## Levels and State Rank

1. Inflation and unemployment rates are ordered from the lowest to highest, such that counties with lower rates rank closer to #1, reflecting a favorable economic status.
2. Inflation rates are based on four regional Consumer Price Index (CPI) estimates produced by the U.S. Bureau of Labor Statistics (BLS). County-level CPI data do not exist, and all 58 counties are assigned to one of the four regions or the statewide inflation forecast, resulting in only five distinct inflation rankings.
3. Per capita income is converted into 2024 dollars using the statewide California Consumer Price Index (CPI).
