans Administration (VA): 38 USC 8162 and 8164 authorizes the VA to grant to Caltrans easements in and rights of way over lands under their control with terms and conditions it deems necessary.

General Services Administration (GSA): Surplus U.S. Government property is disposed of through General Services Administration, an independent agency of the Government. That agency notifies the State's Director of the Department of General Services of the availability of such property. The Department of General Services notifies transportation and other State agencies that the property is available. Any expression (or disclaimer) of interest by the State must be received by the General Services Administration within prescribed time and statutory limitations. Following an expression of interest in acquiring the property, or a portion thereof, for any of the purposes enumerated under Section 104 of the Streets and Highways Code, the Region/District FLT Coordinator should initiate a request for the transfer of the property in accordance with standard federal land transfer procedures.

In addition, special conditions to a federal land transfer may be required by GSA (41 CFR 102-75, Utilization and Disposal of Real Property), or that the federal land transfer be processed through the FHWA. The FHWA as the lead agency would work with the granting federal agency to agree on certain transfer conditions such as reversionary clauses. See Table 8-18-A.

© 1994-2025 California Department of Transportation. All rights reserved.

Table 8-18-A
PROCEDURES FOR APPROVING A TRANSACTION
WITH THE FEDERAL AGENCY "GENERAL SERVICES ADMINISTRATION (GSA)"

Step 1: Obtain a title report for the real property in question.

- Determine who owns the property as evidenced by the title report. Example: Held on behalf of the "United States of America, under the Jurisdiction of Customs and Immigration."
  Note: Determining how the property is currently developed and being used may help determine who has jurisdiction of the property.
- Contact GSA to determine if GSA will handle the real estate transaction for the other federal agency, or if the federal agency can enter into transactions on their own behalf. Example: United States of America, under the Jurisdiction of Customs and Immigration, Acting by and through General Services Administration.
  Note: If the property is held on behalf of the "United States, under the Jurisdiction of General Services Administration," then GSA is acting on their own behalf.

Step 2: Determine how the real property will be used for the proposed project.

- If the property will NOT be incorporated into the federal aid system (e.g., made a part of the State Highway System, included in the right of way), then the FHWA is not involved in the review/approval of the transaction.
  Note: Federal agencies transferring property rights for a transportation project do so under 23 USC (and then the FHWA is involved). Authority under other codes (e.g., 10 USC) usually means the federal agency and/or GSA are the decision-makers.

Step 3: Determine what property rights are needed.

- Fee, lease, or easement (aerial, temporary) will determine the type of document (DOT Easement, Permit, etc.) needed, and the process to obtain the document.
- Property rights through federal land for a federal aid system are USUALLY a DOT Easement and follow the standard procedures outlined in this manual section.
  Example: A permanent road easement from GSA to allow commercial trucks to leave a Port of Entry area and enter a CHP facility is NOT a federal land transfer, and GSA determines the process required to obtain a DOT Easement for the State of California. The intent of the parties is outlined in a Cooperative Agreement, followed by a Joint Use Agreement, and then finally a DOT Easement.

© 1994-2025 California Department of Transportation. All rights reserved.

National Park Service (NPS): Applications for easements in lands of the NPS follow 36 CFR 212.8(d)(3) and 23 USC §317. The standard FLT process applies. Easements will be granted by the Chief, Forest Service, Department of Agriculture (Chief). The easements shall contain such provisions, terms, and conditions as the Chief may determine are necessary to retain and protect the interests needed by the United States.

Permits are subject to 36 CFR Part 14. They require a Standard Form 299, or the applicable common form approved by the General Services Administration at the time of the application, including all materials required in the SF-299 and this part, to the superintendent of the National Park System unit (System unit).

Federal Power Sites: Section 818 of the Federal Water Power Act (Title 16 USC Chapter 12, Sections 791a to 828c) provides that States may apply for highway rights-of-way across Federal power sites. Upon notice from the Secretary of Interior, the State shall have 90 days thereafter within which to file an application for reservation to the State or any political subdivision thereof, of any lands required as a right of way for a public highway or as a source of materials for the construction and maintenance of such highway.

8.18.18.00 Environmental Clearance

Requests for a federal land transfer may need an environmental document that assures compliance with the National Environmental Policy Act (NEPA) of 1969 (42 USC 4332, et seq.), the Historic Preservation Act (Section 1 of the National Historic Preservation Act, Pub. L. No. 89-665, as amended by Pub. L. No. 96-515), and Section 4(f) of the Department of Transportation Act of 1966, "Preservation of Parklands"(49 USC 303; see also 23 USC 138). Under the Caltrans' NEPA assignment from the FHWA, Caltrans is the lead agency and author of the NEPA document for Federal-aid highway projects. For further information on the NEPA assignment, refer to the Division of Environmental Analysis' Division of Environmental Analysis' internal (internal Caltrans link) and external web pages.

Some agencies treat agency-to-agency transfers as undertakings that are not subject to review under Section 106 Historic Properties (NEPA); however, this is not always a correct assumption. If the USFWS transfers land to the National Park Service (NPS), then arguably there is no potential for effect on historic properties and therefore not subject to review. If BLM transfers land to Caltrans for highway purposes, then there is a potential to affect historic properties and is subject to review. If the 106 process indicates that there is a

© 1994-2025 California Department of Transportation. All rights reserved.

problem with historic properties, then it may be inappropriate to regard the project as categorically excluded.

Each granting federal agency needs to evaluate the proposed project to determine the potential impacts to their resources. During this period, Caltrans' Division of Environmental Analysis will need to prepare its analysis of the impacts to the natural resources which includes biological, archaeological and paleontological salvage (34 Stat. 225), and Native American concerns. Coordination with the granting federal agency's resource management may help identify impacts of mutual concern.

For USFS federal land transfers, a copy of the approved project report and environmental document that addresses fish or wildlife (as discussed with the California Department of Fish and Wildlife) will be transmitted to the USFS along with the maps of the proposed DOT Easement. The local USFS office may prepare an Environmental Analysis Report (EAR) and submit a copy of the "4(f) statement."

The granting federal agency will not provide the Letter of Consent until their office is satisfied with the environmental document. The Region/District FLT Coordinator may need to act as liaison between Caltrans' environmental branch and the granting federal agency's environmental office.

A DOT Easement for Perfection of Title will only require a Categorical Exclusion environmental clearance since there is no disturbance of land and no resources will be affected.

The Environmental Document must be within 3 years old by the time it is sent to FHWA for approval. If it is older than 3 years, then the District Environmental team will need to certify by email or memo that the environmental document is still valid.

8.18.19.00 Federal Land Transfer Procedure to Obtain a DOT Easement

The procedures to obtain a federal land transfer are partly based on 23 CFR 710.601 as well as separate MOUs with some of the federal agencies.

The Region/District FLT Coordinator is a member of the Project Development Team and should be able to identify early on that the proposed project will require rights across U.S. land during the environmental phase. The Region/District FLT Coordinator will examine the construction details, access

© 1994-2025 California Department of Transportation. All rights reserved.

control and other pertinent data, and then determine the real property requirements and the type of federal land transfer required.

After determining the type of rights needed (permanent, temporary, materials only), the Region/District FLT Coordinator submits a request for a Letter of Consent for appropriation of real property via transmittal memo to the GFA with the Federal Land Transfer (FLT) Package (8.18.19.02). The request will contain a statement that the lands are necessary for the project, along with a copy of the environmental document and map application depicting the area to be acquired. The granting federal agency must approve Caltrans' construction plans before a Letter of Consent can be requested. The application requesting appropriation of real property shall be in accordance with 23 USC 317 or Section 107(d) for Interstate highways.

The granting federal agency often has their own extensive time requirements for approving and issuing the Letter of Consent with stipulations for DOT Easement preparation.

Under the law (23 USC Section 317[b]), if the GFA does not respond to the request for the Letter of Consent within four (4) months (or indicate they will not be able to meet the timeframe due to workload constraints, but do not have an issue with the Letter of Consent request), the real property may be considered appropriated by the FHWA and transferred to the State for right of way purposes. Under this scenario, the Region/District should notify Caltrans HQ of the GFA's non-responsiveness and Caltrans HQ will follow-up with FHWA to request the appropriation. FHWA will notify the GFA of the intention to transfer the land at the expiration of the 4-month period prior to initiating a transfer.

In practice, the FHWA will work with Caltrans to obtain the GFA's consent prior to any appropriation of Federal land. If the GFA responds back to Caltrans acknowledging the Letter of Consent request, but that it cannot complete its review in the near future and will plan to eventually, then the GFA should be given the opportunity to respond. Under this scenario, FHWA can facilitate coordination between the Region/District and the GFA to obtain consent, per Caltrans HQ request.

Note: Generally, the granting federal agency's executed Letter of Consent authorizes immediate entry under the terms contained in the letter. Much like a right of entry, the property is available to the State for certification and awarding for construction purposes. The District need not await preparation and recording of DOT Easement in order to certify the parcel is available. The Right of Way Certification can be executed based on the Letter of Consent.

© 1994-2025 California Department of Transportation. All rights reserved.

After the Project Manager approves the conditions and stipulations in the Letter of Consent, the Region/District FLT Coordinator requests RW Engineering prepare the DOT Easement. USFS may also require a statement about the disposition of any merchantable timber (8.18.19.06), the preparation and acceptance of a fire and clearing plan (8.18.19.05), and landscape and erosion control plans.

23 CFR 701.601 requires the acquiring entity to obtain legal sufficiency for the DOT Easement. This is Caltrans' attorney certifying that the DOT Easement meets the State requirements for form and procedure. The Region/District FLT Coordinator will ensure the DOT Easement has the following statement before submitting it to Caltrans' Legal Division for review and certification.

> *I, _____, Attorney at Law, State of California, Department of Transportation, and duly licensed to practice law in the State of California, hereby certify that this deed is legally sufficient for its stated purpose.*
>
> _____ _____
> *Signature* *Date*

8.18.19.01 Preparation of the DOT Easement

The DOT Easement is prepared by Caltrans' Right of Way Engineering staff and shall contain the clauses required by the FHWA and 49 CFR 21.7(a)(2) (requiring nondiscrimination and reversionary clauses), and the conditions and stipulations required by the granting federal agency. The DOT Easement must be prepared in a fashion that FHWA approves, or the FHWA will not execute it.

Right of Way will process the DOT Easement and deliver the Map Application to the proper county recorder for filing in the State Highway Book. The Region/District FLT Coordinator or the District FLT Contact will review the package and forward it to HQ RWLS. HQ RWLS Liaison will obtain the legal sufficiency signature from Caltrans Legal on the DOT Easement.

© 1994-2025 California Department of Transportation. All rights reserved.

After the attorney has returned the signed DOT Easement to the HQ RWLS Liaison, it is transmitted along with the map (if applicable), a copy of the environmental document, and the granting federal agency's Letter of Consent to the FHWA for review and execution. The FHWA returns the executed DOT Easement to the Region/District FLT Coordinator to obtain the Region/District RW Chief's notarized signature accepting the DOT Easement. The fully executed DOT Easement is then delivered to the proper county recorder for recordation. The RW Engineer will also ensure the DOT Easement is properly posted in the State Highway Book. The Region/District FLT Coordinator or the District FLT Contact sends a conformed copy of the DOT Easement to the granting federal agency with a transmittal letter and a copy of the transmittal letter to FHWA for their records. The District RW Engineer posts the recorded DOT Easement to the State Highway Record Maps. The original recorded DOT Easement is retained in the district project file.

8.18.19.02 Federal Land Transfer (FLT) Package

The Region/District FLT Coordinator or the District Contact is responsible for preparing the initial information and documentation that is contained in the FLT Package and forwards it to GFA.

The FLT Package that is transmitted with the request for a Letter of Consent includes:

1. Application Letter:
    - Purpose or reason for Transfer, description of the project, and location.
    - Interest to be acquired.
    - Granting federal agency's improvements on the site.
    - Description of the lands needed. (If a legal description is used, ensure it is marked as a draft.)
    - Total area to be transferred.
    - Federal Aid System reference/Federal-Aid project number.
    - Name and address of the granting federal agency having jurisdiction and the name of the local contact.
    - Necessary explanatory information.
    - Right of Way Certification Date
2. Map of the area to be transferred. (The map can be an appraisal map, base map, project map, or a map application.)
3. Environmental documents (NEPA and CEQA).

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.19.03 Map Applications

Map Applications show the required real property and are prepared by RW Engineering in accordance with 6.09.01.00. The map must state the federal law under which the request is being made (e.g., 23 USC 317 and 107[d] if interstate).

A licensed surveyor or the RW Engineer must sign the Map Application. If the Map Application is used instead of a legal description or a base map, it should be included in the FLT Package. The Map Application may be used with the DOT Easement instead of a written legal description. After Caltrans receives the GFA's Letter of Consent, the Map Application is filed in the State Highway Book.

Metes and bounds descriptions are not required; however, the maps must contain sufficient information to facilitate an accurate survey of the parcel on the ground. Since the maps are used in lieu of legal descriptions, they must be prepared in a manner that will provide for the transfer of title, which should include the following information:

- Location or index map showing the right of way plan for the related highway facility. This may be included on the detail sheet.
- Centerline and right of way limits.
- Found monuments are to be designated and should reflect pertinent data. The right of way must be tied to the existing land net.
- Legend for right of way requirements.
- Complete station reference for right of way angle points.
- Areas of exclusion (private lands, etc.) must show recording information when precise location of boundaries cannot be defined on the map.
- Note: USFS requires an explanation of justification for the real property be stated on the map.

The parcel requirements may be shown with stippling or highlighted; however, map information must remain legible. The workmanship must be of such quality that legible copies may be made from the tracing.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.19.04 Termination of a Federal Land Transfer

When the need for the real property or materials acquired by way of a federal land transfer no longer exists, Caltrans must give notice of that fact to the FHWA and to the granting federal agency. Such lands or materials revert to the control of the granting federal agency, or its assignee. The notice, in a form suitable for recording, shall state that the need for the lands or materials no longer exists for the purposes for which it was acquired (23 CFR 710.601[i]).

The federal land transfer will automatically terminate if Caltrans has not begun construction or use of the materials for highway purposes within 10 years of the date of the DOT Easement or permit (or less if agreed upon between the FHWA, the granting federal agency, and Caltrans).

The DOT Easement's stipulations and conditions refer to the reversion of control. The reversion must comply with 23 CFR 710.601(h), or the termination might not be accepted by the granting federal agency. Caltrans must restore the land to the condition that existed prior to the transfer. The granting federal agency must approve the restoration prior to the reversion of control.

Terminating a federal land transfer is initiated by sending a notice of the fact to the FHWA and the granting federal agency, which states that the need for the land no longer exists for the purposes for which it was acquired. The notice must include a Reversion Map. The appropriate CTC Resolution will be recorded in the appropriate county and the Vacation Map will be filed in the State Highway Book. The Reversion Map will then be sent to the granting federal agency.

The Region/District FLT Coordinator should meet with the granting federal agency, prior to construction, to obtain and agree upon the restoration plan. The Region/District FLT Coordinator must work with Project Development to ensure the restoration plan is included in the construction specials.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.19.05 USFS Fire Plan

The USFS may require a fire plan in the conditions and stipulations. The fire plan requires, as a general condition, that Caltrans and its highway contractor will comply with applicable forest fire rules and regulations of the State and the U. S. Forest Service. Specifically, the stipulation that a fire prevention and control plan, which has been prepared by the Forest Service and accepted by the District Director, will be in place prior to the start of construction. Caltrans shall cause its contractors to comply with all provisions of the fire plan. Requirements contained in fire plans prepared for the various national forests impose restrictive and costly conditions. Potential fire devastation justifies the utmost effort in prevention and control measures.

Conditions and requirements which would affect the contractor's operations and cost, such as those contained in both the letter approving appropriation and related fire plan, must be tied into contract specifications and brought to the attention of prospective bidders.

8.18.19.06 USFS Timber

The handling of timber on USFS acquisitions varies across the state depending on the District and National Forest. The most general case is given in the following paragraphs. Some Districts have agreements with a given National Forest to have the timber removed early and are licensed to be a party to the timber contract. Refer to your local Forest Supervisor's Office for applicable timber procedures for a given project.

The following is the typical stipulation used in Letter of Consents (LOCs) and Highway Easement Deeds (HED's) from the USFS concerning timber:

> *The Forest Service will retain the right to any merchantable timber and all other resource materials not specifically appropriated, within the boundaries of the appropriation. The Highway Agent will notify the Forest Service which timber or other resource materials within the appropriation are scheduled to be removed and the Forest Service will determine whether a timber sale or other authorization for removal is appropriate.*

© 1994-2025 California Department of Transportation. All rights reserved.

Often, the USFS will make arrangements for a contractor to remove the merchantable timber prior to the right of way certification. In that case, the Region/District FLT Coordinator will have to ensure that the PS&E include the requirement to remove timber that is in conflict with the project that the USFS either does not want or failed to remove. Caltrans is required to survey and mark the project area so the USFS can determine the timber that is impacted.

The preferred method is for USFS to obtain a timber cruise (i.e., estimate of the volume and value of the timber) and enter into a timber contract with a contractor. The USFS timber bid and removal process may require in the range of twelve months, but this work may be coordinated with the project's construction schedule. Caltrans should not be a party to the Timber contract unless it has the appropriate licenses. The USFS cost of the timber cruise may be a right of way expense or may be reimbursed through a separate agreement recovery agreement with Caltrans.

8.18.20.00 Perfection of Title Procedure

Each Region/District Deputy Director for Planning will develop a prioritized list of routes and provide it to their designated USFS representative. A copy of the list is also provided to the FHWA and to each Region/District FLT Coordinator. The Region/District FLT Coordinator will establish a team to verify in the field actual ground conditions that require deviations from the standard easement width designated for the route/corridor that will be identified in the legal description of the DOT Easement. The team should include:

- Caltrans: local Maintenance Superintendent and RW surveyor
- USFS: District Ranger and their engineering or survey representative

Caltrans' District RW Engineering Staff, in collaboration with Forest Service surveyors, will prepare the legal description for the DOT Easement. The description will reflect the fact that the highway exists in its present location. It must be sufficient to describe the right of way area required for the corridor and meet State of California and local county requirements for recordation. Intersecting Forest Service roads, trails, structures, and facilities are excluded. Waste and borrow sites permitted by Special Use Authorizations are also excluded.

The description will be in a format appropriate to the existing conditions as agreed upon by Caltrans' District RW Engineering Staff and the USFS surveyors.

© 1994-2025 California Department of Transportation. All rights reserved.

A copy of the description will be provided to the Forest Service for inclusion in its Letter of Consent. The parties will ensure that the legal descriptions in the Letter of Consent and the DOT Easement are a complete match and error free. Subsequently discovered minor errors, e.g., typographical errors or a reversed bearing, will not be cause for nullification of the DOT Easement.

The description may be incorporated into a National Integrated land system, which is a joint project partnership between the USFS and the BLM allowing land parcel information to be placed in a Geographic Information System (GIS) environment and into Caltrans' Digital Highway Inventory Photography Program (DHIPP).

The Region/District FLT Coordinator will notify the Regional Forester of Caltrans' request. A Letter of Consent, authorizing the appropriation of National Forest Service Land, will be prepared by the Forest Service Regional Office. The document will be signed by the Regional Forester or his/her designated representative and sent to the District. Under this expedited process, the Forest Service shall provide the Letter of Consent to Caltrans within 30 days of the request date.

Caltrans will prepare the DOT Easement, using the narrative legal description format, and forward it to FHWA for review. In accordance with 23 CFR 701.601(g), Caltrans' attorney must review the DOT Easement and sign the statement certifying it meets State requirements for form (18.18.19.00). All Caltrans actions shall be completed within 30 days of receipt of the Letter of Consent.

The FHWA Division Administrator shall forward the DOT Easement to the FHWA Western Legal Services Office for review. Upon determination of legal sufficiency, the FHWA Division Administrator shall execute the DOT Easement. All FHWA activities will be completed within 30 days of receipt of the DOT Easement.

The DOT Easement will then be forwarded to the Region/District FLT Coordinator for recording in the appropriate county of record. Conformed copies of the recorded DOT Easement will be provided to the FHWA and the Regional USFS for its right of way records.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.21.00 Notice of Right of Way Commitments on Forest Highway Projects

The Region/District must inform the FHWA of right of way commitments made on Forest Highway Projects. The Region/District Acquisition Senior must provide the following to the Region/District FLT Coordinator and the HQ RWLS Acquisition Senior:

A. One copy of the conditions included in any Right of Way Contract on a Forest Highway Project that lists the construction items to be performed in the fulfillment of a right of way obligation, and

B. A statement setting forth a full explanation as to interpretation of the clause itself, and

C. If the right of way has been acquired by condemnation and the judgment recites that certain construction must be performed, a memorandum setting forth the exact language contained in the judgment and a further explanation as to the actual work that must be performed.

© 1994-2025 California Department of Transportation. All rights reserved.

8.18.22.00 Proof of Construction (BLM Only)

When construction is complete on highway facilities constructed across lands secured from the BLM, a certification of "Proof of Construction" is required. The District Construction Office should notify Region/District FLT Coordinator that the project is completed and ready for review. Region/District FLT Coordinator will confirm that the rights granted were utilized and construction was completed in accordance with the Letter of Consent granting the right of way. Both certifications will be prepared in triplicate and submitted by the Region/District FLT Coordinator to the appropriate BLM office.

8.18.23.00 Typical Steps in the Federal Land Transfer Process

District FLT Contact (DFC) and Region/District FLT Coordinator (R/D FLTC) Responsibilities:

K Phase

Project Initiation Document

M000 – M010, Tasks: 150.xx

- Members of the Project Delivery Team identify involvement of Federal Lands using preliminary layouts and related project data.
- Probable Granting Federal Agencies, Federal regions, and Federal districts identified.
- Preliminary RW estimate notes probable Federal involvement.

---

0 Phase

Preliminary Approval & Environmental Document

M015 – M200, Tasks: 160 – 180

- INITIAL DISCUSSIONS WITH LOCAL GRANTING FEDERAL AGENCY (GFA):
- R/D FLTC or DFC and local GFA review maps, impacted resources, and temporary and/or permanent property rights needed.
- R/D FLTC or DFC participates in discussions with GFAs as to lead time, alternatives, impacts, and processing of right of way requirements on Federal land.
- R/D FLTC or DFC participates in the preparation of updated RW estimates.

© 1994-2025 California Department of Transportation. All rights reserved.

Typical Steps in the Federal Land Transfer Process (Continued)

1 Phase
Ready to List
2 Phase through RW Certification
M200 – M410, Tasks: 185 – 225

- Design Engineer determines final RW requirements.
- District RW Engineering prepares location and parcel maps with draft FLT Deed and/or legal description.
- R/D FLTC or DFC and local GFA review final parcel maps, etc., as needed.
- R/D FLTC or DFC and PDT reach resolution of all issues with GFA.
- OBTAIN LETTER OF CONSENT:
- R/D FLTC or DFC prepares FLT Package requesting Letter of Consent (LOC) directly from the GFA.
- FLTC emails FLT package to GFA with signed cover letter, copies to Local GFA, HQ FLTC.
- GFA issues LOC with stipulations and sends to R/D FLTC or DFC.
- LOC functions like a Right of Entry – typical stipulations allow possession of, and construction on, the Federal parcel acquired.
- R/D FLTC or DFC issues Design Letter notifying PDT of limitations on use or possession of the Federal parcel(s) imposed by the stipulations in the LOC(s).
- FLTC/DFC confirm that stipulations limiting use or possession of the Federal parcels are included in the Special Provisions. This is done at constructability reviews of the plans and specifications.
- FLTC reports status of acquisition of Federal parcels for preparation of RW Certification.

© 1994-2025 California Department of Transportation. All rights reserved.

Typical Steps in the Federal Land Transfer Process (Continued)

2 Phase
Post Certification RW Tasks
3 Phase
Construction Contract Acceptance
M410 + M600 CCA, Tasks: 245 – 300

- PROCESSING AND RECORDING A DOT EASEMENT DEED:
- Project Construction Complete. M600 Construction Contract Acceptance.
- R/D FLTC requests RW Engineering prepare final DOT Easement Deed with stipulations identified in the LOC.
- RW Engineer submits DOT Easement with stipulations to FLTC.
- R/D FLTC sends DOT Easement package to HQ RWLS Liaison for HQ Legal sufficiency review & signature.
- After HQ Legal approves sufficiency of DOT Easement Deed, HQ RWLS forwards to FHWA RW.
- FHWA RW reviews and forwards to FHWA field counsel for legal sufficiency review.
- FHWA field counsel signs and sends to Cal. Division Administrator for execution. FHWA returns to District.
- R/D FLTC or DFC requests Region/District RW Chief sign DOT Easement to accept property.
- R/D FLTC or DFC Records the DOT Easement & copy to District RW Engineer.

- DISTRIBUTION OF COPIES OF RECORDED DOT EASEMENT:
- District RW Engineer posts DOT Easement to the State Highway Record Maps.
- DFC sends conformed copy of DOT Easement to R/D FLTC and retains original in District file.
- R/D FLTC sends GFA conformed copy of DOT Easement, with copy to FHWA.

FLT Process Complete

© 1994-2025 California Department of Transportation. All rights reserved.

8.19.00.00 – MINING CLAIMS

8.19.01.00 Unpatented Mining Claims – General

An unpatented mining claim establishes an interest in land which will continue in existence until eliminated, whether by an appropriate conveying document, or by legal processes before a court of competent jurisdiction.

The claim creates a right good against all, including the owner of the underlying fee, usually the U.S. Government.

Certain land is withdrawn from mining operations and, a claim filed upon land withdrawn from entry may be found to be void. If valid "discovery" of valuable minerals is not established, the claim may be voidable. Only the Federal Government is allowed to void a claim for lack of discovery and, when this procedure is involved, it is expensive and time consuming.

A claim is neither void nor voidable solely because of the appearance of the claim. The claimant's interest is not to be disregarded on the contention that it has no pecuniary or market value.

8.19.01.01 Acquisition

Rights of way over unpatented mining claims shall be acquired by Right of Way Contract and Quitclaim Deed. It must be established that the person to be paid is the claimant. Every reasonable effort shall be made to obtain quitclaim deeds to the right of way from persons holding mining claims on public lands even though the claim may appear to be abandoned.

If, after due and diligent search, the District is convinced that a mining claim is actually abandoned and the owner cannot be located, a statement of the facts is to be submitted to the Division in support of the recommendation that title be taken subject to this outstanding interest.

If clearance of the claim cannot be accomplished by Contract and Quitclaim Deed, then condemnation shall be instituted.

© 1994-2025 California Department of Transportation. All rights reserved.

8.19.02.00 Mining Claims – How Established

Refer to Circular No. 2289 "Regulations Pertaining to Mining Claims Under the General Mining Laws of 1872." (Reprint of regulations is current as of July 15, 1971, as contained in 43 CFR.) Special reference is made to the following:

- Mining Claims – Recordation, Filing of Assessment Work and Notice of Intent to Hold Mining Claims – Published in Federal Register January 27, 1977.
- Location of Mining Claims Part 3830 – Published in Federal Register September 10, 1973.
- Mining Claim Occupancy Act Part 2550 – Published in Federal Register July 15, 1976.
- Public Law 94-579 – October 21, 1976, cited as the "Federal Land Policy and Management Act of 1976."

All of these publications are available at local BLM offices. The acquisition agent is advised to consult with local BLM personnel for advice in the clearing of mining claims.

8.19.03.00 Loss of Locator's Rights

Mining claims are sold and otherwise disposed of in the same manner as other real property. However, the owner of the mining claim, until patent has been issued, has only a possessory right, which may terminate through failure to do the required annual assessment work or for other reasons. 43 CFR 3836 provides for suspension of relocation rights of any locator who fails to perform the required annual assessment work.

© 1994-2025 California Department of Transportation. All rights reserved.

8.20.00.00 – INDIAN LANDS

8.20.01.00 General

The Bureau of Indian Affairs approves transactions involving Indian lands. Indian lands are held in trust by the federal government as either "Tribal Lands" or "Allotted Lands."

8.20.01.01 Tribal Indian Lands

"Tribal Lands" are lands within the boundaries of an Indian reservation that are held in trust by the federal government for the Indian tribe as a community (25 CFR 169.1[d]). **HISTORICALLY, UNALLOTTED TRIBAL LANDS HELD IN TRUST BY THE UNITED STATES MAY NOT BE CONDEMNED BY A STATE. LEGAL SHOULD BE CONSULTED IF DISTRICTS ARE CONSIDERING THIS COURSE.** Tribal land can be acquired with the authorization of the Secretary of Interior and consent of the proper tribe officials. Early involvement of the Bureau of Indian Affairs is essential.

8.20.01.02 Allotted Indian Lands

"Allotted Lands" are lands within a reservation which are apportioned and distributed in severalty to tribe members. Title to allotted lands is held in trust by the federal government for individual Indians (25 CFR 169.1[b]). Allotted lands may be condemned for any public purpose under the laws of the State or Territory where located (25 USC 357). Rights of way through allotted Indian land may be secured by map application. The Bureau of Indian Affairs should be consulted for the appropriate procedure. Prior contact with the Bureau is necessary before contact with individual Indians.

8.20.02.00 Preparation of Maps

The District prepares a tracing to show the width and length of the right of way required through or within the reservation or allotted lands. It also shows ties by bearings and distance to the nearest easily identified corner of an accepted public land survey from the initial and terminal points of the part of the road that is within the Indian lands. More resources to create the tracing can be found in the Right of Way Engineering Chapter under 6.13.02.07.

© 1994-2025 California Department of Transportation. All rights reserved.

8.20.03.00 Processing of Application

When the Affidavit and Certificate are signed, the tracing and three prints are to be attached to an Application addressed to the Bureau of Indian Affairs, California Indian Agency.

The Application and maps, together with one set of layout plans should be delivered to the Agency Superintendent of the Reservation through which the highway passes. A letter to the Agency Superintendent stating the type of fences, road approaches and other construction details should be included.

The Application should follow Form RW 08-06 (internal Caltrans link), which will be prepared on regular letterhead and is used only for Indian lands.

Under Title 25, provision is made for the possible waiver of any of the stipulations in the form. Before submission of the Letter of Application for public highway to the Bureau of Indian Affairs, the District Office of Right of Way should confer with District Project Development to determine if any of the stipulations should not be included in the letter. It is also advisable for the District Office of Right of Way to discuss the Letter of Application and any omitted stipulations with the local office of the Bureau of Indian Affairs prior to its actual transmittal.

8.20.04.00 Payment of Assessed Damages

When the application is received by the Indian Agency, they will hold it until the amount of assessed damage is agreed upon.

Residents or allottees having an interest in the property are normally contacted by the Bureau of Indian Affairs for approval of the payment for the right of way.

The Indian Agency will advise the District by letter as to the total amount of the assessed damages and the terms and conditions under which the right of way will be granted. They will call for deposit of the assessed damages before the application is processed further. However, in order for accounting to issue payment, a right of entry, permit to enter, or other interim permit must be signed by all parties and provided to accounting for payment in the payment package.

© 1994-2025 California Department of Transportation. All rights reserved.

A check is then issued and delivered to the Indian Agency. A receipt is to be obtained when requested by Accounting. The receipt is forwarded to Accounting. The payee in such cases can be to the "U. S. Department of the Interior, Bureau of Indian Affairs."

Per 25 CFR 169.113, payment may also be paid directly to the Indian landowners if:

(1) The Indian landowners' trust accounts are encumbered accounts;

(2) There are 10 or fewer beneficial owners; and

(3) One hundred percent of the beneficial owners (including those on whose behalf we have consented) agree to receive payment directly from the grantee at the start of the right-of-way.

(c) If the right-of-way document provides that the grantee will directly pay the Indian landowners, then:

(1) The right-of-way document must include provisions for proof of payment upon our request.

8.20.05.00 Width of Right of Way Through Indian Lands

Right of way through Indian lands should have a width equal to that on the highway immediately adjacent thereto. Wherever possible, and particularly on roads within or adjacent to forests, parks, or recreational areas, the width should include additional setbacks as is now contemplated and provided for by the regulations of the United States Forest Service.

8.20.06.00 Right of Entry, Permit to Enter, or Interim Temporary Permit

In order for accounting to issue payment, a right of entry, permit to enter, or other interim permit must be signed by all parties and provided to accounting for payment in the payment package.

8.20.07.00 Approval of Maps by Bureau of Indian Affairs

When the assessed damages have been deposited and the terms and conditions of the grant are accepted by the State, the Letter of Application and maps are forwarded by the Agency Superintendent to the Bureau of Indian Affairs, California Indian Agency. When approved, a Grant of Easement will be forwarded to the District by the Bureau.

© 1994-2025 California Department of Transportation. All rights reserved.

8.20.08.00 Certificate of Completion

When construction of the related highway facility is completed, the District Construction Department should notify Right of Way by submitting a Certificate of Completion signed by the District Construction Engineer. (See Form RW 08-07 [internal Caltrans link].) It will be submitted to HQ RW along with Form RW 08-08 (internal Caltrans link), signed by the District Director. HQ RW will forward both forms to the Bureau of Indian Affairs.

© 1994-2025 California Department of Transportation. All rights reserved.

8.21.00.00 – PUBLIC LANDS – STATE

8.21.01.00 General

Rights of way and material sites on Sovereign lands of the State are authorized under Section 101.5 of the Streets and Highways Code. Rights of way over vacant School lands are authorized under Section 6210.3 of Public Resources Code.

8.21.02.00 Sovereign State Lands – General

Section 101.5 of the Streets and Highways Code authorizes the Department to acquire sovereign lands of the State that are needed for right of way or materials. Refer to that section for the details.

8.21.02.01 Preparation of Maps

The District shall prepare tracings in triplicate in standard layout size showing the area involved and clearly delineating the proposed right of way or material site. See the sample tracing in the RW Engineering Chapter.

The tracings shall be prepared for the approval and signature of the District Director or the person authorized to sign such maps on the District Director's behalf.

Access control on rights of way over State lands shall be handled generally in the same manner as that affecting other public or private lands.

8.21.02.02 Procedure by the State Lands Division

The tracings are transmitted to the State Lands Commission with a letter of explanation and a copy of the Environmental Report.

A minimum of 120 days is normally required by the Commission in the processing of an application and approval.

Upon approval, two of the tracings are returned with an executed permit granting the right of way.

© 1994-2025 California Department of Transportation. All rights reserved.

8.21.02.03 District Closing Procedures

The District shall file the tracing in State Highway Map Book in the Office of the County Recorder of the county in which the land is situated as authorized by Section 128 of the Streets and Highways Code.

The reasonable value of the rights secured shall be scheduled for deposit into the State Parks and Recreation Fund.

A Memorandum of Settlement (MOS) will be prepared and transmitted to HQ RW.

8.21.03.00 State School Lands – General

The State Lands Commission has the authority to grant easements and rights of way to the Department of Transportation to, or over, vacant school lands of the State (surveyed Sections 16 and 36 or designated in lieu lands). This is per Section 6210.3 of the Public Resources Code.

8.21.03.01 Acquisition of Rights of Way

This authority shall be used for securing rights of way over vacant school lands of the State. Rights of way secured under this authority are conveyed by a patent and the market value of such right of way must be paid into the State School Lands Fund.

8.21.03.02 Application Procedure

The District's submission of applications for rights of way over these lands shall include a map and a typed legal description. A sample map is included in the RW Engineering Chapter.

Maps and descriptions are transmitted to the Commission with a letter of explanation and an offer in the amount of the District's appraisal.

Upon approval, the State Lands Commission will authorize the issuance of a patent conveying the right of way to the Department of Transportation.

8.21.03.03 Recordation

The patent will be transmitted to the District for recordation.

© 1994-2025 California Department of Transportation. All rights reserved.

8.21.03.04 Purchase of Excess – State School Lands

In some instances, freeway construction over State School Lands may result in "landlock" or severe damage to remainder parcels.

If curative measures are not economically feasible, purchase of the entire parcel, or a portion thereof, may be justified.

If the District finds that fee acquisition of State School Lands in excess of net right of way and access requirements is indicated, HQ RW, Acquisition Branch should be so advised at the time the appraisal is approved. A patent is also issued by the State Lands Commission whenever purchase includes excess land.

8.21.04.00 State Park Lands – General

When right of way across beach or park land is required, application shall be made to the Department of Parks and Recreation, for a Grant of Easement.

Easements are generally acquired by Transfer of Control and Possession (see Section 8.21.05.00).

Section 5012 of the Public Resources Code provides that the Department of Parks and Recreation, upon application by the proper authorities, may grant easements for public highways over and across State Park lands.

8.21.04.01 Condemnation Requirements – Fee Acquisition

In the event a greater title than an easement is required, it will be necessary to secure title by an action in eminent domain.

© 1994-2025 California Department of Transportation. All rights reserved.

8.21.04.02 Condemnation Procedure

When condemnation is necessary for acquiring right of way across State Park areas, the following will apply:

A. Confer with the Director of the Department of Parks and Recreation to agree on the right of way required and the plan for the highway to be located through the specific state park area involved. A signed memorandum will cover conditions deemed to be pertinent to the particular project and shall be approved by HQ RW.

B. The Director of the Department of Parks and Recreation will present to the State Park and Recreation Commission the plan previously agreed on for the proposed improvements. Upon approval, the Director will forward a letter of approval to the District Director. The letter will constitute authority for the Department of Transportation to enter on the lands described and commence construction.

   (It is expected that such a letter will eliminate the necessity for securing an order for possession from the Superior Court after the filing of an action in eminent domain.)

C. Upon approval of the location, an action to condemn the right of way will be instituted by the Department of Transportation. The suit will name as defendants, among others, the Director of Parks and Recreation and the members of the State Park and Recreation Commission, as well as the Commission itself. Summons and Complaint will be served upon the Director of Parks and Recreation and upon the Attorney General. Ordinarily, the Attorney General will appear on behalf of the Commission and the other park officials named as defendants.

D. The District, upon service of a copy of the complaint upon the Attorney General, will accompany such complaint with a copy of the approved letter and agreement.

E. The Attorney General will file an answer on behalf of the Department of Parks and Recreation and the State Park and Recreation Commission and will set up in the answer, the conditions under which the highway is to be constructed, in accordance with previous agreement between the District and the Department of Parks and Recreation.

© 1994-2025 California Department of Transportation. All rights reserved.

F. The Attorney General and the attorney appearing for the Department of Transportation will agree upon and prepare a form of judgment containing such conditions as appear to be necessary to make effective the agreement for the location, construction, maintenance of the highway and will present the matter to the Superior Court and obtain a judgment and a final order of condemnation.

8.21.05.00 Transfer of Land Between State Agencies

Section 14673 of the Government Code provides that control or possession of land owned by the State may be transferred from one State agency to another State agency with the approval of the Director of General Services.

In such a transfer, the Director of General Services may authorize the payment of such considerations as deemed proper from available funds of the receiving agency to the transferring agency.

Upon request and without fee, the Recorder of each county in which any portion of land so transferred is located shall record any instrument executed for such a transfer.

The Department of General Services (DGS), Office of Real Estate Services reviews for the Director under legislative direction and is, therefore, entitled to be reimbursed for the cost of such services. The Department of General Services charges the grantee for the service since the grantee is the beneficiary of the transfer.

8.21.05.01 Transfer of Jurisdiction Procedural Instructions

In cases where the land to be acquired for highway purposes falls into the category of lands described in the preceding section, acquisition activities shall be handled in the same manner as the acquisition of private lands, except that no Right of Way Contract or Deed need be obtained. The instrument used, a "Transfer of Jurisdiction of State-Owned Real Property" (Transfer of Jurisdiction), functions as both contract and deed. This instrument must contain all the terms and conditions of the transaction, including a sufficient legal description and map of the property being transferred. Two examples of the Transfer of Jurisdiction document can be found in Exhibit 06-EX-02. The first is exclusively for use with the State Department of Parks and Recreation. The second is for use with all other state agencies.

© 1994-2025 California Department of Transportation. All rights reserved.

Transfers of Jurisdiction (TOJ) typically require long processing timelines, and as such, these transactions should be identified early-on in the Project Development process. TOJ parcels should also be assigned as one of the first orders of work when developing Project Delivery Acquisition Schedules.

Project delivery acquisition transactions with other state agencies (OSA) need to be addressed in all RW Estimates at anticipated Fair Market Value (FMV). FMV Appraisals are required in all TOJ transactions in order to document just compensation payable to the OSA. These appraisals are subject to DGS review under Government Code (GOV) Section 14673.

Initiation of Negotiations (ION) are conducted with the local office of the OSA having current jurisdiction over the required RW parcel(s). An ION with the OSA should include a typical presentation of detailed project mapping, design exhibits, RW maps, copy of FMV appraisal, approved Environmental Clearance documents, project schedule information, etc. In addition, obtaining a Right of Entry (ROE) for RW Certification purposes should always be discussed at the ION.

TOJ terms, conditions, and corresponding legal description(s) will typically require some level of negotiation with the OSA. Negotiation of TOJ content usually commences after execution of the requested ROE for RW Certification and construction purposes. Negotiating final TOJ content, and the subsequent review, approval, and execution of the TOJ by all involved agencies, can take several months to complete. This is why securing a ROE is so critical in meeting RW Certification timelines. The Department does not typically pursue condemnation activities to secure project delivery requirements from the OSA.

When all terms and conditions of the TOJ have been successfully negotiated, and when all legal descriptions and mapping have been finalized and approved by both state agencies, the assigned Region/District RW Agent prepares the necessary documents for pre-approval by DGS. Sample contents noted directly below.

© 1994-2025 California Department of Transportation. All rights reserved.

The assigned RW Agent, as a DGS-identified Agency Representative (AR) or Delegated Authority (DA), prepares and electronically transmits a DGS "Global CRUISE Request" for the DGS' Real Estate Services Division (RESD) to facilitate the required review, approval, and execution of the TOJ by DGS RESD (and DOF, if necessary) as per GOV 14673. Documents that are too large to upload to CRUISE will either be emailed or physically mailed to the DGS Real Estate Officer, per their direction. The assigned RW Agent in the Region/District will directly address any questions/concerns raised by DGS during their processing activities, and will personally coordinate any requested changes in legal descriptions and mapping with involved RW Engineers in the Region/District. DGS will electronically bill the Region/District and Project Identification Number (through direct contact with HQ Accounting) for all DGS review/approval activities required by GOV 14673. The District should work with the HQ RW State/Federal Land Transfer Coordinator to supply HQ accounting with the correct charging information when DGS sends in their invoice. DGS requires the following:

- Copy of the jurisdiction document that shows the property being transferred is under the jurisdiction of the **transferor.**
- Copy of vesting documents.
- Copy of legal written description of the site being transferred.
- Copy of site/plat maps of the property being transferred.
- Copy of the preliminary title report of the site being transferred.
- Copy of title exceptions, map, access, and utility map of the site being transferred if available.
- Verification that all title exceptions have been cleared by RW and/or RWE.
- Copy of the appraisal report of the site being transferred (valid within the last 6 months).
- Funding source used to purchase said lands from the transferor if the transferor is being compensated.
- Environmental document (must be valid within the last year).
- Will there be any compensation for the transfer? Will there be any funds involved?
- Any other information not referenced but potentially useful, as applicable.

© 1994-2025 California Department of Transportation. All rights reserved.

Once DGS has pre-approved the TOJ, a TOJ Template Package (sample contents noted directly below) is prepared, and emailed to the State/Federal Land Transfer Coordinator (FLTC) in HQ RW, Office of Project Delivery:

1. The TOJ, with format and content suitable for recording
2. DGS Checklist Information, including brief description of subject property, zoning, highest and best use, acreage being transferred, original acquisition date & source of funding, why transfer is necessary, and contact information for involved agency personnel.
3. RW maps
4. County Assessor's parcel information/mapping
5. FMV Appraisal, including photos, comparable sales information, and valuation analysis
6. Recorded documents originally conveying title of subject parcel to OSA
7. Approved environmental clearance documents
8. Copy of fully-executed ROE, if applicable

The State/Federal Land Transfer Coordinator in HQ RW reviews the submitted TOJ Template Package for compliance with standard expectations, and then routes the entire TOJ Template Package to HQ Legal for review/approval prior to obtaining a notarized signature by the Right of Way and Land Surveys (RWLS) Division Chief. All Project Delivery TOJs require a legal sufficiency review by HQ Legal prior to execution by the RWLS Division Chief.

After legal sufficiency review and subsequent execution and notarization by the RWLS Division Chief, the HQ RW State/Federal Land Transfer Coordinator transmits the TOJ and exhibits to the Headquarters Office of the OSA (if located in Sacramento) for their review, approval, and notarized execution of the TOJ. After notarized execution by appropriate representatives at the OSA, the executed TOJ and exhibits are returned to the HQ RW State/Federal Land Transfer Coordinator by the OSA. The HQ RW State/Federal Transfer Coordinator will then route the TOJ to DGS (who will engage the Department of Finance [DOF], as applicable) to facilitate their final review, approval, and execution activities.

© 1994-2025 California Department of Transportation. All rights reserved.

After the DGS processing activities, the entire TOJ Template Package is returned to the assigned RW Agent in the Region/District, so that the fully-executed TOJ, with the attached notary acknowledgement forms, legal description(s), and map(s) can be recorded in all counties where the subject parcel is located. As per current direction from HQ Legal, all TOJs are to be recorded. After recording, the assigned Region/District RW Agent retains the original, recorded TOJ in the Acquisition File and sends a conformed copy of the recorded TOJ to the OSA and confirms pending payment. A conformed copy of the recorded TOJ is also to be transmitted to the Region/District RW Engineering Unit for Record Map purposes.

A conformed copy of the recorded TOJ is used to request payment of just compensation to the OSA via typical HQ Accounting payment procedures. Along with the TOJ, a fully-approved Memorandum of Settlement and Acquisition Invoice (with payment mailing instructions) are to be provided to HQ Accounting, similar to other acquisition-related transactions. Any expedited payment requests need to be explained on the Acquisition Invoice. Payments to the OSA will be transmitted via U.S. Mail unless other arrangements have been identified on the Acquisition Invoice and coordinated in advance with HQ Accounting.

Use of the Land Bank Exchange Account (LBEA), created through interagency agreement between the Division of Highways (now Caltrans) and the Department of Parks and Recreation (DPR), is currently available for use in making Project Delivery TOJ payments to DPR. Specific TOJ language referencing an LBEA payment can be found in 06-EX-02. All typical HQ Accounting payment procedures (as noted above) are to be followed when facilitating payments to DPR via the LBEA, including a specific notation on the Acquisition Invoice identifying that the LBEA is to be used to facilitate payment between the two agencies involved. The LBEA is only to be used in facilitating payments between Caltrans and DPR. Caltrans HQ Accounting is responsible for tracking and reporting all LBEA transactions on a quarterly basis.

The TOJ Process, which outlines the above activities, is included in 8.21.05.02.

© 1994-2025 California Department of Transportation. All rights reserved.

8.21.05.02 Transfer of Jurisdiction Process

Phase 1: PDT, R/W Engineering, and Estimating Activities

1. Project Delivery acquisition activities with Other State Agencies (OSA) follow all typical R/W processes until execution of final conveyance documents.
2. Early identification of TOJ parcels in the PDT process is essential. (Assign TOJ parcels as first order of work due to long lead times for approval.)
3. R/W numbers, mapping, and legal descriptions are required for all TOJ transactions.
4. TOJ parcels are to be identified in all R/W Project Estimates at anticipated fair market value (FMV).

Phase 2: Project Delivery and R/W Certification Processes

5. A FMV Appraisal is required for all TOJ transactions. These are subject to Department of General Services (DGS) review under Government Code Section 14673 (GC 14673).
6. FWO with local office of OSA, including project exhibits, R/W maps, copy of the FMV appraisal, approved Environmental document, project schedule information, etc.
7. Region/District R/W Agent (R/W Agent) addresses all project impact issues and questions raised by OSA.
8. R/W Agent negotiates/executes Right of Entry (ROE) for R/W certification and construction purposes and commences preparation/discussions of TOJ content with OSA.
9. R/W Certification and Construction.

© 1994-2025 California Department of Transportation. All rights reserved.

Phase 3: TOJ Processing, Routing, Approval Activities by OSA, DGS, and DOF (Post R/W Certification Processes)

10. TOJ terms/conditions (including legal descriptions for all R/W areas) finalized/approved by CT and OSA.
11. R/W Agent prepares DGS "CRUISE" request, uploads as many items as possible and either emails or sends hard copies as directed by assigned DGS Real Estate Officer.
12. District R/W Agent contacts CT HQ State/Federal Land Transfer Coordinator to notify HQ Accounting of correct charging information for DGS for TOJ.
13. District R/W Agent addresses any/all inquiries from DGS and Department of Finance (DOF) related to their review/approval activities under GC 14673.

Phase 4: HQ Approval, Execution, and Routing

14. TOJ Template Package prepared by R/W Agent for HQ.
15. TOJ Template Package transmitted to CT HQ State/Federal Land Transfer Coordinator by email.
16. TOJ Template Package sent to HQ Legal for review/approval. Any needed revisions will be communicated to R/W Agent by HQ R/W State/Federal Land Transfer Coordinator.
17. HQ R/W State/Federal Land Transfer Coordinator transmits TOJ Template Package to Chief, Divisions of R/W and Land Surveys for approval and notarized signatures.

Phase 5: TOJ Notarization, Recording, and Caltrans Record Keeping Activities

18. HQ R/W State/Federal Land Transfer Coordinator personally delivers CT-executed TOJ Template Package to the Headquarters Office of OSA, if located in Sacramento.
19. Once OSA has notarized the agreement, HQ R/W State/Federal Land Transfer Coordinator will pickup and drop-off with DGS (if OSA located in Sacramento).
20. TOJ is executed and notarized by DGS and DOF (if applicable).
21. DGS returns the executed and notarized agreement to the District R/W Agent.
22. DGS will bill CT HQ Accounting for review and processing costs, which will be charged to the Project.

© 1994-2025 California Department of Transportation. All rights reserved.

Phase 6: TOJ Recording and Caltrans Record Keeping Activities

23. R/W Agent records fully-executed TOJ in all counties where property is located.
24. R/W Agent completes Memorandum of Settlement, Acquisition Invoice, etc., and requests payment via HQ Accounting. All DPR transactions should specifically reference a credit to the Land Bank Exchange Account (LBEA) on the Acquisition Invoice.
25. Conformed copy of recorded TOJ transmitted to OSA along with estimated timeframe for payment (or credit to LBEA).
26. HQ Accounting makes payment to OSA (or credits LBEA) and sends confirming information to R/W Agent for inclusion in Closed Acquisition Parcel File.
27. R/W Agent transmits copy of recorded TOJ to Region/District R/W Engineering Unit to update Record Maps. Original TOJ is retained in the Closed Acquisition Parcel File.
28. TOJ transaction completed!!!

8.22.00.00 – CALIFORNIA VETERANS' PROPERTY

8.22.01.00 General

Property purchased through provisions of the Veterans' Farm and Home Purchase Act is vested in the name of the State of California, Department of Veterans Affairs (DVA) and sold under Purchase Agreement to the veteran.

8.22.02.00 Acquisition Procedure

Where land required for highway purposes is vested in the DVA, the acquisition shall be handled in the same manner as acquisition of privately-owned lands involving an agreement of sale.

The Contract and Grant Deed shall be executed by the veteran (and spouse). The DVA will not execute these documents, but will convey directly to its vendee on its own form of deed after details of the transaction have been agreed upon with the veteran. On partial acquisitions, the DVA may join with the veteran in conveying the property to the State Department of Transportation. The Deed and Contract, in duplicate, should be signed by the contract purchasers as well as by the DVA.

The DVA shall be notified by letter of the necessity to acquire the property, with the request that a Deed from the DVA to State's grantor be deposited in escrow with accompanying demand for payment for use of such deed.

8.22.03.00 Scheduling Procedure

The schedule shall contain a certified copy of the Deed from the DVA to the veteran, in addition to the certified copy of the Deed from the veteran to the State, to complete the chain of title.

© 1994-2025 California Department of Transportation. All rights reserved.

8.23.00.00 – PUBLIC AGENCIES – JOINT POWERS AGREEMENTS

8.23.01.00 Joint Exercise of Powers Act

The Joint Exercise of Powers Act (Section 6500 et seq of the Government Code) provides for joint agreements by public agencies briefly outlined as follows:

A. Two or more public agencies, by agreement, may jointly exercise any power or powers common to the several contracting bodies. The term "public agency" is defined as including the Federal Government or any department or agency thereof, the State, an adjoining state, or any state department or agency, a county, city, public corporation, or public district of this State or an adjoining state.

B. The agreement will state the purpose or the power to be exercised, provide for the method to accomplish the purpose, and the manner in which the power shall be exercised.

C. Contributions from the treasuries of the respective parties may be made as provided in the agreement, and the funds may be paid to and disbursed by the agency or entity agreed upon. Personnel, equipment, or property of the parties to the agreement may be used in lieu of other contributions. The agreement shall provide for strict accountability of all funds and reports of all receipts and disbursements.

D. The agreement may be continued for a definite term of until rescinded or terminated and may provide for method of rescission or termination by any of the parties thereto.

E. The agreement will provide for the disposition, division and distribution of any property acquired as the result of such joint exercise of powers and the return of any surplus monies, after the purpose has been completed. If the purpose is the acquisition or operation of a revenue producing facility, the agreement may provide for repayment of contributions and for payment of sums derived from revenues of said facilities.

© 1994-2025 California Department of Transportation. All rights reserved.

8.23.02.00 Public School District Lands

Education Code Section 17494 covers the conveyance of lands for streets and highways. The conveyance requires a Resolution of Intent, Public Hearing, and Adoption of Resolution. Therefore, adequate time must be allowed for these processes. The cited code references are contained in the Exhibits Section.

© 1994-2025 California Department of Transportation. All rights reserved.

8.24.00.00 – TAX-DEEDED LANDS

8.24.01.00 General

Division 1, Part 6, Chapter 8 of the Revenue and Taxation Code authorizes the Department to acquire by Tax Deed any property available for sale by reason of tax delinquencies. The Department may acquire by sale through agreement with the county, approved by the State Controller, all or any part of the Tax-Deeded property. If the property is not too large, the preferable procedure is to acquire the entire property.

8.24.02.00 Agreement to Purchase Tax-Deeded Lands

The agreement shall be with the Board of Supervisors of the county in which the property is situated and shall briefly set forth: (1) a description of the property that has been deeded to the State for nonpayment of taxes; (2) that the property is needed for State highway purposes; (3) the selling price the State agrees to pay for the property; and (4) that the cost of giving notice of said agreement will be paid by the State. An agreement is included as Form RW 08-09. The description should be exactly as the county tax collector and assessor have shown it with a reference to the number of the deed by which the property was deeded to the State, the first-year property tax was delinquent, the current assessed value, and the selling price agreed upon.

8.24.02.01 City Property

The agreement must be approved by the city council if the property is located within a city and, in such instances, the agreement is first forwarded to the city for its approval as to selling price, together with property maps, etc. After the city council has approved said agreement it is returned to the District Office of Right of Way with proper resolution attached, attested to by the city clerk.

© 1994-2025 California Department of Transportation. All rights reserved.

8.24.02.02 Approval Process

The agreement is recommended for approval by the DDC-RW, and executed on behalf of the Department by the District Director. After execution by the District Director, the agreement is forwarded to the Board of Supervisors for approval and submission to the State Controller.

Upon approval by the State Controller, the County Tax Collector arranges publication of notice of the agreement once a week for at least three successive weeks in a newspaper published in the county, or if none, then by posting copies of the notice in three public places.

Not less than 21 and not more than 28 days prior to the effective date of the agreement, the tax collector mails a copy thereof, by registered mail to the last assessee, at the last known address.

Upon expiration of the period of advertising, the tax collector notifies the Department of the effective date of the agreement, which is 21 days after the first publication, encloses bills for the selling price of the property and the cost of advertising.

The State has 30 days from the effective date in which to make payment.

8.24.03.00 Payment Made from Revolving Fund

The payment for Tax Deed land and cost of advertising is advanced from the Revolving Fund.

© 1994-2025 California Department of Transportation. All rights reserved.

8.24.04.00 Procedure by County After Receipt of Payment

Upon receipt of payment of the agreed selling price, plus the cost of advertising, together with affidavit of publication, the tax collector issues a Tax Deed to the State.

In addition to the usual provisions of a Deed conveying real property, the Tax Deed shall specify:

- That the real property was duly sold and conveyed to the State for nonpayment of taxes, which had been legally levied and were a lien on the property.

- The name of the purchaser.

Except as against actual fraud, the Deed is conclusive evidence of compliance with statutory provisions and otherwise has the same legal effect as a conveyance by deed to a private purchaser after sale of tax-deeded property.

8.24.05.00 Recording of Tax Deed

Immediately upon receipt of the Tax Deed from the Tax Collector, the District shall forward the Deed to the County Recorder for recording in the same manner as any other Deed.

8.24.06.00 Moratorium Prohibiting Sale

A moratorium enacted by the Legislature prohibited the sale of those properties deeded to the State after October 6, 1942. This wartime provision made California statutes conform to the Federal Soldiers and Sailors Civil Relief Act, which withheld from sale or foreclosure property owned and occupied by persons on duty in the armed services. This moratorium was repealed by the 1949 Session of the Legislature, and all tax-deeded properties are now subject to sale. The Federal statute has not been repealed or amended and, therefore, the tax collector should be careful to avoid the sale of those properties which come under the provisions of the Federal Act. In some counties, the tax collector, for protection, requires an affidavit of the District Director or DDC-RW, that the property was not owned by any person in the armed services of the United States.

© 1994-2025 California Department of Transportation. All rights reserved.

8.24.07.00 Termination of Rights to Redeem

If not previously terminated, all rights to redeem the property are terminated on execution of the Deed by the tax collector and the Deed conveys to the purchaser all interest in the property.

8.24.08.00 Rescheduling Procedure

The schedule for reimbursement of the revolving fund shall contain a certified copy of the Tax Deed.

8.24.09.00 Securing Policies of Title Insurance

Title companies will usually refuse to insure title free and clear of the last assessee's interest until the purchaser (State) has been in possession for one year. Therefore, when one year has elapsed since the recordation of the Tax Deed, the District will request a policy of title insurance showing the property vested in the State free and clear of any reference to the tax sale.

Where the property is of nominal value and neither excess land nor access rights are acquired, the requirement of title insurance may be waived. Present procedure provides that the title insurance may be waived, at District discretion, on parcels valued at $2,500 or less.

© 1994-2025 California Department of Transportation. All rights reserved.

8.25.00.00 – MATERIAL SITES AND DISPOSAL SITES

8.25.01.00 Origin of Request

All requests for the purchase of material or disposal sites and the securing of agreements for use of material or disposal sites will originate with the Construction, Project Development, or Maintenance Departments. Such requests will be the authority to proceed with negotiations in accordance with the following procedures.

See the Appraisal Chapter and the Planning Manual for further information.

8.25.02.00 Expenditure Authorization for Material or Disposal Site Purchase or Use

The requesting department will notify the District Office of Right of Way of the issuance of a work order to prepare an appraisal report, purchase title reports, and other incidental expenses. When the appraisal report has been prepared and approved, this work order will be supplemented with an amount sufficient to complete acquisition.

Funds for the purchase of such sites are provided by specific vote of the California Transportation Commission (CTC) and it shall be the responsibility of the District to submit the request for Commission action.

8.25.03.00 Search of Title

The responsibility for determining the status of title will rest with the District. If there are any apparent complications in the ownership, the District shall obtain a title report prior to negotiations for the agreement.

8.25.04.00 Agreement Number

Each agreement for a material or disposal site shall be assigned an identifying number by the District.

© 1994-2025 California Department of Transportation. All rights reserved.

8.25.05.00 Form of Agreement

Material agreements shall be obtained in triplicate on the standard form Grant of Right to Take Material (see Form RW 08-10) or Grant of Right to Dispose of Material (see Form RW 08-11).

8.25.06.00 Payment to Owner's Agent

Frequently, agreements are subscribed to by a number of parties. Subsequently, when bills are rendered to support a claim schedule, all of the parties signing the agreement do not sign the bills, causing its rejection in the Controller's office. To eliminate this and assist in the saving of time and effort, the following clause should be used in the agreement when applicable.

"The undersigned 'Owner' hereby empowers and appoints _____ to act as agent for the undersigned 'Owner' to receive and collect any and all monies from the State of California which may become due and payable under the provisions of this agreement. The State of California is hereby authorized to forward any and all of said monies to the said agent at_____."

8.25.07.00 Payment for Agreement

The consideration for securing an agreement should be $150. This amount should be scheduled and paid to the owner. Payment will be financed from the function involved, such as maintenance or construction. This establishes a consideration and thus avoids the possibility of unilateral termination by the owner.

Where material is being taken from a commercial site, this section is not applicable.

© 1994-2025 California Department of Transportation. All rights reserved.

8.25.08.00 Unit Price Payment Clause for Disposal Agreements

The standard form for a disposal agreement does not provide for any royalty. If it becomes necessary to pay a royalty, the following clause is to be included in the disposal agreement.

"The State agrees to pay, or cause to be paid, to the owner for all rights herein granted, a royalty of _____ cents per cubic meter or _____ cents per metric ton for materials deposited on said property. State shall have the option of electing one of the following methods of measuring the amount of materials placed upon the disposal site: (a) by cubic meter at point of delivery (b) by weight or (c) by cubic meter measured in place on the disposal site. Payment of royalty shall be based upon the amount of materials placed upon said property as determined by the method of measurement the State elects to utilize and said payment of royalty shall be made in accordance with the State's established procedure for paying such obligations. For the purpose of progress payments, owner shall be furnished monthly a statement showing the estimated amount of material placed during the month and the progress payments of royalty thereon shall be made in accordance with the State's established procedure for paying such obligations."

8.25.09.00 Nonstandard Agreements – Letter of Transmittal

All nonstandard agreements shall be submitted by a letter of transmittal from the District to HQ RW for approval and execution.

8.25.09.01 Material Agreements

The letter of transmittal for material agreements should state:

A. The department initiating the request (Construction, Project Development of Maintenance);

B. Termini and status of the project on which the material is to be used (if a specially voted project, include a statement to that effect and the date of vote);

© 1994-2025 California Department of Transportation. All rights reserved.

C. A brief justification of the royalty to be paid and a statement to the effect that diligent search has been made and no cheaper material of the quality desired can be found within economical haul distance of the project;

D. The average haul distance from the site to the project, or to that portion of the project on which the subject material is to be used.

E. That the District Office of Right of Way has investigated the possibility of acquiring the property in fee and has determined that the use of royalty basis for payment is more economical;

F. That the material site will not be excavated at a location where resulting scars will present an unsightly appearance from any highway. Reference should be made to any deviation from this procedure with appropriate explanation;

G. That the location of the site is not in violation of any environmental ordinance or zoning regulation;

H. Complete explanation of special clauses or alteration of clauses set out in the sample agreement.

8.25.09.02 Disposal Agreements

The letter of transmittal for disposal agreements should state:

A. The department originating the request (Construction, Project Development or Maintenance);

B. Termini and status of the project for which the disposal site is to be used;

C. A brief justification of the royalty, if any, to be paid and a statement to the effect that diligent search has been made and a more economical site cannot be found within economical haul distance of the project.

D. The average haul distance from the project to the site, or from that portion of the project to which the subject material is to be hauled;

E. That the District Office of Right of Way has investigated the possibility of acquiring the property in fee and has determined that the use of the royalty basis for payment is more economical.

© 1994-2025 California Department of Transportation. All rights reserved.

F. That the disposal site will not present an unsightly appearance from any highway. Reference should be made to any deviation from this procedure with appropriate explanation;

G. That the location of the site is not in violation of any environmental ordinance or zoning regulations;

H. Explanation of any special clauses, alteration of clauses, or special conditions regarding compacting or conforming of the material or any feature which creates an economic advantage to the owner or places a liability on the State.

8.25.09.03 Superseded Agreements

When an existing agreement is superseded, the letter of transmittal shall explain the reasons for the new agreement and provide a complete explanation of any variation from the original, especially as to termination date, royalty, and quantity of material. Also, the number of the original shall be set out in the letter for proper identification of the superseded agreement in HQ RW files.

8.25.10.00 Material Sites Acquired Under Federal Highway Act

The Federal Highway Act of 1958 provides, under Sections 317 and 107(d), for the acquisition of rights of way, access rights, or sources of materials for construction of Federal Aid Highways including highways in the Interstate System. The pertinent portions of the cited statutes are included in Section 8.18.02.00, "Public Lands-Federal".

When the District needs to secure material from sites under the jurisdiction of the Department of the Army (Corps of Engineers) or Bureau of Yards and Docks (Navy and Marine Corps) and the commanding officer is amenable to the use of the material by the Department of Transportation, the District shall submit an application through HQ RW in the form of a tracing, in duplicate, together with a metes and bounds description of the site. The application will then be processed through the Secretary of the U.S. Department of Transportation who will seek to obtain the approval for the removal of the material from the agency having jurisdiction of the site.

8.26.00.00 – MUTUAL WATER COMPANY STOCK

8.26.01.00 General

Corporations Code Sections 14300-14307 covers the laws applicable to mutual water company stock.

The District may acquire mutual water company stock only if ownership of such stock is necessary to provide a supply of water for the purposes listed below.

Mutual water company stock may be either appurtenant or not appurtenant to land. Stock of a mutual water company is not by its nature appurtenant but becomes appurtenant only when the particular corporation has made it so by:

A. Providing in its articles or bylaws that water shall be sold, distributed, supplied, or delivered only to owners of its shares and that such shares shall be appurtenant to certain lands;

B. By describing the lands in the stock certificates; and

C. By recording a certified copy of such articles or bylaws all as required by Section 330.24 of the Civil Code.

Ultimate disposition of acquired water stock differs depending upon whether it is appurtenant or nonappurtenant stock.

8.26.02.00 Determination If It Is Proper to Acquire Stock

Since a mutual water company may usually sell water to a State agency, it may not be necessary to acquire water stock. However, if the company will not sell to anyone other than its shareholders, the District must determine:

A. Will the property (or portion) being acquired be rented in such a manner as to utilize water during the interim period before construction?

B. Will water be required from the property for construction purposes?

C. Will water be required in connection with office, shop or maintenance activities?

© 1994-2025 California Department of Transportation. All rights reserved.

If water is required for any of the above purposes, the District will secure the water stock and arrangements shall be made with the company to reissue the stock in the name of the State until the need for water no longer exists.

8.26.03.00 Determination If Water Stock Is Appurtenant to Land

Whenever it is discovered that water stock is involved in a transaction, determine if the stock is appurtenant to the land we propose to acquire. This information may be available through the title company. If it can't, then the District shall do the following:

A. Make a determination as to whether the stock certificate describes any property, and if so, whether the property described is that which is proposed to be acquired;

B. Determine whether a certified copy of the articles or bylaws has been recorded; and

C. Obtain a correct copy of the current articles and bylaws of the company and of the stock certificates involved; then

Based on the District's research, review and analysis of the information obtained, a determination can then be made as to whether or not water stock is appurtenant to the land that is proposed to be acquired.

8.26.04.00 Disposition of Appurtenant Stock

If it is not necessary to acquire appurtenant water stock as outlined above, it shall be submitted to the secretary of the company to be canceled.

If appurtenant stock is acquired, see the Property Management Chapter dealing with water stock.

8.27.00.00 – SPECIAL ACQUISITIONS

8.27.01.00 Parcels Acquired for Mitigation Purposes

Occasionally, properties are proposed to be acquired by the Department to mitigate environmental impacts created by transportation projects. The District is primarily responsible in the determination of who or what agency will hold title to mitigation parcels, when acquired. The process for accomplishing this, if not clearly defined, may result in the Department acquiring mitigation parcels in its own name and assuming unwanted maintenance and liability burdens. Once title is vested in the Department, it becomes difficult to transfer title to another agency or environmental group if no prior agreement as to final vesting exists. The Maintenance Branch is concerned regarding the type of maintenance and its volume of work when mitigation parcels are acquired in the Department's name.

Title to mitigation parcels should, if possible, be taken in the name of the appropriate Federal, State, local agency, or conservancy group to eliminate liability related to ownership and maintenance. This may or may not be the same agency which required us to undertake the mitigation process. It is essential that District take steps to ensure they are included in contacts with other agencies when the appraisal and acquisition processes relating to mitigation parcels are discussed or commitments are being made. Ownership commitments made during these discussions should be reduced to written conceptual agreements at the earliest possible date.

In some instances, it may be necessary for the Department to take title for an interim period to allow for habitat establishment on the mitigation parcel or to complete an assemblage of the entire mitigation site. In this situation, an interim or conceptual agreement must be utilized to ensure that the grantee will accept title once the habitat development has been completed, and it has been demonstrated that our mitigation efforts have been successful. In either instance, the conveying document shall contain a clause which provides that the title shall either revert to, or be conveyed to, this Department if the property is not used for the purpose for which it was acquired.

© 1994-2025 California Department of Transportation. All rights reserved.

8.27.01.01 Acquisition of Parcels Encumbered by a Conservation Easement

Occasionally, properties are proposed to be acquired by the Department which are encumbered by a conservation easement. As a result of Section 1240.055 of the Code of Civil Procedure (CCP), special care must be taken in the valuation (see Section 7.06.05.00) and acquisition of these types of properties. To ensure that project delivery commitments are met, long lead times for these parcels are required in the event the Department needs to proceed with eminent domain to secure the property rights needed.

In particular, CCP 1240.055 places additional Notice of Intent ("notice") requirements on the Department prior to seeking Resolution of Necessity. The specific notice requirements, required time frames associated with sending said notices, as well as the Department's obligation to respond to any comments received as a result of the notices, are outlined in detail in Section 9.01.04.01 (Notice of Intent to Adopt a Resolution of Necessity for properties that are subject to a conservation easement).

Given the above, it is imperative that these types of properties be identified as early as possible to allow sufficient time to carry out the proper appraisal, acquisition, and if necessary condemnation procedures.

8.28.00.00 – DONATION

8.28.01.00 General

Donation is the voluntary conveyance of property, without compensation, for the improvement of a public project. Donation of real estate for highway purposes may be accepted at any time. See SHC Code Sections 104.2 and 104.12.

8.28.01.01 Definitions

The following definitions apply to this procedure:

"right of way" – real estate required for State transportation purposes.

"donation" – the voluntary transfer of land title to the State at no cost or for less than full fair market value compensation.

"donor" – includes any person or nongovernmental entity that makes a donation of right of way for State transportation purposes. See Chapter 17, "Local Programs," for governmental agencies.

"dedication" – setting aside of property for public use in exchange for the granting of, for example, a building permit or zoning change variance for land use or to satisfy mitigation requirements resulting from an environmental review. Dedications are usually required through exercise of police power and without compensation.

"airspace" – real property rights above or below State highways that can be used for other purposes subject to any reservations, restrictions, and conditions necessary to ensure protection to the safety and adequacy of highway facilities and conforming to abutting or adjacent land uses.

"future airspace development rights" – the first right of refusal to enter into an airspace development lease, if the opportunity arises, at market rent to the landowner, based upon highest and best use of the site, subject to unanimous CTC approval of the economic terms of the lease.

"revenue share" for donors – that portion of revenue from an airspace development lease payable to a donor up to a maximum of 50 percent of total revenue.

© 1994-2025 California Department of Transportation. All rights reserved.

8.28.02.00 Donation Guidelines

A. Donations must be voluntary and owners must be advised of their benefits under the State and Federal Uniform Acts and of their right to compensation, relocation assistance benefits, and their right to receive an appraisal report of the market value of their real property being donated. Any proposed donation must have detailed analysis of actual and potential costs to the State. A financial resume shall be prepared to confirm that State will not incur obligation, or potential obligation, to pay more than the property is worth (RAP, Goodwill, Hazardous Waste Cleanup). Any release of compensation and/or benefits by the Grantor can only be accepted under special conditions on a case-by-case basis with appropriate confirmation and documentation that State and Federal regulations are not being violated.

B. All owners will be advised of the Department's policy of accepting voluntary donations, but the offer to donate must not in any way result from an act of coercion. The owner will be advised of this policy at the time of the first written offer.

C. Donors shall also be advised that they may contract to reserve certain airspace development rights and revenue sharing. Any development shall be subject to approval by the Department with any reservation, restrictions, or conditions that it determines necessary for highway safety. See Section 8.28.03.00.

D. Donations may be made at any time during the development of a prospective project. However, any document executed to effect donation prior to approval of the environmental clearance of the project shall clearly state that:

    1. All alternatives to a proposed alignment will be studied and considered.

    2. Acquisition of property shall not influence the environmental assessment of a project including the decision relative to the need to construct the project or the selection of a specific location; and

    3. Any property acquired by gift or donation for projects covered by the Federal Highway Act, USC Section 323, shall be revested in the Grantor or successors if such property is not needed for the

© 1994-2025 California Department of Transportation. All rights reserved.

alignment chosen after public hearings, if required, and seven years after completion of the environmental document.

4. If the property is conveyed by donation, the clause in Section 8.05.11.00 must be included in the Right of Way Contract.

5. Donations will not be accepted until a hazardous waste assessment has been completed by the Environmental Branch. A copy of the hazardous waste assessment shall be kept in the parcel file for documentation. The Right of Way Contracts shall include the appropriate hazardous waste clauses. (See Section 8.16.00.00.)

E. Once the environmental and location process requirements are satisfied and regular right of way activity is underway, donations may be accepted by the acquiring agency as part of their regular acquisition program providing the restrictions referred to above are followed.

8.28.03.00 Reservation of Airspace Revenue and Development Opportunities

The basic operational guidelines are:

A. Donors of transportation rights of way MAY participate in future airspace development rights to that property. Any such airspace development shall be subject to the approval of the Department and the CTC and any reservations, restrictions, or conditions they determine necessary for the safety and adequacy of highway facilities and to assure conformity with abutting or adjacent land uses.

B. The Department shall share airspace development lease revenues pursuant to a negotiated contract with the donor including local or other governmental agencies.

C. Development rights and/or revenue sharing rights may be obtained only by contractual agreement when the right of way is acquired through donation and shall NOT be included as a provision of the Grant Deed. These rights must be spelled out in the Right of Way Contract pertaining to the State's acquisition of property.

© 1994-2025 California Department of Transportation. All rights reserved.

D. Where right of way is sold to the State at less than fair market value, donor's share of the airspace development lease revenue will be determined by the following formula:

A = B x C x D

Where:
A = Donor's revenue share.
B = Percentage of fair market value of parcel for which donor elected not to receive compensation.
C = Donor's potential maximum share of total revenue (50 percent).
D = Percentage of area of entire assembled airspace site generating the revenue.

E. Since sites may sometimes incorporate more than one donation, and the precise areas of individual developable sites will probably not have been determined at the time of the donation, reservation of future airspace development opportunities may ultimately be granted to several donors. Therefore, the opportunity to develop a site will be offered to all of the various donors. They will then have 180 days to respond to the Department in writing of their election to participate in developing the site. If a donor does not elect to participate, that shall be considered a waiver of any and all development opportunities. The Department will give each interested donor 180 days in which to submit an offer and proposal, with detailed economic terms. The offer and proposals will be analyzed by the Department. The one most advantageous to the State will be submitted to the CTC for approval of economic terms. A maximum of up to one-half of the lease revenue from the development will be distributed among the multiple donors. The share for each donor will be based on the proportion of square meter donated to the total square meter of the site and/or percentage of the donation.

F. Future airspace development opportunities and revenue sharing cannot be sold, assigned, or transferred unless otherwise specifically provided for by contract.

G. Negotiated contracts which provide for reservation of development opportunities must specify that a claim for inverse condemnation or any other claim will NOT be made if the transportation project is not built or a design change or future transportation project eliminates any potential airspace use.

© 1994-2025 California Department of Transportation. All rights reserved.

H. The contract will provide that total revenue available for sharing could be reduced if the FHWA should, at any time, require reimbursement.

I. The contract must make clear that leases will be based on fair market value taking into account the highest and best use of the property rights included and require CTC approval of the economics of the lease terms.

J. Leasing will be permitted only after the transportation project has been completed and will be conducted in accordance with existing Federal, State, local, and Departmental policies and procedures, including approval by the FHWA and CTC.

8.28.03.01 Processing

Signed transactions will be processed as follows:

A. All contracts which provide for reservation of development rights or revenue sharing will be reviewed by HQ RW prior to their execution.

B. District Acquisition will notify the unit responsible for inventory of donations and RW Engineering to ensure that right of way donated, sold at less than fair market value, will be designated as a donation on Right of Way Record Maps and will be entered on the donations inventory.

C. Airspace sites which were acquired through donation, or at less than fair market value, will be specially designated as such in the District Airspace inventory.

D. Development offer and proposal processing and selection, and airspace leasing and compliance monitoring, will be conducted by District Airspace staff as outlined in the Airspace chapter.

E. Division Airspace staff will coordinate with Division of Accounting for airspace development lease revenue share accounting and disbursements.

© 1994-2025 California Department of Transportation. All rights reserved.

F. Division Acquisition will maintain a record of the number and nature of contractual agreements entered into pursuant to the above code sections and will prepare the biennial reports to the Governor and Legislature required by this legislation. Division Airspace staff will provide to Division Acquisition staff an accounting of revenue shared on an annual basis. This information will also be included in the Right of Way Annual Report.

Where appropriate, the following clauses must be included in a Right of Way Contract or Right of Entry for development opportunities or revenue sharing:

8.28.03.02 Statement Used in Lieu of Standard Payment Clause

See Section 8.05.11.00.

8.28.03.03 Contract Clause Where Donor to Retain Opportunity to Develop Airspace

"It is understood and agreed that in exchange for the conveyance referred to herein, the Department of Transportation shall notify Grantor, in writing, in the event airspace becomes available for revenue producing nontransportation development purposes. Grantor shall have 180 days from issuance of said notice to respond in writing with a lease development proposal. In the event Grantor does not respond within the allotted time or notifies the Department that the opportunity is declined, Grantor waives the right to develop and the Department may proceed to the open market in accordance with established procedures to obtain revenue producing ground leases." NOTE: THIS DOES NOT PERTAIN TO TRANSACTIONS WHERE DONATIONS ARE LESS THAN TOTAL VALUE.

© 1994-2025 California Department of Transportation. All rights reserved.

8.28.03.04 Contract Clause Where Donor to Share Revenue

"In the event the Department enters into revenue producing airspace leases using the donated property referred to above, revenue shall be shared with Grantor in accordance with established Department procedures. When an available airspace development site consists of land that was obtained through donation from more than one donor, a competitive process in accordance with the most current established Department procedures at the time of development, will be used to select the developer. Revenue sharing, if applicable, will be applied in the same proportion as the square meter of the property donation bears to the square meter of the assembled airspace lease site. Grantor understands that, notwithstanding the above, State's share will be a minimum of 50 percent of revenue collected."

8.28.03.05 Additional Clauses for Airspace Development Opportunities and/or Revenue Sharing Contracts

"Grantor hereby waives any claim for future inverse condemnation or damages or any other claim based on the Department's plan to build the transportation project or to change the design or review the project and thereby eliminate or reduce the potential for airspace leasing."

"Grantor understands that if the project for which the property is being acquired is constructed either totally or partially with Federal funds, the available lease revenue will be reduced in the event FHWA requires reimbursement."

"It is agreed and understood any and all opportunities may be exercised only by parties to this contract and may not otherwise be sold, assigned, hypothecated or transferred."

"Grantor understands and agrees that the opportunities to develop and/or share revenue as provided herein above, shall only become available in the event the Department adds said property to its airspace inventory."

"Grantor waives any claim for damages of any kind in the event the property is not added to said inventory."

© 1994-2025 California Department of Transportation. All rights reserved.

"Airspace development leases will be allowed only after completion of construction of the transportation project and said leasing shall be conducted in accordance with existing Federal, State and Department Airspace laws, rules, regulations, procedures and policies in effect at the time of lease including approval by the FHWA and the CTC."

8.28.04.00 Local Match for Donations

The fair market value of donations received subsequent to the enactment of the Surface Transportation and Uniform Relocation Assistance Act of 1987 can be considered eligible as State or local matching funds whenever Federal funds participate.

The District may contract for an Independent Staff Appraisal to meet local match requirements. Section 146(a) of the Surface Transportation and Uniform Relocation Assistance Act of 1987 provides that the fair-market value of land lawfully donated after April 2, 1987, and incorporated into the project may be used as credit toward the State or local matching share for a Federal-aid highway project. It does not apply to dedications or to donations made by an agency of the Federal, State, or Local government.

The fair-market value shall be established by an appraisal made in conformity with the provisions of 49 CFR 24.103 and 24.104 subject to the following conditions:

A. Increases and decreases in the value of the donated property caused by the project are to be excluded.

B. The appraisal shall not reflect damages or benefits to remaining property.

C. The fair-market value shall be established as of the date the donation becomes effective or when equitable title vests in the State, whichever is earlier. Donated land must be incorporated into the project to be eligible for credit purposes. All appraisals involving donations for credit to State or local matching funds must otherwise meet the same standards as normal acquisition appraisals.

D. In order to qualify for a "soft match," it must be a true donation, not an exchange of right of way for non-cash consideration. Also, the appraisal to determine the amount of credit does not include any severance damages to the remainder.

© 1994-2025 California Department of Transportation. All rights reserved.

8.28.05.00 Donation Tax Information

IRS has indicated in the past that it will not rely solely on staff appraisals for donations of property exceeding $5,000 value which are to be claimed as charitable contributions for Federal tax purposes. The owner should be advised to check with his/her tax consultant, IRS, and/or the Franchise Tax Board if this or other questions of tax implications arise.

© 1994-2025 California Department of Transportation. All rights reserved.

8.29.00.00 – DEDICATION

8.29.01.00 General

A dedication is the setting aside of real property (in fee or easement) for public use without compensation, typically as a condition of the local agency approval of a development project (building permit, land use zoning variance or change, tentative subdivision or parcel map, etc.). Where development occurs or land use changes are proposed, the local agency, through its regulatory authority, may require dedications.

For detailed information about the dedication process, see Section 6.20.00.00. of the *Right of Way Manual*.

8.29.02.00 Dedication Guidelines

A. Acceptance of dedicated right of way to previously established right of way limits under this process is an exercise of police power and does not require compliance with the Uniform Relocation Assistance and Acquisition Policies Act.

B. The value of dedicated property may not be used as a credit against the State or local agency matching share of Federal project funds.

C. Dedications must be accepted by the Department either formally with an acceptance document or informally by using the property for transportation purposes, e.g., through the encroachment permit process.

D. Prior to acceptance by the Department, property to be dedicated shall be subject to a hazardous waste assessment and a review of the condition of title. The acceptance document shall include the appropriate hazardous waste clauses. (See Section 8.16.00.00.)

E. Dedications do not generally qualify under terms of SHC Sections 104.2 and 104.12(a).

© 1994-2025 California Department of Transportation. All rights reserved.

8.30.00.00 – FUNCTIONAL REPLACEMENT

8.30.01.00 Functional Replacement of Real Property in Public Ownership

When publicly owned real property, including land and/or facilities, is to be acquired for a highway project, in lieu of paying fair market value for the real property, the State may provide compensation by functionally replacing the publicly owned real property with another facility which will provide equivalent utility. This can be done when it is permitted under State law, in the best interest of the State and the State has informed the agency owning the property of its rights to an estimate of just compensation, based on an appraisal of fair market value and of the option to choose either just compensation or functional replacement.

The functional replacement concept permits Federal participation in costs of acquiring an adequate substitute site if one is required and the construction costs of the replacement improvements which duplicate the function of the acquired improvement. This concept requires that the facility must be needed by the public, must be actually replaced and the costs to presently replace the facility or cure damage to it be actually incurred by the public agency. The functional replacement concept may also be applied to State-funded projects.

When the Department determines that functional replacement of real property in public ownership may be necessary and in the public interest, and the FHWA approves such determination before the acquisition, Federal funds may participate in the payment to the public agency for:

A. The functional replacement costs of the improvements required to be replaced exclusive of any but nominal betterments; and

B. The market value of the land acquired when the public agency has land upon which to relocate the facilities; or

C. The reasonable cost of acquiring a substitute site where lands owned by the public agency are not available for use in relocating the facility.

© 1994-2025 California Department of Transportation. All rights reserved.

The reference above to "nominal" betterment should be clarified to the extent that costs of increases in capacity and other betterments are not eligible for Federal participation except those necessary to replace utility, those required by existing codes, laws, and zoning regulations, and those related to reasonable prevailing standards for the type of facility being replaced.

NOTE: The provisions of 23 CFR Subpart B, Section 710.509 should be reviewed to assure compliance with Federal regulations pertaining to Functional Replacement of Real Property in Public Ownership. Exhibit 08-EX-34 (internal Caltrans link) provides a suggested format for showing a summary of estimates or actual costs.

8.30.02.00 FHWA Approval Steps

Functional Replacements require FHWA approval. The FHWA is to be contacted during the concept stage regarding the possibility of a functional replacement when publicly owned real property, including land and/or facilities, is to be acquired for a Federal-aid highway project. Prior to the initiation of negotiations with the public entity, the Department and the FHWA will agree on the scope of property and project-related oversight and the required approvals prior to the initiation of the functional replacement (23 CFR 710.509).

© 1994-2025 California Department of Transportation. All rights reserved.

8.40.00.00 – OUTDOOR ADVERTISING STRUCTURES

8.40.01.00 General

Section 5403, Business and Professions Code, and Section 721, Streets and Highways Code, regulate outdoor advertising structures on highway right of way. Sections 5405, 5406, 5407, and 5408, Business and Professions Code, regulate advertising structures adjacent to any State highway included in the Interstate and Primary highway systems.

No new structures shall be placed on State-owned properties whether the properties are considered excess or being held for future highway use. Existing structures may remain on the theory that the property does not, at present, constitute a portion of the right of way, but is being held by the State for future use.

Removal or relocation of outdoor advertising company structures from right of way for Interstate or Primary highways to a location outside the area being acquired shall conform to the requirements of the above Code Sections.

8.40.02.00 Structures on Williamson Act Agricultural Preserves

Land placed in an agricultural preserve contract under the Williamson Act (Government Code Sections 51200-51295) is limited to agricultural uses. Other uses are prohibited by the terms of the contract. If the property being acquired has an outdoor advertising structure located in the acquisition area, the compensability status of the structure will have been determined prior to the commencement of appraisal.

Outdoor advertising structure placements will fall into one of the following two categories:

A. A structure placed on a property after the land is placed in an agricultural preserve is illegal and payment **must not** be made for its removal. Removal of such structure should be enforced by the county or the local entity as a party to the Williamson Act contract.

© 1994-2025 California Department of Transportation. All rights reserved.

B. A Structure is in place when the property is placed in an agricultural preserve. Generally, payment is made for the removal of any structure located adjacent to an Interstate or Primary highway, if it was legally placed prior to November 6, 1978. This will have been cleared with the Legal Division prior to proceeding with the appraisal.

8.40.03.00 Acquiring Interests of Outdoor Advertising Company

The outdoor advertising company must have a written or oral agreement with the owner or lessee of the real property. The agreement must be in effect and authorize the structure to remain placed for a period of time beyond the date of State's acquisition. (The date of acquisition is considered to be the earliest of the following dates: the effective date of a Right of Entry, the day following the date of close of escrow for the underlying fee interest, or the date of issuance of summons when State acquires property subsequent to the date the summons was issued.)

A Quitclaim Deed and Contract will be obtained from the Company. The Contract will have the following clause:

> "Pay the undersigned grantor the sum of $_____ for the interest as conveyed by above document(s) when grantor's advertising structure(s) located _____ has (have) been removed. Said payment shall be made within 90 days following the date the Department of Transportation receives from the grantor a statement certifying to the removal of the structures.
>
> The undersigned grantor further agrees to remove the structure(s) not later than 10 days after receiving written notification from the Department of Transportation to do so. In the event the structure(s) has (have) not been removed by said date, the State of California, or its authorized agent, is granted the right to remove and dispose of the structure(s) as it may deem fit."

No written or oral commitments are to be made which makes structure removal contingent upon project certification or construction dates. If the structure is fully conforming to State and local law and would create no problems if allowed to remain in place for a period of time, then the site for the structure can be rented to the Company without loss of its right of compensation.

© 1994-2025 California Department of Transportation. All rights reserved.

If the structure is not fully conforming and/or its removal is imminent, no rental will be permitted and the Contract should provide for immediate removal of the structure.

Where the Company has only a leasehold interest, the Contract will have the following clause:

> "The undersigned grantor agrees that acceptance of the compensation to be paid under the terms of this contract constitutes a waiver of any rights to any other compensation to which grantor would otherwise be entitled and is in lieu of the just compensation that grantor might have received if the removal had been required by the Department of Transportation while exercising its right of eminent domain."

The Company may claim compensation on the basis of direct costs (see Appraisal Chapter and pertinent exhibit). They will have to submit an itemized statement of such direct costs to the Department. The company books and records will have to be made available for inspection or audit to justify these costs. Where historical direct costs are not available from the company's records, the company may estimate the amount of such direct costs. These estimates will be subject to verification by the Department.

The following clause will be included in the Right of Way Contract:

> "The grantor shall, upon request, make available for inspection or audit books or records pertaining to the historical or estimated direct costs of the structure(s) covered by this contract. Grantee's right to make said audit or inspection shall terminate four years after payment is made to grantor under this contract."

Where a structure is located on a total acquisition which is completely within the right of way or where the structure is located on that portion of a total acquisition which lies within the right of way, no relocation on the remainder will be permitted. The rates discussed in the Appraisal Chapter will apply.

When relocation cost for special builds, painted bulletins or urban rotate bulletins is based on a moving estimate from the sign company by use of rates in the Appraisal Chapter, the following clause will be included in the Right of Way Contract:

> "The grantor shall, upon request, make available for inspection or audit books or records pertaining to the cost attributable to the relocation of the structure(s) covered by this contract. Grantee's right to make said audit or

© 1994-2025 California Department of Transportation. All rights reserved.

inspection shall terminate four years after payment is made to grantor under this contract."

On partial acquisitions, if the structure is relocated under all of the following conditions (a) within one year after the date of initial removal, (b) at a new location within 457.32 meters of the old location, and (c) on any contiguous property owned by the Company's lessor at the time of initial removal, the Company shall be entitled only to the schedule of relocation allowances for structures pursuant to the Appraisal Chapter. Therefore, every Contract based on the assumption the structure cannot be relocated shall contain the following clause:

"The undersigned grantor agrees that if the structure(s) is (are) relocated in a conforming location under a State outdoor advertising permit (a) within one year after the initial removal, (b) to a new location within 457.32 meters of the former location, and (c) on any contiguous property owned by the grantor's lessor or permittor at the time of initial removal, the grantor shall be entitled to only a relocation allowance." If grantor does relocate said structure(s) grantor shall, within 90 days following the date of such relocation, pay to the Department of Transportation the difference between the amount paid pursuant to Clause 2(A) above and the established relocation allowance."

Every effort should be made to make payment to the Company within 90 days after the date the Department receives, from the company, a certificate of removal of a structure and completion of such other forms as the Department may require in connection with the payment of compensation.

8.40.04.00 Structure Rentals

All structure rentals shall be prorated as of the day following the date the deed to the State is recorded or the day following the date the State secures legal possession, whichever occurs first. Fair rental rates will be charged for all structures allowed to remain within the right of way. The determination of the fair rental rate will be based on comparable rentals being paid in the general vicinity.

For structures located partially within the area being acquired, and being allowed to remain until notice to remove or relocate is given, the Contract shall provide for the appropriate proration of rental payment by the advertising company to both the State and grantor.

8.50.00.00 – MEMORANDUM OF SETTLEMENT

8.50.01.00 General

All transactions concluded by Contract, stipulated, contested or default judgment, Transfer of Jurisdiction, or other special agreements must include a Memorandum of Settlement (MOS) Form RW 08-12 (internal Caltrans link). A short form MOS (Form RW 08-13) (internal Caltrans link) may be used provided the following conditions are unequivocally met: The cash settlement figure, including construction obligations, must be in accordance with the approved staff appraisal, no dollar limitation; the Deed and Contract must not contain any special clauses and title must not be taken subject to any encumbrance which would result in diminution of value of the property being acquired. The MOS shall be signed by the Acquisition Agent. Such signing will constitute the agent's assurance that the related transaction meets State and Federal requirements. The Senior Agent, Acquisition Branch, shall also sign the MOS. For those parcels with a value less than $25,000, the Acquisition Agent's supervisor, regardless of regular branch assignment, is authorized to approve an MOS. Individual districts may find it internally desirable for others, i.e., Supervising RW Agent, Acquisition Branch; Deputy District Directors RW, etc., to sign; however, as a minimum the MOS shall be signed by the Acquisition Agent and the Senior Agent, Acquisition Branch, for parcels in excess of $25,000. Scheduling procedures should be initiated as soon as the Contract, Amendment, or other Agreement has been executed.

8.50.02.00 Preparation

The MOS must be prepared in sufficient detail so anyone reviewing the transaction will fully understand all phases of the acquisition and reasons for special clauses or other provisions included in the Contract. There should be no doubt that all the elements of the transaction were given consideration and the Contract and MOS totally reflect the agreement between the State and the grantor.

All applicable information must be inserted. Under the DOCUMENTS IN FILE portion, the appropriate boxes must be checked and those documents must be in the file. A complete description on how to prepare the MOS is included with the Form.

© 1994-2025 California Department of Transportation. All rights reserved.

8.50.03.00 Disposal Records

The Acquisition Agent may need to complete two documents that provide information on property acquired.

The Inventory and Disposal Record (Form RW 12-01) (internal Caltrans link) is used for accountability of improvements and personal property purchased through Right of Way transactions, and to record the discharge of such accountability at the time of clearance. See Sections 11.03.02.00 and 12.01.07.00.

The Excess Land Parcel Acquisition/Disposal Summary (Form RW 16-01) (internal Caltrans link) must be completed when real property is acquired in excess of the property needed for a project. Data in the acquisition appraisal is used to provide the inventory value and the acquisition file provides information for the remainder of the form. Parts I, II, and III of the form should be prepared at the time the MOS is prepared and is attached as one of the DOCUMENTS IN FILE. The document is attached to the MOS with a copy forwarded to the Excess Land Senior. The information is used to create the history of the parcel in the Excess Land Management System (ELMS).

The Agent will provide all the required information to complete these forms in the MOS. The Forms should be prepared at the time the MOS is prepared. The Registration Number must be shown on the first page of the MOS next to the "Inventory and Disposal Record" under the "DOCUMENTS IN FILE" section.

Improvements acquired through condemnation proceedings should be listed in the same manner as those acquired by negotiation. The form should be prepared when an Order for Possession or Right of Entry is secured. It shall be the responsibility of the Agent assigned to the case to provide the necessary information.

8.50.04.00 Segregation of Acquisition Costs for Federal Reimbursement

The Acquisition Branch must segregate acquisition costs into federally eligible and ineligible items through the use of a precoded Federal Participation Memorandum (Form RW 08-16) (internal Caltrans link). The source of this information is the settlement and the segregation of settlement amounts as set forth in the MOS. A Federal Participation Memorandum shall be completed on all transactions which create obligations of capital funds, e.g., Contract or other agreement.

© 1994-2025 California Department of Transportation. All rights reserved.

The Federal Participation Memorandum is not an encumbering document. Capital funds are ordinarily encumbered by one or more of the following acquisition documents: Right of Way Contract, Amendment to Right of Way Contract, Judgment, Stipulation, Transfer of Jurisdiction, Request for Transfer of Funds (to support an Order for Possession), Rental Agreement (Exhibit 08-EX-04), Possession and Use Agreement, or other agreement by which Right of Way agrees to pay monies to an owner or lessee.

Right of Way is responsible for accurate segregation of acquisition costs. The Federal Participation Memorandum is forwarded by Planning and Management to Accounting who records the costs into the accounting system (Advantage). Accounting is not to change any entry without prior consultation and approval of Right of Way. Ultimately, therefore, Right of Way has the sole and final responsibility to ensure that the capital costs are accurately charged or not charged to Federal funds.

A fully signed copy of the Federal Participation Memorandum shall be attached to and become part of every MOS in the Acquisition file.

On an Order for Possession (OP), a Request for Transfer of Funds (Form RW 09-19) (internal Caltrans link) provides for the segregation of values for Accounting to charge or not charge Federal funds. This "Request" shall also be forwarded to Accounting through Planning and Management. A copy of the "Request" must be included in the acquisition file with a copy of the RW Capital Monitoring Report or equivalent. This will indicate if the deposit has been coded 090 or 090N.

When settlement occurs after the taking of an OP, Accounting must be advised if there was a withdrawal of the deposit by the owner or if there is a need to "reverse" a charge to Federal funds made when the transfer of funds occurred. Since there is a potential for double billing of Federal funds, caution should be exercised.

Proper entries must be made on the center portion of the Federal Participation Memorandum.

© 1994-2025 California Department of Transportation. All rights reserved.

8.50.04.01 Federal Reimbursement Provisions

These are in 23 CFR 710.203 and 710.309. Items with the greatest potential for erroneous claims and requiring careful review include the following:

A. Federal authorization to proceed with right of way acquisition must be obtained prior to initiation of negotiations. If prior authorization is not obtained, all acquisition and related costs on that parcel are ineligible for federal reimbursement.

B. Although the cost of purchasing an excess, uneconomic remainder is eligible for Federal participation, the Department has decided to no longer seek Federal participation. The cost of purchasing an "excess acquisition" is not Federally Participating. The Department will seek Federal participation for any and all damages attributed to an acquired excess parcel. (RWMC-132, December 22, 2003.)

   Buildings or other improvements straddling the right-of-way line, e.g., garage, landscaping, swimming pool, etc., are eligible. Itemization will normally coincide with the segregation of values on the Appraisal Page. A pro rata segregation between right of way and excess, as in the appraisal, or other applicable basis, shall be used. If design changes either reduce or increase the area of excess subsequent to appraisal, adjustments must be made at time of settlement. If changes in the area of excess occur subsequent to acquisition, the Right of Way Engineering Branch notifies Excess Lands Branch, by memorandum, of these changes. Changes in the area of excess, of necessity, require adjustment of the Excess Land Inventory. Accounting will make any necessary coding adjustments.

   District Planning and Management has the responsibility to coordinate these Right of Way activities with RW Accounting.

© 1994-2025 California Department of Transportation. All rights reserved.

C. Cost to acquire personal property is normally ineligible for Federal reimbursement. An exception is, if a landlord owns the personalty, e.g., furnished apartment, and if the furnishings are not acquired, a consequential eviction of tenants could occur by removal of the furniture by the landlord. Trade fixtures, equipment, machinery and other items installed for use on a property and within the right of way will be eligible if determined to be improvements pertaining to realty. There may be certain unique situations in which failure to acquire personal property may result in either relocation assistance benefits. In these unique situations, the District is cautioned that the prior concurrence of the FHWA shall be secured to preserve eligibility which would otherwise be lost. Mobile homes may be considered as either realty or personalty. If a mobile home cannot be relocated, i.e., not decent, safe, sanitary or not acceptable to another mobile home park, the only alternative is to offer to acquire and whether it is realty or personalty is not relevant, either as to the acquisition process or Federal eligibility. The FHWA has allowed participation in the cost of acquiring mobile homes which are in the right of way. If the acquisition involves a mobile home park and mobile homes are acquired which are on excess land, the guidelines in Section 8.06.22.00 should be reviewed to determine Federal eligibility. (See Section 7.03.04.00.)

D. If legally compensable under State Law, Loss of Goodwill, interest, and damages to remainders are eligible for Federal reimbursement unless otherwise noted.

E. Care must be exercised when segregating values into eligible and ineligible categories when an administrative settlement has been made. If ineligible items are monetarily identified, they are not to be claimed. If, with other items, they were considered as potential contributions to an adverse verdict, then they may still be eligible provided the settlement is reasonable for the real property acquired. Eligibility for reimbursement is achieved when no item adversely effects the amount of the settlement for eligible interests in real property, and in the judgment of the District, the payment for the real property acquired is reasonable. In a partial acquisition, an administrative settlement amount may be prorated between land, improvements, and damages unless the file reflects the increase was limited to any one of these components. If a portion of the property acquired in a partial acquisition is excess, an ineligible proration must be made. In a total acquisition without excess, prorate the increase between the components individually as in the partial acquisition, discussed above. In a total acquisition, with excess, prorate the administrative settlement increase between right of way and excess unless there is a clear and

© 1994-2025 California Department of Transportation. All rights reserved.

positive indication the increase is related to an improvement within the right of way.

F. Certain costs encountered in the acquisition of a property are to be included as part of an administrative settlement. Specifically, these costs are: approved and authorized out-of-pocket expenses as outlined in Section 8.01.20.00 and rental payments as outlined in Section 8.01.31.00. These costs are eligible for Federal reimbursement and are to be listed as damages in a partial acquisition and included with the land payment in a total acquisition. If excess is acquired, prorate these costs between the right of way and the excess. State costs related to the trying of an eminent domain action, e.g., jury fees, reporter's transcript, filing fees, etc., while eligible for reimbursement have previously been entered into the accounting system (Advantage) and should not be listed in the Federal Participation Memorandum. Litigation fees, determined by the court, to be paid to defendant's counsel are ineligible. Defendant's costs in trying an eminent domain action are not eligible except as noted in 23 CFR 710.203(b)(1). Prior to settlement, funds may have been advanced to an owner/lessee in order to perform rehabilitative work when a partial acquisition is to be made. These costs, as well as those for architectural drawings, are eligible provided the costs are not in conflict with concepts in an approved or authorized appraisal.

G. The Appraisal Chapter provides guidelines for rounding of the appraised value of the required property. The practice is to round the total value of the required property.

   In the settlement column of the MOS, the components (land, improvements, etc.) shall be rounded to the extent that their total will equal the rounded total of the appraisal or the settlement. As in any judgmental decision, reasonable care should be used, i.e., when excess is being acquired, the rounding should be reasonable so that Federal funds are not charged inappropriately.

   The rounded components in the settlement column of the MOS shall be used in the preparation of the Federal Participation Memo. This procedure will be of significant assistance to RW Accounting.

H. Care must be exercised to avoid charging Federal funds prematurely. A portion of a settlement, normally eligible, but not to be paid until a later time, is not to be charged to Federal funds until the payment is made. The typical example is when a portion of the payment is withheld until the grantor performs an act, e.g., removes an

© 1994-2025 California Department of Transportation. All rights reserved.

improvement, cuts and caps a waterline, etc. When funds are withheld, the Federal Participation Memorandum shall reflect this by checking the "Yes" box under item "C) withheld funds" along with the dollar amount, and, on the appropriate line, i.e., Improvements. Coding of withheld transactions will prevent charges to bill out for federal reimbursement.

When the condition that required the withholding of funds has been eliminated or complied with, Acquisition notifies RW Accounting by submitting a supplemental Federal Participation Memorandum (RW 08-16) (internal Caltrans link) and a completed Acquisition Invoice (RW 08-17) (internal Caltrans link). The Federal Participation Memorandum must clearly indicate the adjustment to be made, (i.e., withholding). Additionally, include a statement in the Explanation Section of the form that the terms of the contract have been complied with (e.g., premises have been inspected and work performed).

Care should be exercised to ensure proper scheduling and payment of the withheld amount, and appropriate charging of the expenditure to avoid a double billing situation. It is advised that the original RW 08-16 (internal Caltrans link) also be attached with the payment request package for the withheld amount.

I. Parcels acquired on either a hardship or protection basis, under a Federal-Aid Stage 1 Authorization, have specific eligibility requirements for Federal participation. See Section 3.05.05.03 Stage 1 Authorization – Hardship and Protection and Sections 5.03.00.00 – Hardship and 5.04.00.00 – Protection.

After the selection of a particular location, 23 CFR Section 630.106(c)(3) and (d) allows authorization to proceed with RW acquisition in hardship and protective buying situations. At the time of FHWA authorization, the Federal government does not provide federal funds for the hardship and protective acquisitions.

However, costs of approved hardship and/or protection parcels are eligible for future federal reimbursement. Therefore, RW transactions for hardship and protection acquisitions must be coded as "eligible for federal aid." The Accounting System (Advantage) must record these hardship and protection acquisition costs as federally eligible so that Advantage may bill FHWA for future federal reimbursement.

© 1994-2025 California Department of Transportation. All rights reserved.

J. If a construction contract obligation has been included in either the construction plans or the appraisal, or both, and the grantor requests payment in lieu of the State's contractor performing the work, as evidenced by a clause in the Contract, then such payment is to be listed under damages.

   Conversely, a proposed damage payment may have been changed to a construction contract obligation. This change must also have been covered by a Contract clause, with appropriate explanation in the MOS and eliminating the applicable portion of the payment from the Federal Participation memorandum.

   The Contract and MOS shall each reflect that the pertinent item is covered by either payment or construction contract obligation, but not both. The Federal Participation Memorandum will be limited to payments. The Agent must ensure that whenever any construction contract obligation is covered by payment, such obligation is eliminated as work to be performed by the contractor. If the acquisition is on a project which is federally participating but Right of Way costs are not, then any Right of Way obligation should not be made a construction contract obligation without an offset or credit to Federal funds.

K. If an exchange is involved, the gross cost to acquire the required property is to be reflected in the Federal Participation Memorandum, not as offset by the credit received for the exchanged property.

© 1994-2025 California Department of Transportation. All rights reserved.

8.60.00.00 – ESCROWS, TITLES AND SCHEDULING

8.60.01.00 General

All Right of Way transactions are processed through the Planning and Management Section. The Acquisition Agent is responsible for assembling all necessary documents for submission to the escrow company and the submission of the payment package to RW Accounting. The entire parcel acquisition file shall be available for handling of scheduling, escrow, and closing procedures.

8.60.02.00 Progress Card

Some form of a Progress Card should be used to show the status of each individual transaction from the time the preliminary title report is ordered until parcel closure. Exhibit 08-EX-37 (internal Caltrans link) is a suggested form. Use is optional; however, the District should use some comparable tracking device to determine the status of acquisition of the ownership and its interests. The Integrated Right of Way System will provide most of this information, but not all of it.

© 1994-2025 California Department of Transportation. All rights reserved.

8.61.00.00 – PROCEDURE WITH ESCROW COMPANIES

8.61.01.00 Contents of Escrow Instructions

Instructions to the escrow company should be simple, clear, and accurately worded so no misinterpretation will occur. They should include the following items:

A. Proper identification of the property being acquired by reference to District, County, Route and Kilometer Posts (Post Miles); Parcel Number and the escrow company order number.

B. A list of enclosures necessary to the processing of the escrow (grant and quitclaim deeds, rental-escrow instructions, statement of identity, etc.).

C. A statement directing the escrow company to utilize all documents when the escrow company is in a position to close escrow and issue a Policy of Title Insurance in the amount specified in the escrow instruction letter, vesting title in the State, free and clear of all liens and encumbrances except as stated otherwise.

D. A statement indicating which of the title exceptions, listed in the title report, will be taken subject to by the State and shown on the Policy.

E. A request, when applicable, for the inclusion of an appropriate CLTA access rights endorsement in the Policy.

F. An instruction as to the disposition of taxes.

G. An authorization to pay the proper demands of lienholders from escrow, in accordance with the intent and terms of the Right of Way Contract and pay the balance to State's grantor.

Additional information shall be included in the escrow instructions as necessary to precisely represent State's intention as to the condition of title acceptable to State. See Exhibit 08-EX-38 Sample escrow letter (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

8.61.02.00 Agent's Responsibility to Provide Required Instruments

The Acquisition Agent must secure execution of the principal document conveying title and all necessary supporting documents and arrange for their delivery into escrow along with escrow instructions. This instruction will prevail regardless of the provision in escrow instructions that the grantor agrees to deliver any instruments required by the escrow agent. Even if it is the grantor's responsibility to deliver the required instruments, it still remains the duty of the Agent to see that such instruments are promptly executed and delivered into escrow.

After delivery of the executed deed to the Acquisition Agent, the District will arrange for certified copies of the grant deed for inclusion in the payment package. See Section 8.63.06.00 for the documents contained in a typical payment package.

8.61.03.00 Scheduling Payments

After the bills or vendor's invoices have been signed and certified copies of the grant deed and necessary related documents have been secured, the transaction will be scheduled for payment. (See Sections 8.63.00.00 through 8.63.07.00.)

8.61.04.00 Delivery of Warrants to Escrow Agent

When the amount is $2,500 or less, the warrant may be delivered to the District or directly to the Escrow Agent. The decision should be based on added workload caused by increased handling versus the interest income to be gained.

State warrants earn interest until they are cashed. State law requires the Escrow Agent to deposit the warrant within one business day after receipt. Warrants for amounts over $2,500 will therefore be delivered to the District. The District will then deliver the warrant to the Escrow Agent only after notification that the escrow is ready to close. This will maximize the interest that State will earn. See Exhibit 08-EX-39 for a sample letter (internal Caltrans link).

© 1994-2025 California Department of Transportation. All rights reserved.

The District must periodically check on all outstanding escrows to ensure that they are completed in as short a time as possible. The Agent is responsible for this follow-up and must assist the grantors in securing any documents necessary to close escrow.

Escrow companies must not use their own funds to pay an owner at close of escrow. Therefore, transactions should not be scheduled for payment until the District and the company are reasonably certain when escrow will close.

The Highway Trust Fund, against which warrants are drawn, ceases to earn the Surplus Money Investment Fund Interest Rate when the warrant is written. The State Treasury does, however, earn interest until the warrant is deposited and honored. This is just further reason to not schedule payment until necessary.

In those rare instances when a State warrant has been cashed and the funds have earned interest, the escrow company should issue a check representing such interest. It will be delivered to the Accounting Officer. Accounting will deposit the check in Special Deposit Account unless they are able to credit the EA. Appropriate credit must be made to Federal Funds.

8.61.05.00 Warrants with Errors Lost or Destroyed

If warrants are in error, payees must be instructed to return the warrants to RW Accounting. If the Schedule amount is incorrect, the Schedule must be corrected. See Section 8.63.10.00. If a District inadvertently receives a warrant that should have been mailed to a payee, contact RW Accounting.

If a warrant is lost or destroyed after it has been delivered to the payee, the burden of securing a duplicate will rest with the payee (Government Code Sections 17090 to 17095).

8.61.06.00 Warrants Delivered to District

A notification to this effect must be submitted with the original claim schedule payment package. RW Accounting will make the necessary arrangements with the State Controller for the warrant to be mailed to the District for delivery.

The District may transmit the warrant to payee by first class mail or by the Title Company's free courier service when offered. The Acquisition Agent cannot handle the Controller's Warrant per SAM Sections 7280 and 8041-2.

© 1994-2025 California Department of Transportation. All rights reserved.

8.61.07.00 Authority to Change Escrow Instruction after Scheduling

Escrow instructions are not to be changed, modified or altered without the prior approval of the person who has approved the schedule.

8.61.08.00 Policy of Title Insurance

Where a Policy is to be secured, it should be ordered immediately following compliance with the closing procedures set forth in the escrow instructions. If the transaction involves low-valued property and a Policy is not being secured, a statement regarding condition of title will be included in the Memorandum of Settlement (MOS).

Where more than one working file is maintained in the District, these files will be merged into the main parcel file within 60 days following final payment, close of escrow or filing of the Final Order of Condemnation, and arranged in an orderly manner. This process shall commence in advance of the receipt of the Policy in accordance with Section 8.01.32.00.

© 1994-2025 California Department of Transportation. All rights reserved.

8.62.00.00 – ESCROW PROCEDURE WITHIN THE DISTRICT

8.62.01.00 Internal Escrow Procedure – Office Copies

Where a transaction is not handled by an outside escrow agent, all documents shall be processed through District Planning and Management for funding availability and proper coding, immediately after the Contract has been approved. The Agent is responsible for seeing that all documents are processed appropriately.

When deeds and other documents are approved, all office copies shall be conformed to the originals.

See Section 8.05.05.00 for a discussion on Internal Escrows.

8.62.02.00 Use of Acquisition Invoice (Form RW 08-17)

The Acquisition Invoice will show the distribution of funds in accordance with the demands filed in District Planning and Management, and provide for the payment of any other encumbrances or obligations which clearance is essential to delivering the title in accordance with the terms and provisions of the Contract. See Form RW 08-17 (internal Caltrans link).

If the Contract specified that a portion of the total payment shall be withheld until improvements are removed from the property by the grantors, payment for the amount withheld will not be scheduled until the improvements have actually been removed by the grantors. Appropriate entries must be made on Form RW 08-16 (internal Caltrans link). See Section 8.50.04.01, Item J.

8.62.03.00 Preparation of Closing Instructions

The title report will be processed by the District with closing instructions to show the disposition of each exception as explained in the Memorandum of Settlement (MOS). Exception handling in the Contract and MOS is to be identical. This information will be the basis for explanations in the schedule letter.

© 1994-2025 California Department of Transportation. All rights reserved.

8.62.04.00 Inventory of Documents

When the Acquisition Invoice is obtained, the closing instructions will be reviewed to determine whether all necessary instruments to clear title in the manner required by the Contract have been executed and deposited in the District office. If all required instruments are not deposited, the Agent shall follow through to ensure that the outstanding interests are cleared by securing such instruments.

8.62.05.00 Scheduling Payment

After the necessary instruments have been deposited, the transaction will be scheduled for payment. (For procedure, see Sections 8.63.01.00 through 8.63.12.00.)

8.62.06.00 Recordation of Documents – Payment to Grantor

After receipt of the warrant from the State Controller, the closing instructions shall be rechecked. When the District is satisfied that all requirements of the transaction have been complied with, the documents requiring recordation shall be delivered to the proper county recorder for recordation and the warrant forwarded to the grantor.

© 1994-2025 California Department of Transportation. All rights reserved.

8.63.00.00 – PAYMENT PACKAGE

8.63.01.00 Authority for Scheduling Payments

Approval of Contracts, Amendments, and Special Agreements creating right of way obligations constitute authority for scheduling payment of right of way obligations, provided Section 8.62.05.00 is complied with.

8.63.02.00 Federal Participation Memorandum (Form RW 08-16)

This form is to be completed on all settlements or agreements which create obligations of capital funds. Instructions for completing the form are included in the form section and Sections 8.50.04.00 and 8.50.04.01.

8.63.03.00 Preparation of Acquisition Invoice (Form RW 08-17)

This form is designed for use when requesting payment. (See Form RW 08-17 [internal Caltrans link].) The address of the payee or escrow agent should be shown in the section titled "Warrant/Check to be made payable to." The name of the grantor must be spelled exactly as shown on the Payee Data Record (STD 204) (internal Caltrans link).

When payment has been authorized to a party or parties other than the grantor, instructions for drawing the warrant under the caption "Warrant to be made payable to," follow a specific format. Contact your RW Accounting Liaisons for clarification.

Under "FOR ISSUING CHECK: Mail By:"
Insert the date check is to be placed in the mail.

Under "PROPERTY ADDRESS OF PARCEL:"
Add the actual address of the parcel (which may not be identical to mailing address provided under Warrant/Check to be made payable to). A copy of the MOS is not required in the payment package.

© 1994-2025 California Department of Transportation. All rights reserved.

8.63.04.00 Payee Data Record (STD 204)

A Payee Data Record (STD 204) (internal Caltrans link) is completed and signed by the payee. A payee may be an individual or many individuals, a business, or a governmental agency. Refer to instructions attached to form for explanation of the various types of payees.

8.63.05.00 Name of Payee on Acquisition Invoice (Form RW 08-17)

The name of the payee appearing on the Invoice must agree with the information on the bill. When the escrow agent's bill form is used, the payee will be shown on the Invoice in the following form:

"Tulsa County Abstract Company, Account of John J. Jones."

The term "escrow agent for" must not be used on the face sheet. The term "assignee of" must not be used unless accompanied by an assignment executed by the claimant.

8.63.06.00 Assembly of Payment Package

1. Federal Participation Memorandum (Form RW 08-16) (internal Caltrans link)
2. Right of Way Contract, 2 certified copies
3. Acquisition Invoice (Form RW 08-17) (internal Caltrans link) plus 1 copy
4. Deed, 2 certified copies
5. Interest computation sheet, if applicable, 2 copies
6. Payee Data Record (STD 204) (internal Caltrans link)

The Agent shall insert the escrow number on the Acquisition Invoice (Form RW 08-17) (internal Caltrans link) which will accompany the warrant mailed by the Controller.

8.63.07.00 Approval Signatures

The Federal Participation Memorandum (Form RW 08-16) (internal Caltrans link) shall be completed and signed by an authorized representative. The signature on the RW 08-16 shall represent a Right of Way confirmation that the payment is in accordance with the approved Contract.

© 1994-2025 California Department of Transportation. All rights reserved.

8.63.08.00 Verification of Vestee

Where the signatures and the grantors named in the caption of the deed to State differ from the vesting shown in the title report, a letter should be secured supplementing the title report to bring the vesting up to date and confirm the names of the grantors as shown on the deed.

When a deed is executed by parties in addition to those named as vestees in the title report, e.g., contract purchaser, spouse of vested owner, etc., the supplemental letter will not be necessary.

8.63.09.00 Bills for Right of Way Property Transactions

Bills from escrow agents (title companies or bank escrows) will include only the consideration for the deed and advances made for the account of the grantor. Charges for escrow services, for preparing or obtaining partial release or reconveyance, and other services furnished by the title company or bank shall be billed separately and scheduled with general service and expense bills.

8.63.10.00 Correction of Scheduled Amount

If, subsequent to scheduling by the District, a schedule amount is found to be incorrect, Accounting should be immediately notified so a request can be made to the State Controller's Office to withhold mailing of the related warrant. Accounting will advise Right of Way if additional information is necessary. After receiving an amended schedule, Accounting will correct the scheduled amount.

If the warrant has been mailed to the payee, the District should immediately contact the payee and arrange return of the warrant and rescheduling in the proper amount.

8.63.11.00 Special Schedules – Condemnation Deposits, Withdrawals, and Expert Witness Claims

Procedures involved in scheduling various condemnation deposits are found in Chapter 9 of the RW Manual. Miscellaneous court deposits, i.e., jury fees, court reporter costs, are discussed in Section 8.68.02.00.

© 1994-2025 California Department of Transportation. All rights reserved.

8.63.12.00 Withheld Payments

If the Contract provides for relocation or removal of certain improvements, and monies are withheld pending the relocation or removal of said improvements, the payment package will indicate the sum withheld. The subsequent payment package covering the amount withheld will include a statement that the premises have been inspected and the work has been performed in accordance with the terms of the Contract. Such a statement is needed before a warrant will be issued. See Section 8.50.04.00, Item J, dealing with the timeliness of charging Federal Funds when a portion of the payment is withheld.

© 1994-2025 California Department of Transportation. All rights reserved.

8.64.00.00 – RECORDATION OF INSTRUMENTS

8.64.01.00 Acceptance Required

The Government Code provides generally that deeds or grants conveying real property, or any interest therein, to the State, a political corporation or governmental agency, shall not be accepted for recordation without the consent of the grantee, evidenced by its Resolution of Acceptance attached to the Deed or Grant, or by the written acceptance of an authorized officer or agent, whose authority is shown by an attached and certified copy of resolution.

All forms for Certificates of Acceptance of instruments on behalf of the State shall refer to Government Code Section 27281. See Exhibit 08-EX-41 (internal Caltrans link).

8.64.02.00 Execution of Certificate of Acceptance

Each person designated to accept conveyances on behalf of the State must have a power of attorney from the Director of Transportation. The power of attorney must be recorded in each county in the District. The District Director or delegatee has been authorized to certify to and accept conveyances on behalf of the State.

8.64.03.00 Deeds Containing Nonstandard Recitals

Regions/Districts have the authority to approve deeds which contain exceptions or reservations to the grantor or which impose an obligation on the State other than those set forth in the Right of Way Manual as standard clauses, or are contained in standard forms.

8.64.04.00 Deeds Affecting Unrecorded Interests

Generally, it is not necessary to record a deed affecting unrecorded interests. In certain cases, recordation of such deeds is necessary to protect the interest or title of the State. The deeds shall be processed, including acknowledgment, acceptance, and the caption, to allow future recordation, if necessary.

© 1994-2025 California Department of Transportation. All rights reserved.

8.64.05.00 Documents Entitled to Free Recordation

All Deeds, Conveyances or Transfers in which the State of California, or subdivision thereof, is the grantee or recipient of benefits are entitled to be recorded without charge. This includes all related instruments, i.e., Reconveyances and Releases; Orders of Court; Powers of Attorney; and any and all Deeds, Conveyances, and Instruments of whatever kind, recordation of which is necessary in order to complete the chain of title to land or interest therein, being acquired by the State. Vacation and Relinquishments by the California Transportation Commission (CTC) are also entitled to free recordation.

Some Recorders have insisted upon fees being paid by the State for recordation of documents which would appear to qualify for free recordation. In these cases, the District should pay the fee by submitting it to the Recorder with a letter indicating payment is made under protest.

On all documents submitted to a Recorder for free recordation, a "State Business: Free" stamp is to be affixed and signed by an authorized employee. A suggested form of Free Recordation Stamp is as follows. Be sure to refer to the appropriate Government Code Section.

STATE BUSINESS: Free

This is to certify that this document
is presented for record by the State
of California under Government Code 27383
and is necessary to complete the chain
of title of the State to property acquired
by the State of California.

DISTRICT DIRECTOR

By

_____

8.64.06.00 Documents Not Entitled to Free Recordation

Deeds to individuals or corporations where the State is the grantor (Director's Deeds) are not entitled to free grantee recordation. These fees are to be paid by the State's grantee.

NOTE: In special cases such as exchange transactions, the State may pay recording fees as part of the consideration for the transaction (See Section 8.68.01.00).

8.64.07.00 Real Property Transfer Tax

Section 11922 of the Revenue and Taxation Code makes any deed, instrument or writing to which a governmental agency is a party exempt from any documentary transfer tax when the exempt entity of government is acquiring title. It is against State policy to pay documentary transfer tax either directly or indirectly.

8.64.08.00 Director's Deed Recordation

All Director's Deeds shall be recorded before delivery to the grantee. On recordation, the District shall report the recording data to HQ RW on forms provided to the District with each package of executed Director's Deeds.

When the District has been advised that the sale has been approved by the CTC, the buyer shall be requested to submit a check to the District, made payable to the order of the County Recorder of the property county for the exact amount of the recording fee. Check and deed can then be forwarded to the Recorder and all State checks are eliminated.

8.65.00.00 – TITLE REPORTS AND POLICIES OF TITLE INSURANCE

8.65.01.00 Title Vested in People – Sec. 233 Streets and Highways Code

This Section provides that all title acquired by the public to any real property, or interests therein, used for highway rights of way for a State highway is vested in the name of the People of the State of California.

8.65.02.00 Title Reports and Certification of Title

The term "title reports," for purposes of this manual, includes reports titled "Preliminary Title Reports" and "Litigation Guarantees."

A Preliminary Title Report is an offer to insure and issue a title policy with the listed exceptions. Most preliminary title reports contain a disclaimer stating that a preliminary title report is not a written representation as to the condition of title to real property and may not list all liens, defects, and encumbrances affecting title to the land. California Insurance Code Section 12340.11 states that "It is not a policy of title insurance but is only an offer to issue a policy of title insurance in the future for a specific fee, subject to the stated exceptions set forth in the Prelim." No contract or liability exists until the title insurance policy is issued.

A Litigation Guarantee guarantees the accuracy of interests in the property for purposes of a legal proceeding. It sets forth the current record of title and encumbrances on the real property at issue and identifies the parties who should be named in the lawsuit. The Guarantee insures against claims of lienholders, if there be any, who should have been but were not made parties to the action because they were not named in the Litigation Guarantee.

If a Preliminary Title Report is obtained, it must be upgraded to a Litigation Guarantee prior to condemnation. If a Litigation Guarantee is obtained, it must be updated to current status prior to condemnation.

© 1994-2025 California Department of Transportation. All rights reserved.

Title reports shall be required for all parcels except the following:

A. Parcels having a land value of $25,000 or less which do not involve access rights or improvements. The District may rely on an investigation of the condition of title as determined from County Assessor's and Recorder's records and other appropriate sources of title information.

B. Special cases involving donations of unimproved land valued up to $25,000 where improvements are not involved.

C. U.S. Government land controlled by either the Bureau of Land Management, Bureau of Reclamation, the Department of Indian Affairs, the U.S. Forest Service, or U.S. Military Reservations.

D. All land owned by the State (not including Cal-Vet loan property vested in the State) such as State School Lands, or lands under the jurisdiction of the Department of Transportation, Department of Parks and Recreation, etc.

   For those cases involving Items B, C, and D above, a RW Agent will prepare a Certification of Title (Form RW 08-14) (internal Caltrans link), addressing the same information as would normally appear in a title report. The certificate will be signed by the Acquisition Agent, or a Right of Way Engineer. If special circumstances warrant, title reports may be secured.

8.65.03.00 Use of Title Reports

Title Reports are used in the preparation of the following:

- Legal descriptions for deeds
- Appraisal Reports
- Right of Way Contracts
- Memoranda of Settlement
- Resolutions of Necessity Requests
- Summons, Complaint, and Lis Pendens
- Right of Way Schedules

© 1994-2025 California Department of Transportation. All rights reserved.

8.65.04.00 Service Contracts with Title and Escrow Companies

All services, including the issuance of preliminary title reports, litigation guarantees, and policies of title insurance, shall be in accordance with the terms of a service contract with a licensed Title and Escrow company. Title and Escrow contracts are required to be competitively bid.

- HQ RW will furnish Region/District Right of Way staff with a copy of the model contract approved for use by the Division of Procurements and Contracts (DPAC).

- Region/District Contract Manager (Contract Manager) will prepare a Service Contract Request Form 360 (Form 360).

- Contract Manager will then forward the Form 360 to RW Planning and Management for appropriate coding and required signatures.

  Contract Manager will electronically submit the completed Form 360 to DPAC.

- DPAC will notify the Contract Manager of receipt of the above submittal and the assigned contract number.

- DPAC will work with the Contract Manager to develop contract terms and a solicitation to advertise for the lowest responsive bid.

- After the solicitation is advertised, the Contract Manager can initiate contact with potential bidders to encourage their participation in the competitive bid process.

Service contracts will be issued for five-year periods. New orders for title services can only be placed against a Title and Escrow service contract during the first three years of the contract term. The last two years are available to close escrows and request policy of title insurance for parcels which have already had preliminary title work ordered during the first three years of the contract term.

A new five-year Title and Escrow service contract should be requested through DPAC approximately six months prior to the expiration of the new order period on an existing contract. This will ensure that a subsequent contract is in place at three years, so there will be no gap in ordering new title services.

© 1994-2025 California Department of Transportation. All rights reserved.

8.65.05.00 Certificate of Regularity

When the company calls for a Certificate of Regularity to establish sufficiency of probate proceedings, or other proceedings held outside the county in which the land is situated, the necessity of authorizing the procurement of such Certificates is discretionary with the Districts under any of the following circumstances:

A. When probate proceedings in question have been completed for 10 years or longer and the property in question was distributed by a Decree of Distribution. The Decree must be recorded in the Office of the County Recorder of the county in which the subject property is located.

B. When proposed payment by State for property is $2,500 or less. In all other circumstances, the Districts should authorize the procurement of such Certificates. The cost will be paid as part of the premium paid for the insurance of State's title.

8.65.06.00 Access Rights Endorsement Forms

A policy of title insurance, with the appropriate endorsement insuring relinquishment to the State of abutter's rights of access, must be secured on every transaction in which such rights are acquired.

The following endorsements have been approved and adopted by agreement between the Department and the California Land Title Association (CLTA) and its affiliated members:

A. CLTA Relinquishment of Abutter's Rights (Highway) Endorsement Form 106 is applicable to cases in which both fee title to land and access rights to and from grantor's remaining property are being acquired in the same transaction.

B. CLTA Elimination of Access by Condemnation Endorsement Form 106-C is a modification of Form 106 to show acquisition by condemnation rather than by executed instrument.

C. CLTA Relinquishment of Abutter's Rights (Highway) Endorsement Form 106.1 is applicable where access rights only are being acquired.

© 1994-2025 California Department of Transportation. All rights reserved.

D. CLTA Relinquishment of Abutter's Rights (Highway) Endorsement Form 106.1-C is a modification of Form 106.1 to show acquisition by condemnation rather than by executed instrument.

E. CLTA Relinquishment of Abutter's Rights (Highway) Endorsement Form 106.2 is a combination of Forms 106 and 106.1 and is to be used when State is taking a portion of the grantor's property in fee and the grantor is retaining land adjacent to the portion to be taken, but releasing access rights thereto. This form is also used when the owners of lands which abut upon land theretofore acquired for highway purposes are releasing their rights of access.

8.66.00.00 – CLOSING PROCEDURES

8.66.01.00 Segregation of Taxes on Partial Acquisitions of Properties Which are Locally Assessed

When acquisition is by deed and no suit filed, a request to segregate taxes on a partial acquisition shall be instituted immediately upon recordation of the deed conveying the property to the State. If a condemnation suit has been filed, see the Condemnation Chapter.

8.66.02.00 Segregation of Taxes on Partial Acquisitions Which are State Assessed

Utility properties, such as railroad, power, and telephone companies, are assessed by the State Board of Equalization at Sacramento and the Board will make the necessary roll changes.

The cost of preparing the map and the other necessary changes in records, often make it advantageous for the utility company to pay the taxes on the area conveyed rather than ask for cancellation. Request for segregation of assessments should be initiated by the Utility Company and not by the Department. The request to the local authorities for the actual cancellation should also be made by the Utility Company.

Statutes relating to refund of prepaid taxes and proration and cancellation do not apply to properties assessed by the State Board of Equalization.

8.66.03.00 Request for Refund of Prepaid Current Taxes

The District shall maintain a procedure whereby the amount of prepaid taxes paid by the State, on properties acquired through eminent domain, is refunded by the appropriate tax collecting agency. See the Condemnation Chapter.

When possession is taken under an Order for Possession (OP) and the parcel is later acquired by deed, the controlling date for the tax refund is the effective date of possession as set forth in the Order. When there is no Order, the controlling date is the recording date of the deed to State, or recording date of the Final Order of Condemnation (FOC), whichever applies.

© 1994-2025 California Department of Transportation. All rights reserved.

8.66.04.00 Notice for Removal of Property from Tax Rolls

Exhibits 08-EX-42 (internal Caltrans link) through 08-EX-46 are suggested for use in requesting clearance or cancellation of taxes and the segregation of those taxes in the event of a partial taking and should be used where property is acquired by negotiation. Exhibit 08-EX-47 (internal Caltrans link) is to be used with property acquired by judgment. Whenever an OP has been secured, it will be incumbent on the District to notify the appropriate taxing authorities by letter of this fact.

Some city and county taxing authorities will require other types of notices. The District must arrange with them, what notice they require to remove property conveyed to the State from the tax rolls. Grantors will then secure the tax reduction to which they are entitled, and property conveyed to the State will be removed from the tax rolls.

© 1994-2025 California Department of Transportation. All rights reserved.

8.67.00.00 – FILING OF COMPLETED TRANSACTIONS

8.67.01.00 Filing of Recorded Documents and Policy of Title Insurance

Upon completion of the acquisition, all original recorded or unrecorded Deeds, Final Order of Condemnation and the Policy of Title Insurance are to be retained in the District. Memorandum of Final Title shall reflect the escrow closing date and what documents are in the file (Form RW 08-15) (internal Caltrans link).

8.67.02.00 Notation on Right of Way Record Maps

All Deeds, Final Orders of Condemnation, Joint Use and Consent to Common Use Agreements, Abandonments, Relinquishments and Special Use Permits shall have noted thereon that proper entry of the document has been made on the District Right of Way Record Maps. The District shall have a stamp prepared for this purpose (the stamp to contain information setting forth date of entry on maps and party making entry).

8.67.03.00 Donated Deeds to be Labeled

In cases of donation of right of way or other interests, the deed or document by which such interest was acquired shall be labeled "Donation" on its face, and the fact of donation shall be referred to in Form RW 08-15 (internal Caltrans link).

8.67.04.00 Documents Affecting More Than One Acquisition

When a given document (e.g., a quitclaim deed) affects more than one acquisition, the deed numbers of all parcels affected by such document should be shown on its face for purposes of reference and identification.

© 1994-2025 California Department of Transportation. All rights reserved.

8.67.05.00 Statements as to Conditions of Title

If, between the date of the Policy of Title Insurance and the date of completion of Memorandum of Final Title, a change in condition of title affecting any of the exceptions shown in the policy has occurred, Form RW 08-15 (internal Caltrans link) shall include an explanation.

If, for example, an easement shown as Exception 3 in the Policy has been cleared by quitclaim deed recorded after the date of issuance of the Policy, a statement to that effect shall be included.

8.67.06.00 Right of Way Closing Record

When final distribution of funds has been made, a closing statement shall be placed in the parcel file itemizing all charges deducted from the purchase price and certified as true and correct. The closing statement shall contain the following certification, which is to be signed by the escrow officer of the company handling the escrow:

> "This is a true and correct copy of the closing statement submitted to the named grantor at the time we forwarded the check in the amount of the balance shown on the closing statement."
>
> _____
> Title Officer

8.67.07.00 Certification of Completion of Acquisition

After all necessary documents have been received and acquisition completed on all the parcels in an Appraisal Report, the District shall prepare a Certificate of Completion. It will certify that all parcels in that report have been acquired, have found to be unnecessary, or have been disposed of in some other manner. A brief explanation is necessary for each parcel disposed of by other than acquisition. This certificate shall be signed by the DDC-RW or delegate. The Region/District records must show the disposition of all parcels, including all advertising signs located on the parcels listed in approved appraisals.

© 1994-2025 California Department of Transportation. All rights reserved.

The certificate should be in the following format:

CERTIFICATE OF COMPLETION OF
RIGHT OF WAY ACQUISITION

Dist. ____ Co. ____ Rte. ____ KP (P.M.) ____ to KP (P.M.) ____ E.A. Termini (as shown in fiscal year Right of Way Program)

This is to certify that all of the parcels in the following appraisal report(s) have been acquired or otherwise accounted for:

Report No. ____ Date _____ No. of Parcels ____

_____
District Division Chief, Right of Way

Date _____

© 1994-2025 California Department of Transportation. All rights reserved.

8.68.00.00 – OTHER ACQUISITION PAYMENT REQUESTS

8.68.01.00 Payment Requests in Condemnation Cases

Payment for right of way may be made from capital outlay funds on court orders covering judgments in condemnation. The Districts are authorized to make such payment; however, Caltrans Legal should immediately advise District RW of this action by FAX. Right of Way will process the payment request by RW 09-20 (Condemnation Check Request – Invoice) (internal Caltrans link). The RW 09-20 shall contain complete information with respect to the identification of the condemnation suit, county, route and kilometer post (post mile), suit parcel number, expenditure authorization number, and amount of deposit.

A receipt for the amount paid and a certified copy of the judgment shall be obtained from the county clerk.

8.68.02.00 Miscellaneous Court Deposits

Payment requests for jury fees, court reporter, etc., require supporting documents such as invoices. Payment requests are processed through the Planning and Management office. A receipt should be obtained at the time the payment is made. Where a deposit covering court costs is made, the clerk of the court should be informed that the State Controller requires an itemized voucher for the exact amount of the disbursement and, therefore, it will be necessary to substitute an itemized and receipted statement in triplicate for the original receipt after the case has been tried and the actual amount and nature of the disbursement has been determined.

The detailed receipted statement for the net amount of the expenditure will be scheduled for reimbursement of the Revolving Fund Account.

A court refund of any unused balance of a deposit will be sent to Accounting.

© 1994-2025 California Department of Transportation. All rights reserved.

8.68.03.00 Deposit with Federal Housing Administration

All deposits made to the Federal Housing Administration, to cover appraisal expenses in connection with the securing of releases or reconveyances, will be advanced from the Revolving Fund Account, regardless of whether the cost of the appraisal is to be assumed by the State or by the grantor. Since the deposit required represents a fixed charge, no portion will be refunded. A receipt will be obtained for each deposit made.

Regardless of whether or not the State is to assume the expense, the Revolving Fund Account will be reimbursed by means of a claim schedule using the receipt as a voucher.

If the grantor is to assume the expense, the advance will be set up in accounts receivable.

8.68.04.00 Bid Deposits in Sales of Bankrupt Estates; Administrator's Sales; Payments for Tax-Deeded Lands

Advance payments or security deposits required in these three types of transactions will be advanced from the Revolving Fund Account and allowed to remain outstanding until final settlement has been determined and payment of any additional amount required has been made from the Revolving Fund Account. Then, the net amount of the expenditure will be scheduled for reimbursement of the Revolving Fund Account. Itemized receipts or vouchers must accompany reimbursement schedules.

See Sections 8.63.10.01 and 8.24.08.00.

8.68.05.00 Payment of Notary and Recording Fees

Notary fees may be advanced from the Revolving Fund Account when the fee is part of the consideration for property acquired or to be acquired. This has particular reference to donations of right of way by grantors, but is not necessarily limited to such cases if the assumption of the fee by the State is a part of the consideration for the execution of the deed or other instrument conveying or clearing title to property. The fact that the notary and recording fees are a part of the consideration must be specifically stated on the invoices when it is scheduled. The claim must be supported by a receipt from the notary. (See Section 8.24.08.00.)

© 1994-2025 California Department of Transportation. All rights reserved.

8.68.06.00 General Day Labor Expenditures

When work is to be performed by maintenance personnel in fulfillment of a right of way obligation subsequent to the completion of a construction project, payment shall be charged to the Right of Way Capital Program via Account 767, Interfunction Service Suspense. See Accounting Manual Chapter 10 (internal Caltrans link).

8.70.00.00 – DELEGATIONS

8.70.01.00 Delegations of Authority

As referenced in Section 2.05.01.00, the delegation matrix for Acquisition is noted below. The delegation matrix reflects the associated policy and RW Manual reference for each delegated item. The matrix also distinguishes whether an item is delegated to the District or Headquarters (HQ) level, along with the lowest level of sub-delegation authorized.

CHAPTER 9

CONDEMNATION
TABLE OF CONTENTS

9.01.00.00 EMINENT DOMAIN

01.00 General
02.00 Record of Condemnation Case Status
03.00 Condemnation Process
04.00 Notice of Intent to Adopt Resolution of Necessity
04.01 Notice of Intent to Adopt a Resolution of Necessity for Properties that are Subject to a Conservation Easement
05.00 Change in Notice
06.00 Grantor's Request for Appearance
06.01 Local Boards
07.00 District Condemnation Evaluation Meeting (Formerly known as First Level Review Hearing)
08.00 Condemnation Panel Review Meeting (Formerly known as Second Level Review Hearing)
08.01 Combined District Condemnation Evaluation and Condemnation Panel Review Meetings
09.00 Requesting the Resolution of Necessity
10.00 Submission of Request for Resolution
11.00 Preparation of Resolution
12.00 Specific Statutory Authority
13.00 Adoption of Resolution
14.00 Rescission of Resolution
15.00 Filing of Suit Within Six Months of Adoption

9.02.00.00 CONDEMNATION SUITS

01.00 Request for Suit Papers
02.00 Information Required for Suit Preparation
03.00 Suits Involving Public Utilities
04.00 Suits Involving Railroads
05.00 Filing Suit Papers
06.00 Recordation and Service of Lis Pendens
07.00 Filing Complaint and Issuance of Summons
08.00 Request for Segregation of Taxes on Partial Takings

9.01.00.00 – EMINENT DOMAIN

9.01.01.00 General

Eminent domain is the inherent power of government to acquire private property for public use. The owners of such private property shall not be deprived of their property without just compensation as provided in the Fifth and Fourteenth Amendments to the United States Constitution and Article I of the California Constitution.

Condemnation is the legal proceeding by which the power of eminent domain is exercised.

The Department may condemn property to be used for highway and related purposes by authority of Streets and Highways Code (SHC) Section 102. The California Transportation Commission (CTC) must first adopt a Resolution of Necessity pursuant to Section 1245.230 of the Code of Civil Procedure (CCP).

9.01.02.00 Record of Condemnation Case Status

The District Condemnation Unit, hereinafter referred to as District, maintains a record of the status of condemnation cases commencing with submittal of the District's Request for Resolution of Necessity to Headquarters. The record is kept current through the duration of the action.

9.01.03.00 Condemnation Process

The condemnation process requires continuous communication between the District, Legal, and HQ R/W. District Management's involvement early and often throughout the process is crucial to help identify and offer guidance for the resolution of issues. Respective roles and responsibilities are set out in the flowcharts in Section 9.16.00.00 at the end of this chapter. The flowcharts provide an overview of the process; the steps involved and the sequence of action may vary. In addition, the flowcharts outline actions taken by Legal that may not be discussed in this chapter.

Condemnation must be completed within a short time frame, and all eminent domain actions are subject to fast track rules that accelerate the process. (See Section 9.02.15.00.) Although timelines may vary depending on local court rules, the typical time frame should closely follow the indicated schedule.

© 1994-2025 California Department of Transportation. All rights reserved.

9.01.04.00 Notice of Intent to Adopt Resolution of Necessity

CCP Section 1245.235(a) states that "The governing body of the public entity may adopt a resolution of necessity only after the governing body has given each person whose property is to be acquired by eminent domain and whose name and address appears on the last equalized county assessment roll notice and a reasonable opportunity to appear and be heard on matters referred to in Section 1240.030." The District initiates condemnation by mailing a Notice of Intent to Adopt Resolution of Necessity to property owners whose property is required (Exhibit 09-EX-01 [internal Caltrans link]). The Notice must be signed by a senior level Right of Way Agent or above.

NOTICE REQUIREMENTS

- Include one of the following forms of property identification as "Exhibit A": Resolution of Necessity Maps and/or Legal Description,

  or

  Specific property address and appraisal map clearly showing property, or tax assessors map,

  or

  Department's Grant Deed

- Send Notice to owners listed in the last equalized county assessment roll, other verified owners of the real estate that are not identified on the tax rolls, and lessees and month-to-month tenants **only** if they own realty improvements within the acquisition area (as opposed to possessing a right to occupy) **and** are on the tax rolls.

- Serve or mail Notice no later than 30 days prior to the date of the meeting at which the CTC will consider the Request. Notices may be sent even earlier to accommodate an anticipated Condemnation Evaluation Meeting or Condemnation Panel Review Meeting and avoid rescheduling a selected CTC meeting.

- Personally serve or mail Notice First Class, Return Receipt Requested. If the owner refuses service or delivery, mail Notice First Class (without Return Receipt Requested). Prepare an affidavit detailing the steps taken to provide the required notification.

© 1994-2025 California Department of Transportation. All rights reserved.

If the owner(s) cannot be located with reasonable diligence, the Notice should be mailed to the last known address and to the person on the tax rolls at the address listed with the tax assessors. Documentation of all research to locate the owner must be included in the parcel diary. This documentation may be needed for inclusion in a Declaration of Due Diligence and, when signed by the agent, may be required as a support document for the Application to Publish (CCP 1245.230 and 1245.235).

9.01.04.01 Notice of Intent to Adopt a Resolution of Necessity for Properties That Are Subject to a Conservation Easement

In addition to the Department's standard Notice of Intent (Notice) requirement as outlined above per Section 9.01.04.00, CCP Section 1240.055 establishes additional Notice requirements for the acquisition of properties which are subject to a conservation easement. In order to comply with the provisions of CCP 1240.055, Exhibit 09-EX-01A (internal Caltrans link) shall also be used for these special types of acquisitions.

The Department shall provide notice (Exhibit 09-EX-01A [internal Caltrans link]) to the holder of the conservation easement not later than 105 days prior to the respective hearing in which a Resolution of Necessity (RON) will be sought for the subject property, or at the time of the first written offer, whichever is earlier. However, to comply with Federal Regulations, the conservation easement holder shall still be provided a reasonable time to consider the first written offer (at least 30 days) prior to sending out said Notice of Intent.

The intent of CCP 1240.055 is to encourage the parties to consult early in the process and assist in identifying potential and significant impacts of the proposed acquisition and the feasible alternatives or mitigation measures that will avoid or substantially lessen significant impacts on the conservation easement in order to avoid delays in the eminent domain proceeding. As a result, the following items are included in Exhibit 09-EX-01A (internal Caltrans link):

- A description of the public use or improvement that the Department is considering for the property subject to a conservation easement.
- That written comments on the acquisition, including identifying any potential conflict between the public use proposed for the property and the purposes and terms of the conservation easement, may be submitted no later than 45 days from the date the Department mailed the Notice of Intent to the holder of the conservation easement.

© 1994-2025 California Department of Transportation. All rights reserved.

- That the holder of the conservation easement, within 15 days of receipt of the Notice of Intent, shall do all of the following:

  - Send a copy of the Notice of Intent by First Class Mail to each public entity that provided funds for the purchase of the easement or that imposed conditions on approval or permitting of a project that were satisfied in whole or in part by the creation of the easement.
  - Inform the public entity that written comments on the acquisition may be submitted no later than 45 days from the mailing of the Notice of Intent.
  - Inform the Department of the name and address of any public entity that was sent a copy of the Notice of Intent.

- That the holder of the conservation easement (and any public entity who has been provided a copy of the Notice of Intent by the holder of the conservation easement) have the right to appear and be heard on the matter referred to in CCP Sections 1240.510 and 1240.610.

The Department, within 30 days after receipt of any comments from the easement holder or any public entity with regard to the acquisition, shall respond in writing to the comments via First Class Mail. Depending on the comments received, close coordination between the District Right of Way and Environmental offices will be required to adequately address and provide the Department's written response in a timely fashion.

Where property subject to a conservation easement is sought to be acquired, the Resolution of Necessity shall refer specifically to either CCP Section 1240.510 (compatible use) or 1240.610 (more necessary use) as the appropriate authority.

9.01.05.00 Change in Notice

If either of the following occurs, the District must immediately notify the owner(s) by mail that the Request will not be considered on the date of which they were notified and that a new Notice will be provided.

- If for any reason (such as a design change) information in a Notice or legal description already provided to the owner(s) ceases to be correct prior to adoption by the CTC.

- If the District elects to defer CTC consideration from the time set forth in the original Notice.

The District must provide a new Notice, subject to all of the above requirements, before a revised resolution request may be submitted for CTC consideration.

© 1994-2025 California Department of Transportation. All rights reserved.

A new Notice of Intent (Exhibit 09-EX-01 and/or Exhibit 09-EX-01A [internal Caltrans link]) is not required if CTC consideration has been deferred at the owner's request or if the owners request to appear results in a District Condemnation Evaluation or Condemnation Panel Review Meeting. The District must, however, provide written notification of the deferred date and location to the owner at least 15 days in advance of the new meeting. This notification should be in the form of a one-page letter informing the owner of the deferred date and location, and must have the original Notice of Intent as an attachment.

If the Notice was mailed and the date of the CTC meeting or the location is in error or has changed, a Correction Letter (see Exhibit 09-EX-06A [internal Caltrans link]) may be mailed in lieu of a new Notice. The letter should be sent by First Class Mail, Return Receipt Requested.

9.01.06.00 Grantor's Request for Appearance

If an owner believes that their property should not be required or that the transportation project should be modified to avoid their property, the owner may request an appearance before the CTC regarding the Resolution of Necessity. Pursuant to CCP 1245.235, this request must be made in writing and on file with the CTC within 15 days from mailing of the Notice. In response to the request, the District conducts a Condemnation Evaluation Meeting, and coordinates with Headquarters to facilitate a Condemnation Panel Review if necessary, which continues the negotiating process and assures that all issues are identified and resolved, if possible, prior to the CTC meeting.

In order for the Department to adequately address the owner's issues, it must fully review all proposals presented by the owner. Design and other functional units' responses to the issues raised during the negotiation process may vary in the level of analysis and consideration. To assure that the owner is receiving fair consideration and that the Department is presenting a credible basis for its design criteria, Right of Way agents are to document property owner specific issues and forward these issues in writing to the appropriate functional unit(s) for a written response to facilitate the agents' follow-up discussions with the property owner. By formalizing the response process, the issues, the consideration and justification or modification for the design will be clearly defined and conveyed to the owner at the earliest possible time in the negotiation discussions.

9.01.06.01 Local Boards

By statute, local government boards (City Council and County Boards) may at the request of the Department hear resolution of necessity requests on State Highway projects (Section 17.04.09.03 of this manual). The process is described in Exhibit 09-EX-08, "Resolution of Necessity (First and Second Level Reviews) Guidelines for Local Agencies Performing Work on the State Highway System."

For additional information regarding "Processing Department Resolutions of Necessity (RON) through the California Transportation Commission (CTC), County Board of Supervisors (Board), or City Councils (Council)," reference is made to Exhibit 09-EX-09.

9.01.07.00 District Condemnation Evaluation Meeting (Formerly Known as First Level Review Hearing)

The purpose of the District Condemnation Evaluation Meeting is to identify and resolve all property owner's issues, if possible, at the District Level. The District conducts the Condemnation Evaluation Meeting, which is attended by the District Director, Deputy District Directors from Design and Right of Way, and the owner(s) and/or their representative(s). The meeting should be limited to the appropriate functional managers, the Single Focal Point, and the Headquarters Design Coordinator. Other staff should be available on standby or by phone to be called upon as deemed appropriate to provide supplemental project information to the participants, if necessary. The Deputy District Director of Right of Way will chair the meeting. The Chair reminds the owner the CTC will only consider issues of project need, project design, and the necessity of purchasing the owner's property; the CTC will not consider issues of compensation.

If during negotiations the District determines that there is a high probability that the owner will request an appearance before the CTC, to facilitate project scheduling control the District Condemnation Evaluation Meeting may be held either prior to sending the Notice of Intent, or thereafter, but prior to receiving a formal request to appear by the owner. The decision to have the Condemnation Evaluation Meeting prior to sending the Notice of Intent will be considered on a case-by-case basis and requires the prior approval of a District R/W Manager. This is another option that allows the District total control and timing of the Condemnation Evaluation Meeting, and the opportunity to identify and find early resolution of issues with the property owner.

Prior to the Condemnation Evaluation Meeting, the District shall have a District Management briefing meeting with the District Director and/or other appropriate District Management personnel regarding all the issues related to the parcel, as well as a strategy for moving forward. Having a full understanding of the issues, alternatives,

© 1994-2025 California Department of Transportation. All rights reserved.

and the legal or design limitations will improve the decision process for District Management.

If after the Condemnation Evaluation Meeting the owner decides not to appear before the CTC, the owner must send a letter to the Executive Director of the CTC withdrawing their previous request to appear. The District may prepare the letter for the owner. An executed copy is forwarded to HQ R/W&LS.

9.01.08.00 Condemnation Panel Review Meeting (Formerly Known as Second Level Review Hearing)

The purpose of the Condemnation Panel Review Meeting is for the Panel to conduct an independent review of the project and its impact on the subject property, and to evaluate all issues brought forward. If issues concerning the adoption of the Resolution remain unresolved after the Condemnation Evaluation Meeting and the District's recommendation is to proceed with the project, District Design in coordination with Right of Way prepares an Appearance Information Sheet (AIS) and Fact Sheet. For additional information regarding these two documents, please refer to Appendix JJ of the Project Development Procedures Manual. These documents include a complete report of the Condemnation Evaluation Meeting and are sent to the Headquarters Division of Design (DOD) Chief, Attn: RON Appearance Request, Mail Station 28, with a copy to the Headquarters Division of Right of Way and Land Surveys (HQ R/W&LS) Chief, Attn: Office Chief R/W Project Delivery, Mail Station 37. This submittal, which is recommended by the District Deputy Directors from Design and Right of Way, and approved by the District Director, is the District's request to proceed with a Condemnation Review Meeting. The District Director's approval may not be delegated.

In response to this submittal, the Chief, Division of Design (or delegate), after consulting with the Chief, Division of Right of Way and Land Surveys (or delegate), may take the following actions: 1) Refer the request to the Condemnation Panel, to develop a recommended course of action for the Chief Engineer, or 2) Refer the project back to the District for additional design studies or modifications.

If the request for Appearance is referred to the Condemnation Review Panel to proceed with a Condemnation Panel Review Meeting, HQ R/W convenes the Panel. The standing Panel membership consists of the Division of R/W&LS Office Chief, Project Delivery; the Division of Design Office Chief, Resolutions of Necessity; and the Legal Division Assistant Chief Counsel, Real Property. To ensure scheduling flexibility, the standard Panel membership may be supplemented as necessary by the HQ Design Coordinators, the Assistant Chief of the Division of Design, the Assistant Chief of the Division of R/W&LS, or an attorney from the appropriate Region/District Legal Office. The R/W Panel member will act as the Panel chairperson and designate a Right of

© 1994-2025 California Department of Transportation. All rights reserved.

Way staff person to serve as the secretary to the Panel. Representatives from District R/W and Design attend the meeting, but are not members of the Panel.

Attendance at the Condemnation Panel Review Meeting shall include the owner and/or their representative(s), the Panel, the Panel secretary, the District Director and the Deputy District Directors from Design and Right of Way. The meeting should be limited to active participants and decision makers only. Department representation at this meeting should be minimized and limited to the managers listed, with potential expert presenters and other staff available on standby, if necessary. For locally funded projects or consultant-designed projects, the District may invite additional representatives to the Condemnation Panel Review Meeting to provide detailed information.

The purpose of the Condemnation Panel Review Meeting is for the Panel to conduct an independent review of the project, its impacts to the subject parcel, and to evaluate all issues brought forward. Should the Department be unable to reach mutual agreement with the owner, the Panel's review serves to validate that the proposed design provides the greatest public good while imposing the least private injury. This step is necessary in order to provide the Chief Engineer with an appropriate recommendation that will allow the Department to move forward with the Resolution of Necessity.

The Panel chairperson or designated secretary to the Panel will begin the Condemnation Panel Review Meeting by explaining the purpose of the meeting and the procedures to be followed. District Managers make a presentation to the Condemnation Review Panel and the owner describing the project using suitable maps and plan exhibits. This presentation shall be conducted by management level persons from both Design and Right of Way. The Design manager will present the design portion, and the R/W manager will present the real estate portion. The property owner will be asked to present their concerns about the project or the proposed acquisition as presented, along with any suggestions they may have to reduce or mitigate project impacts.

If issues remain unresolved at the conclusion of the Condemnation Panel Review Meeting, the Panel secretary in coordination with the Panel members prepares a Panel report and recommendation to the Deputy Director Project Delivery (also known as the Chief Engineer) for presentation of a Resolution of Necessity to the CTC.

HQ R/W prepares a package for the CTC that contains a Summary of Issues, Condemnation Review Panel Report, Fact Sheet, and Maps. HQ R/W notifies the owner by certified mail of the date, time, and location of the CTC hearing, and includes a copy of the same package created for the CTC.

© 1994-2025 California Department of Transportation. All rights reserved.

The District Condemnation Evaluation and Condemnation Panel Review Meetings shall be conducted separately to afford the District every opportunity to discuss the project and to negotiate a settlement with the property owner. The District Condemnation Evaluation Meeting must be held far enough in advance of the Condemnation Panel Review Meeting to allow adequate time for the District to consider and evaluate recommendations discussed at the District meeting, and provide a written response to the property owners addressing the issues they raised. Results of all evaluations are to be included in the Appearance Information Sheet (AIS) and the District's presentation during the Condemnation Panel Review Meeting.

9.01.08.01 Combined District Condemnation Evaluation and Condemnation Panel Review Meetings

The Chief Engineer has delegated the District Directors the authority to combine the District Condemnation Evaluation and Condemnation Panel Review Meetings for those projects where the property owner's issues are not related to the project's design. Exceptions to this are considered on a case-by-case basis and require prior documented support of both Chiefs of DOD and Division of Right of Way & Land Surveys. When this authority is exercised, the District Director shall provide in writing to the Chief Engineer, Attn: Chief DOD, a notice of the decision to combine the meetings and verification that the property owners' issues are not design related. The District will be responsible for notifying the Panel secretary to coordinate the Panel's participation at the combined meeting. The District also assumes the responsibility of preparing and finalizing the Appearance Information Package which includes the Panel Report (see Form RW 09-02), and to prepare the District Director or Deputy District Director to present the Department's draft CTC presentation to the Chief Engineer at the Resolution of Necessity Dry Run held in Headquarters. The Single Focal Point will coordinate the District's handling of the necessary deliverables and assessing potential risks for the District. The Chief Engineer will determine at the conclusion of the District's Resolution of Necessity Dry Run presentation if the "Resolution" is ready to move forward to the CTC for consideration. The Panel Report, which is approved by the Chief Engineer, is the Department's authorization to proceed before the CTC to obtain the Resolution of Necessity. The District is required to meet the Office of CTC Liaison's predetermined deadlines for submittal of documents and presentations, so book items can be finalized for the CTC's agenda (refer to current year Preparation Schedule).

Specific details regarding the Resolution of Necessity Process, procedures for performing the District Condemnation Evaluation Meeting and the Condemnation Panel Review Meeting, along with outlines and suggested formats for the Appearance Information Sheet and Fact Sheet are found in Chapter 28 of the Project Development Procedures Manual.

© 1994-2025 California Department of Transportation. All rights reserved.

Although the Resolution of Necessity process usually occurs well after most required project approvals have been obtained, its importance cannot be minimized. Projects have been delayed or modified as a result of property owner challenges. Careful and complete documentation of the project need and design throughout the entire project development process is essential. As such, District management's involvement early and often throughout the entire process cannot be overemphasized. The goal of the process is to find early resolution of issues that benefits both the public and the property owner, without the necessity of filing an action of eminent domain.

DISTRICT CONDEMNATION EVALUATION AND CONDEMNATION PANEL REVIEW MEETINGS

Responsible Party	Action
District	Sends notice to the owner of the CTC meeting at which the Resolution of Necessity will be considered. (See Exhibit 09-EX-01 and/or Exhibit 09-EX-01A [internal Caltrans link]).
Owner	Notifies the CTC of intent to appear at the CTC meeting to object to the Resolution of Necessity.
HQ R/W	Notifies the owner that consideration of the Resolution of Necessity by the CTC will be delayed pending further investigation. (See Exhibit 09-EX-03 [internal Caltrans link]).
HQ R/W	Asks the District to conduct a Condemnation Evaluation Meeting. (See Exhibit 09-EX-04 [internal Caltrans link]).
District	Notifies owner of the date, time, location, and purpose of Condemnation Evaluation Meeting. (See Exhibit 09-EX-05 [internal Caltrans link]).
District	Conducts meeting to brief District Management on all known issues prior to the Condemnation Evaluation Meeting.
District	Conducts Condemnation Evaluation Meeting. Provides follow-up letter to property owner to address the issues that were raised during the Condemnation Evaluation Meeting.
District	Design and R/W prepare an Appearance Information Sheet and Fact Sheet and submit to HQ Division of Design with a copy to HQ Division of Right of Way. See Chapter 28 of Project Development Procedures Manual **OR** — Obtains a written withdrawal of the owner's request to appear.

© 1994-2025 California Department of Transportation. All rights reserved.

DISTRICT CONDEMNATION EVALUATION AND CONDEMNATION PANEL REVIEW MEETINGS (CONTINUED)

Responsible Party	Action
District	R/W schedules the Condemnation Panel Review Meeting after coordinating with the Condemnation Panel members, the District managers, and the owner.
District	Arranges for a meeting location.
District	Notifies the owner by letter of the date, time, location, and purpose of the Condemnation Panel Review Meeting. (See Exhibit 09-EX-06 [internal Caltrans link]).
District	R/W coordinates with the Condemnation Panel for a field inspection of property (usually held the day of the Condemnation Panel Review Meeting).
Condemnation Panel	Conducts the Condemnation Panel Review Meeting.
District Managers	Makes presentation to the Condemnation Review Panel and the property owner at the Condemnation Panel Review Meeting describing the project and impacts to the subject property. The Design Manager presents the design portion and the R/W Manager presents the R/W portion.
District	Notifies owner of the date and location of the CTC meeting (see 9.01.05.00).
Condemnation Panel	Reviews statutory and Department requirements. If requirements are met, prepares the Panel Report and recommendation to the Chief Engineer to proceed with a Resolution of Necessity for presentation to the CTC.
HQ R/W	Prepares CTC package and notifies the owner by certified mail of the CTC hearing. (See Exhibit 09-EX-07 [internal Caltrans link]).

© 1994-2025 California Department of Transportation. All rights reserved.

9.01.09.00 Requesting the Resolution of Necessity

A separate Resolution must be obtained for each ownership. An ownership may consist of more than one parcel, but no more than one ownership may be included in a Resolution, Request, or Notice.

The legal and policy requirements below must be met for each ownership prior to submitting the Request to HQ R/W.

LEGAL AND POLICY REQUIREMENTS

- There must be an approved appraisal report on the property, and the full amount of that appraisal must have been offered. A "Waiver Valuation" is not an appraisal and cannot be used for condemnation purposes. It must be upgraded to an appraisal prior to requesting a Resolution of Necessity (see 8.01.08.00). In addition, a minimum value offer of $1,000 is required prior to submitting a request for a Resolution of Necessity (see 8.01.26.00).

- A reasonable number of acquisition calls must have been made on the property owner, and the owner must have been allowed a reasonable time to consider State's offer (49 CFR 24.102[f]). For most properties, no less than three personal calls and 30 days would be considered reasonable.

- Where improvements on the remainder or that straddle the right of way line are to be acquired, Acquisition must advise R/W Engineering of the necessity of including either the Condemnation Improvement Removal Clause or the Condemnation Improvement Severance Clause in the legal description. See 6.12.08.00, 6.12.08.01, and 6.12.08.02.

- A personal acquisition call must have been made on the owner within 30 days prior to serving or mailing the Notice. The owner(s) must have been advised that:
    - The State will proceed with condemnation and will serve or mail the Notice soon.
    - The owner has a right to appear before the CTC to be heard on matters referred to in CCP 1240.030; the CTC may not consider issues of compensation.
    - The owner must file a request to appear within 15 days of service or mailing of the Notice. Otherwise, the right to appear before the CTC will have been waived.

© 1994-2025 California Department of Transportation. All rights reserved.

LEGAL AND POLICY REQUIREMENTS (CONTINUED)

- A Notice (see Exhibit 09-EX-01 and/or Exhibit 09-EX-01A [internal Caltrans link]) must have been provided to all parties with an ownership interest in the real estate (see 9.01.04.00; 9.01.04.01).

- There must be an updated Litigation Guarantee for condemnation purposes, or a Preliminary Title Report must have been upgraded to a Litigation Guarantee. The Litigation Guarantee, Title Report, or Title Report Supplement must be current (no older than six months) at the time the Notice of Intent (NOI) is mailed. If a Title Report is used in lieu of a Litigation Guarantee, a Litigation Guarantee must be ordered at the time of mailing the NOI. An update of the Litigation Guarantee must be ordered after recording of the Lis Pendens. See Section 9.02.11.00.

9.01.10.00 Submission of Request for Resolution

The District should submit the Request for Resolution to HQ R/W a minimum of 45 days prior to the CTC meeting to ensure processing.

The CTC office semiannually establishes dates and locations of CTC meetings. HQ R/W sends this information to the districts as soon as it is available.

9.01.11.00 Preparation of Resolution

HQ R/W reviews the Request for Resolution based on information provided in the District's request package. Each package must contain the following items:

RESOLUTION REQUEST

- Resolution of Necessity (RON) Request (Form RW 09-08 [internal Caltrans link]) or, alternately, the electronic request from the RON Generator (for Department use only).
- Completed Request for Confirmation of Market Value (Exhibit 08-EX-05 [internal Caltrans link]).
- Copy of Notice of Intent.
- The legal description.
- Resolution of Necessity Maps: Index Map marked "Exhibit A" and detailed Resolution of Necessity Map marked "Exhibit B," etc.
- Declaration of Mailing or Affidavit of Service of Notice.
- Copy of the vesting page from a current (not older than six months from the time the NOI is mailed) Title Report or Litigation Guarantee.

© 1994-2025 California Department of Transportation. All rights reserved.

Per existing delegations, all Resolution Packages are to be approved by the Region/District Right of Way Manager prior to submittal to HQ R/W. Those portions of the package which will be published on any external-facing State-owned website must be ADA compliant before transmittal to HQ R/W. Compliance information and standards are available at Caltrans Web Accessibility for All (CWAA) (internal Caltrans link).

9.01.12.00 Specific Statutory Authority

See the list at the end of this section for a summary of condemnations for which specific statutory authority must be cited in the Resolution.

9.01.13.00 Adoption of Resolution

If the CTC votes to adopt the Resolution, HQ R/W immediately sends a notice to the District indicating the Resolution was adopted and follows up by sending the original and two copies of the Resolution. Headquarters Legal sends a certified copy of the Resolution to the Regional Legal Office.

9.01.14.00 Rescission of Resolution

The Region and District should request a rescission of a Resolution where it is impractical, due to design revisions or for other reasons, to pursue acquisition of a parcel based on the original resolution authorizing condemnation. This lessens the Department's exposure to inverse condemnation actions under the provisions of CCP Section 1245.260.

Regions and Districts will submit a request to HQ R/W&LS for rescission using the Resolution of Necessity request package format. This may be done manually or electronically. If a suit has been filed and subsequently dismissed, the date of dismissal should be included in the package.

The existing electronic RON Generator (for Department use only) contains an option to produce a rescinded Resolution of Necessity package using the same data input as would be used to create a request for Resolution of Necessity. The RON Generator automatically produces the language needed for the rescission package. This is the preferred method.

The manual method will include resubmitting all the data from the original Resolution of Necessity Request using Form RW 09-08 (internal Caltrans link). HQ R/W&LS will produce an electronic package using the resubmitted data and submit the request for rescission to the CTC. The original resolution item number, consent item language, ownership information, parcel number, map and legal description, explanations, etc.,

© 1994-2025 California Department of Transportation. All rights reserved.

are to be included for reference. If copies of the original resolution request are to be used for the resubmittal, the transmittal must clearly state that a rescission is being requested and provide a reason for the request.

The rescission will become a voting item on the CTC agenda of a specific month. Adoption of the rescission by the CTC removes the Department's right to condemn the subject property rights. If Regions or Districts subsequently decide to condemn the parcel, the Resolution of Necessity process must begin anew.

9.01.15.00 Filing of Suit Within Six Months of Adoption

The District should request a Resolution only if it intends to file a suit within six months after the Resolution is adopted. CCP Section 1245.260 provides that if eminent domain is not commenced within six months, the property owner may bring an inverse condemnation action. The court could require the Department to acquire the property, allow the owner to recover damages for any interference with the possession and use of the property, or both. It is important, therefore, that the District request, file, and serve suit papers as soon as possible after a Resolution is adopted. Or, if the suit is not filed within six months, the District must request rescission of the Resolution.

Note: To speed the filing process, the District should consider requesting the suit papers when issuing the Notice of Intent.

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – SUBSTITUTE CONDEMNATION

Explanation:
Whenever the Department requires property for highway purposes and the property is devoted to, or held for, another public use for which the power of eminent domain might be exercised, the Department may condemn substitute property to be exchanged for the required right of way if the owner of the required right of way consents in writing to the exchange.

When the Department acquires substitute property in its own name, relocates the public use, and then conveys the improved property to the owner of the required right of way, the Department is acting under CCP 1240.330. The Department must follow this procedure when either a court order, a judgment in eminent domain proceeding, or a written agreement requires the acquisition of substitute property that will be devoted to the displaced public use.

If the owner of the required right of way does not have the power to condemn substitute property, the Department must rely on either CCP 1240.330 or 1240.350. (See Form RW 09-10.)

If the Department is condemning property pursuant to CCP 1240.350 to provide utility service to, or access to a public road from, property that is not acquired for public use but that is cut off from utility service or public road access as a result of the Department's acquisition, the owner's consent is desirable, but not a prerequisite. However, the Department must take into consideration the cost and hardship to the owner whose property is to be condemned or acquired to provide the utility service or access.

Requirements:
It is necessary to set forth:

- Date and terms of the agreement between the Department and the other party.
- Degree of title owned by the other party.
- Degree of title the Department will condemn for exchange purposes.

In addition, the map forwarded with the Resolution Request shall delineate the right of way the Department will acquire from the other party.

The Resolution shall specifically reference CCP 1240.320. (See Form RW 09-09.)

The Resolution shall include a statement that the property is necessary for the purpose specified in CCP 1240.330, if applicable.

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – SUBSTITUTE CONDEMNATION (CONTINUED)

When the Department acquires rights for a utility company, care should be exercised to ensure the legal description includes all rights, restrictions, and limitations required by the company. As a general rule, the legal description should not provide for acquisition of greater rights than the utility company holds in its present right of way. However, special circumstances may dictate otherwise. For example, the PUC may impose higher standards on replacement construction. If the Regional Legal Office wants to amend the utility company's legal description for the Resolution, the Regional Legal Office and utility company should confer and agree upon the change.

Authority:
SHC 104(b)
CCP 1240.320
CCP 1240.330
CCP 1240.350

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION OF EXCESS LAND

Explanation:
If the Department proposes to condemn property that is excess to its needs, the property is classified as either a remnant or excess. (Condemnation of a remnant is discussed below.) The Department may acquire property as excess when the remainder or a portion of the remainder will be left in such size, shape, or condition as to be of little value to its owner or to give rise to a claim for severance or other damages.

Requirements:
CCP Section 1240.150 provides broad authorization for the Department to acquire remainders by a voluntary transaction or a condemnation action initiated with the owner's consent. If acquisition of only a portion of a property would leave the remaining portion in such shape or condition as to constitute an uneconomic remnant, the Department shall offer to acquire the entire property and may do so if the owner agrees. Since exercise of authority under this CCP section depends upon consent and concurrence of the owner, the language is broadly drawn to authorize acquisition whenever the remainder would have little or no value to its owner rather than little market value.

Authority:
Acquisition by any means is authorized under CCP 1240.150 when owner expressly consents.

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION OF EXCESS LAND – PARTIAL STRUCTURE

Explanation:
If the property is needed for public use and a structure is located partly on the property to be acquired and partly on other property, the Department may acquire the entire structure by agreement with the owner or by condemnation initiated with the owner's consent.

Requirements:
There are a number of alternatives available to the parties that may be less costly or more convenient than taking only part of the structure and paying severance damages on this basis. In some cases, severance may so destroy a structure that total demolition in one operation is the only economically or practically feasible alternative. The parties may also agree that the Department will purchase the structure and relocate it.

Authority:
CCP 1240.150

For authority to condemn the structure where the parties cannot agree, see CCP 1263.270 (court order to acquire entire improvement).

For other possibilities, see CCP 1263.610 (Department to relocate structure or perform other work for owner).

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION FOR COMPATIBLE USE

Explanation:
The Department may acquire property appropriated to public use if the proposed use will not unreasonably interfere with or impair the existing public use or future public use that can be reasonably expected.

Requirements:
The Resolution must specifically reference CCP section.

Authority:
CCP 1240.510

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION FOR MORE NECESSARY PUBLIC USE

Explanation:
The Department may acquire property appropriated to a public use if the Department's use is a more necessary public use.

The Department's authority under this CCP section will not prevent continuance of the appropriated use if such use will not unreasonably interfere with, impair, or require a significant alteration of the Department's project (see CCP Section 1240.630).

Requirements:
A Letter of Consent should be obtained. If not, the Department must be able to prove to the Court that its use is a more necessary public use than the use to which the property is appropriated.

A statement as to the more necessary public use is required.

The Resolution must specifically reference CCP section.

Authority:
CCP 1240.610

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION FOR FUTURE USE

Explanation:
The Department may condemn property for future use only if there is a reasonable probability that its date of use will be within seven years from the date the Complaint is filed or within such longer period as is reasonable. The date of use is the date the property is actually devoted to the use or project construction is commenced (i.e., the date the contract is awarded).

Requirements:
All projects, except Federal Advance Acquisition Fund projects and those requiring reasonably longer periods should be commenced within the seven-year period. The Resolution and Complaint must reference CCP 1240.220 and give estimated date of use.

If the project will be awarded within such longer period as is reasonable, and not within the seven years, the Resolution and Complaint must state that the acquisition is pursuant to Federal Highway Act of 1973 and give the estimated date of use.

Authority:
CCP 1240.210 through 1240.250.

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY –
CONDEMNATION OF AN EASEMENT TO REMOVE IMPROVEMENTS

Explanation:
See Manual Section 6.12.08.01, CCP Section 1263.270, and Form RW 09-12.

Requirements:
The legal description shall include the Condemnation Improvement Removal Clause.

Authority:
CCP 1263.270

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION OF AN EASEMENT TO SEVER IMPROVEMENTS AT OR NEAR THE RIGHT OF WAY LINE

Explanation:
See Manual Section 6.12.08.02.

Requirements:
Consent of the owner is required, and the legal description shall include the Condemnation Improvement Severance Clause.

Authority:
CCP 1263.610

© 1994-2025 California Department of Transportation. All rights reserved.

SPECIFIC STATUTORY AUTHORITY – CONDEMNATION OF REMNANTS

Explanation:
The Department may acquire property as a remnant when it would be left in such size, shape, or condition as to be of little market value. Owners may prevent condemnation if they prove the Department has reasonable, practicable, and economically sound means to prevent the property from becoming a remnant.

A taking of excess property is not authorized to:

- Avoid the cost and inconvenience of litigating the issue of damages.
- Preclude payment of damages, including substantial amounts in appropriate cases.
- Coerce the owner to accept whatever price the Department offers for the property actually needed.
- Afford the Department an opportunity to recoup damages or unrecognized benefits by speculating on the future market for the excess property. (See Form RW 09-11.)

Requirements:
Facts establishing the applicability of reasonable, practicable, and economically sound criteria should be specifically stated. Even where these criteria apply and consent of owner is not a condition precedent to the taking, the Department is required to seek such consent. The Regional Legal Office and District Right of Way should confer on any proposal to condemn as a remnant.

The request shall contain the following information:

- Area and value of the right of way including improvements.
- Area and value of the excess or remnant before acquisition.
- Value of the excess or remnant after acquisition.
- Amount of damages in excess of benefits if not acquired.
- Discussion of any new easements proposed for the excess land in the "after" condition.
- Reasons why there are not reasonable, practicable, and economically sound means to prevent the property from becoming a remnant.

Owner's opinion or reasons for refusing consent to acquisition.

Authority:
CCP 1240.410

© 1994-2025 California Department of Transportation. All rights reserved.

9.02.00.00 – CONDEMNATION SUITS

9.02.01.00 Request for Suit Papers

Immediately after passage of the Resolution by the CTC, the District requests the appropriate Regional Legal Office to prepare the papers necessary for filing suit.

One Resolution covering each ownership is mandatory, and a separate condemnation suit on each ownership is the normal practice. However, a multi-ownership condemnation suit is permissible when the District and the Regional Legal Office agree such action is desirable.

INFORMATION REQUIRED FOR SUIT PREPARATION

- Parcel Résumé
  - Brief parcel description.

- Staff Appraisal
  - Appraisal report prepared by District Appraisal staff.

- Appraisal Summary Statement
  - Appraisal Summary Statement prepared and signed.

- Title Reports
  - Furnish litigation guarantee report and supplemental reports bringing title up to date. Preliminary title reports must be upgraded to litigation guarantees prior to obtaining a resolution of necessity.
  - Make explanatory notations as to specific exceptions in the left-hand margin of the reports where title is to be taken subject to exceptions or the exceptions do not affect the parcel sought to be condemned.
  - A copy of the title exception identified as "excluded" by the agent may be requested by Legal to confirm that it is unnecessary to include the defendant identified in the exception.

© 1994-2025 California Department of Transportation. All rights reserved.

INFORMATION REQUIRED FOR SUIT PREPARATION (Continued)

- Title Reports (Continued)
    - Easements and other interests identified as exceptions in the Title Report/Litigation Guarantee which are excluded, due to the belief they are outside of the needed right of way, should be confirmed by Right of Way Engineering prior to note of exclusion by the Right of Way Agent. Make note on Title Report that exception was omitted with concurrence from Right of Way Engineering.

- Expenditure Authorization
    - Include the EA number below the file reference so the Regional Legal Office can apportion charges.

- Maps & Exhibits
    - Two copies of the identified exhibits are to be included in the suit request: one for the legal pleadings and one for the legal file.
    - **Legal Description** – a copy of the legal description that was approved as part of the CTC Resolution is included. The legal description is incorporated into the Complaint.
    - **Exhibit Maps** – the Maps which were submitted as part of the Resolution package must be included. The maps are attached as Exhibits "A" and "B," etc., in the Complaint. "Exhibit A" is the Index Map. "Exhibit B," etc., are the Parcel Maps.
    - **Appraisal Summary Statement** – the Appraisal Summary Statement is included as an Exhibit for the Summary of the Basis of the Appraisal.
    - **CA-13 (Transfer of Funds)** – is attached as an Exhibit for the Notice of Deposit in some County Courts.
    - **Copy of Certified CTC Resolution** – is attached as an Exhibit for the Declaration in Support of the Order for Possession in some County Courts.

© 1994-2025 California Department of Transportation. All rights reserved.

INFORMATION REQUIRED FOR SUIT PREPARATION (Continued)

- Names
  - Include full names of owners and tenants owning realty. Also identify and include full names of any persons, including spouses, actually in possession of the property or claiming an interest therein that do not appear in the title report so they can be properly named as defendants. Include lessees impacted by project if unrecorded lease and not in Title Report.
  - If vesting indicates a married person, as to his sole and separate property, the spouse must be identified and the name included in the interests not named in the Title Report. California is a community property State and all care must be taken to clear potential ownership interests.

- Taxing Agencies
  - Name counties only if they have interests other than *ad valorem* property taxes. Review CCP Section 1250.250 for specific requirements. (See also Sections 9.02.08.00 and 9.15.04.00.)

- Order for Possession
  - When requesting an OP, include the appraiser's name and qualifications to allow preparation of the Summary of the Basis for the Appraisal.
  - Segregate the summary as to value of the property to be acquired, severance damages, benefits, and goodwill, if applicable.

- Other Information
  - Include any other advice or information on the various exceptions that may assist the Regional Legal Office in the preparation of suit papers.

© 1994-2025 California Department of Transportation. All rights reserved.

9.02.02.00 Information Required for Suit Preparation

The District reviews the parcel legal description prior to requesting suit papers to assure it is identical to the legal description in the Resolution of Necessity. If the legal description differs from the legal description in the adopted resolution, a note needs to be included communicating why and how the descriptions differ. The information in the table on the preceding page is forwarded to the Regional Legal Office with the suit request, along with the declarations and staff appraisal.

The Index Map and Parcel Map submitted to headquarters in the resolution package are to be included in the suit request forwarded to the Regional Legal Office, as well as a copy of the Appraisal, Appraisal Summary Statement, Transfer of Funds, and a copy of the Certified CTC Resolution. The information in the table on the preceding page is forwarded to the Regional Legal Office with the suit request.

9.02.03.00 Suits Involving Public Utilities

Suits involving public utilities usually are not necessary, especially if the utility owns easement title. Arrangements normally can be made by using a Joint Use Agreement or Consent to Common Use Agreement that will satisfy all parties.

When fee-owned public utility land is necessary for a transportation project, a controversy may arise regarding valuation of the property or the type of interest the State is to acquire. If either is probable, the District should consult with the Regional Legal Office and R/W HQ Office of Project Delivery immediately.

If no agreement is reached and eminent domain appears likely, the District mails the Notice of Intent specifying the type of title to be condemned, i.e., fee reserving an easement to the utility or an easement out of the utility company's fee. The District must identify the relevant Code Sections to be included in the Resolution Request (see CCP 1240.320, 1240.330, 1240.510, and 1240.610).

The District should not presume that Rights of Entry with or without the waiver clause will always be available from the utility company.

© 1994-2025 California Department of Transportation. All rights reserved.

9.02.04.00 Suits Involving Railroads

Suits involving nonoperating property owned by railroad companies are handled like any other property.

If the required property is used for operating railroad purposes, consult R/W HQ before initiating condemnation procedures. Every effort should be made to avoid condemnation of railroad operating property by obtaining rights of entry and construction agreements. (See the Railroad Section of Chapter 8.)

When a project involves crossing the railroad right of way at grade or by a grade separation structure, the California Public Utilities Commission (PUC) must approve the construction. Approval of the PUC is subject to an agreement between the State and the railroad. Beginning July 1, 2003, the Division of Right of Way will prepare and process Service Agreements for grade crossings and Construction and Maintenance Agreements for grade separations. Although a suit can be filed and the Superior Court may grant an OP, construction cannot begin on the parcel until PUC approval has been obtained.

If the railroad disagrees with the State's plans for the project, the PUC will hold a hearing. The PUC hearing process can take six months or more to complete.

9.02.05.00 Filing Suit Papers

The Regional Legal Office prepares the following and forwards the originals to the District for filing and/or recording:

- **Summons and Complaint** – originals.
- **Lis Pendens** – original.
- **Application and Declaration for Order for Possession** – original, if requested.
- **Order for Possession** – original, if requested.
- **Notice of Deposit and Summary of the Basis for the Appraisal** – original, if requested.
- **Civil Cover Sheet** – original.
- **Declaration in Support of the Order for Possession** – original.

© 1994-2025 California Department of Transportation. All rights reserved.

Pursuant to Government Code Section 6103, the Department does not pay filing fees.

For purposes of determining date of value, suit papers should be filed prior to depositing the amount of probable compensation with the court.

9.02.06.00 Recordation and Service of Lis Pendens

Immediately after filing of the suit, the District must record the original Lis Pendens with the county recorder of each county in which the property affected by the suit is located. Service of the Lis Pendens is concurrent with service of the Summons and Complaint. (See CCP Section 1250.150.) Court rules and County Recorder's procedures vary in each county. The original Lis Pendens should be forwarded to the attorney upon receipt, as it is used as a trial exhibit.

9.02.07.00 Filing Complaint and Issuance of Summons

The District shall arrange for filing of the original Complaint and for issuance of original Summons by the clerk of the court within six months of adoption of the Resolution. In most cases, the county clerk acts in the capacity of the clerk of the court. The District retains the original Summons until such time as proof of service or return to the court is necessary. The original Summons must be submitted to the Court when filing a Default.

The District and the Regional Legal Office should confer on the safekeeping of the Original Summons to ensure it is not misplaced.

See Section 9.03.04.00 for return of original Summons to the court.

9.02.08.00 Request for Segregation of Taxes on Partial Takings

For partial takings of locally assessed properties, the District processes a request for segregation or prorating of taxes immediately after the taxes are subject to cancellation. This occurs on the effective date of possession as set forth in the OP or, in the absence of an OP, upon the recordation of the document (Deed or Final Order of Condemnation) conveying the property to the State.

© 1994-2025 California Department of Transportation. All rights reserved.

9.02.09.00 Conforming Copies of Summons, Complaint, and Lis Pendens

When filing the Suit Papers with the Court, it is recommended that the District submit the following to the Court:

- **Civil Cover Sheet, Summons and Complaint** – one original copy and at least one copy to be conformed.
- **Lis Pendens** – one original copy to be retained by the agent and at least two copies. The original and copies should be stamped by the Court to identify the case number and other identifying information which the County Court stamps (Judge, Department, etc.). Some Courts will retain a copy to be made a part of the Court file. This practice varies depending on the County and the Branch. The Original must be retained to be filed with the County Recorder. If the parcel crosses county lines, two original documents must be prepared so an original can be filed with the County Recorder of each county in which the parcel is located. The original must be stamped with the Government Code Section 6103 to alleviate the requirement of paying recording costs. Some Counties will require the paying of the recording costs. This is a courtesy which most counties honor; but due to budget shortages, some counties will require the payment of fees.
- **Application and Declaration for Order for Possession** – one original copy, one copy to be marked "received" and one copy for conforming.
- **Notice of Deposit and Summary of the Basis for the Appraisal** – one original copy, one copy to be marked "received" and one copy for conforming.
- **Order for Possession** – one original copy, one copy to be marked "received" and one copy for conforming to be left with the Court Clerk.
- **Ex-Parte Application for Order for Possession**

Before they are served on the defendants, each copy of the Summons, Complaint, and Lis Pendens must be conformed to agree with the originals. Maps must be inserted in the copies of the Complaint in the same manner and form as contained in the original. See Section 9.08.03.00 if an OP is also being served.

© 1994-2025 California Department of Transportation. All rights reserved.

9.02.10.00 Coordination with Regional Legal Office

The Regional Legal Office forwards copies of each pleading filed with the court or received by Legal to the District so that a complete file is maintained, or as agreed to by the District and the Regional Legal Office. The Regional Legal Office and the District should coordinate activities and maintain communications necessary to meet timetables required by the CCP or the courts. The District should advise the Regional Legal Office of the status of action and any settlements made through Right of Way Contract. The Regional Legal Office must be advised by the District immediately when escrow closes so the case can be dismissed.

9.02.11.00 Status of Title When Suit Is Filed

When the necessary suit filing procedures have been completed, the District orders a litigation guarantee report or supplemental report from the title company to show the condition of title as of the recordation date of the Lis Pendens. This permits a current review of the status of title to assure that all parties having an interest in the property are served. It is essential that status of title is current in the event of a withdrawal of deposit application. See Section 9.09.03.00.

9.02.11.01 Review Litigation Guarantee

The agent should review the updated litigation guarantee to identify additional interests to be added to the suit as "Does" (new defendants), and to identify exceptions which have been cleared and may be dismissed from the suit. The agent with the notations of new findings should send a copy of the update to the attorney of record upon receipt.

9.02.12.00 Suits with Orders for Possession

See Sections 9.03.00.00 and 9.08.00.00 for procedures to follow after the filing of the Complaint.

9.02.13.00 Rearrangement of Improvements Involved in Condemnation Action–Stipulations

After a condemnation action has been filed, expenditures shall not be made for rearrangement of buildings, fences, or roadways; restoration of water supply; changes in irrigation pipelines; construction of ditches; etc.; for the

© 1994-2025 California Department of Transportation. All rights reserved.

purpose of mitigating damage except under specific agreement (stipulation). The stipulation shall be executed by all parties who would have to execute an agreement for the sale of the property. The Regional Legal Office drafts the stipulation based on information provided by the District.

The terms of any partial settlement of a transaction shall be included in a stipulation to be filed in the proceeding. The stipulation shall provide that in the event of trial, the defendant will not claim damages for any of the items covered by the stipulation.

9.02.14.00 Memorandum of Case Status

Promptly after filing the suit, the Region or District completes a Condemnation Status Report in the form required by the Regional Legal Office. The memorandum is used regularly to transfer R/W information to the Legal Office for the suit. Regions and Districts will coordinate with the Legal Office to establish format, content, and scheduling of the memorandum.

9.02.15.00 Fast Track Procedures

9.02.15.01 General

The Trial Court Delay Reduction Act of 1986 (Fast Track) is intended to expedite the processing of condemnation cases through the court system. The Act is contained in the Government Code, commencing with Section 68600, and is implemented by Title 4 (Rule 1901-1914) of the Rules of Court. It requires that each county adopt rules to implement the Act. Each District should obtain the rules for its respective counties.

The program ensures that general civil matters filed in the Court are expeditiously pursued from filing to trial. To accomplish this early resolution of cases, the Court will monitor and, where necessary, direct the progress of proceedings.

9.02.15.02 Procedure

The Regional Legal Office has overall responsibility for compliance with the Act. Since procedures and forms vary from county to county, the District should check with the Regional Legal Office on procedures to be followed.

At the time the Complaint is filed, the case is set for a Case Management Conference within 120 days and may be assigned to a judge. At the time of

© 1994-2025 California Department of Transportation. All rights reserved.

the conference, the Court will review the status of proceedings and make orders necessary to ensure that the matter is ready for trial at the earliest possible date. Where appropriate, the Court will set the matter for further conferences.

Legal must file an At-Issue Memorandum in order to secure a trial date. The Court Executive Officer will set the trial within 90 days of the Case Management Conference, unless specifically ordered otherwise by the Court.

The Judicial Council of California has adopted two forms that are important in the implementation of the Act. They are "Notice of First Case Management Conference," Form DR-100, and "Case Management Conference Questionnaire," Form DR-110.

All the following documents must be served to all defendants within 60 days and proof of service returned to the court as soon as practicable.

- **Summons** – one endorsed copy.
- **Complaint** – one endorsed copy.
- **Lis Pendens** – one recorded copy of the Lis Pendens and one endorsed copy. The original is forwarded to Legal after recording is completed.
- **Notice of First Case Management Conference**

The Department is responsible for serving a copy of Notice of First Case Management Conference on each defendant and providing the Court with proof that such service was accomplished.

The following is suggested language to use as a Notice:

> In accordance with the California Rules of Court 1901 through 1914 and the Trial Court Delay Reduction Rules of _____ County.
> The matter is set for a Case Management Conference on _____. Pursuant to Rule 1905, this case is assigned to The Honorable _____.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.00.00 – SERVICE OF SUMMONS, COMPLAINT, AND LIS PENDENS

9.03.01.00 General

The DDC-R/W is responsible for arranging service. The District shall proceed with service unless directed by the Regional Legal Office to wait for their instructions.

9.03.02.00 Time for Defendant to Answer

After personal service has been made, the defendant has 30 days to appear.

9.03.03.00 Establishing Date of Value

The District shall promptly serve all defendants in the condemnation action when it is apparent negotiations have reached an impasse. The date of value is the date the complaint is filed (commencement of the action) if the case is brought to trial within one year of the filing. To retain the date of value, extended delays should not be allowed.

If the case is not brought to trial within one year, the date of value is the date the trial begins. Except, if the delay is caused by the defendant, the date of value is the date the complaint is filed. A date of value is also established on the date when a deposit of probable compensation has been made (CCP 1263.110 through 1263.150).

To reduce appraisal revisions, re-appraisals, or revising offers due to challenges of a fair market value offer (Government Code 7267.2), the deposit of probable compensation should be made after the suit is filed. This ensures that, if they so desire, property owners can immediately withdraw the amount deposited, which reflects current market value.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.04.00 Return of Summons

A condemnation action shall be dismissed and no further proceedings taken if Summons and Complaint have not been served and returned into court within three years from the commencement of the action (CCP Sections 583.210 and 583.250). Local "fast track" rules may require return of summons within a short period of time, e.g., 60 days, after commencement of the action. Violation of these rules may result in sanctions, including dismissal of the action if lesser sanctions are ineffective. Therefore, return of summons or other proof of service must be made to the Legal Office within 50 days so the documents can be filed with the court within 60 days. This requires the Right of Way Agent to check services of Summons, as shown by the condemnation record on any given action, sufficiently in advance of the expiration of the three-year period. This permits the service of any unserved defendants with whom settlement has not been made or who have not filed an answer or other appearance in the action.

As noted in Section 9.03.20.00, subsequent or additional Summons may be issued. However, an additional Summons does not extend the three-year period within which the Summons must be served.

In some cases, it may be necessary to publish Summons, ordinarily for 30 days. Time is required to investigate and prepare papers to obtain an Order for Publication. The defendant is allowed an additional 30 days after completion of publication to answer before a default can be entered. For these reasons, matters relating to service of Summons must be checked and final decisions made and implemented not later than two and one-half years (30 months) after the case has commenced.

9.03.05.00 Manner of Service

The District should make every effort to make service by personally delivering a copy of the Summons, Complaint, and Lis Pendens to the defendant or to a person authorized to receive service of process. Making service by leaving and mailing copies may be used when personal service has been unsuccessful.

The four methods of service of the Summons, Complaint, and Lis Pendens are listed below in "Methods of Service."

© 1994-2025 California Department of Transportation. All rights reserved.

METHODS OF SERVICE

- **Personal Delivery**
  A person may be served by personal delivery of a copy of the Summons, Complaint, and Lis Pendens to the individual or to a person authorized by the condemnee to receive service of process.

- **Leaving and Mailing Copies**
  In lieu of personal delivery on a corporation, association, or public entity, service may be made by leaving a copy of the Summons and Complaint in the office of the person who was intended to be served with the person apparently in charge during the usual office hours. Thereafter, copies should be mailed by First Class Mail, postage prepaid, to the person who was intended to be served at the place where the Summons and Complaint were left.

  Substitute service of an individual or person authorized to receive service is not available for individual defendants unless personal service was first attempted. (Two or three attempts to personally serve the defendant at a "proper place" ordinarily qualify as "reasonable diligence.")

  If a copy cannot be personally served upon an individual or a person authorized to receive service (or a minor or a conservator) with reasonable diligence and at least two or three attempts, a copy may be left at such person's house or usual place of business. A competent member of the household or a person apparently in charge of the place of business who is at least 18 years of age must be present at the time the copy is left. The person must be informed of the contents of the Summons, Complaint, and Lis Pendens. Thereafter, a copy must be mailed by First Class Mail, postage prepaid, to the person intended to be served at the place where the copy was left. (See Form RW 09-13.)

  As pertains to husband (H) and wife (W), personal service on Spouse W is not deemed service on Spouse H unless Spouse H authorized Spouse W to accept service on his behalf. The authority is based upon an oral or written statement by Spouse H. Spouse W's saying she has authority to accept service on behalf of Spouse H is not sufficient. Similarly, service on a person's lawyer is not sufficient if that lawyer is not specifically authorized to accept service in the action.

© 1994-2025 California Department of Transportation. All rights reserved.

- **Service by Mail**
  A copy of the Summons, Complaint, and Lis Pendens may be mailed by First Class Mail, postage prepaid, to the person to be served. A return envelope addressed to the sender, postage prepaid, two copies of a Notice and Acknowledgment of Service, and an unsigned copy of the Declaration of Mailing must be included. (See Forms RW 09-13, RW 09-14, and RW 09-16.)

  If the person to be served by mail fails to comply and return the acknowledgment within 20 days from the date of mailing, that person is liable for reasonable expenses incurred thereafter in serving or attempting to serve the individual by any other authorized method.

- **Service by Publication**
  If service cannot be made by any other authorized manner after reasonable diligence, service may be made by publication. See Section 9.03.13.00.

9.03.06.00 Service on Person Outside State

Besides all the other authorized methods of service, a person located or residing outside the State may be served by sending a copy by First Class Mail and obtaining a return receipt. Service of a summons by this form of mail (certified or registered mail with return receipt requested) is deemed complete on the tenth day after such mailing. (CCP Sections 415.40 and 417.20.)

9.03.07.00 Service on Minors, Incompetents, and Trustees

Although the following relates to making personal service on minors, incompetents, and trustees, the alternate methods of making service listed under Section 9.03.13.00 may also be used.

When service is made on a minor under the age of 18 but over the age of 12, a copy is delivered personally to the minor's mother, father, guardian, or, if no such person can be found with reasonable diligence, whatever person has care or control of the minor or resides with the minor. If the minor is under 12 years of age, service is made on the parent or guardian only.

© 1994-2025 California Department of Transportation. All rights reserved.

Where service is made on a person who has been judicially declared incompetent and for whom a guardian or conservator has been appointed, service must be made personally on both the incompetent and the guardian or conservator. In certain situations, the court can authorize dispensing with service on the incompetent for good cause.

When a named defendant is sued as a trustee and as an individual, service should be made in each capacity, i.e., one copy served on defendant as trustee and another copy served on defendant as an individual.

9.03.08.00 Service on a Corporation

Service on a domestic or foreign corporation is made by personally delivering a copy of the Summons, Complaint, and Lis Pendens to the president or other head of the corporation, vice president, secretary, assistant secretary, treasurer, assistant treasurer, general manager, or person designated for service of process or authorized to receive service of process. (See CCP Section 416.10, Corporations Code Section 1502.)

If service is to be made on a bank, the copy may be delivered to the above-enumerated officers, or agents thereof, or to a cashier or assistant cashier thereof.

CCP Section 412.30 requires that the copy of the Summons served on a corporation shall contain a notice stating in substance that the person served has been served on behalf of the corporation, which must be designated by name in the notice. An appropriate form of this notice has been incorporated in the Summons form under the title "Notice to the Person Served."

The summons itself must notify the person to whom it is delivered of the capacity in which he or she is being served or if he or she is being served on behalf of another. In an action against a corporation, partnership, or other unincorporated association, the summons form itself must notify the person to whom it is delivered that he or she is being served on behalf of a specific entity defendant (and also individually, if such is the case). It is not enough that the corporation or partnership is named as a defendant in the action. Nor is it sufficient that the process server tells the person served that he or she is being sued on behalf of the entity-defendant.

Consult with the Regional Legal Office for guidance in making proper service if a corporation has forfeited its charter or right to do business, has been dissolved, or is in bankruptcy.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.09.00 Service Where Appropriate Agent of Corporation Cannot Be Found

If the agent designated for service of process cannot be found with reasonable diligence, if no person has been designated, or if none of the officers or agents of the corporation enumerated in Section 9.03.08.00 can be found, service can be made by personal delivery to the Secretary of State after the necessary court order is obtained. The Regional Legal Office will prepare the necessary papers and have the proper order made.

9.03.10.00 Service on a Partnership or Unincorporated Association

CCP Section 412.30 requires that the copy of the Summons that is served shall contain a notice stating, in substance, that the person served has been served on behalf of the partnership or unincorporated association, which must be designated by name in the notice. Service is to be performed as shown in the following table. If questions arise concerning service, consult with the Regional Legal Office for guidance.

© 1994-2025 California Department of Transportation. All rights reserved.

PARTNERSHIPS OR UNINCORPORATED ASSOCIATIONS

Type of Association	Conditions	Service
General or Limited Partnership	Agent has been designated for acceptance of service of process with the office of the Secretary of State.	Serve the person so designated, a general partner, or the general manager of the partnership.
Not a General or Limited Partnership	Agent has been designated for acceptance of service of process with the office of the Secretary of State.	Serve that person, the president or other head of the association, vice president, secretary, assistant secretary, treasurer, assistant treasurer, or general manager.
Unincorporated Association	No person has been designated as agent for acceptance of service of process with the office of the Secretary of State or that person cannot be found at the address specified with the office of the Secretary of State and no person listed above can be found within the State after a diligent search.	Regional Legal Office must apply to the court for an order that service be made by delivering a copy of the process to any one or more of the association's members designated in the order and by mailing a copy of the process to the association at its last known address.
Unincorporated Association	No officer or other person on whom Summons may be served can be found within the State.	Regional Legal Office must apply to the court for an order authorizing service to be made by publication of summons.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.11.00 Service on Public Agencies

CCP Section 416.50 provides the following procedure for service on a public agency:

"(a) A summons may be served on a public entity by delivering a copy of the summons, and of the complaint to the clerk, secretary, president, presiding officer, or other head of its governing body.

"(b) As used in this section 'public entity' includes the state and any office, department, division, bureau, board, commission, or agency of the state, the Regents of the University of California, a county, city, district, public authority, public agency, and any other political subdivision or public corporation in this state."

The District should contact the public agency to determine who is authorized to accept service on behalf of the agency. Service on a public agency should include the Lis Pendens.

When another State agency has an interest, the Department's practice is to mail informational copies of Summons, Complaint, Lis Pendens and title report to that State agency and the Attorney General's office.

9.03.12.00 Service on Tax Collecting Agencies

It is not necessary to name a tax collecting agency in the complaint when its only interest is an *ad valorem* tax lien. However, a courtesy copy of the Summons and Complaint should be provided as notice for computation of the amount of tax to be paid out of the judgment. (See Section 9.02.08.00.) If prepaid taxes are involved, see Acquisition Section 8.04.24.00.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.13.00 Service by Publication

The law authorizes service by publication in the following cases:

- Defendant cannot be located with reasonable diligence.
- No person who may be served on defendant's behalf can be located.
- The identity of the defendant is unknown, e.g., there are heirs or devisees, or all persons are named as defendants under CCP 1250.220.

  (See Section 9.03.09.00 and CCP 415.50 and 1250.130.)

Publication is authorized under CCP Section 1250.125 even if the offer required by Government Code Section 7267.2 has not been made. This requirement is a prerequisite for securing a Resolution of Necessity. [See CCP Section 1250.125(c) for a conditional exception.]

The Department's practice is to publish Summons against those defendants who cannot be located even though the property in question may be of low value.

An Order for Publication of Summons must be obtained from the court. The Order will designate the newspaper or other publication in which the Summons is to be published as well as the period of publication. When publication is ordered, personal service of a copy of the Summons and Complaint on a defendant out of the State is effective on deposit in the post office, mailed to defendant at defendant's last known address. A service is complete at the expiration of the time prescribed in the Order of Publication and the date of deposit in the post office.

To obtain an Order for Publication, a Declaration or Declarations must be filed with the court to support the Order. These Declarations are required to show the court that all available means of locating and serving the defendant have been exhausted. Facts must appear in the Declarations indicating a sincere desire and honest effort to locate the defendant.

The statutes provide that reasonable diligence must be exercised in order to obtain an Order for Publication of Summons. Reasonable diligence means more than a perfunctory search and requires more than a casual inquiry of one or two former neighbors or a letter written at random. It means that a systematic investigation and inquiry must be conducted in good faith.

© 1994-2025 California Department of Transportation. All rights reserved.

Declarations must state the facts and not mere conclusions of law or fact. Hearsay is not acceptable, and the information should be recent. If the information is contained in a letter, the letter should be attached to the Declaration.

Statements relative to the last known address of a defendant will carry little weight unless the source of this knowledge is given. The Declaration should contain the names and addresses of all relatives, friends, or employers of the defendant interviewed and the dates of such interviews. It should contain information about the inquiries made at or around every place the defendant is known to have resided or been employed.

The Declaration must show a search of the latest city directory, telephone books, tax rolls, and register of voters was made, giving dates. In cases where a name similar to the defendant's is found, the Declaration must show inquiry about the defendant at the address given and must set forth the information obtained by such inquiry. If a name similar to that of the defendant is not found, the declaration must so state. The names and addresses for all persons contacted and the actual statements made by each person, not the declarant's conclusion therefrom, should be noted.

The District should give the facts pertaining to the search for the defendant to the State's attorney, who will prepare the necessary Declaration to be made by the agent. It is important that the search be made within a reasonable time of the filing of the Declaration. If the information is stale, the court will refuse to make its Order for Publication.

The publication of the Summons should be commenced immediately after obtaining the Order. The Order will require the Summons and Complaint to be posted on the property within 10 days of the order. In instances where the last known address is given, the Order will provide for the mailing of a copy of the Summons and Complaint to defendant at the last known address. A Declaration of Mailing is necessary.

9.03.14.00 Service by Publication—Unknown Defendants

CCP Section 1250.220 provides for effecting service on "all persons unknown claiming any title or interest" and "the heirs and devisees of (naming such deceased claimant), deceased." Consult the Regional Legal Office for procedure. (See Section 9.03.13.00.)

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.15.00 Service on Intervening Interest

The recording of the Lis Pendens furnishes notice to all persons of the pendency of the action. Any person who may acquire an interest in the property subsequent to the institution of the proceeding is bound by the judgment made therein. It is the Department's practice, when feasible and practical, to serve Summons and Complaint upon such person or persons who purchase or obtain any interest in the property under condemnation. This is done primarily to avoid the possibility of any adverse claim.

9.03.16.00 Service on Fictitious Defendants

A person or a corporation not named in the Complaint as defendant can be served under the provisions in the Complaint naming a fictitious defendant. If an interest is found that was not known at the time the suit was prepared, the person or corporation holding this interest can be served by designating such person or corporation by one of the fictitious names.

Service must be made on fictitious defendants in the manner in which they are named and sued in the Complaint. If Doe One to Doe Ten have been sued specifically as heirs of a deceased person, Doe Eleven to Doe Thirteen as trustees, and Jane Doe or John Doe as the unknown spouse of a listed defendant, these designations must be used when the true names are ascertained. In the event that a corporation is served as a "Doe," the summons must notify the person served that he or she is being served on behalf of a specific corporation, and that the corporation is being served as a specific "Doe."

The party making service on fictitiously named defendants must comply with CCP Section 474. The appropriate notice required is shown on the Summons under Notice to the Person Served. Reference to the appropriate type of service must be marked. If in the Complaint the numbers of the fictitious defendants are written (e.g., DOE ONE to DOE THIRTY), then the designation of the particular DOE NUMBER required in the above notice should also be written (e.g., DOE TWENTY, not DOE 20).

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.17.00 Proof of Service – Named Defendants

The District should send all Proofs of Service (Form RW 09-13) to the Regional Legal Office immediately after service has been made. The Regional Legal Office and District will coordinate to decide which office will take the lead in filing all Proofs of Service with the Court.

The name of the month should be written out instead of using numerals representing the month. The specific address of service should be shown. The number of the parcels in which the various defendants have an interest should be shown only on the copy of the Proof of Service.

The name of the defendant must appear in the Proof exactly as it appears in the Complaint and the Summons. If the name was incorrect or if the party has been sued under an erroneous name, the party should be served as one of the fictitiously named Doe defendants and the appropriate proof of service made. (See Section 9.03.16.00.)

When a named defendant is sued as a trustee, this designation should appear wherever the name does. If such a defendant is sued both as a trustee and as an individual, the Proof should show service upon each, just as the name appears in the Complaint.

9.03.18.00 Proof of Service – Domestic or Foreign Corporation, Partnership, or Unincorporated Association

If notice of the capacity in which a person is served is required on the copy of the Summons, the Proof of Service must recite that such notice appeared on the copy of the Summons that was served, per CCP Section 417.10. (See Section 9.03.08.00.) Since the form of Proof of Service includes an appropriate statement, it is important to verify that this notice was appropriately marked on the copy of the Summons served when signing the Proof.

9.03.19.00 Proof of Service – Fictitious Defendants

The Proof of Service upon a fictitiously named defendant must comply with the provisions of CCP Section 474 before the default can be entered. (See Section 9.03.16.00.) The form of Proof of Service includes an appropriate statement of proper notice being given.

© 1994-2025 California Department of Transportation. All rights reserved.

9.03.20.00 Subsequent or Additional Summons

If the Complaint has been filed, subsequent or additional Summons may be issued against any or all defendants on the request of the plaintiff. A plaintiff may secure the issuance of a Summons at any time up to the expiration of the three-year limitation on service and return of Summons. More than one Summons for a defendant may be outstanding at one time. No distinction is made between the original and subsequent or additional Summons.
If a Summons is lost after service has been made but before it is returned, its return is excused. CCP Section 417.30 provides that a declaration of the process server may be returned in lieu thereof. Consult the Regional Legal Office if it appears that an additional Summons may be necessary.

9.03.21.00 Service Complete

Personal service is complete at the time of delivery (CCP Section 415.10). Substitute service is deemed complete on the tenth day after the mailing (CCP Section 415.20). Service by mail and acknowledgment of receipt are deemed complete on the date the defendant signs the acknowledgment (CCP Section 415.30[c]).

9.03.22.00 General Information

As part of the "Notice to the Person Served," there is a place on the bottom of the front page of the summons form for the server of the summons and complaint to insert the date on which the summons was served. The purpose of entering this date is to assist the defendant in determining the due date of his or her responsive pleading. However, failure to enter the date does not affect the validity of service. (See CCP Sections 415.10 and 412.20[a].)

The person serving the summons and complaint should also obtain information that may later be needed to prove validity of service or to prove up a default. This information includes:

1. The full name of the person served, and, if such person is being served on behalf of a corporation or other entity, his or her office or capacity, and

2. If the defendant is in military service.

Federal law requires an affidavit or declaration that the defendant is not in military service before any default judgment can be rendered (Soldiers' and Sailors' Civil Relief Act of 1940, 50 USC Section 520). Since the acquisition

© 1994-2025 California Department of Transportation. All rights reserved.

agent is required to execute this portion of the request for entry of default, he or she may want to verify that the defendant is not in military service.

© 1994-2025 California Department of Transportation. All rights reserved.

9.04.00.00 – USE OF INDEPENDENT EXPERTS

9.04.01.00 Qualified Independent Experts

The District shall maintain records of individuals and firms qualified as experts in appraising property rights in their geographic area. These records shall show the education, experience, and other qualifications of each individual and firm. Although a contract may be entered into with a firm, the name of the individual must be designated to guarantee the report is prepared by a qualified expert.

9.04.02.00 Prequalification of Independent Experts

When it is necessary to contract for independent expert services with individuals or firms not previously qualified, Legal shall obtain from a candidate for qualification:

- A completed application for independent expert.
- An appraisal report previously prepared as an example of the expert's work.

Legal is responsible for approving the qualifications for all independent experts.

Legal's investigation of an expert's qualifications should reveal if an expert is already prequalified in another district. Information obtained by the other district may be useful in determining an expert's qualifications.

9.04.03.00 Time and Method of Selection

As soon as it becomes apparent an eminent domain complaint will be filed, the Regional Legal Office (specifically the assigned attorney) shall determine the experts needed for a specific case. While the District Condemnation Branch and the District Appraisal Branch may provide input on experts qualified to appraise the particular property, the assigned attorney has sole responsibility for contacting and selecting the independent expert witness whom he/she believes is qualified and available to render opinions in the case.

© 1994-2025 California Department of Transportation. All rights reserved.

9.04.04.00 Non-Civil Service Extended Employment

In exceptional cases, an independent expert may be employed on a per diem basis. This employment must be coordinated through the District Personnel Branch.

Time sheets are prepared for signature of the independent expert. The Regional Legal Office approves the total number of days for pretrial conference and court appearance, as well as the time spent for field investigation and appraisal preparation.

9.04.05.00 Use of Staff Independent in Lieu of Hiring Independent Appraisers

The Regional Legal Office and the assigned attorney should consider the use of staff independent appraisers where feasible and permissible under provisions of the Government Code.

© 1994-2025 California Department of Transportation. All rights reserved.

9.05.00.00 – CONTRACTS WITH INDEPENDENT EXPERTS

9.05.01.00 Contract Form

Standard contract forms are used to contract with independent experts for appraisal and expert witness services.

9.05.02.00 Contract Requirements

The table on the following page lists provisions that must be included in the contract when the expert is required to prepare a report and/or to act as an expert witness in a condemnation trial.

9.05.03.00 Rate of Pay

The expert is paid an hourly rate for preparation of the appraisal report up to a specified maximum fee. In establishing the hourly rate, the Regional Legal Office (specifically the assigned attorney) should consider the type and class of expert suitable for the particular assignment and the expert's current employment in other districts. Legal should estimate the number of hours required to complete the assignment, taking into consideration, but not restricted to, the following:

- State's appraisal of subject property.
- information on local economic conditions.
- available sales and listing information.
- whether the joint factual data system is to be employed.
- number of parcels involved.
- previous fees paid for view and inspection.
- if the expert has recently worked in the same neighborhood on similar types of property.
- any special estimates that may have been secured and paid for by the expert.

An estimate of the fee should then be based on the number of hours required, multiplied by the hourly rate.

© 1994-2025 California Department of Transportation. All rights reserved.

In addition, the expert is paid an hourly rate for additional services not within the scope of the original report, such as pretrial conferences with the State's attorney and appearances in court or at depositions. (A normal court workday consists of the regular hours the court generally is in session.)

Where the expert is employed on a strict hourly basis, the fee for services shall be based on the expert's ability as required for the specific case.

9.05.04.00 Responsibility for Final Terms and Proper Fee

The Regional Legal Office (specifically the assigned attorney) has final responsibility for determining the final terms of the contract and the proper fee for the report. In addition, he/she shall approve the appraisal fee and hourly rate before the contract is submitted to the expert.

9.05.05.00 Specialty Contracts

Contracts with independent specialty appraisers shall include attachments with specific instructions to assure that the specialty appraiser is aware of all report requirements. The real estate appraiser and the specialist should confer on the valuation after both have inspected the property. They should determine any differences of opinion on the function or utility of individual items of machinery and equipment and on the valuation procedure to be followed.

© 1994-2025 California Department of Transportation. All rights reserved.

CONTRACT REQUIREMENTS

Provision	Requirement	Explanation
Scope of Work	1. Description of property by Superior Court case number and parcel. 2. Date of valuation (as specified by State's attorney). 3. Statement of exact nature of the service to be performed.	Indicate if the services include preparation of an appraisal report, acting as an expert witness, or other valuation duties.
Report Format	The appraisal report format shall conform to the requirements of the Appraisal Chapter of the Right of Way Manual.	
Report Delivery	1. Date of report delivery. 2. Report delivery date may not be extended without written authorization by Legal or authorized representative. 3. Report shall be addressed to the Regional Legal Office, c/o of the assigned attorney.	If extension of the date for report delivery is necessary, the State's attorney makes arrangements and sends written authorization to the expert granting the extension.
Term	1. Beginning date and termination date. 2. Contract is of no force and effect until approved by the State. 3. Payment cannot be made for work performed prior to date of the agreement or after its termination date.	In establishing a termination date, the Legal should allow sufficient time for completion of the trial prior to termination of the contract. Legal should advise the expert that any work performed prior to receiving an executed copy of the contract is at the expert's own risk.

© 1994-2025 California Department of Transportation. All rights reserved.

CONTRACT REQUIREMENTS (Continued)

Provision	Requirement	Explanation
Payment	1. Total payment for all services, showing the fee to be paid for each parcel included in the contract. 2. Payment for the complete report. 3. A sum per hour for pretrial conferences with the State's attorney or additional services not within the scope of the original report. 4. A sum per hour for appearances in Court or at depositions as a witness.	Legal shall authorize additional services in writing. The expert shall act as a witness pursuant to directions from the State's authorized representative.
Termination	Statement that the expert must cease work at the State's request whereupon payment shall be prorated on the ratio of work completed to total work required to complete the report.	The expert shall furnish written documentation justifying prorated payment for completed work. If the parcel involved is acquired by negotiations, Legal must immediately notify the expert and District in writing so that unnecessary work is not done at State's expense.

© 1994-2025 California Department of Transportation. All rights reserved.

9.05.06.00 Contract to View and Inspect

If an OP is obtained and imminent construction requires the use of property, arrangements should be made with the experts to spend such time as necessary inspecting, measuring improvements, and taking pictures of the property prior to clearing the right of way. This is essential to ensure that experts are properly qualified to testify in court about the values and damages involved.

Type	Description
Scope	The contractor shall view, inspect, and take the necessary measurements, photographs, notes, etc., of the parcels described and notify the State's attorney of the completion of the assignment on or before a specified date.
Additional Services	The contract shall provide that the contractor will enter into an additional contract in the event services are required for a complete appraisal and testimony involving any or all of the parcels described.
Termination Date	The termination date for the view and inspect contract shall be sufficiently far enough in the future so the contract will still be in effect on the date the State might require the contractor's service in preparing a complete appraisal.

9.05.07.00 Amendments to Existing Contracts

An amendment is required if it appears a contract will expire before the required services are completed for reasons beyond the control of the contractor or if additional funds are required because the scope of work is enlarged. Legal submits an Amendment request in the same manner as an original contract request, and the amendment should be executed prior to expiration of the original contract.

It should be made clear to the contractor that additional work must be authorized in writing and with a mutual understanding of the nature of the work and approximate charge prior to performance.

© 1994-2025 California Department of Transportation. All rights reserved.

9.05.08.00 Date of Valuation

Generally, the date of valuation is the date of Deposit of Probable Compensation which should typically occur after the suit papers have been filed. If no deposit has been made and the trial commences one year after the filing of the Complaint, the date of valuation becomes the date of the trial, unless the delay has been caused by the defendant. If the trial commences within one year of the filing of the Complaint, the date of valuation is the date the Complaint was filed.

The value of the part to be acquired, any damages, and benefits are based on conditions at the time of the filing of the Complaint. Improvements made subsequent to the date of the service of the Summons and Complaint shall not be taken into account in determining compensation unless one of the conditions in CCP Section 1263.240 is established. If improvements are removed or destroyed, the general rule is that the person in possession bears the risk of loss. (See CCP Section 1263.230.)

9.05.09.00 Special Litigation Information

An independent appraiser should be impartial, not partisan. The State's attorney must rely heavily on the appraiser for advice and education on the technical problems of the case. While not concerned with the tactics of the case, the appraiser must be in a position to not only consult with the attorney on the forensic aspects of the litigation, but to point out any matters the attorney should be prepared to handle.

The entire report serves to assist the State's attorney in meeting with the adversary and rebutting their contentions. In addition, the appraiser should have information in their file not to be relied upon, but that might be of particular value to the attorney in this regard. Examples of matters that might be included are listed below:

- Sales the appraiser might have used except for special facts surrounding the transactions.
- Listings, offers, and options.
- Rents being asked for on the subject and comparable properties.
- Indications of the owner's valuation theory when in conflict with the appraiser's conclusions.
- Speculative matters not relied upon, but that should be known to the trial attorney.

© 1994-2025 California Department of Transportation. All rights reserved.

- All other matters that might be of assistance to the trial attorney, but not relied upon by the appraiser.

There are certain matters that cannot be relied upon by an expert as a basis for an opinion of value. These matters are listed in the Evidence Code Section 822.

9.05.10.00 Independent Appraisers

The independent appraiser shall not be given a copy of the staff appraisal, the Appraisal Summary Statement, the Valuation Summary Statement, or the value of the appraisal. It is imperative that the expert's opinion is impartial and not influenced by the staff appraisal.

If a copy of the Notice of Deposit is provided to the independent appraiser, the value should be blacked out.

9.05.11.00 Pretrial Settlements Over Approved Appraisal Amount

To meet State and Federal requirements for establishing and updating just compensation, the District will handle all settlements that exceed the amount of the approved staff appraisal as follows:

- Prior to filing of an eminent domain suit and hiring of an independent expert witness, any settlement for property that exceeds the amount of the approved staff appraisal is considered an Administrative Settlement (see Section 8.01.28.00).

- Once an eminent domain suit has been filed and independent expert witness has been hired, any settlement proposal based upon new appraisal data from the expert witness is considered a Legal Settlement (see Section 8.01.29.00). For Legal Settlements, an Attorney's Legal Settlement Memo must be received and approved prior to delivery of any payment. This does not preclude processing the check request (Form RW 09-20 [internal Caltrans link]) through the Division of Accounting as soon as settlement is confirmed.

© 1994-2025 California Department of Transportation. All rights reserved.

9.06.00.00 – CLAIMS AND PAYMENT

9.06.01.00 Requesting Payments for Independent Expert Claims

Independent expert claims are submitted on Form RW 09-18 in two stages:

- **Initial Claim** – for completion of the required report or special contractual assignment.
- **Supplemental Claim(s)** – for pretrial conferences, trial time, and authorized additional work.

If the report covers only one ownership, the initial and supplemental claims may be consolidated on the same form.

The District includes the expenditure authorization number and appropriate stamp in the upper margin for claims on Federal program projects.

9.06.02.00 Initial Claims

The expert must submit a single initial claim to cover all work not withdrawn by the State. Partial payments of the initial claim for partially completed reports are not allowed. Any deviation from this policy must be explained in Remarks. The District must not recommend payment for work not complying with accepted professional quality standards.

If the State withdraws parcels, the State and the expert must reach an understanding regarding the proper amount of the adjusted claim. The expert submits an invoice for the remaining contracted work in accordance with the contract and with the adjusted invoice amount.

9.06.03.00 Supplemental Payments

Pretrial conferences, trial time, and authorized additional work are billed after completion of all work required for single trial ownership. A single claim for all supplemental work performed for a trial ownership is preferred but exceptions may be allowed in protracted cases. A supplemental claim is not to cover more than one trial ownership.

© 1994-2025 California Department of Transportation. All rights reserved.

The description of additional work must specifically detail the type of work involved and the dates such work was completed. Sufficient substantiation must be included to show the work is outside the scope of the original report. The Continuations section or extra pages can be used if necessary.

The State's attorney certifies with a certification stamp and his or her signature any claims for Pretrial Conferences, Trial Dates, and Additional Work requested in Item B. The Legal contract manager audits and certifies all claims for additional work with the receiving record stamp, and approves payment of claims by signing the Receiver.

9.06.04.00 Right of Way and Legal Expert Witness Contract Process and Payment Guidelines

Refer to the following link for the current Right of Way and Legal Expert Witness Contract Process and Payment Guidelines:
The Right of Way and Legal Expert Witness Contract Process and Payment Guidelines (internal Caltrans link).

9.06.05.00 Business Goodwill Appraisal Experts

Business goodwill appraisals are no longer reviewed and approved by the Division of Right of Way and Land Surveys. The Department's four Legal offices have full discretionary power as relates to the use of contracted business goodwill appraisals that are intended to be used in support and preparation for litigation.

© 1994-2025 California Department of Transportation. All rights reserved.

9.07.00.00 – TRIAL PREPARATION PROCEDURES

9.07.01.00 General

It is Departmental policy to strive for settlement in each case, including the time during which the parcel is subject to condemnation proceedings. The assigned acquisition agent should attend all settlement and pretrial conferences.

9.07.02.00 Final Offer of Compensation to Defendant

Subsequent to trial, the Court may determine that the State's final offer of compensation was unreasonable and defendant's offer of settlement was reasonable in light of evidence submitted and compensation awarded. In this case, costs allowed to defendant shall include defendant's litigation expenses (CCP Sections 1250.410 and 1033.5). Litigation expenses include reasonable attorney fees, appraisal fees, surveyor fees, and fees of other experts.

A statutory offer, while made in contemplation of the possible exposure to litigation costs, is not to be justified solely on that basis. The CFRs must also be used to justify such an offer.

Since it is imperative that the required final offer reflect all the compensation in the proceeding, the DDC-R/W and the State's attorney must discuss and have complete understanding on all matters relating to the compensation in the proceeding. The State's attorney files and serves such final offer.

The District must observe the following procedures in cooperation with the Regional Legal Office.

© 1994-2025 California Department of Transportation. All rights reserved.

PROCEDURES FOR FINAL OFFER OF COMPENSATION

- The fee appraiser or staff independent appraiser submits the appraisal to the Regional Legal Office 90 days or more prior to trial.
- The Regional Legal Office forwards a copy of the appraisal to the District with a recommendation that it be authorized for use in negotiation or trial.
- The District may use the condemnation appraisal for either negotiation or trial purposes as authorized by Legal.
- Forty-five (45) days or more prior to trial, the State's attorney and the DDC-R/W, or authorized representative, determine whether it is in the best interest of the Department to file a final offer of compensation (statutory offer) with the Court in an amount that exceeds the authorized appraisal.
- The Regional Legal Office files the statutory offer at least 20 days prior to the date of the trial (CCP Section 1250.410). A statutory offer should be supportable by the CFRs and the Administrative Settlement guidelines. Said statutory offer shall include all elements of required compensation, including compensation for loss of goodwill, if any, and shall state whether or not interest and costs are included.
- If the final offer is accepted, the District R/W representative summarizes the discussions with the attorney in writing to support and document acceptance and settlement. This agreement may be placed in the Parcel file if no confidentiality is intended.

9.07.03.00 Photographs

The District should take sufficient photographs showing the condition of the subject property so the State's attorney will have a complete picture of its condition. The photographs should be taken prior to construction and conform to the date of the commencement of the action, as nearly as possible. The person taking the photographs should number them and keep a record of the date(s) taken.

9.07.04.00 Court Exhibit Maps and Engineering Expert Witness

The District provides R/W Engineering testimony and preparation of exhibit maps for use in the court trial. See the Right of Way Engineering Chapter 6, Sections 6.01.05.00 and 6.01.08.00, for additional information.

© 1994-2025 California Department of Transportation. All rights reserved.

9.07.05.00 Setting Case for Trial

A parcel in condemnation should be set for trial after all parties having an interest therein have been served, have filed appropriate appearances, or are in default. The DDC-R/W, or designated representative, is responsible for advising the Regional Legal Office to request that the parcel be set for trial.

9.07.06.00 Jury Fees

Once a jury has been demanded, it is the District's responsibility to ensure that jury fees are deposited with the court at least 25 days prior to the trial date. It is also the District's responsibility to ensure jury fees and court reporter fees are paid during and after a trial. County courts vary on their requirements of the paying of jury costs during the trial. If the costs must be paid on a daily basis, the District may use a credit card or a draft purchase order. If the Court is able to delay receipt of the costs until the trial concludes, obtain an invoice from the Court Clerk and order an expedited check. The District is responsible to deliver the check to the Court and obtain a receipt.

9.07.07.00 Other Court Deposits

Allowance of fees and payment procedures are included in Sections 8.01.35.00, 8.63.11.00, and 8.68.02.00.

© 1994-2025 California Department of Transportation. All rights reserved.

9.08.00.00 – POSSESSION PRIOR TO JUDGMENT

9.08.01.00 Order for Possession

The Department should not obtain an Order for Possession (OP) until physical possession of the property is needed for construction or related purposes. An OP may be applied for *ex parte* concurrently with filing of the Summons and Complaint papers or later. The Court issues the OP if it determines the Department is entitled to acquire the property by eminent domain and has deposited the probable compensation. An OP is supported by depositing probable compensation in the Condemnation Deposit Fund of the State Treasury.

Only one deposit is made on a case, regardless of the number and kinds of interests in the parcel. No deposit is made for fictitious defendants or any separate interest. The need for the OP and variations in amount requested from the approved appraisal must be explained.

A completed Request for Transfer of Funds (Form RW 09-19 [internal Caltrans link]) is sent to District P&M in sufficient time to allow for verification of funding availability and encumbrance of the required amount prior to application to the court for an OP. See Condemnation Flowchart Item 10. P&M transmits Form RW 09-19 (internal Caltrans link) to R/W Accounting to request issuance of CA-13, Notice of Transfer of Funds.

9.08.02.00 Issuance of Order for Possession

Based on information supplied by the District, the Regional Legal Office prepares a Notice of Deposit and Summary of the Basis for the Appraisal for signature by the Appraiser. The District inserts the date of the deposit of funds in the Notice using the CA-13 date. The Notice and Summary must accompany the Application and Order for Possession (also prepared by the Legal Office) when the District submits them to the Court. Actual appearance in court may be required in some jurisdictions.

The District requests a Superior Court judge to sign the OP submitting the CA-13, Notice, and the Application. The original OP is filed with the County Clerk, together with the Notice and the Application. The Court may ask to see the CA-13 when the OP is signed, or it may require the CA-13 to be attached as an exhibit for the Notice of Deposit in the County Clerk's case file. When the documents are filed, sufficient copies must be conformed and sent to the Regional Legal Office for service.

© 1994-2025 California Department of Transportation. All rights reserved.

9.08.03.00 Service of Notice of Deposit and Summary of the Basis for the Appraisal

The District makes initial service of the Notice if the OP is to be served at the same time as the Summons and Complaint. CCP Section 1255.020 requires such service to be made on all parties named in the suit in the same manner as provided in CCP Section 1255.450 for service of OPs. This fulfills technical service requirements set forth in CCP Section 1255.020.

Occasionally, it is necessary to serve the OP after service of the Summons and Complaint. Then, either the District or the Regional Legal Office serves the Notice in accordance with CCP Section 1255.450. This must be a joint determination to ensure an orderly process of service.

A court award draws interest from the date possession is to be taken, as specified in the Order. If any portion of the deposit is withdrawn prior to judgment, that portion does not draw interest.

9.08.04.00 Increase or Decrease in Amount of Deposit

The Department, or any other party having an interest in the property, may move to have the Court redetermine and order the appropriate deposit. Or, the Court on its own motion can order the deposit increased (CCP Section 1255.030). The District notifies the Regional Legal Office immediately when redetermination of the deposit is sought by the District, other party, or the Court.

If the deposit is to be decreased pursuant to CCP 1255.030 (a) and (e), the Regional Legal Office prepares a Notice of Motion for Order to Decrease Deposit and to Release Balance of Deposit to Plaintiff, at the request of the Condemnation Section. The District serves the Notice of Motion on all parties along with the Declaration in Support of Motion for Order to Decrease Deposit and to Release Balance of Deposit to Plaintiff. Decrease below the amount already withdrawn is prohibited by statute.

The State's attorney prepares the Motion and Order. After the Order is signed by the Court and filed, the District serves the Order on all parties.

© 1994-2025 California Department of Transportation. All rights reserved.

9.08.05.00 Deposit Initiated by Defendant

When the property to be acquired is a dwelling of not more than two units and at least one is occupied as a residence by a defendant owner, or the property is subject to a leasehold interest, the resident or the lessor may initiate a deposit. The resident or lessor serves a notice on the Department requiring the Department to deposit the probable compensation at a specified date and not earlier than 30 days after service of said notice. CCP Sections 1255.040 and 1255.050 provide certain sanctions against the Department if such deposits are not made. The District should contact the Regional Legal Office if it receives such a notice.

The Regional Legal Office will probably receive the notice and will forward the notice and request for deposit to the District to arrange for the deposit.

The Department may obtain an OP, if it chooses, 30 days after making a deposit under this section. The District should inform the Regional Legal Office whether possession is desired.

9.08.06.00 Conformed Copies of Order for Possession

Before being served on a defendant, each copy of the OP must be conformed to agree with the original as filed.

9.08.07.00 Preparation of Excess Land Inventory Record

The Condemnation Section, at the time of filing the OP, notifies the acquisition agent whenever excess lands are included in an OP. The acquisition agent must prepare an Excess Land Inventory and Disposal Record inventory card and forward it to the Excess Land Section.

9.08.08.00 Service of Order for Possession

The District is required to serve a copy of the OP on all record owners of the property and on all occupants, if any. A record owner is defined as the owner of the legal or equitable title to the fee or lesser interest in property as shown by recorded deeds or other recorded instruments.

© 1994-2025 California Department of Transportation. All rights reserved.

Service of the OP shall be made by personal service except as follows:

- If the person on whom service is to be made has previously appeared in the proceeding or been served with Summons in the proceeding, service of the OP may be made by mail upon such person and their attorney of record, if any.

- If the person on whom service is to be made resides out of the State, has departed from the State, or cannot with due diligence be found within the State, service may be made by registered or certified mail addressed to such person's last known address.

- The Court, for good cause shown on *ex parte* application, may authorize the plaintiff to take possession of the property without serving a copy of the OP on a record owner not occupying the property. In such cases, the District should immediately request the Regional Legal Office to obtain a Court order allowing the Department to dispense with service of the OP.

- A single service on or mailing to one of several persons having a common business or residence address is sufficient. For instance, service on husband or wife is sufficient for a family unit.

9.08.08.01 Time Requirements

If the property is lawfully occupied by a person dwelling thereon or improved as a farm or business operation, service of the OP and the 90-Day Notice (issued by the Relocation Assistance Section) may be made concurrently. When there is concurrent service, the effective dates of both documents must coincide. The Relocation Assistance Branch will serve a 30-Day Notice to Vacate at the end of the first 60 days of the Information Notice. Close coordination is required between Relocation and Acquisition to have the effective dates coincide. (See Section 10.03.10.00.)

In all other cases, service shall be made not less than 30 days prior to the time possession is to be taken. If uncertain, always give 90 days' notice. Service of the OP may be made at the same time as or following service of Summons.

© 1994-2025 California Department of Transportation. All rights reserved.

9.08.08.02 Circumstances

Service shall be made not less than 30 days prior to the time possession is to be taken pursuant to the Order under the following circumstances:

1. The Department has deposited probable compensation pursuant to a deposit initiated by an owner (CCP 1255.040 and 1255.050) **or**

2. The Department has deposited the probable compensation and the defendant in possession has either:

    - Expressed in writing a willingness to surrender possession of the property on or after a stated date, **or**

    - Withdrawn any portion of the deposit.

If the District seeks possession on either of the two conditions in 2. above, CCP Section 1255.460 requires that the OP:

- Recite that the OP is made pursuant to CCP Section 1255.460.

- Describe the property to be acquired. The description may be by reference to the Complaint.

- Include the date after which the Department is authorized to take possession. This can be the date requested by the defendant, or, if a portion of the deposit is withdrawn, not less than 30 days after the date the deposit was made.

9.08.09.00 Emergency Situations – No Appraisal

Emergency projects are those that preserve health, safety, welfare, or property. In emergency situations where there is insufficient time to complete an appraisal of a required property prior to the date possession is needed, Regions/Districts have the authority to approve use of an estimated compensation. The appraiser executes an affidavit stating:

- The reasons why possession must be obtained immediately.

- That an adequate appraisal cannot be made in time.

- The status and estimated date of availability of the appraisal.

© 1994-2025 California Department of Transportation. All rights reserved.

- A good faith estimate of the probable amount of compensation.

CCP Section 1245.230 requires an appraisal and offer thereof be made within 90 days of the adoption of a Resolution of Necessity. The Regional Legal Office prepares a motion requesting the Court to accept the estimated compensation as the deposit. The motion accompanies the Notice of Transfer of Funds, the OP, and the affidavit. The Court issuance of the OP requires compliance with the affidavit, which must be as accurate as possible.

9.08.10.00 Order for Possession – 3-Day Notice

The Court may make an OP to be effective in not less than three days and as it deems appropriate under the circumstances of the case if a deposit of probable compensation has been made and the Court finds:

- The Department has an urgent need for possession, and

- Possession will not displace or unreasonably affect any person in actual and lawful possession.

When asking the Regional Legal Office for a 3-day OP, the District shall state the justification. The Regional Legal Office prepares the Application, the Declaration, and the OP and sends them to the District. The designated Right of Way Agent shall review and sign the Declaration and follow procedures for filing the OP.

9.08.11.00 Declaration of Service of Order for Possession

Where service of the copy of the OP is by regular or certified mail, a Declaration of Mailing (Form RW 09-14) shall immediately be executed and transmitted to the Regional Legal Office.

Where a copy of the OP is personally served, the District sends the Proof of Service to the Regional Legal Office. The Declaration of Personal Service should state that the person served is a record owner or a person in possession.

© 1994-2025 California Department of Transportation. All rights reserved.

9.08.12.00 Notice of Tax Cancellation

Upon securing possession under OP, the District must notify the appropriate local taxing authorities of the action taken. (See Acquisition Section 8.66.04.00 for variations in notice requirements.)

9.08.13.00 Stay of Order for Possession Because of Hardship

Within 30 days of service of an OP, a defendant or occupant may request the Court to stay its Order and set a new possession date or impose terms and conditions on the property's use. The Court may do this upon a dual finding of fact, e.g., substantial hardship on the defendant or occupant versus the Department's need in seeking early possession. The Court may make an Order appropriate to the circumstances.

A defendant may make a motion to stay the Order, in which case the Regional Legal Office coordinates with the District to present evidence in support of obtaining the OP.

Where a person occupying property refuses to move by the possession date indicated in the OP, possession can be obtained through a Writ of Assistance. The District notifies the Regional Legal Office to initiate this process as necessary.

9.08.14.00 Disposing of Building Improvements on Property Under Order for Possession

The right to use the land under OP includes the right to dispose of improvements. The Property Management chapter includes instructions covering the issuance of Bills of Sale for such improvements. Right of Way Improvements and Personal Property Inventory and Disposal Record must be prepared at the time of obtaining possession. If there is a dispute as to whether an item is an improvement, the court can be asked to make a determination. (See CCP 1260.030.)

9.08.15.00 Owner Abandons Personal Property

If an owner refuses to remove personal property or abandons it, the District shall refer the problem to the Regional Legal Office. It may be necessary to arrange through a law enforcement agency for removal and storage of the personal property in a public warehouse for the account of the owner.

© 1994-2025 California Department of Transportation. All rights reserved.

9.09.00.00 – WITHDRAWAL OF DEPOSIT BEFORE JUDGMENT

9.09.01.00 Defendant's Rights

Under CCP Section 1255.210, a defendant may file and serve a verified application for withdrawal of all or a portion of the deposit. Defendant can also have the deposit invested for the benefit of all defendants upon proper motion to the Court (CCP Section 1255.075). Interest on the amount withdrawn ceases at the time of withdrawal.

9.09.02.00 Objections to Withdrawal

The Department has 20 days after receipt of service of the Application to object to the withdrawal or until the time for all objections has expired, whichever is later. The Regional Legal Office shall immediately prepare the necessary objection on verification from the District that there are currently other parties to the proceeding or parties believed to have interests in the property.

The Department may file an objection to the withdrawal when other parties to the proceeding are known or believed to have an interest or when the bond filed by the applicant (or sureties therein) is insufficient. The Court may require that a bond (undertaking) be filed when there are conflicting claims to the amount sought to be withdrawn or when the amount to be withdrawn exceeds the original deposit, which had been increased. (See CCP Sections 1255.230 and 1255.240.)

The Regional Legal Office must file the objection with the Court and serve the applicant within 20 days of receipt of service. Then the District must expeditiously serve all other interests with a notice advising that they may appear within 10 days of service of the notice to object to the application for withdrawal.

9.09.03.00 Application for Withdrawal of Deposit

Because of the limited time involved, the District must send, without delay, a verified application to the Court with a copy to the State's attorney. The application shows the applicant's interest in the property and the amount to be withdrawn. The State's attorney contacts the District to get the names and addresses of all parties having an interest in and/or possession of the

© 1994-2025 California Department of Transportation. All rights reserved.

property. Since this information must be provided at once, it is imperative that the District have a current title report or litigation guarantee. It is the District's responsibility to provide the address of all defendants to Legal. After receipt of the information, the State's attorney prepares a Notice of Application for Withdrawal of Deposit and Declaration of Service and serves it on the parties whose names and addresses are set forth therein. The Notice must be served in time for a return of service to be made to the Court within the required 20-day period.

At the time the suit is requested, the agent should provide to Legal a list of all recorded and unrecorded interests. The agent should identify which funds are to be allocated to a lessee and which amount to the owner. The attorney should be informed if the defendants are disputing allocation of funds.

9.09.04.00 Service of Application for Withdrawal and Declaration of Service

The Regional Legal Office prepares a Notice and Declaration of Service of Application of Withdrawal and forwards it to the District. The District serves the Notice and Declaration on all parties who have not previously appeared or who have not been served with a Summons. Service is by personal service unless the party resides out of state, has departed from the state, or cannot be found with due diligence within the state. Then, service may be made by registered or certified mail sent to such party's last known address.

The Regional Legal Office serves, by regular mail, those parties who have previously been served with a Summons or who have appeared in the proceeding and their attorneys of record. The service includes parties whose default has been entered, but not parties who have disclaimed or who have been dismissed.

The District shall forward the Declaration of Service to the State's attorney without delay once all parties have been served. The Regional Legal Office prepares a report of service and files and serves the report on the applicant. The report contains the names of parties served and the dates of service, as well as the names and last known addresses of parties known to or believed to have an interest but who have not previously appeared or who have not been served personally.

It is important that the Right of Way records reflect any withdrawal so the amount is credited when settlement is reached. The withdrawal must also be reflected in the record of deposits to assure that any subsequent Order

© 1994-2025 California Department of Transportation. All rights reserved.

authorizing withdrawal of Deposit directs the release of no greater amount than the balance remaining on deposit after payment of the earlier withdrawal.

The Court order to withdraw all or any portion of the amount deposited by the State will not include interest on such amount to the date of withdrawal. Payment of interest is made only after judgment has been rendered. Separate computations are necessary in all cases where a withdrawal has been made from the deposit. Interest is computed in the judgment on the principal amount of compensation from the OP date to date of payment of the amount withdrawn. A separate computation is made on the balance of the award from the date of withdrawal to the date of payment of the remaining balance.

9.09.05.00 Procedure for Withdrawal

After all notices are given, the Court holds a hearing to determine the amounts to be withdrawn and who shall withdraw them. If no other parties have an interest in the property, no hearing is necessary. If no party having an interest in the property appears and objects within 10 days after service of notice, all objections are waived and a hearing is not necessary.

The Order of the Court authorizing the withdrawal directs either the State Treasurer or the Court (County Clerk) to pay the amount authorized to the defendant or other persons determined to have an interest in the property. Prior to issuing payment, the defendant or other persons authorized to receive payment are to complete the Payee Data Record (STD. 204) (internal Caltrans link). This information is to be forwarded to the appropriate entity processing the payment request. Whether the Order is directed to the State Treasurer or to the County Clerk depends on whether the original deposit was made with the County Clerk or into the Condemnation Deposits Fund in the State Treasury. In most cases, the deposit is in the State Treasury (CCP 1255.070).

It is preferred that the State Attorney take the lead on the mailing of the Certified Order to the State Treasurer rather than have the owner's attorney do it. Payment is made as directed by the Order, usually to the defendant or defendant's counsel. The Department Cashier will provide the designated person in each district, as well as the State Attorney, with a copy of a Claim Schedule. Payment is made directly to the defendant or other parties authorized in the Order. The District should follow up on applications for withdrawal to determine whether such payments have actually been made.

© 1994-2025 California Department of Transportation. All rights reserved.

The State's attorney obtains copies of the Order and forwards one copy to the District.

9.09.06.00 Waiver of Defense

If any portion of the money deposited is withdrawn, the party waives all defenses to the action except a claim for greater compensation. The amount withdrawn shall be credited upon the judgment ultimately entered in the proceeding.

9.09.07.00 Waiver of Objection

If no other party has objected and there is no independent reason for the Department's objection, the Department's objection shall be waived when the Regional Legal Office forwards the Report of Service, Notice of Application for Withdrawal, and Declaration of Service to the Court. The Regional Legal Office shall file a copy of the waiver signed by the State's attorney with the Court and serve it on the applicant.

9.09.08.00 Deposit–Conflicting Claims to Amount Withdrawn

The Court must determine whether the applicant shall file a bond (undertaking) to secure a third party claimant. If the Court allows withdrawal and parties have not been served, the Court may require a bond by the applicant to indemnify the Department against liability. Unless the bond is required because of an issue as to title, the applicant can recover premiums paid as part of recoverable costs in the eminent domain proceeding.

9.09.09.00 Repayment of Amount of Excess Withdrawal

A party who withdraws an amount in excess of any entitlement, as finally determined, must pay the excess to the party entitled thereto. The Court enters judgment to that effect.

The judgment does not include interest except in the following cases:

- **Withdrawal by Another Defendant** – an amount to be paid to a defendant shall include legal interest from the date of its withdrawal by another defendant.

© 1994-2025 California Department of Transportation. All rights reserved.

- **Excess Withdrawal** – if the defendant who requested the Department to increase the original deposit has made an excess withdrawal, any amount of the excess attributable to the increased deposit shall be repaid to the Department including legal interest from date of withdrawal.

In the case of an excess withdrawal, the Court may grant a defendant up to one year to repay the Department. If the Court authorizes such delay in repayment, the District records an abstract of the judgment in the appropriate county. If repayment has not been made by the expiration of the authorized delay period, the District shall notify the Regional Legal Office. It determines the appropriate means to recover the excess withdrawn plus interest, if applicable.

© 1994-2025 California Department of Transportation. All rights reserved.

9.10.00.00 – JUDGMENT OF CONDEMNATION

9.10.01.00 General

The Regional Legal Office prepares the Judgment and forwards the documents to the District for filing with the Court.

9.10.02.00 Judgment by Default

The Department takes defaults in condemnation proceedings only after making a diligent effort to induce the property owner to answer. Prior to entering a default under any condemnation proceeding, the Regional Legal Office sends a letter to the property owner giving a final date for appearance.

The Court requires military affidavits before granting a judgment by default. The party serving the Summons and Complaint must obtain sufficient facts to thereafter make a military affidavit, if required.

9.10.03.00 Time of Paying Judgment

CCP Section 1268.010 requires the plaintiff to pay the full amount required by the judgment within 30 days after final judgment.

The District will make every reasonable effort to pay the amount of the award on the date the judgment is entered to keep payment of interest to a minimum. The District should not have the judgment signed until it is in a position to deposit the award, plus interest under OP if any, computed to the date the judgment will be signed and entered. If a motion for a new trial will be made by the State, State's attorney will request the District to delay making the deposit.

© 1994-2025 California Department of Transportation. All rights reserved.

9.10.04.00 Method of Paying Judgment

Payment is made by either or both of the following methods:

- **Payment of Judgment Directly to the Defendant** – any amount that the defendant has previously withdrawn shall be credited as a payment on the judgment.
- **Deposit of Money with the Court Pursuant to CCP Section 1268.110** – it is State's practice to pay the defendant directly rather than deposit into Court. The State may deposit with the Court when there are outstanding issues regarding settlement.

© 1994-2025 California Department of Transportation. All rights reserved.

9.11.00.00 – DEPOSITS AND SCHEDULES

9.11.01.00 Deposit of Award and Costs

The District makes two separate deposits and/or payments:

- **Amount of Award** – plus interest on possession (if any), computed to the date of payment of the award computed at the apportionment rate. (See CCP Sections 1268.310 and 1268.350.)

- **Amount of Defendant's Costs** – the State's attorney will advise the District of the amount of the property owner's legal costs. (See Section 8.01.35.00.)

9.11.02.00 Interest for Possession

If an OP is involved, the District pays the award, together with interest, to the party directed in the judgment. The payment may be made to the defendant, defendant's counsel, or to the court.

9.11.03.00 Interest on Award

Compensation, including damages, awarded in an eminent domain proceeding draws interest pursuant to CCP Section 1268.310 from the earliest of the following dates:

- The date of entry of judgment.

- The date the plaintiff takes possession of the property.

- The date after which the plaintiff is authorized to take possession of the property as stated in an OP.

The compensation award ceases to draw interest pursuant to CCP Section 1268.320 on the earliest of the following dates:

- The date the amount deposited as probable compensation has been withdrawn by the person entitled thereto.

- The date of deposit of the amount of the award.

- The date a person is paid the amount to which they are entitled.

© 1994-2025 California Department of Transportation. All rights reserved.

9.11.04.00 Offset Against Interest

If after the date interest begins to accrue (date of possession), the defendant continues in actual possession of or receives rent, issues, or profits from the property, the value of such possession and of such rents or other income is offset against the interest that accrues during such period. (CCP Section 1268.330[b]) Value of possession should be presumed to be the rate of interest on the compensation award for the period defendant continues in possession and receives rent or other income. The District gathers the necessary facts to determine whether an offset against interest should be made so this issue may be tried in the condemnation proceedings.

9.11.05.00 Payment of Judgment

When the judgment payment is deposited with the Court, the District must obtain a receipt from the County Clerk in order to obtain the FOC and to schedule payment of the judgment.

When the judgment payment is paid to the defendant or to the defendant's counsel, the District must have the party sign a receipt of funds and provide a satisfaction of judgment or partial satisfaction of judgment for the defendant or the defendant's counsel to sign. The District or Regional Legal Office will determine who will file the document once it is accepted.

9.11.06.00 Appeal or Motion for New Trial by Defendant – State in Possession

The District should deposit the amount of the judgment at time of entry of judgment to stop the accrual of interest. Except where the defendant has withdrawn the judgment award, the State should not obtain the FOC until the appeal is terminated and the judgment becomes final. Otherwise, the State would be responsible for creating a cloud on the title should the judgment be reversed.

It is particularly important that the Department not withdraw the deposit under an OP during the pendency of an appeal. If the judgment is reversed, State's possession would not be supported by the constitutionally required deposit.

© 1994-2025 California Department of Transportation. All rights reserved.

9.11.07.00 Scheduling of Judgments for Payment

To schedule payment for judgments, the district submits Form RW 09-20 (internal Caltrans link), Condemnation Check Request-Invoice, to R/W Accounting together with, but not limited to, the following items:

- **Judgment in Condemnation** – a certified copy specifying the amount of compensation to be paid by State.
- **Interest Calculation Worksheet** – one copy, if applicable.
- **Federal Participation Memo (Form RW 08-16)** – two copies.
- **Payee Data Record (Form STD. 204)** (internal Caltrans link)

Explain in detail any difference between the amount of the judgment and the amount being scheduled and not accounted for above.

A certified copy of the FOC is retained in District files. A certified copy is defined as a copy that has been formally certified by the County Clerk as a true and correct copy of the original on file. Endorsed or conformed copies are identical to the original, but have not been certified as true and correct copies.

9.11.08.00 Tax Identification Numbers

Requirements for securing Tax Identification Numbers in condemnation cases are identical to the regular acquisition procedures described in Manual Section 8.04.43.00. Every effort should be made to secure Payee Data Records for all condemnees.

© 1994-2025 California Department of Transportation. All rights reserved.

9.12.00.00 – FINAL ORDER OF CONDEMNATION

9.12.01.00 Recording of Final Order of Condemnation – Vesting of Title

CCP Section 1268.030(c) provides that title to the property described in the Final Order of Condemnation (FOC) vests in the State upon the date that a certified copy is recorded in the Office of the Recorder of each county in which the property is located. After the judgment has been entered and the judgment is paid, the Judge signs the FOC upon being shown the receipt for deposit or a signed, full Satisfaction of Judgment. A Satisfaction of Judgment signed by the defendant or defendant's attorney must be presented with the FOC if payment has been made directly to the defendant. Since payment for the property will have been deposited prior to issuance of the FOC, it is essential that the required certified copy be recorded immediately to vest title to the property in the State.

After the FOC is recorded, the Regional Legal Office prepares, serves, and files a Notice of Entry of Judgment, Deposit Pursuant to Judgment, and Notice of Recording of Final Order on all defendants or the defendant's counsel unless Notice has been waived in the judgment. If Notice is waived, a courtesy copy of the FOC may be mailed to the previous owner of the property.

© 1994-2025 California Department of Transportation. All rights reserved.

9.13.00.00 – SETTLEMENT AND DISMISSAL

9.13.01.00 Settlement by Judgment After Entry into Right of Way Contract

In some cases where a negotiated settlement has been made with a defendant through a Right of Way Contract, it may be necessary to secure a Judgment in Condemnation or a Default Judgment for technical or other reasons, such as clearing the remaining interest from title. Before Judgment in Condemnation is secured, a written agreement should be entered into with the defendant or the defendant's attorney providing for the cancellation of all contractual obligations included in the Judgment. Failure to do this creates duplicate obligations.

The Agreement of Cancellation should be executed in duplicate and distributed as follows:

- One copy to the defendant or the defendant's attorney.

- One copy affixed to the executed original Contract in the District file.

If the defendant, or the defendant's attorney, refuses to enter into such a written agreement, the District should submit complete information to the Regional Legal Office with a request for instructions on how to proceed to complete the acquisition.

A DM Series – Actual Possession clause must be included in the Deed whenever the State has the right to take possession under Court order or has taken actual possession through Right of Entry or OP. (See Section 6.06.11.00.)

9.13.02.00 Settlement by Right of Way Contract

Whenever a parcel included in a condemnation suit is settled by Right of Way Contract, the action shall be dismissed. If a deposit has been made for an OP, provision should be made for its release.

The District should not request a dismissal until it obtains consent from all attorneys who have filed an answer alleging an interest in the parcel and escrow has closed. The attorneys representing such interests should be advised of the proposed settlement and the provisions concerning the distribution of the payment.

© 1994-2025 California Department of Transportation. All rights reserved.

9.13.03.00 Settlement After Withdrawal of Deposit

Whenever a withdrawal of funds has been made by the defendant and a negotiated settlement is subsequently reached, the Contract shall include a provision wherein the defendant acknowledges receipt of the amount withdrawn as a credit to the State against the total payment provided for in the Contract. A similar provision shall also be included if settlement is by stipulated judgment.

9.13.04.00 Approval of Stipulated Judgments

The District will secure approval from HQ R/W before entering into a Stipulated Judgment whenever:

- The amount of the stipulation is substantially in excess of the highest value based upon an authorized appraisal report that would have been testified to if the action had proceeded to trial. Any limitations under current delegations will apply.

- When the proposed payment is not substantially at variance with the authorized appraisal report but where the settlement (with the exception of the form of the instrument) does not conform to the criteria and conditions for district-approved contracts. (See Acquisition Chapter.)

- When it is proposed to exchange noncontiguous excess land. (See Section 8.03.07.00.)

After approval is secured by letter, fax, or telephone, the District shall submit to HQ R/W a Memorandum of Settlement fully explaining the details of the stipulated settlement.

9.13.05.00 Release of Deposit – Settlement by Judgment

The Order for Release of Deposit can be filed with the Final Order of Condemnation. The District should notify the attorney of record upon payment of the judgment, as specified in the judgment, so the FOC and Release can be prepared.

© 1994-2025 California Department of Transportation. All rights reserved.

9.13.06.00 Abandonment of Proceedings

Under certain circumstances, the Department may abandon all or part of a parcel after suit has been filed. If an abandonment is contemplated, the District should consult with the Regional Legal Office.

© 1994-2025 California Department of Transportation. All rights reserved.

9.14.00.00 – DEPOSIT RELEASES

9.14.01.00 Responsibility for Release of Deposit

The DDC-R/W is responsible for the prompt release of deposits. The District should review the status of these deposits periodically to ensure release immediately following the vesting of the property in the State, regardless of whether title was acquired through Court proceeding or by deed.

9.14.02.00 Release of Deposit, or Cancellation of Deposit, After Filing of Suit

When a parcel is settled by a Judgment in Condemnation, the condemnation deposit is released by court order (Request and Order for Release of Deposit). The Regional Legal Office will prepare said document and will coordinate with the District, the responsible party, for the filing of the Order. It is preferred that the Order for Release of Deposit be filed concurrently with the Final Order of Condemnation. Three copies of the Order should be delivered to the Court. One of the copies is to be received by the Court along with a request that the Court certifies two copies of the Order, upon filing of said documents. The Division of Accounting, Cashiering Unit, requires two certified copies of the Order.

If the case is dismissed, the District is responsible to cancel the deposit. The standard release request form, RW 09-21 (internal Caltrans link), should be filled out canceling the deposit and stating the reason the deposit is canceled. The reason for the cancellation is identified on the form by checking the appropriate box. A court order is not required.

9.14.03.00 Cancellation of Deposit Prior to Filing of Suit

A condemnation deposit on a parcel settled by right of way contract or decertified prior to a case being filed needs to be canceled by the District. The standard release request form, RW 09-21 (internal Caltrans link), should be filled out by the District canceling the deposit. The appropriate box should be checked providing the Division of Accounting, Cashiering Unit, and the State Treasurer with the reason the deposit is canceled. The original form is then sent to the Division of Accounting, Cashiering Unit.

The standard release request form, RW 09-21, Release of Condemnation Deposit (internal Caltrans link), contains the necessary language for the District's affidavit; necessary explanatory data is added in the appropriate

© 1994-2025 California Department of Transportation. All rights reserved.

boxes. In addition, for stipulated and court-ordered judgments, two court-certified copies of the Request and Order for Release of Deposit must be included.

9.14.04.00 Processing of Order for Release of Deposit

The District shall transmit the Release of Condemnation Deposit (RW 09-21) (internal Caltrans link) and two certified copies of the Order for Release of Deposit, if applicable, to the Division of Accounting, Cashiering Unit, for processing. Accounting arranges for the transfer of the deposit from the Condemnation Deposits Fund to the State Transportation Fund. After this transfer has been made, the transaction will appear on the R/W Accounting Weekly Report, which is then forwarded to the District P&M Office to confirm the deposit has been released.

© 1994-2025 California Department of Transportation. All rights reserved.

9.15.00.00 – GENERAL CLOSING PROCEDURES

9.15.01.00 Ordering Policy of Title Insurance

After recordation of the FOC, the District shall secure a Policy of Title Insurance to insure the interests acquired by State.

9.15.02.00 Record of Condemnation

Upon completion of a trial, the District forwards a copy of the attorney's Trial Report to HQ R/W. Two copies of the MOS are forwarded to the Regional Legal Office. Trial Reports are required when there is a contested award. Trial Reports are not required for stipulated judgments, but written concurrence from Legal is necessary for all Legal Settlements. The District submits Supplemental Memoranda to HQ R/W as events occur covering retrials, appeals, or situations where the Court has amended the original verdict.

9.15.03.00 Improvements Acquired

The District lists improvements acquired through condemnation trial or secured under an OP on Right of Way Improvements and Personal Property Inventory and Disposal Record in the same manner as those acquired through Right of Way Contract. When improvements are acquired by condemnation but without an OP, the inventory is prepared concurrently with Page 3 (Alternate) of the MOS.

9.15.04.00 Prepaid Tax Cancellation

Prepaid current taxes on property acquired after the lien date, which would have been subject to cancellation if unpaid, are recoverable from the State. Money owed by the State for the tax refund is paid as part of the defendant's cost bill. The State arranges to recover this money from the taxing agency pursuant to the Revenue and Taxation Code.

When property is acquired by eminent domain, the following requirements apply to recovery of prepaid taxes:

- If the State has taken possession of the property prior to judgment, the property owner must claim payment for these taxes as part of the cost bill filed after judgment in condemnation.

© 1994-2025 California Department of Transportation. All rights reserved.

- If the State has not taken possession of the property prior to judgment, the property owner must claim payment for these taxes by means of a supplemental cost bill filed not later than 30 days after recording of the FOC. (See Section 8.66.03.00 of the Acquisition Chapter.)

9.15.05.00 Filing of Recorded Document

Procedures for filing of recorded documents are set forth in the Acquisition Chapter, Section 8.67.00.00, "Filing of Completed Transactions."

© 1994-2025 California Department of Transportation. All rights reserved.

9.16.00.00 – CONDEMNATION TIMELINE AND FLOWCHARTS

EMINENT DOMAIN LITIGATION TIMELINE

Month	Action
0	File summons, complaint, and order for possession, deposit amount of probable compensation
1	Contract for Independent Appraiser/Expert Witness
2	Complete service of summons, complaint, and order for possession
3	Answers filed by all defendants
4	
5	File joint at-issue memorandum
6	
7	Trial setting and status or case management conference
8	
9	Review for contract payment of independent appraisal
10	
11	Exchange of valuation data
12	Statutory final offer and mandatory settlement conference
13	Trial begins

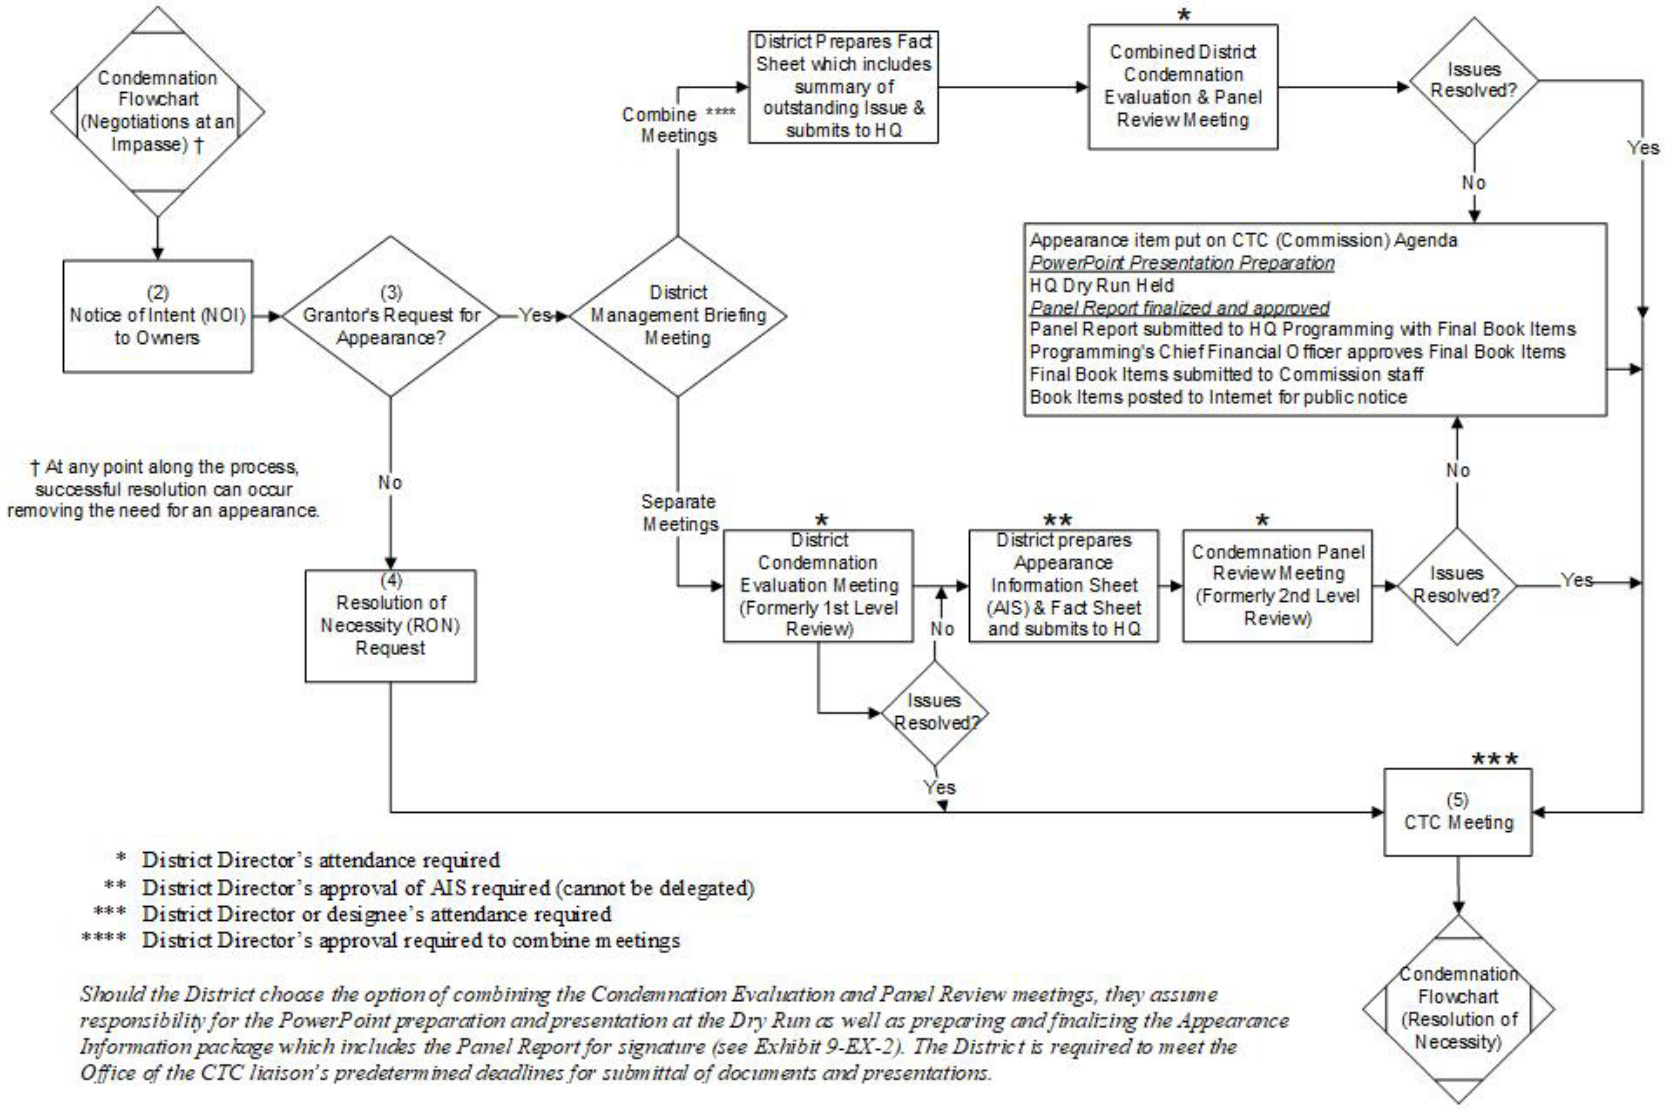
RESOLUTION OF NECESSITY (RON) APPEARANCE PROCESS FLOWCHART (Part 1A) †



* District Director's attendance required
** District Director's approval of AIS required (cannot be delegated)
*** District Director or designee's attendance required
**** District Director's approval required to combine meetings

Should the District choose the option of combining the Condemnation Evaluation and Panel Review meetings, they assume responsibility for the PowerPoint preparation and presentation at the Dry Run as well as preparing and finalizing the Appearance Information package which includes the Panel Report for signature (see Exhibit 9-EX-2). The District is required to meet the Office of the CTC liaison's predetermined deadlines for submittal of documents and presentations.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2)

Activity	Responsible Party	Summary of Responsibilities
1	District R/W Office	Requests documents from R/W Engineering. Also, requests litigation guarantee or update, if dated.
1a	District R/W Engineering	Prepares maps and legal descriptions.
1b	District R/W Office	Requests Appraisal Branch to confirm market value (Confirmation of Market Value Memo). Can be requested earlier.
2	District R/W Office	Makes decision to seek Resolution of Necessity. Determines parties receiving notice. Sends a minimum of 30 days prior to CTC meeting date (personal call required within 30 days of mailing). Checks maps and descriptions.
3	District R/W Office	If grantor requests an appearance, responsible for initiating the process and conducting the District Condemnation Evaluation Meeting; Having a District Management briefing meeting prior to the District Condemnation Evaluation Meeting; Preparing the Appearance Information Sheet and Fact Sheet. Setting up the Condemnation Panel Review Meeting, if required.

© 1994-2025 California Department of Transportation. All rights reserved.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2) (Continued)

Activity	Responsible Party	Summary of Responsibilities
3	District R/W Office	**OR:** If the District chooses to combine the Condemnation Evaluation and Condemnation Panel Review meetings, then the District is responsible for: Having a District Management briefing meeting; Preparing a Fact sheet, which includes a summary of the owner's outstanding issues; Setting up the combined Condemnation Evaluation and Panel Review Meeting.
	HQ R/W	Conducts the Condemnation Panel Review Meeting, if required, or the combined Condemnation Evaluation and Panel Review Meeting.
4	District R/W Office	Submits Resolution of Necessity request to HQ R/W a minimum of 45 days prior to CTC date. R/W Agent completes the form based on information from the map, the appraisals, and the parcel diary.
5	CTC	CTC adopts Resolution of Necessity.
6	HQ Legal	Sends certified Resolution to Regional Legal Office.
	HQ R/W	Sends original plus copies of Resolution to District R/W.

© 1994-2025 California Department of Transportation. All rights reserved.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2) (Continued)

Activity	Responsible Party	Summary of Responsibilities
7	District R/W Office	Compiles the necessary information required for Legal to prepare the Summons and Complaint and Lis Pendens documents (title report, appraisal, parcel diary, legal description and maps, and the CTC Resolution). **Note:** Compiling information, transmitting to Legal and preparation of suit papers can be done prior to passage of the CTC Resolution.
	Legal	Prepares the Summons and Complaint, Lis Pendens, and maybe OP documents.
	District R/W Office	Files Summons and Complaint and Lis Pendens, then records the Lis Pendens, deposits amount of probable compensation.
8	Legal	Hires independent(s)
8a	Legal	Legal and District R/W should hold a pre-appraisal conference with the hired witness to discuss the appraisal problem, legal concepts, etc.
9	District R/W Office	Completes services to all named defendants; completes proofs of service and submits to Legal.
	Legal	Checks proofs for completeness and correctness, and files with the Court.

© 1994-2025 California Department of Transportation. All rights reserved.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2) (Continued)

Activity	Responsible Party	Summary of Responsibilities
10	District R/W Office	Sends Legal the necessary information for preparation of the Order for Possession, Notice of Deposit, and Summary for Basis for Appraisal.
	Legal	Prepares the OP and related documents.
	District R/W Office	Files the OP and related documents with the Court.
11	District R/W Office	Submits Request for Transfer of Funds to District Planning and Management.
12	District R/W Office	Completes services to those who have possessory or equitable interests; completes proofs of service and submits to Legal. **Note:** If property is occupied, a 90-day Notice to Vacate must also be served. (See RAP Section 10.03.09.00 and 49 CFR 24.203 [c].)
	Legal	May sometimes serve by mail those who have possessory or equitable interests who were personally served Summons and Complaint and Lis Pendens. Checks all proofs for complete and accurate information.
13	Legal	Sends copies of Answer to District R/W Office. Requests Default and files Disclaimers, if necessary.
13a	Legal	Discovery on Special Issues in the "Answer" (such as: goodwill, delay, etc.).
14	Legal	Informs Court that case is ready for trial calendar.

© 1994-2025 California Department of Transportation. All rights reserved.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2) (Continued)

Activity	Responsible Party	Summary of Responsibilities
15	Legal	Court sets date for Disposition (Evaluation) Conference and Trial. Legal serves and files Demand for Exchange of Valuation Data within 10 days after trial is set.
16	Legal	Exchanges and deposits with Court—Expert Witness list and Statement of Valuation Data—90 days before trial.
17	Legal	Takes depositions of appraisers and other designated experts.
18	District R/W Office	Determines and approves the Statutory Offer based on all available data and Legal's recommendation.
	Legal	Serves and files the final offer at least 20 days before trial.
19	Defendant's Attorney	Defendant's attorney files final demand at least 20 days before trial.
20	Legal or District R/W	Deposits Jury fees with the Court 30 days before trial.
21	District R/W Office	If a Settlement Conference is scheduled, the Acquisition Agent/Senior attends and is prepared with a settlement proposal.
	Legal	Represents and advises District.

RIGHT OF WAY/LEGAL CONDEMNATION FLOWCHART (Part 2) (Continued)

Activity	Responsible Party	Summary of Responsibilities
21a	Legal	If settlement is reached by Stipulated Judgment, Legal prepares the documents and forwards to District R/W for the payment request to be initiated.
	District R/W Office	If settlement is by R/W Contract, agent prepares documents in same manner as for a regular transaction.
22	Legal	Parties present the Joint Issues Disposition Conference Report to the Judge.
23	Legal	Prepares for the trial. In some Districts, R/W Department assists.
24	Legal	Prepares the Judgment and sends draft to R/W so the payment request is initiated. Also prepares trial report for contested settlements and submits to District R/W for approval within 10 working days after conclusion of trial.
	District R/W Office	DDC-R/W approves the trial report. A copy is returned to Legal, one goes to Acquisition.
25	Legal	Prepares or defends against motion for new trial and/or Appeal.
26	District R/W Office	Prepares the necessary paperwork to enable payment processing by Division of Accounting.
27	District R/W Office	Delivers payment to defendant's attorney and obtains a receipt or, if applicable, deposits in Court. **Note:** For Legal Settlements, delivery of payment is to be made only after receipt and approval of Attorney's Legal Settlement Memo.

9.17.00.00 – DELEGATIONS

9.17.01.00 Delegations of Authority

As referenced in Section 2.05.01.00, the delegation matrix for Condemnation is noted below. The delegation matrix reflects the associated policy and RW Manual reference for each delegated item. The matrix also distinguishes whether an item is delegated to the District or Headquarters (HQ) level, along with the lowest level of sub-delegation authorized.

Reference (Statutory, WBS, Director's Policy, Deputy Directive, etc.)	**RW Manual Section**	**Responsibility**	**Delegation**	**Lowest Level of Sub-Delegation**
CCP §1245.235	9.01.04.00	Notice of Intent to Adopt Resolution of Necessity	District	Senior RW Agent
CCP §1245.230	9.01.11.00	Request for Resolution of Necessity Approval (RW 09-08 [internal Caltrans link]); or Alternately RON Generator (Electronic Format Approval)	District	RW Manager
CCP §1245.235	9.01.13.00	Provide District Notification of CTC's Adoption of Resolution of Necessity	HQ	Senior RW Agent
CCP §1255.010	9.08.01.00	Request for Transfer of Funds	District	Senior RW Agent
CCP §1245.230	9.08.09.00	Order for Possession – Emergency Situations – No Appraisal	District	Supervising RW Agent

10.01.00.00 – GENERAL

10.01.01.00 Relocation Assistance Program

This chapter covers procedures for implementing the Relocation Assistance Program (RAP) in accordance with applicable laws, regulations, and policies. The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (as amended), Title 49 Code of Federal Regulations (CFR) Part 24, Government Code 7260 et seq., and Title 25 California Code of Regulations 6000 et seq., serve as the basis for the policies and procedures of the California Department of Transportation (Department).

10.01.01.01 Purpose

The purpose of RAP is to ensure that persons displaced as a result of a state highway project are treated fairly, consistently, and equitably so that such persons will not suffer disproportionate injuries as a result of projects designed for the benefit of the public as a whole; and to ensure that the Department implements the Uniform Act and 49 CFR 24 in a manner that is efficient and cost effective.

All relocation services and benefits are administered without regard to race, color, national origin, persons with disabilities, religion, sex or age in compliance with Title VI of the Civil Rights Act (42 U.S.C. 2000d, et seq.), Title II of the Americans with Disabilities Act of 1990, Executive Order 12250, and the Age Discrimination Act of 1975.

10.01.02.00 Uniform Relocation Assistance and Real Properties Acquisition Policies Act of 1970 (as Amended)

Public Law 91-646, which is known as the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act), became effective January 2, 1971. For the first time, the United States had adopted measures to be uniformly applied whenever the federal government acquired real property or when property acquisition involved the use of federal funds.

© 1994-2025 California Department of Transportation. All rights reserved.

The Uniform Act sets minimum standards of benefits and compensation for relocation advisory and financial benefits, and established basic standards and requirements for appraisal and acquisition to be followed in acquiring real property. The Uniform Act is not an entitlement program, but rather a reimbursement program to assist in relocating to a new site.

10.01.02.01 Title 49 Code of Federal Regulations Part 24 (49 CFR 24)

The CFRs provide the rules that must be followed in order to comply with the law. 49 CFR 24 ensures Uniform Act compliance. Its purpose is:

> *To provide for uniform and equitable treatment of persons displaced from their homes, businesses, or farms by Federal and federally assisted programs and to establish uniform and equitable land acquisition policies for Federal and federally assisted programs.*

Compliance with the Uniform Act is required for all projects on the State Highway System (regardless of funding source), all federal-aid projects, and all Local, Streets and Roads (LS&R) projects (also referred to as "Local Grant," "Local Entity," "Local Assistance," or "Off-System" projects. See 17.01.01.04.).

The policies and procedures in this chapter will ensure that all persons impacted by a public project are treated fairly and equitably. Further, the uniform application of these policies and procedures will prevent fraud, waste, and abuse of the Department's resources. Periodic reviews of delegations, quality, and compliance are conducted to ensure full compliance (49 CFR 24.4[c]).

Note: Appendix A of 49 CFR 24 is an integral part of the regulations; and, while it does not impose mandatory requirements, it does provide additional guidance and information concerning the purpose and intent of a number of provisions in Part 24.

The Uniform Act was previously amended on July 6, 2012. Many of the changes went into effect on October 1, 2014.

The Uniform Act was most recently amended on May 3, 2024, and went into effect on June 3, 2024. This Chapter includes all new requirements contained in the Uniform Act effective June 3, 2024.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.02.02 Compliance with Other Laws and Regulations

The application of this chapter must be in compliance with other state and federal laws and regulations including, but not limited to, the following:

a) California Government Code
b) California Code of Regulations
c) California Code of Civil Procedure
d) California Health and Safety Code
e) California Streets and Highways Code
f) Civil Rights Act of 1866
g) Civil Rights Act of 1964
h) Civil Rights Act of 1968
i) The National Environmental Protection Act of 1969
j) The Rehabilitation Act of 1973
k) The Flood Disaster Protection Act of 1973
l) The Age Discrimination Act of 1975
m) Executive Order 11063, as amended by Executive Order 12892
n) Executive Order 11246
o) Executive Order 11625
p) Executive Order 11988 and 11990
q) Executive Order 12250
r) Executive Order 12630
s) Robert T. Stafford Disaster Relief and Emergency Assistance Act
t) Executive Order 12892
u) The Fair Housing Act

Many of the related Federal codes for these can be found under 49 CFR 24.8.

10.01.03.00 Displacements

Any person, household, business, farm, or nonprofit organization displaced by a public project may be entitled to relocation benefits if they are in occupancy of the property being acquired at the time of the Initiation of Negotiations (ION). Persons and entities displaced by a project and determined to be eligible for benefits are classified as a "displacee."

In some cases, the occupants of the property to be acquired may need to relocate prior to the ION. The Region/District may issue a Notice of Intent to Acquire (NIA) to the owner-occupants to preserve their relocation benefits (10.01.08.01).

© 1994-2025 California Department of Transportation. All rights reserved.

The amount and type of benefits will vary depending upon the type and length of occupancy (Table 10.01-A).

10.01.03.01 49 CFR 24.2(a) "Displaced Person"

The term "displaced person" (or displacee) means any person who permanently moves from the real property or moves his or her personal property from the real property as the direct result of:

- A written notice of intent to acquire, rehabilitate, and/or demolish (see §24.203[d]), the initiation of negotiations for, or the acquisition of, such real property in whole or in part for a project;
- Rehabilitation or demolition for a project; or
- A written notice of intent to acquire, or the acquisition, rehabilitation, or demolition of, in whole or in part, other real property on which the person conducts a business or farm operation, for a project. However, eligibility for such person under the Uniform Act applies only for purposes of obtaining relocation assistance advisory services under 49 CFR 24.205(c), and moving expenses under 49 CFR 24.301, 24.302 or 24.303, 24.304.

This includes persons who occupy the real property prior to its acquisition, but who do not meet the length of occupancy requirements of the Uniform Act (10.01.03.04).

Displaced persons must be fully informed of their rights and entitlements to relocation assistance and payments provided by the Uniform Act.

10.01.03.02 Persons Not Displaced (49 CFR 24.2[a]["Displaced Persons"][iv])

Persons not considered "displaced" for purposes of obtaining relocation benefits are those who:

1) Move before the initiation of negotiations unless the Region/District issued a Notice of Intent to Acquire or the agency determines that the person was displaced as a direct result of the program or project.
2) Initially entered into occupancy of the property after the date of its acquisition for the project.
3) Occupied the property for the sole purpose of obtaining benefits under the Uniform Act. (The burden of proof is on the Region/District RAP Senior.)

© 1994-2025 California Department of Transportation. All rights reserved.

4) An owner-occupant who moves as a result of an acquisition of real property as described in §24.101(a)(2) or §24.101 (b)(1) or (2), or as a result of the rehabilitation or demolition of the real property. (However, the displacement of a tenant as a direct result of any acquisition, rehabilitation, or demolition for a Federal or federally assisted project is subject to this part.)
5) A person whom the agency determines is not displaced as a direct result of a partial acquisition;
6) A person who, after receiving a notice of relocation eligibility (described at §24.203[b]), is notified in writing that he or she will not be displaced for a project. Such written notification shall not be issued unless the person has not moved and the agency agrees to reimburse the person for any expenses incurred to satisfy any binding contractual relocation obligations entered into after the effective date of the notice of relocation eligibility;
7) An owner-occupant who conveys his or her property, as described in §24.101(a)(2) or §24.101 (b)(1) or (2), after being informed in writing that if a mutually satisfactory agreement on terms of the conveyance cannot be reached, the agency will not acquire the property. In such cases, however, any resulting displacement of a tenant is subject to the regulations in this part;
8) A person who retains the right of use and occupancy of the real property for life following its acquisition by the agency;
9) An owner who retains the right of use and occupancy of the real property for a fixed term after its acquisition by the Department of the Interior under Public Law 93-477, Appropriations for National Park System, or Public Law 93-303, Land and Water Conservation Fund, except that such owner remains a displaced person for purposes of subpart D of this part;
10) A person who is determined to be in unlawful occupancy prior to or after the initiation of negotiations, or a person who has been evicted for cause, under applicable law, as provided for in §24.206. However, advisory assistance may be provided to unlawful occupants at the option of the agency in order to facilitate the project;
11) A person who is not lawfully present in the United States and who has been determined to be ineligible for relocation assistance in accordance with §24.208; or
12) Temporary, daily, or emergency shelter occupants are in most cases not considered displaced persons. However, agencies may determine that a person occupying a shelter is a displaced person due to factors which could include reasonable expectation of a prolonged stay, or other extenuating circumstances. At a minimum, agencies shall provide advisory assistance to all occupants at initiation of negotiations. (See Appendix A to this part, section 24.2[a], definition of displaced persons.)

© 1994-2025 California Department of Transportation. All rights reserved.

NOTE: Per 49 CFR 24.2(a), "Displaced person"(iii), the displacement of a tenant on real property that was acquired by the Department through a voluntary transaction is entitled to relocation benefits.

There are circumstances where the acquisition of real property takes place without the intent or necessity that an occupant of the property be permanently displaced in line with 49 CFR 24.2(a) "Displaced person"(ii), Persons required to move temporarily. Previously, such occupants were specifically exempted as a "displaced person" under the Uniform Act. These persons are no longer specifically exempted, and if the displacement is over 1 year, are automatically considered permanent displacements. Great care must be exercised to ensure that they are treated fairly and equitably. For example, a tenant-occupant of a property will not be displaced, but is required to relocate temporarily in connection with the project. The temporarily occupied housing must be decent, safe, and sanitary, and the tenant must be reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation, including moving expenses and increased housing costs during the temporary relocation (10.10.05.00).

Any person that disagrees with the Department's determination that he or she is not a displaced person may file an appeal in accordance with 10.09.00.00.

10.01.03.03 Tenured Occupants

Tenured occupants are those occupants that meet the minimum occupancy requirement for full benefits. They are:

- 90-Day Owner-Occupant – occupants of the household who have lived in AND owned the residence for at least 90 days immediately prior to the ION.
- 90-Day Occupant – members of the household who have lived in but not owned the residence for at least 90 days prior to the ION.

And

- Business, Farms, and Nonprofit Organizations that occupy the property on the day of the ION.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.03.04 Non-Tenured Occupants

Non-Tenured occupants are occupants that do not meet the minimum occupancy requirement, but may still be entitled to some benefits. Non-Tenured occupants include:

- Less than 90-day occupant – a tenant or an owner who has not lived in the residence for at least 90 days prior to the ION, but is in occupancy at the time of the ION.
- Subsequent occupant – a tenant or owner who moves into the residence after the ION, but before the Department obtains control of the property.

And

- Business, Farms and Nonprofit Organizations that occupy the property after the ION.

While displacees in residence for less than 90 days are eligible to receive payments upon vacating the displacement property at any time after the Initiation of Negotiations, Subsequent occupants must be in occupancy on the day the Department obtains control of the property (Close of Escrow, Effective Order of Possession, or Effective Right of Entry) in order to receive monetary benefits (e.g., moving for residential and nonresidential, replacement housing payments for residential).

Replacement Housing Payments (RHP) for non-tenured residential occupants (both less than 90 days and subsequent) are based on either their rent or their income (49 CFR 24.2[a] "Comparable replacement dwelling" [viii][C]). The RHP is paid under §24.404, Replacement housing of last resort. Non-Tenured occupants are entitled to Advisory Assistance.

Anyone who moves into the residence after the date the Department obtains control of the property is not entitled to benefits under the Uniform Act.

10.01.03.05 Unlawful Occupancy (49 CFR 24.2[a][29])

Unlawful occupants are **not** entitled to relocation benefits. Unlawful occupants are considered to be:

- Squatters – someone who occupies the property to be acquired but without the owner's permission.
- A person who occupies the property to be acquired that is owned by another, and has received an Eviction Notice or other court action to cause the property to be vacated.

© 1994-2025 California Department of Transportation. All rights reserved.

Per 49 CFR 24.206, "Eviction for Cause" is any person who occupies the real property, and is determined to be in unlawful occupancy on the date of the ION, is ineligible to receive relocation payments and advisory assistance. A person is determined to be unlawful if:

a) The person received an eviction notice prior to the ION and, as a result of that notice is later evicted; or
b) The person is evicted after the ION for serious or repeated violation of material terms of the lease or occupancy agreement; and
c) The eviction was not initiated by the owner for the purpose of denying the occupant the right to receive relocation benefits.

10.01.03.06 Constructive Occupancy

To qualify an occupant for replacement housing payments, the dwelling must be the displacee's primary residence. (Payment of moving costs does not require occupancy.)

Where the cause of the displacee's absence is temporary, displacee shall be considered in occupancy. For example, the dwelling is maintained as principal residence, but displacee is:

1) temporarily employed in another location,
2) in the hospital,
3) on vacation,
4) on temporary military duty, or
5) not able to occupy because of a major disaster.

Displacee can be considered to be in "constructive occupancy" provided that another party has not established eligibility during displacee's absence.

Cases of constructive occupancy that differ substantially from examples listed above or cases where another party has occupied property and become eligible during the absence must be decided on an individual basis and be fully documented.

Table 10.01-A – Explanation of Residential Benefits by Occupancy

Occupancy Type and Time	90-Day Owner-Occupant	90-Day Occupant	Non-Tenured (Less than 90-Day Occupant)	Subsequent Occupant (Post-Offer)
Conditions	Eligible to receive payments upon vacating displacement property at any time after ION	Eligible to receive payments upon vacating displacement property at any time after ION	Eligible to receive payments upon vacating displacement property at any time after ION	Must be in occupancy at COE or date of possession
Advisory Assistance	Yes	Yes	Yes	Yes
Moving Expenses	Yes	Yes	Yes	Yes

© 1994-2025 California Department of Transportation. All rights reserved.

Table 10.01-A – Explanation of Residential Benefits by Occupancy (Continued)

Replacement Housing Payments

A. Price Differential (PD), Mortgage Differential (MD), and Incidental Expenses (IE).	Yes	No	No	No
Limited to $41,200 before LRH rules apply.				
B. Rent Differential (RD)	Yes (in lieu of PD, MD, IE)	Yes	Yes	Yes
Requirement for an Income Certification.	No	Optional – at time of determination	Optional – at time of determination	Optional – at time of determination
Limitations	RD based on economic rent, but cannot exceed the calculated PD If PD is zero, RD is limited to $9,570.			
OR – C. Down Payment (DP) including eligible Incidental Expenses	N/A	Yes If RD is zero, DP is $9,570	Yes If RD is zero, DP is $9,570	Yes If RD is zero, DP is zero

© 1994-2025 California Department of Transportation. All rights reserved.

Cases of constructive occupancy that involve the right to occupy a property prior to initiation of negotiations must also be decided on an individual basis and be fully documented. Proof of the right to occupy property can include a written agreement such as a lease, canceled checks, testimony of witnesses, or partial occupancy such as the storage of property.

10.01.03.07 Consequential Displacement

Consequential displacement is displacement of a person, business, farm, or nonprofit organization from the unacquired remaining property as a direct result of acquisition for the proposed project.

Where only a portion of a property is acquired for public purposes, occupants are eligible for relocation payments only insofar as the Region/District DDC determines that their displacement is a direct result of the acquisition. Care must be taken to avoid creating relocation assistance obligations, expressed or implied, by premature or unnecessary delivery of RAP packages or information.

The benefits for which an approved consequential displacee is eligible are determined by the category of occupancy in which displacee falls.

Examples of possible consequential displacements are:

- Rearrangement of remainder property causes displacement of occupants, e.g., acquisition of a portion of a mobile home park or similar operation that causes displacement on remainder in order to restore functional utility by rearranging interior roads or buildings.
- Acquisition of a significant portion of parking area in a business development causes the business to suffer a substantial decrease in net income. Decrease in income must specifically result from reduced parking and not from other causes.
- A business operation (such as a lumberyard) moves from the part taken to the unacquired remainder. Payment for cost of reasonable and necessary rearrangement of personal property on remainder to accommodate the move is proper.
- Residential or business occupants on remainder are left without utility connections as a result of partial taking. Since the Department cannot force owners to reestablish utility connections, occupants can be considered displaced and eligible for applicable benefits.

© 1994-2025 California Department of Transportation. All rights reserved.

- Acquisition of a business causes move from unacquired residence because the business and residence need to be in close proximity. In this case, the District must also find that replacement business location is not available within reasonable distance of acquired property. (Since the Department will relocate a person whose residence is acquired to a comparable location, a finding of consequential displacement of business to be near owner's residence may not be made.) Applicable benefits in this case are limited to reimbursement of moving expenses and relocation advisory assistance.
- A business that operates at two sites, one of which is acquired. If the operation at the acquired site cannot relocate within a reasonable proximity of the second site, the Agent must determine if the operation of the unacquired site is detrimentally impacted because the two sites were linked by either operation or reliance.

Whenever an appraisal or acquisition settlement indicates taking of access rights will result in substantial impairment of access to a property, the District will investigate to see if any consequential displacement would occur.

Frequently, the need to relocate a business may not be obvious until the relocation assistance stage. The relocation of a business may be necessary even though there are no damages to the real estate and the appraisal does not indicate a business displacement.

The request from the occupant to be considered as a displacee may come through the appraiser, acquisition agent, or RAP Agent. As soon as the request is made, the RAP Senior should discuss the matter thoroughly with the Appraisal and Acquisition Seniors and then submit the matter to the R/DDC for consideration. The request should include a recommendation from the Region/District Project Delivery Seniors. The displacee should be advised in writing of the R/DDC's determination.

If it is denied, the occupant's right to appeal should be explained fully. All appeals on a determination of consequential displacement must be heard by the Statewide Appeals Board (10.09.07.00).

When design changes result in revised settlement offers that cause consequential displacement, the date of the revised offer is used to determine eligibility. Explanations to potential displacees must be stated so they are aware that potential eligibility cannot be firmly determined until after settlement is reached. If settlement is ultimately based on a plan that will not cause displacement from remainder, the occupant must be immediately informed that there is no eligibility for RAP benefits.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.03.08 Persons Not Lawfully Present in the United States

The phrase "person not lawfully present in the United States" means someone who is not "lawfully present" in the United States as defined in 8 CFR 1.3 and includes:

1) A person present in the United States who has not been admitted or paroled in the United States pursuant to the Immigration and Nationality Act, and whose stay in the United States has not been authorized by the U.S. Attorney General, and
2) A person who is present in the United States after the expiration of the period of stay authorized by the U.S. Attorney General, or who otherwise violates the terms and conditions of admission, parole, or authorization to stay in the United States.

10.01.04.00 Promissory Estoppel

The Doctrine of Promissory Estoppel holds that a promisor is held to a promise if the following conditions are met:

- A promise is made, representing a material fact that something would happen, normally to the benefit of the promisee.
- The promisor could reasonably expect to induce a substantial action on the part of the promisee. In other words, the representation made was such that a person would reasonably believe it.
- The promisee actually takes a substantial action in reliance on the representation, and the promisee substantially changed their position in reliance on the representation.
- A monetary loss, one that is actually suffered or one that will be suffered by the promisee, can only be avoided by enforcement of the promise made.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.05.00 Global Settlements

49 CFR 24 separates the acquisition and relocation activities. The intent is to preclude 'global settlements,' which is the packaging of relocation entitlements with the fair market value to reach an administrative settlement in the acquisition. In addition, 49 CFR 24.207(f) prohibits agencies from requesting that displaced person waive relocation benefits.

Global settlements are not consistent with the requirements of the Uniform Act or 49 CFR 24 in that relocation benefits must be determined in accordance with specific fact based criteria. Relocation benefits are a reimbursement of eligible expenses which requires certain actions on the displacee's part prior to receiving a payment. Any settlement of relocation benefits is considered to be in noncompliance with statutory and regulatory requirements.

10.01.06.00 Certificates of Occupancy

All persons occupying property to be acquired for a public project must certify to the Department that the displacement property is their primary residence. The Certification requires they list the number of occupants, the length of time the persons have occupied the residence, their status as owner or tenant, and their U.S. Residency status. This is accomplished by completing the Certificate of Occupancy and Receipt of Relocation Benefits (RW 10-25) for owners, the Owner's Certificate of Tenants (RW 10-01), and/or the U.S. Residency Certification (RW 10-44). The information on these forms will determine the occupants' eligibility and status as tenured or non-tenured.

Each form must be acknowledged by the Agent that interviewed the occupants who completed the form.

If an owner cannot provide or refuses to provide necessary information on tenant and lessee occupancies, the RAP Agent shall canvass the property and secure the information directly from the occupants. (Other reasonable methods such as regular or certified mail may also be used.) In such cases, length of prior occupancy may be documented from sources such as rental receipts, canceled checks, and utility bills.

Generally, the same relocation census data (occupancy dates, number of occupants, etc.) required of owners is required for tenants and lessees. At the first personal contact with tenants and lessees, the RAP Agent will confirm any census data (plus rent payments and utility costs) provided by the owner and obtain any missing information. Variations shall be resolved and explained in the RAP Diary.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.07.00 Moves Prior to Initiation of Negotiation

The Agent shall advise initial owner-occupants and initial tenant-occupants that relocation payments cannot be made until the State has initiated negotiations to acquire the property, except as otherwise provided for in connection with a Notice of Intent to Acquire. Occupants must be made aware that they may lose RAP eligibility if they move before initiation of negotiations.

10.01.08.00 Initiation of Negotiations

The term "initiation of negotiations" is the day the Acquisition Agent presents, in writing, the amount of just compensation (determined to be fair market value) to acquire the property for a public project, defined as the First Written Offer (FWO).

However, if the Department has issued a Notice of Intent to Acquire (NIA), then the date of the letter becomes the date of the ION.

10.01.08.01 Notice of Intent to Acquire

In rare cases, an owner-occupant may need to relocate prior to the anticipated ION. That person should contact the Region/District RAP Senior to determine the time frame for the ION and if the occupants should be issued a Notice of Intent to Acquire (NIA) to preserve their relocation benefits.

Issuing an NIA informs the owner-occupants that the Department will be acquiring their property for a public project, and that they can relocate prior to the First Written Offer without jeopardizing their relocation benefits.

A Notice of Intent to Acquire to preserve relocation benefits is available to tenants or lessees under certain circumstances. See Section 10.03.04.00 for more information.

10.01.08.02 Move Prior to Control of the Property

Any tenured occupant may move from the property to be acquired after the ION and receive full benefits. However, to prevent a non-tenured occupant from moving in and possibly receiving benefits, the Region/District should consider an agreement to rent the property back from the owner and immediately initiate proceedings to complete the acquisition (including condemnation action).

© 1994-2025 California Department of Transportation. All rights reserved.

Non-tenured occupants must be in the property at the time the State obtains control in order to receive any relocation benefits (Table 10.01-A).

10.01.09.00 Relocation Benefits

Eligible displacees may be entitled to Advisory Assistance, Moving Costs, and Replacement Housing Payments.

- Advisory Assistance is available to anyone who occupied the real property when acquired by the Department.
- Moving Costs will be reimbursed for actual, reasonable and necessary expenses and are available to anyone who must move personal property from the real property acquired by the Department.
- Replacement Housing Payments are available for residential occupants based on type and length of occupancy at the time the Department initiates negotiations to acquire the real property.

10.01.09.01 Advisory Assistance (49 CFR 24.205[c])

The Uniform Act requires that the Department establish a relocation assistance advisory program which satisfies the requirements of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), the Fair Housing Act (42 U.S.C. 3601, et. seq.), as amended, and Executive Order 11063 (27 FR 11527, November 24, 1962), and offers the services described below (see 10.01.09.02).

The specific goal of Advisory Assistance is to minimize the hardships people might experience in adjusting to their relocation. On projects requiring a significant number of displacements, the establishment of a relocation office in a convenient location for the displaced persons is encouraged if the district office is not easily accessible to those displaced.

10.01.09.02 Specific Advisory Services

Relocation assistance advisory services are provided primarily to assist:

- Persons in relocating to "decent, safe, and sanitary" (DS&S) housing that meets their needs and is within their financial means.

- Businesses, nonprofits, and farm operators in obtaining and becoming established in a suitable replacement location.

© 1994-2025 California Department of Transportation. All rights reserved.

In addition, Advisory Assistance is intended to emphasize that if the comparable replacement properties are located in areas of minority concentration, minority persons shall be given reasonable opportunities to relocate to replacement properties not located in such areas.

A personal interview shall be conducted with each occupant to determine the relocation needs and preferences of each person being displaced. An explanation of available relocation benefits should also be provided at this time. If personal contact cannot be made, the Agent shall document the file to show that conscientious efforts were made and explain why such efforts were unsuccessful.

The RAP Agent is responsible for providing current and continuing information throughout the relocation process, including:

- an explanation of eligibility requirements for relocation payments and the appeal process.
- translation services to adequately explain the RAP Program to persons with limited English proficiency.
- information on the availability, purchase prices, rental costs, and financing terms of comparable replacement dwellings and/or nonresidential sites.
- assurance that no one will be required to move unless at least one comparable replacement dwelling is made available.
- an explanation about the eviction policies to be pursued in carrying out the project.
- an address, in writing, of the specific comparable replacement dwelling used to establish the maximum replacement housing payment.
- inspection of the replacement property to ensure it meets DS&S standards.
- offer of transportation for all persons to inspect housing to which they are referred.
- assistance in locating and obtaining a replacement property, including assistance in completing required applications and other forms.
- assistance in completing the Department's claim forms, and if necessary, a request for a Relocation Assistance Appeal.
- counseling advice as to other sources of benefits that may be available, such as information on Federal and State housing programs, disaster loans, and other programs (e.g., SBA, FHA, HUD).
- other advisory assistance, as needed, to minimize hardship.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.09.03 Eligibility for Advisory Assistance

Services shall be offered to all persons occupying property:

- acquired or to be acquired
- immediately adjacent to the acquired real property if the Department believes they may have difficulty adjusting to changes resulting from the acquisition
- that was acquired, and choose to relocate their adjacent residence, business, or farm operation
- after it was acquired by the Department, when displacement causes a hardship for that person because of a critical housing shortage, age, handicap, infirmity, lack of financial means, or other circumstances

No services shall be offered to persons or businesses not certified as lawfully present in the United States.

10.01.09.04 Moving Costs

Any occupant who qualifies as a "displacee" is entitled to payment for the actual moving and related expenses of personal property on the displacement property to the replacement property for up to 50 miles. The cost of relocating real property retained by the owner is the responsibility of the owner.

The payment varies between residential and nonresidential occupants. See Section 10.04.02.00 for residential and 10.05.04.00 for nonresidential.

10.01.09.05 Replacement Housing Payments (RHP)

A residential displacee is eligible for an RHP that may assist them in relocating to a replacement property. The type and amount of the payment vary between tenured and non-tenured occupants, and between owners and tenants.

- 90-Day Owner-Occupants may be entitled to an RHP which is comprised of a Purchase Differential, Incidental Expenses, and a Mortgage Interest Differential.
- 90-Day Occupants and Non-Tenured Occupants (owner or tenant) may be entitled to a Rental Differential or a DP.

© 1994-2025 California Department of Transportation. All rights reserved.

The amount of the Purchase Differential and the Rental Differential is determined by preparing a Replacement Housing Valuation (RHV) that ensures there is a replacement property available on the market that is comparable to the property being acquired by the Department, and meets the DS&S standards established in the Uniform Act.

Additionally, the residential occupants must meet the following requirements in order to receive the full amount of their calculated RHP:

- Occupy a DS&S residential dwelling, within one (1) year of the eligibility date.
- Spend at least the amount of the comparable replacement property (as determined by an approved RHV) on the actual replacement property.
- Submit a claim for their eligible RHPs within 18 months of the eligibility date.

10.01.09.06 Relocation Payments

RHPs are not payable after death of the displacee, unless there has been some reliance on the part of the displacee's family or business operation (49 CFR 24.403[f]). Items of personal property needing to be moved may be reimbursed to the displacee's family or estate.

Relocation Housing Payments are limited to $41,200 for 90-day owner-occupants and $9,570 for 90-day/less than 90-day occupants before consideration must be given to Last Resort Housing (LRH).

Moving Costs and RHPs are not subject to income tax, nor should they impact a displacee's eligibility for Social Security.

49 CFR 24.209 specifically states that relocation payments shall not be considered as income for the purpose of the Internal Revenue Code, nor shall the payments be considered in determining the eligibility of any person for benefits under any provision of federal law (e.g., Social Security benefits), except a federal law providing low-income housing assistance.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.09.07 Adjustments of Limits and Payments (49 CFR 24.11)

49 CFR 24.11(a)(3) says that the Lead Agency may adjust the following valuation limits and maximum relocation benefits payments: the maximum amounts of relocation payments provided at §24.301, §24.304, §24.305, §24.401, §24.402, §24.502, and §24.503.

Under 49 CFR 24.11(b), the head of the Lead Agency will evaluate whether the cost of living, inflation, or other factors indicate that limits and payments provided in paragraph (a) of this section should be adjusted to meet the policy objectives of the Uniform Act. The Lead Agency will divide the Consumer Price Index for All Urban Consumers (CPI-U) for the year of the assessment (current year), by the CPI-U for the year of the previous assessment (base year index/year of last adjustment) to determine the effect of inflation over the assessment period. If adjustments are determined to be necessary, the head of the Lead Agency will publish the new maximum benefit limits eligible for Federal participation in the Federal Register. (See Appendix A to this part, section 24.11.)

Appendix A as it relates to 49 CFR 24.11, says that FHWA will use the Consumer Price Index for All Urban Consumers (CPI-U) Seasonally Adjusted to determine if inflation, cost of living, or other factors indicate that an adjustment to relocation benefits is warranted.

Due to the majority of residential relocations falling under Last Resort Housing which is only limited by the actual, reasonable, and necessary cost to relocate a residential displacee, this adjustment period will typically not be necessary for the Department. Last Resort Housing information can be found under 10.04.15.00, 10.04.15.01, 10.04.24.00, 10.06.11.00, and 10.10.01.00.

Under this section, reestablishment payment amounts cannot be adjusted. Moving expenses have no limitations for costs under 49 CFR 24.301(g)(8) if they are actual, reasonable, and necessary. This section would allow adjustments to the maximum in-lieu payment (also called a fixed payment) which could be of benefit to the Department in relocating nonresidential displacees. Information on paying the in-lieu costs can be found at 10.05.16.00-10.05.19.04.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.10.00 Relocation Assistance Program Package

The RAP package is a collection of informational material given to eligible displacees to explain RAP. Although content will vary among residential and nonresidential occupants and between tenured and non-tenured, the material must include:

- **Standard Relocation Brochure** – residential, mobile home or nonresidential, as appropriate.

- **Title VI Brochure** (if not received from a prior contact)

- **Notice of Eligibility** – stating kinds of benefits the specific displacee may be eligible to receive. (This will be followed by a Conditional Entitlement Letter outlining the specific amounts of benefits the displacee may be eligible to receive.)

- **U.S. Residency Certification Form** (signed in accordance with 10.01.11.00).

- **Certificate of Occupancy** – appropriate form or forms.

OPTIONAL INFORMATION:

- **Other Information** – pertinent to the specific type of eligibility involved; e.g., "Fair Housing" pamphlets and Small Business Administration loan information.

The Acquisition Agent delivers the RAP Package at the time of the ION to the owners (or by a RAP Agent who accompanies the Acquisition Agent). The RAP Agent delivers the RAP Package to tenants within 14 days of the ION to the owner.

IMPORTANT: The RAP package must be delivered and an offer of relocation benefits made to initial tenants and lessees within 14 days of the ION, either in person or by certified mail. If delivery is by certified mail, the Agent must make a personal call to review the program and answer questions within 30 days following the ION.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.11.00 Certification of U.S. Residency Requirement (49 CFR 24.208[a] and [b])

Each person seeking relocation payments or relocation advisory assistance shall, as a condition of eligibility, certify:

1) In the case of an individual, that they are a citizen, or a person who is lawfully present in the U.S.
2) In the case of a family, that each family member is a citizen, or a person who is lawfully present in the U.S. The certification may be made by the head of the household on behalf of other family members.
3) In the case of an unincorporated business, farm, or nonprofit organization, that each owner is a citizen, or a person who is lawfully present in the U.S. The certification may be made by the principal owner, manager, or operating officer on behalf of other persons who have an ownership interest.
4) In the case of an incorporated business, farm, or nonprofit organization, that the corporation is authorized to conduct business within the U.S.

The certification shall indicate whether such person is either a citizen or national of the U.S., or a person who is lawfully present in the U.S.

Certification will be made on RW 10-44 and must be in the RAP File prior to giving relocation advisory assistance and prior to approval of any claims. It should be obtained at the time the owner or tenant signs the Certificate of Occupancy or receives the Notice of Eligibility, whichever is earlier.

10.01.11.01 Benefit Computation (49 CFR 24.208[c])

In computing relocation payments under the Uniform Act, if any member of a household or owner of an unincorporated business, farm, or nonprofit organization is determined to be ineligible because of a failure to be legally present in the U.S., no relocation payments may be made to him or her. Any payment for which such household, unincorporated business, farm, or nonprofit organization would otherwise be eligible shall be computed for the household, based on the number of eligible household members and for the unincorporated business, farm, or nonprofit organization, based on the ratio of ownership between eligible and ineligible owners. More information and examples on computation can be found under Appendix A, section 24.208(c).

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.11.02 Validity of Certification for U.S. Residency (49 CFR 24.208[d])

The RAP Agent shall consider the certification that is signed under penalty of perjury by the displacee to be valid. Documentation will not be requested from the displacee.

If the person signing the Certification for U.S. Residency is unsure if their status qualifies for purposes of relocation benefits, the RAP Agent must refer them to US Citizenship and Immigration Services (USCIS) for clarification. The RAP Agent must retain the Certification until USCIS has verified the person and status, then the person can request the RAP Agent return the form for execution. As a matter of practice, the RAP Agent should advise the person in writing, that receipt of the Certification would be required before relocation benefits can be discussed. If no information is received from the person, the RAP Senior should investigate and follow up with a letter advising the person that a nonresponse or an unexecuted Certification within 60 days will be considered as the person's admission that they are not present in the U.S. legally, and thus they will be denied relocation benefits.

10.01.11.03 Documentation (49 CFR 24.208[e] and [f])

Since the certification is signed under penalty of perjury, it will not be necessary to verify the validity of the information provided by the displacees. However, should the displacee request assistance in determining if all occupants are legal residents, the agent can provide information on what documentation is considered proof of legal status. The displacee can provide any documentation they have on hand and ask the Agent to determine if it meets the requirements established by USCIS. If the displacee has documentation that is not on the list, they can pursue the matter directly with USCIS to determine their legal status, and, once their legal status is verified by USCIS, the displacee can sign the Certification. Documentation will not be requested from the displacee unless the displacee has volunteered the information to ensure they meet the requirements. The certification will be kept in the RAP file, and the RAP diary will note that the Agent obtained a signed document. The diary should also note if the number of legal occupants is less than noted in previous documents (e.g., Occupancy Data Sheet, Certification of Occupancy).

Under 49 CFR 24.208(f), if, based on a review of a person's documentation or other credible evidence, an agency has reason to believe that a person's certification is invalid (for example a document reviewed does not on its face reasonably appear to be genuine), and that, as a result, such person may be

© 1994-2025 California Department of Transportation. All rights reserved.

an alien not lawfully present in the United States, it shall obtain the following information before making a final determination:

1. For a person who has certified that they are an alien lawfully present in the United States, the agency shall obtain verification of the person's status by using the Systematic Alien Verification for Entitlements (SAVE) program administered by USCIS to verify immigration status.
2. For a person who has certified they are a citizen or national, if the agency has reason to believe that the certification is invalid, the agency shall request evidence of the United States citizenship or nationality and, if considered necessary, verify the accuracy of such evidence with the issuer or other appropriate source.

10.01.11.04 Denial of Benefits (49 CFR 24.208[g])

No relocation payments or relocation advisory assistance shall be provided to a person who has not provided the certification described in this section or who has been determined to be not lawfully present in the U.S., unless such person can demonstrate to the agency's satisfaction that the denial of relocation assistance will result in an exceptional and extremely unusual hardship to such person's spouse, parent, or child who is a citizen of the U.S. or a person lawfully admitted for permanent residence in the U.S.

Persons not lawfully present in the U.S. are not eligible for relocation benefits or advisory assistance.

10.01.11.05 Return of Payment

The claim form for relocation benefits signed by the displacee shall state that only lawful U.S. residents are entitled to relocation benefits.

If within 18 months after the following dates the Department determines that the displacee's certification was invalid, the displacee will be contacted and advised that all relocation payments must be returned.

1) For tenants, the date of displacement.
2) For owners, the date of displacement or the date of the final payment for the acquisition of the real property, whichever is later.

See 10.08.13.00 for information on how to process a request for the return of the payment.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.11.06 Hardship Situations

In extremely rare circumstances, the denial of benefits to an uncertified occupant may create a severe hardship on the remaining certified occupants. The eligible occupants may submit a claim for benefits for the uncertified occupant and request that the denial of the benefits be reconsidered because of their particular situation. In order to claim benefits, the certified occupant must demonstrate to the Department's satisfaction that denial of the additional benefits to the uncertified occupant will result in an extreme hardship to the remaining occupants, particularly the spouse, parent, or child who is a legal resident. The Region/District DC RW or designee will determine if the displacee's situation is a hardship.

Hardship is defined as:

1. Significant and demonstrable adverse impact on the health or safety of the spouse, parent, or child; or
2. Significant and demonstrable adverse impact on the continued existence of the family unit of which the spouse, parent, or child is a member.

NOTE: Income alone will never be considered as the sole criteria in determining hardship.

10.01.12.00 Coordination of Right of Way Activities

As mandated by the 49 CFR 24, all relocation activities must be coordinated with project work and other displacement causing activities (e.g., appraisals, acquisition, and property management).

To ensure that persons displaced receive consistent treatment, and the duplication of functions is minimized, the following sections explain the various roles and responsibilities of FHWA, HQ RW, and the Region/District functional Senior for Appraisals, Acquisition, Property Management, and RAP.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.12.01 Responsibilities of Headquarters Right of Way

Right of Way (HQ RW) Project Delivery Office Chief, through the Senior Right of Way Agent for Relocation Assistance:

- Develops policy.
- Establishes procedures.
- Conducts Quality Enhancement Joint Reviews (QEJR).
- Evaluates Region/District performance.
- Provides statewide continuity and leadership, technical assistance for solving unusual problems, and training programs.
- Acts as liaison with the Federal Government, other states, and other State agencies.

10.01.12.02 Responsibilities of Region/District

The Region/District Division Chief, through the Senior Right of Way Agent responsible for the Relocation Assistance Program:

- Plans and provides all relocation services and payments.
- Provides staff.
- Provides funds.
- Sets project priorities.
- Trains staff.
- Manages resources.

(See 10.01.13.00 for specific activities related to managing the RAP Branch.)

10.01.12.03 Region/District Functional Responsibilities

All RW Agents who have public contact should have sufficient knowledge of RAP to explain the benefits and how to obtain them. At the very least, they should know whom displacees should contact to obtain this information.

Anyone who contacts occupants of property that might be acquired by the Department should ensure the following message is conveyed (preferably in writing):

> "*You may be eligible for possible relocation payments if you are in occupancy of the property at the time the Department initiates negotiations. You should contact the Right of Way Office immediately if you plan to move before receiving a written offer to acquire your property.*"

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.12.04 Responsibility of the Region/District Appraisal Branch

- Give accurate basic relocation information to all potential displacees encountered during the appraisal process.
- Complete the Parcel Occupancy Data Sheet (RW 07-02) at the first meeting or contact with the owner when a primary or alternate appraisal indicates a displacement of people, business, or personal property. Provide the form to the RAP Senior within 24 hours of the initial inspection of the property.
- Inform the RAP Unit of any special relocation problems involving either people or personal property.
- In situations involving appraisal of commercial, industrial, or other properties that include valuation of machinery, equipment, fixtures, and miscellaneous items of realty, provide information on these items as part of the appraisal report in accordance with instructions in the Appraisal Chapter.
- Require that goodwill appraisers indicate in the goodwill appraisal the items and amounts that are or might be a part of a reestablishment or an in-lieu relocation benefits payment.
- Complete a Machinery and Equipment appraisal of trade fixtures and other personalty that will be acquired by the Department. All personalty not acquired must be relocated, so it is imperative the Appraiser works closely with the RAP Senior to determine the appropriate classification of all personalty.
- Notify the RAP Unit of any alternate appraisal or damage element that could result in displacement of people or businesses not contemplated by primary appraisal or readily identified by reference to partial acquisition requirements.
- Show economic and/or actual rental rates for all improved properties in fair market value appraisal (see Appraisal Chapter). Show an unsupported estimate of fair rental rate (economic rent) in market value appraisal for all owner-occupied dwelling units.
- If the District has a policy of initially notifying displacees of monetary benefits under all replacement options, it may also require that supported economic rent for owner-occupied dwelling units be shown in market value appraisal. In these cases, the requirement for support of economic rent determination is the same as for tenant-occupied units.

© 1994-2025 California Department of Transportation. All rights reserved.

- Make a determination of real property versus personal property. This is critical because all payments for moving and related expenses for displaced businesses relate to the moving of personal property. Neither the Uniform Act nor the implementing regulations provide payment for moving real property. The Uniform Act places the determination of real property under State law, and requires that all real property be appraised and acquired as part of the real estate being acquired.

The RAP Agent will interview all business displacees immediately after receiving the Parcel Occupancy Data Sheet. To increase the effectiveness of the interview, the RAP Agent may accompany the appraiser during the initial and/or subsequent inspections. (See 10.05.02.00 for additional information.)

10.01.12.05 Responsibilities of the Region/District Acquisition Branch

- At time of initiation of negotiations for the property, personally deliver a RAP Package (10.01.10.00) to each owner-occupant with whom negotiations are conducted and secure a receipt for each Package delivered.
- Explain RAP procedures and benefits to potential displacees using the RAP Package as a guide.
- Obtain a Certificate of Occupancy (RW 10-25) and the U.S. Residency Certificate (RW 10-44) from the owner-occupants.
- Secure a completed Owner's Certification of Tenants (RW 10-01) from owner of the property immediately when negotiations are initiated.
- Contact the RAP Branch prior to completing a goodwill settlement. Note: None of the Certificates regarding occupancy need to be signed if it can definitely be established that no personal property will be moved and no relocation benefits payments will be paid. However, because RAP valuations are dependent on proper information, verification of size and composition of family is mandatory.
- Coordinate service of 90-Day, 60-Day, and 30-Day Notices to occupants of properties with the service of the Order of Possession when the Department has initiated condemnation action.
- Ensure a Relocation Impact Document (probably a RIM) is requested when a request for early acquisition due to a hardship is received. Approval of the hardship is contingent upon review and approval of the RID by the Environmental Branch.

© 1994-2025 California Department of Transportation. All rights reserved.

Provide the RAP Senior with the following information and documentation within two working days of receipt:

1. Certificate of Occupancy (RW 10-25).

2. United States Residency Certificate (RW 10-44).

3. Owner's Certification of Tenants (RW 10-01). If the owner or owner's agent refuses to provide the Owner's Certification of Tenants, contact the RAP Unit immediately.

4. Date the Department has control of the property (e.g., Close of escrow, effective Order of Possession, executed Order of Condemnation).

5. The final price paid to the owner (e.g., RW Contract, Administrative Settlement, Stipulated Judgment).

6. List of all items purchased and/or paid to relocate in lieu of purchase, and any property included in the appraisal but retained by the owner.

The Acquisition Agent must work with the RAP Senior with the status of the negotiations on all properties, especially complex properties that will entail relocation of personal property. The intent is to afford the RAP Unit an opportunity to become familiar with potential large scale business relocations prior to completion of acquisition and possible commencement of a move. An appropriate notation on Certificate of Occupancy or separate notice may accomplish this. The RAP Agent should be afforded an opportunity to accompany the Acquisition Agent to acquire property or otherwise be allowed to inspect property for the purpose of determining scope of potential relocation problem.

The Relocation Assistance Branch must work closely with the Legal Office handling any eminent domain actions in order to prevent global settlements that include relocation benefits payments. In the rare cases when the global settlement includes relocation benefits payments, FHWA will participate if the settlement states the amount of funds that would have been paid out in relocation benefits payments by category, and the RAP file clearly demonstrates that the displacee was advised that any deposit made in excess of the acquisition settlement (including goodwill, inventory, machinery and equipment) will be credited toward relocation benefits payments. Care must be taken to code the portion of relocation benefits payments appropriately because acquisition payment is subject to taxation and capital gains.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.12.06 Responsibilities of the Region/District Property Management Branch

- Inform the RAP Senior, in writing within 24 hours of first knowledge, of vacation of State-owned property by any RAP eligible.
- Coordinate requests for 30-Day, 60-Day, and 90-Day Notices with eviction proceedings (e.g., 30-Day Notice to Vacate, 3-Day Notice to Quit) sufficiently in advance to ensure orderly relocation of all occupants.
- Inform all noneligible tenants occupying premises leased under Master Tenancy that they are not eligible for relocation benefits payments.
- Provide Title VI Survey, Form RW 10-01, and Title VI Brochure to tenants of state-owned property.
- Coordinate sale of excess land or building improvements with RAP Senior to ensure that occupants receive required notices and any relocation payments due.
- Coordinate increase of rental rates with RAP Branch to ensure that increases for RAP-eligible occupants are in accordance with rental policy for residential rental rates. Increases in rental rates for 90-Day Occupants may drastically affect their RHP entitlements.
- Inspections of the real property just prior to or at the close of escrow to determine if the acquired items of realty are still on-site, and explain to displacees who will remain in occupancy that they are responsible for maintenance of the property until they vacate.
- Describe Grace Period, if any, for businesses renting from the State, in the rental agreement.

10.01.13.00 Single Agent ($10,000 and Under)

The Single Agent ($10,000 and Under) allows one agent to appraise and acquire parcels, usually partial acquisitions valued at less than $10,000.

Occasionally, the Single Agent will encounter the need to relocate personal property from the part-take to the remainder, which requires a payment under the relocation assistance program. This may be a permanent relocation; or in the case of a temporary construction easement, a temporary relocation requiring a second move back to the original location after construction work is complete.

The move of the personalty is paid with the "Self-Move Agreement and Claim Form for Under $10,000 Acquisition" (SMA $10K), Form RW 10-47.

© 1994-2025 California Department of Transportation. All rights reserved.

The document only needs to be completed when personal property such as a swing set, a cord of wood, the contents of a shed, or other personalty needs to be moved away from the property needed for the project. If the need for the property is temporary in nature, e.g., a temporary construction easement for a soundwall, the displacee should be paid to move the personal property back upon notification by the agent.

To expedite the relocation process in conjunction with the appraisal and acquisition process, this minimal relocation payment can be paid in advance of the move, but must be paid separate from the acquisition payment (which may be paid directly out of escrow). It is important to note the ownership of the personal property, since some residential and nonresidential sites are occupied by a tenant or lessee. However, the SMA $10K process and form can still be used by the Single Agent who would then ensure payment for the realty is paid to the owner (nonoccupant) and payment for the relocation is paid to the occupant.

The SMA $10K Form includes required clauses governing when the relocation must occur, the mandatory 90-Day notice, and liability clauses. Once the document is signed by the displacee (claimant) and the Single Agent (Right of Way Agent), it can be processed for payment.

The need to incorporate this form into the existing acquisition process is based on FHWA's requirement that acquisition and relocation activities be kept separate, and that no payment for relocation be included in an acquisition payment.

10.01.14.00 Region/District RAP Branch

The Region/District RAP Senior should ensure sufficient staff are assigned to the branch and that there is adequate time to spend with each displacee to ensure the appropriate level of advisory assistance is provided and that claims are processed timely.

RAP Seniors may also be responsible for the preparation of the Relocation Impact Documents (RID) and the RW Planning Documents (10.02.00.00), and Replacement Housing Valuations (RHV) (10.06.00.00).

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.14.01 Training

Agents assigned to the Relocation Branch should receive adequate training before they have the responsibility to relocate any residential or noncomplex business displacee. Agents assigned to the more complex relocations (e.g., major commercial establishment) or ancillary activities (RHVs, RIDs, or public hearing presentations) should be at the Associate level, have several years of RAP experience, and have received the appropriate advanced training sessions.

The RAP Senior should ensure all staff have adequate training and experience to accomplish assigned tasks in a professional manner.

10.01.14.02 Right of Way Certifications

The RAP Senior must provide information to the Region/District functional unit responsible for finalizing the Right of Way Certification for state highway projects. The RAP Senior must verify that all displacees have vacated and that they were relocated in accordance with applicable Federal and State laws and procedural requirements. See Certification Chapter for a full discussion.

10.01.14.03 Policy and Procedural Manuals

The RAP Senior should ensure each RAP Agent has the current Relocation Assistance procedures outlined in the Relocation Chapter with Exhibits and Forms, along with any other written guidance and instructions.

The RAP Senior should also keep a stock of current Relocation Assistance Brochures (Residential, Business, and Mobile Home) for use at public hearings, public meetings, and the first RAP call.

Another important tool is the Right of Way Intranet (internal Caltrans link) which has a RAP webpage (internal Caltrans link) with the newest information on policies, procedures, and interpretations. Additional information on 49 CFR Part 24 is available from FHWA.

Most importantly, the Senior Agent is responsible for reviewing the RAP Agent's work products and the parcel files to ensure they comply with all applicable laws and policies, and that the work is being done on time and in accordance with the project schedule.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.14.04 RAP File

The RAP Branch must maintain a separate file for each parcel and for each entity (e.g., apartment, multiple households, sublessee) that is considered a displacee. A file should also be kept for each person that has been determined not a displacee because of their U.S. residency status, length of time in occupancy, unlawful status, or other reason. RAP Files are numbered with the parcel number and a subnumber to indicate the number of displaced units on the parcel. Review 6.02.03.00 on parcel numbering.

RAP File Parcel Numbering Example:

Owner who has personal property on the site:	123456-01
Tenant who occupies the property:	123456-02
Second and separate household as determined by the agent:	123456-03

The Parcel Occupancy Data Sheet initiates the RAP file; however, any previous correspondence to or from the displacee regarding RAP or their possible status should be included in the file as soon as it is created.

The RAP file shall contain the following information:

- RAP Diary – see below for further details.
- Certificates – of occupancy, of income, and of residency status.
- Correspondence – to and from the displacee or pertaining to the displacement, including Notices of Eligibility, Conditional Entitlements, and Notices to Vacate.
- Replacement Housing Valuation report for all residential units, or the Certified Inventory and photos for a nonresidential unit.
- Claims – copy of claim form and supporting documents.

10.01.14.05 RAP Diary

Standard Relocation Diary Form RW 10-03 (internal Caltrans link) shall be used to maintain a complete and legible diary that can be clearly reproduced. Each diary entry must be entered in pen or typed. Preprinted diaries or diaries maintained in a word processing program are acceptable documents. The use of lead pencils and felt pens should be avoided. Each diary entry must be dated and signed, not initialed.

© 1994-2025 California Department of Transportation. All rights reserved.

The following are mandatory entries that will ensure a complete chronological account of the relocation activity:

- Date case was assigned to RAP Agent.
- Date, status, and pending required action when transferred from Agent to Agent.
- Date and place of each personal contact, list of persons present, and particulars of the discussion.
- Date and particulars of all significant phone calls.
- Date of first RAP Call, including delivery of the RAP Package, and a statement that the relocation program was explained and assistance was offered.
- Amounts of relocation payments offered. Copies of benefit letters delivered or mailed are included in the file.
- Claimant's response to offer of assistance (accepted or refused) and relocation intentions, if known.
- Date claim forms were delivered and kinds and amounts of payments involved.
- Date payment amounts are reviewed. If revised, the date claimant was advised of change in entitlement and amounts involved.
- An entry to the effect that replacement housing or rental replacement housing valuation was current as of date displacees moved out. Case file will contain written backup that valuation is current.
- Addresses and prices of replacement properties offered to displacee and methods used to transmit information.
- Dates correspondence or documents were received or transmitted.
- Delivery dates of official notices, such as 90-Day Notice.
- Diary entry when a moving claim is processed indicating circumstances of vacation; e.g., voluntary self-relocation, eviction, subject to 90- or 30-Day Notice, advisory assistance used.
- Relocation Assistance Program Senior sign-off for closed files (10.01.14.08).

Relocation diaries are confidential and should not be provided to the displacee or any other parties. However, during eminent domain actions or a relocation assistance appeal, diaries in whole or in part can be requested by the displacee, an attorney, or an interested party. Prior to providing copies of any diaries, the agent should obtain approval from the local Legal Office. (See 10.01.14.09.)

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.14.06 Records

All Relocation Parcel Files must be maintained in sufficient detail to demonstrate compliance with 49 CFR 24.9(a). The files must be retained in the region/district office for at least three (3) years after the latter:

- When each displacee receives the final relocation payment to which they are entitled, or
- The final voucher for construction is submitted.

10.01.14.07 Tickler Files

The RAP Senior must maintain a database or tickler system to assure, among other things, that all potential displacees are notified prior to the expiration date of any period in which they must:

- Occupy DS&S housing.
- File a claim.
- File an appeal.

All notices should provide ample time for displacee to act. The tickler file will also provide a reminder to make a mandatory six (6)-month follow-up call.

It is strongly suggested that the Agent send the displacee a letter detailing time periods and criteria to receive their full entitlements at the time they vacate the state-acquired property.

Time constraints for purchasing and occupying replacement dwelling vary for owners and tenants. See Section 10.08.02.00 for a detailed explanation of the various time constraints for purchasing or occupying replacement properties and/or filing a claim.

The District may approve time extensions for residential owners and tenant-occupants for good cause.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.14.08 RAP File Closeout

The Senior Right of Way Agent in charge of the RAP Unit shall review every closed relocation case file in a timely manner to determine that:

- All benefits were fully paid.
- Certified Escrow Closing Statement was reconciled with amounts the Department placed into escrow.
- Supporting payment documentation was placed in the file or adequate diary entries were made to support nonpayments.
- Payments were made in a timely manner.
- Relocation assistance advisory service was offered and given, if requested.

The RAP Senior completes the file closeout by signing the front page of the diary, certifying to its adequacy. The Senior should note and correct any inadequacies and give appropriate instructions to ensure future compliance. Relocation File Closeout Checklists are available to assist the Relocation Senior (see Exhibit 10-EX-01 [internal Caltrans link]).

The reviewing RAP Senior must not certify the adequacy of any case file in which they have personal knowledge or relationship with the displacees, or if they were the RAP Agent for any significant period of time. In these instances, another Senior or Supervising Right of Way Agent must review the file.

10.01.14.09 Confidentiality of Records (49 CFR 24.9[b])

Records maintained by the Department are confidential regarding their use as public information unless applicable law provides otherwise.

The Public Records Act favors disclosure of public records unless there is a specific exemption against disclosure. Since the Act requires the Department to respond to a request for information within 10 days, even if the request falls within one of the exemptions, it is important not to ignore such a request. See Government Code 7922.545 for additional information on Public Records Act requests.

Care must be taken to ensure that confidential information such as tax records, Social Security information, and Title VI surveys are not retained in the parcel file.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.14.10 Reports (49 CFR 24.9[c])

The Department submits an annual report to FHWA on its real property acquisition and displacement activities. The annual summary report is to be submitted to FHWA by November 15 that describes the real property acquisitions, displacements, and related activities conducted by the Federal agency for the prior calendar year. (See Appendix A to this part, section 24.9[c].)

The HQ RW Planning and Management Office prepares the Statistical Report Form for the 12-month period of each calendar year. The data is gathered from various tracking systems (e.g., ROWMIS, Advantage, PMCS) and verified with the region/district RAP Senior prior to its submission to FHWA.

To ensure accurate reporting, the RAP Senior must maintain the ROWMIS database that tracks the number of residential and nonresidential displacees, the total of their relocation payments, the date of their move, and any funds paid that are classified as Last Resort Housing (LRH) (above the regulatory limits).

10.01.14.11 Accounting Information

The RAP Senior is responsible for forwarding accurate RAP payment cost information to Accounting through Planning and Management (P&M).

To ensure all RAP payments are properly coded, the RAP Agent completes a separate Form RW 10-05, Payment Request and Relocation Cost Summary (internal Caltrans link), for each claim scheduled for payment; e.g., moving expense claim and subsequent rent supplement payment.

Instructions for completing the form are printed on page 2 of the form. The need to provide the proper Review Indicator(s) on the form is of particular concern since this box is used to highlight certain payments where coding errors can occur.

© 1994-2025 California Department of Transportation. All rights reserved.

10.01.15.00 Employee Relocation Assistance Program (ERAP)

A Department employee may receive his or her actual and necessary moving and relocation expenses, in accordance with the California Department of Human Resources (CalHR) rules and limitations, whenever such employee is required to change their place of residence because of a change in assignment, promotion, or other reason related to duties with the Department.

Limited benefits may be extended to new hires as a recruitment incentive for individuals accepting employment from out of State.

Division of Accounting is the primary administrator of the ERAP. Accounting provides employees with relocation rules and specific authorization forms upon notification of employee relocation from the hiring manager (Form ASC-3001[internal Caltrans link]). Accounting also provides assistance to employees on interpretation of CalHR rules and IRS fringe benefits taxability in regard to moving related expenses such as temporary living expenses and reimbursement costs for the sale of old residences. All claims for payment are submitted to Accounting for payment.

Right of Way is responsible for those relocation services that are real estate related. These include:

1. Counseling services to assist in the sale of the present home and/or purchase of a new home.
2. Providing assistance in locating a home or apartment in the new location.
3. Furnishing an estimate of value for use in selling the present home and/or purchase of a replacement home.
4. Providing available information regarding the new community.
5. Counseling and assisting in the moving of one's personal property.

Each Region/District Right of Way office must appoint an ERAP Coordinator – usually a RAP agent.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.00.00 – RELOCATION IMPACT DOCUMENTS

10.02.01.00 Relocation Planning

49 CFR 24.205 requires each State Highway Department plan projects in a manner that ensures the problems associated with the displacement of individuals, families, businesses, farms, and nonprofit organizations are recognized and solutions are developed prior to initiating any right of way activities, and the project reports (PR, PSR, PID, ED, etc.) shall address the complexity and nature of the anticipated displacements.

The RAP Branch is responsible for the preparation of the Relocation Impact Document (RID) that addresses these potential impacts.

10.02.02.00 Purpose

The purpose of the RID is to evaluate the project's impact on residences, businesses, farms, and nonprofit organizations. The RID will include data on the following:

1) An estimate of the number of households to be displaced including information such as owner/tenant status, estimated value and rental rates of properties to be acquired, family characteristics, and special consideration of the impacts on minorities, the elderly, large families, and the handicapped when applicable.
2) An estimate of the number of comparable replacement dwellings in the area (including price ranges and rental rates) that are expected to be available to fulfill the needs of those households permanently or temporarily displaced. When an adequate supply of comparable housing is not expected to be available, consideration of housing of last resort actions should be instituted.
3) An estimate of the number, type, and size of the businesses, farms, and nonprofit organizations to be displaced and the approximate number of employees that may be affected.
4) An estimate of the availability of replacement business sites. When an adequate supply of replacement business sites is not expected to be available, the impacts of displacing or temporarily moving the businesses should be considered and addressed. Planning for permanently and temporarily displaced businesses which are reasonably expected to involve complex or lengthy moving processes, or small businesses with limited financial resources and/or few

© 1994-2025 California Department of Transportation. All rights reserved.

alternative relocation sites should include an analysis of business moving problems.

5) Consideration of any special relocation advisory services that may be necessary from the displacing agency and other cooperating agencies.

The RID studies the direct impacts of the project and provides the:

- Project Manager with information on relocation issues that will impact the project delivery schedule.
- Environmental Planner with data to analyze the project's impact on socio-economic issues.
- Right of Way Manager with an estimate of the resources needed (schedule, PYs, capital dollars) to deliver the Right of Way Certification.

Under 49 CFR 24.205(a), as part of the relocation planning process, agencies should, to the extent practical, identify relocations that may require additional time for advisory services and coordination for their relocations. Such relocations may include the elderly, those with medical needs, and those in public housing or other federally subsidized housing. In each of these examples, the nature of the relocation means that the unique needs of the relocated person should be determined early and that the relocation agent should make full use of available social services and other program support (examples include local transportation services that may be available in certain areas, financial support available from local, Federal, and State agencies, and community support services that may be available) in considering and developing a relocation plan.

10.02.03.00 Environmental Document

The Environmental Planner is responsible for analyzing the project's impacts on:

- Land use – development trends, community growth.
- Farmland – types of agricultural land in accordance with the Williamson Act.
- Social issues – changes to the community patterns.
- Economic issues – impacts to a community's tax revenues, employment, or accessibility.
- Relocation issues – types of occupants and projected needs.

(See 10-EX-08.)

© 1994-2025 California Department of Transportation. All rights reserved.

It is the latter issue that will generate a request from the Project Manager or the Environmental Planner for the RAP Senior to prepare the RID.

Caltrans Environmental Handbook Volume 4, "Community Impact Assessment," delineates the respective roles and responsibilities of the Division of Environmental Analysis (Environmental), including the specific collection of data. The Environmental Planner is responsible for information on population, tax revenues, growth rates, ethnicity, income levels, etc.

The requirements for the RID are explained in detail in Table 10.02-A, but as a minimum must always include:

- The number of occupants displaced,
- The typical vacancy rate for each type of displacement (e.g., 5% vacancy rate for multi-residential units),
- Identification of any special needs such as elderly or handicapped displacees, and
- A statement that the Right of Way office has sufficient resources (experienced staff and capital dollars) to complete the relocations in accordance with policies and procedures.

The data provided in the RID will enable the Environmental Planner to address pertinent issues and develop a mitigation plan as needed.

On occasion, Environmental may request additional data from Right of Way to be used in the analysis of the project. This may include:

- Real estate market trends (e.g., increase or decrease in affordable housing).
- Types of residential units available in the displacement area and potential replacement areas.
- Demographics for the displacement and replacement areas (e.g., low income [below poverty], minority, elderly, handicapped).

Right of Way should provide whatever information is available, but the data should not be included in the RID unless it is significant to the availability of replacement housing (e.g., low income per surveys or census data may indicate the need for Section 8 housing or excessively high Rent Differentials). Clarify in the report whether low income is 30% of rent, or below poverty level for the report.

NOTE: Environmental will study the impacts on low-income housing stock.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.04.00 Relocation Impact Documents

The Relocation Impact Document is prepared in support of the Environmental Document and will be completed at the draft (DRID) and final (FRID) stages of the project.

The RID format is dependent upon the complexity of the project as determined by the number of displacements and the availability of replacement property.
A Relocation Impact Memorandum (RIM) is prepared if there are fewer than ten displacements and there is ample replacement property. The standard format for the RIM is a memorandum (10-EX-03) (internal Caltrans link).

A Relocation Impact Statement (RIS) is prepared if there are ten or more displacements and ample replacement property is available. The standard format is 10-EX-03A (internal Caltrans link) but can be a narrative report if needed.

The Relocation Impact Report (RIR) is prepared if there are complex relocations because of available replacement property, displacee special considerations, or major impacts to minorities, the elderly, large families, and/or persons with disabilities when applicable (49 CFR 24.205[a][1]). The standard format is 10-EX-04 (internal Caltrans link), but this should be used as a checklist when reviewing the issues with Environmental to determine what information is needed and how the data will be collected. The actual report may be in the form of a checklist or a full narrative report. See Table 10.02-A for minimum requirements for each type of document.

Generally, a draft RID (DRID) that is prepared for the draft Environmental Document (ED) will require a final RID (FRID) when the project alternative has been selected and the final environmental report is prepared. The same applies for a draft and final RIR. However, it is possible that a draft RIR that considers several alternatives that cause many different types of displacements, may only need a final RIS when the project alternative is selected, which impacts only a few occupants.

© 1994-2025 California Department of Transportation. All rights reserved.

Table 10.02-A

Minimum Requirements for all Relocation Impact Documents (Draft/Final) (Statement/Report – Checklist or Narrative)

Section	Attachments
Project Description	• Project Location Map • Project Limits Map • Project Alignment Map • Project Summary Sheet
Displacements: A full discussion of the type of displacements, replacement property, plans to mitigate relocation problems or address special needs.	• FRIR Data Sheet and Recommendation Summary that includes, as appropriate, a "No Re-rent Statement," "Field Office Statement," or "Appraisal/Acquisition or Relocation Priorities" • Number of Displacement Units • Type of Residential Units Displaced (Multi-Res, SFR, Apt, MH, etc.) and estimated value/rental rate • Type of Nonresidential Units Displaced (Commercial, Agricultural, Nonprofit) and estimated size of the operation (e.g., Mom-and-Pop retail store, small business) • Survey of Displacees (Data Analysis) if interviews conducted • Chart arraying the residential units by type and price in the displacement area against the replacement area, including subsidized housing
Project Relocation Resources	• Identification of Special Problems • Proposed Solutions for Noted Problems

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.05.00 Minimum Requirements

The minimum requirements for each RID are explained below:

1. Identification of the project (Co., Rte., PM, and description) including a general location map.
2. Identification of the displacement area and the potential replacement area, by alignment.
3. Number and type of occupants that may be displaced by each alignment.
4. Availability of replacement property by type and a statement of its affordability.
5. List of all sources of information, including interviews with potential displacees (usually conducted for final documents only).
6. Statement of how relocation will occur in a manner that minimizes the hardships on the displacees.
7. Project map showing the alignment.

10.02.05.01 Project Identification

The project location and a description of the project must be included in the RID. Examples:

> 6-FRE-180-39.58/43.93 (EA 420500) Widening of a conventional highway.
>
> 10-ST-219-.2/7.8 (EA 0A8700) Widening of a two-lane conventional highway to a four lane conventional highway. Alternative 3B (maintain the existing centerline), Alternative 3C (shift the centerline north). Alternative 4 (no build).

This information is readily available from the Project Manager and should be copied verbatim from the PID.

A map of the general area showing the proposed project alignment must be attached.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.05.02 Displacement and Replacement Areas

The impact of the project cannot be determined until the displacement area has been defined. This should be a joint effort by Right of Way, Environmental, and the Project Manager.

Right of Way determines the potential replacement area (i.e., local housing market). Adjacent project neighborhoods should be considered first; larger areas may be used if an explanation is included. The most important criterion for defining the replacement area is homogeneity of type (single family and/or multifamily) and price range of the housing. Other important information to consider are the characteristics of the resident population of an area including tenure, location, income level, age of structure, employment type, and availability of transportation.

A typical method of identifying the replacement area is by city, a grouping of census tracts, part of a city (neighborhood), or other recognizable area.

10.02.05.03 Number and Type of Occupants Impacted

The total number of households, businesses, farms, and nonprofits must be included in the document. Residential households must be classified as single-family, multi-residential, or mobile home; and by the number of owner or tenant occupied. Businesses must be classified by type (e.g., commercial, retail, industrial).

Draft reports do not need an exact count of the number of persons being displaced. Census information for the displacement area can provide the average number of persons per household (e.g., 2.6).

Existing and potential rental rates, fair market values should be discussed in its relationship to the replacement area (e.g., the average rental rate for the apartment complex impacted is within an acceptable range of the rental rates available in the replacement area). The data can also be presented in a table or spreadsheet.

Refer to Volume 4, 4-7.3 through 4-7.5, regarding Environmental's issues and responsibilities as to affordable housing, demographic characteristics, and senior citizens/disabled persons.

© 1994-2025 California Department of Transportation. All rights reserved.

If at any time during the preparation of the draft, Right of Way and Environmental determine that a significant number of the displacees have special needs as to finding suitable replacement property, personal interviews must be conducted when completing a survey developed from 10-EX-05. Surveys cannot be mailed. These special needs of the displacees must be discussed in the document. If the displacement area negatively impacts a significant number of handicapped, elderly, or low-income (below poverty) residents, or residents in low-income housing, then the RIS cannot be used. A full narrative discussion on how these special needs will be addressed in the relocation activities must be included in the RIR. Interviews must be conducted with all potential displacees who have special needs to ensure that issues are fully identified and a plan for assistance is prepared.

If the proposed project is considering more than one alternative, the document must identify the number and type of occupants by each alternative. A table or checklist can be used to simplify the data.

Charts listing the properties by Assessor's Parcel Number (APN), address, owner's name, or impacts should be retained in the working file and not included in the RID.

10.02.05.04 Availability of Replacement Property

Information on available replacement property by type (residential, commercial, and agricultural) must be included in the report. If a statement is being prepared because there are few displacements, then the document can state "there are ample single family residential replacement properties on the market similar to the displacement properties, or similar wording for commercial properties."

If there are limited replacement properties available by type or cost, then an RIR must be done which will include a plan on how the relocation activities will address this issue. Relocation payments over the last resort housing limits may mitigate affordability issues. Scheduling the relocations over a longer period of time can mitigate low vacancy rates.

Under Appendix A, section 24.205(c)(2)(ii)(C), to ensure that replacement properties are comparable, agencies may develop more restrictive Decent, Safe, and Sanitary (DS&S) inspection requirements during the relocation stage which may include required DS&S inspections for selected comparable dwellings, all comparable dwellings used to establish a displaced person's replacement housing payment eligibility, or other more stringent DS&S inspection requirements for comparable dwellings.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.05.05 Contact with Data Sources, Property Owners, and Displacees

Good public relations are critical to a project's success. The Project Manager and/or Environmental Planner will keep the local agencies and the community aware of the project. Public meetings and public hearings are conducted throughout the process. Right of Way staff may be asked to participate to explain the Relocation Assistance Program.

Contacts with local agencies, community, and other impacted groups for information to be included in the RID should first be coordinated with the Project Manager and/or Environmental Planner.

There are two types of data sources, primary and secondary, to consider when analyzing displacement impacts. A "primary" data source is information obtained directly from the potential displacee whether it is through surveys or public meetings and hearings. A "secondary" data source is information obtained from civic or community organizations, governmental agencies (e.g., housing authority, health department), schools, churches, nursing care programs, as well as census tract data, real estate statistics, periodicals, GIS (Geographic Information Systems), and the Internet's World Wide Web. "Secondary" data sources are the preferred method for analyzing displacement impacts during the relocation impact document phase.

Contact with owners or tenants should be minimal because of the relocation impact document's general nature. Census data and other sources of gross data, including windshield surveys, can be used. Only in distinct problem areas when it is necessary to obtain essential data not available from any other source should the Region/District contact owners or tenants. When problems are identified in the RIR, the Region/District should consider the possibility of establishing a field office (10.02.13.00) as one of the methods for providing advisory assistance during the right of way phase.

If relocation problems are identified early in the process, personal surveys and interviews with the potential displacees may be conducted for the draft Relocation Impact Report, and must be conducted for the final Relocation Impact Report (10.02.05.07.). Surveys cannot be mailed during the draft process. Additionally, Relocation Assistance brochures and "Your Property, Your Transportation Project" cannot be provided during the environmental phase.

© 1994-2025 California Department of Transportation. All rights reserved.

Census data may be used for gross information (e.g., average persons per household). Other information (average vacancy rate in the displacement area) can be obtained from newspaper advertisements, telephone and postal surveys, multiple listing services, and real estate and rental offices. Information published by governmental offices (e.g., HUD, HCD, FHA, and Section 8) may be used to supplement other replacement housing data.

One of the more likely sources of data is through a field review of the displacement and replacement neighborhoods.

At a minimum, the document will list all external sources, including personal interviews, used to obtain the data (rental rates, vacancy rates, average number of persons per household) that is included in the document.

10.02.05.06 Relocation in Compliance with Uniform Act

Each document will state the manner in which relocation will occur that minimizes the hardships the displacees may incur. This includes the level of advisory assistance, the possibility of a temporary field office during relocations, requesting assistance from HUD in finding affordable housing, and more lead time to complete the relocations.

At a minimum, each document will include the following statement:

> "All activities will be conducted in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended. Relocation resources shall be available to all displacees without discrimination."

The Federal Highway Administration (FHWA) Uniform Relocation Act Benefits description is included in every ED as Appendix A – it does not need to be included in the RID. For additional information, refer to the Standard Environmental Reference, Volume 4, Chapter 17. However, the RAP Senior is responsible for providing Environmental with the most current Exhibit. Headquarters Right of Way will ensure the Exhibit in this Chapter is current and provide copies to HQ Environmental.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.05.07 Survey Methods

The survey format should be reviewed with the Environmental Planner to ensure additional questions are added that will provide the Environmental Planner with data needed to analyze the impact of the project. The survey for the RIR should not include questions about the potential displacees' desire or lack of desire to relocate, nor anything about their preferences for location, type of property, or preferred amenities.

The format of the questionnaire should be carefully considered. The sequencing and phrasing of questions can be critical not only to the type of response, but to the quality of response as well. This is particularly true of cross-cultural surveys and mail outs.

If possible, liaison with owners by personal or telephone contact (not by letter) through reverse listing sources should be made prior to tenant contact to explain the survey's purpose and obtain owner permission for tenant interviews. Absentee owners are never asked to complete the survey. Owners' refusal to allow contact with their tenants must be documented in the study.

If surveys are mailed to potential residential displacees during the final phase for the Relocation Impact Report, a cover letter (10-EX-06) (internal Caltrans link) must be attached explaining the purpose of the questionnaire. Follow-up on nonrespondents may be by phone or personal contact, within a reasonable time (between 7 and 14 days).

If personal contact is made, personnel making the contact must be fully briefed to answer questions and explain the survey's purpose. Regardless of the technique used, the purpose of the survey must be clearly stated to ensure maximum understanding by the public.

Bilingual specialists may be necessary to assist with translations of questionnaires and conducting the interviews.

Information obtained from the potential displacees is confidential. Displacees should be so assured that any personal information will be controlled in accordance with the California Information Practices Act and used only as an unidentifiable portion of summarized data.

© 1994-2025 California Department of Transportation. All rights reserved.

The following actions are recommended if interviews are conducted:

- Document attempts to contact displacees. Normally, four attempts at various times of the day/evening and week are sufficient.
- Deliver a copy of appropriate RAP brochure. Note: Non-English translations can be ordered through HQ Right of Way. A minimum of 90 days is needed to obtain the translations.
- Discuss general questions about the project and relocation. Avoid questions about appraisal and acquisition; refer them to the appropriate function.
- Fill out displacee questionnaire.

The following points must be explained in each field interview:

- To qualify for relocation payments, the person must occupy their dwelling at the initiation of negotiations for the parcel.
- Only occupants who are considered U.S. residents are eligible for relocation benefits.
- The purpose of contact is to determine replacement-housing needs based on current project requirements.
- Potential displacees should not take any actions concerning their potential displacement that would create personal or financial loss or hardship if the property they now occupy is not acquired.

10.02.06.00 Complex Projects

The full narrative report (RIR) must be completed for projects that impact more than ten occupied units (residential or nonresidential) and should cover the relocations that could be complicated (e.g., an alcohol rehabilitation center, an assisted living complex).

All RIRs should be arranged as shown in Table 10.02-A. A summary of effects and alternative mitigation actions must be included in the FRID. Each issue must be fully addressed in the report.

The checklist (10-EX-04) (internal Caltrans link) can be used as a basis for the full narrative report.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.07.00 Accountability

Relocation impact documents will be completed at the Region/District level, under the supervision of the RAP Senior, or contracted out to qualified consultants. All documents must conform to this chapter.

The Region/District-prepared RIDs are written and completed by a Right of Way Agent who:

- Is at least Associate level.
- Is fully trained.
- Has background or experience in relocation assistance and market studies.
- Has good writing skills.

The Region/District RAP Branch is responsible for:

- Preparing Draft Statements/Reports and Final Statements/Reports.
- Preparing updates as required.

Any legal opinion shall be requested early. Although the legal opinion is not part of the RID, it is kept as backup documentation.

One of the criteria for establishing a RW Capital Phase is approval of the FRID. The Region/District may request an exception if the FRID is incomplete when the Capital Phase is submitted for approval.

The circumstances causing the lack of the completed report and the reasons for establishing the Phase should be discussed.

10.02.08.00 Annual Reviews and Updates

The RAP Senior will annually review all FRIDs for current STIP projects. As projects enter the STIP, the completed FRIS or FRIR are subject to changes in alignment, RW limits, real estate market, and Federal, State, or local policy.

Environmental or Project Development may request annual review of draft documents, even though it is not required. The RAP Senior should maintain a tickler system to track the time frame when the draft is due for a final report.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.09.00 Record Retention

The Region/District must maintain the RID and all supporting documentation until the project has been constructed.

These records must be retained for an additional seven years after completion of construction on the project if legal action or injunctions were part of the project process.

10.02.10.00 Right of Way Planning Document

Final Relocation Impact Documents provide Right of Way with the scope of relocation requirements in a single project or a number of alternative projects. The information in the RID should be used to prepare Right of Way's Planning Document.

The Right of Way Planning Document (10-EX-04A) (internal Caltrans link) facilitates the orderly relocation of everyone in the right of way and gives advance warning of special problems that may necessitate more lead time than normal. The Document will address, in detail, special relocation problems, timing considerations, relocation phasing, and general relocation alternatives.

Table 10.02-B will ensure that the Region/District Right of Way management (e.g., RAP Senior, Estimator, Planning and Management) can plan the appropriate resources to complete the relocations. The document provides Right of Way with information on the number of displacements, type, availability or lack of affordable housing, the likelihood of last resort housing payments, and identification of special needs that will have to be addressed before the initiation of negotiations begin.

© 1994-2025 California Department of Transportation. All rights reserved.

Table 10.02-B
Right of Way Planning Document – Internal Document (10-EX-04A)

Basic Assumptions	State basic assumptions that could invalidate all or part of the study if changed, including: • Certification dates for the project. • The reservation that the design will remain essentially unchanged. • That critical recommendations in the Relocation Plan are implemented. • All approvals are obtained as scheduled.
Number of Housing Units Needed vs. Number Available*	Complete a table or spreadsheet that: • Compares by price range, number of bedrooms, and occupancy status. • Summarizes the total available dwellings by price range, number of bedrooms, and occupancy status. • Outlines (one for each year of right of way acquisition for the project) the basis for relating the various kinds of housing needs and the housing available to fulfill them.
Mobile Home Relocations	If it is necessary to relocate people in mobile homes, provide a complete separate analysis, the results of which are correlated into the project Relocation Plan.
No Special Effort Required	Describe those classes of housing where no special effort will be necessary, including the areas where RAP payments will easily accomplish relocation. Provide an analysis showing that displacees will be able to pay for their housing in the new area.
DS&S Problems	Discuss problems where the normal market may not have enough DS&S housing to absorb the demand within the time span allowed for relocation.
Time Schedule	If the time scheduled for acquisition and relocation is insufficient to allow orderly relocation based on what the market can absorb, state the best estimate of the time required and recommend changes that would allow for this additional time.
Scarcity in Some Housing Classes	If there is scarcity in some classes of housing and the District has other similar projects, follow-up studies on actual RAP displacees may enable the report to generalize on the percentages of people by housing class who tend to leave the area completely. A reasonable estimate of people expected to leave the area, based on solid facts, may show that no availability problem exists where there appeared to be one.

© 1994-2025 California Department of Transportation. All rights reserved.

Table 10.02-B

Right of Way Planning Document – Internal Document (10-EX-4A) (Continued)

Large Number of Ineligibles	If the survey indicates a housing area where there are or may be a large number of ineligible occupants in the right of way, discuss this along with any foreseeable problems connected with them. Examples are student housing and motel/hotel occupants.
Sequencing	State which parcels should be appraised and acquired first and what special recommendations for handling them are most appropriate.
Special Problems – Extra Time Required	Identify those parcels where extra time will solve special problems. If there is low availability of one type of unit, such as very large houses, more time may well solve the relocation problem. Other such problems may include rest homes, old hotels with permanent residents, housing for elderly, and mobile home parks.
Business Relocation Problems	If research indicates a lack of available business relocation sites or significant relocation problems, bring these issues to the attention of the District Appraisal and Acquisition Branch in writing. Include a discussion of possible solutions to the identified problems.
Special Project Reports or Community Data	The District may be asked to provide special project reports or community data (affordable housing cost calculations) to various District functions. Complete these activities only after there is full understanding between RW and the requesting party as to the scope of the particular project and its priority relationship with ongoing RW activities.

* Include in RIS and RIM

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.11.00 Lead Time

The Right of Way Planning Document must estimate the lead time required to adequately carry out a timely, orderly, and humane relocation program. Factors to consider are:

- Concurrent projects that create displacements.
- Availability and experience level of RAP staff.
- Total number of displacees.
- Relocation problems indicated in study.
- District work norms.
- Available budgeted money.
- Replacement housing availability.
- Vacant land availability.
- Re-rent policy.
- Project certification date.

Note: A short statement about the estimated lead time should also be included in the FRID, especially if additional time is required to conduct the relocation activities.

10.02.12.00 Re-Rent Policy

A no re-rent policy should be recommended in the RW Planning Document when it appears there may be:

- Shortage of replacement housing.
- Project construction immediately following relocation.
- Shortage of nonresidential replacement sites.

The recommendation shall justify the policy, fully discussing advantages and disadvantages, the social and economic impact of eliminating a percentage of the housing market, and the effect of boarded up units on neighborhood security.

A no re-rent policy must be established on projects where such provisions were included in the freeway agreement or requested by a local agency.

NOTE: A short statement about the estimated lead time should also be included in the FRIR, especially if there is an anticipated shortage of affordable replacement properties.

© 1994-2025 California Department of Transportation. All rights reserved.

10.02.13.00 Field Offices

The Region/District's decision to establish a field relocation office should be based on:

- Number and type of displacees.
- Distance of the project from the District office.
- Mobility of displacees.

The decision should be made on an individual project basis and included in the RW Planning Document. Establishing a field office is advisable on large projects.

The office must be convenient to public transportation or within walking distance of the project.

Field offices must be staffed with knowledgeable RW Agents. A bilingual or ethnic aide may also need to be available in any area with a high percentage of non-English speaking displacees. The field office shall be open during hours convenient to displacees, including evenings and weekends, if necessary.

10.02.14.00 Advanced Acquisition

Acquisitions approved in advance of the Environmental Document require an analysis of the proposed project's impact on the occupants. A RID must be included in the request for advance acquisitions to begin.

Advance acquisitions require a brief analysis of:

- Availability of relocation resources.
- Existence of special problems; e.g., disabled, elderly, and overcrowding.
- Recommended solutions to discovered or presumed difficulties.
- Adequacy of the RAP program to relocate displaced households effectively.

(Refer to Sections in the Corridor Preservation, Acquisition, and RAP Chapters regarding Hardship Acquisitions.)

10.03.00.00 – RELOCATION NOTICES AND OCCUPANCY CERTIFICATIONS

10.03.01.00 Notices

The Uniform Act and 49 CFR 24 prescribe general requirements governing the provision of relocation payments and other relocation assistance. The requirements mandate that potential displacees receive appropriate and timely notices that explain the relocation program and their entitlements.

As such, the Region/District must provide all potential displacees with the appropriate notice described in this section, in writing and within the time frame prescribed.

If the person is unable to read and understand the notice, the RAP Agent must provide the person with appropriate translation and counseling.

Each notice will include the name and telephone number of the RAP Agent to be contacted for answers to questions or other needed help.

All notices should be personally served. If personal service is impossible (occupants are in the armed forces, impacted property is for storage only), the notice may be sent by certified or registered first-class mail (return receipt requested and received), with another copy of the notice sent simultaneously by regular first-class mail. The date of service shall be 5 days for California residents, 10 days for U.S. residents, and 20 days for all others.

Under 49 CFR 24.5, each notice which the agency is required to provide to a property owner or occupant under this part, except the notice described at §24.102(b), shall be personally served or sent by certified or registered first-class mail, return receipt requested, (or by companies other than the United States Postal Service that provide the same function as certified mail with return receipts) and documented in agency files. A Federal funding agency may approve a process to permit the displaced person to elect to receive required notices by electronic delivery in lieu of the use of certified or registered first-class mail, return receipt requested, or personally served notices, when an agency demonstrates a means to document receipt of such notices by the property owner or occupant. A Federal funding agency may approve a process to permit the use of electronic signature which meet the requirements of 49 CFR 24.5(b).

© 1994-2025 California Department of Transportation. All rights reserved.

10.03.01.01 Electronic Delivery and Signatures (49 CFR 24.5[b])

An agency requesting use of electronic delivery of notices must include the following safeguards:

1. A process to inform property owners and occupants they will continue to receive Notices as described in paragraph (a) of this section unless they voluntarily elect to receive electronic notices.
2. A process to document and record when information is legally delivered in digital format. A date and timestamp must establish the date of delivery and receipt with an electronic record capable of retention.
3. A process to link the electronic signature with an electronic document in a way that can be used to determine whether the electronic document was changed subsequent to when an electronic signature was applied to the document.
4. A certification that use of electronic notices is consistent with existing State and Federal laws.

Each notice shall be written in plain, understandable language. Persons who are unable to read and understand the notice must be provided with appropriate translation and counseling. Each notice shall indicate the name and telephone number of a person who may be contacted for answers to questions or other needed help. (See Appendix A, section 24.5.)

A property owner or tenant may designate a representative to receive offers, correspondence, and information and to provide any information on their behalf required by the displacing agency by providing a written request to the agency (see §24.2(a), Owner's or tenant's designated representative).

An agency requesting use of electronic signature of documents must include the following safeguards:

1. A process to document and record when information is legally delivered in digital format. A date and timestamp must establish the date of delivery and receipt with an electronic record capable of retention.
2. A process to link the electronic signature with an electronic document in a way that can be used to determine whether the electronic document was changed subsequent to when an electronic signature was applied to the document.
3. A certification that use of electronic signatures is consistent with existing State and Federal laws.

© 1994-2025 California Department of Transportation. All rights reserved.

10.03.02.00 General Information Notice (49 CFR 24.203[a])

The first notice provided to the potential displacees is the General Information Notice (GIN) (RW 10-07) (internal Caltrans link). The mandatory format should not be changed except to add the potential displacee's name and the project identification (Dist-Co-Rte-PM-Parcel) and the date the Notice is sent.

The GIN is mailed to the potential displacee as early as practical after the completion of the Parcel Occupancy Data Form (RW 07-02) obtained by the Appraiser. If the GIN is not mailed within three (3) working days of the date the RAP Branch receives the RW 07-02, then a diary entry shall explain the reason why it was not practical to send sooner.

The GIN should be mailed with a copy of the appropriate Relocation Brochure and the assigned RAP Agent's contact information.

Since Title VI information is provided to the owners by either the Appraiser or the Acquisition Agent, the RAP Branch need only send the Title VI information (see 2.04.01.02) to tenants or lessees.

The purpose of the GIN is to briefly describe the relocation program and to inform the potential displacees that they will be:

1. displaced by a public project either temporarily or permanently,
2. given relocation advisory services, including referrals of replacement properties, help in filing payment claims, and other necessary assistance to help the person successfully relocate for both temporary and permanent displacees,
3. given 90 days advance written notice before they are required to move whether it be temporarily or permanently,
4. given the address of at least one comparable replacement residential property before they are required to move either temporarily or permanently,
5. and they have the right to appeal if they question the Department's determination of eligibility or benefits, whether the displacement will be temporary or permanent.

The RAP Agent must send the GIN to all owner and tenant/lessee occupied properties. The owner cannot prevent the District from notifying tenants of the benefits they may be eligible to receive under the Uniform Act. The RAP Agent should advise the owner that it is necessary that the tenants receive a full explanation of the relocation program which includes advising

© 1994-2025 California Department of Transportation. All rights reserved.

them that there is no immediate urgency for them to relocate. If the owner is concerned the tenants will move and there will be a loss of rental income, the Region/District may offer to make a payment to replace lost rent for vacancies occurring due to relocation for a reasonable period of time.

10.03.03.00 Legal Residency Requirement to Obtain Benefits

All relocation notices must inform the persons that anyone not lawfully present in the United States is ineligible for relocation advisory services and relocation payments, unless such ineligibility would result in exceptional and extremely unusual hardship to a qualifying spouse, parent, or child.

Notice to potential displaced persons of legal U.S. residency requirements to obtain benefits will be made at the earliest possible time, but no later than the provision of the GIN (RW 10-07) (internal Caltrans link). Information on residency requirements will be included in the RAP package made available to owners and tenants.

Requirements for Certification Concerning Legal Residency in the United States will be included in the General Information Notice, the Relocation Brochure, and all Notices of Eligibility and Conditional Entitlement Letters.

10.03.04.00 Notice of Intent to Acquire (NIA)

Normally, the first notice the owner of the property receives is a Notice of Intent to Appraise or a Notice of Intent to Inspect ($10,000 and under approach) from the Appraisal Branch. However, the owner could have contacted the Region/District earlier because of a need to relocate prior to the Appraiser's inspection. If the Region/District determines that there is a need to protect the owner's relocation benefits, then the Acquisition Branch (see 5.03.00.00) will send an NIA (RW 10-08) (internal Caltrans link) to the owner-occupants to:

- Protect the eligibility of prospective displacees who need to move prior to the first written offer on the parcel.
- Prevent dual eligibility.
- Assure that all persons are fully aware of relocation assistance benefits and requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

The Region/District DDC should use the following to determine if an NIA is appropriate:

- Tenants/lessees (residential/nonresidential) only qualify provided the owner agrees to rent the property to the Department (10.03.04.01).
- The owner-occupant must meet the same criteria for a hardship outlined in Section 5.03.04.01.
- The owner-occupant must agree to rent the property back to the Department for economic rent.
- The appraisal must be complete and a first written offer made within 60 days. In some instances, the appraiser may have already issued the Notice of Decision to Appraise and/or inspected the property, but the determination of fair market value (and the subsequent FWO) will be delayed beyond a reasonable period of time, and the owner-occupant must relocate immediately.
- If the owner-occupant does not accept the offer within the prescribed time (60-90 days), condemnation proceedings must be initiated, or the acquisition offer withdrawn (see 5.03.04.06).
- The NIA limitations have been met (see table below).

The Agent issuing the NIA to the owner must provide the RAP package. The Conditional Entitlement Letter with the specific amount of the RHP cannot be provided to a residential owner-occupant until the appraisal is complete and the first written offer made by the Acquisition Agent. It is strongly suggested that the RAP Agent accompany the Acquisition Agent on the FWO as eligibility for relocation benefits and initial information was already provided.

NIA LIMITATIONS

Project Type	Issuance
Regularly funded	Do not issue the NIA until the initiation of negotiations for the project has been authorized.
Federally funded	In addition to the above, do not issue the NIA prior to FHWA authorizing acquisition on the project.
Not regularly funded	Appropriate formal approval of a Hardship Acquisition is required, along with the owner-occupant's statement that they must relocate prior to the FWO.

In some cases, the owner-occupant may not be available for a personal call to deliver the NIA, ION/FWO, or RAP Package because they have relocated out of the area. In that case, all documents must be mailed certified to the owner.

© 1994-2025 California Department of Transportation. All rights reserved.

The NIA shall be dated the day that it is served. It shall contain the anticipated date of the offer and specify how additional information pertaining to relocation benefits can be obtained.

Be aware that if a Notice of Intent to Acquire (RW 10-08) (internal Caltrans link) is furnished to an owner, all tenants become immediately eligible for relocation assistance benefits. Tenants must be furnished a notice (RW 10-10) (internal Caltrans link) as soon as possible in this event.

10.03.04.01 Notice of Intent to Acquire – Tenants

A Notice of Intent to Acquire – Tenant (RW 10-10) (internal Caltrans link) may also be furnished to a tenant or lessee provided the owner has agreed to rent the property to the Department. An Informational Letter to Nonoccupant Owner Re: Notice of Intent to Acquire (RW 10-09) (internal Caltrans link) shall be furnished to the owner along with a copy of the Rental Agreement (08-EX-04). In this instance, it is important that the owner of the displacement unit is not served a Notice of Intent to Acquire at this time. To do so will make all occupants of the displacement unit eligible for relocation assistance payments, which may not be the intent of the Region/District.

Providing RW 10-10 (internal Caltrans link) enables business tenants to be eligible for reimbursement of search costs, move coordinator fees and other move-related items that may be necessary early on to relocate their business in a timely fashion. In certain circumstances, renting vacant residential or nonresidential units may expedite project delivery and minimize relocation assistance costs. See 8.01.31.00, State Rental of Residential or Commercial Units Prior to Acquisition.

10.03.05.00 Certificates of Occupancy

To be eligible for relocation benefits, status of the occupants must be obtained via a certification of occupancy.

The Appraiser provides the Parcel Occupancy Data Sheet to the RAP Senior stating the type of occupants on the property (residential or business, owner or tenant/lessee) and the approximate time period they have occupied the property.

The Acquisition Agent obtains a signed Certificate of Occupancy and Receipt of Relocation Benefits at the time of the FWO (and first RAP Call) for all owner-occupied properties. This will determine the number of occupants that are eligible for DS&S housing and their tenure.

© 1994-2025 California Department of Transportation. All rights reserved.

The Acquisition Agent obtains a signed Owner's Certificate of Tenants from the owner at the time of the FWO. The RAP Agent will make the first RAP Call on the tenants and verify the information on the Certificate.

All occupants must certify their residency status at the time of the first RAP Call.

10.03.06.00 U.S. Residency Certification

Certification should be done by completing RW 10-44 at the time the owner or tenant signs the Certificate of Occupancy or receives the Notice of Eligibility, whichever is earlier.

For residential occupants, the head of household will certify himself/herself and may also certify other family members.

A sole proprietor will certify himself/herself.

For partnerships and corporations, the certification may be signed by a person authorized to sign on the entity's behalf.

The Department must receive certification before any claim can be paid.

Additional information and guidelines on U.S. residency status can be found under 10.01.11.00.

10.03.06.01 Securing the U.S. Residency Certification Prior to Issuing a Notice of Eligibility

It is necessary that each person in the household or the nonresidential unit certify as to their residency status in the United States prior to receiving a Notice of Eligibility, which states "you are entitled to certain benefits under the Department's Relocation Assistance Program (RAP)." This will ensure that persons ineligible for relocation benefits are not led to believe they will receive advisory assistance, moving expenses, and for residential persons, a possible replacement housing payment. (See 10.01.03.08.)

All owners (90-day, Nonresidential) must receive the appropriate Notice of Eligibility immediately after the First Written Offer (FWO) is made. Depending on the Region/District functional assignments, this notice may be delivered by the Acquisition Agent, the Acquisition/Relocation Agent (Caseworker), or the Relocation Agent who accompanied the Acquisition Agent at the time the FWO was made. All tenants must receive the appropriate Notice of Eligibility within 14 days of the FWO from the Relocation Agent.

© 1994-2025 California Department of Transportation. All rights reserved.

Before providing the Notice of Eligibility, the agent will first request that the person(s) complete and sign the Certification Concerning Legal Residency in the United States (RW 10-44). If the person(s) do not want to complete the Certification at the first RAP Call, then the agent must state that an explanation of relocation benefits cannot be provided at that time. The agent should further explain that until the Certification is complete and verified as to its accuracy, the person(s) are not considered eligible for relocation benefits.

The agent may leave the form with the person(s) and follow up with personal and telephone calls as to the status. After 30 days have passed, and a Certification has not been received, the RAP Senior must advise the person(s) that if the completed Certification is not returned within 15 days, they (including all other persons in the household or nonresidential unit) will be considered permanently ineligible for relocation benefits. Again, if no form is received as a result of the letter and follow-up calls, the person(s) are to be treated as nondisplacees even if a Certification is provided later on in the process. A letter denying benefits to the persons not certified as U.S. residents must be sent by Certified Mail to each occupant.

These persons will have the right to appeal the decision of ineligibility, but only on the basis that they did not understand that completion of the Certification was mandatory in order to receive relocation benefits; and had they understood that aspect, they would have completed the form. They will not be able to appeal the issue of their U.S. Residency status. It is critical the agent maintain explicit diary entries regarding their explanation of the need for a Certification and all attempts to obtain it from the displacee.

10.03.07.00 Notices of Eligibility (49 CFR 24.203[b])

Eligibility for relocation assistance shall begin on the date of initiation of negotiations (generally the FWO, but possibly the date of the NIA) for the occupied property. When this occurs, the Region/District must promptly provide the occupants with a notice, in writing, of their eligibility for applicable relocation assistance via a Notice of Eligibility (NOE).

For voluntary acquisitions, the NOE shall begin the date that an agreement for voluntary acquisition becomes binding (defined in 49 CFR 24.2(a)).

This makes the Notice of Eligibility the most important RAP document that is provided to the displacee because it informs them that they have been determined to be eligible for relocation benefits. There is a different Notice of

© 1994-2025 California Department of Transportation. All rights reserved.

Eligibility for each type of occupancy, so care must be exercised to ensure that the appropriate Notice of Eligibility is provided in a timely manner.

The Notice of Eligibility for owners (residential and nonresidential) MUST be provided to the owner on the day of the FWO and to tenants or lessees (residential and nonresidential) within 14 days of the initiation of negotiations.

Notices of Eligibility are delivered with the RAP Package:

a) to the owners by the Acquisition or RAP Agent during the FWO.
b) to tenants by the RAP Agent within 14 days of the FWO (exception: 10-EX-46 and 10-EX-50).

10.03.08.00 Conditional Entitlement Letter

The Conditional Entitlement Letter is prepared for persons being displaced from their residential homes after the Replacement Housing Valuation (RHV) has been completed. This document provides the occupant: 1) with at least one available comparable replacement dwelling, 2) with the amount of the maximum entitlement they are eligible to receive for replacement housing and moving expenses, 3) with the requirements that need to be met to receive part or all of the entitlement, and 4) with a reminder of the right to appeal. The displacee should be presented with the entitlement letter as soon as reasonable after the completion of the RHV.

If an updated RHV indicates a change in entitlement amount, the RAP Agent must provide a revised entitlement letter to displacee.

The timing and format for each type of Notice of Eligibility and Conditional Entitlement Letter is described in Table 10.03-A. Refer back to Table 10.01-A if there is a question about type of occupancy. See 10.04.00.00 (residential) and 10.05.00.00 (nonresidential) for specific details about the type of relocation benefits.

© 1994-2025 California Department of Transportation. All rights reserved.

Table 10.03-A
DELIVERY OF NOTICES OF ELIGIBILITY and CONDITIONAL ENTITLEMENT LETTERS

Notice	Timing	Exhibit
90-Day Homeowner Occupants	Notice of Eligibility: As part of the RAP Package, at the time of the FWO by the Acquisition or RAP Agent.	10-EX-49
	Conditional Entitlement Letter with specific amounts for the Fixed Move Schedule and the PD, within 30 days of FWO.	10-EX-45
90-Day Occupants and Non-Tenured Occupants	Notice of Eligibility: As part of the RAP Package, at FWO of a 90-day owner. For a 90-day tenant, or a non-tenured tenant (less than 90 days), within 14 days of FWO by the RAP Agent.	10-EX-39
	Conditional Entitlement Letter: When displacees indicate they are actively looking for a replacement dwelling, or when the Department has control of the property (e.g., COE, Effective OP, Executed R/E or APU, FOC) – whichever occurs first.	10-EX-40
Subsequent Occupants	Notice of Eligibility: For occupants who move in after the FWO, within 14 days of notification that they are in occupancy.	10-EX-41
	Conditional Entitlement Letter: When displacees indicate they are actively looking for a replacement dwelling, but not before the Department has control of the property (e.g., COE, Effective OP, Executed R/E or APU, FOC).	10-EX-42
Business, Farm, or Nonprofit Organization	Notice of Eligibility: Owner-Occupants – at the time of the FWO by Acquisition or RAP Agent. Lessee/Tenant Occupants – within 14 days of FWO.	10-EX-43
Personal Property Only	Notice of Eligibility: Owner – at FWO. Tenant – 14 days.	10-EX-46
Nonoccupant Owner Leasing Space to Others	Notice of Eligibility: Owner – at FWO.	10-EX-50

© 1994-2025 California Department of Transportation. All rights reserved.

10.03.09.00 Reminder Notice

The RAP Agent shall send timely written notification of the possible loss of rights and expiration dates to persons who:

- Are eligible for monetary benefits, and
- Have moved from the acquired property, but
- Have not filed a claim.

Notification shall be sent periodically throughout the qualification period. If no response to the written notification is received, the RAP Agent should make telephone contact within the appropriate time limit and document the contact in the parcel diary.

10.03.10.00 90-Day Notices (49 CFR 24.203[c])

No eligible displacee shall be required to move unless he or she has received at least 90 days' advance written notice of the earliest date by which he or she may be required to move. The preferred method is to provide a 90-Day Information Notice (RW 10-18, RW 10-19) followed by an appropriate Notice to Vacate (RW 10-22, RW 10-23, RW 10-24) with date certain. Where project needs dictate, a 90-Day Notice to Vacate may be issued indicating a date certain (RW 10-20, RW 10-21).

10.03.10.01 Timing

Timing for service of notices is based on project certification dates. Notices should be delivered with adequate lead time to carry out a timely, orderly, and humane relocation program. Displacees may be given a 90-Day Information Notice as early as the date the Department provides the Conditional Entitlement Letter (residential) or 30 days after the Notice of Eligibility is provided (nonresidential). When at least 60 days have passed, the appropriate Notice to Vacate must be delivered IF the effective date is after the state obtains control of the property.

Notices to Vacate cannot be given if control of the property has not been initiated via a Right of Way Contract, an Agreement for Possession and Use (APU), or initiation of condemnation, and the Region/District is sure that the Department will have control of the property prior to the "date certain" provided in the notice. Right of Entries (R/Es) should not be used when there are relocation issues on a parcel.

© 1994-2025 California Department of Transportation. All rights reserved.

Residential displacees must be informed of the maximum relocation housing payment (RHP) amount prior to receiving a 90-day notice (with the appropriate Conditional Entitlement Letter), along with at least one address of a comparable replacement property that is available and within the range of the RHP.

Absentee owners of personal property are considered to be occupants of real property to be acquired and ARE entitled to 90-day information notices and notices to vacate. Any person who exercises physical control over the land, including the right to store personal property on the land, is a lawful occupant and is entitled to 90-day information notices and notices to vacate.

See Table 10.03-A for timing of the delivery of Notices of Eligibility. See Tables 10.03-B and 10.03-C for time frames related to service of notices for acquisition by right of way contract and by eminent domain (order for possession).

10.03.10.02 Content

The 90-day information notices state that the displacement property will be acquired for a highway project. The Information Notice states a Notice to Vacate will follow; providing at least 30 days notice before they will be required to move (60 days for some residential situations). For residential occupants, it provides the addresses of comparable replacement properties.

10.03.10.03 90-Day Information Notice

The 90-Day Information Notice is not a notice to vacate. The RAP Agent serves the 90-Day Information Notice in person on eligible and ineligible lawful occupants who:

- Are required to vacate because of the proposed construction or other State use, and
- Have personal property located on the acquired property.

Since replacement housing must be available and offered to eligible displacees before a Notice to Vacate can be issued, Region/District Right of Way must coordinate acquisition, property management, and RAP functions to ensure appropriate notices are issued in a timely manner to vacate the property and for RW Certification.

© 1994-2025 California Department of Transportation. All rights reserved.

10.03.10.04 Notice to Vacate with RW Contract

For residential owner-occupants, a 30-Day Notice to Vacate may be issued after 60 days have passed since the 90-Day Information Notice was issued if control of the property is expected within 30 days. If control of the property is by either close of escrow or a right of way contract with a possession date clause in it, then the 30-Day Notice to Vacate shall be served 30 days prior to that date. Owner-occupants do not become state tenants. They are provided a 15-day grace period in the right of way contract. Property Management will move forward with eviction after the grace period has ended. Revisions can be issued if the anticipated date of control is delayed. Extending the 30-Day Notice to Vacate may affect the validity of any notices issued by property management preceding an unlawful detainer action. Close coordination with Property Management is essential.

For residential tenants, the possession date clause in the right of way contract or the close of escrow date governs service of a 60-Day Notice to Vacate. The 60-Day Notice to Vacate is provided instead of a 30-Day Notice to Vacate to provide adequate time as addressed in both federal and state statutes.

For residential Personal Property Only situations, issue the 30-Day Notice to Vacate and state "Not applicable – Personal Property Only move" where the residential replacement comparables would be inserted.

Since no eligible residential displacee shall be served a 90-day information notice unless appropriate housing is available, the address of at least one available comparable property replacement, but preferably three, must be offered to displacee simultaneously with each notice. The property must be available and must not exceed the "probable replacement value or rent" provided to the displacee in the latest Conditional Entitlement Letter.

For nonresidential owner-occupants, a 30-Day Notice to Vacate may be issued after 60 days have passed since the 90-Day Information Notice was issued if control of the property is expected within 30 days. If control of the property is by either close of escrow or a right of way contract with a possession date clause in it, then the 30-Day Notice to Vacate shall be served 30 days prior to that date. Owner-occupants do not become state tenants. Grace periods for business displacees to remain in state-acquired property are a delegated authority. See 10.05.25.00 for more information. Coordinate closely with both the acquisition agent and the property manager.

© 1994-2025 California Department of Transportation. All rights reserved.

Nonresidential tenants usually sign a quitclaim deed giving the Department possession of the property. Once the Department has possession (either by quitclaim deed, possession date clause in Right of Way contract or close of escrow), the RAP Agent shall serve the 30-Day Notice to Vacate. In these instances, Property Management will write a lease with the tenant. Coordinate closely with the acquisition agent and the property manager.

Control of the property is obtained on the date escrow is closed, the Final Order in Condemnation is recorded, the date of possession in the Right of Way Contract (RWC), or Agreement for Possession and Use (APU), or the effective date of the Order for Possession (OP) – usually 30 days after the court has executed the document before the Department can have physical possession. The owner of the property must have the acquisition funds available to purchase replacement property before the effective date of the Notice to Vacate. While an approved Right of Entry (R/E) is considered as giving the Department control of the property, it is not appropriate to use R/Es when there are displacements associated with the property.

Either a RAP Agent or Acquisition Agent must serve the 90-Day Information Notice and the Notice to Vacate in person. If the Agent makes repeated attempts to deliver the notice in person and is unable to meet with the displacee, they must post the notice at the displacement property and mail a copy to the displacee. The diary must show their good faith effort to comply with this section.

If the address of the most comparable residential replacement property is no longer available, the Region/District must ensure some comparable replacement property is available, within the displacee's financial means, but it is NOT necessary to reissue a 90-Day Information Notice. The original 90-day period can continue to run.

10.03.10.05 Notice to Vacate with OP

For residential owner-occupants, the RAP Unit issues a 90-Day Information Notice as early as the date the Conditional Entitlement Letter is provided and before the court issues the OP and then issues a 30-Day Notice to Vacate with a date certain after the court issues the OP. The person making service must calculate the effective date. In this case, displacee must receive a full offer of their entitlements and must be furnished the address of at least one comparable replacement dwelling with the notice to vacate. The effective date of the 30-Day Notice to Vacate cannot be earlier than 30 days from the date the last record owner of the property and last occupant was served the OP.

© 1994-2025 California Department of Transportation. All rights reserved.

For residential tenants, the RAP Unit issues a 90-Day Information Notice as early as the date the Conditional Entitlement Letter is provided and before the court issues the OP. After the court issues the OP, a 60-Day Notice to Vacate with a date certain is served. A courtesy copy of the OP is served with the notice to vacate. The person making service must calculate the effective date. In this case, displacee must receive a full offer of their entitlements and must be furnished the address of at least one comparable replacement dwelling with the notice to vacate. The effective date of the 60-Day Notice to Vacate cannot be earlier than 60 days from the date the last record owner of the property and last occupant was served the OP.

For nonresidential owner-occupants, the RAP Unit issues a 90-Day Information Notice as early as 30 days after the Notice of Eligibility is provided and before the court issues the OP. The RAP Unit then issues a 30-day Notice to Vacate with a date certain after the court issues the OP. The person making service must calculate the effective date, which cannot be earlier than 30 days from the date the last record owner of the property and last occupant was served the OP.

For nonresidential tenants, the RAP Unit issues a 90-Day Information Notice as early as 30 days after the Notice of Eligibility is provided and before the court issues the OP. The RAP Unit then issues a 30-day Notice to Vacate with date certain after the court issues the OP. For nonresidential tenants NOT named in the suit, the RAP Unit provides a courtesy copy of the Summons and Complaint and the Notice to Motion.

10.03.11.00 90-Day Notice to Vacate

Under rare circumstances, such as when condemnation proceedings have begun and the displacee then decides to settle by RW contract, it may be appropriate to issue a 90-Day Notice to Vacate. This should only occur when a 90-Day Information Notice has not been issued, the date certain has been determined, and at least 90 days are available before the Department obtains control of the property. Use Form RW 10-23 for residential displacees and Form RW 10-24 for nonresidential displacees.

© 1994-2025 California Department of Transportation. All rights reserved.

10.03.12.00 Notices to State-Inherited Tenants

Eligible displacees who are either delinquent in their rental payments to the Department, or in violation of their rental agreement with the Department, are considered unlawful occupants for property management purposes. They are still entitled to their RAP benefits as stated in their Notice of Eligibility and Conditional Entitlement Letter. Property Management will serve either a 3-Day Notice to Pay Rent or Quit or a 30-Day or 60-Day Notice of Termination of Tenancy and Notice to Quit. Property Management is responsible for advising the Region/District RAP Agent that Property Management will begin eviction proceedings.

The RAP Agent must ensure service of the 90-Day Information Notice and appropriate Notice to Vacate prior to the Department's control of the property. Property Management and RAP need to coordinate appropriate action in the event a displacee does not vacate the property in a timely fashion. Copies of the RAP notices should be sent to Property Management to be retained in their file.

Once Property Management decides to evict an unlawful eligible tenant, the eviction process should be carried to conclusion.

Eligible tenants who are evicted by the Department because of unlawful occupancy must be advised that they retain eligibility for relocation advisory assistance and payments.

Property Management will proceed with unlawful detainer (UD) action when displaced tenants do not move from the property after control has been obtained from the owner. The RAP Unit must work closely with Legal, Property Management, and Acquisition to ensure this process proceeds smoothly. At a minimum, the RAP Unit will oversee the move of personal property into storage. The RAP Agent is therefore usually present when the UD is served by the Sheriff.

Ineligible displacees (e.g., non-U.S. residents, occupants after Department's control, unlawful occupants as determined by 10.01.03.05) will not receive relocation benefits. Generally, these occupants are State tenants who rent the property after acquisition by the State. There are no requirements to provide ineligible displacees with the RAP 90-Day or 30-Day Notices.

© 1994-2025 California Department of Transportation. All rights reserved.

Although the Department is under no obligation to the ineligible displacee, Region/District staff are encouraged to provide advisory services to help them find replacement property. There is no requirement to provide advisory assistance to state tenants.

10.03.13.00 Urgent Need (49 CFR 24.203[c][4])

In extremely rare circumstances, an eligible displacee may be required to vacate the property on less than 90 days' advance written notice. The Department must determine that delivery of the 90-day notice is impracticable in order for this to occur (i.e., the person's continued occupancy of the property would constitute a substantial danger to health or safety to those occupants or others). The RAP diary should fully document the circumstances that required someone to move prior to issuing 90-day notices.

10.03.14.00 Notice to Withdraw or Modify Relocation Benefits

There are situations when it is appropriate to withdraw or modify the relocation benefits that have been provided in a Notice of Eligibility or a Conditional Entitlement Letter. Any time there is a change in the benefits that will be provided to a displacee, the Agent must immediately provide a Notice to Withdraw or Modify Relocation Benefits. The Notice must be personally delivered if possible, but at the very least sent by certified registered mail. However, if the displacee has relied on the promise of relocation benefits and has committed themselves financially or via a contract, the Department may be obligated to pay those relocation benefits in question. Refer to 10.01.04.00 for discussion of Promissory Estoppel and 10.09.07.00 for discussion on appeals due to Promissory Estoppel.

There is no standard form for a Notice to Withdraw or Modify Relocation Benefits. The Agent should prepare a letter that addresses the particular benefit(s) that is impacted (previous amounts, new amounts, reason for the change, etc.) and the right for the person to appeal the determination. A copy of the Appeal Form (RW 10-06) should be provided upon request.

A person who receives a Notice of Withdrawal or Modification of Benefits that decreases a monetary benefit is entitled to appeal the determination.

10.03.14.01 Withdrawal of Benefits

If the Department determines that a person or persons who has received a Notice of Eligibility is no longer eligible for any of the relocation benefits discussed in the letter, then withdrawal of all relocation benefits must be provided. Note: "All relocation benefits" include Advisory Assistance.

The following situations require an immediate notification to the displacee that their benefits are being withdrawn:

1. A long-term postponement of the project creates a situation wherein only irrevocable commitments are allowed under Departmental policy.
2. A design modification reduces the requirement for some or all of the property, and the person is no longer required to relocate.

© 1994-2025 California Department of Transportation. All rights reserved.

3. The occupant's status as a tenured resident or a valid business is in question, and the Agent has determined they no longer qualify for relocation benefits.
    - A resident purporting to be in occupancy for 90 days is only a seasonal resident and has a primary residence elsewhere.
    - A business claims to operate on the property, but in fact only stores personal property at the site and the business license (and other documentation) shows the primary place of business is at another site.
4. The Department and the occupant are no longer pursuing advanced acquisition, and tenants who have already made efforts to relocate but continue to occupy the property.

A person who receives a Notice of Withdrawal or Modification of Benefits is entitled to appeal the determination. If the person claims Promissory Estoppel, the Statewide Appeals Board must hear the appeal. (See 10.09.07.00.)

There may be other situations that require an immediate withdrawal of benefits. Contact HQ RW if there are questions about whether a notice should be issued.

10.03.14.02 Modification of Benefits

A modification of benefits includes increases and decreases of a monetary benefit, but the person is still entitled to some of the relocation benefits discussed in the Notice of Eligibility.

1. A change in the real estate market indicates the cost of a comparable replacement property is lower than the previous entitlement.
    - A 90-day owner-occupant's price differential is rarely reduced, and only when the Department can document that the person has made no effort to find replacement property based on the amount in the Conditional Entitlement Letter.
2. The 90-day owner-occupant wants to rent.
3. The residential occupant has requested, and received, approval to occupy non-DS&S housing as to size and number of bedrooms.
4. The residential occupant has vacated the displacement property, but has not found replacement property within the one-year time period. (See 10.08.02.00.)

© 1994-2025 California Department of Transportation. All rights reserved.

5. A change in the acquisition offer (revised appraisal, administrative settlement) requires a change in Replacement Housing Valuation adjustment (major exterior attribute) or carve-out value (typical residential lot), which modifies the RHP.
6. A further review of the nonresidential operation's documents indicates a change in the previously discussed in-lieu payment, reestablishment payment, or other moving payment.
7. A member of a residential household dies prior to relocation, and the need for a larger replacement property, or a property that is barrier free, no longer exists.
    - The Modification of Benefits can only be mailed after a new RHV is prepared, and only if the occupants have not made a commitment to rent or purchase replacement property.

There may be other situations that require an immediate modification of benefits. Contact HQ RW if there are questions about whether a notice should be issued.

10.03.14.03 Waiver of Relocation Benefits

49 CFR 24.207(f) specifically prohibits agencies from proposing or requesting a displacee waive relocation benefits. Since the Uniform Act imposes requirements on displacing agencies to provide relocation benefits, the displacee cannot relieve an agency from the Uniform Act's requirements by agreeing to waive relocation benefits. 49 CFR 24.207(f), Appendix A, states that a displacee may, after having been fully advised of all relocation benefits to which they are entitled, provide a written statement stating they choose not to accept some or all of such benefits. Any such written statement must clearly show that the individual knows what they are entitled to receive (a copy of the Notice of Eligibility which was provided may serve as documentation) and their statement must specifically identify which assistance or payments they have chosen not to accept. The statement must be signed and dated and may not be coerced by the agency. In the unlikely event that a displacee refuses to accept some or all of the benefits, and refuses to provide a written statement to that effect, the Department will document such refusal in writing.

10.04.00.00 – RESIDENTIAL DISPLACEMENTS

RESIDENTIAL DEFINITIONS

- Dwelling (49 CFR 24.2[a] "Dwelling"): The place of permanent or customary and usual residence of a person, according to local custom or law, including a single family house; a single family unit in a two-family, multi-family, or multi-purpose property; a unit of a condominium or cooperative housing project; a mobile home; or any other residential unit.

- Mortgage (49 CFR 24.2[a] "Mortgage"): Such classes of liens as are commonly given to secure advances on, or the unpaid purchase price of, real property, under the laws of the State in which real property is located, together with the credit instruments, if any, secured thereby.

- Owner of a Dwelling (49 CFR 24.2[a] "Owner of a dwelling"): A person is considered to have met the requirement to own a dwelling if the person purchases or holds any of the following interests in real property:
    1. Fee title, a life estate, a land contract, a 99-year lease, or a lease including any options for extension with at least 50 years to run from the date of acquisition; or
    2. An interest in a cooperative housing project which includes the right to occupy a dwelling; or
    3. A contract to purchase any of the interests or estates described in Subparagraphs (p)(1) or (2) of this section; or
    4. Any other interest, including a partial interest, which in the judgment of the Agency warrants consideration as ownership.

- Person (49 CFR 24.2[a] "Person"): Any individual, family, partnership, corporation, or association.

- Tenant (49 CFR 24.2[a] "Tenant"): A person who has the temporary use and occupancy of real property owned by another.

© 1994-2025 California Department of Transportation. All rights reserved.

- Life Estate: A person who holds a life estate has the right to occupy a property for life. Many times, a life estate is retained by a person who has been granted such right by a grantor or who conveys the remainder interest to another person. The computed RHP may depend upon distribution of the acquisition payment in accordance with state law but should be sufficient to enable the displaced person to relocate as an owner with an interest at least equivalent to the interest held prior to the acquisition of the property. The payment computation will be based on the total amount of the acquisition payment for a dwelling comparable to the acquired dwelling.

10.04.01.00 Residential Relocation Benefits

Residential displacees are entitled to advisory assistance (10.01.09.01), moving expenses, and RHPs. Eligibility is based on their status as an owner or a tenant, and based on the length of occupancy in the residence at the time of the Initiation of Negotiations (ION), and their status as a U.S. resident (10.01.11.00). The ION begins with either a Notice of Intent to Acquire (NIA) or a First Written Offer (FWO).

To receive the full amount of the calculated RHP, the displacees must occupy a DS&S (10.06.05.00) property within the prescribed time period (10.08.02.00 and 10.08.03.00) and file a claim (10.08.04.00). The Uniform Act is a reimbursement program designed to assist displacees in relocating to a new site. Displacees must spend at least the amount calculated by the Department on a replacement property in order to receive the full amount of the RHP.

Except for Subsequent occupants, the displacees may receive relocation benefits prior to the close of escrow (or any other date the State takes possession) as long as other criteria have been met (e.g., occupied the property on the date negotiations were initiated). (See 10.01.03.04 in regard to subsequent occupants.)

10.04.01.01 U.S. Residency Requirement for Moving Expenses

Residential moving expenses will be paid, provided the person has certified the household's legal status and signed the claim form.

When no member of the household is lawfully present in the United States, no moving expenses will be paid.

© 1994-2025 California Department of Transportation. All rights reserved.

If some of the occupants are not lawfully present, their personalty must be relocated at their own expense. The RAP Agent must prorate the moving expenses so that only those who can certify as to their status receive a moving expense allowance or reimbursement.

The MSA should not be used when some members of the household are not eligible for moving expenses.

EXAMPLE:

Two of the five occupants cannot or will not certify they are legal U.S. residents. The head of the household has certified that he/she and the other two occupants are present in the U.S. legally. The moving expenses must be prorated 3/5ths as follows:

A. Fixed Moving Schedule (FMS): Normally, the eight (8)-room house would receive $2,365; but because only three (3) of the five (5) occupants are U.S. residents, the fixed moving schedule is $1,419, payable when all the personalty has been moved from the property.
B. Actual Move: The moving company with the lowest bid must be advised that the displacees will be responsible for paying the ineligible 2/5ths of the entire cost. If the non-U.S. residents remove 2/5ths of the entire household's personalty prior to the moving companies preparing their bids, then an adjustment is not necessary.

Additional information can be found under Caltrans Right of Way Manual Chapter 10.01.11.00 and related sections, including additional move options.

10.04.02.00 Moving and Related Expenses – Residential Entitlement (49 CFR 24.301[b])

Any displaced owner-occupant or tenant of a dwelling who qualifies as a displaced person (defined at 49 CFR 24.2[a] "Displaced person") is entitled to payment of his or her actual moving and related expenses determined to be reasonable and necessary, including expenses for:

a) Transportation of the displaced person and personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Region/District determines that relocation beyond 50 miles is justified (10.04.02.01).
b) Packing, crating, unpacking, and uncrating of the personal property.
c) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated household appliances, and other personal property.

© 1994-2025 California Department of Transportation. All rights reserved.

d) An agency may determine that the storage of personal property is a reasonable and necessary moving expense for a displaced person or person required to move temporarily. Agencies may approve a payment for storage when the process of relocating from the acquired site to the replacement site is delayed for reasons beyond the control of the displaced person. Storage may not be longer than 12 months, starting at the date of vacation from the acquired site and ending when the replacement site becomes available. Agencies may approve storage for more than 12 months in unusual instances as justified, documented, and approved by the agency.
e) Insurance for the replacement value of the property in connection with the move and necessary storage (10.05.02.08).
f) The replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee) where insurance covering such loss, theft, or damage is not reasonably available.
g) A displaced tenant is entitled to reasonable reimbursement, as determined by the agency, for actual expenses not to exceed $1,000, incurred for rental replacement dwelling application fees or credit reports required to lease a replacement dwelling.
h) Other moving related expenses that are not listed as ineligible under 49 CFR 24.301(h) as the Region/District determines to be reasonable and necessary.

10.04.02.01 Transportation

Displacee's cost of one-way transportation to the new location is allowable. Displacee may be paid on a mileage basis not to exceed the current rate established by the State Board of Control or fares charged by commercial transport (e.g., taxis). Special conveyance, such as the cost of an ambulance, may be paid. Actual, reasonable costs for meals and lodging are eligible when the Department finds such costs are necessary.

Moving payments for more than one move are not made, except where found to be in the public's best interest.

Generally, the displacee is responsible for costs beyond 50 miles, based on the most commonly used routes between move points. If it is determined that the move cannot be accomplished within 50 miles, the additional expenses for the longer distance may be allowed, but shall be limited to the nearest available site beyond 50 road miles.

© 1994-2025 California Department of Transportation. All rights reserved.

49 CFR 24.205(c)(2)(ii)(E) states that the Department shall offer all persons transportation to inspect housing to which they are referred. It is the responsibility of the RAP Agent to decide how the displacees will be transported to inspect replacement properties. If access, safety or liabilities are a concern, then the RAP Agent will offer reimbursement for other transportation such as a taxicab or rental car. Care should be exercised to ensure the expenses are actual, reasonable and necessary.

RAP Agents must preapprove the use of alternate transportation by the displacee, including a limitation of the number of trips (reasonable), the distance (within 50 miles), the locations to be viewed (addresses of properties that are comparable), and the method of transportation (excluding transportation by real estate brokers). Expenses are paid on a standard claim form as "other" moving expenses.

10.04.02.02 Types of Moving Payments (49 CFR 24.301[b])

Residential displacees have the choice of either a commercial move or a self-move. An overview of the various methods is listed below and will be detailed in sections 10.04.02.03-10.04.02.13.

Self-Moves are moves that may be performed by the displaced person in one or a combination of the following methods (49 CFR 24.301[b][2]). The types of self-moves are as follows:

1. Fixed Residential Moving Cost Schedule: The Fixed Residential Moving Cost Schedule described in 49 CFR 24.302 and 10.04.02.03.

2. Actual Cost Move: Supported by receipted bills for labor and equipment.

3. Moving Cost Estimate: Prepared by a qualified agency staff person, as developed from the agency's thorough review of the personal property to be moved and documented costs for materials, equipment, and labor.

4. Commercial Mover Estimate: This is based on the lower of two bids from a commercial mover.

© 1994-2025 California Department of Transportation. All rights reserved.

Commercial Moves are moves performed by a professional mover under 49 CFR 24.301(b)(1). Commercial Move types used by the Department are as follows:

1. Actual Reasonable Cost of Move by For Hire Carriers: Lowest of two bids from moving companies, and, after the move is complete, the displacee may:
    - pay carrier directly and seek reimbursement, or
    - assign payment to carrier, and the RAP Agent pays carrier directly.

2. Moving Service Authorization (MSA): selecting any moving company on the Department of General Services' list of Moving Companies for the State entitled "State List of Eligible Household Goods Carriers." To obtain the current list, refer to DGS or the HQ Relocation Assistance Office. Payment is made directly to the moving company after completion of the move. (The Moving Service Authorization is a kind of commercial mover estimate.)

Except for the fixed payment, the displacee is eligible for all other necessary and actual moving expenses listed under 10.04.02.00.

10.04.02.03 Fixed Moving Schedule (49 CFR 24.302)

Any person displaced from a dwelling or a seasonal residence is entitled to receive a fixed payment for moving expenses and dislocation allowance as an alternative to a payment for actual moving and related expenses. FHWA has approved the following schedule for California for displacee moves including dislocation allowance for utility service connections. The fixed moving schedule is available online at FHWA's website. In the event the FHWA website contains more recent data, use the FHWA guidelines to determine the Fixed Moving Schedule payment.

The schedule includes a provision of $100 for the expense and dislocation allowance to:

- a person with minimal personal possessions who is in occupancy of a dormitory-style room shared by two or more other unrelated persons, or
- a person whose residential move is performed by the Region/District at no cost to the person (an extremely rare situation).

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.02.04 Fixed Moving Schedule (Chart) (Effective August 26, 2021)

SCHEDULE A

(OCCUPANT OWNS FURNITURE)

Number of Rooms	Payments
1	$780
2	$1,000
3	$1,250
4	$1,475
5	$1,790
6	$2,065
7	$2,380
8	$2,690
Each additional room	$285

SCHEDULE B

(FURNITURE PROVIDED BY LANDLORD)

Rooms	Payments
One room	$510
Each additional room	$100
Dormitory Style rooms (Includes hotel/motel rooms, caretaker facilities, assisted living rooms, and "rooms for rent.")	$100

"Room" for the Fixed Moving Schedule means space in a unit containing the usual quantity of personal property. Normal division includes living room, dining room, bedroom, kitchen, recreation room, library, study, laundry room, basement, garage, workshop, and patio. Other rooms, garages, or storage areas having personal property equivalent to one or more normal rooms may be counted as additional rooms. Most bathrooms do not count as a room.

Counting rooms requires judgment. A large room may have so much furniture that it can be considered two rooms. An alcove or dining area may be a separate room if it has dining room furniture. The RAP Agent must record all room equivalents and briefly explain any judgments. Generally, 1,000 pounds and/or 142 cubic feet of personal property and furniture is equivalent to a

© 1994-2025 California Department of Transportation. All rights reserved.

"room." Examples: 100 pounds would represent four floor-to-ceiling 3' wide bookshelves filled with books, or a well-stocked, walk-in pantry. Additionally, two small rooms with minimal items of personal property might be counted as one room.

Schedules A and B also apply to eligible moves from mobile homes.

Unusual items such as piles of junk, classic cars, or welding equipment should not be counted as an additional room. The RAP Agent should advise the displacee to utilize the Actual Move option for these items.

10.04.02.05 Fixed Payment Limitations and Variations

No temporary storage, utility hookups, lodging, or transportation expenses shall be paid to displacees receiving a fixed payment for moving expenses.

A multi-use property owner-occupant who elects to use Schedule A for the residential portion is still eligible for a business move from the other portion of the property.

Where the landlord partially furnishes the rental units, tenants may choose Schedule A to the nearest full room and Schedule B for the remaining rooms. The landlord may be paid for relocation of personal property only as a business move (see 10.05.05.00).

Scheduling payment based on either Schedule A or B requires only a "Claim for Relocation Assistance – Residential" (RW 10-02).

The displacee cannot receive the payment based on the Fixed Moving Schedule until the RAP Agent verifies that all personal property has been removed from the displacement site. Also, the Fixed Moving Schedule payment cannot be advanced, nor can it be retained by the Region/District Property Management section to pay for delinquent rent.

Under 49 CFR 24.302(a), an agency may determine that the storage of personal property is a reasonable and necessary moving expense for a displaced person under this part. The determination shall be based on the needs of the displaced person; the nature of the move; the plans for permanent relocation; the amount of time available for the relocation process; and whether storage will facilitate relocation.

© 1994-2025 California Department of Transportation. All rights reserved.

If the agency determines that storage is reasonable and necessary in conjunction with a fixed cost moving payment made under this section, the agency shall pay the actual, reasonable, and necessary storage expenses in accordance with §24.301(g)(4).

However, regardless of whether storage is approved, the Fixed Residential Move Cost Schedule provides a one-time payment for one move from the displacement dwelling to the replacement dwelling or storage facility. Consequently, displaced persons must be fully informed that reimbursement of costs to move the personal property to storage and the cost of approved storage, if applicable, represent a full reimbursement of their eligibility for moving costs under this part.

10.04.02.06 Actual Cost Move (49 CFR 24.301[b][2][ii])

Actual cost moves are supported by receipted bills for labor and equipment. Hourly labor rates should not exceed the cost paid by a commercial mover for moving staff necessary for moving the residential personal property. Costs for moving personal property that requires special handling should not exceed the hourly market rate for a commercial specialist. Equipment rental fees should be based on the actual cost of renting the equipment but not exceed the cost paid by a commercial mover.

10.04.02.07 Moving Cost Estimate (49 CFR 24.301[b][2][iii])

A moving cost estimate is prepared by a qualified agency staff person, as developed from the agency's thorough review of the personal property to be moved and documented costs for materials, equipment, and labor. Hourly labor rates should not exceed the cost paid by a commercial mover for moving staff. Costs for moving residential personal property that requires special handling should not exceed the hourly rate for a commercial specialist. Equipment rental fees should be based on the actual cost of renting the equipment but not exceed the cost paid by a commercial mover. The cost of materials should equal those readily available locally.

This is a new form of developing move costs that was not available to the Department prior to the amendments to the Uniform Act Final Rule, which went into effect on June 3, 2024.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.02.08 Commercial Mover Estimate (49 CFR 24.301[b][2][iv])

A commercial mover estimate is based on the lower of two bids from a commercial mover. Federal funding agencies may establish policies and procedures which require their grantees to calculate and subtract an estimated amount of overhead and profit from the moving cost bids to establish reimbursement eligibility.

This method involves either the displacee or the Department obtaining a minimum of two bids from a commercial mover which is then used to determine the move costs to be paid to the displacee. Payment should be paid after all personalty has been removed unless it would be a hardship to the displacee. Advance payments should be no more than half. Any advance payments should be approved by the District RAP Senior and documented in the file.

10.04.02.09 Commercial Moves (49 CFR 24.301[b][1])

The Department uses two kinds of commercial moves for residential moves – the actual, reasonable cost of the move by for-hire carriers and Moving Service Authorizations (MSAs). These moves are discussed in the sections below (10.04.02.10-10.04.02.13).

10.04.02.10 Actual Reasonable Cost of Move by For-Hire Carriers

One kind of commercial move used by the Department is based on the lower of two bids from a commercial mover. Federal funding agencies may establish policies and procedures which require its grantees to calculate and subtract an estimated amount of overhead and profit from the moving cost bids to establish a reimbursement eligibility when displacee performs a self-move under this section.

A displaced individual or family may be paid actual reasonable cost of a move accomplished by a qualified carrier. Displacee shall secure at least two firm bids based on a list of the personal items to be moved and submit to the RAP Unit for approval prior to the move. If displacee will not make direct payment, they must inform carriers that the Department will pay for the move. Bids must be on company letterhead signed by a person authorized to bind the firm and must contain the following statement:

© 1994-2025 California Department of Transportation. All rights reserved.

"As this move is the result of displacement from real property acquired for public purposes and cost is to be borne by the State of California, the costs and charges for this move are exempt from regulations by the Public Utilities Commission. The cost of performing the work in connection with this move will not exceed cost quoted herein. All work performed under this bid shall be accomplished in a good and workmanlike manner and in accordance with standards normally applied by the industry. The company shall be responsible for the actual replacement cost of all loss or damage incurred in the performance of the work."

Either the displacee or the RAP Agent can request estimates from the moving companies. The RAP Agent must review the estimates to determine appropriateness of charges and then advise the displacee of the lowest bid. The displacee may choose any moving company to perform the move; however, the payment will be limited to lesser of the actual amount or the amount of the lowest bid. The displacee may request the payment be assigned directly to the moving company.

Often, reasonable moving expenses cannot be completely determined until after the move has been completed. Appropriate adjustments to the final bill should be made if the bid or estimate could not reasonably have been expected to include the additional charges.

10.04.02.11 Moving Service Authorization (MSA)

Another kind of commercial move used by the Department is the Moving Service Authorization (MSA). The use of MSA (RW 10-29) permits direct payment to the carrier and is the preferred method of paying commercial movers. This method of relocating displacees is primarily for residential household goods, but can be used for small business moves.

10.04.02.12 Payment for Other Services – MSA

If authorized, charges for storage may be included in the carrier's itemized bills.

The MSA should include an appropriate amount for insurance of the personalty. Review Section 10.04.02.08 for additional guidelines.

Payments for other entitlements (e.g., utility hookups), other services (such as ambulance service to move a nonambulatory person), or temporary lodging may be made to displacee in the same manner as provided for actual cost moves by commercial movers.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.02.13 Requirements for Scheduling Payments – MSA Method

Generally, there are no out-of-pocket expenses for the displacee if the move is within 50 miles. The moving company submits the bill to Department of General Services (DGS); and once approved by the Traffic Manager, the invoice is submitted to the Region/District for payment. A copy of the fully executed MSA form and the carrier's itemized bill showing the DGS Traffic Manager's stamp are needed to support the claim schedule. No other claim form from the displacee is required.

(See Processing MSA – Exhibit 10-EX-27.)

10.04.02.14 Dislocation Allowance

Displacees who elect an actual move (MSA or Actual Move) are also entitled to reimbursement for the dislocation and hookups of household appliances and other personal property that are moved from the displacement property to the replacement property. Reimbursement is limited to those amounts that are actual, reasonable, and necessary as supported by documentation from the displacee. Typical charges are:

- Cable and telephone installation hookup fees (exclusive of any deposits for equipment or services).
- Retuning a piano or resetting a grandfather clock.
- Connection for an icemaker, a water softener, or a gas/electric dryer (not to include changes to the replacement property to accommodate the appliances).

If the Department moves the personal property from a dormitory style room that is shared by two or more persons, the dislocation allowance is limited to $100.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.02.15 Paying the Moving Company

The RAP Agent may pay a moving company after all personal property has been removed from the displacement site, by either:

- Written Arrangement – signed by displacee, Department, and mover. Displacee pays the moving company, and presents itemized bills and a proper claim to the Region/District Department after the move is completed. The RAP Agent reviews the bills and deletes any ineligible costs, processing the claim for payment to the displacee. Displacee is responsible for any ineligible costs.

- Assignment of Payment – displacee assigns the moving payment directly to the moving company, who agrees to accept payment after the invoices have been reviewed and the claim is processed. The Assignment of Payment is executed by displacee and carrier. Before assignment is accepted, the RAP Agent shall examine all documentation supporting the carrier's cost. Ineligible costs shall be deleted; only an assignment in the proper amount shall be accepted. Displacee is responsible for paying the moving company for all ineligible costs.

When scheduling payments directly to the moving companies, a copy of the written arrangement or assignment shall be attached to the Claim (RW 10-02).

10.04.02.16 Storage

A residential displacee MAY be entitled to storage of their personal property if the Region/District RAP Senior determines that it is absolutely necessary in order to vacate the displacee for the project.

Storage of personalty is not an automatic benefit and should only be authorized when it is in the best interest of the public and the project. The determination should be based on the needs of the Region/District, the nature of the displacee's operation, the plans for permanent relocation, the amount of time available for the relocation process, and whether storage would facilitate relocation. It is the RAP Senior's responsibility to establish the terms (e.g., monthly rate, term, comparable unit, storage accessibility). Examples of justifiable storage are:

- Displacee has diligently looked for replacement property, but has not been able to locate something because of the Department's DS&S requirements.

© 1994-2025 California Department of Transportation. All rights reserved.

- Construction of the replacement property has been delayed by some unforeseen circumstance, again not the result of the displacee's actions.
- The project's time schedule supports relocating the displacee's personalty immediately.

The displacee's storage must be preapproved by the RAP Senior based on the maximum period of time the displacee will need before permanent occupancy of the replacement property can take place, up to 12 months. Displacees are not automatically entitled to a full 12 months of storage.

Region/District may authorize a flat storage rate for the displacee's storage based on a market analysis of storage rates for comparable units. The displacee can be reimbursed at the end of the agreed upon time period after submitting a claim, including invoices and paid receipts. An optional method of payment is for the displacee to execute an Assignment of Funds wherein the Region/District may advance the first and last month's storage rent to the Storage Facility, and make periodic payments (e.g., quarterly) for the agreed upon time period.

All arrangements for storage should be documented in writing between the Region/District and the displacee, and if applicable, the storage facility.

Displacees are also entitled to the actual, reasonable, and necessary costs to move their personalty into and out of storage, up to 50 miles for each move (including necessary unloading and stacking), unless the displacee elects the fixed residential moving cost schedule. The Region/District is only responsible to move the same amount (or less) of personal property out of storage to the replacement site. The displacee must be advised that they cannot move other personal property items into the storage unit during the period of storage.

Should the displacee elect for the fixed residential moving cost schedule, under 49 CFR 24.302(a), they should be advised that regardless of whether storage is approved, the Fixed Residential Move Cost Schedule provides a one-time payment for one move from the displacement dwelling to the replacement dwelling or storage facility. Consequently, displaced persons must be fully informed that reimbursement of costs to move the personal property to storage and the cost of approved storage, if applicable, represent a full reimbursement of their eligibility for moving costs under this part.

© 1994-2025 California Department of Transportation. All rights reserved.

Extensions beyond 12 months should be rare and only when the displacee's circumstances are so unusual that an additional month or two of storage is warranted.

NOTE: Displacees are entitled to insurance for the replacement value of the personal property in connection with the authorized storage.

10.04.03.00 Replacement Housing Payments (RHPs)

49 CFR 24.2(a) "Comparable replacement dwelling"(viii) requires the replacement property to be within the financial means of the displaced person as determined by the following:

1. A replacement dwelling purchased by an eligible 90-day owner-occupant is considered to be within the displacee's "financial means" if the homeowner will receive the maximum calculated Price Differential (PD) (10.04.09.00), the full Mortgage Differential (MD) (10.04.12.00), and the reimbursement for all eligible Incidental Expenses (IE) (10.04.13.00).

2. A replacement dwelling occupied by an eligible 90-day occupant is considered to be within the displacee's financial means if, after receiving the maximum calculated Rent Differential (RD) (10.04.16.00 and related sections), the displacee's monthly rent and estimated average monthly utility costs for the replacement dwelling do not exceed the person's base monthly rental for the displacement dwelling.

3. Non-tenured (less than 90-day) occupants are eligible to receive an RHP based on last resort housing provisions. Comparable replacement rental housing is considered to be within the person's financial means if the Region/District pays that portion of the monthly housing costs of a replacement dwelling which exceeds 30 percent of the displacee's average monthly gross household income, provided the average gross monthly income falls within the parameters of the Housing and Urban Development (HUD) low-income chart. If the displacees do not fall under HUD income guidelines, the RD will be calculated on a rent-to-rent basis.

4. Subsequent (post offer) occupants who occupy the property after the initiation of negotiations but before the Department has control of the property are eligible to receive an RHP based on last resort housing provisions. Subsequent occupants must occupy the displacement

© 1994-2025 California Department of Transportation. All rights reserved.

dwelling at the time the Department receives control of the property in order to be eligible for relocation benefits. The calculations follow those for Non-tenured occupants.

10.04.03.01 Maximum RHP

To receive the maximum RHP (PD or RD), the displacee must purchase or rent, and occupy a DS&S residential property within the time frame prescribed in 10.08.02.00. The actual replacement property does not have to be comparable to the displacement property nor the probable replacement property from the Replacement Housing Valuation (RHV). However, the actual price or rent paid for the property must be equal to or greater than the amount of the probable replacement property ("spend-to-get").

In rare cases, a 90-day Owner-Occupant may not be entitled to a PD (calculation is zero, or does not "spend-to-get"); however, an MD and/or IE may still be paid if the displacee meets the same time frames to occupy a DS&S property.

10.04.04.00 Inspections of Replacement Dwelling (49 CFR 24.403[b])

Before making an RHP or depositing a payment into escrow, the RAP Agent shall inspect the replacement dwelling and determine whether it meets DS&S standards.

The inspection must be complete prior to the displacee committing to the purchase/rental of the property.

Under Appendix A, section 24.205(c)(2)(ii)(C), each agency should clearly inform displaced persons that a DS&S inspection as required by this part is only a brief inspection to ensure that certain requirements as they relate to the definition of DS&S in this part are being met. These DS&S inspections are not the same as a full home inspection similar to that which a home inspector would be hired to do.

The RAP Agent shall complete a DS&S Inspection Report (RW 10-40) as a prerequisite to any replacement housing or rental RHP. The form is completed, signed and dated in ink, and filed in the District RAP file. A copy of the form is not included in the claim package.

© 1994-2025 California Department of Transportation. All rights reserved.

For a displaced person with a disability, the replacement dwelling shall be free of any barriers which would preclude reasonable ingress, egress, or use of the dwelling by such displaced person (49 CFR 24.2(a) "Decent, safe, and sanitary (DSS) dwelling" [vii]). Features that exist at the displacement property must be available at the replacement dwelling, either as existing or as being added via last resort housing. If medical substantiation is provided, additional features may be added to the criteria for decent, safe, and sanitary. (See 10.06.06.00 for replacement housing valuation criteria.)

All specifications relating to the replacement must be answered "yes" to qualify it as a DS&S replacement dwelling.

The three data sections at the top of the Inspection Report provide a means of comparing the area and room requirements of the people who will occupy the replacement dwelling with its habitable area and room count. The replacement dwelling area and room count must equal or exceed comparability requirements before payment can be made. Estimated dimensions may be used when computing areas for the various rooms.

10.04.04.01 DS&S Inspections for Others

Region/District staff may be contacted to provide DS&S inspections for other states. The RAP Senior should respond promptly to the request and ensure that any relevant issues related to the inspection are obtained in advance of the actual inspection, with appropriate remarks returned to the requesting agency.

There may also be situations that require the RAP Senior to request another agency to perform the DS&S inspection for a displacee that has relocated out of California or the United States. These requests should be made through that area's regional FHWA office, the State Highway Department, or the main governmental body.

10.04.05.00 Inability to Meet Occupancy Requirements (49 CFR 24.403[d])

No person shall be denied eligibility for an RHP solely because the person is unable to occupy the replacement property within the time frames set forth in 10.08.02.00 for a reason beyond his or her control, including:

1. A disaster, an emergency, or an imminent threat to the public health or welfare, as determined by the President, the Federal agency funding the project, or the displacing agency; or

© 1994-2025 California Department of Transportation. All rights reserved.

2. Another reason, such as a delay in the construction of the replacement dwelling, military reserve duty, or hospital stay, as determined by the Region/District.

A displacee may enter into a construction contract for rehabilitation of a replacement dwelling or into a legally binding contract for purchase of a replacement dwelling, but cannot secure title and/or occupy the dwelling within the required period for reasons beyond reasonable control. In these situations, the RAP Unit shall consider displacee as having purchased and occupied the dwelling as of the date of the construction or purchase contract. Displacee must have entered into the contract, however, before the normal one-year replacement period expired.

The RAP Agent shall secure a statement signed by displacee summarizing the reasons beyond their reasonable control and retain it in the case file.

The RHPs under the above situations shall be deferred until the person actually occupies the replacement dwelling. When replacement housing is being built or rehabilitated, partial payments may be made from escrow.

10.04.06.00 U.S. Residency Requirement for RHPs

Displacees who are not present in the U.S. legally cannot receive an RHP. If the household has some occupants that cannot certify they are legal U.S. residents, the RHP for the remaining U.S. residents must be adjusted (49 CFR 24.208[c]). The unlawful occupants are not counted as part of the family and its size is reduced accordingly. Thus, a family of five, one of whom is a person not lawfully present in the country, would be counted as a family of four. Appendix A of 49 CFR 24.208(c) has additional examples and information regarding this issue.

For owners, the number of bedrooms to satisfy DS&S requirements will be based on the number of occupants having legal status but will not be less than the number of bedrooms at the displacement property. For tenants, the number of bedrooms to satisfy DS&S requirements will be based on the number of occupants having legal status. For example, a household of seven (including one displacee not present legally, individually occupying one bedroom) would receive an RHP based on a comparable with three bedrooms, even if the displacement dwelling contains four bedrooms. In determining whether or not the "thirty percent of income" rule should be used in calculating the RD, the income of a family member who is not certified must still be considered in determining household income, or the entire household's income cannot be considered for the "thirty percent rule."

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.07.00 RHPs – 90-Day Owner-Occupant's Eligibility (49 CFR 24.401[a])

A permanently displaced person is eligible for the RHP for a 90-day homeowner-occupant if the person:

1. Has actually owned and occupied the displacement dwelling for not less than 90 days immediately prior to the initiation of negotiations (FWO or NIA); and
2. Purchases and occupies a DS&S replacement dwelling within 1 year after the later of the following dates (except that the Region/District may extend such 1-year period for good cause);
    i. The date the person receives final payment for the displacement dwelling or, in the case of condemnation, the date the full amount of the estimate of just compensation is deposited in the court, or
    ii. The date the agency's obligation is met under 49 CFR 24.204, which includes:
        a. One comparable dwelling has been made available, preferably three or more. Available means:
            i. Information on comparable dwellings used to determine RHP is provided to permanently displaced persons.
            ii. The person is informed in writing of its location.
            iii. The person has sufficient time to enter into the purchase or a lease agreement.
            iv. Subject to reasonable safeguards, the displacee is assured of receiving RAP assistance and acquisition payment in sufficient time to enter a purchase or lease agreement.
        b. Exceptions may be made to the above conditions in cases of a major disaster as defined in 42 U.S.C. 5122, a presidentially declared state of emergency, or any other emergency that necessitates immediate vacation. Basis conditions of such a move are as follows (whenever possible):
            i. Take whatever steps are necessary for a DS&S dwelling.
            ii. Pay the actual, reasonable out-of-pocket moving expenses and any reasonable increase in rent and utility costs incurred in connection with the emergency move.

© 1994-2025 California Department of Transportation. All rights reserved.

iii. Make available as soon as possible at least one comparable replacement dwelling (date of displacement will be the date displacee moves from their dwelling due to the emergency).

10.04.07.01 90-Day Owner-Occupant RHP (49 CFR 24.401[b])

The RHP for an eligible 90-day homeowner-occupant is limited to the amount necessary to relocate to a comparable replacement dwelling. The payment shall be the sum of:

1) The amount by which the cost of a replacement dwelling exceeds the acquisition cost of the displacement dwelling (PD); and
2) The increased interest costs and other debt service costs which are incurred in connection with the mortgage(s) on the replacement dwelling (MD); and
3) The reasonable expenses incidental to the purchase of the replacement dwelling (IE).

If the sum of these three payments exceeds $41,200, then LRH provisions apply.

A 90-day owner-occupant may receive an RD in lieu of the entire RHP (10.04.14.00).

10.04.07.02 Purchase of Replacement Dwelling (49 CFR 24.403[c])

A displaced person is considered to have met the requirement to purchase a replacement dwelling, if the person:

1. Purchases a dwelling; or
2. Purchases and rehabilitates a substandard dwelling; or
3. Relocates a dwelling which he or she owns or purchases; or
4. Constructs a dwelling on a site he or she owns or purchases; or
5. Contracts for the purchase or construction of a dwelling on a site provided by a builder or on a site the person owns or purchases; or
6. Currently owns a previously purchased dwelling and site, valuation of which shall be on the basis of current fair market value.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.07.03 Rehabilitation of Replacement Dwelling

Rehabilitation and/or home improvement costs must be incurred or committed at the time of purchase and occupancy of a DS&S replacement dwelling. If the displacee was provided the address of a comparable replacement property at the time of displacement, there is no provision for any additional payments for cost incurred by the displacee undertaking home improvements if occupancy of a DS&S dwelling is delayed. Costs to add luxury items, ornamentation, or unusual or atypical features are also not eligible for reimbursement as a replacement housing payment claim. This is a separate issue from rehabilitating a previously owned dwelling (10.04.11.00).

The displacee is required to include any rehabilitation of home improvement work as part of the sales agreement, and/or in the mortgage financing for the purchase and improvement of the replacement dwelling. The rehabilitation or home improvement financing should be adequately structured with other requirements such as adequate building plans and specifications for the work prepared conforming to local building codes and lender requirements, enforceable contractor guarantees, fire and hazard insurance requirements, and bonding to assure satisfactory work and scheduled completion.

There are significant sources of home improvement mortgage financing via the HUD/FHA loans that may be available for displacees who choose to improve their replacement properties.

10.04.08.00 Payment Procedures

- Payment into Escrow: All or a portion of the estimated RHP can be placed into escrow to assist the displacee with the financial aspects of the purchase based on estimated closing and loan documents. The Region/District's escrow instructions for the displacee's actual replacement property require the final closing statement state the total price of replacement dwelling.

- Payment After Escrow Has Closed: Displacee may choose to complete the purchase of the replacement property without any of the RHP deposited into escrow in advance. After close of escrow, displacee must submit certified copies of the closing statement and the Truth-In-Lending statements, along with a claim form for reimbursement. The RAP Agent will review all documentation and pay the eligible expenses.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.09.00 Price Differential Calculation

The PD is the amount which must be added to the acquisition cost of the displacement dwelling to provide a total amount equal to the lesser of:

i. The reasonable cost of a comparable replacement dwelling as determined in accordance with 10.06.00.00.
ii. The purchase price of the DS&S replacement dwelling actually purchased and occupied by the displaced person.

Procedures for computing PD are shown on Table 10.04-A.

10.04.10.00 Owner Retention of Displacement Dwelling (49 CFR 24.401[c][2])

If the owner retains ownership of the displacement dwelling, moves it from the displacement site, and reoccupies it on a replacement site, the purchase price of the replacement dwelling shall be the sum of:

1. Cost of moving and restoring the dwelling to a condition comparable to that prior to the move; and
2. The cost of making the unit a DS&S replacement dwelling; and
3. The current fair market value (vs. historical cost) for residential use of the replacement unless the claimant rented the displacement site and there is a reasonable opportunity for the claimant to rent a suitable replacement site.
4. The retention value of the dwelling, if such retention value is reflected in the "acquisition cost" used when completing the RHP.

The combined costs of relocation, rehabilitation, and improvement to DS&S standards are eligible for reimbursement to the extent they do not exceed the maximum PD entitlement based on comparable replacement properties. This may include construction of features such as garages if they cannot be moved. Interim or construction financing costs can be considered in the total construction costs to meet the "spend-to-get" requirements for the maximum PD.

The Region/District is not required to prepare an expensive or sophisticated valuation report to determine the value of the property. The Region/District should ensure that its valuation is reasonable and supportable as its determination could be appealed.

© 1994-2025 California Department of Transportation. All rights reserved.

Refer to 8.06.08.00 and 8.06.09.00 for additional information on owner retention or relocation of improvements. Under Section 8.06.08.00, Acquisition does not participate in the cost to move the dwelling but pays the "in-place" value of improvements, minus salvage value. Under Section 8.06.09.00, Acquisition pays the cost to move the dwelling to the remainder and reconnect all utilities. In both cases, RAP can pay the PD based on the RHV for a DS&S comparable replacement property based on the fair market value of the DS&S dwelling reestablished on the remainder.

10.04.11.00 Previously Owned Replacement Dwellings (49 CFR 24.403[c][6])

A displacee who moves into a previously owned replacement residential property is still entitled to the RHP (PD, MD, IE) regardless of how long the property has been previously owned, or how it was acquired (inherited, gifted, purchased, built).

To receive the maximum PD, the previously owned replacement property must have a current fair market value equal to or greater than the price of the comparable replacement property (RHV).

The displacee may also be entitled to an MD based on the existing loan that was obtained sometime prior to vacating the displacement property, or a new MD and related expenses (IE) if the displacee chooses to refinance the existing loan on the previously owned replacement property. To be eligible for an MD, the new loan rate on the previously owned replacement property must be less than the existing loan, but more than the loan rate on the displacement property.

If the owner buys back the dwelling at the Department's auction, the reestablished dwelling on the new site or even the remainder qualifies as a previously owned replacement dwelling.

© 1994-2025 California Department of Transportation. All rights reserved.

BASIC COMPUTATION – PD

Type of Replacement	Computation
Purchase of Existing DS&S Replacement Dwelling	The PD is the difference between the acquisition cost of the displacement dwelling and the lesser of the following two amounts: • The price displacee actually paid for a replacement dwelling. • The price of a comparable dwelling as determined by the Department.
Rehabilitation of an Existing Non-DS&S Dwelling	Generally, the purchase price for "spend-to-get" requirements is the amount established in an escrow or written contract as the agreed selling price. The State will consider as part of the purchase price certain work required on the replacement dwelling, provided all such work is completed or contracted for within one year following the close of escrow for the replacement property. If displacee purchases a non-DS&S dwelling on the remainder or other land, the following costs are eligible for reimbursement: • Work necessary to meet DS&S standards. • Major exterior attributes found in both the displacement property and replacement property used to determine maximum payment.
Construction of a New Dwelling	With prior notification, displacee may build a replacement. PD is the difference between the acquisition cost of displacement dwelling and the least of the following two amounts: • Cost of an existing comparable replacement dwelling. • Current fair market value of a comparable newly constructed dwelling.
Ownership of Replacement Dwelling Prior to Displacement	A replacement dwelling owned by displacee prior to State's first offer may be used as a replacement dwelling in the computation of a PD payment. Regardless of the date or the manner in which the residence was acquired, the current fair market value of the residence is used to determine the amount spent by the claimant.

Table 10.04-A

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.00 Mortgage Differential (MD) (49 CFR 24.401[d])

The payment for increased mortgage interest cost shall be the amount, which will reduce the mortgage balance on a new mortgage to an amount, which could be amortized with the same monthly payment for principal and interest as that for the mortgage(s) on the displacement dwelling. (Exceptions to this are noted in 10.04.12.12 regarding reverse mortgages.) In addition, payments shall include other debt service costs (e.g., points and loan origination fees). The payment shall be based only on bona fide mortgages that were valid liens on the displacement dwelling for at least 180 days prior to the initiation of negotiations and is contingent upon a mortgage being placed on the replacement dwelling.

The MD calculation will result in an amount that is needed to reduce the mortgage balance on the actual replacement property to an amount that would result in the same monthly payment at the displacement property, if there was no change in the term or the mortgage balance.

Payment for increased mortgage cost is contingent upon displacee purchasing, occupying, and obtaining a mortgage on a DS&S replacement dwelling.

EXAMPLE:

The displacee had a $50,000 mortgage at the displacement property with a remaining term of 240 months at 7% = $387 PI

If the new mortgage at the actual replacement property were $50,000 at 10%, the payment for 240 months would be $482 PI. (Remember: assuming no change in term or balance between the displacement and replacement loans.)

How much money is needed to reduce the mortgage at the replacement property to an amount that would result in the $387 PI?

MD calculator will determine the Present Value of a 10% loan for 240 months with a $387 payment.
Present Value: $40,100

The MD payment to the displacee is the difference between the $50,000 and the $40,100, which should be used by the displacee to buy down the loan and reduce the payments (not mandatory).

© 1994-2025 California Department of Transportation. All rights reserved.

MD Payment: $9,900

10.04.12.01 MD Factors

The following factors shall be considered when computing the MD:

1. The payment shall be based on the unpaid mortgage balance(s) on the displacement dwelling.

   Note 1: In the event the person obtains a smaller mortgage than the mortgage balance(s) computed in the buy-down determination, the payment will be prorated and reduced accordingly.

   Note 2: To compute the buy-down if the term of the new mortgage is shorter than the remaining term of the displacement mortgage, a hypothetical monthly payment that assumes the displacement mortgage had the same shorter term must be used.

2. The payment shall be based on the remaining term of the mortgage(s) on the displacement dwelling or the term of the new mortgage, whichever is shorter.

3. The interest rate on the new mortgage used in determining the amount of the payment shall not exceed the prevailing fixed interest rate for conventional mortgages currently charged by mortgage lending institutions in the area in which the replacement dwelling is located.

4. Purchaser's points and loan origination or assumption fees, but not seller's points, shall be paid to the extent:

   - They are not paid as IE;
   - They do not exceed rates normal to similar real estate transactions in the area;
   - The RAP Agent determines them to be normal expenses and necessary for the replacement area, and
   - The computation of such points and fees shall be based on the lesser of the unpaid mortgage balance on the displacement or replacement dwelling, less the amount determined for the reduction of such mortgage balance under this section.

© 1994-2025 California Department of Transportation. All rights reserved.

5. The displaced person shall be advised of the approximate amount of this payment and the conditions that must be met to receive the payment as soon as the facts relative to the person's current mortgage(s) are known (see Exhibits 10-EX-13 and 10-EX-14); and the payment shall be made available at or near the time of closing on the replacement dwelling in order to reduce the new mortgage as intended.

See 10-EX-15 for example calculations, and the MD Calculator on the Right of Way Intranet (internal Caltrans link).

10.04.12.02 Items Not Eligible for Mortgage Differential

The following items are not eligible for MD:

- Interim financing or construction loans.
- Mortgages on all types of personal property.
- Mortgages that were materially changed less than 180 days before initiation of negotiations. This includes any change in rate, term, or monthly payment, excluding variable rate mortgages. A new trustee or beneficiary is not a material change.

Exceptions: Adjustable Rate Mortgages (10.04.12.13) and Home Equity Loans (10.04.12.08).

10.04.12.03 Determination of Rates, Points, and Fees

The RAP Agent must document interest rates, purchaser's loan points, and origination or assumption fees and retain all support documentation in District RAP files.

The RAP Agent shall contact three lending institutions in the replacement area, if available, to determine the prevailing interest rate. Additional lenders may be contacted at the Region/District's option. Information shall be updated quarterly or more often if necessary.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.04 Mortgage Interest Rates

The MD calculation is made on rates available as of the date of move from the displacement property, not when the displacee enters into a contract to purchase a replacement property (within the one-year time period).

The prevailing interest rate shall be the highest interest rate generally charged. In unusual circumstances, the RAP Senior may authorize using an interest rate that exceeds the prevailing fixed interest rate, in which case full documentation must be included in the file. Justification may be the unavailability of the current prevailing rate due to the amount of the new mortgage or other similar reasons.

Additionally, if the displacee is required to pay an interest rate that is higher than the prevailing rate due to his or her unique circumstances (e.g., poor credit risk), the higher interest may be used in calculating the MD if the RW HQ RAP Senior determines that the additional cost could prevent the displaced person from obtaining comparable housing. The diary must be documented to show justification for the rate used.

10.04.12.05 Points and Origination or Service Fees

These fees shall be the highest generally charged by lenders in the replacement area. The same sampling and updating requirements apply as with interest rates. See the above section for information on using higher than prevailing rates.

These fees may be paid as an IE if an actual increased interest rate is not incurred on the replacement dwelling. Where a loan did not exist on the displacement dwelling of a long-term owner, fees related to a loan on the replacement dwelling will not be reimbursed.

The purchaser's (displacee's) points and loan or assumption fees on a down payment should be considered IE. The RAP Unit shall determine rates and document data sources. If interest rates vary, the RAP Unit shall use the mortgage rate closest to the actual mortgage being replaced.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.06 Mortgage Differential Calculation

The MD can be calculated by hand, by downloading the "MD Calculator" from the Right of Way Intranet (internal Caltrans link), or by utilizing FHWA's MIDP Calculator.

Use the following definitions in determining which data and which format must be used.

TERM	DEFINITION
Buy-Down	Increased mortgage interest costs are commonly known as the buy-down. The buy-down is the payment required to reduce the balance on a new mortgage to an amount that can be amortized with the same monthly payment for principal and interest as for the mortgage(s) on the displacement dwelling. The payment includes purchaser's points and loan origination or assumption fees if not paid as incidental costs.
Old Mortgage	Existing mortgage balance on the displacement property.
New Mortgage	Mortgage on the replacement property.
Computed Amount for a New Mortgage	Amount to be financed to maintain the monthly payment (principal and interest) of the old mortgage (the present worth of the current payment of principal and interest on the displacement property).
Standard Buy-Down	New mortgage dollar amount is the same or larger than the computed amount for a new mortgage, and the term is the same or longer than that of the old mortgages.
Reduced New Mortgage Buy-Down	The new mortgage dollar amount is less than the computed amount for a new mortgage.
Reduced New Mortgage Term Buy-Down	The term of the new mortgage is less than that of the old mortgage.
Reduced New Mortgage and Term Buy-Down	The new mortgage dollar amount and term are less than these factors for the old.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.07 Multi-Use Properties – Segregation of MD Payments

The value of the owner's unit is the base for determining payment where displacement or replacement property is more than a single-family dwelling (10-EX-19). The percentage that the owner's unit contributes to the total value of property is used to compute payment. When rental rates are used, the economic rent of the owner's unit is used.

10.04.12.08 Home Equity Loans (49 CFR 24.401[d])

To compute an MD when the displacee has a home equity loan on the displacement property, the loan balance is the lesser of the present unpaid mortgage balance, or the unpaid balance that existed 180 days prior to the initiation of negotiations. This is important because a home equity loan mortgage instrument could allow the borrower to increase the mortgage balance at will. The interest rate is the prevailing interest rate for the same kind of home equity mortgage instrument. If the home equity mortgage encumbering the acquired property has no set amortization of principal, use the prevailing amortization period of the current market.

10.04.12.09 Government Subsidized Loans

When the displacee has a loan with a government subsidized interest rate that produces a reduced payment on the displacement dwelling, the terms of the loan usually require that the interest subsidy (the cumulative difference between what the displacee paid with the subsidized rate and would have paid without it) be paid upon the sale or other conveyance of the property. Thus, while the subsidy creates an accumulating debt for the mortgagor (displacee), the mortgagor is not required to make monthly or other periodic payments against that debt prior to conveyance. The interest subsidy, therefore, is not a "mortgage" within the meaning of the Uniform Act and, as such, should not be part of an MD. The interest subsidy is a liability to the owner and paying it out of the proceeds of the sale of the displacement property is no different from paying back a mechanic's lien or other similar liability. To compute an MD when a subsidized loan is present, the loan balance is the balance without the subsidy, the term is the remaining term on the loan without additional time for repaying the subsidy, and the interest rate is the subsidized interest rate.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.10 Balloon Payments

On a mortgage with a balloon payment, use the mortgage balance, interest rate, and monthly payment amount that are in effect on the date of acquisition. The monthly payment is normally predicated on a term longer than the actual term of the mortgage, so the computed remaining term is greater than the actual remaining term of the mortgage. Use of the computed remaining term provides the appropriate MD payment.

10.04.12.11 Multiple Mortgages

If there is more than one mortgage, compute the buy-down by completing the computations for each mortgage using the terms of that mortgage. If there is an old second mortgage that has a higher interest rate than any available rate, the buy-down amount will be zero, but you then add points to arrive at an MD. The points are still eligible even though the new mortgage is at a rate that does not exceed the old mortgage.

The RAP Agent must compare the total loan balances when there are multiple mortgages at the displacement and/or replacement properties to ensure that the "lesser of" is used in calculating the MD.

10.04.12.12 Reverse Mortgages (49 CFR 24.401[e] and Appendix A, as it Relates to 49 CFR 24.401[e])

The purpose of the Mortgage Differential (49 CFR 24.401) is to reduce the mortgage balance on a new mortgage to an amount, which could be amortized with the same monthly payment for principal and interest as that for the mortgage on the displacement dwelling.

Under 49 CFR 24.2(a) "Reverse mortgage (also known as a Home Equity Conversion Mortgage [HECM])" means a first mortgage which provides for future payments to the homeowner based on accumulated equity and which a housing creditor is authorized to make under any Federal law or State constitution, law, or regulation. See 12 U.S.C. 1715z-20 for additional information. It is a class of lien generally available to persons 62 years of age or older. Reverse mortgages do not require a monthly mortgage payment and can also be used to access a home's equity. The reverse mortgage becomes due when none of the original borrowers lives in the home, if taxes or insurance become delinquent, or if the property falls into disrepair.

© 1994-2025 California Department of Transportation. All rights reserved.

A property owner who has an HECM is entitled to be placed in similar circumstances. Therefore, payments to enable an in-kind replacement, including costs to create another HECM, are eligible expenses. These potentially include a price differential, mortgage interest differential, administrative costs, and incidental expenses (mortgage insurance premium, loan origination fee, and closing costs).

Note that most reverse mortgages are monthly adjustable rate mortgages, so any interest differential payment would be minimal.

Should the displacee elect to rent instead, they would be entitled to benefits available under 49 CFR 24.401(g), Appendix A and RW Manual 10.04.14.00.

If the existing reverse mortgage was a lump-sum or line-of-credit which has been exhausted, then the agency is not under obligation to replace those amounts, but only to replace the reverse mortgage with a reverse mortgage with terms and equity similar to the displacement reverse mortgage.

According to 49 CFR 24.401(e) on reverse mortgages, the payment for replacing a reverse mortgage shall be the difference between the existing reverse mortgage balance and the minimum dollar amount necessary to purchase a replacement reverse mortgage which will provide the same or similar terms as that for the reverse mortgage on the displacement dwelling. In addition, payments shall include other debt service costs, if not paid as incidental costs, and shall be based only on reverse mortgages that were valid liens on the displacement dwelling for at least 180 days prior to the initiation of negotiations. Paragraphs (e)(1) through (4) of this section shall apply to the computation of the mortgage interest differential payment required under paragraph (d) of this section, which payment shall be contingent upon a new reverse mortgage being purchased for the replacement dwelling.

1. The payment shall be based on the difference between the reverse mortgage balance and the minimum amount needed to qualify for a reverse mortgage with the similar terms as the reverse mortgage on the displacement dwelling; however, in the event the displaced person obtains a reverse mortgage with a smaller principal balance than the reverse mortgage balance(s) computed in the buydown determination, the payment will be prorated and reduced accordingly. (See Appendix A to this part, section 24.401[e].) The reverse mortgage balance shall be that balance which existed 180 days prior to the initiation of negotiations or the reverse mortgage balance on the date of acquisition, whichever is less.

© 1994-2025 California Department of Transportation. All rights reserved.

2. The interest rate on the new reverse mortgage used in determining the amount of the eligibility shall not exceed the prevailing rate for reverse mortgages currently charged by mortgage lending institutions for owners with similar amounts of equity in their units in the area in which the replacement dwelling is located.

3. Purchaser's points and loan origination, but not seller's points, shall be paid to the extent:
   i. They are not paid as incidental expenses;
   ii. They do not exceed rates normal to similar real estate transactions in the area;
   iii. The agency determines them to be necessary; and
   iv. The computation of such points and fees shall be based on the reverse mortgage balance on the displacement dwelling plus any amount necessary to purchase the new reverse mortgage.

4. The displaced person or their representative shall be advised of the approximate amount of this eligibility and the conditions that must be met to receive the reimbursement as soon as the facts relative to the person's current reverse mortgage are known; the payment shall be made available at or near the time of closing on the replacement dwelling in order to purchase the new reverse mortgage as intended.

Other agency options (not recommended unless elected by the displaced person, since they do not place the person into the same situation as the displacement reverse mortgage provided):

- A direct loan as set forth in §24.404 under housing of last resort.
- A life estate interest in a comparable replacement dwelling under replacement housing of last resort.
- Agency purchases a comparable replacement dwelling and retains ownership and conveys a leasehold interest to the owner for his/her lifetime.
- Agency offers a comparable replacement rental dwelling to convert the homeowner-occupant to tenant status.

To date, very few reverse mortgages have been written. If the RAP Agent encounters a reverse mortgage, the RAP Senior should contact the HQ RAP Senior.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.12.13 Adjustable Rate Mortgages (ARM)

If the displacement mortgage is an Adjustable Rate Mortgage (ARM), use the mortgage balance, interest rate, and monthly payment amount that were in effect on the date escrow closed or the State had control and possession.

It is expected that replacement ARM mortgages are the more cost-effective replacement mortgage financing for a predisplacement ARM that has not yet adjusted or has interest adjustment specifications that remain more favorable than currently available fixed rate mortgage financing. If a replacement ARM with equivalent rate adjustment specifications and terms at the displacement ARM is available that would result in a lower MD than the fixed rate mortgage, the available ARM should be used to compute the amount of the MD.

10.04.13.00 Incidental Expenses (IE) (49 CFR 24.401[f])

The displacee may be eligible for reimbursement for those necessary and reasonable costs actually incurred by the displaced person incidental to the purchase of a replacement dwelling, and customarily paid by the buyer including:

1. Legal, closing, and related costs, including those for title search, preparing conveyance instruments, notary fees, preparing surveys and plats, and recording fees.
2. Lender, FHA, or VA application and appraisal fees.
3. Loan origination or assumption fees that do not represent prepaid interest (limited to the amount of the displacement mortgage). Only points not paid as part of the MD are eligible.
4. Certification of structural soundness (e.g., home inspection) and termite inspection when required. Other inspections normally required by the buyer that are in the interest of protecting the health and safety of displacees are also an allowable expense:
    - Roof inspection
    - Lead based paint
    - Asbestos
    - Water Heater strapping
5. Credit report.
6. Owner's and mortgagee's evidence of title, e.g., title insurance, not to exceed the costs for a comparable replacement dwelling.
7. Escrow agent's fee (limited only by what is actual and reasonable for the selected Escrow Company).

© 1994-2025 California Department of Transportation. All rights reserved.

8. State revenue or documentary stamps, sales or transfer taxes (not to exceed the costs for a comparable replacement dwelling).
9. Such other costs as the RAP Senior determines to be incidental to the purchase, and a standard expense for purchases in the actual replacement area. Examples:
    - Tax report service fees.
    - Sales or use tax on mobile homes.
    - Mortgage Insurance Premium (MIP) or Private Mortgage Insurance (PMI) payments that have been paid in escrow (limited to the amount of the displacement mortgage), and not part of the monthly payment.
    - Association fees that are required on a one-of-a-kind basis as part of displacee's equity position in the replacement property.

Fees associated with a new loan (e.g., appraisal report, credit report, lenders processing or packaging costs) can only be paid if the displacement property had a bona fide mortgage at the time of acquisition.

10.04.13.01 Incidental Expense Limitations (IE)

The following expenses are not reimbursable:

- Expenses incurred by the State's grantor in the acquisition of grantor's property.
- Points that are paid as part of the MD payment.
- Costs paid in advance by the seller of the replacement property and prorated in escrow, such as taxes, insurance, and condominium fees.
- Mobile home sales or use tax on the difference if the actual cost exceeds the calculated replacement cost.
- Motor vehicle registration fees on mobile homes.
- MIP that has been added to the loan amount.
- Warranty insurance.
- Additional costs incurred in securing a larger mortgage on the replacement dwelling than existed on the displacement dwelling.

10.04.13.02 Proof of Payment

Proof of payment of actual expenses is documented by showing separate items on the certified copy of the closing escrow statement, receipts or statements, and canceled checks.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.13.03 Incidental Expense and Mortgage Financing (49 CFR 24.401[b][3] and 24.401[f])

Where there is no mortgage on the displacement property, the costs incurred in connection with securing mortgage financing on the replacement property should not be considered as an eligible IE. These costs are not considered necessary to enable the displacee to relocate to a comparable property.

10.04.13.04 Mortgage Insurance Premiums (MIP)

The Department of Housing and Urban Development (HUD) has established a process for collecting MIP for certain mortgages that HUD insures. Information about MIPs for HUD should be obtained from the local HUD Office or displacee's lender.

Under the new system, the borrower can:

1. Pay a single premium on the mortgage as an up-front cost paid into escrow. This payment represents the total premium obligation for the insured loan; or
2. Finance 100% of the MIP by adding the premium obligation to the loan amount. In effect, this option allows the borrower to finance the MIP over the term of the mortgage loan at the same interest rate.

Mortgage Insurance Premium is reimbursable as an eligible IE if the total premium is paid through escrow for the replacement property (Item #1). It may also be reimbursed as part of the MD expense if the premium is financed as part of the mortgage (Item #2). Reimbursement is limited to the actual amount of MIP that would be required on the unpaid balance of the old loan or the amount of MIP required on the new loan for a comparable replacement dwelling, whichever is less.

The RAP Agent should inform all displacees eligible for MIP reimbursement of both options and advise them that they can maximize their entitlement dollars by selecting the single-premium option.

The amount of MIP varies depending on the term of the loan, credit status of the borrower, and whether the premium is paid up front or financed.

A factor developed by HUD is multiplied by the amount of the mortgage to determine the amount of MIP. Exhibit 10-EX-16 shows the MIP factors and procedures for the two options.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.13.05 Private Mortgage Insurance (PMI)

In certain instances, conventional lenders require borrowers to pay PMI to obtain a loan. Since the rates charged by firms providing PMI are competitive in nature, no set formula can be used to establish a payment reimbursement procedure.

Generally speaking, a borrower is required to pay the first year's premium up front in escrow. The premium for the remaining term is added to the monthly mortgage payment and collected accordingly. The amount of PMI paid up front in escrow is eligible for reimbursement as an incidental expense.

Payment is based on the proportional share of PMI applied to the remaining balance of the loan on the displacement dwelling or the loan on a comparable replacement dwelling, whichever is less.

10.04.14.00 Rental Assistance: Converting the Price Differential (PD) to a Rent Differential (RD) (49 CFR 24.401[g])

Under 49 CFR 24.401(g), the conversion of a PD to an RD is called Rental Assistance. A 90-day owner-occupant may elect to rent, instead of purchase, a DS&S replacement dwelling. If so, the 90-day owner-occupant should be advised that they can receive an RD in lieu of the entire RHP (PD, MD, and/or IE) for purchasing a replacement dwelling. Inform the displacee a new RHV will be prepared and Conditional Entitlement Letter provided. A new 90-day occupant Conditional Entitlement Letter will be accompanied by a cover letter stating that the new comparable rental address and computation are being provided per their request.

The maximum RD is calculated in the same manner as with 90-day occupants, except that the rent at the displacement property is based on economic rent, and the RD cannot exceed the calculated Price Differential. If the PD is zero, then the RD is zero. No new RHV is necessary. The monetary limit of $9,570 does not apply in instances of rental assistance.

Any advanced monies from the RHPs (e.g., credit report and appraisal fees paid into escrow for a potential purchase) that have already been paid should be deducted from the RD to avoid duplicate payments.

© 1994-2025 California Department of Transportation. All rights reserved.

The 90-day/30-day Notices required under 49 CFR 24.203(c) that are sent to a 90-day owner-occupant who chooses to rent will provide the addresses of comparable replacement properties that are available for rent, not sale.

The displacee must occupy the rental within 1 year from the date he or she moves from the displacement dwelling. Downpayment assistance is not applicable under this section.

10.04.14.01 Conversion of Payment (49 CFR 24.403[e]) for 90-Day Homeowner-Occupants

A displacee who initially rents a replacement dwelling and receives an RD may be able to convert their status to homeowner if a DS&S replacement property is acquired within the one-year prescribed period (see Section 10.08.02.00). This can either be an eligible 90-day owner-occupant or an eligible 90-day tenant converting from an RD to down payment assistance. For information on conversions related to 90-day tenants, see section 10.04.26.04.

An eligible 90-day owner-occupant that initially rents a replacement property (see 10.04.14.00) may still be eligible for the full RHP if a DS&S replacement property is acquired within one year of the prescribed period. The "spend-to-get" requirement for the purchase of the replacement property is based on the last RHV. The amount of the RD paid when the initial replacement property was rented must be deducted from PD, MD, and/or IE that the displacee may be eligible to receive.

An eligible 90-day occupant that initially rents a replacement property may still be eligible for a DP if a DS&S replacement property is acquired within one year of the prescribed one-year period (see Section 10.08.02.00). The amount of the RD paid when the initial replacement property was rented must be deducted from the total RD based on the last RHV. The remaining amount can be used as the down payment and incidental expenses.

However, an eligible displacee who occupies a replacement dwelling that costs less than the comparable property used in the RHV, and would otherwise qualify for the full RHP, cannot relocate into a higher-cost DS&S dwelling at a later time and claim the remaining RHP. Once the replacement property has been inspected and any or all of the RHP paid, the displacee is vested and the maximum amount of the RHP is established.

© 1994-2025 California Department of Transportation. All rights reserved.

EXAMPLE – 90-day Owner-Occupant who rents:

Comparable Replacement Property lists for:	$180,000
Fair Market Value of Displacement property:	$170,000
Maximum Price Differential:	$ 10,000

Actual fair market rental of the replacement property: $1,800 per month
Fair market rental of the displacement property: $1,600 per month
Difference of $200 per month x 42 months = $8,400 Rent Differential

Owners can receive a $8,400 Rent Differential since it is less than the maximum Price Differential ($10,000). They also have one year from the date they occupied the replacement property rental to convert back to an owner and receive the balance of the Price Differential ($10,000 - $8,400 = $1,600), plus any entitlement they may qualify for as a Mortgage Differential and Incidental Expense. However, they would not be entitled to an additional moving payment for the second move.

10.04.15.00 Last Resort Housing (LRH) Guidelines for 90-Day Owner-Occupants (49 CFR 24.404[c])

The usual method for providing Last Resort Housing (LRH) is by making payments exceeding the statutory limits. When an LRH Super RAP payment (>$41,200) will be made to a 90-day owner-occupant, every effort should be made to deposit all the funds into escrow. However, should the displacee file a claim after the close of escrow on the replacement property, the displacee can be paid any RHP due directly.

Other methods of providing Last Resort Housing include those outlined in Table 10.04-A.

For additional Last Resort Housing Guidelines, see Exhibit 10-EX-44.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.16.00 Replacement Housing Payment For 90-Day Occupants Eligibility (49 CFR 24.402[a])

A tenant occupant displaced from a dwelling, who has occupied the property for at least 90 days prior to the ION, may be entitled to an RHP in the form of an RD or a Down Payment (DP) if the displacee rents, or purchases, and occupies a DS&S replacement dwelling within one (1) year after the date he or she moves from the displacement dwelling.

Only one replacement housing or rental payment shall be made for each dwelling unit, except in the case of multifamily occupancy of one dwelling unit (10.04.17.00).

10.04.16.01 Rent Differential (RD) Offer

The RD is the amount offered to the displacee, in writing, which provides displacees with an estimate of monthly payments they can rely on as they seek replacement dwellings. If the RD offer is not acted on within 180 days, it shall be automatically withdrawn and a new RD will be calculated based on the new monthly rent at the displacement dwelling.

The displacee must be advised in advance that the time period to act on the original RD offer will be withdrawn if a replacement property is not located soon and that the new RD may be more or less than the original RD offer, depending on the market and the monthly rent the displacee has been paying.

10.04.16.02 Amount of Payment (49 CFR 24.402[b][1])

An eligible displaced person that rents a replacement dwelling is entitled to a payment not to exceed $9,570 for rental assistance, prior to LRH provisions. Such payment shall be 42 times the amount obtained by subtracting the base monthly rental (10.04.16.00) for the displacement dwelling from the lesser of:

i. The monthly rent and estimated average monthly cost of utilities for a comparable replacement dwelling; or
ii. The monthly rent and estimated average monthly cost of utilities (10.04.16.01) for the DS&S replacement dwelling actually occupied by the displaced person.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.17.00 Base Monthly Rent (49 CFR 24.402[b][2])

The base monthly rent for the displacement dwelling is the lesser of:

i. The average monthly cost for rent and utilities at the displacement dwelling for the three (3) months prior to the ION.
   - For an owner-occupant, use the economic rent for the displacement dwelling.
     - if owner rents the property back from the Region/District after escrow closes, use the actual rent paid (including estimated utilities) after a three (3)-month period has passed.
   - For a tenant who paid little or no rent (10.04.16.02) for the displacement dwelling, use economic rent,
     - unless its use would result in a hardship because of the person's income or other circumstances; or

ii. Thirty (30) percent of the person's average monthly gross household income (10.04.18.00) if the annual amount is classified as "low income" by the U.S. Department of Housing and Urban Development (HUD) in its most recently published Uniform Relocation Act Income Limits ("Survey") (see HUD's Low Income Chart), or

iii. The total of the amounts designated for shelter and utilities if receiving a welfare assistance payment from a program that designates the amounts for shelter and utilities. The portion of the welfare assistance designated for food (e.g., food stamps) is specifically excluded from being considered as income (7 USC Section 2017[b]).

10.04.17.01 Utilities

Utilities are defined as expenses for electricity, gas (and other heating and cooking fuels), water, and sewer/septic. Other utilities normally included in a local utility agency bill such as street cleaning, neighborhood cleanup, storm drains, etc., must not be included in the Rent Differential.

The term "average monthly cost of utilities" means the average monthly cost of the displacee's utility costs for the last 12 months.

The term "estimated average monthly utility cost" means the District's estimate of utility expenses for the comparable replacement property considering its size and location.

© 1994-2025 California Department of Transportation. All rights reserved.

The cost for heat is usually included in a natural gas or electric bill. It is appropriate to consider the cost of wood or coal if they are typically used for heat in the area. Liquefied gas is also an appropriate utility expense.
The District is responsible for developing estimated average utility costs related to the replacement comparables. Each district, and often each neighborhood, will have different data sources. The utility companies often have the most reliable information; HUD or local housing agencies may also have useful information. If there are no reliable data sources, then area survey methods are used. Unless absolutely necessary, an area wide survey is not needed. Contacts with local utility companies are usually sufficient.

10.04.17.02 Calculating Utilities

The RAP Agent will obtain a list of utilities included in the rental rate from the landlord unless the information was obtained during the FWO and noted on the Owner's Certificate of Tenants. The tenants will be instructed during their First RAP Call to obtain actual costs from their utility providers. Ideally, the utility providers should respond to the tenant's request by sending a formal letter stating that:

> "monthly average of your actual utility bill for *(type of utility)* for the last 12 months of service at the *(displacement address)* was $*(average monthly payment)*."

The RHV report must show the utilities included in the displacement rent and the comparable replacement rents. The RD calculation is based on the displacement rent plus the actual average monthly utilities that are the responsibility of the displacee, and the most comparable replacement rent plus the estimated average monthly utilities that would be the responsibility of the displacee.

10.04.17.03 Little or No Rent (49 CFR 24.402[b][2][i])

Little or no rent is defined as a rental rate that is unreasonably below the market rental rate for a comparable dwelling in the area. The term "little rent" is defined as 25% below the market rent established in the appraisal.

The provision of little or no rent addresses payment computation for occupants who pay no rent or unreasonably low rent and for whom a payment based on such rent would result in a windfall. If the occupant's actual rent is below market rent, the RAP Senior must document in the RAP file that no kinship, friendship, or contrivance exists and that the actual rent will be used in the payment computation.

© 1994-2025 California Department of Transportation. All rights reserved.

If the RAP Senior determines that a situation exists, such as tenant is providing a service in lieu of all or a portion of rent, or the tenant's relationship to landlord (e.g., kinship or friendship) may not result in an arm's length transaction, then economic rent (without including the actual average utilities) must be used to calculate the RD.

However, if the use of economic rent will create a hardship for the displacee, the RAP Agent must use the actual rent and document the RAP file justifying the use of actual rent vs. economic rent.

In the event a displacee enters into a kinship friendship situation at the replacement dwelling for an amount known to be much higher than market rent for the area (but which would maximize their RHP), claims should be supported by such documentation as may be reasonably required to support expenses incurred (49 CFR 24.207[a]). The Relocation Agent may verify claims by asking for supporting documentation.

These procedures do not apply to Department-owned properties where actual rent is less than fair market rent due to the Department's affordable rental rate policy.

If displacee's rental rate is lower than market rent because of a public subsidy and the subsidy of a similar private or public subsidy program is available to displacee and will be continued after displacement, the market rent of displacement dwelling is used in the computation. If the subsidy will be discontinued after the tenant vacates, actual rent is used. It must be documented that public housing is not available.

10.04.18.00 Subsidized Housing

Rent Differentials for tenants who occupy publicly subsidized rental housing and relocate to private housing or publicly subsidized housing are calculated so a tenant will not receive duplicate payment for a rental subsidy through both the Relocation Assistance provisions and a Federal Rental Subsidy Program. Publicly subsidized housing is defined as:

> "Low rent public housing, FHA Sections 221(d)(3), 236 and other existing projects where rates are set on the basis of the tenant's income."

© 1994-2025 California Department of Transportation. All rights reserved.

Subsidized housing can also be any rental assistance from a federal, local or other quasi-governmental authority (including stipends from BIA or other tribal entities). Under Appendix A as it relates to 49 CFR 24.2(a) "Comparable replacement dwelling"(ix), the person's RD will be computed on the basis of the person's actual out-of-pocket cost for the replacement housing and associated utilities after the applicable Government assistance has been applied.

Occupants of publicly subsidized rental housing must be identified, and all replacement housing valuations and procedures must comply with the following:

- Tenant moves from publicly subsidized housing to publicly subsidized housing – the displacement rent and actual replacement rent are the amounts actually paid by the tenant.
- Tenant moves from privately financed housing to publicly subsidized housing – the existing rent is calculated in accordance with the provisions of Section 10.04.20.00. The replacement rent is the amount the tenant pays for the subsidized housing.
- Tenant moves from publicly subsidized housing to privately financed housing – the existing rent is the amount the tenant pays for the publicly subsidized displacement housing, not including the supplemental rent furnished by the public agency.

The third option is to be used only when it can be documented that DS&S publicly subsidized housing is not available to displacee.

However, if the tenant qualifies for comparable DS&S subsidized housing that is available in the replacement area, but the tenant chooses to rent nonsubsidized housing, the RD is based on what the tenant would have received if relocating to subsidized housing.

The RAP Agent should explain to the displacee that if they go off the government housing subsidy program, then the relocation housing payment is considered as income for the purposes of determining if they are eligible to return to a subsidized housing program in the future. Additionally, there is no guarantee they would be able to do so, and if so, when.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.18.01 Section 8 Comparable Replacement Housing

49 CFR 24.2(a) "Comparable replacement dwelling"(ix)

For a person receiving Government housing assistance before displacement, a dwelling that may reflect similar Government housing assistance. In such cases, any requirements of the Government housing assistance program, including fair housing, civil rights, and those relating to the size of the replacement dwelling, shall apply. However, nothing in this part prohibits an agency from offering, or precludes a person from accepting, assistance under a Government housing program, even if the person did not receive similar assistance before displacement, subject to the eligibility requirements of the Government housing assistance program. An agency is obligated to inform the person of his or her options under this part and the implications of accepting a different form of assistance than the assistance that the person may currently be receiving. If a person accepts assistance under a Government housing assistance program, the rules of that program apply, and the rental assistance payment under §24.402 would be computed on the basis of the person's actual out-of-pocket cost for the replacement housing and associated utilities after the applicable Government housing assistance has been applied. In determining comparability of housing under this part:

A. A public housing unit may qualify as a comparable replacement dwelling only for a person displaced from a public housing unit.

B. A privately owned unit with a housing project-based rental program subsidy (e.g., tied to the unit or building) may qualify as a comparable replacement dwelling only for a person displaced from a similarly subsidized unit or public housing unit.

C. An offer for tenant-based rental assistance, such as a HUD Section 8 Housing Choice Voucher, may be provided along with an offer of a comparable replacement dwelling to a person receiving a similar subsidy assistance or occupying a privately owned subsidized unit or public housing unit before displacement. The displacing agency must confirm that the owner will accept tenant-based rental assistance before offering the unit as comparable replacement housing. (See Appendix A to this part, section 24.2(a), definition of comparable replacement dwelling.)

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.19.00 Monthly Gross Income for Low Income RD

Thirty percent (30%) of a household's gross income can be used to determine the RD, but only if the annual income is classified as low income under the U.S. Department of Housing and Urban Development's Annual Survey of Income Limits (usually updated annually). RAP Agents can find the list at the internal RAP webpage (internal Caltrans link) and at FHWA's website. This is one way to calculate base rent based on 49 CFR 24.402(b)(2).

The RD is based on the lesser of the base monthly rent and utilities at the displacement dwelling OR 30% of the household's average monthly gross household income if the total amount is classified as low income for the displacement area (U.S. Department of Housing and Urban Development [HUD]).

To determine if the 30% rule applies, the RAP Agent shall advise the displacee of this method of computing the RD and ask if the actual monthly rent (plus estimated average monthly utilities) of the displacement dwelling exceeds 30% of monthly gross income. If the answer is "no," the Agent annotates the parcel diary. If the answer is "yes," the Agent:

- Secures an Income Certification (RW 10-39) from the displacee using 10-EX-39 as a guide on appropriate sources of income.
- Compares the annual gross income on the Certification to the amount identified as low income for the displacement area on HUD's survey (see Web site above). If the income is higher, the displacee's income cannot be used in the RD calculation. The RAP Agent must use the annual income for the entire household and compare it to the total number of persons living in the displacement area regardless of age or residency status.
- Computes the rental RHP per Section 10.04.15.00, Last Resort Housing, when applicable.

EXAMPLE:

1. Husband and wife live alone in a residence, but the Income Certification shows that all income is from only one person. Follow HUD's list for "2 persons."
2. Husband and wife live in a residence with two minor children. Follow HUD's list for "4 persons."
3. Husband and wife live in a residence with two minor children, and a relative who is not a legal U.S. resident. Follow HUD's list for "5 persons."

© 1994-2025 California Department of Transportation. All rights reserved.

Monthly gross income is based on all income from all persons over 18 years old for the 12-month period preceding the date of determination of income. Do not include the income of a full-time student over the age of 18 UNLESS that person is the head of the household or the person's spouse. HUD's survey is usually updated annually and lists all the counties in California.

10.04.20.00 Income Verification

When displacees claim that income should be the basis for calculating the RD, all household members with an income must complete the Income Certification (RW 10-39). Relocation benefits vest at the time of the Initiation of Negotiations (ION). Therefore, the date of determination is either the date of the Notice of Intent to Acquire (NIA) or the First Written Offer (FWO).

The income stream in existence at the time of the ION should not be adjusted if the displacee's income changes at a later time. The income is verified once and is not adjusted for subsequent events. There is no statutory provision for adjusting relocation claims or payments based on changes in income after the eligibility determination has been made.

The RAP Agent must verify all income-based computations by reviewing displacee's income records. [A copy of an income tax return for the tax year preceding the determination should not be the only source for verifying income for the last 12 months. However, it can be used as an indicator of low income if no other documentation is available. The displacee may have to request a copy of their most recent tax return from the State Franchise Tax Board. (Note: Advise the displacee that they may have to pay for the copies.) Both the Agent and the displacee should review "Gross Income for the Purpose of Calculating Rental Differentials" (10-EX-26) prior to completing and reviewing the Income Certification to ensure the appropriate type of income is considered.

The RAP Agent must document the type of documentation used to verify the household's gross income for the last 12 months, such as employers or credit reporting sources, pay stubs, benefit statements, bank deposits, and other periodic receipts of payment.

A diary entry is made indicating the method and result of the income verification. When income has been verified and documented in the District's file, return any documents that were used to verify the Income Certification to the displacee. After the RAP Agent has verified all the information on the Income Certification, a decision must be made as to its validity. Because of the nature of the payments based on income, the burden of proof rests on

© 1994-2025 California Department of Transportation. All rights reserved.

the displacee. If the RAP Agent has reason to believe the information is incomplete or incorrect because the rent and utilities to gross income ratio is too high (60% to 85%), the file should be documented and the displacee advised that the Rent Differential will be based on the actual rent or the economic rent, with utilities.

Use the following guidance when determining the displacee's ability to pay for monthly living expenses:

The RAP Agent should deduct the actual monthly rent and utilities from the monthly income as stated on the income certification to determine if it is feasible that the displacee has enough remaining funds to pay for daily living expenses.

Food	14%	If the household receives food stamps, use 0%.
Transportation	19%	If no one is working outside the home, use 10%.
Medical Costs	2%	If the household receives MediCal or Medicaid, use 0%.
Other	5%	Clothing, nonperishables, ineligible utilities.
Minimum %	40%	15% if the household receives food stamps, MediCal and no one works outside the home.

The RAP Agent can make slight adjustments to the percentage if the displacee's situation warrants same, such as a student living in a dorm or boarding situation, the household is excessively large, the members of the household raise or grow their own food, or several families are engaged in bartering services for food and clothing. However, if the household receives a benefit or service on a regular basis in lieu of all or part of their income (e.g., waiter receives meals at a restaurant, or a bus driver gets to take the vehicle home each night), then the value of that service or benefit must be included in the total household income.

Exclusions to income are listed on 10-EX-26. Household income for purposes of this regulation does not include program benefits that are not considered income by federal law. An additional list of income exclusions can be found at FHWA's website. If there is a question on whether or not to include income from a specific program, contact HQ.

If the documentation provided is determined to be accurate and reasonable, the file must be documented outlining how the 30% was verified and calculated.

© 1994-2025 California Department of Transportation. All rights reserved.

Non-tenured occupants MUST provide an Income Certification prior to determining if they are eligible to receive any RHPs.

If any member of the household will not complete their portion of the Income Certification or provide evidence of income, the entire household's income will not be considered in computing the RD.

10.04.21.00 Computing the Rent Differential Payment (49 CFR 24.402[b])

The RD is calculated by comparing base rent plus average monthly cost of utilities on the displacement dwelling to base rent plus estimated average monthly cost of utilities on the actual replacement dwelling. If the computed rental assistance payment exceeds $9,570, see 10.04.23.00 regarding Last Resort Housing for RD payments.

The utility cost used to verify "spend-to-get" in the actual replacement property is the amount of the estimated average utility costs used in the calculation of the RD. It is not necessary to determine the estimated average utility costs in the actual replacement area.

© 1994-2025 California Department of Transportation. All rights reserved.

EXAMPLE

Displacement Rent	$400 month
Average Cost of Utilities	$150 month
Base Monthly Rent	$550 month

Most Probable Comparable Rent	$500 month
Estimated Average Cost of Utilities	$175 month
Comparable	$675 month

Scenario 1:

Actual Replacement Rent	$475 month
Estimated Average Cost of Utilities	$175 month*
Actual Replacement Rent	$650 month

Must pick the lesser of Actual Replacement Rent or the Comparable to calculate the RD =

$650 - $550 x 42 months = $4,200

Scenario 2:

Actual Replacement Rent	$550 month
Estimated Average Cost of Utilities	$175 month
Actual Replacement Rent	$725 month

Must pick the lesser of Actual Replacement Rent or the Comparable to calculate the RD =

$675 - $550 x 42 months = $5,250

* Always use the Estimated Average Cost of Utilities from the RHV when determining "spend-to-get" at the actual replacement.

© 1994-2025 California Department of Transportation. All rights reserved.

CALCULATING RENTAL ASSISTANCE PAYMENTS

Situation	Method
Average or estimated average rent and average monthly utility costs of the displacement dwelling do not exceed 30% of monthly gross income.	Step 1 – Find the lower of estimated monthly replacement rent or actual rent paid on replacement property, including average monthly utility costs. Step 2 – Determine the average monthly rent and average monthly utility costs of displacement property. Step 3 – If Step 2 result is larger than or equal to Step 1, the answer is zero (0). Step 4 – If Step 2 result is smaller than Step 1, subtract Step 2 amount from Step 1 and multiply the result by 42 (months).
Average monthly rent on the displacement property, including average monthly utilities, exceeds 30% of monthly gross income, and displacee qualifies as "low income," per HUD chart.	Step 1 – Find the lower of estimated monthly replacement rent or actual rent paid on replacement property, including average monthly utility costs. Step 2 – Consult HUD chart to determine if displacee qualifies as low income. If so, continue to Step 3. Step 3 – Determine 30% of monthly gross income of the displacee. Step 4 – If Step 2 result is larger than or equal to Step 1, the answer is zero (0). Step 5 – If Step 2 result is smaller than Step 1, subtract Step 2 amount from Step 1 and multiply the result by 42 (months). NOTE: When rental assistance payments by other public agencies are involved, the average monthly rent is the amount actually paid by displacee excluding any rent subsidy. Calculate the payment as above.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.22.00 Manner of Disbursement for the RD (49 CFR 24.402[b][3])

An RD may be disbursed in either a lump sum or in installments. However, the full amount of the RD vests immediately when the displacee occupies a DS&S replacement dwelling and "spends-to-get," even if there is a later change in the person's income or rent, or in the condition or location of the person's replacement housing.

Although rental assistance payments of $9,570 or less are usually made in one lump sum payment, displacee may request annual installment payments that are not to extend more than 42 months beyond the move-out date.

Disbursement of rental assistance payments in excess of $9,570 is made in accordance with the last resort housing guidelines.

10.04.23.00 Rent Differential Payment Procedures – Last Resort Housing (LRH)

Rent Differential payments in excess of $9,570 must be paid in accordance with Last Resort Housing provisions. Such payments that do not exceed $10,000 are usually paid in a single lump sum payment. Payments in excess of $10,000 are paid in a maximum of four payments (see RW 10-41 [internal Caltrans link]).

A displacee may request that installment payments are made even if the Rent Differential is less than $10,000. The RAP Agent must fully document that displacee requested the installment payment option and any subsequent changes in the manner of payment.

Regardless of the amount, displacee's Rent Differential is fully "vested" immediately when they occupy DS&S housing and meet the "spend-to-get" requirement, even if there is a later change in the person's income, occupancy, family characteristics, rental rate, or in the condition or location of the actual replacement property. Recertification of DS&S housing is not required after the initial qualifying inspection.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.23.01 Installment Payments

Last resort housing rental assistance payments in excess of $10,000 are to be disbursed in four payments as follows:

Rent Differential Payment Schedule

Advanced Payment	Prior to Occupancy	June 15th	First month's rent, last month's rent, and security deposit.
1st installment	Date of Occupancy	July 1st	6 months of the Rent Differential divided by 42, OR the balance if the total amount remaining after the 1st installment would be less than $10,000.
2nd installment	Six months later	January 1st	6 months of the Rent Differential divided by 42, OR the balance if the total amount remaining after the 2nd installment is less than $10,000.
Final Payment	Six months later	July 1st	Balance of the Rent Differential

© 1994-2025 California Department of Transportation. All rights reserved.

EXAMPLE:

Comparable Rent including $75 utilities $1,500
Displacement Rent including $25 utilities $ 500
= $1,000 x 42 months = $42,000 Rent Differential

Actual Replacement Rent of $1,550 plus the $75 utilities used to calculate the Rent Differential = $1,625

Installments:
Advance Payment to Landlord for the security deposit of $1,000, first month's rent of $1,550, and last month's rent of $1,550 (if requested by the displacee) = Total $4,100.

Balance of Rent Differential ($37,900) paid in three installments. First and second installments of $6,000 ($1,000 x 6 months). The first installment is due within 15 days of displacee's occupancy of the actual replacement property.

One year from the date of occupancy, the balance of $25,900 is paid to the displacee.

There may be times when it is in the Department's best interest to make periodic payments directly to the landlord. (See Exhibits 10-EX-17, Rental Assistance Payments by Installments, and 10-EX-18, Rental Assistance Payment to Landlord.)

RW 10-41 (Computation of Rent Differential Payment) (internal Caltrans link) must show total entitlement, installment amount, and payment periods. Approval of the first installment constitutes approval of the total entitlement and periodic payment schedule.

10.04.23.02 Subsequent Installments

The displacee must be provided with claim forms for subsequent installment payments and the schedule for submitting the claim forms. Displacee must also be advised to inform the RAP Agent of any changes in address or location during the 12-month period.

Thirty days prior to the anniversary date, the RAP Agent shall provide a claim form to displacee. Upon return of signed form, the installment may be paid. No DS&S inspection is required.

© 1994-2025 California Department of Transportation. All rights reserved.

If displacee has vacated replacement property and cannot be found after reasonable effort, no further action is taken with respect to that or subsequent installments unless displacee reappears. When payments are suspended because displacee disappears, the RAP Agent shall document the file to show extent and results of efforts made to locate party.

The suspension time counts toward displacee's eligibility for relocation assistance payments; e.g., disappeared for 42 months, no further payments are authorized.

10.04.24.00 RD Payments – Documentation

Documentation in support of the claim should be in the District RAP file, including:

- Claim form, Form RW 10-02.
- Computation of Rent Differential Payment, Form RW 10-41 (internal Caltrans link).
- Current Replacement Housing Valuation.
- Copy of Rental Agreement for replacement property or evidence of rent paid on the replacement property.

10.04.25.00 Down Payment (DP) (49 CFR 24.402[c][1])

An eligible 90-day occupant (tenant or owner), or Non-tenured occupant, who purchases a DS&S replacement dwelling may convert the RD to a DP. Even if the Rent Differential is zero, an eligible 90-day occupant or Non-tenured occupant is entitled to the minimum DP of $9,570 if they meet the "spend-to-get" requirements.

A 90-day occupant or Non-tenured occupant whose RD is $9,570 or less automatically qualifies for a $9,570 DP. If the RD is over $9,570, the DP will equal the amount of the RD. Example:

- RD $4,200 = DP $9,570
- RD $15,300 = DP $15,300

© 1994-2025 California Department of Transportation. All rights reserved.

A displaced person eligible to receive a payment as a 90-day owner-occupant is not eligible for this payment. A 90-day owner-occupant would be eligible for a price differential in purchasing a replacement dwelling under 49 CFR 24.401. Appendix A of 49 CFR 24.402(c) clarifies that a displaced homeowner who elects to rent a replacement dwelling may not receive more than the eligibility the homeowner would have received as an eligible displaced homeowner purchasing a home.

A Subsequent occupant is not eligible for this payment. If the RD calculation is zero, then the DP would be zero.

10.04.25.01 Application of Down Payment (DP) (49 CFR 24.402[c][2])

The DP is designed to help eligible displacees purchase and relocate to DS&S comparable housing. Eligible displacees may be entitled to receive the full amount of the RD if it is applied toward the down payment for the purchase of the replacement property, even if this results in a 100% purchase. Any remaining RD can be applied to the incidental expenses related to the purchase, including nonrecurring items paid in escrow.

10.04.25.02 Conditions (DP)

The following conditions apply to entitlement of the DP:

- Displacee must meet eligibility requirements in Section 10.04.01.00.
- Displacee may finance by any means or may pay cash.
- Displacee must apply the funds to the DP and nonrecurring IE, up to the amount of the RD.
- Displacee must pay for anything in excess of the calculated entitlement. The District is not committed to paying for DP actually made or required for a replacement.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.25.03 Manner of Disbursement (DP)

If the DP is $9,570, and the displacee is entitled to the full amount after submitting supporting documentation that all the funds will be used for the down payment and the qualifying incidental expenses, the displacee can be paid directly after the close of escrow on the replacement property, or the funds can be assigned by the displacee to the escrow account. If the amount of the DP is over $9,570, the RD must be placed into escrow and applied toward the purchase of housing. The only exception is to repay funds advanced by displacee (e.g., credit report, appraisal fee). Displacees cannot be reimbursed for funds deposited with the Offer and Acceptance (a.k.a. earnest deposits).

10.04.25.04 Conversion of Payment (RD to DP) (49 CFR 24.403[e])

A displaced person who initially rents a replacement dwelling and receives an RD that is less than $9,570 or the full amount (e.g., because an installment payment was made, or the displacee did not "spend-to-get") is eligible to receive a DP if he or she meets the eligibility criteria for such payments, including purchase and occupancy within the prescribed one (1)-year period. Any portion of the RD that has been previously paid shall be deducted from the DP.

EXAMPLE:
Non-LRH (RD = $2,100)

DP allowance	$9,570
Less lump sum rental assistance already paid	-$2,100
Additional State payment toward DP and eligible IE	$5,100

EXAMPLE:
LRH (RD = $21,000)

DP allowance	$21,000
Less installment payment of RD already paid	-$ 2,100
Additional State payment toward DP and eligible IE	$18,900

The remaining cash entitlement must be applied toward the DP or IE for the replacement dwelling being purchased. Escrow instructions must clearly state that none of the remaining entitlement may go directly to displacee.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.25.05 Down Payment into Escrow

The following procedures for DPs into escrow are in addition to those outlined above.

If displacee has agreed to buy a replacement, they shall be advised of the amount available and the need to apply all funds to the purchase of a replacement.

When escrow is opened, the RAP Agent must inform the escrow agent of the DP arrangements and must request:

- A copy of the escrow instructions or a similar document.
- The itemized estimate of escrow expenses, if possible.
- A certified copy of the closing escrow statement and Regulation "Z," if applicable, at the time escrow closes.

After the above information is received and reviewed, the Agent should:

1. Calculate the exact amount of payment.
2. Prepare a claim form and have displacee sign it (Form RW 10-02).
3. Prepare an Assignment of Funds Letter (Exhibit 10-EX-09) and have it signed.
4. Prepare an Escrow Instruction Letter (Exhibit 10-EX-11) to escrow company.

If necessary, the advance payment may be based upon estimated IE with reconciliation at the close of escrow. The RAP Agent should recalculate the DP entitlement and pay any additional costs as soon as they are known, assuring the funds are distributed properly between the loan account and displacee. If correct instructions are given, overpayments will be automatically refunded from escrow. A copy of the certified closing statement is attached when the additional claim is processed.

When escrow has closed, a certified copy of the closing statement is placed in the District RAP file.

© 1994-2025 California Department of Transportation. All rights reserved.

10.04.25.06 Down Payment to Displacee

When escrow on the purchase of displacee's replacement closes before the State makes any payments, displacee is reimbursed for the DP actually applied to the loan and all IE paid in escrow. Any remaining amount of the RD can be paid directly to the lender using an assignment from the displacee.

10.04.25.07 Incidental Expense for 90-Day Occupants and Subsequent Occupants

When an eligible 90-day occupant or Subsequent occupant decides to purchase rather than rent replacement property, a portion of the DP benefit may be attributed to IE. In LRH situations, these amounts may be substantial. The following factors must be taken into consideration when the District pays for these expenses:

- The cost to displacee must be ordinary and necessary for a buyer to pay in a normal transaction where the replacement dwelling is located. Costs may vary from county to county and city to city within California.
- Loan broker, origination, and application fees are usually all inclusive in the MD reimbursement for homeowner-occupants. For tenants, these fees may be added together and paid to the extent they do not exceed predetermined prevailing loan establishment fees.

Eligible IE must be limited to those nonrecurring costs that would have been reimbursable for the 90-day Owner-Occupant (e.g., loan origination fees, title search, recording fees, but not prepaid expenses such as estate taxes and property insurance) but without the usual restrictions that the amounts be limited to the amount of the displacement mortgage or the value of the comparable replacement property.

10.04.26.00 Owner-Occupants with Partial Ownership Interests

When a dwelling is owned by several persons and occupied by one or more owners, the RHP is the lesser of:

- The difference between the owner-occupant's share of the acquisition cost of the acquired dwelling and the actual cost of the replacement dwelling.

© 1994-2025 California Department of Transportation. All rights reserved.

- The difference between the total acquisition cost of the acquired dwelling and the amount determined by the State as necessary to purchase a comparable dwelling.

When the partial owner-occupant purchases a replacement that is less costly than the estimated replacement cost and is DS&S for the owner-occupant, then "spend-to-get" is that party's share in the acquisition price plus the PD. The other partial owner that does not occupy the property is not entitled to a relocation assistance payment (RHP, Nonoccupant Owner who Leases Space to Another) except for possible moving of personal property that is stored on site.

EXAMPLE:

Cost of replacement	$150,000
Cost of acquisition	-$130,000
PD	$ 20,000

Assume there are two partial owners of the acquired dwelling. The partial owner-occupant has a one-half interest in the displacement or $130,000 ÷ 2 = $65,000. The total "spend-to-get" for this partial owner-occupant is $85,000 ($65,000 + $20,000).
