2018 Pilot Bicyclist Collision Monitoring Program

The purpose of this Pilot Monitoring Program is to identify and address bicyclist related high collision concentration locations (HCCLs) and corridors, with the long-term goal of substantially reducing bicyclist fatalities and injuries on the California State Highway System.

This Pilot Monitoring Program addresses Action 2.5 of California Strategic Highway Safety Plan’s Bicycling Challenge Area.

In addition, this pilot program addresses the following targets and objectives:

  - Strategic Objective: Reduce user fatalities and injuries by adopting a “Toward Zero Deaths” practice
  - Target: 10% reduction in number of bicyclist fatalities in a calendar year
- 2017 Traffic Operations Strategic Plan, Targets T1.2.3, T1.2.6, T3.1.1
- Caltrans Mode Share Action Plan 1.0, Tasks 1.5, 2.3, 3.5

Safety is the Department’s highest priority. The improvements initiated by the Pilot Monitoring Program are included in the category of 010 – Safety Improvement Projects.

- Collision Date Range: Most recent five calendar years of data
- Statewide TASAS Selective Accident Retrieval (TSAR) selection criteria:
  - all collisions that include bicyclists, and
  - all collisions that include fatalities or injuries.
- Network Screening Methods
  - HCCLs were identified using dynamic programming, and
  - corridors were identified using a spatial density calculation, which used the variance of inter-crash spacing.

Traffic safety investigations are being conducted at 156 bicyclist related HCCLs and 96 corridors on the State Highway System to determine probable cause and to identify potential countermeasures to reduce collisions involving bicyclists.

Bicyclist safety training was held for statewide traffic safety staff. Workshop training outcomes included:

- Describe core bicyclist safety concepts
- Bicyclist traffic control devices
- Distinguish between various bicyclist facilities
- Identify innovative design features to enhance bicyclist safety
- Relate national objectives and priorities to improve bicycle travel
- Identify means of assessing quality of bicyclist facilities
- Road safety guidelines, and
- Caltrans objectives and targets to improve bicyclist safety and increase travel by bicycle.
