

Transportation Permits Policy Memorandum

Subject: Drill Rig Mast Overhang Over 30'
Date: March 1, 2006
Policy: TPPM 2006-02
Reference: Pilot Car, CTPAC-WG11-012605-001

Objectives

This policy will:

- Allow drill rigs, or any fixed driven vehicle, to have a maximum rear overhang of 35 feet.
- Allow overhang, on fixed driven vehicles, to be measured from center of last axle to match current inspection forms.

Existing Documentation

The following source contains information related to this subject:

Transportation Permits Manual (TPM)

Section 305.2.2 – Booms or Masts

- Front boom or mast extension shall not exceed 30 feet beyond the front of the front tires. The maximum rear extension shall not exceed 30 feet measured from the center of the last axle of the vehicle.

Transportation Permits Manual Change

Section 305.2.2 – Booms or Masts

- Front boom or mast extension shall not exceed 30 feet beyond the front of the front tires. The maximum rear extension shall not exceed 35 feet measured from the center of the last axle of the vehicle.
