

Orange County

Demographic and Economic Profile and Long-Run Forecast

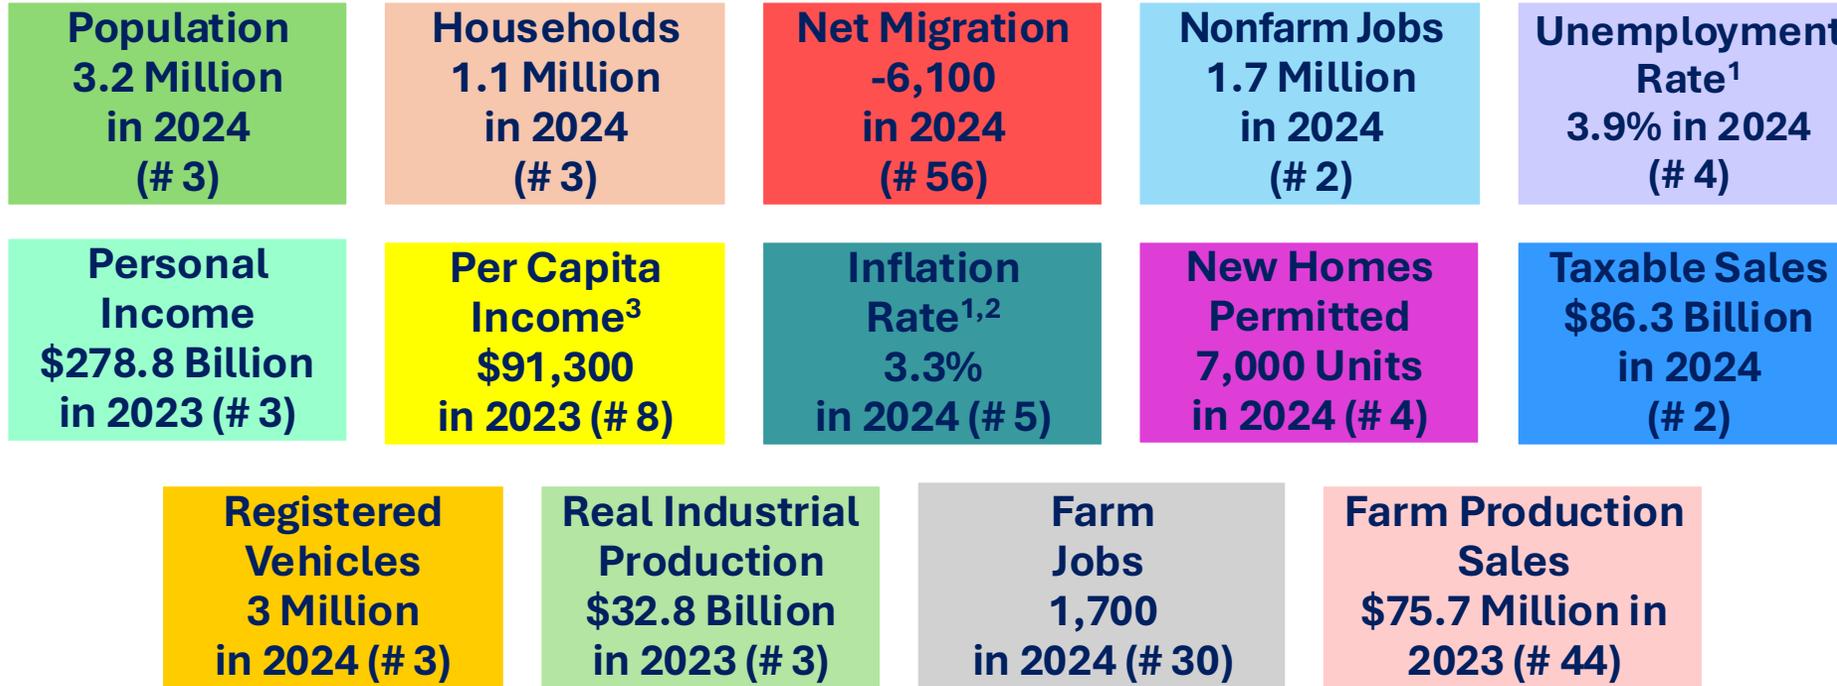

Orange County Profile

- Orange County ranked second among California's counties in non-farm jobs (1.7 million) and taxable sales (\$86.3 billion) in 2024.
- Orange County's median price of a single-family home was \$1,388,000 in 2024, 1.6 times the statewide average of \$867,000 for the same period.
- It costs about \$10,500 a month (\$126,100 a year) for a family of three to live in the county, about 16 percent more than the statewide average, and nearly 1.6 times the cost in Imperial and Kern counties, the cheapest in California with a cost of about \$6,700 a month.

Orange County Latest Actual

Levels and State Rank

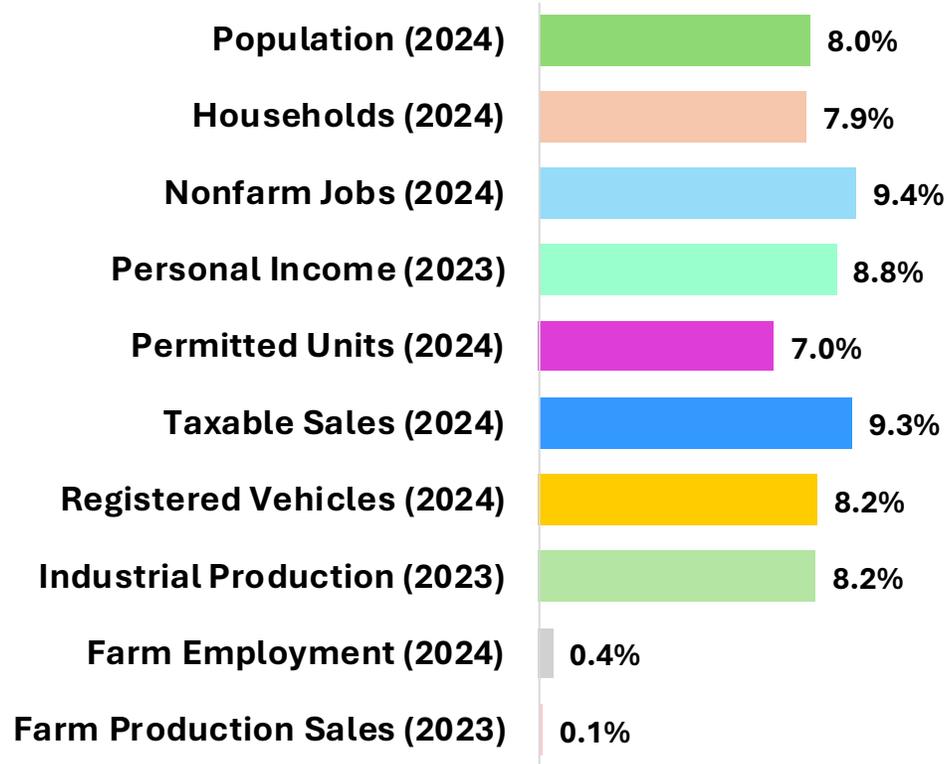

1. Inflation and unemployment rates are ordered from the lowest to highest, such that counties with lower rates rank closer to #1, reflecting a favorable economic status.
2. Inflation rates are based on four regional Consumer Price Index (CPI) estimates produced by the U.S. Bureau of Labor Statistics (BLS). County-level CPI data do not exist, and all 58 counties are assigned to one of the four regions or the statewide inflation forecast, resulting in only five distinct inflation rankings.
3. Per capita income is converted into 2024 dollars using the statewide California Consumer Price Index (CPI).
